

IMPORTATION OF LIVE GAMEBIRDS OR THEIR HATCHING EGGS FOR PROPAGATION, RELEASE, OR HOBBYIST PURSUITS

All pheasants, chukkers, quail, mallards, and associated game birds being imported into Maine MUST originate from a currently certified National Poultry Improvement Plan (NPIP) subpart E flock. Proof of participation must accompany the birds being shipped. Proof of participation must come in one of two forms: either the VS Form 9-2 that your flock received when the annual testing was done on your flock, or the VS Form 9-3 which is the form that your Official State Agent (OSA) signs off on for each out of state shipment.

These forms must be current and filled out correctly to be considered valid. Please see the attached examples of the information that must be on each type of form. Items to especially note are that if the birds are coming to Maine for immediate use in dog training purposes, the flock only needs to be a NPIP Pullorum-Typhoid clean flock. All other gamebird shipments MUST come flocks that are NPIP Pullorum-Typhoid AND Mycoplasma Gallisepticum and Mycoplasma Synoviae clean.

VS FORM 9-3

This report is requested by certain States for the interstate shipment of poultry products. Failure to report may result in non-acceptance of shipment. See reverse side for OMB information. OMB Approved 0570-0007

VS FORM 9-3 DEC 2011 (Previous editions are obsolete.) Foreign Purchaser's Copy or Domestic Purchaser's Official State Agency Copy (after items 13 and 14 are completed)

Both of these Boxes must be complete and accurate. The addresses must be the PHYSICAL address where the birds will be going. (P.O. Boxes are not acceptable)

The actual number of birds of EACH species must be indicated here. There can only be 1 species noted per line. If there is more than four species coming in a shipment please use additional forms.

The "X" highlighted in red must be on all forms. The "X's" in purple must be on all forms except for shipments intended for immediate use in dog training purposes.

The form is not valid until it has the signature of the OSA.

VS FORM 9-2

Both of these Boxes must be complete and accurate. The flock address in line #2 must be the PHYSICAL address where the birds coming from. (P.O. Boxes are not acceptable). If the flock location is the same as the owners physical address, "same as above" is an acceptable entry on line #2.

ALTERNATE EXAMPLES OF VS FORM 9-3

NPIP: 42-61
Maine 1

Facsimile of VS Form 9-3I – Report of Sales of Hatching Eggs, Chicks, and Poults
This is to certify that the above named producer or shipper is participating in the NATIONAL POULTRY IMPROVEMENT PLAN and that the description and classification of the products listed are properly indicated. All chicks and eggs are produced from U.S. PULLORMUM-TYPHOID CLEAN, AI CLEAN, H5/H7 AI CLEAN, SALMONELLA MONITORED flocks.

NPIP: 42-61
 Emily Reynolds January 13, 2017

The form is not valid until it has the signature of the OSA.

These chicks originate from flocks located in an area where AI has not been diagnosed. All codes are from the NPIP APHIS 91-55-078 appendix.

This is another version of an electronic VS Form 9-3. This variety can come in many non-traditional formats, though they all will use the shields highlighted to the right. The same rules will apply to the clean status needed for each flock and the producer must make sure the correct shields are assigned to their farm.
