

All-Payer Claims Databases: State Progress and Future of APCDs

November 9, 2011
eHealth Initiative
Patrick Miller, MPH

Interactive State Reports Map

Click on a state to find out about the APCD in that state.

States: As information about the APCD changes in your state, please contact ashley.peters@unh.edu, so that we can keep the state profiles current.

Welcome to the APCD Council!

The APCD Council, formerly known as the **Regional All Payer Healthcare Information Council (RAPHIC)**, is a federation of government, private, non-profit, and education organizations focused on improving the development and deployment of state-based all payer claims databases (APCD). The APCD Council is convened and coordinated by the **Institute of Health Policy and Practice (IHPP)** at the **University of New Hampshire (UNH)** and the **National Association of Health Data Organizations (NAHDO)**.

RAPHIC was first convened in 2006 by UNH, IHPP staff with the goal of engaging future users of the Maine and New Hampshire APCDs in a discussion about multi-state collaboration. Soon after, states across the country joined the group. Currently, there is participation from nearly a dozen states. NAHDO was established in 1986 to promote the uniformity and availability of health care data for cost quality and access purposes. In 2007, NAHDO forged a collaboration with RAPHIC to expand APCD data initiatives beyond the north east region and to lead fund raising for APCD products and conference support. Together, NAHDO and RAPHIC have been coordinating a multistate effort to support state APCD initiatives and shape state reporting systems to be capable of supporting a broad range of information needs.

In response to a shift from a regional to nationwide focus, RAPHIC has changed its name to the APCD Council. The APCD Council will continue to work in collaboration with states to promote uniformity and use of APCDs.

Our Team

Patrick Miller, MPH, is a Research Associate Professor at the University of New Hampshire and founder and co-chair of the APCD Council. Patrick works with states across all aspects of APCD development, including stakeholder engagement, governance solutions, and analytic needs. For all media inquiries or for direct technical assistance, please contact Patrick at Patrick.Miller@unh.edu.

Denise Love, BSN, MBA, is the Executive Director at the National Association of Health Data Organizations (NAHDO). For all media inquiries or for direct technical assistance, please contact Denise at dlove@nahdo.org.

Amy Costello, MPH, is a Project Director at the New Hampshire Institute for Health Policy and Practice at the University of New Hampshire and co-chair for the APCD Council. Amy advises organizations and state agencies that are interested in the development, standardization and utility of all-payer healthcare claims databases. For all inquiries regarding standards, please contact Amy at Amy.Costello@unh.edu.

Ashley Peters, MPH, is a Research Associate at the New Hampshire Institute for Health Policy and Practice at the University of New Hampshire. She conducts APCD-related research and manages communications for the Council. For all general inquiries, please contact Ashley at Ashley.Peters@unh.edu

Josephine Porter, MPH, serves as Deputy Director for the New Hampshire Institute for Health Policy and Practice at the University of New Hampshire and co-chair for the APCD Council. Jo focuses much of her time on APCD analysis, including an emphasis of using APCD data in public health. For all business development related inquiries, please contact Jo at Jo.Porter@unh.edu.

Alan Prysunka, is the Executive Director of the Maine Health Data Organization and Chair of the National Association of Health Data Organizations (NAHDO) Board of Directors. For direct technical assistance, please contact Alan at alan.m.prysunka@maine.gov.

Emily Sullivan is a Research Associate at the National Association of Health Data Organizations (NAHDO). For inquiries related to publications and conference events, please contact Emily at esullivan@nahdo.org.

Topics

- Background
- National Activities and Standards
- Usage Examples From States
- Experiences and Lessons Learned
- APCD 2.0
- Questions and Answers

Background

Backdrop 2005-2011

- Increased Transparency Efforts
- Employer Coalitions
- Payment Reform
 - Patient Centered Medical Home
 - Accountable Care Organizations
- Health Information Exchange (HITECH)
- Health Reform (PPACA)

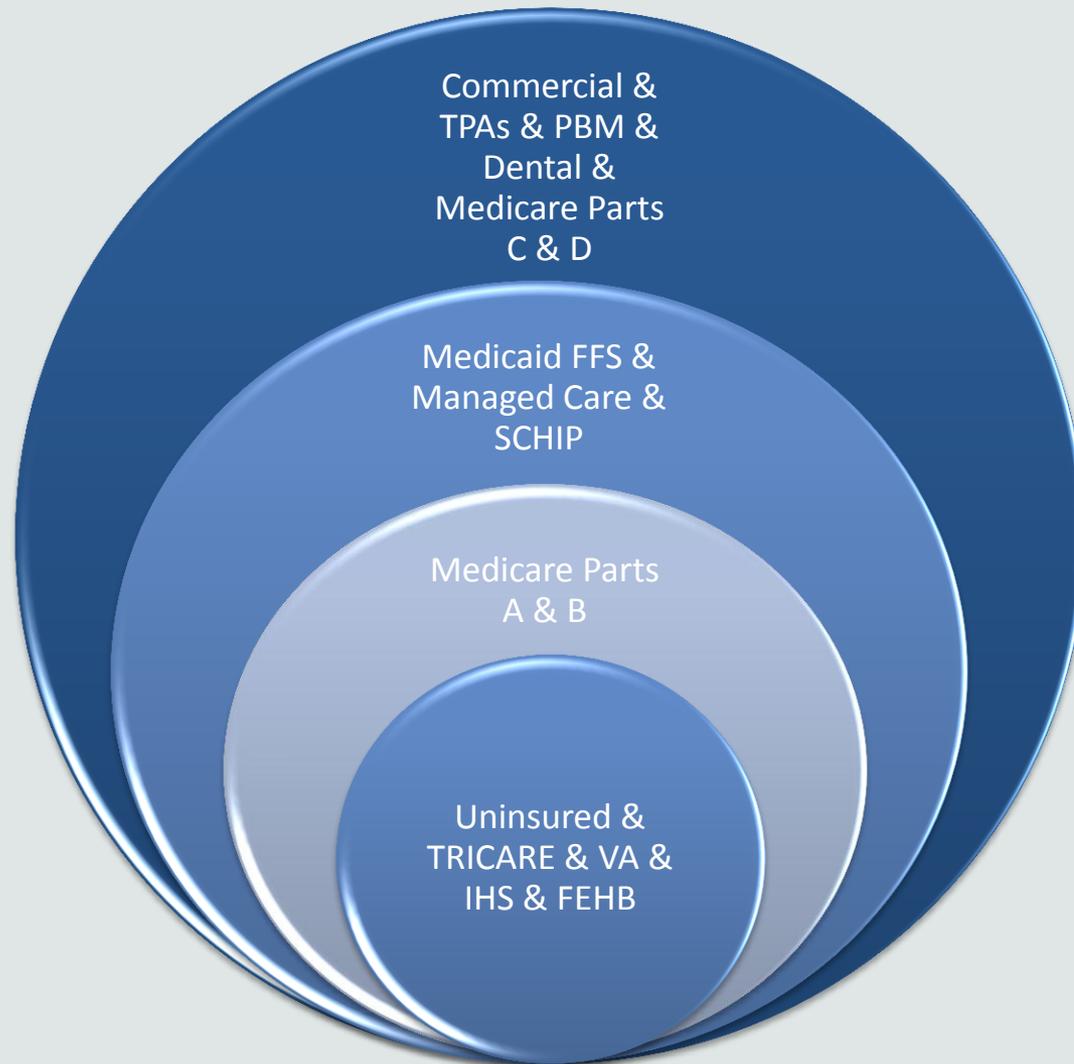

Definition of APCDs

- Databases, created by state mandate, that typically include data derived from *medical, pharmacy, and dental claims with eligibility and provider files* from private and public payers:
 - Insurance carriers (medical, dental, TPAs, PBMs)
 - Public payers (Medicaid, Medicare)
- *Augmenting (not replacing)* hospital discharge, Medicaid, Medicare, registries, and other datasets

