 - P25 Alternatively, **suppliers** can login via SSO with their organization. **Needs clarification** – is this a typo as this is buyer portal response? Is there an SSO supported for suppliers?
 - P26 User role or roles tied to authorizations. Perimeter can limit visibility into certain departments' data or permissions.
 - EPROC-BPRT-8 – Daily summary of notifications not available.
- Need Identification – P27 *Options from home page: Create a Needs Request form; Create a Purchase Request - contract, non-contract, punch-out, non-catalog products, or for the procurement of services; Complete an Exemption Request; Create a sourcing event; Gather quotes; Create a Contract.*
 - **EPROC-Need-3 – Needs clarification** – Why is guided buying listed as a C? Is there not standard or configurable workflow?
- Request through Pay – starts with requisition; routes for budget; moves to sourcing event. Fully integrated process through requestion, purchase order, receipt and approval.
 - P32 – multiple methods of receipt input: PO; from scratch; EDI/cXML; OCR.
 - Integrates to ERP to trigger and record payment.
 - **EPROC-PC-1 thru -9 – Needs clarification** – status of pcard development.
 - EPROC-RC-21 – UOM conversion to set inventory as different from PO is configurable.
- Catalog Capability – items from multiple suppliers can be on the same PO.
 - CXML punchout; unlimited items; unlimited catalogs
 - Spot bid functionality EPROC-CAT-11
 - Supplier uploaded catalogs routes for approval to internal user.
 - P35 Ivalua also has the ability to search both punchout and hosted catalog in the same search. Through an API, external catalog results will be brought into the internal Ivalua catalog. This will provide the user with a single place to conduct a search, instead of having to punch out to the external catalog first.
- Sourcing/Bid Management – All RTM listed sourcing methods supported as standard or configurable.
 - P36 – Suppliers added to tab for solicitation notification in supplier tab manually; suppliers can be searched by any field in supplier database. (This will include supplier record details – contacts, performance, documents.)
 - P37 Documents tab can host unlimited attachments, e.g. T&Cs; workflows for documents and versioning; standardize for agency.
 - Sealed bid management blocks access by internal users until bid due date; time stamp on screen for auditability.
 - Pricing collected in system, p39; Templates permitted; modifications, new fields can be created; system calculates price savings against reference prices if included
 - Public portal for posting – recommendation to host solicitation on Ivalua, link with basic information from state or other sites to minimize integration effort.
 - **P39 – Needs clarification.** Public sourcing events allow any user without an account to view and respond to event within the Ivalua sourcing solution. How is user data captured and ongoing communication facilitated without a confirmed account? See EPROC-SRC-66 If these suppliers choose to respond they will be required to make an account in the system.
 - P43 During active solicitation, internal users can see activity of suppliers including participation, as well as email notifications received; Sealed bids content protected until closing date.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P44 Contract creation starts with award notifications and carries over solicitation/response fields to avoid duplicate re-entry of data.
 - **EPROC-SRC-35 – Needs clarification.** *This can be accomplished via configuration. For editing via Ivalua's Microsoft word authoring - **check-in/check-out is supported out of the box, but not for attachments only.** What does "not for attachments only" mean?*
 - EPROC-SRC-48 *Workflows can be designed by administrators using drag-and-drop capabilities. It is easy to develop tasks for human approval, or routing decisions based on business rules or factors such as threshold amounts*
Configuration will be required to ensure the workflow meets the needs of each organization
 - **EPROC-SRC-68 – Needs clarification** – Is eFax a roadmap item or does Ivalua plan to not support?
 - EPROC-SRC-76 – Posting all solicitation documents to state's public website is customization with high complexity. See earlier not for simpler recommended process.
 - EPROC-SRC-83 – No integrated video conference. Third party link can be inserted. Attachment can be uploaded.
 - EPROC-SRC-102 – Ivalua native plugins for third-party electronic signatures.
- Contract Management
 - P45 *The contract record within Ivalua captures all aspects of contract information, documentation, activity, and performance within the single record.*
The header tab of the contract captures the basic information about the contract brought over from the solicitation as well as manages any dates associated with the contract. Based on the dates that are set-up in the header of the contract, the system will automatically trigger reminders when the contract is nearing expiration.
 - Document management. P46 Within the document management capability, Ivalua has a built-in authoring tool that will allow users to write and redline contracts directly in the Ivalua solution. *All organization contract templates and clauses will be stored within the system that can then be easily pulled into the contract document. Legal users will have the ability to import or edit templates and clauses, when needed. Redlines are tracked from user to user with the ability to compare previous versions of the contract side by side. Ivalua also offers a native integration to Microsoft Word, so users redline in the Word can sync their version back to Ivalua.*
 - P47 Through the third parties tab, Ivalua can capture any subcontractors and distributors that are being used by the prime supplier on the event. They can define who the subcontractor is, their M/WBE status, as well as the amount of percentage of the total contract value the supplier is responsible for.
 - P48 system can also trigger a subcontractor report to prime suppliers. This allows them to report how much has been paid to their defined subcontractors in that period. The report is then routed through a workflow for approval.
 - EPROC-CNT-72 – Fee comparison. Marked as C, but comments say configuration. Is this code?
- Vendor Performance P49 *performance information is maintained within the supplier's profile for reporting, as well as can trigger alerts to users if a supplier is consistently performing poorly.*
 - Templates for performance assessments. Vendor score. *As evaluators respond to the supplier assessments, they will be able to add comments and attachments, where needed.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Improvement plans can be set up as collaboration tool to create tasks aimed at supplier improvement. Supplier and Internal user can both access.
- Purchasing/Data Analytics – 100 out of the box reports; ad hoc reports; SQL queries.
 - Analysis reports with data visualizations.
 - Three RTM requirements depending on completion of the Pcard functionality.

