# Yards as habitat for **Biodiversity**

Susannah B. Lerman - USFS

# YardScaping Mission

- To inspire Maine people to
  - create and maintain healthy landscapes
  - through ecologically based practices that
  - minimize reliance on water, fertilizer and pesticides

<https://www.yardscaping.org>

# The Ten-ets of YardScaping

- Promote buffers to protect waterways
- Promote appropriate plants - native plants and non-invasive alien plants
- Reduce lawn area
- Reduce runoff
- Reduce reliance on pesticides, fertilizers and water
- Promote low input lawns and landscapes
- Promote YardScape diversity
- Create wildlife habitats
- Right plant, right place, right use
- Commonsense pest management (IPM)

## **YardScaping Gardens at Back Cove**

### **LOW INPUT YARD CARE**

**When it comes to gardening,  
less is usually more.**

Low input yards require a little more brain, a lot less brawn and leave you with more free time:

- ◆ plant drought and pest tolerant plants
- ◆ mow lawns at the highest setting and leave the clippings
- ◆ replace lawn with shrubs or wildflowers
- ◆ mulch plants to keep moisture in and weeds out

***Want to get involved or learn more?***  
**Visit [www.yardscaping.org](http://www.yardscaping.org)**

# Eight things you can do to restore the ecosystem in your yard –

Doug Tallamy

- Cut your lawn in half
- Avoid senseless mowing
- Remove invasive species from your property
- Use keystone plants
- Build a landscaped layered with plants
- Put motion sensors on your security lights
- Minimize reliance on pesticide use
- Share these ideas with your neighbors

# Protect lakes & streams with buffers

- Preserve existing landscape
- Winding paths
- Don't mow to lake's edge
- Leave the duff

# Use site appropriate, non-invasive plants

- Native plants can be well adapted
  - Fewer problems, less work, more rewards, but not all are problem free, e.g., viburnums
- Invasive plants are easy to grow but crowd out native vegetation
  - Our local forest habitats are changing rapidly
  - Invasive plants can ruin wildlife habitat

Beautiful Native  
Shadbush

Problematic Native  
Viburnum

Deadly Invasive  
Bittersweet

# Invasive plants

<https://www.maine.gov/dacf/php/horticulture/invasiveplants.shtml>

## Do Not Sell Plant List

The invasive plants listed below are illegal to import, export, buy, sell or intentionally propagate for sale or distribution in Maine. The ban includes all cultivars, varieties and hybrids of these plants.

Species on this list may no longer be sold after the effective date.

Scientific Name	Common Name	Effective Date
<a href="#">Acer glabrum</a>	Amur maple	January 1, 2018
<a href="#">Acer platanoides</a>	Norway Maple	January 1, 2018
<a href="#">Aegopodium podagraria</a>	Bishop's Weed	January 1, 2018
<a href="#">Alliaria altissima</a>	Tree of Heaven	January 1, 2018
<a href="#">Alliaria petiolata</a>	Garlic Mustard	January 1, 2018
<a href="#">Amorpha fruticosa</a>	False Indigo	January 1, 2018
<a href="#">Ampelopsis glandulosa</a>	Porcelainberry	January 1, 2018
<a href="#">Artemisia vulgaris</a>	Common Mugwort	January 1, 2018
<a href="#">Berberis thunbergii</a>	Japanese Barberry	January 1, 2018
<a href="#">Berberis vulgaris</a>	Common Barberry	January 1, 2018
<a href="#">Celastrus orbiculatus</a>	Asiatic Bittersweet	January 1, 2018
<a href="#">Elaeagnus umbellata</a>	Autumn Olive	January 1, 2018
<a href="#">Euonymus alatus</a>	Winged Euonymus	January 1, 2018
<a href="#">Euphorbia cyparissias</a>	Cypress Spurge	January 1, 2018
<a href="#">Fallopia baldschuanica</a>	Chinese Bindweed	January 1, 2018
<a href="#">Fallopia japonica</a>	Japanese Knotweed	January 1, 2018
<a href="#">Fraxinus alnus</a>	Glossy Buckthorn	January 1, 2018
<a href="#">Hesperis matronalis</a>	Dame's Rocket	January 1, 2018
<a href="#">Impatiens glandulifera</a>	Ornamental Jewelweed	January 1, 2018
<a href="#">Iris pseudacorus</a>	Yellow Iris	January 1, 2018
<a href="#">Ligustrum vulgare</a>	Common Privet	January 1, 2018

# Invasive Plants Prohibited from Sale or Import in Maine What you need to Know

CMR 01-001 Chapter 273: Criteria for Listing Invasive Terrestrial Plants makes it illegal to sell, import, export, buy or intentionally propagate for sale the 33 plant species listed below.

