

## MASSACRE POND

Scarborough Twp., Cumberland  
U.S.G.S. Prouts NeckBrownfield, ME (7.5')

### Fishes

Chain pickerel

### Physical Characteristics

Area - 25 acres

Temperatures:

Surface - 73°F

Maximum depth - 6 feet

5 feet - 72°F

Principal fisheries: none

This shallow, homothermous pond is located a short distance from the ocean. It is surrounded by a heavy stand of cattails and an access road to the beach bisects the pond in the middle. The only fish species known to be present are chain pickerel, but their small size and limited numbers do not provide a fishery.

The pond is located inside the boundaries of Scarborough Beach State Park, which is located off Route 207.

Surveyed - 1987

(Revised - 2000)

Fisheries and Wildlife

Funded in part by the Federal Aid in

Restoration Act under

Federal Project F-28-P
