

#### Instructions

1. Open a web browser, search Google Maps, enter the address of the farmland that your application focuses on.
2. Right click on central point of the farmland and select 'Print'
3. In the 'Print' window, select 'Save as PDF' for your Printer, select 'Landscape' for your Layout
4. Save the map using the naming convention: ARDSHIG26 Map – [YOUR FARM's NAME]
5. Open the map in Adobe or another PDF reading/editing software
6. Select the 'Draw' button on the toolbar. Outline each field/management unit in red.
7. Select the 'Type text' button on the toolbar. Enter a number for each field/management unit and the field's active or planned use using ONLY the categories listed in the application workbook. Use a font color that stands out from the background.
8. Save your changes.
9. Submit as a supplemental file according to the instructions in the RFA and application workbook.