Technical Requirements

- Availability – 99.8% uptime. Monthly scheduled maintenance.
 - Service credit 5% for <99/8% increasing through levels to max of 25% for <85%. Credits applied against future prof. serv. Fees. No refunds unless <90 on contract.
- Accessibility Requirements – P55 *Ivalua is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance. Ivalua is committed to being Section 508-compliant (against WCAG 2.0 Level AA requirements) as soon as possible across all application pages.*
- Audit Trail and History – P56 *While a user is logged on, all actions and activities are registered, logged and time stamped. Every transaction created, every status change, every movement through to the next step in a workflow, every addition or deletion of a data item of any kind is part of this logging effort.*
- Browsers Supported – Common browsers – last 3 major releases; Explorer – only MS-supported.
- User Accounts and Administration – Role-based administration to access permitted sections of Ivalua environment.
 - User Authentication – Supported: Login / password authentication; Single Sign On (SSO) SAML 2 Web based authentication standard; Two-factor authentication; Reverse Proxy / IIS Agent based authentication (CA Single Sign On, formerly CA Site Minder)
- Federated Identity Management: SAML 2.0 protocols for Single Sign On. Single login for entire platform.
- Data Conversion - P59 *As part of the implementation, we will conduct a data assessment to determine the data requirements for the project and the Participating Entity. Based on this, a data strategy will be established identifying the data conversion scope for the project. Once the data strategy is completed, Ivalua and Participating Entity resources will leverage Ivalua's which are an open part of our User Interface to perform data transfers.*
 - *Once the Participating Entity has reviewed the approach and impact to the project scope, effort, timeline, and cost and signed off on the scope, a combination of Ivalua and Participating Entity resources will perform the data conversions.*
 - *EPROC-TECH – Date conversion legacy data supported except for Solicitation data in State's system and Vendor performance data.*
- Interface and Integration – P59 Synchronous and Asynchronous data transfers supported. Multiple communication protocols and data formats, including flat files, JSON, XML, cXML, OCI, IDOC (SAP)
 -
- Office Automation Integration – All file types supported as attachment.
 - Excel support across sourcing process.
 - Reporting tools natively export to Word, Excel and PDF
 - Contract tool imports Word documents.
 - Contract data can export Word and Pdf.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Mobile Device Support – P61 *Ivalua is a fully responsive HTML application; screens adjust to devices, e.g., on when using Ivalua on a mobile device the screen menus change for PC layout to Mobile-friendly layout.*
- Mobile Applications – Mobile solution runs on Webkit-enabled browser; no separate app.
- Data Ownership and Access – P61 *Customers remain the data owner and data controller of all data they place into their Ivalua instance and should apply access controls to restrict access to data within their instances based on their own requirements and needs, in accordance with their access control, data retention and data classification policies.*
Internally, Ivalua has its own data classification policy. All customer data is classified as Confidential and access to the environment where customer data is stored is limited to a small number of individuals on a need-to-know basis.
- Date Retention, Archive and Purge Considerations – P62 *Ivalua does not delete or modify customer data, unless requested by the customer to do so, and only processes data in accordance with its contractual obligations and the customer's configuration of their instance(s).*
- Disaster Recovery Plan – P62 *Ivalua BC and DR Program is based on ISO/IEC 22301 standard framework*
 - Documented backup and recovery procedures
 - Crisis/incident management procedures
 - Stakeholder communication processes
 - Replicated Web server and Application server; replicated database backups; redundant support services; contingency plan for hosting and ISP.
 - P63 *Ivalua notifies impacted customers of data breaches which Ivalua becomes aware of without undue delay, but within seventy-two (72) hours - unless a shorter time is specified in the contract*
- Solution Environments – Minimum 3 environments – Dev, Acc (test), Prod.
 - Training environment available. – add fee.
- Solution Technical Architecture – All customers environments isolated in enterprise grade cloud architecture. End users access Ivalua from web browser – no client software installation required. – 64-bit MS stack. Plus open standards REST, JavaScript, HTML, XML and JSON.
 - Database layer on servers in non-internet routable network segment – requests not made directly to database tier; only issue from customer's instance.
 - No commingling of customer data.
- Solution Network Architecture – All RTMs standard functionality.
 - P66 *Intrusion Detection System and Intrusion Prevention system (IDS/IPS), monitors and blocks malicious traffic or attack on network traffic traversing the device.*
 - *systems log unexpected network activity (volume of traffic, protocol anomaly, signature-based attack) and notify Ivalua IT staff in real time via emails and text messages.*
 - P67 *Equinix DC3 Data Center - Ashburn, VA (Primary, DR); CH3 Data Center - Elk Grove, IL (Primary, DR)*
 - *Ivalua also guarantees a Hosting SLA (hit response time, uptime) and can share a monthly report with the client upon request.*
- System Development Methodology - P67 *secure-SDLC policy and procedures that ensure security-related functions are covered during the development life cycle from design to implementation to testing. New features are evaluated for their security impact during the design phase, regular code reviews (peers and SAST tools) are conducted internally during the implementation phase and tested for effectiveness during the QA process.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *Ivalua's development process is based on the Agile methodology with its iterative approach to software development and assessment. This embeds Quality Assurance directly into the ongoing development process.*
 - *P68 Configuration Management Program for its Cloud services in accordance with NIST Security-Focused Configuration Management of Information Systems guidelines. Ivalua applies Security-focused Configuration Management for establishing baselines and for tracking, controlling, and managing many aspects of the secure lifecycle of all information system resources, configurations, and processes.*
 - *All application changes/updates are at the customer request and control, and they will be performed either behind the scenes (for minor updates) or through scheduled downtime (for major updates). Customers typically enforce their own change management process.*
- **Service Level Agreement** – Sample attached. 99.8% uptime. Monthly scheduled maintenance.
 - *Service credit 5% for <99/8% increasing through levels to max of 25% for <85%.Credits applied against future prof. serv. Fees. No refunds unless <90 on contract.*

Security Requirements

- **Cloud Security Alliance (CSA) Compliance** – CAIQ 3.0.1 provided (No unusual.)
 - *IAM-02.7 Ivalua doesn't share internal security metrics with customers. The termination control is tested as part of the SOC control and SOC report is provided to the customers upon request.*
- **Security and Privacy Controls-** **P69 Needs clarification** Ivalua is currently in the process of validating controls and safeguards against NIST SP 800-53 Revision 4 "Moderate" risk controls for FISMA compliance with our Commercial Cloud. **Is this complete?**
- **Security Certifications** - *Ivalua has implemented an Information Security Management System (ISMS) in accordance with ISO/IEC 27001. Ivalua is annually audited SSAE-18 SOC1 and SOC2 (US) and ISAE-3402 (Europe). Ivalua is also annually audited HIPAA and complies with business associates' requirements of the Privacy, Security, and Breach Notification Rules.*
 - *P70 Ivalua is not currently audited for PCI-DSS compliance. However, Ivalua has safeguards and security controls in place to protect cardholder data in accordance with the PCI-DSS standards and is leveraging its Hardware Security Module (HSM) infrastructure to manage cryptographic keys used to secure cardholder data.*
 - *Ivalua is FedRAMP Ready with our GovCloud and listed on the FedRAMP Marketplace.*
- **Annual Security Plan** – *P71 Ivalua has built its security program and implemented an Information Security Management System (ISMS) in accordance with ISO-27001. The security controls deployed are in alignment with ISO/IEC 27001 and NIST SP 800-53 "Moderate" baseline requirements to address the information security risks. We are certified SSAE-18 (US) and ISAE-3402 (Europe).*
 - *Ivalua enforces the principle of least privilege across the entire organization. Role-based access control at directory and application levels and firewall rules are used to manage access.*
 - *Only users with the appropriate profile can load a page or execute a function. It is also possible to limit the data access of business objects on a per user basis.*
 - *Ivalua Solution architecture leverages a multi-instance tenancy model on shared servers. Our model creates a very distinct boundary between the data of each client.*
 - *Ivalua invests a large number of resources to get itself audited by a 3rd party auditor against the SOC and HIPAA security frameworks. Every year it produces a report that is shared with its customers, upon request.*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *5-stage incident response: Preparation; Detection and analysis; containment, eradication and recovery; post-incident activity; communication.*
 - *Ivalua applies a single data classification to all customer data it hosts. Ivalua does not inspect or monitor its customers' data and has no ability to understand how any data may have been classified by individual customers.*
 - *Ivalua has implemented numerous privacy and security practices to ensure Ivalua compliance with the GDPR.*
- Secure Application and Network Environment – Equipment hardened; proactive network security. See architecture above.
 - P77 Data at-rest and in-transit is encrypted using the industry-standard AES 256-bit encryption. Ivalua Cloud infrastructure where client data are stored, processed, and transmitted:
 - The web traffic between the end-users and the servers is encrypted using TLS (HTTPS). Ivalua SSL X.509 CA certificates are generated with RSA 2048 key size and SHA-256.
 - P78 *In Ivalua's infrastructure, managed devices (switches, routers, firewalls) and services communicate their activity logs to two different servers, located in two geographically distant data centers.*
 - *While a user is logged on, all actions and activities are registered, logged and time stamped. Every transaction created, every status change, every movement through to the next step in a workflow, every addition or deletion of a data item of any kind is part of this logging effort. As a result, the system can produce a detailed audit trail of exactly who did what, where and when. This audit trail can be produced in reports on a real-time basis.*
 - DLP strategy includes an administrative policy around removable media and data loss prevention.
- Secure Application and Network Access
 - P81 *Each client application instance runs under a dedicated application pool process with a client dedicated identity. This model also facilitates the ability to perform upgrades and maintenance on an individual basis without impacting other clients' instances. This model enables higher instance availability.*
- Data Security – See above. All narrative in this section has been stated in other areas.
- Personally Identifiable Information Protection – P85 *Ivalua has implemented numerous privacy and security practices to ensure Ivalua compliance with the GDPR.*
 - *Customers may configure access to PII such that customer-defined roles have access to PII within the Ivalua platform. When providing customer support, Ivalua may have access to PII data.*
 - *Ivalua is also annually audited for HIPAA and complies with business associates' requirements of the Privacy, Security, and Breach Notification Rules.*
- Security/Privacy Issue Occurrence - *reporting obligations are set forth in Ivalua's customer contract. In the absence of a contractual requirement, in the event of any breach of PII, the customer will be notified without undue delay but no later than 72 hours.*
- PII Data Actual/Attempted Access or Disclosure – See previous
- Security Breach Reporting – See previous

