# HIPAA

- HIPAA (The Health Insurance Portability and Accountability Act )
- Objectives
  - Protect privacy and security of patients' medical information
  - Allow efficient flow of health information to provide high quality health care
  - Utilize a standard format when submitting electronic transactions
- Individually Identifiable Health Information includes:
  - Past, present or future physical or mental health or condition
  - Provision of health care
  - Past, present, or future payment

# HIPAA and Unclaimed Property

- HIPAA do not supersede the unclaimed property laws since Unclaimed property laws meet HIPAA's definition of "required by law"
- States want the appropriate data to unite property to it's rightful owner
- Data to be reported to assist with that process includes:
  - Owner or Payee Details
  - Amount
  - Date of issuance
  - Payment/Property Type
- Data reported does NOT include any sensitive information regarding an individual's condition and/or treatment