APCDs Are About Transparency

- What does a back MRI cost by provider by payer?
- In what geographies is public health improving?
- What percentage of my employees have had a mammogram?
- If emergency room usage in Medicaid is higher than the commercial population, what are the drivers?
- What is the average length of time people are using antidepressant medications?
- How far do people travel for services? Which services?
- Hundreds of additional questions have been asked....

Sources of APCD Data

Typically Included Information

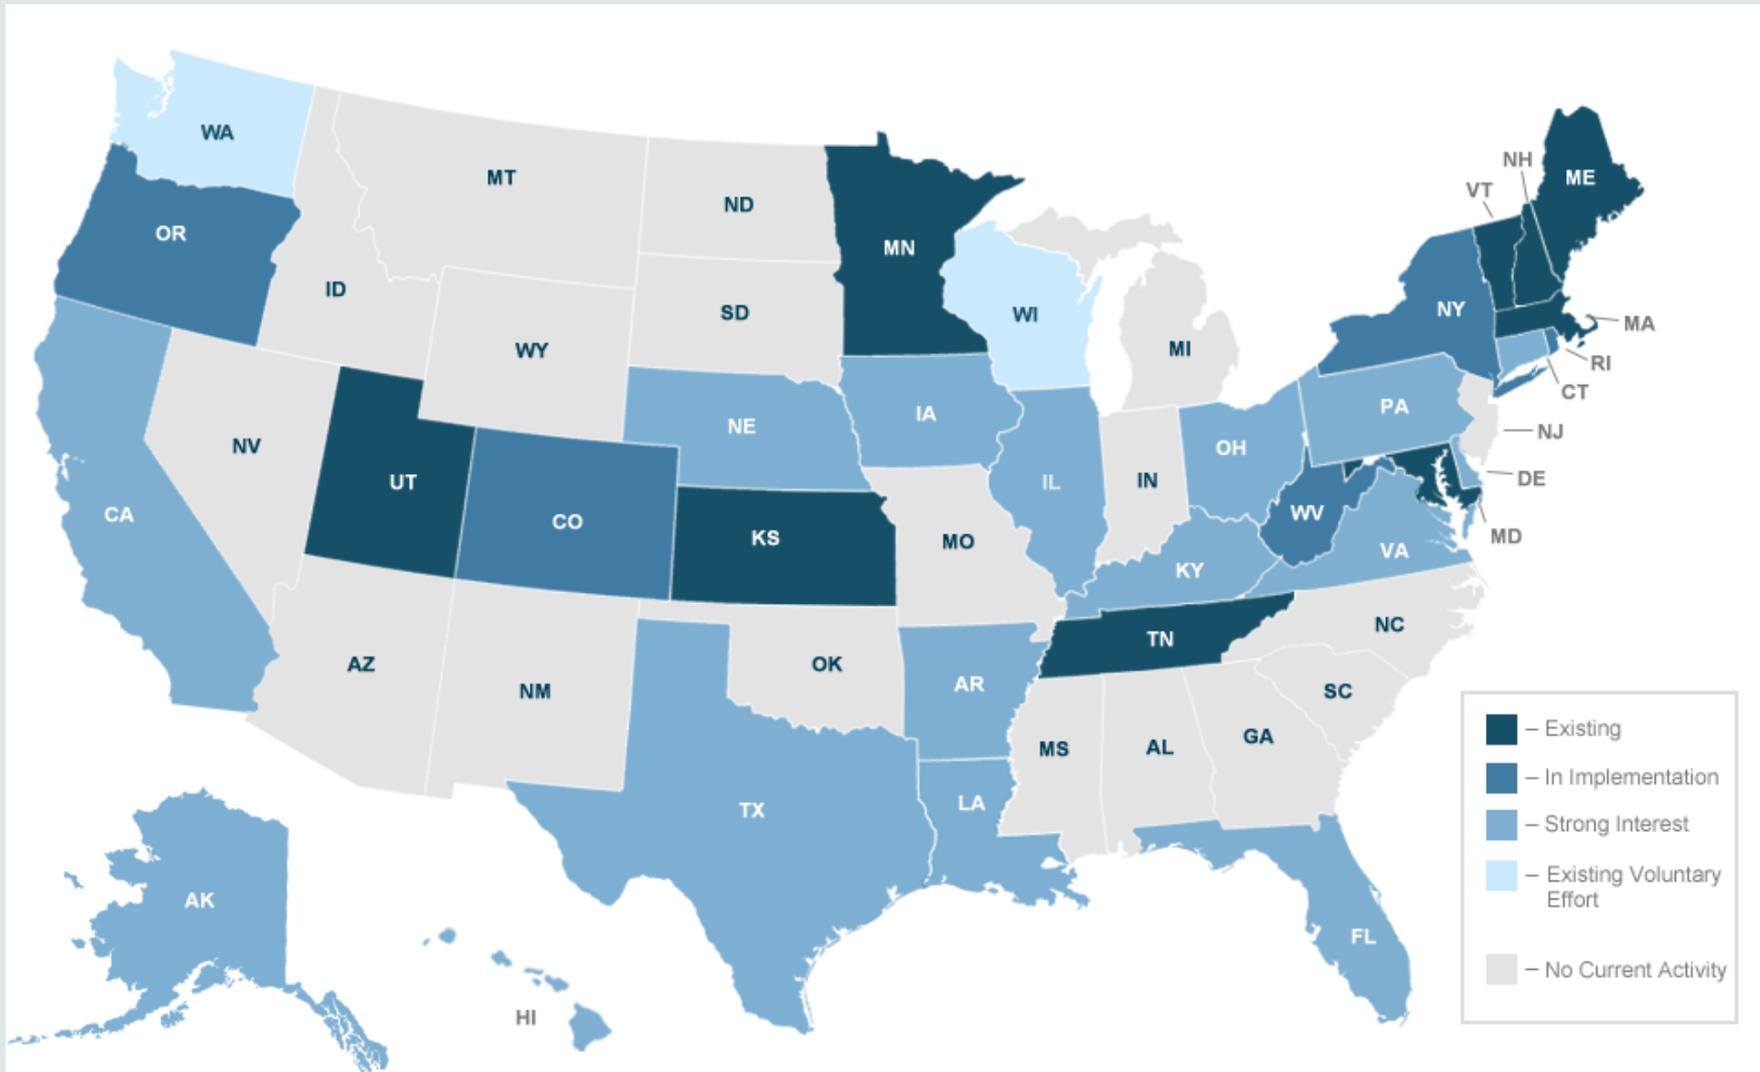

- Encrypted social security**
- Patient demographics (date of birth, gender, residence, relationship to subscriber)
- Type of product (HMO, POS, Indemnity, etc.)
- Type of contract (single person, family, etc.)
- Diagnosis codes (including E-codes)
- Procedure codes (ICD, CPT, HCPC, CDT)
- NDC code / generic indicator / other Rx
- Revenue codes
- Service dates
- Service provider (name, tax id, payer id, specialty code, city, state, zip code)
- Prescribing physician
- Plan charges & payments
- Member liabilities (co-pay, coinsurance, deductible)
- Date paid
- Type of bill
- Facility type
- Other 835/837 fields

Typically Excluded Information

- Services provided to uninsured (few exceptions)
- Denied claims
- Workers' compensation claims
- Referrals
- Test results from lab work, imaging, etc.
- Provider affiliation with group practice
- Provider networks
- *Premium information*
- *Capitation fees*
- *Administrative fees*
- *Back end settlement amounts*
- *Back end P4P or PCMH payments*

National Activities and Standards

September 2011 State Progress Map

National Activities

- Standards Development
- Technical Assistance
- Web Resources
- Publications and Issue Briefs
- Annual Conference
- AHRQ USHIK Database
- Partners: APCD Council, NAHDO, States, Carriers, AHRQ, AHIP, NCPDP, AcademyHealth State Coverage Initiatives, Commonwealth Fund, NGA, NAIC

Technical Advisory Panel

- Agency for Healthcare Research and Quality (AHRQ)
- All-Payer Claims Database Council (APCD Council)
- American Medical Association (AMA)
- America's Health Insurance Plans (AHIP)
- Individual Payers (e.g., Aetna, Cigna, Harvard Pilgrim Healthcare, Humana, United Health Care)
- Centers for Disease Control and Prevention, National Center for Health Statistics (CDC NCHS)
- Centers for Medicare and Medicaid Services (CMS)
- National Association of Health Data Organizations (NAHDO)
- National Association of Insurance Commissioners (NAIC)
- National Conference of State Legislatures (NCSL)
- National Governors Association (NGA)
- Office of the Assistant for Planning and Evaluation (ASPE)
- State Health Plan Associations - various

Areas for Standardization

1. Data collection / submission

- Aligning to HIPAA Standards
- Efficiencies in metadata, reporting, analysis, and application development

2. Data release

- Political
- State-driven

3. Meta Data

4. Applications and Reporting

Data Collection Standards Work Plan - NCPDP

- January 2010 – NCPDP WG1 began work on Implementation Guide, review of Maine and Minnesota regulations and NCPDP post-adjudicated layout
- May 2011 - Draft of Uniform Healthcare Payer Data Standard Implementation Guide presented at NCPDP annual conference
- October 2011 – Release of the Uniform Healthcare Payer Data Standard Implementation Guide Version 1.0 (milestone!)

