Statewide Standards for Timber Harvesting in the Shoreland Area Map

Ground conditions and water body locations determine where and how MFS timber harvesting rules apply. Contact the MFS for additional information and assistance from a MFS Forest District Staffer.

Forest Operation Notification & Shoreland Area Map

Shoreline Integrity - Streams draining less than 300 acres, ponds and non-forested wetlands lie within a 75-foot buffer for development or construction. Shoreline Integrity also applies to UNMAPPED streams & wetlands.

Peterson Rd

Non-forested Wetlands Greater Than 10 acres Submerged, Floodplain
Emergent or Marine Wetland

Wetlands

Essential Wildlife Habitat
Least Tern, Roseate Tern, Piping Plover

Habitat

Drainage Points

300 Acre Drainage Point (25% of the 75-foot buffer)
25 Square Mile Drainage Point (start of the 250-feet buffer)

Forested Wetlands Bound by DRED Standards apply (WFNR at 600 feet)
SHPC - designated or designated

Buffers

490-foot Buffer Zone
Shoreline Integrity - streams draining less than 50 acres
Outside Wetlands