Implementation Services Requirements

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Project Management – Semi-Agile approach: MOBILIZE; EXPLORE/DESIGN; BUILD/CONFIGURATION; TEST; DEPLOY/GO-LIVE; RUN
 - P88 *Ivalua will support project management activities for Project Planning, Tracking and Reporting.*
 - P89 Detailed expectations of customer personnel resources and time commitment.
 - P90 – Sample project plan provided.
- Project Implementation Methodology – P91 *based on the principles of rapid deployment and prototyping*
 - *End-users are involved in both mockup and configuration of their system. This accelerates their understanding of what is possible and allows them to refine their requirements to what is most needed*
 - *During the Build phase of a project, each configuration change (driven by the requirements collected during the design phase) is unit tested by the configurator. Once the Build phase is over, and before User Acceptance Testing starts, our Quality Assurance team reviews and tests the entire application build to make sure that all the pieces come together without defects, and as per the approved design.*
 - *Code changes are extremely limited (and restricted to Ivalua certified engineers only), submitted to validation internally, and if approved, will have to go through a peer code-review process before being delivered on a client' environment*
- Catalog Support Services – Two phases. Suppliers or buyer load catalogs; Data approved by buyers.
 - **Needs clarification –** Does Ivalua provide implementation support?
 - P 92 *In the event that our customer requires additional catalog support services, Ivalua can leverage our partner ecosystem to provide these services including:*
 - *Providing assessments to identify and prioritize contracts as potential for hosted catalog or punchout;*
 - *Creation of hosted catalogs;*
 - *Setup/configuration of punchout sites;*
 - *Identification and setup of commercial retail online marketplaces;*
 - *On/off-boarding of Suppliers to prepare them to manage catalog content; and*
 - *Training customer staff to assume catalog/punchout management roles.*
- Data Conversion Services – **Needs clarification – p92** *does Ivalua provide data conversion assistance during implementation?*
- Interface/Integration Development Services
 - P93 *The approach is to map Participating Entity's data to Ivalua data. Specific interfaces are configured (no coding), the configuration of interfaces is part of the integration toolbox resulting in micro integration workflows supporting open protocols and data formats. The approach is to select one of the predefined integration templates appropriate for the business object, map the data items, configure the protocols and data format.*
 - *Ivalua will assign an Integration Lead to work with Participating Entity's team to perform a technical assessment to identify all required interfaces and integrations.*
 - *Ivalua project methodology, design, configuration, testing, and implementation of the interfaces and integrations will be performed.*
- Organizational Change Management (OCM Services) - P94 *change management and custom training services, including Change Management and Custom Training development (Instructor led training, Train-the-trainer, Web-based recording, and Quick Reference Guides (QRGs)).*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 2:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Leadership/Stakeholder Engagement; Change Impact Assessment; Change Readiness; Training (Web-based, Instructor-led; Instructor guides for trainers; training exercises; quick ref guides; simulations) Streamlined communications strategy.
- Training Services
 - Robust e-learning program for customers, partners and staff to learn at own pace – Ivalua Academy with Ivalua Certification.
 - Key User training; Administrator Training; Technical training – multiday on the Standard Ivalua platform (not configured instances.)
 - Custom-training: Web-based, Instructor-led; Instructor guides for trainers; training exercises; quick ref guides; simulations
- Help Desk Services – SaaS subscription includes Technical support level 3 for standard product and configured customer applications. Responsibility – maintenance releases, defect requests, product questions.
 - Optional: Help-desks for End users (level 1), suppliers (level1) , Administrators configuration support. – Phone, Email
 - Level 2 redirect if needs. 90% resolution within 1 hour.
 - EPROC_IMPL-3 and -4 – No live chat available.
 - EPROC_IMPL-5 – Ivalua Extranet ticket system can be viewed by customer, but does not integrate to customer's ticket help system.
 - Needs clarification: Do registered suppliers/registering suppliers have access to Ivalua helpdesks without state paying for additional helpdesk, or is state accepting all supplier support role? F4 indicates additional catalog support services not anticipated beyond go-live.
- On-site stabilization. Hypercare – 3 months. Monitor rollout; triage and support high-priority tickets; adjust configuration, defects. Focus on end-user adoption; transition to state support team and Ivalua Run team.

