## 1.0 SUMMARY

Trafton Realty, LLC is working with the MaineDOT and others to prepare a checklist Environmental Assessment (EA) in reference to a proposed new interchange on Interstate 95 at Trafton Road 0.4 miles north of mile marker 124. This Phase I ESA provides a portion of the documentation required under the federal National Environmental Policy Act (NEPA) to complete the checklist EA. On November 15, 2011 and June 12, 2013, AEH conducted a site reconnaissance of the study area for recognizable environmental conditions. Current and past uses of the property were established through historical record research, environmental records search, and a site reconnaissance. This Phase I ESA identified one (1) recognized environmental condition<sup>1</sup> associated with the site relating to past agricultural activity and structures. This condition should be easy to address prior to the transfer of the property for the proposed project.

The environmental liability risk associated with the property within the identified study area was **determined to be low** based on the observed conditions at the time of the site reconnaissance and literature and map searches conducted using reasonably ascertainable sources with time to follow-up on known or suspected recognized environmental conditions on the site.

## 2.0 INTRODUCTION

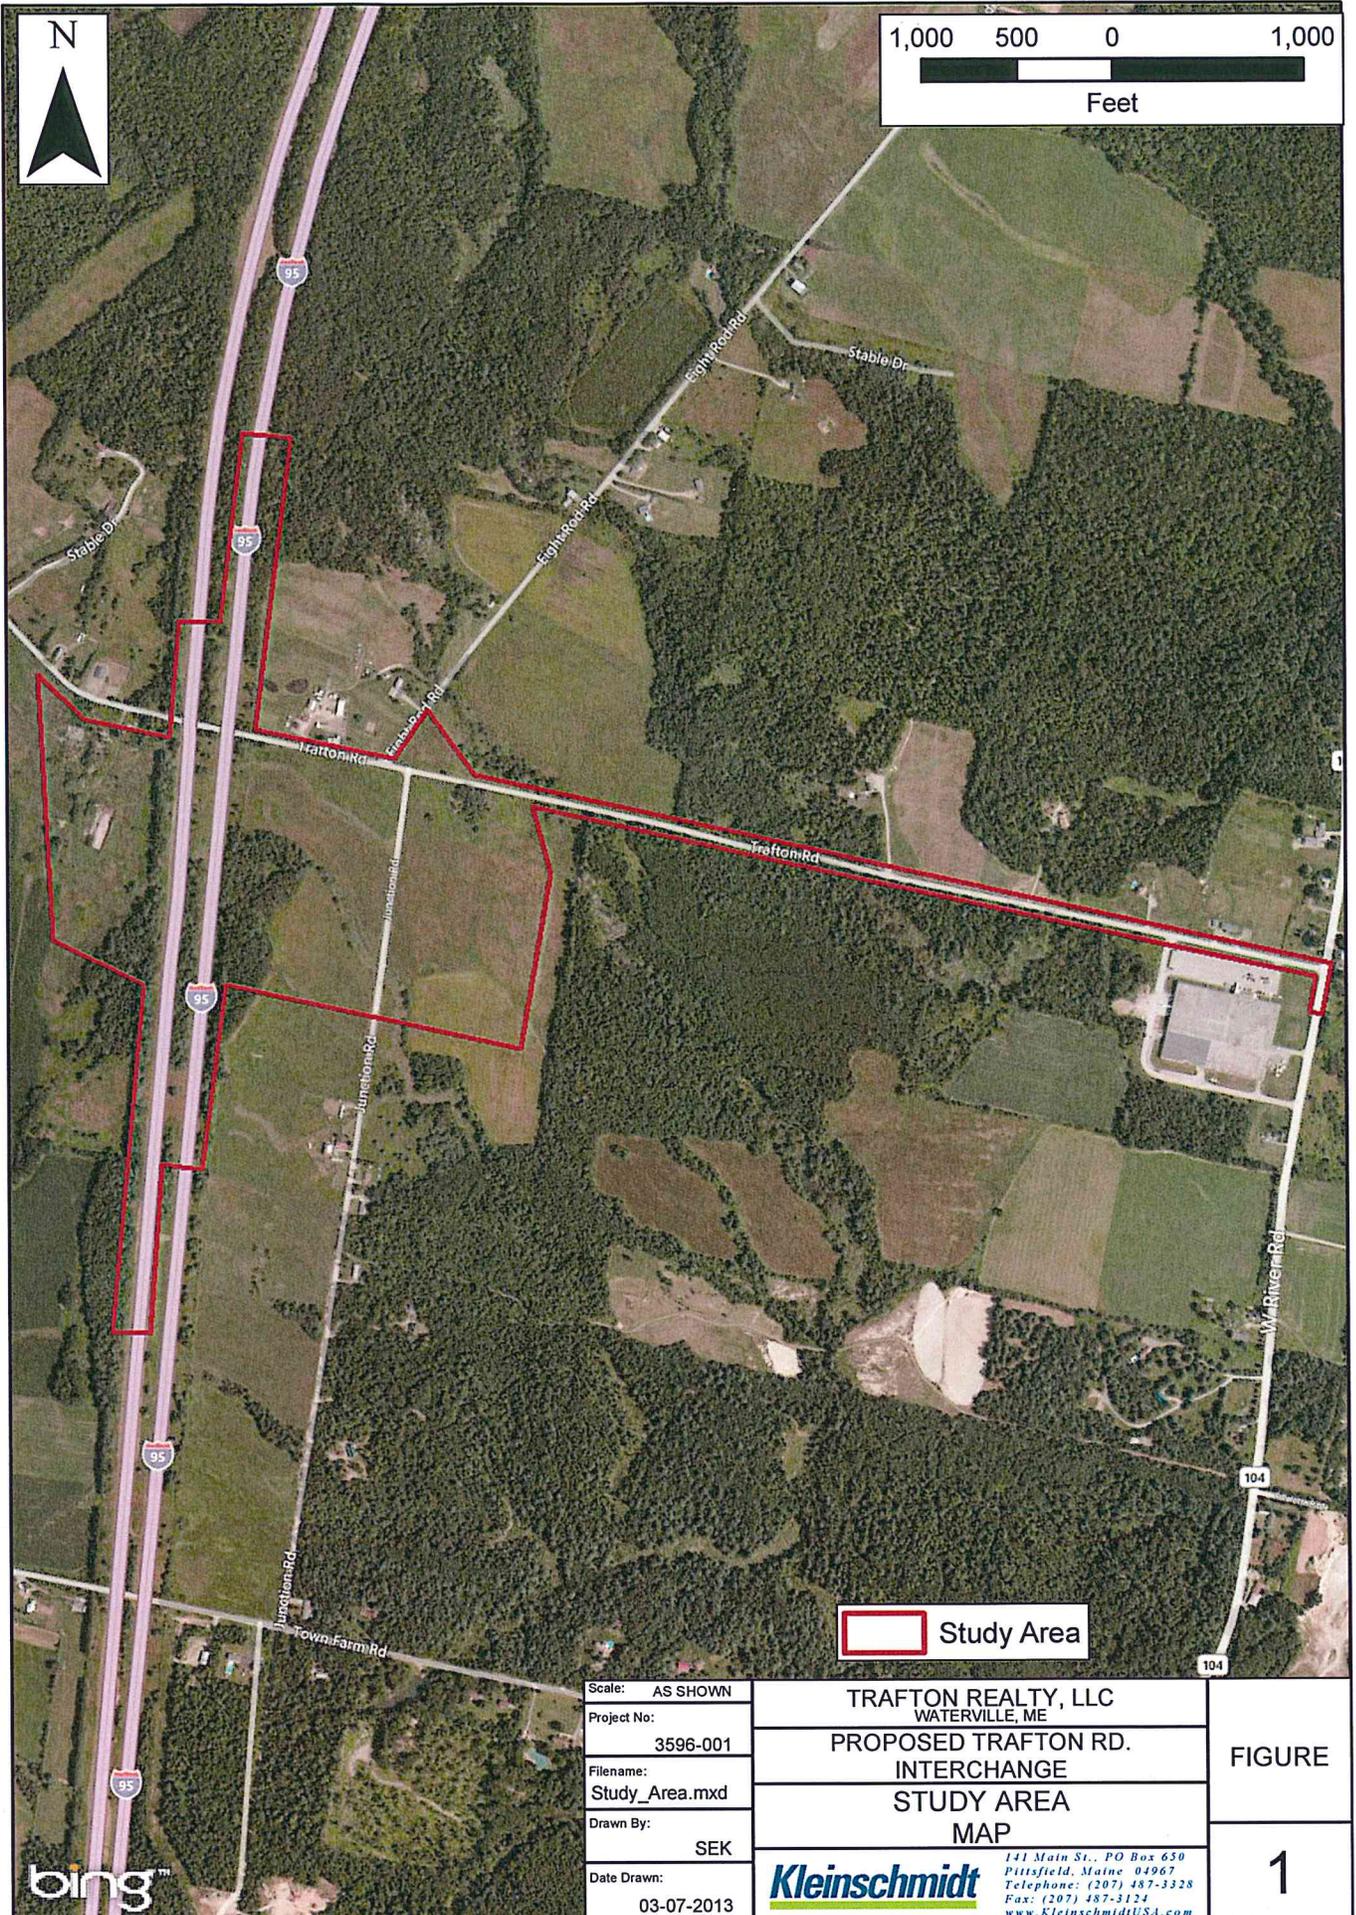

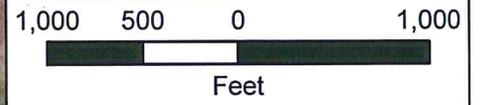

This report presents the results of a Phase I Environmental Site Assessment performed by A. E. Hodsdon Consulting Engineers (AEH) for a the study area located off Trafton Road, Waterville, Maine (Figure 1). The property is mainly comprised of three (3) parcels, a 23-acre parcel on the east side of Interstate 95 south of Trafton Road and north of the Sidney town line (Waterville Tax Map #6 - Lot #20), a 28-acre parcel on the east side of Junction Road south of Trafton Road (Waterville Tax Map 6, Lot #10), and the portion of Waterville Tax Map #5 - Lot #10 west of I-95 and east of the CMP power lines easement<sup>2</sup>. The total study area is comprised of approximately \_\_\_\_\_ +/- acres commercially zoned with minimal existing site improvements. A farmhouse, barn, and related outbuildings formerly existed just west of I-95 along Trafton Road. Currently, a concrete manure pit, overgrown farm roads, and hayfields slowly being encroached upon by the surrounding forest are all that remains.

