

# The Steep Falls Bridge Replacement

## Temporary closure begins May 12<sup>th</sup>

The 78-year old **Steep Falls Bridge**, spanning the Saco River on Route 11, will be replaced with a new and wider bridge with a sidewalk. The \$2.7 million construction project begins in April and continues through November, 2014. Within that timeframe, there will be a full closure of the current bridge beginning May 12<sup>th</sup> and lasting through mid-November. Traffic will be detoured along Routes 11, 25 and 113 during that time. This construction work is weather dependent, so dates may change.

The **East Limington Bridge**, which is on Route 25 and also spans the Saco River, will be rehabilitated next year with a new concrete wearing surface and joint repairs. Construction activity on the East Limington Bridge requires one-way alternating traffic for a maximum of 35 days and is expected to begin in the spring of 2015.

**We know this essential structural work may be inconvenient for motorists.  
Please allow extra time or seek alternate routes.**

**And remember-** please pay attention and obey reduced speed limits when driving in work zones or on detour routes. MaineDOT thanks you for driving safely.
