

FTP Software Download and Set up

- The software link listed on this page is provided for MaineDOT users as well as contracted businesses and consultants working with MaineDOT only.
- Downloading of the software program by non-MaineDOT users is done at the USERS OWN RISK.

[FileZilla Software Download](#) (Offsite)

1. Open your web browser and enter the following address: <http://filezilla.sourceforge.net> or click the address if available. Select the Download FileZilla Client (all Platforms) button.

2. Select the latest version (which may differ from the screen shot below). It should be a Windows Version most compatible or recommended.

3. The next screen may look like a registration window, however is only an advertisement. If you are using Internet Explorer, look for the security bar below the web address at the top of the page and click the bar with your mouse.

4. After clicking on the Link (Step 2) or the IE security warning box (Step 3), you will see a pop up box that should say File Download- Security Warning. After this box appears, click with your mouse pointer on the Run button, as shown in the graphic below.

5. You might get an additional Security Warning that says: The publisher could not be verified. Are you sure that you want to run this software? , as shown in the graphic below. Click on the Run button again.

6. After you click on the Run button a second time as shown in Step 5 above, the FileZilla program will download, and then will ask and show you the following questions:

6a. You will have to agree to the Licensing Agreement to use the product.

6b. After clicking on the I Agree button, the next screen will be a popup box that will ask you if you want this software to be used on your computer by you only, or anyone who might use also use your computer. Click on one of the radio buttons to make your choice, then click on the Next Button.

6c. The next box will show you a list of check boxes. These are options associated with FileZilla. Please make sure that all checkboxes have a green checkmark in them, then click the Next button.

6d. The next box will ask where you want the FileZilla software files to go. On all modern Microsoft windows systems, you should see a box that says Choose Install Location. You will also see a small input box that should say the following:

C:\Program Files\FileZilla FTP Client

This is the area on your computer that FileZilla wants to put the software files to install the program. Unless you want to put the files some where else on your computer (This is not recommended), click on the Next button.

6e. The next box you should see will say Choose Start Menu Folder. Click on the Install button. FileZilla should then begin to install itself on your computer.

6f. After this is complete, you should see a box that says FileZilla Client 3.5.2 (these numbers might be a little different on your install) has been installed on your Computer. You then click on the Finish button, and FileZilla should start up.
