DEPARTMENT OF TRANSPORTATION  
16 STATE HOUSE STATION  
AUGUSTA, MAINE 04333-0016

Paul R. LePage  
GOVERNOR

David Bernhardt  
COMMISSIONER

November 14, 2013  
Subject: **Portland Thompson's Point**  
Federal Project No: STP-1839(400),  
STP-1733(600) & STP-1838(900)  
State WIN: 018394.00, 017336.00,  
018389.00, 018394.10, 018394.11,  
018394.12 & 018394.13  
**Amendment No. 2**

Dear Sir/Ms:

Make the following changes to the Bid Documents:

In the Bid Book (pages 16 thru 30) **REMOVE** the "SCHEDULE OF ITEMS" 16 pages dated 1311104 (and replaced in Amendment #1) and **REPLACE** with the attached new "SCHEDULE OF ITEMS" 16 pages dated 131112.

In the Plans, Sheet Number 4B of 91 "ESTIMATED QUANTITIES", make the following **CHANGES** to Item 660.21 "ON-THE-JOB TRAINING (BID)" in pen and ink;

1. Under "WIN 18394.00 THOMPSON'S POINT RD" **CHANGE** "160" to Read "**190**"
2. Under "WIN 17336.00 FORE RIVER PKWY. MULTI-USE PATH" **CHANGE** "160" to Read "**170**"
3. Under "TOTAL" **CHANGE** "960" to Read "**1000**"

The following questions have been received:

**Question:** Can corrugated Polypropylene Pipe (i.e. SaniTite HP) please be allowed as an alternative Storm Drain Pipe to where only 12"/15"/30"/36" dia. RCP is presently specified?

**Response:** Smooth-lined polypropylene pipe, meeting the requirements of AASHTO M330, Type D (triple wall), may be substituted for the following:

1. 12-in. RCP located within the Thompsons Point Road/Fore River Parkway intersection, and on the Exit 5B offramp, as shown on plan sheets 12 & 14 and sections included on sheets 56 & 66.
2. 30-in. RCP located within the CSO, as shown on Sheet F-1.

The manufacturing plants of polypropylene pipe shall participate annually in the National Transportation Product Evaluation Program (NTPEP) process for plastic pipe and resins which includes audits by the AASHTO Materials Reference Laboratory (AMRL). Plants shall be listed as "Compliant" on the NTPEP website and take immediate corrective action for any deficiencies found during audits. Continued compliance with all elements

PRINTED ON RECYCLED PAPER

of the NTPEP/AMRL program and the Maine DOT manufactured Materials Verification Program will be required in order to continue supplying product to the Maine DOT. In using polypropylene pipe, as allowed, if inspection by the Resident reveals an unsatisfactory installation, the Resident may direct the contractor to test the installed pipe to ensure the vertical deflection does not exceed the maximum allowable deflection. Maximum allowable deflection shall be 5 percent of the sum of the nominal inside diameter minus a 1.5 percent undersize tolerance.

Deflection tests shall not be performed until at least 30 days after completion of installation and compaction of backfill. The pipe shall be cleaned and inspected for offsets and obstructions before testing.

For the 12-in. polypropylene pipe deflection tests shall be completed using a mandrel pulled through the pipe by hand to ensure the maximum allowable deflections have not been exceeded. The mandrel shall be certified by the Department prior to use. If the mandrel fails to pass through the pipe, the pipe will be deemed overdeflected. The mandrel shall be a rigid non-adjustable, odd numbered-leg (9 legs minimum) mandrel having an effective length not less than its nominal diameter and having a minimum diameter at any point along the full length of 11.23 inches.

For the 30-in. polypropylene pipe, deflection tests shall be determined by a method submitted by Contractor, for review and approval by the Department. If a mandrel is selected for deflection testing, the mandrel shall be a rigid non-adjustable, odd numbered-leg (9 legs minimum) mandrel having an effective length not less than its nominal diameter and having a minimum diameter at any point along the full length of 28.07 inches.

Any overdeflected pipe shall be uncovered and if not damaged, as determined by the Department, shall be allowed for reinstallation. Damaged pipe shall not be reinstalled and shall be removed from the work site.

When deflection testing reveals overdeflected pipe, all costs incurred by the Contractor including mandrel and deflection testing, reinstallation of pipe and delays shall be the responsibility of the Contractor. When deflection testing reveals satisfactory pipe, all costs for deflection testing will be paid for by the Department.

Substitution of other sections of RCP shown on the plans which consist of 15 and 36-in. will not be allowed.

**Question:** Reference Special Provision, Section 528, will a steel pedestrian bridge be acceptable as an alternate to the timber footbridge.

**Response:** A steel pedestrian bridge will not be permitted on this project.

**Question:** Can you please clarify what markings are to be painted and what markings are to be 3M plastic?

**Response:** Response: 3M plastic pavement markings (pay item 627.407) shall be used on Thompson's Point Road. Painted pavement markings (pay items 627.733, 627.744, 627.75) shall be used on the other roads.

**Question:** What are the “painted” curb markings?

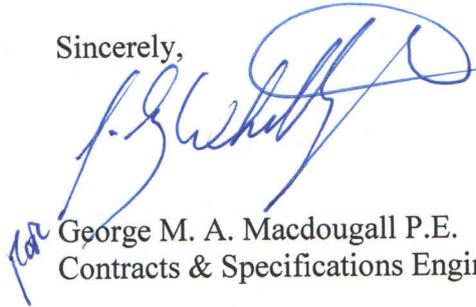

**Response:** Response: Pay item 627.75, White or Yellow Pavement & Curb Marking item shall be used to pay for pavement marking items that need to be completed with hand equipment and not by a paint truck. Items such stop bars, cross walks, lane arrows etc. shall be paid for under this item.

**Question:** What are the anticipated “temporary” markings needed for this project?

**Response:** Temporary pavement markings (pay item 627.76) are anticipated on Thompson’s Point Road. They shall be used between placements of pavement lifts. Markings may include temporary center lines, lane lines, stop bars, cross walks, lane arrows etc.

Consider these changes and information prior to submitting your bid on November 20, 2013.

Sincerely,

George M. A. Macdougall P.E.  
Contracts & Specifications Engineer
