

### Talking Points:

## HIPAA Version 5010 Pilot Testing

Question	Answer
Will MaineCare include the submission of 270 transactions with pilot testing?	HIPAA Version 5010 pilot testing will not include the submission of 270 transactions. Pilot testing will focus on end-to-end testing of 837-Institutional and 837-Professional claims only.
Can a trading partner who is certified to submit both 837-Professional and 837- Institutional submit a file for each claim type?	Yes. Those trading partners who are HIPAA Version 5010 certified for both institutional and professional claims can submit one file for each claim type. Each file can contain up to twenty-five (25) transactions.
Can a clearinghouse submit a file for each NPI?	No. Clearinghouses and billing agents are restricted to one file for each claim type they are certified for.
If a trading partner submits a test file, will a BRR be generated if there are errors? If there are errors, can trading partners fix the errors and resubmit?	If a pilot test file is submitted with errors, a business rejection report (BRR) will be generated. The trading partner can fix the errors and resubmit. If the errors are not fixed, only those claims that were submitted without errors will be processed.