<i>Acer ginnala</i> (amur maple)	<i>Impatiens glandulifera</i> (ornamental jewelweed)
<i>Acer platanoides</i> (Norway maple)	<i>Iris pseudacorus</i> (yellow iris)
<i>Aegopodium podagraria</i> (bishop's weed)	<i>Ligustrum vulgare</i> (common privet)
<i>Ailanthus altissima</i> (tree of heaven)	<i>Lonicera japonica</i> (Japanese honeysuckle)
<i>Alliaria petiolata</i> (garlic mustard)	<i>Lonicera mackii</i> (amur or bush honeysuckle)
<i>Amorpha fruticosa</i> (false indigo bush)	<i>Lonicera morrowii</i> (Morrow's honeysuckle)
<i>Ampelopsis glandulosa</i> (porcelain berry)	<i>Lonicera tatarica</i> (Tatarian honeysuckle)
<i>Artemisia vulgaris</i> (common mugwort)	<i>Lythrum salicaria</i> (purple loosestrife)
<i>Berberis thunbergii</i> (Japanese barberry)	<i>Microstegium vimineum</i> (Japanese stilt grass)
<i>Berberis vulgaris</i> (common barberry)	<i>Paulownia tomentosa</i> (paulownia, princess tree)
<i>Celastrus orbiculatus</i> (Asiatic bittersweet)	<i>Persicaria perfoliata</i> (mile-a-minute)
<i>Elaeagnus umbellata</i> (Autumn olive)	<i>Phellodendron amurense</i> (amur cork tree)
<i>Euonymus alatus</i> (winged euonymus)	<i>Populus alba</i> (white cottonwood)
<i>Euphorbia cyparissias</i> (cypress spurge)	<i>Robinia pseudoacacia</i> (black locust)
<i>Fallopia baldschuanica</i> (Chinese bindweed)	<i>Rosa multiflora</i> (multiflora rose)
<i>Fallopia japonica</i> (Japanese knotweed)	
<i>Frangula alnus</i> (glossy buckthorn)	
<i>Hesperis matronalis</i> (dame's rocket)	

## Quick Facts

- The sale/import ban includes the listed species and all cultivars, varieties and hybrids.
- Variances may be applied for and granted for scientific research and for varieties, cultivars or hybrids that have been shown to not be invasive through peer reviewed scientific research.
- The invasive plant rule and included prohibited plant list will be reviewed every 5 years.
- Recent changes to the rule will prohibit the sale of an additional 30 species starting January 1, 2024 (see back).
- Find more information at [www.maine.gov/da/ct/np/np/horticulture/invasiveplants.shtml](http://www.maine.gov/da/ct/np/np/horticulture/invasiveplants.shtml)

## Invasive Terrestrial Plant Species of Special Concern

Scientific Name	Common Name
<i>Rosa rugosa</i>	Rugosa rose, beach rose

# Invasive Plant Outreach Materials Available

- The Horticulture Program has assembled invasive plant outreach materials that can help educate you, and your visitors. [Request copies of outreach materials](#)
  - **Rosa rugosa factsheet:** This factsheet describes habitats where *Rosa rugosa* should not be planted and includes a list of alternative plants.
  - **Do Not Sell List Factsheet:** Full page, 2-sided factsheet that includes invasive plant quick facts and the full list of plants on the Do Not Sell List.
  - **Plant This, Not That! Bookmarks:** Now with designs featuring 8 of the plants on the Do Not Sell List.
  - **Hitchhiker Postcards:** In two different designs, one featuring mile-a-minute vine and the other invasive stiltgrass. Both plants are known to move with nursery stock, are of limited distribution in Maine, and are plants we'd like to have reported to [horticulture@maine.gov](mailto:horticulture@maine.gov).
  - **Why can't I buy... Factsheets:** Several designs featuring 5 of the in-demand invasive plants on the Do Not Sell List. These factsheets include information on why the featured plant is prohibited from sale and a list of potential alternatives. Great to have on hand for those customers that are still asking for 'Crimson King' Norway maples or burning bush!

# Reduce lawn area

- Reduces
  - Water & air pollution
  - Water usage
  - Maintenance
  - Costs
- Gives
  - More free time

