Lincoln County Regional Planning Commission
Wastewater Treatment Plant Coastal Hazard Resilience

PARTNERS
Towns of Boothbay Harbor, Boothbay and Southport, the Boothbay Harbor Sewer District and Maine Geological Survey.

PROJECT DESCRIPTION (completed December 2016)
The Wastewater Treatment Plant and several Pump Stations along the perimeter of Boothbay Harbor have been identified by the District as having the potential to be impacted by these coastal flooding, sea level rise, storm surge, and rainfall associated with extreme weather events. The District retained Wright-Pierce to assess potential impacts to the wastewater treatment facilities, and to evaluate adaptation strategies for mitigation of the potential impacts to increase resilience and decrease the risk to this important piece of the infrastructure.
