

NOTICE

TO ALL PATIENTS (PAST AND PRESENT) DESIGNATING WELLNESS CONNECTION

(To be posted and provided to qualifying patients PRIOR TO ALL TRANSACTIONS.)

Wellness Connection has operated its Registered Dispensary in violation of the Maine Medical Use of Marijuana Act (the Act) and the Rules Governing the Maine Medical Use of Marijuana Program (the Rules – Section 2.7.4.2) by treating its medical marijuana with the following general use pesticides:

PESTICIDE NAME	ACTIVE INGREDIENTS
Senarade Disease Control (Admittedly Used)	QST 731 strain of dried Baccillus subtilis 1.34%
Gnatrol WDG biological larvicide (Admittedly Used)	Bacillus thuringiensis subsp. israelensis, strain AM 65-52 37.4% fermentation solids and solubles
Monterey Garden Insect Spray (Admittedly Used)	Spinosad (mixture spinosyn A & spinosyn D) 0.5%
Actinovate Lawn & Garden Fungicide (Admittedly Used)	Streptomyces lydicus WYEC 108 00.0371%
Forbid 4F Ornamental Insecticide/Miticide (Found on site but alleged to not have been used.)	Spiromesifen 42.5%
Monterey Take Down Garden Spray (Found on site but alleged to not have been used.)	Pyrethins 0.5% Canola Oil 89.5%
CX Hydroponics Tanlin Drops (Admittedly Used)	Chitin
Doktor Doom Total Release Fogger (Admittedly Used)	Pyrethrins
Organocide 3 in 1 Garden Spray (Admittedly Used)	Sesame Oil

For several months marijuana plants that had pesticides applied were utilized to produce various medical cannabis products including **tinctures, baker's mix, and all strains of medical marijuana dispensed by Wellness Connection of Maine.**

Pursuant to 22 M.R.S. § 1471-C, the term "**pesticide**" means (1) any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, (2) any substance or mixture of substances intended for use as a plant regulator, defoliant, or desiccant, and (3) any nitrogen stabilizer. The term "pest" means any insect, rodent, nematode, fungus, weed, or any other form of terrestrial or aquatic plant or animal life or virus, bacteria or other micro-organism, except viruses, bacteria or other micro-organisms on or in living man or other living animals. Fungicides, rodenticides, and insecticides are forms of pesticides. The Environmental Protection Agency (EPA) has determined that "organic" approved pesticides are pesticides by EPA definition, and that there is no distinction between "organic" and non-organic pesticides under EPA pesticide definition.