Mower exhaust = 11 small cars' exhaust

One hour on riding mower = 400 miles

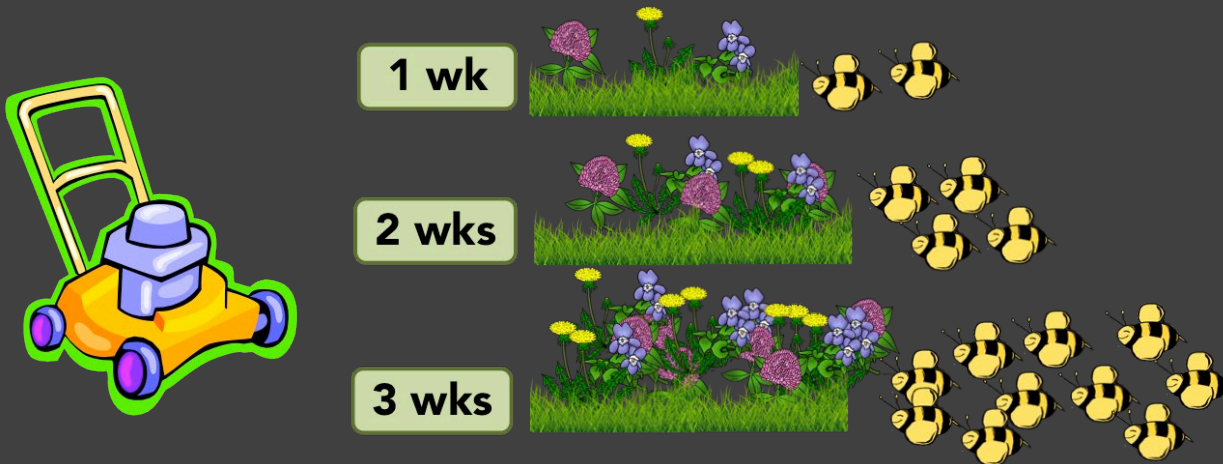

# Making lawns 'less bad'

## 58 species in lawns

White clover	Annual fleabane
Yellow wood-sorrel	Horseweed
Dandelion	Yellow hawkweed
Purple smartweed	Carpetweed
Birdsfoot Trefoil	Field pennycress

# Making lawns 'less bad'

## Bee patterns

- Lawn flower abundance
- Work-horse species
- Taller grass

# Making lawns 'less bad'

## Lawns for Bees & People

Two-week solution  
Aesthetically pleasing  
Creates bee habitat

Minimize lawn areas

Mow or bush hog 1/2 or 1/3 of the meadow each year

# Reduce runoff

- Reduce amount of pervious (hard) surfaces
- Create rain gardens or install rain barrels
- Direct water into vegetated areas

# Reduce reliance on pesticides, fertilizers and water

- Grow plants that are resistant to insects & diseases
- Use plants that tolerate low fertility
- Use drought-resistant plants

Black Chokeberry

Sweet Fern

# Use low input plant varieties

- Fine fescue or tall fescue instead of Kentucky bluegrass and ryegrass
- Pagoda dogwood vs flowering cherry
- River birch vs paper birch

# Consider a native plant “lawn”

*Fragaria virginiana*  
wild strawberry

*Eragrostis spectabilis*  
purple lovegrass

*Carex pensylvanica*  
Pennsylvania sedge

# Use a diversity of plants & grasses

- Monocultures lead to disasters
- Diversity leads to less noticeable damage from pests and disease
  - Incorporate many layers of plant types
    - Trees
    - Shrubs
    - Ground covers
    - Perennials, and
    - Lawns

# Plant in layers

Overhead canopy of deciduous and evergreen trees provide wildlife with food sources, nesting cover and shelter from the elements.

Minimal use of lawn area, in relation to surrounding landscape.

Wide plant buffer next to water's edge will intercept sediments and filter out nutrients that run off the land.

Layers of vegetation provide good habitat structure.

Diversity of native plants supports a diverse food web.

Soil is protected with native groundcovers and shrubs.

# Create wildlife habitats

- Diversity and plant layers go hand in hand with habitat creation
- Add native nectar and fruit producing plants (Goal is 70% native)
- Strive for continuous blooms
- Add native host plants
- Add water, walls, feeders, woody debris

# Right plant, right place, right purpose

- Choose plants based on the area to be planted not just for their color
- Select plants that thrive under existing conditions rather than trying to alter the conditions to meet the needs of a plant
- Minimize disturbance of the existing landscape

Wild Cranberry Bog

## Top Keystone Plant Genera in Eastern Temperate Forests – Ecoregion 8

A genus is a taxonomic category of plants that contains one or more species of plants with similar characteristics. Species within each genus have adapted to local conditions and are the appropriate native species or varieties suited to a specific ecoregion.

