## Preface

We wish to express our sincere appreciation to all Maine employers who responded to the ***Occupational Employment Statistics*** (OES) survey. It is their ongoing participation and collaboration that makes it possible for us to produce this valuable tool to support compensation planning and analysis, the formation of effective human resource strategies, and the provision of economic development tools supporting new business locations and firm expansion decisions.

This report contains wage rates for more than 650 distinct occupations, coded to the Standard Occupational Classification used nationwide for defining occupations. You may use this report to compare wage rates across the metropolitan areas of Bangor, Lewiston-Auburn, Portland, or Maine's 16 counties, with those reported statewide. Users may compare Maine wage rates with those of other states or metropolitan areas through the U.S. Bureau of Labor Statistics web site ([www.bls.gov/oes](http://www.bls.gov/oes)), which covers all 50 states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. Technical notes, occupational definitions, and downloadable Excel data files are also available there. This comparative analysis is possible due to the use of a standardized methodology that ensures statistical validity between regions and across industries. Very few if any compensation surveys meet the validity and response rate standards of the Occupational Employment Statistics program. We are constantly striving to improve both its accuracy and its relevance for supporting the decisions of individuals, businesses, and economic development planners.

## Introduction

The Occupational Employment Statistics (OES) survey produces occupational employment and wage estimates for the nation, each of the 50 states, and most metropolitan statistical areas (MSAs). Tables for Maine (statewide), the metropolitan statistical areas (MSAs) of Bangor, Lewiston-Auburn, and Portland-South Portland-Biddeford, and each Maine county are provided. Occupational listings are sorted by Standard Occupational Classification (SOC), arranged by job function within 22 major occupational groups. An alphabetical listing is provided at the end of this publication.

Maine county-level tables are a product of the Estimates Delivery System, a software application that allows us to produce statistically valid estimates for areas other than those defined by the Bureau of Labor Statistics. The county-level tables represent an extension to the official Occupational Employment Statistics data series, and have not been reviewed or validated by the Bureau of Labor Statistics.

The OES survey categorizes workers into one of 801 detailed occupations based on the Standard Occupational Classification (SOC) system. The SOC structure consists of 22 major occupational groups based on the type of work performed. Military occupations are not included. While not all 801 detailed occupations are reported in Maine, this report contains over 650 occupational entries at the statewide level.

The May, 2007 OES estimates are based on data collected during the May, 2007, November and May, 2006, November and May, 2005, and November, 2004 surveys. Employment estimates are benchmarked to the average employment of November, 2006 and May, 2007. Wage estimates are benchmarked to May, 2007 through use of the Employment Cost Index (ECI) for each ECI occupational group.

The following information is provided:

### **SOC Code**

The Standard Occupational Classification code identifies each occupation. It is useful for obtaining additional information from O\*Net, the Occupational Outlook Handbook, America's Career One-Stop, or other sources of occupational information.

### **Standard Occupational Classification (SOC) Title**

The occupational title assigned to the classification.

**Estimated Employment**

Occupational employment estimate for the specified area, benchmarked to the average employment of November, 2006 and May, 2007.

**Mean (Average)**

This figure is the weighted average. It is the estimated total wages for an occupation divided by its weighted employment.

**Entry**

Derived by calculating the mean (average) of the lower third of the distribution.

**Experienced**

This is the mean (average) of the upper two-thirds of the distribution.

**10<sup>th</sup> Percentile**

Ten percent of employees in the specified occupation earn less than this figure, while 90 percent earn more.

**25<sup>th</sup> Percentile**

This is the lower boundary of the mid-range. Twenty-five percent of all employees in an occupation earn less and 75 percent earn more.

**Median**

This is the 50<sup>th</sup> percentile, or mid-point. One-half of employees in the specified occupation earn less, and one-half earn more than this amount.

**75<sup>th</sup> Percentile**

This is the upper boundary of the mid-range. Seventy-five percent of all employees in an occupation earn less and 25 percent earn more.

**90<sup>th</sup> Percentile**

Ten percent of employees in the specified occupation earn above this figure, while 90 percent earn less.

**Relative Error- Mean**

This is the percentage in which the true mean wage might differ from the published estimate. The lower the error, the more reliable the associated estimate.