The property slopes gradually to the south and east into a systems of an unnamed tributary of the Kennebec River that flow southward to Sidney then eastward to the Kennebec River. Photographs of the property are presented in Appendix A.

---

<sup>1</sup> **Recognized environmental conditions** means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of governmental agencies.

## 2.1 Purpose

The primary purpose of this Phase I ESA report is to provide AEH's professional opinion regarding environmental conditions on the property and to assess the risk that petroleum compounds or hazardous materials exist on or beneath the ground surface at the property. The release of these compounds and materials into the environment could fall under jurisdiction of:

- Maine Oil Discharge Prevention & Pollution Control program, 38 MRSA Section 541 et seq.
- Maine Underground Oil Storage Facilities and Groundwater Protection program, 38 MRSA Section 561, et seq.
- The Maine Uncontrolled Hazardous Substance Site Law, 38 MRSA, Section 1361 et seq.
- Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 USCA Section 9601 et seq. as amended.

MaineDOT needs this Phase I ESA to meet NEPA requirements associated with a proposed I-95 interchange located at Trafton Road in Waterville, Maine.

## 2.2 Detailed Scope-of-Services

This Phase I ESA was conducted in accordance with the authorization made by Trafton Realty, LLC on April 19, 2013. The Phase I ESA was conducted in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as established by the American Society of Testing and Materials (ASTM) in designation E 1527-05. Following these guidelines AEH performed the following tasks:

### Records Review

A records review of the property was performed for records that were reasonably ascertainable (records that were publicly available), obtainable from their source within a reasonable amount of time, and were practical/relevant for review.

### Historical Information

A history of the previous uses and ownership of the property, based on a review of as many standard historical sources as needed, was conducted for the previous 50 years or until a time when the property had not been developed. Standard historical sources reviewed may have included, but were not limited to: aerial photographs, fire insurance maps, municipal property tax files, recorded land title records, USGS 7.5 minute topographic maps, local street directories, building permits, and zoning records. Past and present land uses of all properties contiguous to the property revealed in the course of researching the property were also evaluated.

### Environmental Information

Standard environmental record sources were reviewed for the property within the approximate minimum search distances specified in E 1527-05, as measured from the property boundary. The following information was obtained from state and local records and databases.

- U. S. Environmental Protection Agency (USEPA) National Priorities List (NPL);
- USEPA Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database;
- USEPA Resource Conservation and Recovery Information System (RCRIS) database;
- Federal Emergency Response Notification System (ERNS) list;
- State of Maine Department of Environmental Protection (MDEP) Uncontrolled Hazardous Substance Sites;
- MDEP list of Active Landfills;
- MDEP Licensed Commercial Solid Waste Facilities Serving Maine;
- MDEP Master Underground Storage Tanks Sorted by Minor Civil Division State UST registration list; and,
- MDEP Spill Reports.

### Physical Setting Information

Geologic records were reviewed to determine the regional geology and general nature and occurrence of ground water to identify environmental conditions. Sources reviewed may have included, but were not limited to topographic maps, ground-water resource maps, bedrock geology maps, surficial geology maps, soil maps and water well logs.

### Site Reconnaissance/Interviews

The site reconnaissance included the following:

- A walkover of the study area was performed on November 15, 2011 and June 12, 2013 by AEH to note the current condition/operations of the site and contiguous properties. Photographs were taken to document observations made during this reconnaissance.
- The presence of potential environmental liabilities including, but not limited to hazardous building materials, waste storage areas, underground and aboveground storage tanks, industrial facilities, land disposal units, septic systems, dry wells, etc. was documented.
- Any evidence and/or presence of stressed vegetation, petroleum stained soil areas, newly landscaped or paved areas, apparent fill areas, etc. was documented, if present.

### **2.3 Reporting**

This report was prepared for Trafton Realty, LLC as a portion of the supporting documentation for the project. The report contains the following:

- A narrative describing the procedures followed by AEH in the Phase I ESA efforts;
- A narrative describing information obtained from the file reviews of existing historical, regulatory, and physical setting data and through personal observations;
- Any conclusions regarding recognizable environmental concerns on or near the site that may have impacted the property; and
- Recommendations for expanded investigative procedures needed to more completely assess the site, if required, and cost estimates to properly dispose of identified wastes.