Plant Type	Plant Genus	Sample of Common Species (not all encompassing)	# Caterpillar Species that Use this as a Host Plant	# of Pollen Specialist Bee species that Rely on this Plant
Trees	<i>Quercus</i>	White oak ( <i>Quercus alba</i> ), Black oak ( <i>Quercus velutina</i> )	436 	
	<i>Prunus</i>	American plum ( <i>Prunus americana</i> ), Black cherry ( <i>Prunus serotina</i> ), Chokecherry ( <i>Prunus virginiana</i> )	340 	
	<i>Betula</i>	River birch ( <i>Betula nigra</i> ), Sweet birch ( <i>Betula lenta</i> )	284 	
	<i>Populus</i>	Eastern cottonwood ( <i>Populus deltoides</i> )	249 	
	<i>Acer</i>	Box elder ( <i>Acer negundo</i> ), Silver maple ( <i>Acer saccharinum</i> ), Sugar maple ( <i>Acer saccharum</i> )	238 	
	<i>Malus</i>	Southern crabapple ( <i>Malus angustifolia</i> ), Sweet crabapple ( <i>Malus coronaria</i> )	237 	
	<i>Carya</i>	Bitternut hickory ( <i>Carya cordiformis</i> ), Pignut hickory ( <i>Carya glabra</i> ), Mockernut hickory ( <i>Carya tomentosa</i> )	213 	
	<i>Pinus</i>	Pitch pine ( <i>Pinus rigida</i> ), Eastern white pine ( <i>Pinus strobus</i> ), Virginia pine ( <i>Pinus virginiana</i> )	200 	
Shrubs	<i>Vaccinium</i>	Northern highbush blueberry ( <i>Vaccinium corymbosum</i> ), Black highbush blueberry ( <i>Vaccinium fuscum</i> ), Hillside blueberry ( <i>Vaccinium pallidum</i> )	217 	14 
	<i>Salix</i>	Prairie willow ( <i>Salix humilis</i> ), Black willow ( <i>Salix nigra</i> )	289 	14 
Flowering Perennials	<i>Solidago</i>	Stiff leaf goldenrod ( <i>Solidago rigida</i> ), Atlantic goldenrod ( <i>Solidago arguta</i> )	104 	42 
	<i>Symphyotrichum</i>	Blue wood aster ( <i>Symphyotrichum cordifolium</i> ), Smooth aster ( <i>Symphyotrichum laeve</i> )	100 	33 
	<i>Helianthus</i>	Woodland sunflower ( <i>Helianthus divaricatus</i> ), Small woodland sunflower ( <i>Helianthus microcephalus</i> )	66 	50 

# Keystone plants

# Pollinator powerhouse plants

- "Pollinator Powerhouse Plant" is a designation for native plant species that support a proportionally large number of caterpillar species: woody plants qualify as pollinator powerhouses if they support 75 or more species of lepidopterans; herbaceous plant species qualify if they support 15 or more species of lepidopterans.

## American Witch-Hazel

*Hamamelis virginiana*

Also known as Common Witch-Hazel, Snapping Hazelnut, Striped or Spotted Alder, and Winterbloom, this perennial, fall-blooming, deciduous shrub or small tree grows 15 to 20 feet tall. It grows in full sun and partial shade, in dry to moist soil, but prefers rich, acidic, well-drained soil. American Witch-Hazel produces fragrant, yellow flowers with petals that resemble crumpled strips from October to December and greenish seed capsules that mature to light brown.

# The Birds and the Bees

## Ecosystem Services

- 7,000 – 9,000 insects per clutch
- \$56 billion per year

Begin with bees &  
pollinators

---

A photograph of a diverse garden scene. In the foreground, there are large green leaves of a squash plant, clusters of small white flowers, and patches of orange and yellow daisies. Purple spiky flowers are also visible. In the background, a wooden beehive sits on a small stand, surrounded by more greenery and a dense forest of trees.

Bee-Friendly Gardens have  
Shelter, Plant Diversity, Lots of  
Blooms, Water, Some Bare Soil

# Social Behavior of Bees

---

- Social
  - 10% of bee species in the U.S.
  - Several generations in a nest at the same time
  - Cooperation in caring for young
  - Division of labor
  - Bumble and honey bees
- Solitary
  - 90% of bee species in the U.S.
  - Each female constructs and provisions her own nest

# Foraging Selectivity

---

- Nectar - sugar and amino acids
- Pollen – protein
- Most gather nectar from several different flower species
  - Depends mostly on tongue length and skill
- Pollen collection is usually more selective
  - Some will use any flowering plant, many focus on one species of plant

# Floral Resources

- Bee flowers
  - Bilateral symmetry
  - Tube-like or bell-shaped with a nectar reservoir
  - Some are complex to receive reward
  - Yellow, white, blue or purple with UV markers

# Colors attract specific groups

Bees like blue, purple, white and yellow

Butterflies like orange, pink and red

Beetles prefer big fleshy disk shaped smelly white and green flowers

Wasps and flies like yellow, pink and white

## Nesting

- Ground 70%
- Stem 30%
- Cavity
  - Bumble and honey bees

# Nesting Resources – Ground Nesters

- Areas of bare or sparsely vegetated soil
  - Loose
  - Well drained
  - Full sun
  - Several yards across
- Flat and/or banked areas

## Nesting Resources – Cavity Nesters

- Dead trees, snags, or fallen logs
- Base of bunch grasses
  - Old rodent nests often found under grassy tussocks

## Nesting Resources – Stem Nesters

- Pithy, soft centered or hollow stems
  - Sumac
  - Box elder
  - Elderberry
  - Raspberry
  - Allium
  - Asparagus
  - Sedum
  - Sunflower

## How to Create Habitat for Stem-nesting Bees

### WINTER

Leave dead flower stalks in-tact over the winter.

### SPRING

Cut back dead flower stalks leaving stem stubble of varying height, 8 to 24 inches, to provide nest cavities.

Female bees find cut or naturally-occurring open stems, start a nest, then lay an egg on the pollen balls. Larvae eat the pollen.

### SUMMER

New growth of the perennial hides the stem stubble.

Bee larvae develop in cut dead stems during the growing season.