Data Collection Standards Work Plan – X12N

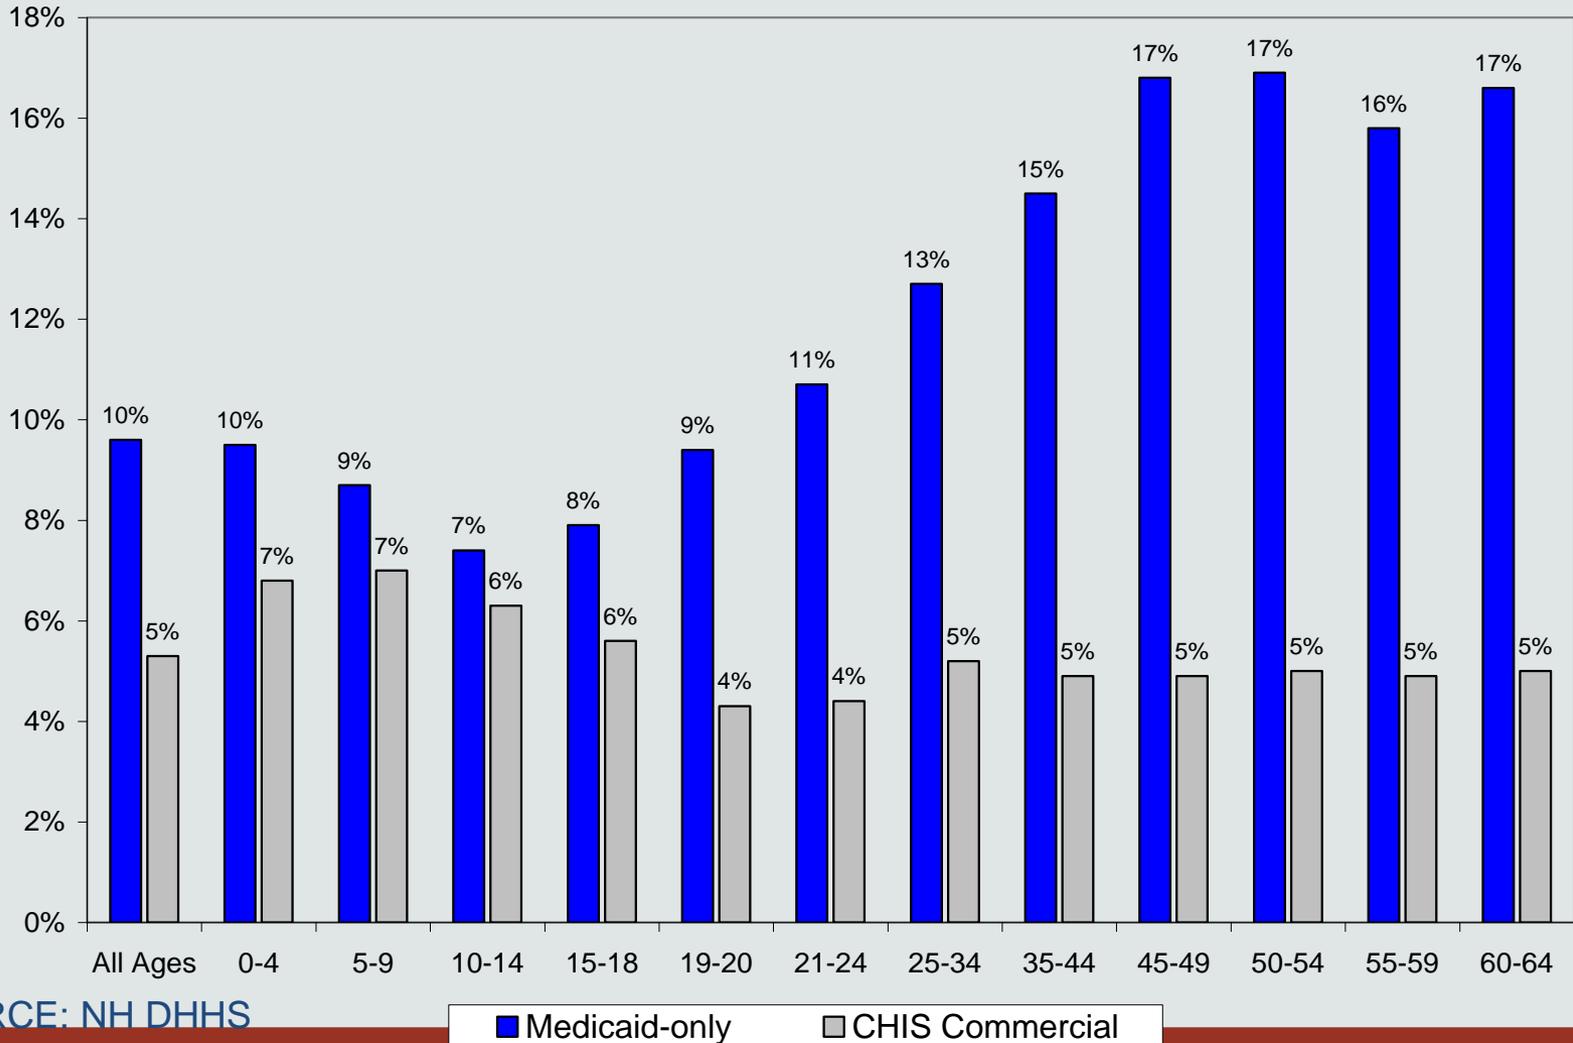

- December 2009: APCD Council inventoried and compared data elements from 4 states' APCD data submission rules; 2 more states were added in 2010
- June - October 2010: Expert consultants and States reviewed and finalized a proposed core set of APCD data elements
- November 2010: APCD Council met with ASC X12
- January 2011: APCD Council convened Technical Advisory Panel
- July 2011: ASC X12 hosted a conference call for X12 co-chairs and members to provide overview of APCD
- October 2011: X12 Kick-off meeting for Uniform Medical Claims Payer Reporting Standard

Usage Examples

Something for Everyone

- Consumers
- Employers
- Health Plans/Payers
- Providers
- Researchers (public policy, academic, etc.)
- State government (policy makers, Medicaid, public health, insurance department, etc.)
- TBD (Federal government, etc.)

CATHOLIC MEDICAL CENTER	\$980	\$4328	\$5308	LOW	LOW	CATHOLIC MEDICAL CENTER 800.437.9666

Lead Provider This is the single entity that all health care procedure costs are assigned to in HealthCost. Even when separate payments are made to a physician and a hospital, the estimated payment amount is the combined total amount paid. When a Lead Provider is not listed in the results, we do not have sufficient data to calculate an estimate.

Estimate of What You Will Pay - This figure represents out of pocket payments you may be required to pay based upon your health coverage, your deductible, and your coinsurance. Deductibles and co-insurance are paid after the service is provided.

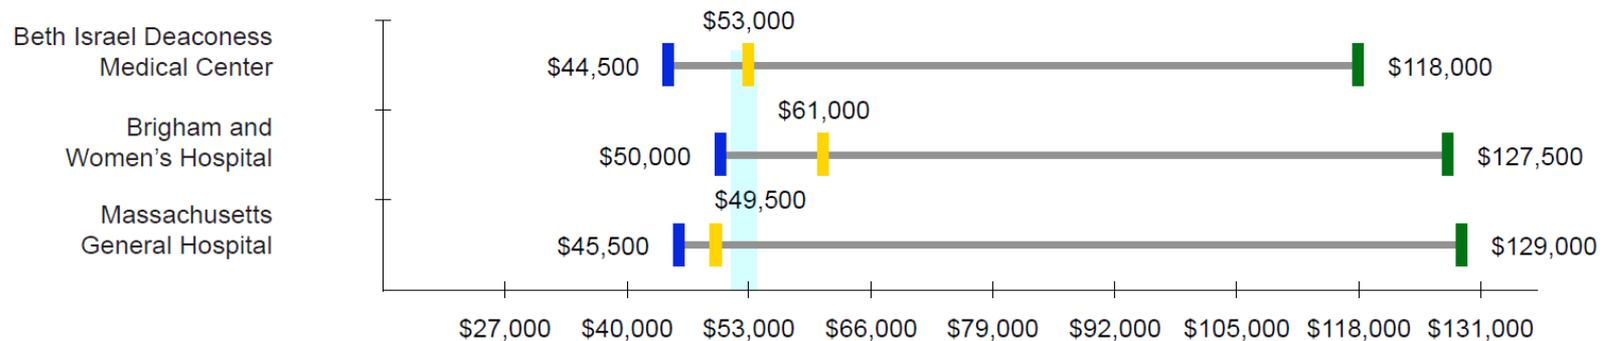

Estimate of What Insurance Will Pay - This figure represents the payment made by your insurance company to the health care provider.

Estimate of Combined Payments - This figure represents the combined amount that the health care provider receives from you as a patient and from your insurance company.

Precision of the Cost Estimate - This is an indication of how accurate, based upon statistical analysis and historical experience, the cost estimate is. A lower precision means that there is a greater likelihood that the amount of your bill will differ from the cost estimate. A high precision means that the amount of your bill will have a greater likelihood of being close to the cost estimate. Some estimates are more precise than others because the amount charged for the procedure across all patients is more uniform. When the amount charged for a procedure or services across all patients varies considerably, it is more difficult to estimate an expected cost for the procedure or service, and as result, the cost estimate is less precise.

Typical Patient Complexity - This is an indication of how healthy or sick the patients are that are seen for this particular procedure at this health care provider. Some health care providers see sicker patients, or patients that are more complex, and thus there may be more costs associated with treating them.

Range of Costs for Cardiac Valve Surgery[‡] by Hospital

[‡] There are no cost ratings for this procedure.

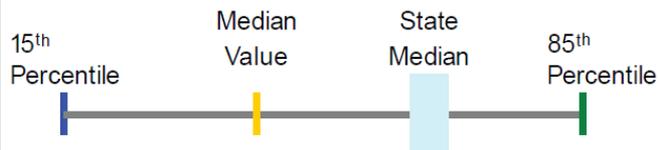

If the 15th Percentile and Median values for a hospital are equal, then only Median and 85th Percentile values are shown on the graph;

If the Median and 85th Percentile values for a hospital are equal, then only 15th Percentile and 85th Percentile values are shown on the graph;

If only the 85th Percentile value is shown for a hospital, then the 15th Percentile, Median, and 85th Percentile values are equal.

Refer to the hospital-specific data table to see all cost values for each hospital.

