

TRAFFIC ALERT

Auburn Route 202 Bridge Replacement The Oakdale Northbound Bridge

Temporary Closure by June 1st.

The Oakdale Bridge, northbound on Route 202, spans the Little Androscoggin River in Auburn. MaineDOT will be building a wider, safer replacement bridge during the 2014 construction season. In order to complete the majority of this \$2.8 million construction project in one season, Route 202 northbound (also known as Washington St. northbound) will be closed to through traffic in the vicinity of the bridge. Instead, traffic will be rerouted via Chasse St. and Philomar St. to Route 202 southbound (Washington St. southbound) which will handle both northbound and southbound through traffic during the construction.

Though all work schedules are weather-dependent, it is expected that the bridge will close on June 1st and will remain closed until November 15th. There will be some additional work done in the spring of 2015.

Please note that all businesses in the vicinity of the Oakdale Northbound Bridge will be open and accessible. The detour route is for through traffic only.

We know this essential structural work may be inconvenient for motorists. Please allow extra time or seek an alternate route.

And remember- please pay attention and obey reduced speed limits when driving in work zones.
