Subject: Maine 2017 - 2020 Statewide Transportation Improvement Program (STIP)

Dear Commissioner Bernhardt:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of the final 2017-2020 STIP transmitted on April 3, 2017. We have also reviewed the Metropolitan Planning Organizations' (MPO) Transportation Improvement Programs (TIPs). Based upon information provided by your staff and the MPOs, we concur that the STIP/TIPs are fiscally constrained and consistent with their respective Long Range Plans. Additionally, transportation conformity is no longer required for any part of Maine.

Therefore, in accordance with 23 CFR 450.220, and based upon the MaineDOT and MPO self-certifications of their statewide and metropolitan transportation planning processes and federal agency routine involvement in the transportation planning processes, FHWA and FTA hereby make the following determinations:

1. The projects in the 2017 – 2020 STIP are based on a transportation planning process that substantially meets the requirements of Title 23, U.S.C. 134 and 135, 49 U.S.C. Section 5303 – 5305 and 23 CFR Part 450 Subparts A, B, and C.

2. We find that each regional TIP is based on a continuing, comprehensive, cooperative transportation planning process carried on cooperatively by the State, the MPOs, and the transit operators in accordance with the provisions of 23 U.S.C. 134 and 135, and 49 U.S.C. Section 5303 – 5305.

In support of our determination, enclosed is a joint FHWA/FTA planning finding on the transportation planning process in accordance with both TIP (23 CFR 450.330(a)) and STIP (23 CFR 450.220(b)) requirements. The Statewide and MPO planning finding is based on a continuing, comprehensive, cooperative transportation planning process and the self-certification statements submitted by MaineDOT and the MPOs under 23 CFR 450.336. It is also based upon documentation of routine FHWA/FTA involvement in the statewide and metropolitan planning processes, public involvement, and fiscal constraint determination.

Accordingly, the FHWA and FTA have jointly determined the Maine 2017-2020 STIP satisfies the requirements for the obligation of FHWA Federal-aid highway funds and FTA Federal transit grants for the period April 4, 2017 to December 31, 2020 and is hereby approved, effective April 4, 2017. Approval of the STIP does not constitute project or grant approval. Both agencies may need additional information on some of the projects in the approved STIP when a project agreement or grant submission approval is requested.

If you have any questions regarding this approval and determination, please contact Carlos Pena, FHWA, at (207) 512-4914, or Leah Sirmin, FTA, at (617) 494-2459.

Glossary

Preface: What is the STIP?

The *Statewide Transportation Improvement Plan (STIP*) is a four year, federally required, transportation capital improvement program. The STIP must be approved by federal agencies in order for Maine to receive FHWA and FTA funding. Federal regulations related to the *STIP* apply equally to all 50 states and do not take into account individual states' sizes, legislative processes or budget cycles. Those regulations require each state to produce a *STIP* that identifies federal funding by year for scheduled transportation projects that may be receiving Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) funding. MaineDOT produces a *STIP* to meet the following principal requirements:

- The State of Maine must show fiscal constraint by not scheduling more transportation projects for construction, per year, than it can reasonably expect to receive in funding.
- To certify that the State's transportation program conforms to Federal air quality regulations.
- To provide all interested parties a reasonable opportunity to comment on the proposed *STIP*.
- To provide FHWA with a list of fully obligated projects with unexpended funding to allow for NEPA to be completed.

The *STIP* is a fiscally constrained document that is formally submitted to the federal agencies for review and approval, and includes capital projects identified in MaineDOT's State-initiated Calendar Year *Work Plan (WP).* The *WP* lists projects to be worked on over the next three calendar years, beginning with the present year. The majority of the capital projects listed in the *WP* are eligible for FHWA and FTA funding.

A. Introduction

The Maine Department of Transportation (MaineDOT) Bureau of Planning coordinated the development and preparation of this document with support from other bureaus and offices throughout MaineDOT. The Maine *Statewide Transportation Improvement Program* (*STIP*) is prepared annually, complying with Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) requirements. This document encompasses a four year timeframe spanning the years 2017, 2018, 2019 and 2020.

The *STIP* is a multimodal document that includes investments in various modes of transportation infrastructure, including but not limited to pedestrian, bicycles, highways and transit services. The *STIP* is the means for implementing the investment goals and objectives, as well as the recently identified performance measures and targets, outlined in the department's *Long Range Transportation Plan* by balancing transportation needs with available funding. MaineDOT develops the *STIP* in cooperation with the four Maine Metropolitan Planning Organizations, Maine municipalities and in consultation with Regional Planning Councils. To comply with the latest requirements, the STIP now contains the four Metropolitan Planning Organization (MPO) TIPs. Additionally, this *STIP* has been developed based on the Clean Air Act and subsequent amendments and all regulations issued pursuant thereto, and the terms and provisions in the *Fixing America's Surface Transportation Act, or FAST Act*. In the event that a future funding act is significantly different than the *FAST Act*, or significant changes are made to the *FAST Act*, MaineDOT may need to revise the *STIP* accordingly.