### **2.4 Significant Assumptions**

No significant assumptions were made for the purposes of this report.

### **2.5 Location**

The property is located off Trafton Road, Waterville, Kennebec County, Maine (Figure 1). It is mainly comprised of three (3) parcels on either side of I-95. The western parcel is designated as Lot 10 on Tax Map 5 while the Eastern parcels are Lot 10 and Lot 20 on Map 6.

### **2.6 Special Terms and Conditions**

This report has been prepared for the exclusive use of Trafton Realty, LLC. This assessment was based upon a review of readily available public and private information (made available to AEH) pertaining to historical usage and subsurface conditions. In addition, the Phase I ESA effort was supplemented by visual observations of present structures (interiors and exteriors) and ground surface conditions.

### **2.7 User Reliance**

Information provided by others to AEH for this report was not independently verified. Unless there was actual knowledge of incorrect information or it was obvious that certain information was incorrect based on other information obtained in the Phase I Environmental Site Assessment or otherwise actually known to AEH, the information presented is presumed accurate.

### 3.0 SITE DESCRIPTION

#### 3.1 Site Ownership

Currently no business operations are conducted on the subject parcels with the exception of limited agricultural uses. In a chain of related party transactions this property, currently owned by Trafton Realty, LLC, 272 Valley Road, Middletown, RI 02842-5238 was granted on March 18, 2011 as recorded in the Kennebec County Registry of Deeds (KCRD) in Book 10707, Page 37 which in turn was granted from American Capital Corporation seventeen days earlier on March 1, 2011 as recorded in the KCRD in Book 10707, Page 7 which earlier that day was granted by Trafton Properties, Inc. as recorded in KCRD in Book 10707, Page 1. Trafton Properties, Inc. purchased the property from Gladys C. Estabrook on behalf of the Estate of Eben Preston Estabrook on January 15, 1988 as recorded in the KCRD Book 3295, page 303 and in July 14, 1981 as recorded in KCRD Book 2402, Page 157. Eben Preston Estabrook and his wife Gladys purchased the property in the late 1940's from the Grant family.

#### 3.2 Site and Vicinity General Characteristics

West of the property along Trafton Road and north of the property across Trafton Road, the area topography is relatively flat with hayfields, undeveloped woodland or private single-family residential property<sup>3</sup> (Figure 2). South and east of the subject property, the area slopes moderately to the east. There are two commercially developed lots; a site contractor and a small now closed office building, located north of Trafton Road within ¼ mile of the subject property<sup>3</sup>. See Table 1 later in this report for more information on properties in the vicinity.

#### 3.3 Past and Current Use of the Property

A.E. Hodsdon Engineers researched past use of the property and it appears eastern parcel has been used for farming for at least 70-years<sup>4</sup>. Current, farming operations are not very intense since most of the property is either used for hay or is fallow and slowing turning to forest. There is no indication of previous land use other than farming based on site observations or mapping dating back to the 1890's.

#### 3.4 Description of Structures, Roads, Other Improvements on the Site

The study area on Trafton Road consists currently of low intensity farming of hay and the management of cow manure from nearby dairy operations. Near-future plans are to construct a new interchange on the site at approximately 0.4 miles north of mile 124 in Interstate 95 south of Trafton Road, north of the Sidney Town line west of Junction Road and east of the Central Maine Power electrical transmission lines that run north to south through the western parcel. Currently, there are no public water or sewer lines and there is an abandon private water supply well on-site and likely an abandon septic system. The road frontage does have overhead electric and communications lines.

---

<sup>3</sup> Site observations by AEH on November 16, 2011 and June 12, 2013.

<sup>4</sup> Kennebec County Registry of Deeds on-line Search May 28, 2013

### 3.5 Past and Current Use of Adjoining Properties

Based upon a review of land ownership records at the Kennebec County Registry of Deeds, local tax assessor information and field observations, the current directly abutting lots also include woodland and/or farmland. Across Trafton Road to the north are some single family homes and businesses. There is no history of industrial development on any of these properties.

Table 1 identifies the adjoining property owners, current land uses, and other property information provided in the Assessor's records. Since the subject property is comprised of a parcel east of I-95 and one parcel west of I-95, AEH used this as a reference to describe the surrounding properties. The 23-acre parcel to the east of I-95 the property is bordered by Trafton Road to the north, Junction Road to the east and similar farmlands to the south across the Sidney town line which is also owned by Trafton Properties, LLC. It does not have any direct abutters, however, a single family home with a contracting business is located directly across Trafton Road. There is property diagonally across Trafton Road east of Eight Rod Road and a property across Junction Road east of the subject property that are both owned by the owner of the subject property.

