# State of Maine Health Information Technology

## Provider EHR Incentive Program Introductory Meeting for the State Medicaid HIT Plan (SMHP)

**April 2<sup>nd</sup>, 2010**

# Agenda

---

Meeting Objective

---

Health Information Technology Background

---

Incentive Payment Eligibility and Meaningful Use Overview

---

State Medicaid HIT Plan Project

---

Parallel Initiatives

---

Wrap-Up

---

## Meeting Objective

---

The objective of this meeting is to:

- Inform the Associations, Tribes and PHOs of the Statewide and Medicaid specific Health Information Technology (HIT) planning activities currently underway
- Provide an understanding of the ARRA and HITECH Acts and the Provider Incentive Program for the adoption and meaningful use of Electronic Health Records (EHRs) and HIT
- Define your role in the State Medicaid HIT Plan Project activities and what we need from you

---

## HIT Background

---

# Background on Health Information Technology

**HITECH:** The Health Information Technology for Economic and Clinical Health (HITECH) Act, a part of the American Recovery and Reinvestment Act (ARRA), seeks to improve American health care delivery and patient care through an unprecedented investment in health information technology.

**ONC:** ONC is the principal Federal entity charged with **coordination of nationwide efforts** to implement and use the most advanced health information technology and the electronic exchange of health information.

**CMS:** CMS is overseeing the program to provide a **reimbursement incentives for Medicaid and Medicare physician and hospital providers** who are successful in becoming “meaningful users” of an electronic health record (EHR).

## Conceptual Approach to HIT

# Initiatives Funded by ARRA

## Statewide HIT/ HIE Initiative

**ONC  
Grant :  
\$6.6 m**

- 2/3 for HIN
- 1/3 for OSC

### Funding will be used to:

- Build Effective HIE model
- Update Privacy/Security
- Develop HIT workforce
- Remove HIE barriers

### Project Goals:

- Statewide Implementation of EHRs
- Residents with access to life-long health records
- Evidenced-based, clinically effective, efficient care for all people

## State Medicaid HIT Initiative

**CMS  
Funding:  
\$1.4 m**

For Planning EHR  
Incentive Program

### Funding will be used to develop the SMHP, including:

- As-Is Assessment
- Visioning Session
- HIT Roadmap
- Implementation Plan

### Project Goals:

- Incentive payment administration by Jan. 2011
- Program oversight and meaningful use tracking
- Widespread EHR adoption
- Health care quality improvement and information exchange

---

## **Incentive Payment Eligibility and Meaningful Use Criteria**

---

# Who are the Medicaid Eligible Professionals and Hospitals?

|                           | Eligible Professionals (EPs)                                                                                                                                                                                                                                         |                                               | Eligible Hospital (EHs)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                        |

| Threshold for Eligibility | Providers                                                                                                                                                                                                                                                            | Medicaid Patient or "Needy Individual" Volume | Providers                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Medicaid Patient or "Needy Individual" Volume          |
|                           | EPs (general rule)                                                                                                                                                                                                                                                   | 30%                                           | Acute Care Hospitals                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 10%                                                    |
|                           | Pediatricians (eligible for full incentive payments)                                                                                                                                                                                                                 | 30%                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                        |
|                           | Pediatricians (eligible for 2/3 payment)                                                                                                                                                                                                                             | 20%                                           | Children's Hospitals                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | No Medicaid volume threshold to be considered eligible |
|                           | EPs practicing in a FQHC or RHC                                                                                                                                                                                                                                      | 30%                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                        |

# Top 10 Things to Know about Meaningful Use

---

- 1. Meaningful use has a graduated approach; only Stage 1 is defined in detail in the proposed rules.***
- 2. There are a number of measures that need to be submitted to CMS to demonstrate meaningful use, including HIT functionality measures and clinical quality measures.\****
- 3. Hospitals and professionals need to demonstrate meaningful use for a continuous 90-day “reporting period” for the first payment year of incentives.***
- 4. Medicaid EPs and HPs do not need to achieve meaningful use in the first payment year; they only need to demonstrate that they are adopting, implementing or upgrading “certified” EHR technology.***

\* See the Reference Materials section for a full list of Stage 1 Meaningful Use Criteria.

## Top 10 Things to Know about Meaningful Use, cont'd.

5. ***The timing of meaningful use stages varies based upon the first payment year of the Eligible Professional or Hospital.*** The graph below outlines the timing of different payments by payment year.

