

## Town of Islesboro Resilience Planning for Flooding from Storm Surge & SLR

Islesboro Ferry Landing

“The year the Narrows washed over.”

### PARTNER

The Island Institute

### PROJECT DESCRIPTION (Projected completed June 2017)

Using the most recent and detailed scientific data on storm surge and potential sea level rise, the Town will assess the vulnerability to flooding of two locations: 1) Grindle Point, the home of the Islesboro Ferry Terminal and 2) The Narrows, a narrow section of the island that separates the northern and southern sections of the town. This project will also produce a recommended set of adaptation actions to increase resilience of the infrastructure in these two locations. Ransom Consulting Engineers and Scientists was retained as the consultant for this effort.
