Avoid or minimize crossings and avoid steep approaches. Bridges should be placed 2-3 ft. above water level.

Sill logs provide a stable surface, prevent the bridge from sinking, and from freezing into the ground in the winter.

When using a skidder, wrap the panel with a chain and place a small log under the arms of the blade to help lift the panel. Place panels tight on the sill logs to prevent soil from falling into the stream.

Install bumper logs to keep hitches of wood on the bridge and out of the stream.

Install on both approaches to the crossing starting 25-50 ft. back, and spaced appropriately.

Use slash to cover exposed soil and help keep sediment off of the bridge deck.

Lift the panels off of the sill logs, keeping them level to prevent dirt from entering the stream. Do not drag the panels over the stream banks.

Seed and mulch approaches on both sides of the stream, at least 25 ft. back.

**Funding for bridges provided by:**

- USDA Forest Service—Presumpscot River Watershed Redesign Grant
- USDA Forest Service—Enhancing Brook Trout Habitat Through Forest Management Redesign Grant.
- USFWS Gulf of Maine Coastal Program
- Maine Outdoor Heritage Fund

The Maine forest Service has partnered with several organizations to provide loaner steel and wooden skidder bridges at low or no cost to Maine loggers.

**Bridge Specs**

Steel bridges are made up of 3 panels and come in 20’ and 24’ lengths and are either 12 or 14’ wide. Wooden bridges are generally 16’ to 20’ long and come in various widths.

**Getting A Loaner Bridge**

Please reference the contact information in this pamphlet. Loan agreements vary depending on the organization loaning the bridge, but all require you to pick up and return the bridge. Some require a rental fee and/or deposit.

### Program Details

### Bridge Locations and Contacts

#### WOODEN BRIDGES

- **Dover-Foxcroft** – Piscataquis County Soil and Water Conservation District: Lynn Lubas, Ph. 207-564-2321
- **Dyer Brook** – Region Two/SACS: Rob Greenier, Ph. 207-694-7492
- **New Limerick** – LP Corp: Tim Richards, Ph. 207-694-8797
- **Oakfield** – Katahdin Cedar Log Homes: David Gordon, Ph. 207-757-9342 or 207-757-8278
- **Presque Isle** – Central Aroostook Soil and Water Conservation District: Dotty Dudley, Ph. 207-764-4153

#### STEEL BRIDGES

- **New Sharon** – Maine Forest Service: Julie Davenport, Ph. 207-592-2238
- **Old Town** – Maine Forest Service: Kenny Fergusson, Ph. 207-215-9092
- **Vassalboro** – Kennebec Soil and Water Conservation District: Dale Finseth, Ph. 207-622-7847 ext. 3
- **Waterford** – Oxford County Soil and Water Conservation District: Ph. 207-744-3111
- **West Paris** – Oxford County Soil and Water Conservation District: Ph. 207-744-3111
- **Windham** – Cumberland County Soil and Water Conservation District: Ph. 207-892-4700
- **Woodland** – Woodland Pulp: Steve Follette, Ph. 207-557-0482