Managed Services Requirements

- Solution Support – Repeat of description of infrastructure, SLA and environments.
 - SDLC policy and development and testing plans for rollout explained.
 - Testing has 4 levels: Manual tests and code reviews; load and performance testing; functional testing; regression and automated testing.
 - Repeat of contracted level 3 support and optional level 1 supports.
- Organizational Change Management (OCM Services) – P 103 See implementation. Additional OCM not anticipated.
- Training Services P 103 See implementation. Additional OCM not anticipated.
- Catalog support services. P 103 See implementation. Additional OCM not anticipated.
- Help Desk Services – Needs clarification: Is this helpdesk in F5 the added cost Level 1 help Desk?
- Transition Out Assistance Services
 - P105_ Upon termination of the contract, Ivalua retains processed data and files for a limited period of time in accordance with the contract. We then delete the client online files (skipping the file trash). When the physical servers are terminated, media is destroyed, except for encrypted data in archived storage (which is destroyed in accordance with Ivalua's data retention schedule). Ivalua follows NIST 800-88 Media Sanitization guidelines.
 - Ivalua to work with customer on transition needs – no specific commitment. Customers can self-extract or request Ivalua help to extract data.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 2-7)

- KPMG LLP is the US firm of the KPMG global organization with 40K+ professionals with “1,200 dedicated procurement professionals” the “bring the state and local government domain knowledge”.
- Have “successfully delivered the proposed Ivalua solution to the States of Arizona, Ohio, Alabama, Vermont” and local governments included “City of New York, Caltrans, Teachers Retirement System of Texas”.
- “Featured in Spend Matters’ Top 50 Providers to Know Almanac”.
- “Designated as a ‘Leader’ in Gartner’s Magic Quadrant for Business Operations Consulting”.
- Services support “targeted improvements as well as implementing full-scale procurement transformation solutions”.
- “Have particular depth in helping optimize ‘Source-to-Pay’ processes”.
- “Have delivered 300+ cloud eProcurement projects” implementation”
- 400+ Source-to-Pay assessments and efficiency improvement projects completed”
- “Lessons learned” from “Ohio, Arizona, Alabama, Vermont and others will be leveraged”
- “KPMG and Ivalua have been working together since 2013”.
- “Powered Enterprise approach” delivers “on Day One an out-of-the-box, preconfigured solution based on a leading business practice target” which “can help accelerate the transformation and change process”.

2. Previous Projects

- **State of Ohio:** (pg. 9-11)
 - i. Source-to-Pay implementation, “supplier management, catalogs, sourcing, quote management, contract authoring and management, purchasing, invoice management, expense management, savings tracking, and spend analytics”.
Full Suite eProcurement implementation.
 - ii. Batch Interfaces and Realtime /Integrations with PeopleSoft: Org Structure, Users, Chart of Accounts, Thresholds, Controlling Board, UOM, Payment Methods/Terms, Commodity Code, SSO, Addersses, Suppliers, Contracts, eSignature, Catalogs, Budget Validation, Purchase Orders, Change Orders and Invoices.
 - iii. 3 releases: eMarketplace/Supplier Management, Procure-to-Pay, and Source-to-Contract. Conversions: 50K users, 4K Orgs, 150K Suppliers, 2K Addresses,

1.5K Contracts and 30 Catalogs. Project started 9/7/2018, R1 Go-Live 12/17/2018, R2 Go-Live: 12/4/2019 and R3 Go-Live:

- iv. Train-the-Trainer approach with “25+ instructor-led courses” delivered “both onsite and virtually” and provided webinars. Provided user manuals, job aids, interactive web-based training courses and microlearning videos. 11/2/2020.

- **State of Arizona:** (pg. 11)
 - i. Source-to-Pay... *Full Suite eProcurement implementation.*
 - ii. “35+ Integrations/Interfaces” with CGI Advantage for Vendor, Requisitions, Purchase Orders, Receipts, Invoices, Master Data and Inventory.
 - iii. Project dates: Nov 2017 to Feb 2019
- **State of Alabama:** (pg. 11/12)
 - i. Source-to-Pay... *Full Suite eProcurement implementation.*
 - ii. “50+ Integrations/Interfaces” with CGI Advantage for Suppliers, Chart of Accounts, Budget Validation, Purchase Orders and Invoices.
 - iii. Migrated 15K+ suppliers and 1.5K+ contracts.
 - iv. Created “localization template to bring additional agencies and state entities onto the Ivalua platform”.
 - v. Project dates: March 2020, on-going. Go-Live June 2021.
- **Teachers Retirement System of Texas:** (pg. 12/13)
 - i. Source-to-Pay implementation, Supplier Mgmt, Purchase Request/intake, Sourcing, Contract Authoring/Mgmt, KPMG cognitive contract mgmt tool, Purchase/Change Order, Invoicing, Payment and Reporting.
 - ii. Inbound/Outbound interfaces with PeopleSoft: Contracts, Supplier, Account codes, Fund, Depts, PCA, Budget, Invoice OK to pay, Payment info, Users, SSO, DocuSign and auditing.
 - iii. Train-the-Trainer sessions: instructor-led, web-based with quick ref guides.
 - iv. Project dates: Sept 2020 to April 2021, Go-Live Jan 2021
- **CalTrans:** (pg. 13)
 - i. Supplier and Contract management mentioned but full list of Ivalua modules that were implemented not listed .
 - ii. Migrated contracts
 - iii. Train-the-Trainer w/quick ref. guides.
 - iv. Project dates: Sept 2020 to April 2021, Go-Live Jan 2021

3. Subcontractors

- **Ivalua:** (pg. 15)
 - i. First Source-to-Pay SaaS client in 2006
 - ii. “First wave of U.S. clients beginning in 2013”.
 - iii. Ivalua Professional Services will be a subcontractor to KPMG to implement the Ivalua integrated solution”.
 - iv. KPMG will lead project implementation. Ivalua will “provide platform-level engineering support”.

4. Organizational Chart

- Org chart does reflect a project implementation with State, KPMG and Ivalua roles identified. While high level, the chart does reflect the core/key roles. (pg. 18)
- The Role/Responsibilities table identifies the primary responsibilities for only the KPMG resources. Does not address Ivalua or State positions. (pg. 19-21).

5. Litigation (pg. 23)

- "Have no pending litigation that would materially affect the firm's operations or our ability to perform services for you".
- "KPMG is not aware of any significant issues relating to client contracts, or any terminations of those contracts, which would interfere with KPMG's ability to successfully perform the services contemplated".

6. Financial Viability (pg. 25-29)

- Total revenue for fiscal year ending Sept. 2020 was "\$9.6 billion"
- KPMG's outstanding debt rating by the National Association of Insurance Commissioners is "NAIC-1", the "highest credit quality ranking on the NAIC ratings scale".
- Only provided 2 of the 3 required recent year Audit reports.

INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

Introduction – pg. 2

- "KPMG/Ivalua can implement the desired eProcurement functionality as individual workstream packages or as a combination of workstream packages"

KPMG Exceptions to Master Agreement, pg. 195-223: Need review by Maine and NASPO ValuePoint

- 31 exceptions to Maine T&Cs
- 28 exceptions to the NASPO ValuePoint T&Cs
- Added terms for Help Desk and Managed Services:
 - o Definitions
 - o Provider Services Personnel
 - o Term and Termination
 - o Disclaimer and Limitation of Liability
 - o Indemnification
 - o Cooperation; Use of information and State Materials.

