

iMapinvasives Mobile App for Android or Apple

Report invasive species locations using your tablet or smartphone

1. Request a free iMapInvasives account at www.imapinvasives.org. You can't use the App w/o an account.
2. Then, download the app from Google Play or Apple App Store (search for "imapinvasives").
3. Enable location on your device (from device Settings, turn on Location)

4. Home Page and Menu

From the home page users can add a new observation record and access the Menu at top left (tap three bars). The home page looks very plain until you start adding records.

5. Fill in your Preferences (required)

Fill in your iMapInvasives account information and set other preferences.

- a) Select Jurisdiction
- b) Enter iMap email and Password (must match online account!)
- c) Select to view scientific or common species names and create a custom list (optional).
- d) Choose photo settings
- e) Select map preferences
- f) Select default project (optional)
- g) Select organization (optional)
- h) Save your changes!

6. Add an Observation Record

Tap the green +Add Observation button to start adding an observation. **See reverse for details!**

7. Upload or edit pending records

Created records appear in home screen. To change something, tap pencil icon. To upload, tap box or Select All from Menu, then choose Upload Selected.

Manually tap box or choose Select All from the Menu, then Upload Selected to send your data into iMap.

6. Create an Observation Record

This is the screen where you make new reports of invasive species and edit pending records.

The screenshot shows the iMapInvasives mobile app interface for creating an observation record. The screen is annotated with callout boxes:

- Take Photo**: Points to the "Take Photo Using Camera" and "Select Photo From Library" buttons.
- Select Species**: Points to the "Species:" dropdown menu.
- Select Detected or Not Detected**: Points to the "Species Detected" and "Species Not Detected" radio buttons.
- Select Date**: Points to the "Date:" field.
- Uncheck to manually enter location (only if adjustment needed)**: Points to the "GPS: Uncheck to manually move location" checkbox.
- Zoom In or Out**: Points to the map area.
- To manually edit location, uncheck the GPS box, then touch and hold the map push pin. Drag it to the correct location (only if adjustment needed)**: Points to the map push pin.
- Select your project and/or organization. If you don't see it listed contact invasives.mnap@maine.gov**: Points to the "iMap 3 Project" and "iMap 3 Organization" dropdown menus.
- If 0,0 is displaying in the Location box, make sure your GPS is enabled on your device (location turned on in settings)**: Points to the "Location (Longitude, Latitude)" field.
- Save new observation or edits**: Points to the "Save" and "Cancel" buttons.

Enable your custom species list (note, you customize this in Preferences, see step 5): Points to the "Species: Custom List" checkbox.

Location (Longitude, Latitude): -73.7489682, 42.6523979
