

MIDAS # 2284

GEORGE POND

HERMON TWP, PENOBSCOT CO., MAINE

AREA 46 ACRES

GEORGE POND

Hermon Twp., Penobscot County
U.S.G.S. Hermon, Maine

Fishes

Smallmouth bass
White perch
Yellow perch
Chain pickerel
Minnows
Golden shiner

White sucker
Hornpout (bullhead)
Black crappie
American eel

Physical Characteristics

Area - 46 acres

Maximum depth - 11 feet

Temperatures:

Surface - 75⁰F

10 feet - 72⁰F

Principal fisheries: Smallmouth bass, chain pickerel, black crappie

George Pond is a small weedy warmwater pond ideally suited for the species currently present. Both the smallmouth bass and black crappies have migrated into George Pond from Hermon Pond. The many different species coupled with the abundant populations of those fish has caused the fish to become stunted.

George Pond provides an excellent opportunity to introduce children to the sport of fishing because of the fast action.

Surveyed - August, 1959

Revised - 2000