All projects listed in the *STIP* have been ranked, prioritized and selected based upon the recently established performance measures required by FHWA in the FAST Act, in addition to MaineDOT's own Highway Corridor Priorities (HCPs) and Customer Service Levels (CSLs).

MaineDOT and FHWA must work together to ensure that the National Environmental Policy Act (NEPA) Process is complete before a project is constructed or implemented. Importantly, before FHWA can provide the final NEPA decision (i.e., ROD, FONSI, or CE) the proposed project ("Project") as defined in the NEPA documentation must meet the following specified criteria:

Before a Final Environmental Decision (ROD, FONSI, CE) is Approved In:	Fiscal Constraint must be demonstrated by:
Metropolitan Areas	• At least one subsequent phase of the Project is in the TIP (more if within TIP timeframe) • Full funding is reasonably available for the completion of the entire project.
Non-Metropolitan Areas (Outside MPO)	• At least one subsequent phase of the Project is in the STIP (more if within STIP timeframe) • Full funding is reasonably available for the completion of the entire project.

B. *STIP* Public Involvement Plan

The *STIP* document is published as a stand-alone federal document and contains projects that are FHWA funded, FTA funded, or completely State funded that are eligible to receive federal funding. Most projects listed in the *STIP* have been through or are involved in a public involvement process specific to the individual project, and are closely linked to the preparation of MaineDOT's State-initiated Calendar Year *Work Plan*. Additionally, a systematic documented approach to soliciting public input/comments is ongoing for not only projects but the process itself. For more information on MaineDOT's public involvement process, please use the following link: http://www.maine.gov/mdot/planning/docs/MaineDOTPublicInvolvement1015.pdf . In support of MaineDOT's biennial budget request, prior to preparing a *STIP*, MaineDOT submits the *Work Plan* to the Maine State Legislature. Most projects that are included in the *STIP* have been represented in a MaineDOT *Work Plan* and/or have received federal approval through inclusion in a prior *STIP* or as an amendment to a prior *STIP*.

In an effort to obtain public input on the document, the *STIP* will be placed on the MaineDOT website for 30 days. During that time, the public will have the ability to submit comments on the document through various means so consideration can be given to any comments received. Opportunities for the public to comment will be done through:

- Phone
- E-Mail
- Website

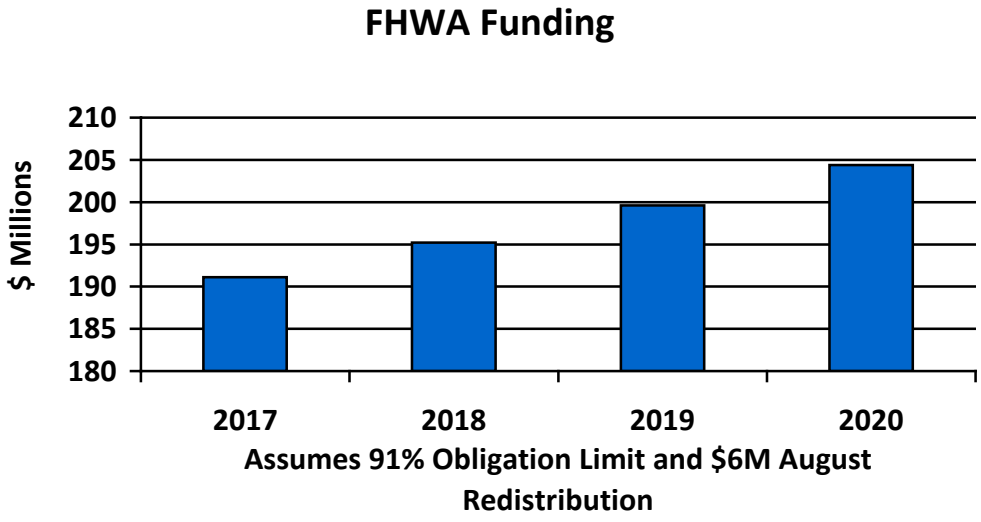
All comments will be posted to the MaineDOT website and a response to each comment will be provided by either the MaineDOT if the project is sponsored by the department, the appropriate MPO if sponsored by them, or by Tribal organizations if sponsored by them. After the 30 day public review and comment period, and after all comments have been addressed, the document will be approved by FHWA and FTA and become the *STIP* of record.