Legend

Cost Ratings

- \$ The hospital is among the least costly. This cost is lower than 85% of all hospitals in the state.
- \$\$ The hospital cost is below average. This cost is above 15% but below 50% of all hospitals in the state.
- \$\$\$ The hospital cost is above average. This cost is above 50% but below 85% of all hospitals in the state.
- \$\$\$\$ The hospital is among the most costly. This cost is higher than 85% of all hospitals in the state.

Vermont Comparative Costs and Quality by Region

The scattergraph shows the relationship between the rate of payments and the rate of effective and preventive care. The graph's vertical axis displays the rate of payment per member per month (PMPM) adjusted for differences in age, gender, and health status of the population. The graph's horizontal axis displays the combined effective and preventive care score. The crosshair lines display the statewide average for each axis; subpopulations are classified into quadrants based on comparison to the statewide average.

ETGs for Benign Conditions of the Uterus

Maine Commercial Claims (2006–2007); Full Episodes Outliers Removed
Preference Sensitive Care

BENIGN CONDITIONS OF THE UTERUS	HYSTERECTOMY	OTHER SURGICAL PROCEDURES	WITHOUT SURGERY
ETG-Subclass	646	646	647
Number of Episodes	938	2,183	7,369
% with CT-Scan	11%	15%	9%
% with Ultrasound	57%	67%	45%
% with Hysteroscopy	7%	48%	9%
% with Colposcopy	1%	2%	17%
% with Endometrial biopsy	20%	13%	9%
Average Payment per Episode	\$11,074	\$7,994	\$1,273

The average episode payment for members with abdominal hysterectomy was \$11,221, and the average payment for members with vaginal hysterectomy was \$10,990. Of members with a hysterectomy, 66% had abdominal and 34% had vaginal hysterectomy. Other surgical procedures included hysteroscopy ablation, laparoscopic removal of lesions, myomectomy, and removal of ovarian cysts.

NH Medical Home Pilot Preliminary Indicators Report

Total Costs by Practice Site vs. Non-Medical Home Sites

July 2009-March 2010 DOS – Commercial Payers

PRACTICE	TOTAL COST	TOTAL PMPM
Site #1	\$1,664,702	\$81
Site #2	\$2,666,268	\$104
Site #3	\$3,596,334	\$147
Site #4	\$4,949,153	\$74
Site #5	\$4,314,375	\$135
Site #6	\$1,820,459	\$148
Site #7	\$911,153	\$116
Site #8	\$1,236,719	\$87
Site #9	\$2,628,653	\$93
Total	\$23,787,817	\$103
Non-Medical Home Sites	\$1,010,233,075	\$144

*Notes: Excludes pharmacy, preliminary, not risk adjusted, they were not annualized, and they were further not adjusted for contractual differences

