

DUCK POND

**Waterford Twp., Oxford Co.
U.S.G.S. North Waterford, Me. (7.5')**

Fishes

Largemouth bass

Bullhead (hornpout)

Physical Characteristics

Area – 37 acres

Temperatures:

Surface - 77°F

Maximum depth – 10 feet

7 feet - 75°F

Principal fisheries: Largemouth bass

Duck Pond is a shallow, weedy impoundment created by a small dam on Duck Pond Brook. The pond is not well suited for coldwater fisheries management, and the Maine Department of Inland Fisheries and Wildlife introduced largemouth bass in 1974 to provide better fishing opportunities. Bass are now well established and provide fair fishing. However, this pond may periodically winterkill, which limits the number and size quality of the bass.

There is no public access, and anglers are limited to permissive trespass over privately owned land.

Surveyed – August 1973

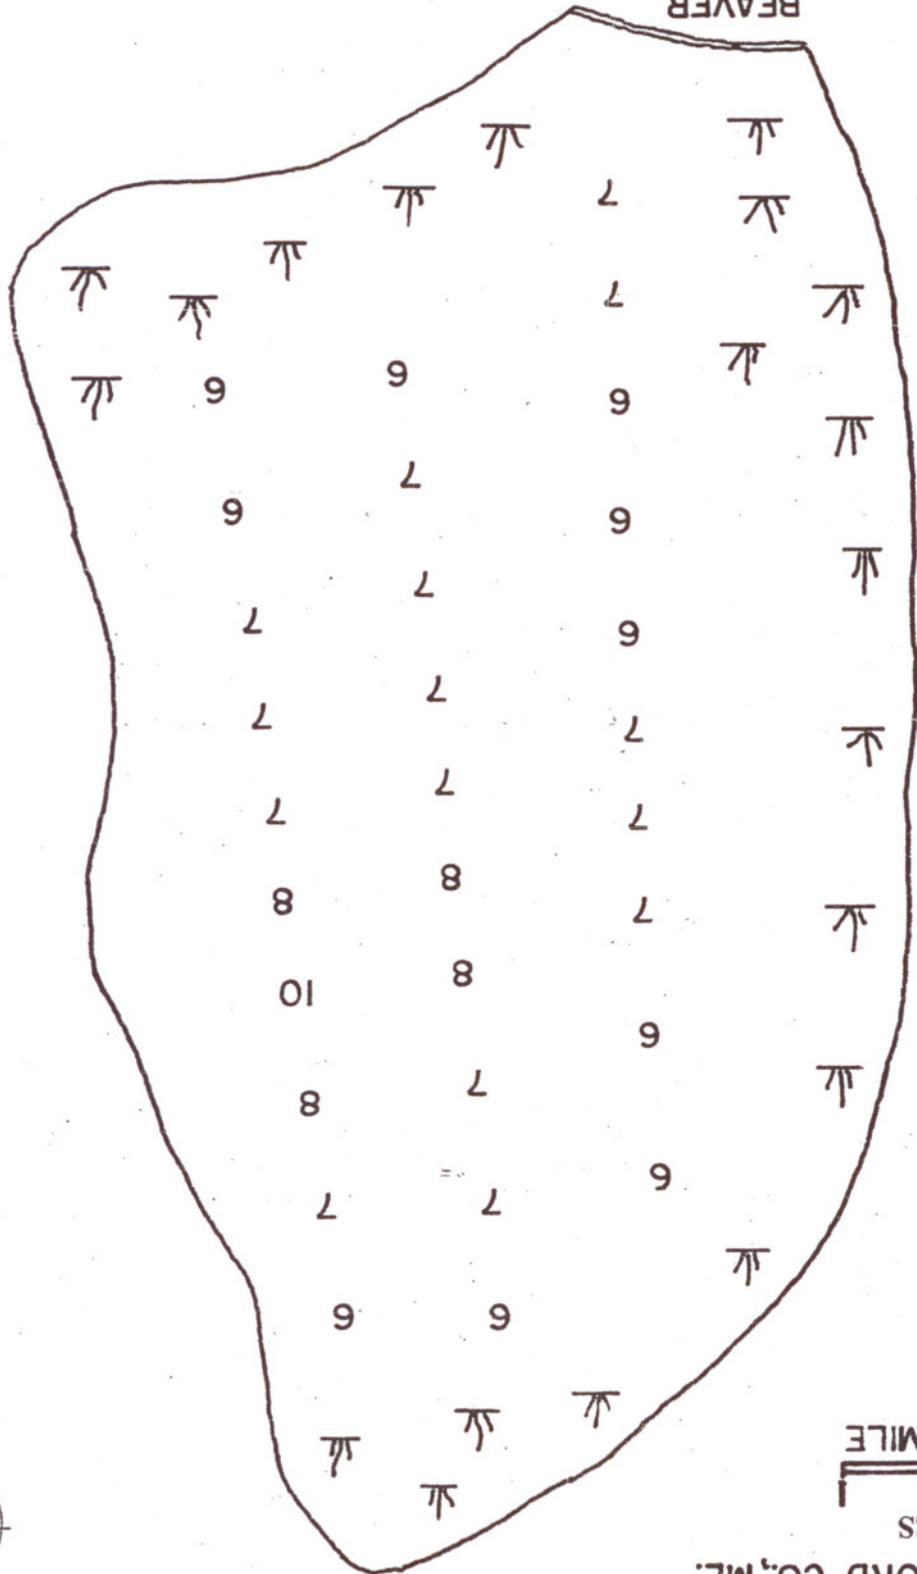

(Revised – 2003)
