

Traffic Alert

Ellsworth Route 1A

Beginning in June, a 1.2 mile stretch of Route 1A in Ellsworth will be reconstructed. The \$7.6 million project will continue through June, 2017. Crews will be working Sunday nights through Thursday nights each week. Two-way traffic will be maintained weekdays between 6 am and 7pm.

From June 15 to September 15, work will be suspended every weekend between 7pm on Friday through 7pm on Sunday.

The road reconstruction includes the creation of two four-way intersections as well as a center turn lane through the length of the project. In addition to the road reconstruction, Emera Maine will be installing utility poles and the city will be upgrading its water and sewer utilities.

Ellsworth-based R.F. Jordan and Sons Construction is the contractor for the project.

MaineDOT regrets this inconvenience and encourages motorists to drive safely. Thank you.

Construction is weather-dependent, so schedules are subject to change.
