

MAINE COLLISIONS

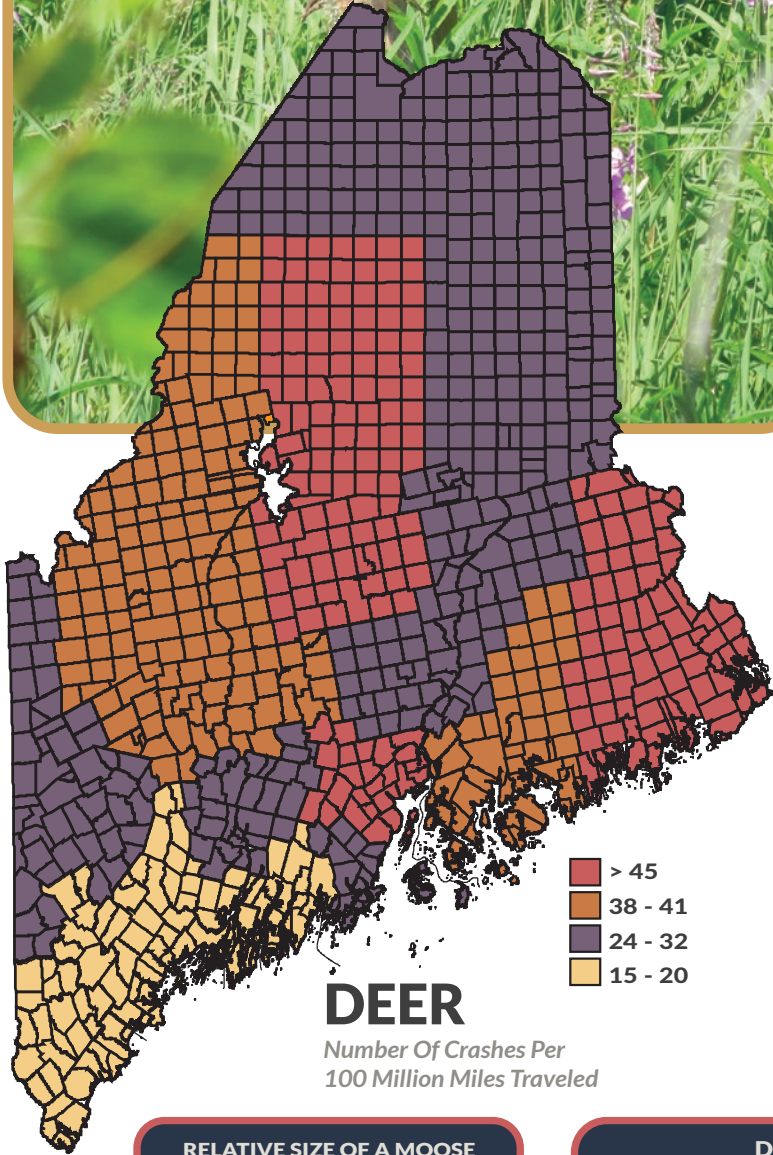

Between Vehicles and Large Animals

In Maine, wildlife crashes happen anywhere, anytime. **Be Alert!**

- From dusk till dawn – deer often travel at night when they are most difficult to see in the road.
- In November – collisions with deer peak during breeding season.
- Whenever you see a deer – you can bet there are more nearby since they travel in herds.

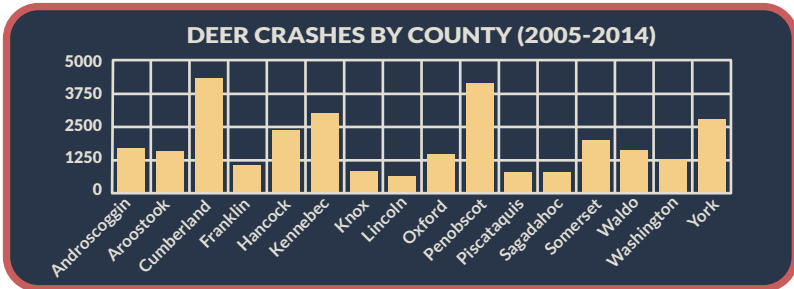

If a crash is unavoidable...

- Apply the brakes.
- Let up on the brake just before impact.
- Aim to hit the tail of the animal.
- Duck down to minimize your injuries.

Warning Signs Mean Business!

Warning signs are only posted where there are high concentrations of wildlife and collisions are a problem.

Our thanks to the Maine Department of Inland Fisheries and Wildlife for providing its expertise for this publication.
