

## Common ALB Look-alikes

These insects are common in New York and are **NOT** the Asian longhorned beetle.

### White-spotted pine sawyer

- **Description.** ¾” – 1” long. Dull or bronzy-black, may be mottled with white patches. Long, faintly banded antennae. White scutellum, triangle patch at the top of the wing cases (indicated by arrow), same area is always black on ALB.

### Northeastern sawyer

- **Description.** ¾” – 1 ¼” long. Mottled, light brown/white. No distinct spots.

### Broad-necked root borer

- **Description.** Black with no white markings. Solid black antennae.

### Eyed click beetle

- **Description.** Black with white speckles. Black “eye spots”.
