

## WHO SHOULD ATTEND

This is aimed at "decision makers" and not solely snow plow operators.

**Town Managers**  
**Public Works Directors**  
**Road Commissioners**  
**Selectman**  
**Foremen**  
**Plow Contractors**

If you are responsible for keeping roads clear in the winter and for the amount and type of material you put on the road, **you may want to attend this workshop.** If you want to increase the level of service (LOS), reduce environmental impacts AND SAVE MONEY in the winter, **you may want to attend this workshop.**

## WHAT WILL BE COVERED

This presentation is similar to the "Winter Maintenance Roundtable" that was held on September 10, 2015 in Hallowell. These "practices" were developed with the help from municipal public works personnel, State and County professionals, as well as Consultant, Non-profit and Academic contributors from around the State of Maine. Prior to the manual being printed, it was reviewed and feedback provided by the Maine Chapter APWA and representatives from Maine's Regulated MS4 communities.

The "practices" have potential to reduce chloride use and limit the impacts of chlorides and abrasives on equipment, the infrastructure and the environment WITHOUT reducing one's level of service.

We hope this workshop will assist those willing to try these BMP's into their Winter Operations.
