COMMISSIONER

Dear Sir/Ms:

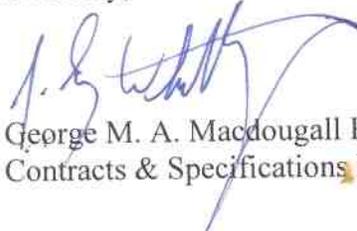

The following question has been received:

Question: Special Provision 105 (Limitations of Operations) note number 9 states that temporary lane closures shall be utilized at night for work between stations 465+00 to 537+00. May shoulder work and manhole & catch basin adjustments be performed during the day with the shoulder closed?

Response: Part of the reason that night work is required in this area is to accommodate the on-street parking for the local businesses during the day. Night work will be required as specified.

Consider this information prior to submitting your bid on April 17, 2013.

Sincerely,

for

George M. A. Macdougall P.E.