Vermont Utilization Measures -2008 Commercial

Burlington Hospital Service Area: Commercially Insured Under Age 65

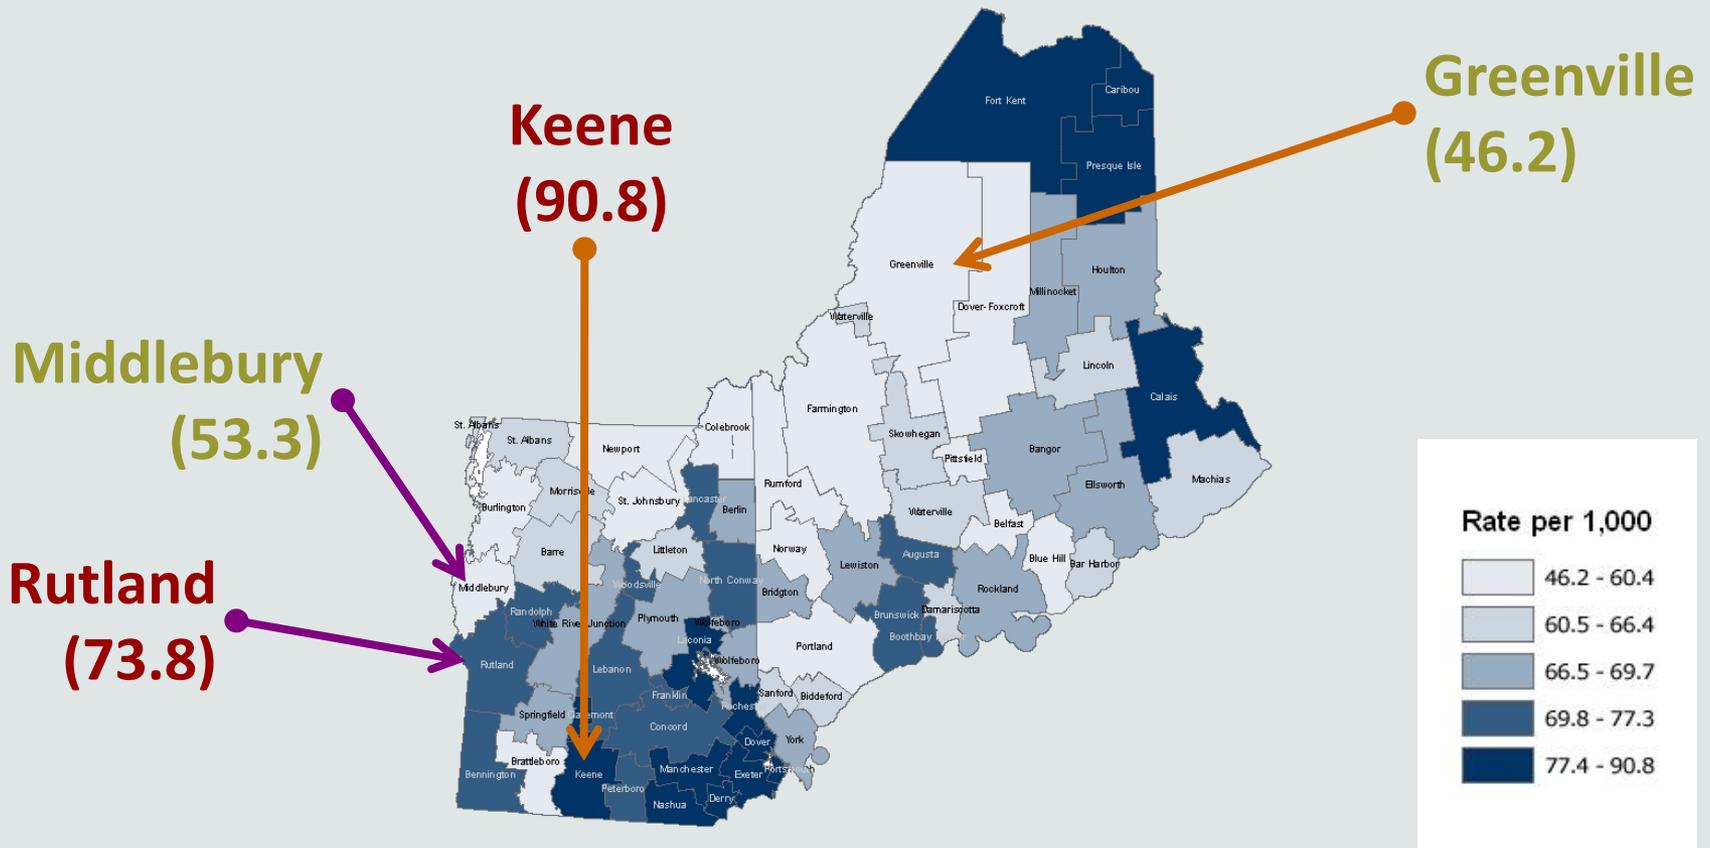

Burlington Hospital Service Area Data						Vermont			New Hampshire	Maine	Tri-State Combined
Utilization Measure	Average Members	Number of Services or Procedures	Adj. Rate PER 1,000	95% LCL	95% UCL	Highest VT HSA	Lowest VT HSA	Adj. Rate PER 1,000			
Computerized Tomography (CT)	91,200	5,885	65.6	63.9	67.3	100.4	63.3	75.66	92.02	83.82	84.8
Magnetic Resonance Imaging (MRI)	91,200	5,180	57.8	56.2	59.4	73.8	53.3	62.39	81.06	64.40	69.5
Inpatient Hospitalizations	91,200	4,025	44.3	42.9	45.7	63.9	41.2	48.07	53.69	51.35	51.3
Inpatient Readmissions Within 30 Days	91,200	302	3.38	3.01	3.79	9.13	3.27	4.73	5.67	6.15	5.70
Inpatient Hospitalizations for Ambulatory Care Sensitive Conditions	91,200	175	1.96	1.68	2.27	5.98	1.96	2.94	4.38	3.97	3.90
Outpatient Emergency Department Visits	91,200	11,478	125.1	122.8	127.4	267.2	125.1	183.25	231.67	223.99	218.2
Potentially Avoidable Outpatient Emergency Department Visits	91,200	1,478	16.1	15.2	16.9	50.8	16.1	30.74	43.35	44.91	41.5
