COMMISSIONER

June 19, 2007
Subject: **Milo**
Project No. STP-1001(200)X
Pin No. 10012.00
Amendment No. 1

Dear Sir/Ms:

Please make the following changes to the Bid Documents:

In the Bid Book, REMOVE in its entirety the existing: "Schedule of Items" nine pages total, dated 070529 and REPLACE with the attached updated: "Schedule of Items" nine pages total, dated 070619.

In the Plans, on sheet seven of ninety-seven titled: "Estimated Quantities & Earthwork Summary" within the Estimated Quantities, ADD Item 409.15 Bituminous Tack Coat Applied, quantity of 3000.000 L. Make this change in pen and ink.

The following questions have been received.

Question: You Have included several Items for a new Sewer and Water line in the Schedule of Items (Items 801.16 thru 827.33), but on the plans /profiles it calls for this work to be done by others, Please clarify.

Response: "By others" was intended to imply that the Sewer & Water lines, as shown on the MeDOT plans /Profiles are not the responsibility of MeDOT. The Design of the said utilities is by others and the Contractor should refer to the included Sewer Plans. The Contractor should submit bids for all required utility work, as shown in the Sewer Plans, in accordance to Specs and Special Provisions.

Question: What is the Width and extent of the concrete pavement(where does it start and stop)?

Response: Refer to Construction and General Notes, Note # 46. Refer to soils report 2006-25, subsurface conditions. Borings indicate between 3-8 inches of concrete.

Question: Is there a reason why the sewer needs to be constructed on the centerline of the road? Could it be moved to the shoulder or to one side of the center line(into a single concrete slab area)?

PRINTED ON RECYCLED PAPER

Response: Discuss with Dirigo Engineering, designers for sewer work. See plans for contact information.

Question: Does the sewer utility have locations (records) of service locations?

Response: Discuss with Dirigo Engineering, designers for sewer work. See plans for contact information.

Question: Could the 2" mainline surcharge of RAP (if used for this purpose) be used as a grading course in the shoulder areas or must it be removed and picked up?

Response: See "Special Provision Section 304", Last paragraph, last sentence, Salvaged Bituminous pavement **shall not** be used as the top layer of the aggregate base course.

Question: In regards to the direct buried and concrete encased telephone cables – the direct burial is being discontinued but does the concrete encased cable that is remaining run from 1+000 to 1+440 or is it in an isolated area?

Response: Concrete encased cable that is remaining runs approximately from station 1+000 to station 1+440 right.

Question: Shouldn't there be an item 409.15 Bit tack coat? It shows it as a pay item under the 403 box in the specs?

Response: Yes, please see changes to the "Schedule of Items" as addressed in this amendment.

Question: There is no detail for the underdrain outlet into the Sebec River. The note on the Plans says to install as directed by the Resident. We are assuming that this will be paid for with hourly rental Items.

Response: Installation of the proposed 450mm U.D. from Sta. 7+994.5 (Limit of Topo) to Sebec River (Approximately 17 m in Length) Will be Designed & Estimated in the field by the Resident. The installation of this Section of proposed underdrain will then be paid for under Item No. 605.13.

Consider these changes and information prior to submitting your bid on June 20, 2007.

Sincerely,

Scott Bickford
Contracts & Specifications Engineer
