

CLEAR LAKE
T10 R11, Piscataquis Co.
U. S. G. S. Musquacook Lakes, Me.

Fishes

Brook trout (squaretail)	Minnows (cont'd)
Lake trout (togue)	Lake chub
Lake whitefish	Creek chub
Minnows	Cusk
Redbelly dace	Threespine stickleback
Blacknose dace	

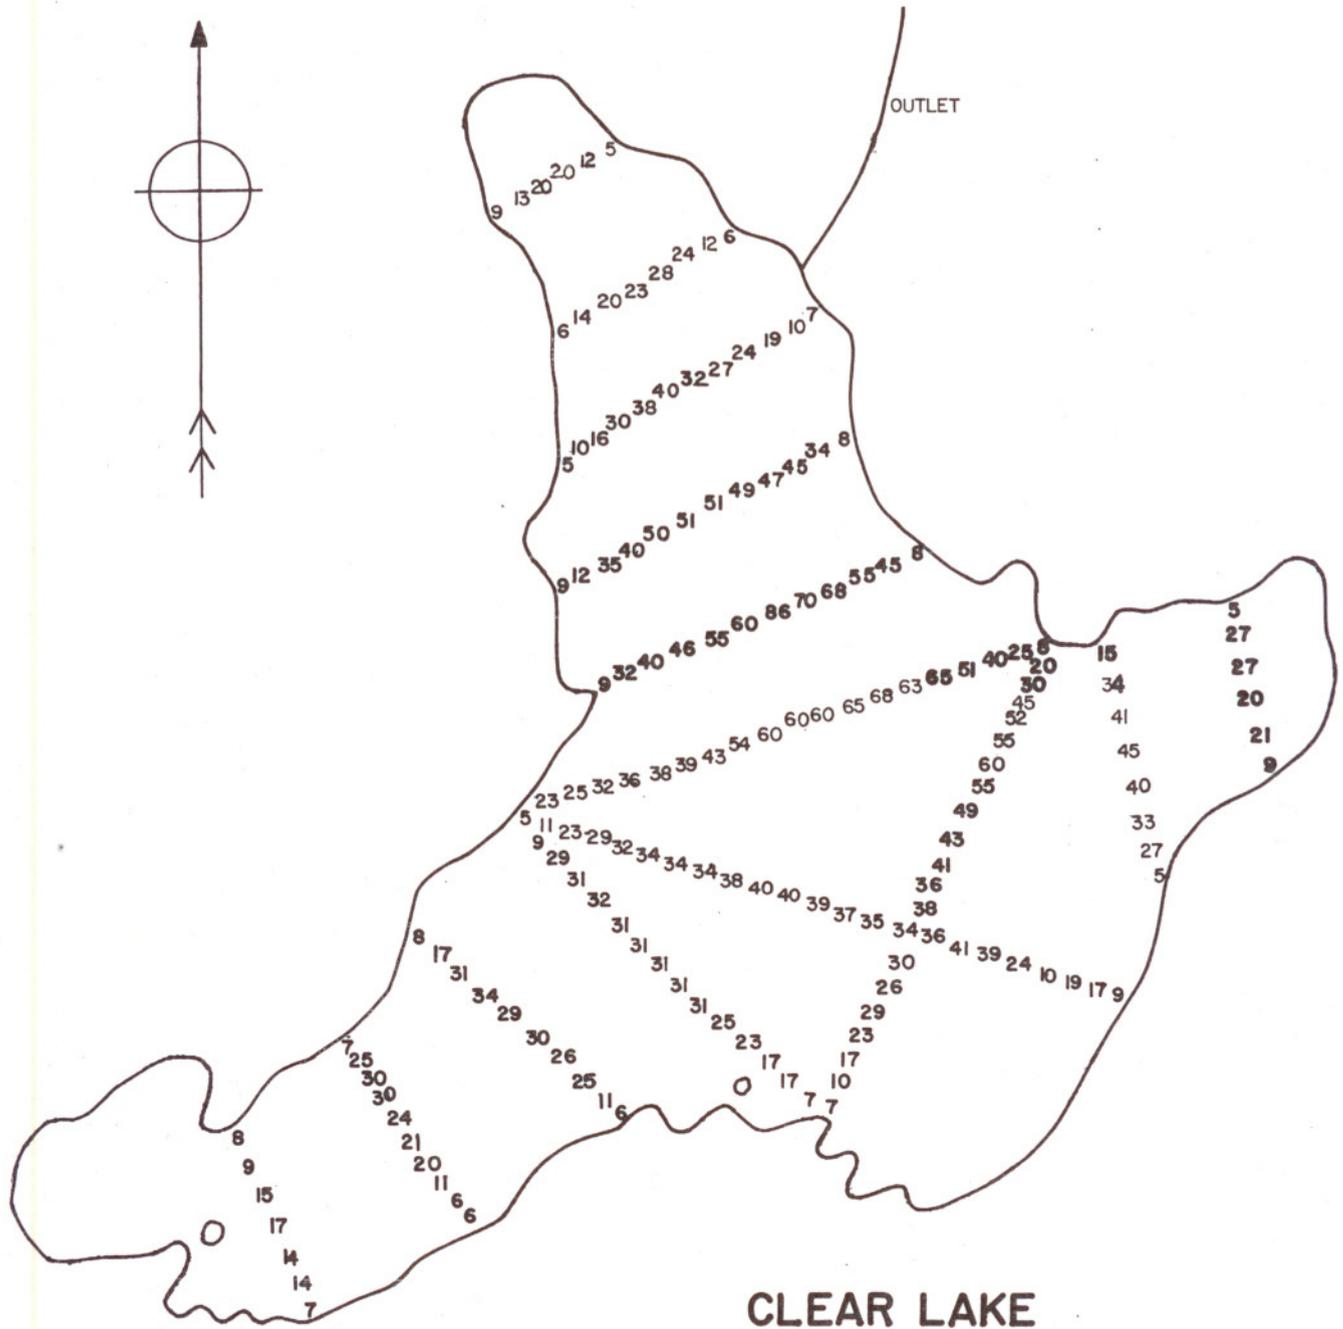

Physical Characteristics

Area - 614 acres	Temperatures
	Surface - 68° F.
Maximum depth - 86 feet	70 feet - 47° F.

Suggested Management

Clear Lake is noted for the quality of its togue fishery. The lake contains a large volume of cold, well-oxygenated water throughout the summer. Water below the 50-foot level is low in oxygen in late summer. Water quality conditions for cold-water fishes are considered good.

Extensive rocky shoals provide excellent spawning areas for togue. A sizable whitefish population is the principal food of the togue in Clear Lake.

CLEAR LAKE

TIO RII, PISCATAQUIS CO.

AREA: 614 ACRES