**Example:** *Maximum* Payment Scenarios for Eligible Professionals who begin adoption in the first year.

| Calendar Year | Medicaid EPs who begin adoption in |          |          |          |          |          |
|---------------|------------------------------------|----------|----------|----------|----------|----------|

| 2017          | -----                              | \$8,500  | \$8,500  | \$8,500  | \$8,500  | \$8,500  |
| 2018          | -----                              | -----    | \$8,500  | \$8,500  | \$8,500  | \$8,500  |
| 2019          | -----                              | -----    | -----    | \$8,500  | \$8,500  | \$8,500  |
| 2020          | -----                              | -----    | -----    | -----    | \$8,500  | \$8,500  |
| 2021          | -----                              | -----    | -----    | -----    | -----    | \$8,500  |
| TOTAL         | \$63,750                           | \$63,750 | \$63,750 | \$63,750 | \$63,750 | \$63,750 |

**Note:** The total maximum payment per payment year is \$63,750.

***Continued on next page...***

## Top 10 Things to Know about Meaningful Use, cont'd.

### 5. Continued from previous page...

**Example:** Payment Scenario for Eligible Hospitals who begin adoption in the first year.

**Calculation:**

$$\frac{(\text{Overall EHR Amount}^*) \times (\text{Medicaid Share})}{\text{or}}$$

{Sum over 4 year of [(Base Amount + Discharge Related Amount Applicable for Each Year) x Transition Factor Applicable for Each Year] x [Average Medicaid & Managed Care Inpatient-Bed-Days x Average Total & Charity Care Charges]}

**Example:** Assume the following as constant over 4 years except where noted:

- \$2,000,000 Base Amount
- 20,000 discharges
- 34,000 inpatient Medicaid bed-days (including FFS and Managed Care)
- 100,000 total inpatient bed-days
- \$1,000,000,000 in total charges
- \$200,000,000 in charity care
- \$14,655,050 overall EHR amount (= sum of Year 1, Year 2, Year 3, Year 4)

**Year 1:** { \$2,000,000 + [(20,000 - 1,149 x \$200)] x 1 x 1 = **\$5,770,200**

**Year 2:** { \$2,000,000 + [(20,454 - 1,149 x \$200)] x 1 x .75 = **\$4,495,750**

**Year 3:** { \$2,000,000 + [(20,198 - 1,149 x \$200)] x 1 x .50 = **\$2,976,900**

**Year 4:** { \$2,000,000 + [(21,393 - 1,149 x \$200)] x 1 x .25 = **\$1,512,200**

\* Overall EHR amount= Base amount + discharge related amount defined as \$200 for the 1,150<sup>th</sup> through the 23,000<sup>th</sup> discharge for the first payment year x the transition factor for each year equals 1 in year 1, .75 in year 2, .50 in year 3, and .25 in year 4.

## Top 10 Things to Know about Meaningful Use, cont'd.

---

**6. Eligibility criteria differ between the Medicare and Medicaid EHR incentive programs.**

- Eligible Professionals can only be eligible for either Medicare or Medicaid Incentives in any given year
- Eligible Hospitals can receive **both** Medicare and Medicaid incentives simultaneously

**7. Hospital-based professionals who furnish “substantially all” (90 percent) of their professional services in a hospital setting are not eligible for incentives.** (however, professionals with less than 90 percent are eligible for Medicare or Medicaid incentives)

**8. Professionals and hospitals eligible for the Medicaid incentive program can begin incentive payments as late as 2016.**

**9. EPs who are eligible for both the Medicare and Medicaid incentive programs must choose between the two programs.** (They are allowed to switch one time prior to 2015).

**10. If EPs practice in multiple states, they must choose one state for Medicaid Incentives** (however, this is an annual selection).

## **State Medicaid HIT Plan Project**

---

# State Medicaid HIT Plan Project Timeline

# Provider As-Is Assessment

## Overview:

A survey of the provider community will be conducted to ascertain:

- Meaningful Use readiness
- EHR adoption current status
- Incentive Payment Program eligibility and participation

## Key Activities:

Conduct External survey to conduct an environmental scan

- Survey will be sent during the week of April 5<sup>th</sup> with a targeted completion date of end of April
- A survey link will be sent to providers via email
- Associations will be emailed a survey link to distribute to its members