The portion of the property west of I-95 is much larger and includes a power line easement through it that would likely be the western edge of the proposed interchange. Like the eastern parcel the western parcel is similarly zoned commercial. The western parcel south of Trafton Road extends southward to the Sidney Town line and westward abutting Lot 10 on Tax Map 9. The only direct abutter is 1/4 mile from the portion of the western parcel where the interchange is proposed to be east of the CMP easement. All other direct abutters to this parcel are more than 1/2 mile from the location of the proposed interchange. Directly across Trafton Road from the proposed interchange location is a single family dwelling, a small office building, a stable and grazing land, and a narrow strip of vacant land along the western edge of I-95 owned by the landowner on the opposite side of I-95. Refer to Appendix C for locations of the lots in relation to the subject property.

| 6-80      | Across Junction/Eight Rod Rd intersection from East parcel | Undeveloped 38.4 acre lot owned by Trafton Realty LLC zoned "Commercial-D" purchased in 1988 & 2011.                            |
| 2-1       | West of I-95 south of Waterville Map5-Lot 10               | Undeveloped 265.2-acre lot owned by Trafton Properties purchased on April 12, 2011 as recorded in the KCRD Book 10707, Page 37. |
| 2-3       | East of I-95 south of Waterville Map6-Lot 20               | Undeveloped 44.93-acre lot owned by Trafton Properties purchased on April 12, 2011 as recorded in the KCRD Book 10707, Page 37. |
| 2-5       | East of Junction Rd. South of Waterville Map 6 Lot 10      | Undeveloped 21-acre lot owned by Trafton Properties purchased on April 12, 2011 as recorded in the KCRD Book 10707, Page 37.    |

Considering past and current land use, spill histories and local topography and likely groundwater flow directions, no environmental impact on the subject property is likely to be observed due to the flow of surface water, groundwater or other conditions from the abutters.

### 3.6 Water Supply Wells on Adjoining Properties

There are potentially 4 private water supply wells and zero public water supplies in use within 1,000-feet of the subject property<sup>3</sup>. Three of these wells are within 300 feet and one is at approximately 550 feet from any portion of the subject property proposed for the new interchange. All of these private wells are upgradient of the facilities, which are located across Trafton Road north of the subject property. The Kennebec Water District's distribution system that serves Mid-State Machine Company approximately 5000 feet east of the site at the intersection of Trafton Road and Route 104 does not extend down Trafton Road<sup>3</sup>.

## 4.0 USER PROVIDED INFORMATION

### 4.1 Title Records

The owner provided historic land ownership information to AEH as described in section 3.1 above. AEH independently confirmed references to deed book and page numbers on-line through the following sources:

- City of Waterville Assessor's Database <http://data.visionappraisal.com/WatervilleME/default.asp>
- Town of Sidney Website [http://www.sidneymaine.org/files/2012 RE Commitment Map.Lot Order.pdf](http://www.sidneymaine.org/files/2012%20RE%20Commitment%20Map.Lot%20Order.pdf)
- Town of Oakland website <http://www.oaklandmaine.us>
- Kennebec County Registry of Deeds <https://gov.propertyinfo.com/me-kennebec/>

#### **4.2 Environmental Liens or Activity and Use Limitations**

No evidence of environmental liens was discovered while examining the records of the Kennebec Country Registry of Deeds.

#### **4.3 Specialized Knowledge**

The Trafton Realty, LLC provided general knowledge of the property, past uses, known conditions or encumbrances. Specialized knowledge such as operating record of past uses were generally not available.

#### **4.4 Valuation Reduction for Environmental Issues**

AEH was not informed by the Trafton Realty, LLC, Waterville tax assessor's office, or the Maine Department of Environmental Protection of any reduction in value of the property due to environmental issues, and did not find indications that any may exist.

#### **4.5 Owner, Property Manager, and Occupant Information**

The property has essentially been unoccupied since the 1990's and used in a very limited capacity for farming operations.

#### **4.6 Reason for Performing the Phase I ESA**

AEH performed a Phase I ESA for Trafton Realty, LLC in order to identify recognizable environmental conditions associated with this property and determine if further study (Phase II ESA) is warranted. The Phase I ESA is a portion of the documentation required under the federal National Environmental Policy Act (NEPA) if the property were to be used for an I-95 interchange.

### **5.0 RESULTS**

#### **5.1 Standard Environmental Records**

AEH reviewed the following federal and state, publicly available lists and files for nearby sites or properties engaged in hazardous material generation, handling and transportation or under state or federal investigation for past practices of mishandling hazardous materials. Those sites or properties could affect conditions on the subject property.

- A review of the USEPA Region 1 National Priorities List Publication Assistance Database indicated no sites within one (1) mile of the property. In fact, the closest such site is more than 40 miles away at the former Brunswick, Naval Air Station.
- A review of the USEPA CERCLIS database identified no facilities located within 0.5 miles of the property boundary. The closest is located east of the intersection of West River Road and Trafton Road almost 1 mile east of the proposed interchange.

