

TORSEY POND

(Greeley Pond)

Mt. Vernon and Readfield Twps., Kennebec Co.

U. S. G. S. Augusta, Me.

Fishes

Smallmouth bass	White sucker
White perch	Minnnows
Yellow perch	Golden shiner
Chain pickerel	Pumpkinseed sunfish
Hornpout (bullhead)	Yellowbelly sunfish
Eel	

Physical Characteristics

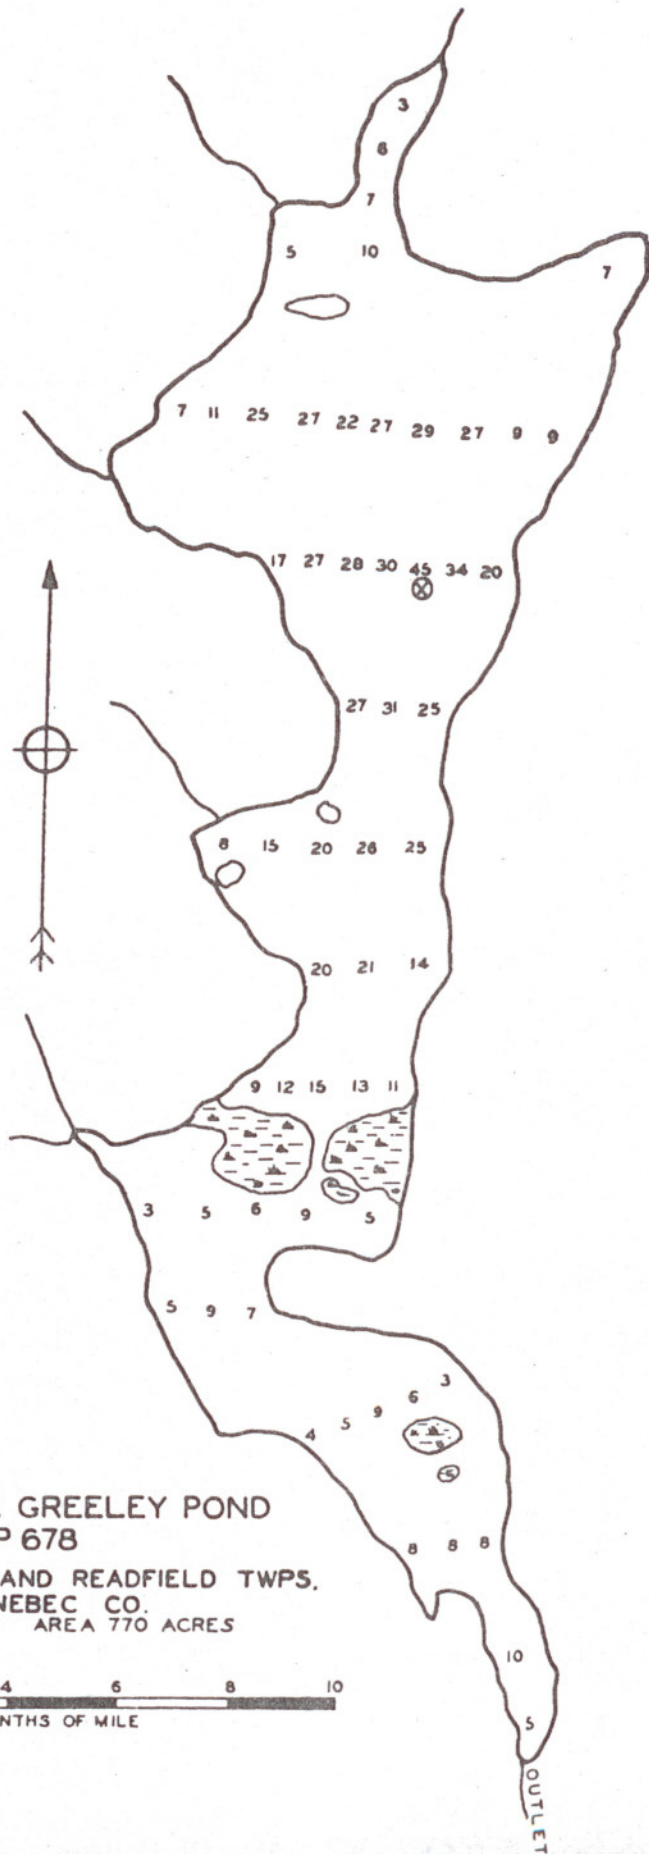

Area - 770 acres	Temperatures
	Surface - 71° F.
Maximum depth - 45 feet	42 feet - 51° F.

Suggested Management

Torsey Pond should be managed for its warm-water game fishes. No stocking is recommended. Oxygen deficiency at depths below 15 feet and the presence of large numbers of competitive species eliminates the possibility of managing for cold-water fishes.

Surveyed - August, 1940