Non-Hospital Outpatient Visits	91,200	432,716	4,799	4,784	4,813	4887	3872	4561.97	5053.43	4512	4705

Tri-State Variation in Health Services

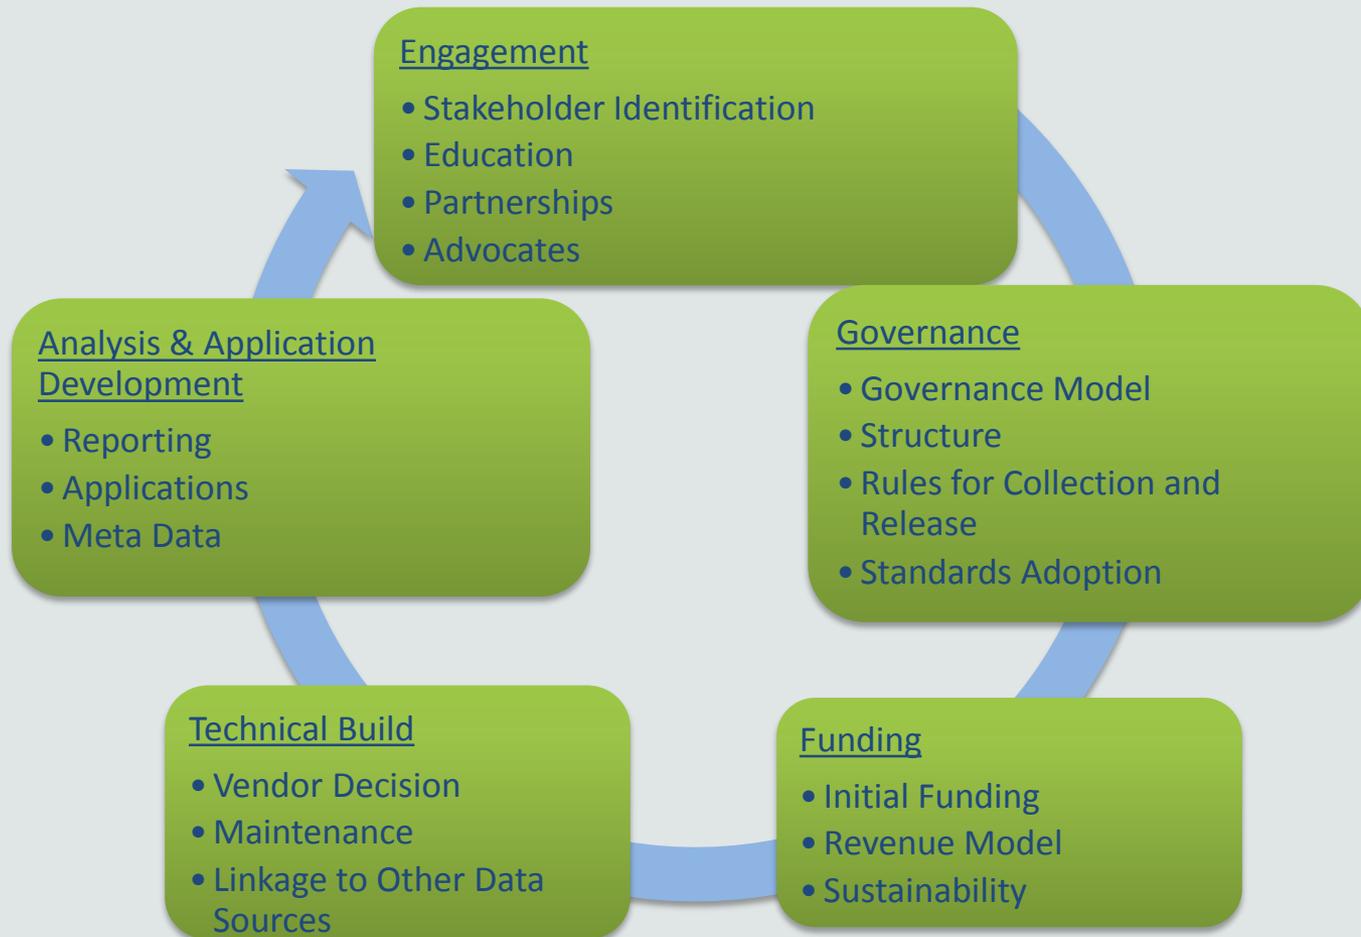

Advanced Imaging – MRIs

Source: State of Vermont

Experiences and Lessons Learned

All-Payer Road Map

Components of Cost

- Population Covered (size)
- Number of Carrier Feeds
 - Membership Thresholds
- Provider Database
- Data Release / Access
- Analytics, Reporting, Applications

Funding Models

- General Funds
- Assessments (payers, providers)
- Medicaid (various options)
- Private Foundations
- Data Sales (minimal)
- Fines for non-compliance (minimal source of revenue)
- Grants: federal, state, private
- Products/Services: Data aggregation/reporting for required HEDIS activities
- Products/Services: Data aggregation/reporting for P4P programs
- Beacon Community Grant

Lessons Learned

- Form Payer Relationships
- Be Transparent and Document
- Understand Uses and Limitations
- Seize Integration & Linkage Opportunities
- Develop Local User Analytic Consortia
- Determination of Process for Data Management and Data Analytic Contracting

