This is an image of a map titled "Statewide Standards for Timber Harvesting in the Shoreland Area". The map provides information on forested wetlands, drainage points, and buffer zones within the Bremen area. The map indicates different types of wetlands, drainage points, and buffer zones, with colors and symbols indicating various categories such as forested wetlands, non-forested wetlands, and buffers for various levels of protection.

Below the map, there is a note that reads: "This map is ADVISORY, for planning purposes only. Actual ground conditions and water body locations determine where and how MFS timber harvesting rules apply. Contact the MFS for additional information/assistance from a MFS Forester."