KPMG Assumptions, pg. 182-189:

- **General**, pg. 183/184
 - o 1st bullet: Participating Entities will "contract directly with the eProcurement Solution provider for the software licenses and with KPMG for implementation services". CONCERN, this may not be possible with some States or other Participating Entities based on their laws.
 - o 4th bullet: pricing is "subject to five percent year-over-year increase". CONCERN, not all Participating Entities can agree to an automatic price increase. In some cases they may need to use a Term/Condition for price increases based on an index instead. NEGOTIATION, suggest negotiating this.
 - o 7th bullet: "KPMG assumes up to 25% travel". NOTE, pricing reflects this amount of travel expense. NEGOTIATION, suggest having a means to reduce costs if a particular project does not need this much KPMG travel.
 - o 14th bullet: WEAKNESS... KPMG "may not be permitted to participate in a NASPO ValuePoint Administrative Fee or a State imposed administrative fee under this contract"
- **Project Related**, pg. 184-186
 - o 1st bullet: Fixed prices assume implementation periods of Small State=12 months, Medium State=15 months & Large State=24 months. CONCERN, this may make the

**STATE OF MAINE

SME DEPARTMENT/STATE: NASPO

prices between proposals not be comparable. Also, the time period for Small and Medium is too short.

- 2nd bullet: "Implementation plans provided assume 15 pilot agencies during each implementation. Any additional agencies/localization is out of scope and may be contracted by your organization as a change order." CONCERN, it is unrealistic to have assumed the same number of agencies for each size of State. So the pricing is not realistic and also not going to be comparable to other proposals.
- 9th bullet: "any modifications to the out of the box functionality requiring custom code" is limited to only situations where there are "statutory requirements". CONCERN, there may be RFP/RTM req'ts that end up requiring "custom code" so suggest getting this language modified to include any changes necessary to comply with RFP/RTM req'ts. NOTE, this assumption is repeated under reports (10th bullet, pg. 188)
- 13th bullet: "Client will procure five environments". CONCERN, on pg. 63, Solution Environments" it refers to 3 environments. Need to CLARIFY what is included in the pricing.
- 15th bullet "up to three supplier management questionnaires" will be configured. NEGOTIATION, suggest getting this number increased to five for Medium and Large State implementations.
- 16th bullet: "will configure up to five contract templates". NEGOTIATION, suggest getting this number increased to ten for Medium and Large State implementations.
- 17th bullet: "maximum of 25 configured fields". NEGOTIATION, suggest getting this number increased to 50 for Medium and Large State implementations.
- 19th bullet: "eProcurement system is considered the system of record for eProcurement supplier information". CONCERN, some Participating Entities may have to have the Finance System be the system of record, depends on the implementation. Suggest NEGOTIATING to strike this assumption.
- 24th bullet: "During hypercare" the Participating Entity will "perform Tier 1 support". "KPMG will act as Tier 2 support" and Ivalua "will act as Tier 3 support". NOTE, need to check this against the narrative regarding Implementation Services HELP DESK.

- **Help Desk/Managed Services** (pg. 186-187)

- 1st bullet: Participating Entities will be limited to 25 users that can submit tickets to the KPMG Service Desk. NEGOTIATIONS, suggest increasing this number for Medium and Large States.
- 3rd bullet: On-going help desk services assumes that the Participating Entity will provide "Tier 1 support". NOTE, need to check this against the narrative regarding Managed Services HELP DESK.
- 6th bullet: "assumes approximately 1% of the users will call/day with an average call duration lasting between 10 to 20 minutes". CONCERN, what about support for Suppliers? Are the considered "users"?
- 7th bullet: "20 to 35 calls/analyst/day is assumed (8:00 AM to 5:00 pm local time)". CONCERN, unclear how this metric fits with the "1% of the users" in the previous bullet. Also, what is meant by "local time"? Also, same question as previous bullet regarding Suppliers.
- 9th bullet: End-user support numbers. WEAKNESS
 - the "Total end-users" count does not match the Cost Workbook req'ts.
 - The "At Go-live" numbers are too low

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “Ramp-up” numbers based on quarters along with the implementation plan months in the Projects assumptions means Large doesn’t get to 8000 users until end of 3rd year of implementation and just past 2 years for Medium and Small. This is not realistic.
- 10th bullet: WEAKNESS, Supplier support numbers for “Total Suppliers” should be 50,000 for each size State according to the Cost Workbook req’ts. Also the numbers are too low for “At Go-live”.
- 13TH bullet: SLA metrics.
 - KPMG is only agreeing to two of the 10 Production SLAs, Catalog Onboarding/Maintenance and External Sources Onboarding.
 - KPMG is not agreeing to any of the Implementation SLAs
 - Ivalua is responsible any other SLAs and according to the Service Level Agreement section (pg. 69) they have their own “hosting and maintenance SLA”.
 -
- **Reports/Conversion/Interfaces**, pg. 187/188
 - 1st bullet: Limits the number of reports for each size of State. NEGOTIATION, suggest increasing to at least twice the listed numbers.
 - 16th bullet, pg.188: “only active suppliers, purchase orders, and contracts will be converted/moved”. NOTE, this conflicts with Implementation Req’ts Data Conversion Services, pg. 120-128, which states the “preliminary recommendation of the data conversions based on the req’ts state in the RFP” includes In-process Requisitions, Approve Requisitions, Purchase Orders Transactions, Solicitation Data, Contract Data, Vendor Performance Data, User Account Data, Chart of Accounts Data and Historical Spend Data.
 - 10TH BULLET: “any modifications to the out of the box functionality requiring custom code” is limited to only situations where there are “statutory requirements”. CONCERN, there may be RFP/RTM req’ts that end up requiring “custom code” so suggest getting this language modified to include any changes necessary to comply with RFP/RTM req’ts.
- **OCM/Training**, pg. 188/189
 - 4th bullet: Client required to do “analysis of historic purchasing data...” NEED TO CHECK OCM SECTION TO SEE IF THIS ANALYSIS IS INCLUDED.
 - 5TH bullet: KPMG will leverage your organization’s current Learning Management System”. CONCERN, there will be some Participating Entities that do not have LMS’s. What will the impact be?
 - 7th bullet: Limits the number of “Client end users”, “Key Technical Resources” and “Help Desk Administrators” to be trained. NEGOTIATIONS, suggest that getting these numbers increased.
 - 8th bullet: TTT is limited to not “exceed three weeks”. WEAKNESS, this is too short a timeframe to learn the entire system and it will not fit into a phased implementation where training is divided among the phases.

