RE: Revenue Forecast Committee's December 2013 Report

The Revenue Forecasting Committee (RFC) has concluded its fall update of the current revenue forecast to comply with this year's statutory reporting date of December 1st. The body of the RFC's December 2013 report and Appendices A through D have been posted to the RFC's web page and available through the link below. The full report with all appendices will be posted to that web page when compiled and sent to the printer. A limited number of copies of the full report will be available in the Office of Fiscal and Program Review, Room 226 of the State House, when they return from the printer.

It is important to note that once again the revenue forecast and the underlying economic forecast were developed during a period of great uncertainty largely centered on pending federal budget and debt ceiling negotiations. The Revenue Forecasting Committee and the Consensus Economic Forecasting Commission will be carefully watching the outcome of these negotiations due to the potential risk posed to both the economic and revenue forecasts.