- A review of the USEPA RCRIS database identified no RCRA generators on or adjoining the Property, nor any RCRA Treatment, Storage or Disposal (TSD) facilities located within 0.5 miles of the property boundary.
- A review of the Federal Emergency Response Notification System (ERNS) list identified no listings for this property. Thirty (30) reported incidents in the City of Waterville since 1982. None of these recorded incidents were within 3 miles of the property.
- The Maine DEP list of state uncontrolled hazardous substance sites identified no sites located within a 1.0-mile radius of the property.
- A review of the MDEP Active Landfills in Maine database identified no sites located within 0.5 miles of the property. The closest landfill is over 14 miles from the property boundary. The closest inactive landfill is 3/4 miles north of the property.
- A review of the MDEP Licensed Commercial Solid Waste Facilities Serving Maine identified no sites located within 0.5 miles of the property boundary. The closest is located near the airport over two (2) miles away.
- The MDEP Master Underground Tanks List for all registered tanks was reviewed for this assessment. The subject property has no underground storage tank and no USTs at abutting properties were identified<sup>7</sup>. The closest UST is over 1.5 miles to the east.
- The MDEP Spill Reports were reviewed for the City of Waterville. There are no reported spills at the property. There is one (1) reported spill on an abutting property which occurred in December 1989. The next closest recorded spill was over 1 mile away and occurred in November 2008. Table 2 summarizes the spill reported in 1990 that occurred on the property north of Trafton Road east of I-95.

**Table 2 – Spill Summaries**

| Spill No. | Date                                                  | Spill Location and Brief Description of Events                                                                                                                                                                                                                                                                                          |
|-----------|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A-50-1990 | Spill Date<br>12/16/1989<br><br>Reported<br>2/13/1990 | Unreported Tractor Trailer Spill. According to the report, Narche Depoisson Landry of Grande-Anse, NB spilled an estimated 30 gallons of diesel into a drainage ditch which empties into the abutting Pelotte fish farm pond and was killing fish. Booms and pads were used throughout the spring and Mr. Pelotte excavated pond banks. |

The reported spill near the property does not pose a recognized environmental condition since it could not physically flow onto the subject property due to topography, local drainage, insufficient volume and the reported successful clean up at the spill location.

## 5.2 Additional Environmental Records

The property was also checked against various environmental databases maintained by the Maine Dept. of Environmental Protection at <http://www.maine.gov/dep/gis/datamaps/index.html> as of June 11, 2013. Examples of some of these additional criteria were:

- NRPA Bird Habitats

- NRPA Vernal Pools
- Shoreland Zoning Inland Wading Waterfowl

### **5.3 Physical Setting**

The topography of the property is gradually sloped to the southeast. Surface water flows eastwardly flowing into unnamed tributaries of the Kennebec River (Figure 2) on and near the site. The site is not located over a mapped significant sand and gravel aquifer<sup>5</sup>. The surficial geology of the area is mapped as thin (<10 ft.) of silts and clays with underlying till<sup>6</sup> over a Silurian-aged pluton<sup>7</sup>. The site does include mapped freshwater wetlands<sup>8</sup>.

### **5.4 Historical Use Information on the Property**

AEH researched historical records of ownership for the property back at least 70 years as recorded in the Kennebec County Registry of Deeds on June 12, 2013. This research of land ownership data does not constitute a legal real estate title search. Based upon the chain of title it is likely that previous owners did not handle significant volumes of petroleum products, degreasing solvents, or hazardous materials on the property. No residuals typically used on a farm such as heating oil, diesel fuel, used crankcase oil, etc. were found but potentially could be encountered albeit likely in relatively small volumes.

### **5.5 Historical Use Information on the Adjoining Properties**

The historical use of the adjoining properties was researched by observations in the field and review of historic aerial photographs (Appendix B)<sup>9</sup>. The aerial photographs show the surrounding area was developed as woodland, farmland and private single-family residence land use.

## **6.0 SITE RECONNAISSANCE**

### **6.1 Methodology and Limiting Conditions**

On November 15, 2011 and June 12, 2013, AEH conducted a site reconnaissance of the property. The land was clear of snow, ice, or other limitations to inspection of the grounds.

### **6.2 General Property Setting**

The study area is currently about 90% undeveloped open field and all of the buildings associated with the farm are gone with only remnants remaining. The study area is bisected by Interstate 95 and the western parcel is further bisected by a Central Maine Power Company Transmission Line. West of the power line are open fields transitioning to forest.

<sup>9</sup> Google Earth aerial photograph for 316 Trafton Road, Waterville, Maine, November 15, 2012.

### **6.3 Exterior Observations**

The exterior of the property was examined on November 15, 2012 and June 12, 2013. Photographs of the exterior of the property are shown in Appendix A. AEH did not observe any stressed vegetation or stained soils.

### **6.4 Interior Observations**

Not applicable. No interior spaces. There are no buildings currently on site.

## **7.0 INTERVIEWS**

### **7.1 Interview with Owners**

AEH met personally with Harry Kojoian of Trafton Realty, LLC and obtained general information on the property's history. AEH did not interview abutting land owners or other landowners in the vicinity. The AEH visits to the site were unescorted.

### **7.2 Interview with Property / Business Manager**

Harry Kojoian is also the property manager.

### **7.3 Interview with Occupants**

Not applicable. The property is unoccupied.