### Relative Error-Employment

This is the percentage in which true employment might differ from the published estimate. The lower the error, the more reliable the associated estimate of employment. This figure is not provided in the county tables

### Sample

The sampling frame for the May, 2007 OES survey was the 2<sup>nd</sup> Quarter 2006 Quarterly Census of Employment and Wages (QCEW) Report covered by the Maine Employment Security Law. Owners of unincorporated firms (sole proprietorships and partnerships) and those who are self-employed were excluded. Data on occupational employment and wages are collected from employers of every size in all areas of the state and in all industry divisions. The sample consisted of 1,423 units (after adjusting for out-of-business units) representing 46,249 workers. Of these, we received usable responses from 1,048 units (73.65 percent) representing 35,597 workers (76.97 percent).

### Wage Collection

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay. **Included** are base rate, cost-of-living allowances, longevity pay, guaranteed pay, hazardous-duty pay, incentive pay including commissions and production bonuses, tips, and on-call pay. **Excluded** are back pay, jury duty pay, overtime pay, severance pay, shift differentials, nonproduction bonuses, profit sharing, attendance, holiday and year-end bonuses, and tuition reimbursements.

The OES survey collects wage data in 12 intervals. Employers report the number of employees in an occupation per each wage range. The wage intervals effective November 2005 are as follows:

<b>Interval</b>	<b>Hourly Wages</b>	<b>Annual Wages</b>
Range A	Under \$7.50	Under \$15,600
Range B	\$7.50 to \$9.49	\$15,600 to \$19,759
Range C	\$9.50 to \$11.99	\$19,760 to \$24,959
Range D	\$12.00 to \$15.24	\$24,960 to \$31,719
Range E	\$15.25 to \$19.24	\$31,720 to \$40,039
Range F	\$19.25 to \$24.49	\$40,040 to \$50,959
Range G	\$24.50 to \$30.99	\$50,960 to \$64,479
Range H	\$31.00 to \$39.24	\$64,480 to \$81,639
Range I	\$39.25 to \$49.74	\$81,640 to \$103,749
Range J	\$49.75 to \$63.24	\$103,480 to 131,559
Range K	\$63.25 to \$79.99	\$131,560 to \$166,399
Range L	\$80.00 and over	\$166,400 and over

### Data Limitations

The wage ranges used in the OES program are open-ended at both the lower and upper spectrum, the lowest range

being less than \$7.50 per hour and the highest range being \$80.00 and over per hour. The lowest range has a low boundary equal to the state's minimum wage, which was \$6.75 in Maine as of the survey reference date of May 12, 2007. Wage estimates denoted by an asterisk (\*) are outside the limits of the wage estimation program, and are not available.

Some estimates have been determined to be unreliable due to high relative errors, or are not disclosable for other reasons. In these instances, a double asterisk (\*\*) appears to denote that the estimate is not available.

Data that do not meet statistical validity or publication standards are not provided.

- Notes:**
1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
  2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
  3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
  4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
  5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
  6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

- Notes:**
1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
  2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
  3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
  4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
  5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
  6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

Source: Maine Department of Labor, Center for Workforce Research and Information, Occupational Employment Statistics (OES) program, May 2007 data set. Table created 01 August 2008.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

#### Notes:

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

- Notes:**
1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
  2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
  3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
  4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
  5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
  6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

#### Notes:

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

- Notes:**
1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
  2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
  3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
  4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
  5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
  6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.

**Notes:**

1. An asterisk (\*) appears when a wage rate is outside the range that can be calculated by the survey processing program.
2. A double asterisk (\*\*) appears when an employment or wage estimate does not meet disclosure requirements established by the U.S. Bureau of Labor Statistics.
3. Only annual wages are provided for teachers, aircraft pilots, and certain other occupations for which hourly rates cannot be accurately calculated.
4. Hourly rates may be converted to annual by multiplying the hourly rate by 2,080. This represents a standard work week of 40 hours, 52 weeks per year.
5. Relative Error is the difference between the published estimate and the actual population value. It is expressed as a percent. Lower errors imply more accurate estimates.
6. Occupational employment at the detail level will not add to totals due to rounding, as well as the suppression of non-disclosable data.