### FALL

### WINTER

Bees hibernate in stems during the winter.

### SPRING

Cut back dead flower stalks. Old stem stubble will naturally decompose.

Adult bees emerge and start nests in newly cut dead stems or in naturally-occurring open stems.

# Nests for Native Bees

[www.xerces.org](http://www.xerces.org)

# Pollinator-Friendly Gardens

- Plant diversity of flowering plants
- With overlapping bloom periods throughout the season
- Provide water (small puddles, plants that catch water and dew)
- Provide some shelter
- Replace invasive plants

Soft-bodied insects are key for baby birds

# *Echinacea purpurea* – Purple Coneflower

*Speyeria cybele* - Great Spangled Fritillary and *Vanessa cardui* - Painted Lady

*Homoeosoma electellum* –  
Sunflower Moth

*Halictidae* – Sweat Bee

# *Eupatorium maculatum* – Spotted Joe Pye Weed

*Arctia caja* –  
Great Tiger Moth

*Bombus insularis* –  
Indiscriminate Cuckoo  
Bumble Bee

# *Asclepias incarnata* – Swamp Milkweed

Phish Photography

*Sphex ichneumoneus* – Great Golden Digger Wasp

# *Lobelia cardinalis* – Cardinal Flower

*Archilochus colubris* –  
Ruby-throated Hummingbird

# *Symphyotrichum nova angliae* – New England Aster

*Bombus impatiens* – Impatient Bumble Bee

*Syrphus ribesii* - Hoverfly

# *Carex pensylvanica* – Pennsylvania Sedge

*Euphyes vestris* - Dun Skipper

# *Geranium maculatum* – Spotted Geranium

*Apis mellifera* – Honey Bee

*Heliothis virescens* -  
Tobacco Budworm

# *Heliopsis helianthoides* – False Sunflower

*Chlosyne nycteis* -  
Silvery Checkerspot

# *Monarda fistulosa* – Wild Bergamot

Unknow Microlep

*Pyrausta signatalis* –  
Monarda caterpillar

# *Phlox subulata* – Creeping Phlox

*Hemaris diffinis* – Snowberry  
Clearwing Moth

# *Schizachryium scoparium* – Little Bluestem

*Polites origenes* –  
Crossline Skipper

# *Solidago canadensis* - Canada Goldenrod

*Vespula maculifrons* -  
Eastern Yellowjacket

*Cucullia convexipennis* -  
Brown-hooded Owlet

*Cucullia asteroides* -  
Goldenrod Hooded Owlet

# *Vaccinium corymbosum* – Highbush Blueberry

Kelsey Byers

*Bombus impatiens* –  
Impatient Bumble Bee

Mary Keim

*Monoleuca semifascia* –  
Pin-striped Slug Moth

# Gaylussacia baccata – Black Huckleberry

Andrenid bee

*Sphinx Gordius* –  
Apple Sphinx

*Pangrapta decoralis* –  
Decorated Owlet

# *Lindera benzoin* - Northern Spicebush

*Papilio Troilus* –  
Spicebush Swallowtail

*Celastrina ladon*  
- Spring Azure

Hermit Thrush

## Top Keystone Plant Genera in Eastern Temperate Forests – Ecoregion 8

A genus is a taxonomic category of plants that contains one or more species of plants with similar characteristics. Species within each genus have adapted to local conditions and are the appropriate native species or varieties suited to a specific ecoregion.

Plant Type	Plant Genus	Sample of Common Species (not all encompassing)	# Caterpillar Species that Use this as a Host Plant	# of Pollen Specialist Bee species that Rely on this Plant
Trees	<i>Quercus</i>	White oak ( <i>Quercus alba</i> ), Black oak ( <i>Quercus velutina</i> )	436 	
	<i>Prunus</i>	American plum ( <i>Prunus americana</i> ), Black cherry ( <i>Prunus serotina</i> ), Chokecherry ( <i>Prunus virginiana</i> )	340 	
	<i>Betula</i>	River birch ( <i>Betula nigra</i> ), Sweet birch ( <i>Betula lenta</i> )	284 	
	<i>Populus</i>	Eastern cottonwood ( <i>Populus deltoides</i> )	249 	
	<i>Acer</i>	Box elder ( <i>Acer negundo</i> ), Silver maple ( <i>Acer saccharinum</i> ), Sugar maple ( <i>Acer saccharum</i> )	238 	
	<i>Malus</i>	Southern crabapple ( <i>Malus angustifolia</i> ), Sweet crabapple ( <i>Malus coronaria</i> )	237 	
	<i>Carya</i>	Bitternut hickory ( <i>Carya cordiformis</i> ), Pignut hickory ( <i>Carya glabra</i> ), Mockernut hickory ( <i>Carya tomentosa</i> )	213 	
	<i>Pinus</i>	Pitch pine ( <i>Pinus rigida</i> ), Eastern white pine ( <i>Pinus strobus</i> ), Virginia pine ( <i>Pinus virginiana</i> )	200 	
Shrubs	<i>Vaccinium</i>	Northern highbush blueberry ( <i>Vaccinium corymbosum</i> ), Black highbush blueberry ( <i>Vaccinium fuscum</i> ), Hillside blueberry ( <i>Vaccinium pallidum</i> )	217 	14 
	<i>Salix</i>	Prairie willow ( <i>Salix humilis</i> ), Black willow ( <i>Salix nigra</i> )	289 	14 
Flowering Perennials	<i>Solidago</i>	Stiff leaf goldenrod ( <i>Solidago rigida</i> ), Atlantic goldenrod ( <i>Solidago arguta</i> )	104 	42 
	<i>Symphyotrichum</i>	Blue wood aster ( <i>Symphyotrichum cordifolium</i> ), Smooth aster ( <i>Symphyotrichum laeve</i> )	100 	33 
	<i>Helianthus</i>	Woodland sunflower ( <i>Helianthus divaricatus</i> ), Small woodland sunflower ( <i>Helianthus microcephalus</i> )	66 	50 