**1. What electronic clinical decision making support tools do your clinic's providers and staff access DURING a patient encounter?**

|                                                                                             | Used routinely        | Used occasionally     | Not available         | Function turned off / Not in use |
|---------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|----------------------------------|
| Clinical guidelines based on patient problem list, gender, and age                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| High tech diagnostic imaging decision support tools                                         | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| Medication guides/alerts                                                                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| Chronic care plans and flow sheets                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| Patient specific or condition specific reminders (e.g. foot exams for diabetic patients)    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| Preventive care services due (e.g. mammograms for women who are not current with screening) | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| Automated reminders for pending labs and tests (e.g. overdue HbA1c labs)                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            |
| Other (please specify) _____                                                                |                       |                       |                       |                                  |

**2. What are the barriers to using tools for clinical decision making at the point of care? (select all that apply)**

☐ Too many false alarms/too disruptive

☐ Requires staff and/or provider training

☐ Requires resources to build/implement

☐ Requires a system upgrade

☐ Software not available

☐ Hardware issues (computers not available in all exam rooms, etc.)

☐ Not applicable - There are no barriers to using the EHR's clinical decision making tools

☐ Other (please specify) \_\_\_\_\_

**EHR Follow-up Questions: Lab and Test Results**

This page asks additional information about electronic storage of lab and diagnostic test results.

**1. Does your clinic use a computerized system to retrieve lab and diagnostic test results (e.g. HbA1c values and mammogram results)?**

☐ Yes - providers regularly use a computer to access all lab and diagnostic test results

☐ Yes - providers occasionally use a computer to access some, but not all, lab and diagnostic test results

☐ No - providers primarily use paper, faxes, or phone calls to view lab and diagnostic test results

## Maine Medicaid As-Is Survey

**Action Needed:** The following is our ask of the associations

- Communicate and advertise the As-Is survey to your members to encourage participation
- Act as a liaison between the State and your members for HIT and Incentive Payment questions

## Provider Visioning Session

---

### Overview:

A visioning session(s) with the provider community will be conducted to obtain critical feedback from the users of Health Information Technology and data.

### Key Activities:

Conduct External Visioning session with Providers

- Sessions will take place in the late April/early May timeframe
- Visioning sessions will be no more than 4 hours in length
- As feasible, sessions will be conducted at DHHS and we will make a conference line available
- Additional information on scheduling Visioning sessions will be forthcoming

**Action Needed:** The following is our ask of the associations

- Identify participants, both providers and practice managers, and email the names along with their email addresses to Laura Lisien ([laura.lisien@maine.gov](mailto:laura.lisien@maine.gov))

---

## Parallel Initiatives

---

## Parallel Initiatives

---

Parallel initiatives underway are sponsored by DHHS and require provider input. Coordination among efforts is a high priority for MaineCare, but additional follow-up information requests may need to be made of the provider community. Examples include:

- Children's Health Insurance Program Reauthorization Act (CHIPRA)
- ICD-10/5010
- National Health Care Reform

---

**Wrap-Up**

---

## Wrap-up

---

- **Key Take-Away:** Our ask of you is the following:
  - As-Is Assessment
    - Communicate, advertise and distribute the As-Is survey to your members to encourage participation
    - Act as a liaison between the State and your members for HIT and Incentive Payment questions
  - Visioning Session
    - Identify participants and email the names along with their email addresses to Laura Lisien ([laura.lisien@maine.gov](mailto:laura.lisien@maine.gov))
    - Please keep participant recommendations to no more than four members
- **Questions?**

**For additional questions, please contact:**

**Tony Marple**, MaineCare Director  
**Email:** [Tony.Marple@maine.gov](mailto:Tony.Marple@maine.gov)

**Sally Fingar**, SMHP Project Manager  
**Email:** [Sally.Fingar@maine.gov](mailto:Sally.Fingar@maine.gov)

# Stage 1 Criteria for Meaningful Use

## Health Outcome # 1

- **Improving quality, safety, efficiency, and reducing health disparities**
- **Care goals:**
  1. Provide access to comprehensive patient health data for patient's health care team
  2. Use evidence-based order sets and CPOE
  3. Apply clinical decision support at the point of care
  4. Generate lists of patients who need care and use them to reach out to patients
  5. Report information for quality and public reporting