C. *STIP* Finances

There are three main sources of funds for transportation programming, which are discussed in more detail in *MaineDOT's 2017-2018-2019 Work Plan* available at www.maine.gov/mdot. The three sources of funding are:

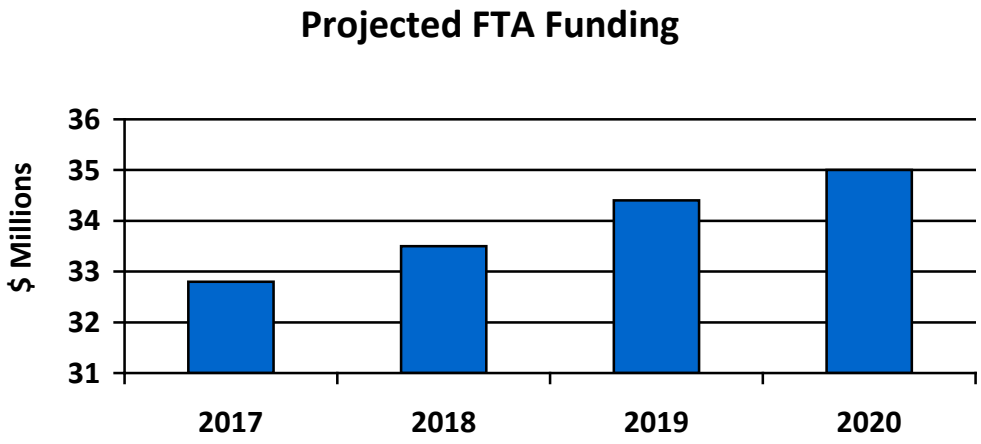
- Federal transportation funding
- State transportation funding
- Limited local or private funding

Section II – Statewide Non-MPO Federal Highway Administration in the attached *STIP* document provides the estimated utilization of federal funding, by fund source, for each one of the four years of the *STIP/TIP*. MaineDOT does not adjust for inflation, instead adjusts all project costs on an annual basis. The chart below shows an estimated obligation limit and annual August redistribution for Maine for each year of the *STIP*. Maine currently has a total of $163.2 million in Federal Fiscal Year 2017's Obligation Authority; of which $33.4 million has been obligated, leaving a balance of $129.8 million in Obligation Authority for the year. Therefore; fiscal constraint is demonstrated in *Section II* of this document for the FHWA program. In order to meet the obligations, as proposed in *Section II*, MaineDOT will be requesting transfers between apportioned highway programs, authorized under statutes; 23 U.S.C. 104 (g), 126 (a) (b) and (c) and 144 (e).



If MaineDOT receives more resources than what is currently proposed in this *STIP*, MaineDOT will request *STIP* amendments to add new projects, or add new stages to current projects, in the *STIP* document. If MaineDOT receives fewer resources than proposed, MaineDOT will delay or cancel projects. State transportation funding is based upon approved non-federal capital transportation resources in *MaineDOT's 2017-2018-2019 Work Plan*. MaineDOT has sufficient funds to match all anticipated resources from FHWA.

Section II – Statewide Non-MPO Federal Transit Administration in the attached document provides the estimated utilization of federal funding, by funding source, for each one of the four years of the *STIP/TIP*. The figures are based on actual FTA resources received in recent years. The chart below shows the projected FTA funding over the next four years. MaineDOT's project selection is flat funded based on the previous year's funding, and therefore inflation value is not applied. *Section II* demonstrates fiscal constraint for the FTA program.



Toll Credits

Federal regulations (23 USC §120) allow a State to use toll credits toward the non-Federal match requirement of a project, provided that the project is listed in the *STIP*. These credits are based on toll revenues that are generated and used by public, quasi-public, and private agencies to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Such public, quasi- public, or private agencies shall have built, improved, or maintained such facilities without Federal funds.

To receive these toll credits, a State shall show that it has maintained its non-Federal transportation capital expenditures in accordance with FHWA's requirements. MaineDOT has shown that they have met these requirements to match federal funds. Consistent with existing practices, the *2017-2020 STIP* identifies the use of toll credits by project and accounts for the use as part of the financial constraint information.