General Principal and Requirements *(note parts 1-5 narrative are same as Ivalua proposal)*

Key Solution Functionality Elements, pg. 4-7:

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Single Point of Entry: "has a single landing page when a user logs in. At this point user/profile-specific content is displayed." (pg. 4)
- Smart Routing: "Workflow routing is attached to any object in the system". "determine the workflow routing based on business rules for each object." (pg. 4/5)
- Compliance: "Ivalua understands that each organization has their own procurement code they must follow". System has the "flexibility to tailor the solution to meet the needs of individual public organizations" with a "robust configuration layer that allows organizations to add new fields, tailor business rules, add alerts, and managed workflow for your organization". (pg. 5)
- Portal: "they will have one place to manage all their activity and actions throughout the procurement lifecycle". "configurable homepage dashboards, users will be able to quickly see and take action on pending tasks. They will also have the ability to personalize this page to meet their needs". "collaboration tools such as internal blogs, discussion forums, and comments through the process". (pg. 5)
- Open Marketplace Environment: "find it no matter if it is from an internal catalog or an external supplier catalog". "accommodates hosted catalogs (catalogs managed by the organization), punchout catalogs (catalogs managed by retail sites)". "powerful search 360 functionality" which allows "search hosted and punchout catalogs side by side". (pg. 6)
- Integration: "robust integration toolbox capable of connecting with multiple ERP solutions, third-party data providers, suppliers' systems and so on.". "multiple format options (cXML, XML, SAP Idocs, XLS(x), DOC(x), CSV, AS2, etc.) and in multiple protocols (manual load, batch load, EDI, SFTP, HTTP, etc.)". "includes hundreds of data mapping formats and standard integration templates". (pg. 6)
- Workflow: "workflow allows for easy work queue / process management and rule-based assignments.". "Client administrators are given latitude within the tool to adjust approval thresholds and approval assignments without needing to configure". (pg. 6)
- "over 50 different controls per workflow step including even the specific notification methods and addressees and "callback" support that can be used to invoke scripted actions like integration web services calls or cross-workflow signaling ". (pg. 6)
- Document Management: "functionality based on a common data model and a unified code base across all source-to-pay solutions". "consistent access to every data element, workflow element, supplier record, document management, UI functionality, and automation component."
- Reporting: "have an analytics layer across all our solution areas (source-to-pay) with numerous out of the box reports and dashboards as well as easy capabilities for users to create their own reports / dashboard". "users can save their personal reports within their own dashboard as well as share with others, as necessary." (pg. 7)
- Configurable: "Coding is not required to make changes to tailor the solution to meet the needs of each client." Create new fields, Change field names, Add tooltips/watermarks/regex, Conditional logic on fields, Mandatory fields, Tailored workflows, contract templates, standard documents. (pg. 7)
- Transparency: "public portal allows for suppliers or concerned parties without an account to view all aspects of the procurement process within the solution". "public portal allows for suppliers or concerned parties without an account to view all aspects of the procurement process within the solution." (pg. 7)

User Experience, pg. 8/9 : - Response did not address "Wizard-driven capabilities", "Mobile access/use" or "Workload management" to re-assign work.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "Homepages are unique per profile, but also can be configured by the individual user." "includes quick links and shortcuts to frequently used objects."
- "access their pending workflow tasks directly from their home screen"
- "Each user is given one or multiple roles in the system which is tied to a series of authorizations. These authorizations will dictate what the users can see and do within the solution."
- "Users can also mass reassign their workflow tasks to other users using the delegate function"
- "Users or administrators can also set-up out of office forwarding for users."

Bidder Best Practices and Roadmap, pg. 9-11: Did not address "constantly assess and recommend opportunities to reduce costs".

- New Releases: "Major Software Product releases are delivered by the Ivalua R&D division twice a year." "Multi-instance SaaS, "client to decide which major version to choose" and "when to upgrade". "Activable Features which enables customers to take advantage of new innovations in their versions without needing to upgrade"
- Latest Technologies: "specific standards that our platform should adhere to for a specific industry, for example, we achieved the security status of being FedRAMP Ready due to our work in the US Public Sector". "leverage advanced technologies such as machine learning, natural language processing (NLP) and more."
- Timely Updates: "Once a customer decides to schedule an upgrade, together with a dedicated upgrade support team, the customer success manager, and our R&D team, we work to ensure that upgrades happen in the timeframe laid out."
- Alternate Approaches: "we have built up significant in-house knowledge on best practices within the public sector". "During the implementation phase, Ivalua together with our partner community will always be there to guide customers towards better, more effective solutions, processes, and approaches, based on our experience." "customers themselves have a high degree of ownership over the solution, to be able to make changes and evolve as needed, without having to rely on us or our partners".
- Roadmap: "We have a dedicated Public Sector team that interfaces with R&D to ensure necessary and innovative Public Sector requirements and functionality are prominently featured on the roadmap.". "Key areas of investment are focused on":
 - o Enhance Mobile experience: Already have "Progressive Web Apps" for "workflow actions, notifications/alerts and more capabilities". "year to improve and enhance this around contracts, invoicing, supplier mobile capabilities. "
 - o Invoice/Payments: "Enabling the ability to execute payments within Ivalua"
 - o AI powered Contract Lifecycle Mgmt: "leveraging AI" for a "more guided, collaborative, and intelligent experience".
 - o Supplier Risk/Performance: add new features to existing capabilities.
 - o Security: Already FedRAMP. "evaluate additional threats and standards (like StateRAMP) to ensure...pursuing the appropriate certifications"

Innovations and Value-Added Features/Services, pg. 11-13:

- Help Desk, pg. 13/14: Level 1 help desk for suppliers/internal users. CONCERN, response refers to Help Desk as "not contemplated in the RFP" however there are specific req'ts for this in Implementation Services and Managed Services.
- Advanced Services Procurement, pg 14: Contingent labor purchasing. "external labor with an efficient engagement and follow-up channel". "Talent channels... selection process". "compliance with policies/legislation... secure re-engagement process". "full visibility of service

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

quality... full visibility of service quality". Monitor through "alerts, timesheet, and milestone approvals. "

- o Service profile RFx types
 - o Configurable profile seniority
 - o Configurable working duration
 - o Work assignment
 - o Time/Material purchase request
 - o Timesheet receiving (hours, days, percentage)
- Expenses, pg. 12: "Expense Stream handles the flow of claims and their images into the Payables team"
- Vendor Master Management (VMM), pg. 13) "capture, cleanse and maintain clean and accurate supplier master data" "solution can integrate with various ERPs to consume, aggregate and cleanse data using smart deduplication and merge capabilities before redeploying the pristine and accurate data back to those systems." **NOTE:** unclear how this VMM is different from the 'in-scope' Vendor Enablement and vendor integration work req'd in the RFP.

Customizations/Extensions, pg. 13:

- "Ivalua SaaS platform relies on configuration, not custom code"
- "Ivalua does not make coding customizations specific to individual clients; all coding changes on the Ivalua platform are part of their release cycle and are by definition part of the baseline product"
- "Ivalua maintains a copy of the organization's Ivalua instance." "upgrades are first applied to that solution, then will be tested, and released, and are subject to the entire cycle of testing, approvals, and quality assurance that is part of our Software Development Life Cycle (SDLC)."