### **7.4 Interview with Local Government Officials**

AEH did not interview local government staff about the property.

### **7.5 Interviews with Others**

AEH did not interview other persons about this property.

## **8.0 CONCLUSIONS**

AEH has performed a Phase I Environmental Site Assessment (ESA) on property identified as 316 Trafton Road, Tax Map 5, Lot 10 and Map 6, Lots 10 & 20 in Waterville, Maine. The following is a summary of known or suspect environmental conditions associated with the property.

1. The agricultural use of the property over at least the last 70 years and no indication of any industrial use on this property or neighboring properties, combined with the lack of observed signs of contamination during field work (e.g., lack of chemical smells, waste piles or signs of dumping, or vegetation damage such as chlorotic vegetation), strongly suggest that it is unlikely that any hazardous materials will be encountered during any construction activities.

2. The area where the new interchange is proposed does contain wetlands in addition to those currently mapped in the National Wetland Inventory (NWI) Maps. These wetland areas would be impacted during construction and later during use. A wetland delineation and study is being performed concurrent to this study to minimize and mitigate these potential impacts. These wetlands do not appear to be "wetlands of special significance."
3. It is unlikely that the area proposed for the interchange has vernal pools since they are located in forested areas and the area of the proposed interchange has few trees. However, when the wetlands survey is conducted, any wooded areas within 250 feet from the edge of the proposed project should be checked for potential vernal pools. If areas are identified that may be potential vernal pools, then these areas would have to be studied during April and May for the presence of egg masses for frogs, toads, or salamanders, Daphnia, or fairy shrimp.
4. The 1989 spill of 30 gallons of diesel fuel was cleaned up at that time and no longer represents a concern with respect to contamination.

## 9.0 OPINION

AEH does not believe the site poses conditions that fall under the jurisdiction of the Maine Uncontrolled Hazardous Substance Site Law, 38 MRSA, Section 1361 et seq. or the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 USCA Section 9601 et seq. as amended.

AEH does not believe the site falls under the jurisdiction of the Maine Oil Discharge Prevention and Pollution Control program, 38 MRSA Section 541 et seq. or the Maine Underground Oil Storage Facilities and Groundwater Protection program, 38 MRSA Section 561, et seq.

Currently, AEH rates the site as **posing a low environmental liability risk** based upon the current and historic uses of the site.

## 10.0 RECOMMENDATIONS

Based on the historic literature and information collected, and observations made during the Phase I ESA field efforts AEH recommends:

1. Based on our finding, a Phase II ESA does not appear necessary and plans can proceed with the next stage of development of the interchange project.
2. The remnants of the old dairy farm in the vicinity of the proposed interchange have been removed and do not need to be shown on the construction plans.

## 11.0 LIMITATIONS

1. AEH's conclusions regarding environmental liabilities at the property are based on observations of existing site conditions, interpretation of site history, site use from documentation publicly available or made available to AEH by others.
2. Every effort has been made to compile as complete a report as possible, however, this assessment cannot, on its own, represent a complete characterization of all potential environmental liabilities associated with the subject property.

3. The conclusions provided by AEH are based solely on the scope of work as prescribed in ASTM E 1527-05, the sources of information referenced in this report, and the site conditions observed at the time of AEH field work, and may not fully represent past or future conditions.
4. The accuracy and completeness of the information made available at the sources reviewed and referenced as part of this scope of work (i.e., State and Municipal files about the subject site) were corroborated but not verified by AEH.
5. The subsurface environmental conditions at the site may vary significantly from the referenced material reviewed by AEH. Therefore, the conclusions and recommendations may require modification should additional information be made available or a subsurface investigation be undertaken at the site.
6. The scope of services performed was in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as established by the American Society of Testing and Materials (ASTM) in designation E 1527-05. Additional services could be performed outside this scope at additional expense that might further define the site's environmental quality.
7. The work conducted by AEH has been performed according to generally accepted industry practices in use at the time the investigation was conducted. No other warranty is expressed or implied. The contents of this report may not be copied, provided, or otherwise communicated to parties not involved with the subject property without prior written consent from an authorized agent of Trafton Realty, LLC.
8. Interpretations of these data (whether chemical, geological, biological or engineering related) represent one possible interpretation - other interpretations are possible.

## 12.0 DEVIATIONS

This reporting effort contains one (1) deviation from the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as established by the American Society of Testing and Materials (ASTM) in designation E 1527-05.

- A section on the limitations of this report was added.

## 13.0 ADDITIONAL SERVICES

No additional services beyond the scope of the ASTM practice for a Phase I ESA was contracted between the Trafton Realty, LLC and AEH or provided by AEH.

#### 14.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I attest that a Phase I Environmental Site Assessment was conducted for a site located off of Trafton Road in Waterville, Maine. The undeveloped property is currently owned by Trafton Realty, LLC. The Phase I ESA was performed in accordance with standard practices for Environmental Site Assessments as established by the American Society of Testing and Materials (ASTM), excepting any deviations from the practice as listed in Section 12.0.

|-----------------------------------------------------|------------------------------------------------------------|

#### 15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

James C. Manzer, a Licensed Professional Engineer in the State of Maine since 1999, was responsible for conducting this Phase I Environmental Site Assessment and the preparation of this report. Mr. Manzer has been working in the environmental field for over twenty years and has performed many Phase I Environmental Site Assessments in his career.

