

Towns with Significant Populations of Browntail Moth April 2023

A list of eligible areas generated through Maine Forest Service surveys is identified for administration of the Browntail Moth Mitigation Fund. Applications for grant funds to mitigate browntail moth would have to target these areas. Aerial survey and winter web survey data for the past three years was used to determine which towns would be rated in the moderate to severe category. Both types of survey used in this determination were conducted by Maine Forest Service staff. Upon request by an applicant, the division, in its sole discretion, may decide to add additional areas to the division's list of eligible areas.
