

LITTLE TOMAH LAKE
Topsfield and Codyville Twps.,
Washington Co.
U. S. G. S. Waite, Me.

Fishes

Brook trout (squaretail)	White sucker
Chain pickerel	Minnows
Yellow perch	Golden shiner
Hornpout (bullhead)	

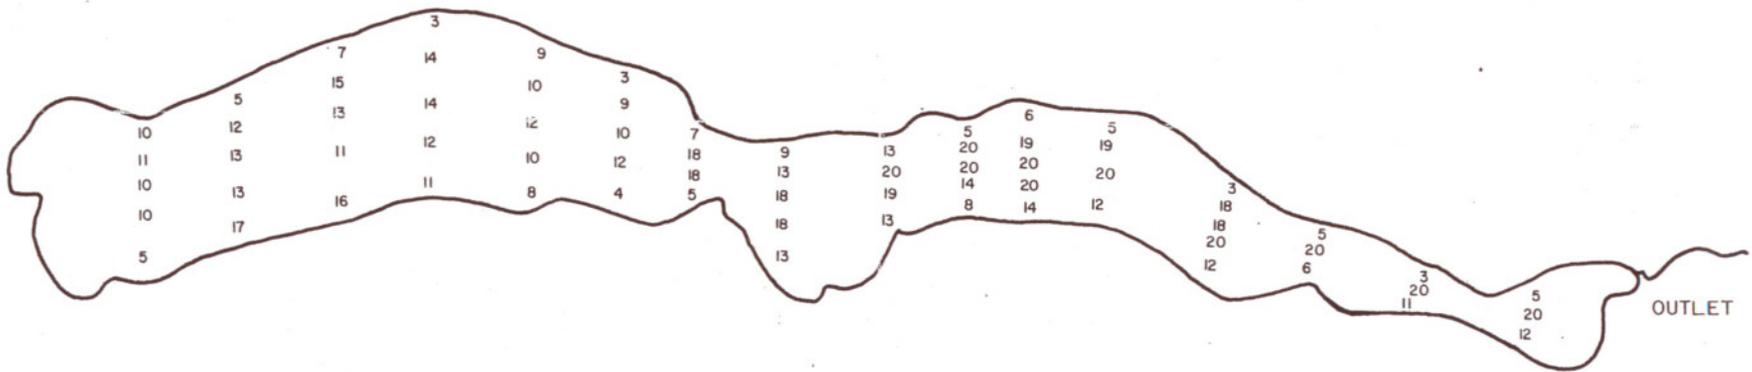

Physical Characteristics

Area - 147 acres	Temperatures
	Surface - 67° F.
Maximum depth - 20 feet	20 feet - 65° F.

Suggested Management

Little Tomah Lake is reported to have supported a satisfactory brook trout population until recent years. Reclamation to reduce competing species and subsequent trout stocking might re-establish a moderate trout fishery. However, the pond's geographic location and probable light fishing pressure make reclamation impractical at this time. Reclamation costs would approach \$2,000.00.

It is unlikely that stocked brook trout would co-exist satisfactorily with the warmwater fishes established. No stocking is recommended.