| Eligible Professionals (EPs) Objectives                                                          | Eligible Hospitals (EHs) Objectives                                                                                                              | Measures                                                                                                                                                                                            |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Use CPOE                                                                                         | Use CPOE for orders (any type) directly entered by authorizing provider (e.g. MD, DO, RN, PA, NP)                                                | For EPs, CPOE is used for at least 80% of all orders.<br>For eligible hospitals, CPOE is used for 10% of all orders                                                                                 |
| Implement drug-drug, drug-allergy, drug-formulary checks                                         | Implement drug-drug, drug-allergy, drug-formulary checks                                                                                         | The EP/ EH has enabled this functionality                                                                                                                                                           |
| Maintain an up-to-date problem list of current & active diagnoses based on ICD-9-CM or SNOMED CT | Maintain an up-to-date problem list of current & active diagnoses based on ICD-9-CM or SNOMED CT                                                 | At least 80% of all unique patients seen by the EP or admitted to the EH have at least one entry or an indication of "none" recorded as structured data                                             |
| Generate and transmit permissible prescriptions electronically (eRX)                             |                                                                                                                                                  | At least 75% of all permissible prescriptions written by the EP are transmitted electronically using certified EHR technology                                                                       |
| Maintain active medication list                                                                  | Maintain active medication list                                                                                                                  | At least 80% of all unique patients seen by the EP or admitted to the EH have at least one entry (or indication of "none" if pt is not currently prescribed medication) recorded as structured data |
| Maintain active allergy list                                                                     | Maintain active allergy list                                                                                                                     | At least 80% of all unique pts seen by the EP or admitted to the EH have at least one entry (or indication of "none" if pt has no med allergies) recorded as structured data                        |
| Record demographics: preferred language, insurance type, gender, race, ethnicity, date of birth  | Record demographics: preferred language, insurance type, gender, race, ethnicity, date of birth, date & cause of death in the event of mortality | At least 80% of all unique patients seen by the EP or admitted to the EH have demographics recorded as structured data                                                                              |

## Stage 1 Criteria for Meaningful Use, cont'd.

### Health Outcome # 2

- **Engage patients and families in their health care**
- **Care goals:**
  1. Provide patients and families with timely access to data, knowledge, and tools to make informed decisions and to manage their health

| Eligible Professionals (EPs) Objectives                                                                                                                                                                    | Eligible Hospitals (EHs) Objectives                                                                                                                               | Measures                                                                                                                                                                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, allergies), upon request                                          | Provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, allergies), upon request | At least 80% of all patients who request an electronic copy of their health information are provided it within 48 hours                                                     |
|                                                                                                                                                                                                            | Provide patients with an electronic copy of their discharge instructions and procedures at time of discharge, upon request                                        | At least 80% of all patients who are discharged from an eligible hospital and who request an electronic copy of their discharge instructions and procedures are provided it |
| Provide patients with timely electronic access to their health information (including lab results, problem list, medication lists, allergies) within 96 hours of the information being available to the EP |                                                                                                                                                                   | At least 10% of all unique patients seen by the EP are provided timely electronic access to their health information                                                        |
| Provide clinical summaries for patients for each office visit                                                                                                                                              |                                                                                                                                                                   | Clinical summaries are provided for at least 80% of all office visits                                                                                                       |

## Stage 1 Criteria for Meaningful Use, cont'd.

| Eligible Professionals (EPs) Objectives                                                                                                                                       | Eligible Hospitals (EHs) Objectives                                                                                                                                           | Measures                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Record & chart changes in vital signs: height, weight, BP, BMI, plot & display growth charts for children 2-20 years, including BMI                                           | Record & chart changes in vital signs: height, weight, BP, BMI, plot & display growth charts for children 2-20 years, including BMI                                           | For at least 80% of all unique pts age 2 and over seen by the EP or admitted to the EH, record BP and BMI; additionally plot growth chart for children age 2-20                                                                       |
| Record smoking status for patients 13 yrs old or older                                                                                                                        | Record smoking status for patients 13 yrs old or older                                                                                                                        | At least 80% of all unique patients 12 yrs old or older seen by the EP or admitted to the EH have "smoking status" recorded                                                                                                           |
| Incorporate clinical lab-test results into EHR as structured data                                                                                                             | Incorporate clinical lab-test results into EHR as structured data                                                                                                             | At least 50% of all clinical lab tests ordered whose results are in a positive/negative or numerical format are incorporated in certified EHR technology as structured data                                                           |
| Generate list of patients by specific conditions to use for quality improvement, reduction of disparities, & outreach                                                         | Generate list of patients by specific conditions to use for quality improvement, reduction of disparities, & outreach                                                         | Generate at least one report listing patients of the EP or EH with a specific condition                                                                                                                                               |
| Report ambulatory quality measures to CMS or the States                                                                                                                       | Report hospital quality measures to CMS or the States                                                                                                                         | For 2011, provide aggregate numerator & denominator through attestation as discussed in section II (A) (3) of this proposed rule.<br>For 2012, electronically submit measures as discussed in section II (A)(3) of this proposed rule |
| Send reminders to patients per patient preference for preventative/ f/up care                                                                                                 |                                                                                                                                                                               | Reminder sent to at least 50% of all unique pts seen by the EP age 50 or over                                                                                                                                                         |
| Implement 5 clinical decision support rules relevant to specialty or high clinical priority, including diagnostic test ordering, & ability to track compliance w/ those rules | Implement 5 clinical decision support rules relevant to specialty or high clinical priority, including diagnostic test ordering, & ability to track compliance w/ those rules | Implement 5 clinical decision support rules relevant to the clinical quality metrics the EP/EH is responsible for as described in section II (A)(3)                                                                                   |
| Check insurance eligibility electronically from public/private payers                                                                                                         | Check insurance eligibility electronically from public/private payers                                                                                                         | Insurance eligibility checked electronically for at least 80% of all unique pts seen by the EP or EH                                                                                                                                  |
| Submit claims electronically to public/private payers                                                                                                                         | Submit claims electronically to public/private payers                                                                                                                         | At least 80% of all claims filed electronically by the EP or EHR                                                                                                                                                                      |

