**APPLICATION FOR RENEWAL FOR SPECIAL LOCAL NEED 24(C) REGISTRATION
GOALTENDER (A.I. OXYFLUORFEN)
EPA REGISTRATION NUMBER: 62719-447
FOR POSTEMERGENCE USE IN BROCCOLI**

Dear Mary,

Dow AgroSciences respectfully requests an extension for the registration and labeling of the FIFRA 24(c) Special Local Need for GoalTender For Postemergence Use in Broccoli (ME-090002). Goaltender continues to be extremely valuable to Maine broccoli growers due to the limited number of herbicide available to manage weeds, particularly for controlling broadleaf weeds that escape preemergence herbicides.

Enclosed please find the following:

1. Section 24(c) renewal request for Special Local Need (this letter).
2. Section 24(c) label title GoalTender - For Postemergence Use in Broccoli ME-090002 (R204-089).
3. Safety Data Sheet (SDS) for GoalTender.

Please contact me at 317-337-5148 or nalgarin@dow.com if you have any questions or require additional information.

Sincerely,

Nestor Algarin