D. Maintenance and Operations

FHWA regulations require the *STIP* to demonstrate that appropriate funds are available for adequately operating and maintaining the state transportation system, as a whole. Maine's Governor's budget includes $147.9 million in State Fiscal Year 2017 and value of $150.8 million in State Fiscal Year 2018, with a projected $153.8 million in State Fiscal Years 2019 and 2020 for operating and maintaining Maine's transportation system. The majority of funds used to pay operating and maintenance costs are State funds which are included in the State of Maine's current biennial transportation budget for State Fiscal Years 2016 and 2017. The State of Maine is currently working on the 2018 and 2019 biennial transportation budget.

The Bureau of Maintenance and Operations has 5 Regional offices that are responsible for all state transportation infrastructures including the highway and bridge system, and each region has adequate resources to accomplish this mission. The headquarters office, in Augusta, includes the Divisions of Fleet Services, Traffic Engineering, Highway Maintenance, Bridge Maintenance, Community Services and Multimodal Maintenance. Fleet Services manages and maintains all equipment owned by MaineDOT. Traffic Engineering establishes statewide traffic standards, reviews and establishes speed limits, maintains traffic signals, highway lighting, signing, striping and pavement markings. Bridge Maintenance provides technical oversight and statewide strategies for bridge operation and maintenance activities and also provides statewide structural engineering and bridge inspection, including state-owned rail bridges. Highway Maintenance develops statewide standards for highway operation and maintenance activities, utility permitting, asset management and work reporting standards, maintenance contracting and highway maintenance engineering. Multimodal Maintenance has responsibility for inspection and maintenance of state owned rail lines, inspection of all private rail lines, traveler facilities, facility management, and the operation of the Maine State Ferry System.

The Bureau of Maintenance and Operations has included all of its maintenance work items for Calendar Years 2017, 2018 and 2019 in MaineDOT's current *Work Plan*.

E. Air Quality Conformity Determination

The Clean Air Act requires U.S. Environmental Protection Agency (EPA) to set National Ambient Air Quality Standards (NAAQS) for pollutants considered harmful to public health and the environment. Areas that do not meet the NAAQS are designated as nonattainment areas and, as a result, are subject to transportation conformity. Maintenance areas are geographic regions that were previously designated as nonattainment, but are now consistently meeting the NAAQS. Transportation conformity requires MaineDOT and the MPOs demonstrate that all future transportation projects in nonattainment and maintenance areas will not hinder the area from reaching and maintaining its air quality goals.

On July 20, 2012 the entire State of Maine was designated as attainment for the 2008 8-hour ozone NAAQS, thus transportation conformity is not required for the 2008 NAAQS. Under the previous (1997) ozone NAAQS, Maine had two regions (Portland and Midcoast) designated as maintenance areas and subject to transportation conformity requirements under the Clean Air Act. On February 13, 2015 EPA published a final rule that revoked the 1997 ozone NAAQS for all purposes, including transportation conformity. Therefore, transportation conformity is no longer required for the Portland and Midcoast maintenance areas.

Maine previously had one small area (Figure 1) in Presque Isle designated as a maintenance area for particulate matter (PM_{10}). This area is located in downtown Presque Isle, within a one-half mile radius of the Northeastland Hotel. The 20 year maintenance period for the Presque Isle PM_{10} maintenance area expired on October 30, 2015. Therefore, transportation conformity is no longer required for the Presque Isle PM_{10} maintenance area.

Re: Transportation Conformity in the Presque Isle, Maine PM_{10} maintenance area

Dear Mr. Webster:

On August 30, 1995, EPA published a direct final rule approving a Maine State Implementation Plan (SIP) revision and request to redesignate the Presque Isle PM_{10} (particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers) area to attainment. This direct final rule became effective October 30, 1995, see 60 FR 45056.

Maine's redesignation request, approved in the August 30, 1995 direct final rule, also included a maintenance demonstration and contingency plans which outline Maine's control strategy for maintenance of the PM_{10} national ambient air quality standards (NAAQS). The maintenance plan provisions under Section 175A of the Clean Air Act (CAA) require that maintenance of the relevant NAAQS be provided for at least 10 years after redesignation, followed by an additional 10 year maintenance period.

The 20 year maintenance period for the Presque Isle PM_{10} maintenance area expired on October 30, 2015. Therefore, Maine is no longer required to demonstrate transportation conformity for the Presque Isle PM_{10} maintenance area. However, the rest of the maintenance plan requirements continue to apply, in accordance with the SIP.

For further information, please see the enclosed guidance document that EPA has developed "Transportation Conformity Guidance for Areas Reaching the End of the Maintenance Period" (EPA-420-B-14-093, October 2014).

If you have any questions regarding this issue, please feel free to contact Ariel Garcia of my staff at (617) 918-1660.

Anne Arnold