Albert E. Hodsdon, III, a Licensed Professional Engineer in the State of Maine since 1973, has owned and operated a consulting engineering firm in Waterville since 1976. Mr. Hodsdon was responsible for reviewing the report.

Donald H.W. Robbins, a Certified Geologist in the State of Maine (#344) conducted a Preliminary Environmental Review and prepared a report in December of 2011. Some of Mr. Robbins observations and findings have been incorporated into this report.

#### 16.0 SPECIAL CONTRACTUAL CONDITIONS

No special contractual conditions exist between the Trafton Realty, LLC and AEH.

## **APPENDIX A**

Photographs of the Property Taken On  
November 16, 2011  
and  
June 12, 2013

---

1. West side of I-95. View of the Fire Pond opposite the proposed south bound ramps.

2. West side of I-95. Wet area directly under proposed south bound ramps at Trafton Road.

3. West side of I-95. South end of the manure pit under the proposed south bound on-ramp.

4. West-side of I-95. North end of the manure pit under the proposed south bound off-ramp.

5. East side of I-95. Stream and wetland area at Junction Road looking northwest to proposed north bound on and off ramps.

6. East side of I-95. Stream as it enter the eastside of the wooded area.

7. East side of I-95. Stream in middle of wooded area, note rocks and boulder streambed. Also note possible man-made land from I-95 construction spoils to right of stream in the photo.

8. East side of I-95. Possible man-made land from I-95 construction spoils pile, note mature tree trunk leanings and unusual grade of embankment.

9. East side of I-95. Stream at the west end of the wooded section under the proposed north bound on-ramp.

10. East side of I-95. Steam crosses under I-95 through this culvert, which is located directly under the proposed northbound on-ramp.

11. East side of I-95. From Trafton Road overpass looking at wetland and start of drainage across field (center to left) toward Junction Road, which is located far to the left.

12. East side of I-95. View from Trafton Road looking southeast towards Junction Road.

13. East side of I-95. View Trafton Road looking southwest towards I-95.

14. East side of I-95. View from Junction Road looking west. Old billboard frame in background

15. East side of I-95. View from Trafton Road Overpass looking South.

16. East side of I-95. Frontage along Trafton Road looking east from Overpass.

17. West side of I-95. Silo foundation from farmstead.

18. West side of I-95. Driveway to site of former farmstead looking south.

19. West side of I-95. Farm road south of farmstead to manure pit with CMP line in background.

20. West side of I-95. View from Trafton Road Overpass above southbound lane looking south.

**Downloading Data:** When downloadable data is available for GIS Users there are two options:

Option 1: Use the raw data file alternate links above to download a shapefile or text file.

Option 2: Click on the project or layer links in the Google Earth table of contents (Places window). In the balloon, there will be a link to a text file with attribute data and spatial coordinates that can be imported into most GIS systems.

**Feedback:** If you would like to comment on the use of Google Earth, provide suggestions for improving the functionality or report problems please go to our [Feedback Form](#).

**Disclaimers:**

- The Maine DEP is only providing the data to be used in the Google Earth application on the user's computer. We are not responsible for installing or maintaining this software product.
- The Google Earth imagery dates provided do not necessarily represent the date the image was captured but show the date the imagery was processed and deployed.
- For questions regarding data content or data accuracy please contact the staff in the responsible programs. The staff contacts can be reached through the links in the Google Earth files.
- This data is for visual representation only and may not contain all data that is available by contacting the DEP directly.
- The individual DEP Google Earth Map projects contain a number of statewide data layers. These layers can be obtained from the [Maine Office of GIS Data Catalog](#).
- If you need to make detailed decisions using geospatial data please obtain original copies of the data.

**Other Interactive Maps and Data**

- Maine Department of Conservation Boat Launches  
- Maine Department of Conservation Navigational Aids 
- Maine Bureau of Parks and Lands Conservation Lands  
- Maine Department of Marine Resources Bacteria Closure Areas 
- Maine Department of Transportation Survey Control Points 
- Maine Geological Survey - Maine Mineral Resources

**GIS Data Distribution**

MEDEP staff generate and utilize a large amount of GIS data. Non-MEDEP GIS data are typically distributed by the [Maine Office of GIS](#).

MEDEP GIS Data is now being distributed using [Google Earth](#) (above). If you can't find the data you are interested in contact [John Lynam](#).

**GIS Data Collection**

The MEDEP GIS Unit coordinates the collection and submittal of GIS data from MEDEP program staff and environmental consultants. This data supports the geographic evaluation of sites and study areas in conjunction with environmental sampling data. A set of [Spatial Data Collection Guidelines](#) is now available to assist with submittal of data to the MEDEP Spatial Database.
