

## Global Developmental and Autism Specific Screening

Developmental screening is an important component of MaineCare's Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program.

To support providers in their developmental screening efforts, MaineCare has recently clarified its billing policy for standardized global developmental and autism-specific screening tools.

CPT Codes for Billing of Global Developmental and Autism-Specific Screening Tools				
CPT	Modifier	Description of Service	Applicable Screening Tool	Rate
96110	None	Developmental screening w/ interpretation & report, standard form	Global developmental screening tool (i.e., ASQ, PEDS)	\$8.99
96110	HI	Developmental screening w/ interpretation & report, standard form	Autism-specific screening tool (MCHAT-1)	\$8.99
96111	HK	Developmental testing w/ interpretation & report	Autism-specific screening tool (MCHAT-2 <i>only</i> )	\$86.59

The payment rates for these and other services can be found in the [MaineCare Provider Fee Schedule](#).

### Notes:

- 96110 and 96111 cannot be billed on the same day for the same member.
- 96110 and any EM CPT code can be billed on the same day without a modifier on the EM code; NCCI does not bundle payment for these services.
- Any EM CPT code billed on the same day as 96111 will need to have modifier 25 appended, to prevent bundling of payment per NCCI edit.

### Acronyms:

- EM- Evaluation and Management Service
- HI - Integrated mental health and mental retardation/developmental disabilities program
- HK - Specialized mental health programs for high risk populations
- NCCI- National Correct Coding Initiative
