1. This map illustrates primary and secondary locations that share a boundary with a rural hub, March 25, 2019 draft basis statement. For more information about the adjacency principle and how the primary or secondary locations work, please visit the Commission’s website: https://www.maine.gov/dacf/lupc/public/adjacency.html

2. Primary and secondary locations are established in Section 10.08 A-C and 2 of the draft rules and customized in Section 10.08A-C4 and 5. This customization reflects public input and research about service provision and existing development patterns.

3. This map does not show areas where primary or secondary locations overlap with conserved lands.

4. Measurements made from public roads are "as the crow flies" except that the measurement is not carried over a waterbody or the interstate highway, unless the area is contiguous to another primary or secondary location. This is intended to account for situations where development on one side of a waterbody or highway would be effectively separated from a town on the other side by long travel distance.

5. The Comprehensive Land Use Plan and Chapter 18 Land Use Districts and Standards list a management classification for each lake in the Commission's service area. Management classifications indicate suitability for development of each lake, with the goal of maintaining a diversity of lake experiences (e.g., MC3 lakes are potentially suitable for development).