## Stage 1 Criteria for Meaningful Use, cont'd

### Health Outcome # 3

- Improve care coordination
- **Care goals:**
  1. Exchange meaningful clinical information among professional health care team

| Eligible Professionals (EPs) Objectives                                                                                                                                                                  | Eligible Hospitals (EHs) Objectives                                                                                                                                                                                                     | Measures                                                                                                               |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| Capability to exchange key clinical information (for example, problem list, medication list, allergies, diagnostic test results), among providers of care and patient authorized entities electronically | Capability to exchange key clinical information (for example, discharge summary, procedures, problem list, medication list, allergies, diagnostic test results), among providers of care and patient authorized entities electronically | Performed at least one test of certified EHR technology's capacity to electronically exchange key clinical information |
| Perform medication reconciliation at relevant encounters and each transition of care                                                                                                                     | Perform medication reconciliation at relevant encounters and each transition of care                                                                                                                                                    | Perform medication reconciliation for at least 80% of relevant encounters and transitions of care                      |
| Provide summary care record for each transition of care and referral                                                                                                                                     | Provide summary care record for each transition of care and referral                                                                                                                                                                    | Provide summary of care record for at least 80% of transitions of care and referrals                                   |

# Stage 1 Criteria for Meaningful Use, cont'd

## Health Outcome # 4

- Improve population and public health
- **Care goals:**
  1. Communicate with public health agencies

| Eligible Professionals (EPs) Objectives                                                                                                                 | Eligible Hospitals (EHs) Objectives                                                                                                                                                | Measures                                                                                                                                                                                                                                                                                                  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Capability to submit electronic data to Immunization registries and actual submission where required and accepted                                       | Capability to submit electronic data to Immunization registries and actual submission where required and accepted                                                                  | Performed at least one test of certified EHR technology's capacity to submit electronic data to immunization registries                                                                                                                                                                                   |
|                                                                                                                                                         | Capability to provide electronic submission of reportable lab results (as required by state or local law) to public health agencies and actual submission where it can be received | Performed at least one test of the EHR system's capacity to provide electronic submission of reportable lab results to public health agencies (unless none of the public health agencies to which eligible hospital submits such information have the capacity to receive the information electronically) |
| Capability to provide electronic syndromic surveillance data to public health agencies and actual transmission according to applicable law and practice | Capability to provide electronic syndromic surveillance data to public health agencies and actual transmission according to applicable law and practice                            | Performed at least one test of certified EHR technology's capacity to provide electronic syndromic surveillance data to public health agencies (unless none of the public health agencies to which an EP or EH submits such information have the capacity to receive the information electronically)      |

## Stage 1 Criteria for Meaningful Use, cont'd

### Health Outcome # 5

- **Ensure adequate privacy & security protections for personal health information**
- **Care goals:**
  1. Ensure privacy & security protections for confidential information through operating policies, procedures, & technologies & compliance w/ applicable law
  2. Provide transparency of data sharing to patient

| Eligible Professionals (EPs) Objectives                                                                                                                      | Eligible Hospitals (EHs) Objectives                                                                                                                          | Measures                                                                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| Protect electronic health information created or maintained by the certified EHR technology through the implementation of appropriate technical capabilities | Protect electronic health information created or maintained by the certified EHR technology through the implementation of appropriate technical capabilities | Conduct or review a security risk analysis per 45 CFR 164.308 (a)(1) and implement security updates as necessary |