Alternative Funding Models, pg. 13/14 :

- "numbers below are representational only". "additional due diligence with each participating entity... to discuss actual ranges".
- **Options 1 Hybrid Fixed Fee plus transaction-based funding model**
 - o "Participating Entity pay a reduced fixed fee and finance a portion of the program cost through a transaction fee-based funding model"
 - o "Fixed Fee payment reduced 50-75%". "fees would be decreased from our original estimate, by an amount to be agreed"
 - o Transaction Fee of 1-3%" added to "every purchase order processed"
 - o "KPMG would need to recover not only the proposed project cost, but, in addition the cost of capital for the deferred collections"
- **Option 2 Value-Based Funding Model** - NOTE this model is about the Participating Entity identifying internal savings and taking these savings from the organizations that experienced them as funds to pay for the system.
 - o "self-funding or value-based funding model with limited cost to the State"
 - o "would eliminate the initial State funding of the program". "would require a different implementation roadmap focused on delivering value rapidly"
 - o "savings that can be leveraged to create a source of funding"

Contract Transition and Flexibility, pg. 15:

- "we will work with the participating entity to assess the above and other factors and mutually agree to transition"

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Functional Requirements - *(note this entire section and the RTM are the same as the Ivalua proposal)*

General Functionality, pg. 17:

- "Source-to-Pay suite in the market which includes Public Portal, Supplier Risk & Performance Management, Sourcing, Contract Management and P2P processes, standard integrations and extensive system administration and reporting capabilities"

RTM

- "POTENTIAL WEAKNESS, GEN-15: Transaction print formats are based on "the layout of the screen" and to have "additional templates" for printing format requires "additional effort".

Supplier Portal, pg. 17/18:

- "free supplier portal where suppliers may perform self-registration and other activities with their customers"
- "have unlimited suppliers with unlimited users registered to do business"
- "register with basic information such as their tax identification number, email address, and company name to establish an account" then they "will have access to their supplier portal" to "manage all their activity with the organization from an integrated location"
 - o Manage their account information, user roles & users
 - o Submit contract usage reports
 - o Respond to sourcing events
 - o Manage/redline contracts
 - o Upload catalogs
 - o View orders
 - o Create advanced shipping notices
 - o Create invoices
 - o View their performance
 - o Collaborate on improvement plans

RTM

- Meets req'ts
- One req't needs clarification.

Supplier Enablement/Management, pg. 19-25:

- NOTE, registration is a two step process. Create basic account for one user, then that Admin user needs to log into the system to set up user roles, other users and complete the rest of their registration information that will be needed to create a supplier record in the finance system and award Contracts/POs to the supplier. Primary capabilities of a Basic registration allows them to managed their account and bid.
- "conditional logic can be utilized to tailor the registration page to specific information required by type – such as US vs. non-US"
- "Fields captured through the registration process will be tailored to your needs"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "submits their registration it is processed through an automated workflow". "workflow process and acceptance/rejection criteria will be established by each client"
- STRENGTH: "onboarding progress tracker" provides "quick view into the remaining items required to complete their activation" (pg. 21)
- Integrations "to external systems in batch processes or in real-time to verify profile information or bring in data from external sources"
- Can "maintain and store documents within their profile"(account). "organization can specify specific documents that are required by the supplier to complete their enrollment" (pg. 22)
- "system can track expiration dates of the documents and trigger reminders to both internal and supplier users when those documents are nearing their expiration" (pg. 22)
- "internal users will also be able to manage the supplier's information, activity, risk, as well as their performance" (pg. 24)
- Suppliers update their accounts by submitting a 'Change Request' (pg. 25)
 - o Change requests are auditable/trackable down to the field level
 - o Can be routed to the workflow for internal approval

RTM

- WEAKNESS, VDR-15: Duplicate registrations are not prevented at the time of registration. They are identified as part of workflow, if auto rejected, vendor is notified after the fact, not while completing the registration. Otherwise the State must resolve the duplicate.
- POTENTIAL WEAKNESS, VDR-19, 20 & 24-27: State will have to license the 3rd party system for validating IRS TIN/Name.
- POTENTIAL WEAKNESS, VDR-39: Response seems to indicate a "score carding" feature which may not provide the automated performance reporting on the metrics identified in this requirement.
- Two req'ts need clarification.

Buyer Portal, pg. 25-28:

- "Once the user login they will be directed to their homepage" which has dashboard that is unique to the user based on their role.
- "users can also add new aspects to their homepage or rearrange the webparts on the screen"
- Users are "given one or multiple roles" which has "authorizations" that "dictate what the user can see and do".
- Users also assigned a "perimeter, which corresponds to the agencies/departments/division they support and/or the commodities they support" which will "further limit the user's view into on seeing or editing objects".

RTM

- STRENGTH, BPRT-4: The capability to for users to be able to "change the layout and reports" on their dashboard is a significant benefit to users.
- One req't needs clarification.

Need Identification, pg. 28:

- "provides users the ability to initiate any procurement action from a single spot through the platform."

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “provides a powerful and flexible workflow engine that not only invokes approval flows, but also provides the ability to invoke processes” that “invoke business processes allows procurement policies and regulations to become part of workflow”
- “will guide the end user to begin any type of procurement activity by clearly identifying and outlining the process and steps that need to be taken”

RTM

- Meets req'ts
- Two req'ts need clarification.

Request through Pay, pg. 29-32: NOTE, response did not address the req't for "access to external retail marketplace products".

- “All purchases within the Ivalua solution will begin from a purchase request within the tool”
- “Requests can accommodate multiple types of requests ranging from goods and services, as well as deliverable-based purchases and subscriptions”
- **STRENGTH:** purchase requests include an “Internal blog to communicate with stakeholders” (pg. 28)
- **Workflow** (pg. 29)
 - o “uses a combination of algorithms and user approval to navigate through the approvals”. “define conditional logic to determine when and who should be approving each requisition”
 - o “can also trigger different workflows to accommodate for varying business processes, as well as trigger different workflows on goods vs. services purchases”
 - o “can also trigger real-time integrations to external systems, such as an ERP at a workflow step, such as checking if budget is available for the purchase”
- “order is transmitted to the supplier through their email, including a PDF version of the order. It can also be extracted and printed”. NOTE: Tech Proposal did not address electronic order transmission (EDI/cXML) however this capability was acknowledged in RTM PO-17.
- “Receipts can be created in multiple ways, from a purchase order, from scratch, or from a supplier entered Advanced Shipping Notice”. Receipts can be workflowed for review/approval. (pg. 30/31)
- **Invoices**
 - o “Invoices can be created by PO flip, from scratch, EDI/cXML transmission, OCR capability”. (pg. 31)
 - o Invoices are workflowed for review/approval. (pg. 32)
 - o “system will automatically calculate the three-way match based on ordered, received, and invoiced amount, and will display alerts” (pg. 32)
 - o “flexible to accommodate 2-way match if specific commodities do not require a receipt in order to be paid.” **CONCERN**, it may be that 2-way match is decided based on a commodity code which could be too general to fit the situations a State/Entity needs to have supported.
- “Once the invoice is fully reviewed and approved, it will trigger an integration to the ERP for payment”. “will push an ok-to-pay file to the ERP”

