

SAND POND

Baldwin Twp., Cumberland Co., Me.
U.S.G.S. Steep Falls, Me., (7.5')

Fishes

Brook trout	Minnows
Largemouth bass	White sucker
White perch	Hornpout (bullhead)
Yellow perch	Pumpkinseed sunfish

Physical Characteristics

Area - 61 acres	Temperatures
	Surface - 77° F
Maximum depth - 18 feet	16 feet - 73° F

Principal fisheries: Brook trout,
largemouth bass, white perch

Sand Pond, located west of Route 11 in East Baldwin, is managed principally for warmwater fish species. A lack of cool, well-oxygenated water during the summer months limits the opportunity for coldwater fisheries management. The Maine Department of Fisheries and Wildlife stocks legal-size brook trout in the fall to provide a winter and early spring fishery.

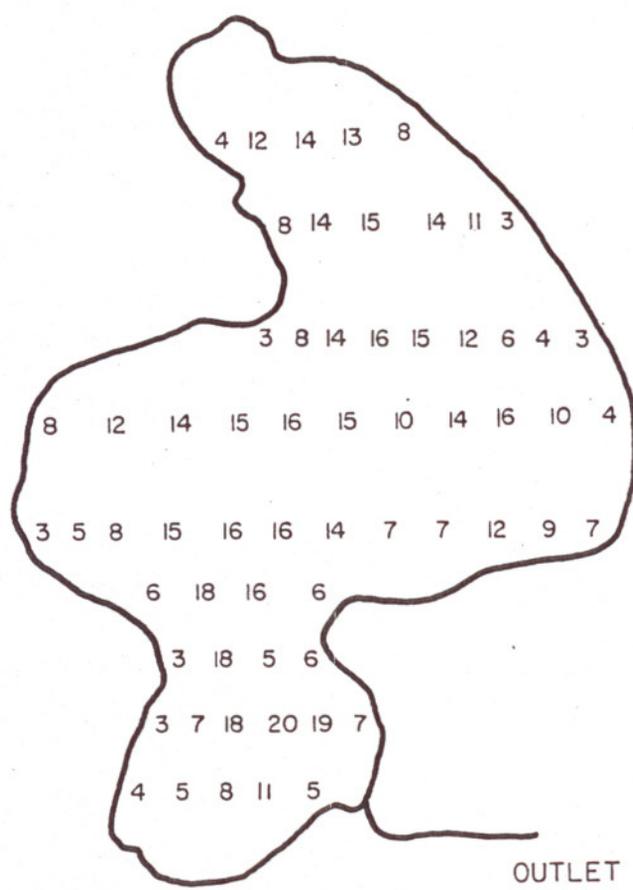

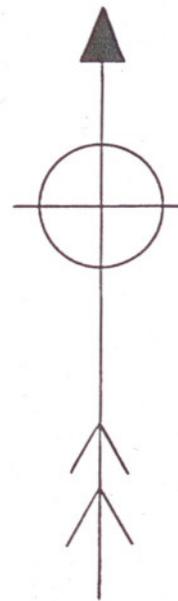

Largemouth bass were introduced by this department in 1957. The introduction was successful, and an excellent fishery now exists. In 1969, artificial reefs were created using cement blocks and used tires. These reefs were successful in providing cover for juvenile bass and perch.

A town-owned access site, located on the west shore on the Sand Pond Road, provides access for small boats and canoes.

Surveyed - August, 1956
