B. Use of Estimates in the Preparation of the Financial Statements

Preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Accounting Policies

Health premiums are earned over the term of the related insurance policies. Premiums written are reported net of experience rating refunds. Premiums paid prior to the effective date are recorded on the balance sheet as premiums received in advance and are subsequently credited to income as earned during the coverage period. Premium rates are subject to approval by the Centers for Medicare and Medicaid Services. Expenses are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments include investments with maturities of less than one year and more than three months at the date of acquisition and are reported at amortized cost, which approximates fair value. Non-investment grade short-term investments are stated at the lower of amortized cost or fair value.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost, with amortization calculated based on the modified scientific method, using lower of yield to call or yield to maturity. Non-investment grade bonds are stated at the lower of amortized cost or fair value as determined by various third-party pricing sources.
- (3) The Company has no investments in common stocks of unaffiliated companies.
- (4) The Company has no investments in preferred stocks.

- (11) The Company does not anticipate investment income as a factor in premium deficiency calculations.
- (12) Unpaid claims and claims adjustment expenses include management's best estimate of amounts based on historical claim development patterns and certain individual case estimates. The established liability considers health benefit provisions, business practices, economic conditions and other factors that may materially affect the cost, frequency and severity of claims. Liabilities for unpaid claims and claim adjustment expenses are based on assumptions and estimates, and while management believes such estimates are reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and changes in estimates are incorporated into current period estimates.
- (13) The Company has not modified its capitalization policy from the prior period.

The Company is, in the ordinary course of business, subject to the claims of our enrollees arising out of decisions to restrict or deny reimbursement for uncovered services. The loss of even one such claim, if it results in a significant punitive damage award, could have a material adverse effect on the Company. In addition, the risk of potential liability under punitive damage theories may increase significantly the difficulty of obtaining reasonable reimbursement of coverage claims.

The Company is involved in pending and threatened litigation of the character incidental to the business transacted, arising out of its operations and is from time to time involved as a party in various governmental investigations, audits, reviews and administrative proceedings. These investigations, audits and reviews and administrative proceedings include routine and special investigations by state insurance departments, state attorneys

general, the U.S. Attorney General and subcommittees of the U.S. Congress. Such investigations, audits, reviews and administrative proceedings could result in the imposition of civil or criminal fines, penalties, other sanctions and additional rules, regulations or other restrictions on the Company's business operations. Any liability that may result from any one of these actions, or in the aggregate, could have a material adverse effect on the Company's financial position or results of operations.

- (4) Fair values of bonds are based on quoted market prices, where available. Level 2 securities primarily include United States government securities, corporate securities, securities from states, municipalities and political subdivisions, mortgage-backed securities and certain other asset-backed securities. For securities not actively traded, the pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. The Company has controls in place to review the pricing services' qualifications and procedures used to determine fair values. In addition, the Company periodically reviews the pricing services' pricing methodologies, data sources and pricing inputs to ensure the fair values obtained are reasonable.

Certain bonds, primarily corporate debt securities, are designated Level 3. For these securities, the valuation methodologies may incorporate broker quotes or discounted cash flow analyses using assumptions for inputs such as expected cash flows, benchmark yields, credit spreads, default rates and prepayment speeds that are not observable in the markets.

There have been no significant changes in the valuation techniques during the current period.