# Keystone plants

# *Quercus* spp. - Oaks

*Quercus alba* – White Oak

*Peridea angulosa* –  
Angulose Prominent

*Quercus rubra* – Red Oak

*Anisota senatoria* -  
Orangestriped Oakworm

# *Acer Spp.* - Maples

*Acer rubrum* – Red Maple

*Speranza pustularia* –  
Lesser Maple Spanworm

*Acer pensylvanicum* – Striped Maple

*Malacosoma disstria* –  
Forest Tent Caterpillar

# Use common sense pest management

- Integrated pest management
  - Know your pest
  - Pick it, trap it or exclude it
  - Know the good bugs
  - Mow, prune or water
  - Use pesticides as last resort

# Spare the Sprays. Even Organic Ones

PESTICIDE	NON-TOXIC	LOW TOXICITY	HIGHLY TOXIC
<b>Insecticides/Repellants/Pest Barriers</b>			
<i>Bacillus thuringiensis</i> (Bt)	■		
<i>Beauveria bassiana</i>			■
<i>Cydia pomonella granulosis</i>	■		
Diatomaceous Earth			■
Garlic	■		
Insecticidal Soap			■
Kaolin Clay	■		
Neem		■	
Horticultural Oil			■
Pyrethrins			■
Rotenone			■
Sabadilla			■
Spinosad			■
<b>Herbicides/Plant Growth Regulators/Adjuvants</b>			
Adjuvants		■	
Corn Gluten	■		
Gibberellic Acid	■		
Horticultural Vinegar		■	
<b>Fungicides</b>			
Copper		■	
Copper Sulfate			■
Lime Sulfur	■		
Sulfur			■

