## WORD LIST

- GOLDEN EAGLE
- PEREGRINE FALCON
- DELISTED
- WOOD TURTLE
- SPECIAL CONCERN
- CANADA LYNX
- BLANDINGS TURTLE
- THREATENED
- BOX TURTLE
- EXTIRPATED
- COUGAR
- ENDANGERED
- BALD EAGLE

Once endangered throughout Maine and the US; this bird has been removed from state and federal endangered species lists.

This turtle features a 'helmet' shaped shell and is found in southern Maine.

The most endangered bird in Maine.

Without attention, a wildlife species with this listing may become threatened.

An endangered species in Maine that exhibits spectacular 200 mph dives on its prey; and that is staging a population comeback

Great news when a wildlife species has been removed from any of the protected lists and has healthy reproducing populations in its native range!

Found only in the remote forests of northern and western Maine, this wild cat numbers close to 600 individuals!

When a wildlife species no longer exists in a place, like Maine; yet does have healthy populations elsewhere in the country or the world.

The most endangered turtle in Maine, this species can close its' shell up just like a box.

A term used to describe a wildlife population that may go extinct

A species of special concern, this reptile lives primarily in central to western Maine and is considered ½ aquatic and ½ terrestrial.

Extirpated from Maine by the 1930s, this large predator still has healthy western populations.

This term describes a wildlife species that no longer exists anywhere in the world.

An attractive little turtle found in southern Maine wetlands, its' yellow spots make it easy to identify.

This word describes a wildlife species that, if not protected, may become endangered.

# MAINE WILDLIFE PARK ENDANGERED SPECIES