APCD Challenges

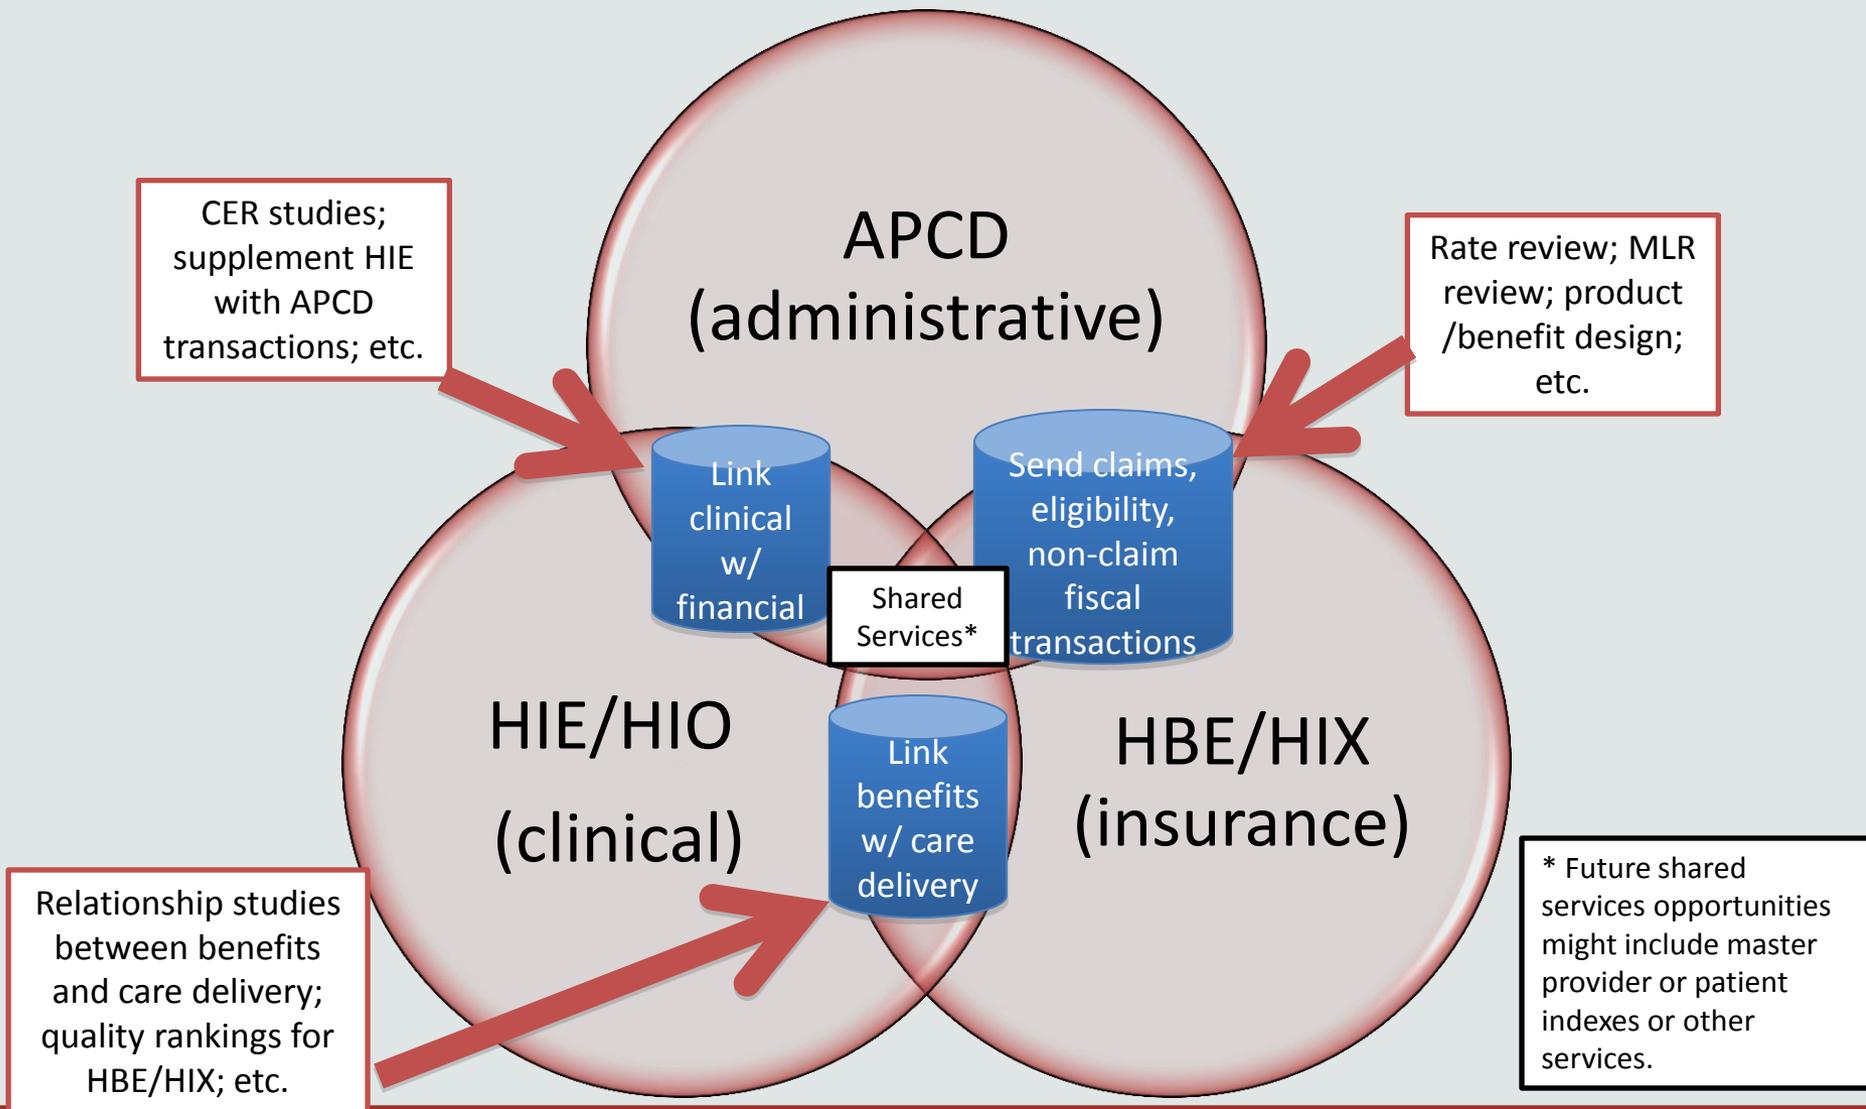

- Completeness of Population Captured
- Collection & Release Standardization
- Provider as Unit of Analysis
- Non-Claim Payment Adjustments
- To-be-Developed Payment Methodologies
- Consistency Amongst State Databases
- Ability to Link to Other Sources
- State Revenue Models
- Federal Engagement