Toxicity of  
Common Organic  
Pesticides to  
Pollinators

Soaps and Oils, only  
when directly sprayed  
upon the pollinator

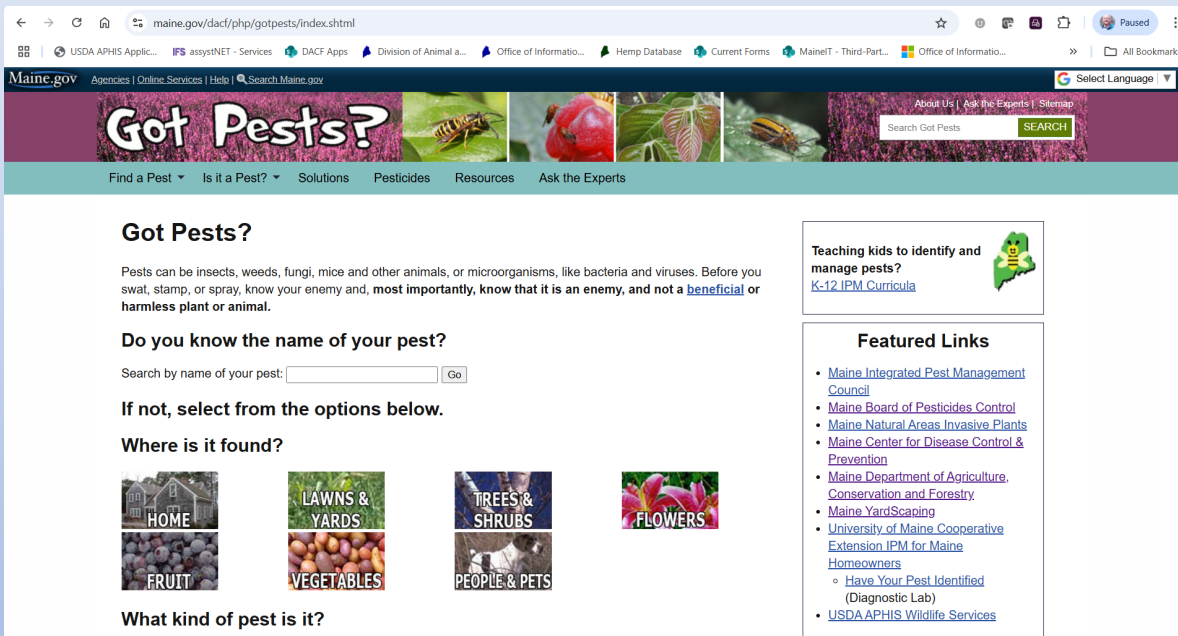

Turn off  
the lights

**Got Pests?**

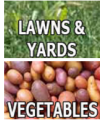

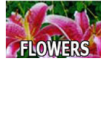

Pests can be insects, weeds, fungi, mice and other animals, or microorganisms, like bacteria and viruses. Before you swat, stamp, or spray, know your enemy and, **most importantly, know that it is an enemy, and not a [beneficial](#) or harmless plant or animal.**

**Do you know the name of your pest?**

Search by name of your pest:

**If not, select from the options below.**

**Where is it found?**

   

