

TOWN HOUSE & MILTON PONDS

Milton Twp., Stratford Co., N.H.

Lebanon Twp., York Co., Me.

U.S.G.S. Berwick, Me.

Fishes

Brown trout	Fallfish (chub)
Smallmouth bass	White sucker
Largemouth bass	Hornpout (bullhead)
White Perch	Banded killifish
Yellow Perch	Pumpkinseed sunfish
Chain Pickerel	American eel
Minnows	Landlocked alewives
Golden shiner	

Physical Characteristics

Area – 364 acres

Temperatures:

Surface - 73°F

Maximum depth – 55 feet

20 feet - 47°F

Principal fisheries: Smallmouth bass, largemouth bass, chain pickerel, and white perch

Town House and Milton Ponds are formed on the Salmon Falls River along the Maine and New Hampshire border. Water quality is currently considered very good for resident warmwater fisheries, and a narrow band of cold, oxygenated water provides limited summer habitat for coldwater fish. New Hampshire Fish and Game stocks brown trout to provide a coldwater fishery.

A commercial ramp provides public boat access for a fee. Current access provisions are tentative and could be terminated in the future. There is a need to develop public boat access.

Surveyed – August 1966

(Revised – 2002)

Maine Department of Inland Fisheries and Wildlife

Funded in part by the Federal Aid in Restoration Act under Federal Project F-28-P

L3874 A & L0155 A