APCD 2.0

APCD 2.0

- Completeness of Data Sets
- Data Collection Standards
- Data Release Standards
- Collection of Direct Patient Identifiers for Linkage Purposes
- Collection of Premium Information
- Collection of Supplemental Financial File
- Collection of Benefits Information
- Master Provider Index

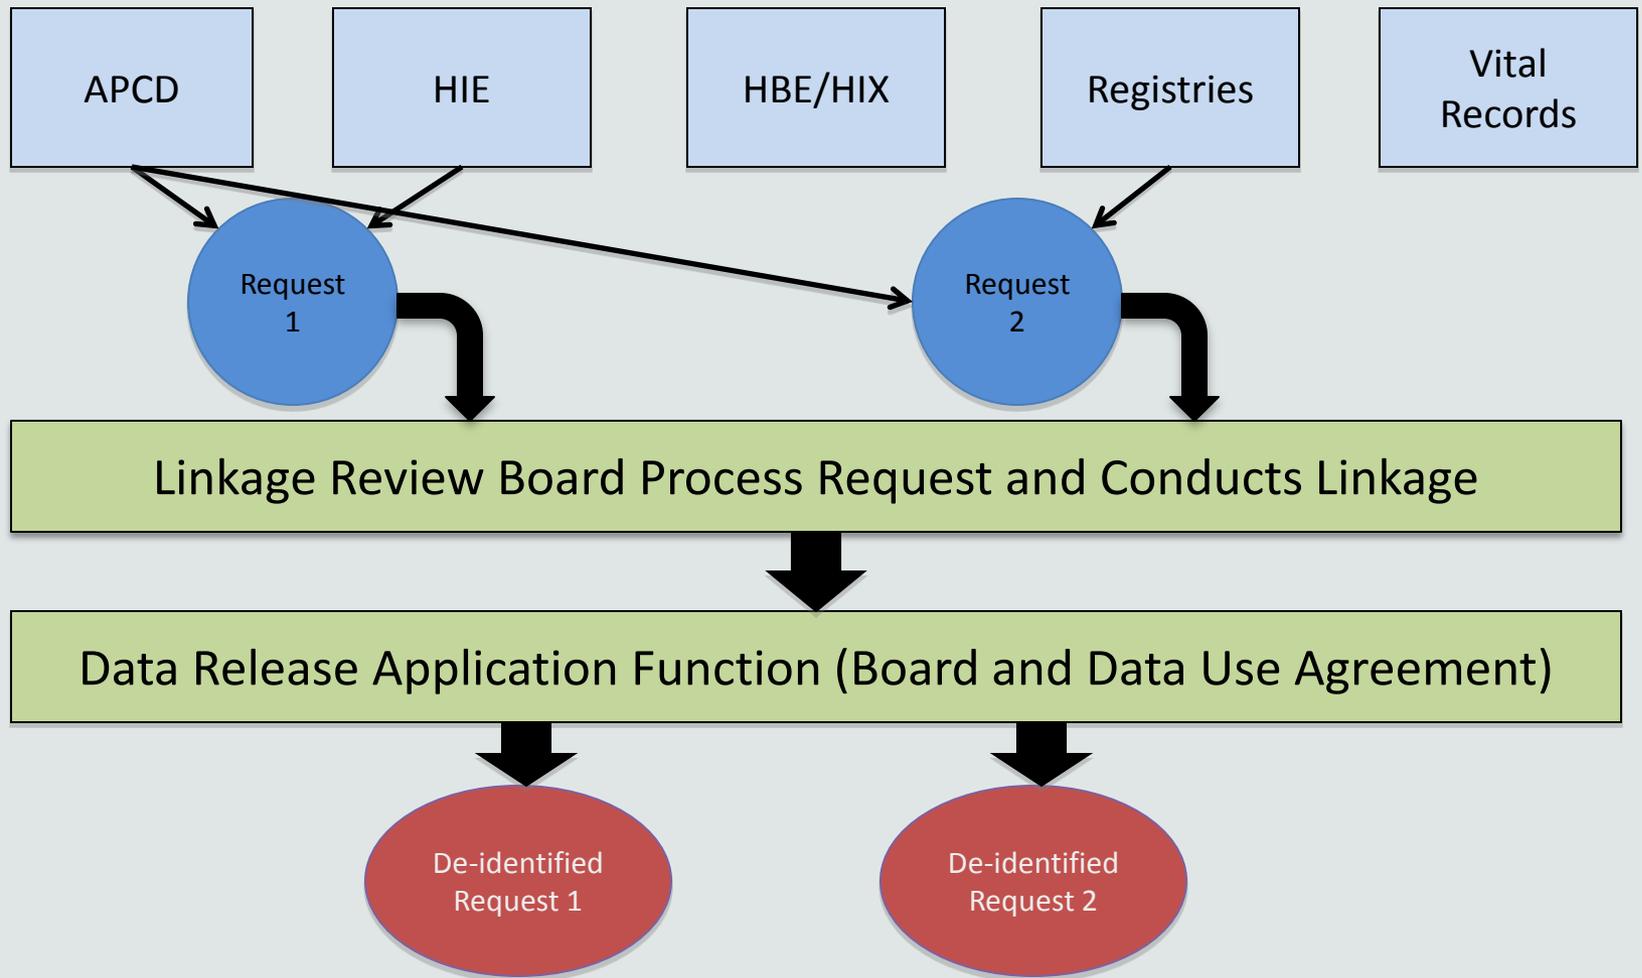

Linkage Opportunities

Status by State of Direct Patient Identifier Collection

State	Status
Colorado	Based upon an initial 2011 report to Governor and General Assembly, all data transmitted from the carriers, including patient identifiers will be encrypted during transmission and while stored within the APCD. Data will be decrypted briefly as received from the carriers so that a unique identifier can be attached to each patient, and then re-encrypted. All data will be released without direct patient identifiers.
Kansas	Not currently allowed for commercial data, but due to the HBE, Kansas expects that within six months there will be an effort to change this. Kansas currently collects identifiable information for state employees and Medicaid.
Maine	Allowed by law, but prohibited by law from being disclosed; not currently collected. A 2011 legislative proposal intended to allow for release did not pass, but will be evaluated under a legislative study.
Maryland	Allowed by law. Currently collecting unencrypted patient identifiers.
Massachusetts	Allowed by law. Currently collecting unencrypted patient identifiers.
Minnesota	Not currently allowed.
New Hampshire	Not currently allowed.
New York	Allowed by law. System not implemented yet.
Oregon	Currently collecting a subset of unencrypted patient identifiers.
Rhode Island	Not currently allowed.
Tennessee	Not currently allowed.
Utah	Allowed by law. Currently collecting unencrypted patient identifiers.
Vermont	Allowed by law. Currently collecting encrypted patient identifiers.
West Virginia	Allowed by law to be collected, but not disclosed.

Proposed Governance Model for Linkage of Direct Patient Identifiers and Data Release