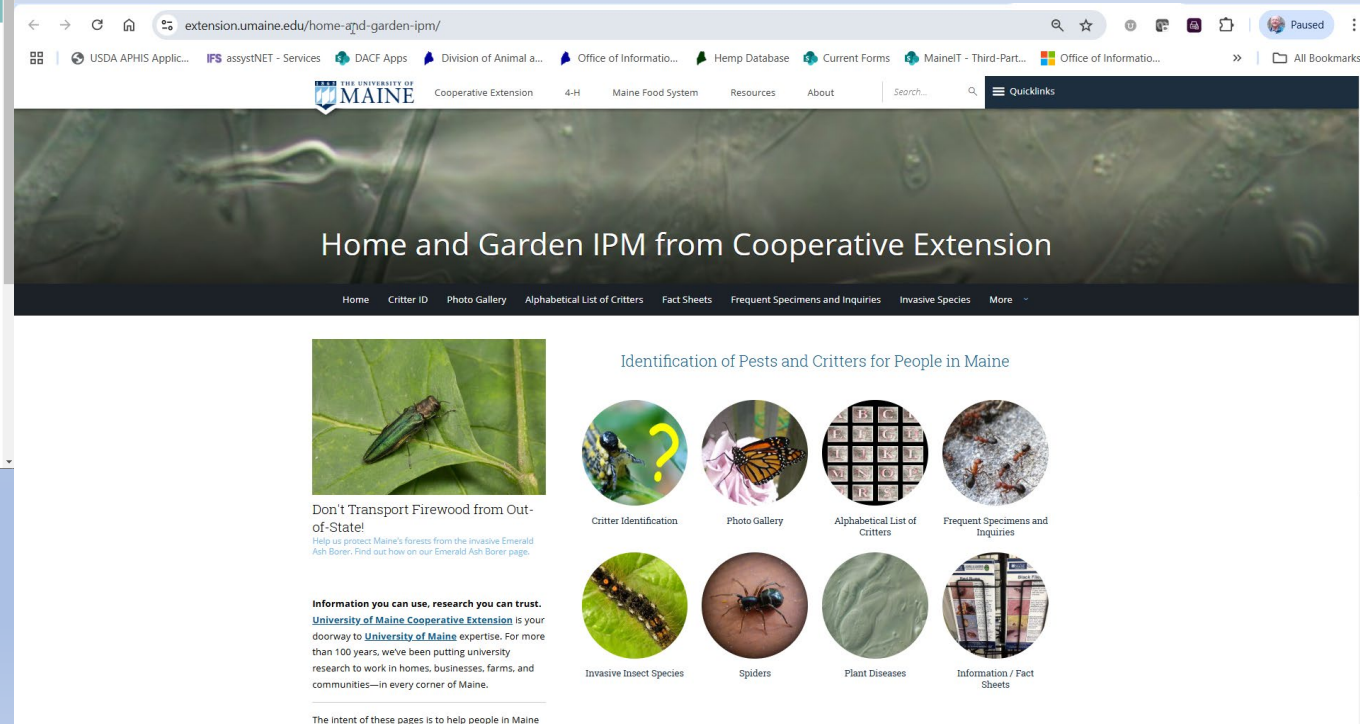

**What kind of pest is it?**

**Teaching kids to identify and manage pests?**

# Barriers and Opportunities

## Social

- Aesthetically pleasing
- Adhere to social norms

- Cues to care
- Empower local champions
- Partner with gardeners

## Economic

- Cost prohibitive

- Rebates
- Tax incentives to reduce management

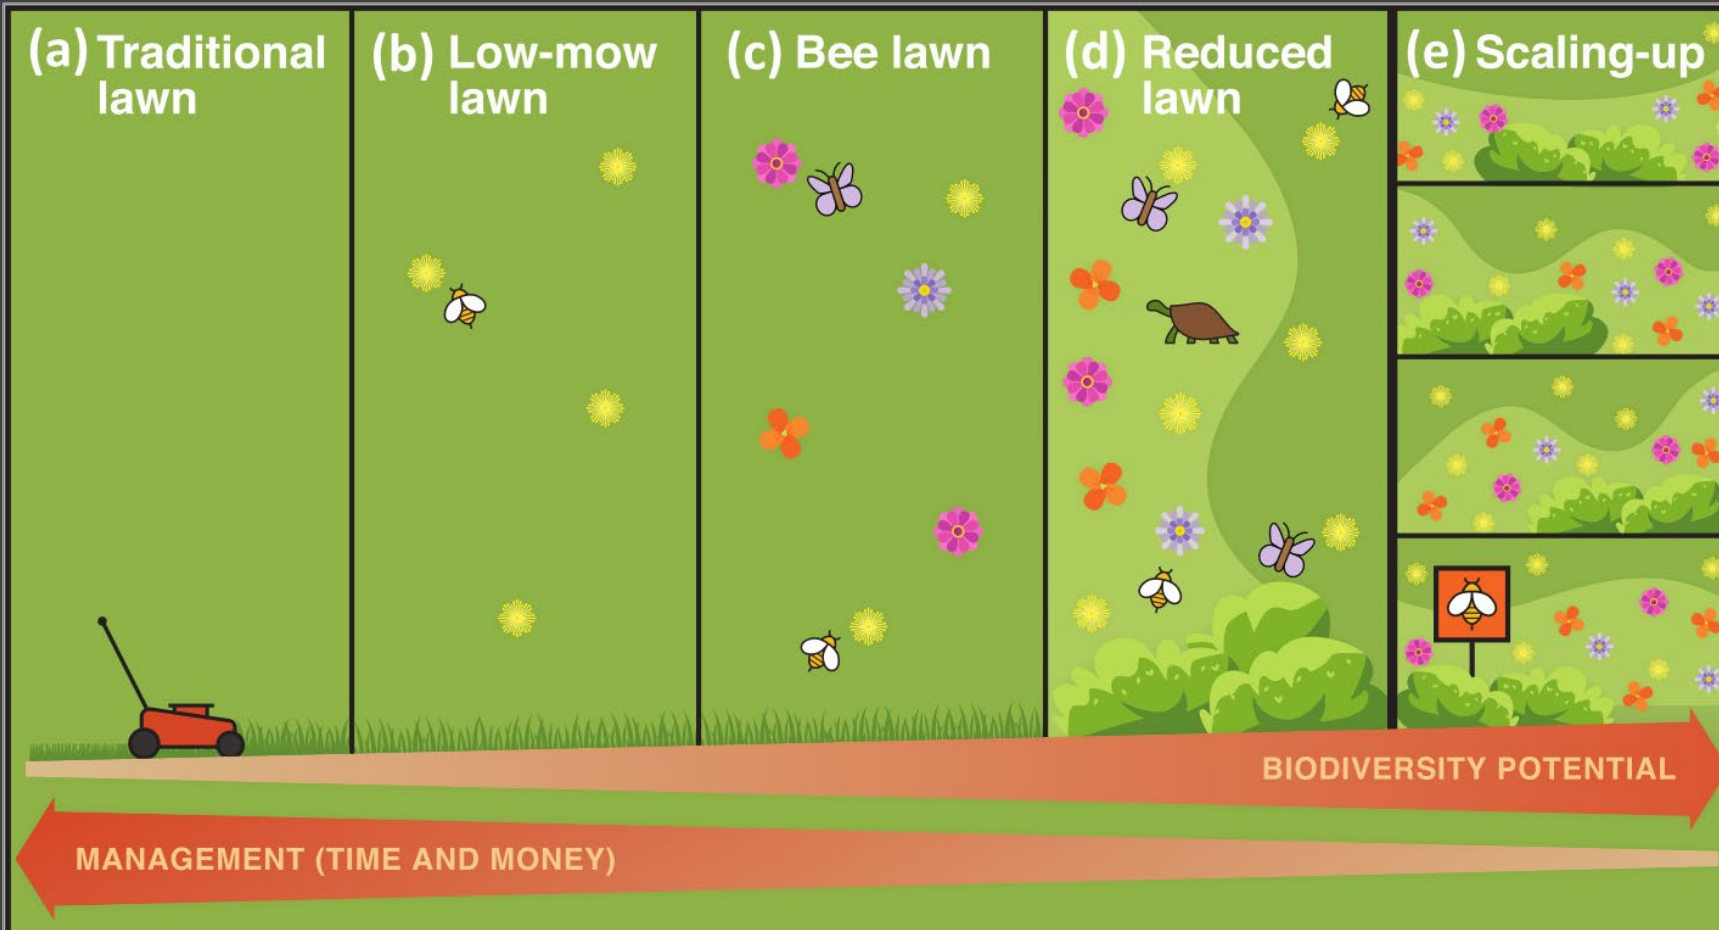

## Policy

- Local weed laws
- Not part of conservation

- Revise local ordinances
- Executive Order 14008 (30x30)

# Opportunities to Engage

- Plant natives
- Garden for wildlife
- Mow & manage less
- Moment → Movement
