Conservation Areas

National Wetlands Inventory (NWI) uses

Fish Waters.

aerial photographs to approximate wetland locations. NWI data typically under represents the presence of wetlands on the landscape. Areas are delineated by ME Dep. of

Environmental Protection's Mandatory Shoreland Zoning Act, which includes areas within 250 feet of great ponds, rivers, and wetlands, and within 75 feet of streams. The regulations within each shoreland zone depends on the town, and towns may regulate greater areas than what is shown here. For
