

Greater Portland Council of Governments - Falmouth Proactive Watershed Management

Mill Creek, Falmouth

PARTNERS

Town of Falmouth, Interlocal Stormwater Working Group, Falmouth Conservation Commission, and Maine Department of Environmental Protection

PROJECT DESCRIPTION (Anticipated completion November 2020)

This pro-active watershed planning project will evaluate existing data for watershed health (e.g., identify outliers and/or questionable data points); propose a list of metrics to serve as indicators of watershed health; establish thresholds for watershed metrics that measure or predict watershed health using scientific principles, as well as serve as a baseline for future planning efforts. This work will assist Falmouth to prioritize watershed management measures and to tailor those efforts to address the needs of each watershed, which will result in a case study to be shared with other municipalities.
