Most cases of EEE have been reported from Florida, Massachusetts, New York, and North Carolina. EEEV transmission is most common in and around freshwater hardwood swamps in the Atlantic and Gulf Coast states and the Great Lakes region.

Deer/Moose Blood Testing Shows Statewide Distribution of EEE virus.

Mosquito trapping sites proposed (2018) pending availability of federal funding. Colored dots indicate the organization responsible: MMCRI = Maine Medical Center Research Institute, DACF = Maine Department of Agriculture, Conservation and Forestry. Red indicates potential breeding habitat for EEE vector mosquitoes.
