

SPRAY ADJUVANT CONFIDENTIAL STATEMENT OF FORMULA (CSF)

Check Type(s): Basic Formulation Alternate Formulation¹ _____ Supplier's CSF for 100% Repack Supplier's CSF for Component(s)

Company Name on Application:	Product Name on Application ME Registration Number (if applicable):
Other Company Name (for 100% <u>repacks</u> or suppliers of <u>components</u>):	Product Name of Suppliers Product ME Registration Number (if applicable):

Principal Functioning Agents (PFA)

Function Statement on Label: _____

CAS Number	Chemical Name ²	Name of Supplier	Labeled Function Claim(s) - ASTM Term(s)	Percentage
				%
				%
				%
				%
				%
				%
				%
Total Percentage of PFA				%

¹ Alternative formulation (e.g. different CAS No. for PFA within same chemical class requires separate CSF) ² If a tradename is only known for a component, then a complete CSF is required from supplier.

Constituents Ineffective as Spray Adjuvants (CIASA)

CAS Number	Chemical Name ²	Name of Supplier	Purpose in Formulation	Percentage
				%
				%
				%
				%
				%
				%
				%
Total Percentage of CIASA				%
Total Percentage of All Ingredients Must Equal 100%				%

Name of Official and Company Name Certifying Formula (print):	Signature:	Date:
---	------------	-------

INSTRUCTIONS FOR COMPLETING AND SUBMITTING THE MAINE BPC SPRAY ADJUVANT CSF FORM

THIS FORM IS FOR USE ONLY BY SUPPLIERS working with registrants. Registrants must manually enter all CSF information for ingredients for which they have information; this form is for those situations in which registrants cannot access a supplier's ingredient information. The company listed on the application should coordinate with suppliers on proposed labeling claims and ensure they use the required forms. **IMPORTANT: Labeling statements are based on information provided on the CSF.** Suppliers of components or repacks should review all proposed labeling and claims with the registrant who is submitting an application for an adjuvant.

- **Product Name** is the brand name on the application, or the brand name of a spray adjuvant or component from a supplier.
- **Principal Functioning Agents (PFA)** – Includes all ingredients that are performing a function listed on the adjuvant label. If an individual ingredient or component does not directly perform a function listed on the adjuvant label, the ingredient must be listed as Constituents Ineffective as Spray Adjuvant (CIASA).
- **Constituents Ineffective as Spray Adjuvants** – Includes all other ingredients in the adjuvant formulation.
- **Common Chemical Name and Chemical Abstracts Service (CAS) Number** – Required for all ingredients. Enter the brand name of the primary product or name of the ingredient from the supplier when the applicant does not know the common chemical name(s) or CAS number(s).
- **Name of Supplier** – Required for 100% repacks, when a component is a mixture, or when using multiple suppliers and there are multiple CAS numbers within a chemical class. If one or more components will be obtained from more than one source, enter all alternate sources on the CSF or on a separate attachment.
- **Labeled Function Claim(s)** – The labeled function statement on the CSF and claimed on labels must be consistent with the terms defined by the ASTM International (ASTM) E1519 and/or E609, which is available at www.astm.org. Functions claimed on a label must be consistent with the functions on the CSF. If two or more functions are claimed, the functions must be listed in descending order (starting with the primary function). Maine BPC will determine the appropriate term(s) in the absence of an ASTM definition. Acidifier, antifoaming agent, and nonionic surfactant are examples of adjuvant functions.
- **Percentage** – List the nominal percentage for each ingredient in the formulation. Do not list a range of values.
- **Total Percentage of All Ingredients** – Must equal 100%.

How to Submit (Upload) CSFs in PDF format directly to the Maine BPC Portal

Use Maine's CSF Submission Portal <https://appengine.egov.com/apps/me/dacf/pesticidecsfportal> to upload CSFs supporting an application for a spray adjuvant. If you are a supplier (i.e. 100% repack or component) and are submitting your CSF in support of another company's registration application, use the "Notes" box on the portal form to record their company name and product name. Incomplete or missing information may result in a delay or denial of registration.
