

### Maine Vehicle Telematics System Notice

This vehicle includes a “telematics system” as defined under Maine Revised Statutes, Title 29-A, section 1801(6). Under Maine law, you have the right to access the vehicle's mechanical data through a mobile device and to authorize an independent repair facility to access the vehicle's mechanical data to diagnose, repair, and maintain your vehicle.

A vehicle’s telematics system collects information generated by the operation of the vehicle and transmits that information using wireless communications to a remote receiving point where the information is stored or used.

As of January 5, 2025, manufacturers of motor vehicles sold in Maine, including commercial motor vehicles and heavy duty vehicles having a gross vehicle weight rating of more than 14,000 pounds, that use a telematics system, are required to equip vehicles sold in Maine with an inter-operable, standardized and owner-authorized access platform across all of the manufacturer's makes and models. The platform must be capable of securely communicating all mechanical data emanating directly from the motor vehicle via direct data connection to the platform. The platform must be directly accessible by the motor vehicle owner through a mobile-based application and, upon the authorization of the owner, all mechanical data must be directly accessible by an independent repair facility or a licensed dealer limited to the time to complete the repair or for a period of time agreed to by the motor vehicle owner for the purposes of maintaining, diagnosing and repairing the motor vehicle.

“Mechanical data” refers to vehicle-specific data, including telematics system data, generated by, stored in, or transmitted by a motor vehicle and used in the diagnosis, repair, or maintenance of the vehicle. The type of mechanical data available through telematics will vary depending on the vehicle, but can come from sensors on many vehicle parts, such as the airbags, battery, engine and/or motor, transmission, brakes, or tires.