RTM

- **WEAKNESS**, PRD-7: Purchase requests with a future release date for the Purchase Order required a manual step to release the PO once the date has passed, it is not automated.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH, PRD-8: The capability to communicate/collaborate with other users "under the request document".
- POTENTIAL WEAKNESS, PRD-13: There is no automated functionality that will include text or attachments based on a commodity or other field value.
- STRENGTH, PRD-19: The State will have access to "Ivalua's Design Mode, Workflow Engine and Alerts & Notification toolbox" which will provide the State with self-service capabilities for configuration.
- STRENGTH, WRK-1: The workflow functionality provides both routing rules and approval rules in the single rules engines. Also allows you to build SQL statements to address complex scenarios.
- STRENGTH, WRK-2: The "whiteboard-like" user interface to design workflows.
- STRENGTH, WRK-6: The capability to "include SQL to route requisitions" is significant capability to address exceptions such as the need to have "by-pass conditions".
- STRENGTH, WRK-15: The capability to set up "specific messages" for each step.
- STRENGTH, WRK-22: "State can add fields to be auditable" provides additional flexibility to meet any changes in State audit needs.
- WEAKNESS, PO-15: System does not have the capability to have two versions of a printed purchase order.
- POTENTIAL WEAKNESS, PO-17: eFax of orders "is not currently supported".
- NOTE: Ivalua did not understand that the functionality desired is not the same as bank administration of user Pcards.
- "POTENTIAL WEAKNESS, PC-8: Pcard reconciliation currently can only be provided ""as a customized solution"" with Ivalua's expense module which is not included.
- STRENGTH, RC-17: Fixed asset receiving fields can be available for only "certain types of goods" instead of having to be on the users' receiving screen when they are entering any type of receipt.
- STRENGTH, RC-18: Creation of an "exception" to document an receipt issue and include give "corrective actions".
- Ten req'ts need clarification.

Catalog Capability, pg. 33-35: NOTE, Technical Proposal response did not address the req'ts to "provide access" to "external internet retail or commercial markets of goods/services" or access to "non-contract Suppliers offering goods and services".

- System supports both "internal and external (punchout) catalogs".
- "view catalogs are limited to the user's organization scope" (pg. 33) NOTE: scope = combination of Role/Authorizations/Perimeter/Commodity restrictions assigned to a user.
- Suppliers can "self-service" manage their catalogs by uploading them to the system. Done via excel templates. After upload "system does an automated format check". (pg. 33)
- "routed through an approval process for an internal user to validate" with "side-by-side comparison of old vs. new pricing" (pg. 33)
- "internal users can also upload catalogs on a supplier's behalf"
- "Search 360" (pg. 34)
 - o "predictive and fuzzy search capabilities"
 - o "can also search any field"
 - o "item tags" to "provide visual indicators" on search results to "identify preferred, discounted, or emergency items". Tags can be 'prioritized'.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o “has the ability to search both punchout and hosted catalog in the same search. Through an API, external catalog results will be brought into the internal Ivalua catalog”

RTM

- STRENGTH, CAT-24: The capability to route catalogs for approval based more than a user having a role as catalog approver or buyer responsible for a contract. Specifically, can route based on "region, cost center, commodity types, etc."
- STRENGTH, CAT-34: The Search 360 functionality will automatically search punchouts sites as well as hosted catalogs to present both results. Otherwise the user has to search Hosted Catalogs in the system and then go to each punchout individually to do their search.
- No req'ts need clarification.

Sourcing/Bid Management, pg. 35-44:

- “solicitation (BPM) type which drives which tabs and parts of the solicitation process are required.” (pg. 35)
- “can accommodate a range of solicitation methods, from very simple quick quote events to multi-phase RFPs with multiple envelopes”. (pg. 35)
- “Suppliers can be automatically added to the invited suppliers list based on the commodity or commodities” and “can be added by searching the supplier database”. (pg. 36)
- Documents Tab: can have unlimited number of attachments, “standard organization documents” and “solicitation owner can upload” docs.
- STRENGTH: “Documents can have workflows associated with them and accommodate versioning.” (pg. 38)
- “Bids are protected through Ivalua’s sealed bid functionality” (pg. 38)
- Questionnaires: (pg. 38/39)
 - o “questionnaire capability, non-price components can be captured from the supplier”.
 - o “Templates can be used”
 - o “ability to make a question required, the option to add a comment or attachment to clarify the answer, or to allows more than one response to a question. Conditional logic can also be added to questions to create if-then statements that will determine the visibility of questions based on previous responses.”
- Pricing grids (“item grid”) can have templates to be “automatically applied to the event”. Columns on the grid can be “internal” (only State/Entity user can see) or “external” (Supplier can see). (pg. 39)
- Solicitations have “workflow to approve and release”. Once approved “user can manually send out the solicitation or have it released automatically at the opening date and time”. (pg. 39/40)
- Public Portal: (pg. 40/41)
 - o “public portal allows users without an account to view open and close solicitation, active contracts and facilitate the submission of public facing forms if needed.”
 - o “Ivalua can also integrate to the organization’s website for posting of events.”
 - o “public view of the solicitation includes all attributes of the solicitation including general information, documents, questionnaires, and price lists. In addition, the public solicitation page can also post bid tabulations and award posting once the bid due date and time has been reached and an award has been made.”
- Responding:

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o Suppliers can “craft their response within the system or can download the entire solicitation to a zip file to view and response offline if needed.” (pg. 41)
 - o Supplier options: “create proposal from scratch, copy forward a previously submitted proposal, cancel a proposal in progress, withdraw a proposal” (pg. 42)
- Analyze and award: (pg. 43)
 - o “view side by side comparisons of items and qualitative information for two or more suppliers.”
 - o “can also select ‘award strategies’ which will apply a selected algorithm to create the award”
 - o “review their savings tracking that is based on the target and reference price”
 - o Awards have workflow/approvals capability. (pg. 44)

RTM

- STRENGTH, SRC-28: The Discussion Forum feature allowing messaging to "private or public" with "chat in real-time" for auctions.
- POTENTIAL WEAKNESS, SRC-25: No check-in/check-out capabilities for "documents, Terms/conditions and templates".
- STRENGTH, SRC-48: "drag-and-drop capabilities" as the user interface for creating workflows is more effective than other, more common options.
- WEAKNESS, SRC-66: System does not provide a means for a user to add "un-registered Vendors" to the "generated Vendor list" of a solicitation.
- POTENTIAL WEAKNESS, SRC-68: System does not support eFax.
- POTENTIAL WEAKNESS, SRC-76: The system does not OOTB provide capabilities to post to the "State's public procurement website".
- "POTENTIAL WEAKNESS, SRC-80: System does not have functionality to require vendors to provide ""basic"" information when downloading a solicitation document from the public website. Also, eFax is not supported."
- POTENTIAL WEAKNESS, SRC-83: System does not have a means to 'conduct pre-response/pre-proposal conferences'. Users would have to provide a link to a external webinar system that is not part of the eProcurement system.
- WEAKNESS, SRC-105: System does not provide notifications to vendors when submitting a response to a "set-aside solicitation and they are not a certified MBE".
- Seven req'ts need clarification.

Contract Management, pg. 45-48:

- “contract record within Ivalua captures all aspects of contract information, documentation, activity, and performance within the single record.” (pg. 45)
- “system will automatically trigger reminders when the contract is nearing expiration” (pg. 45)
- “Different contract types can determine what field requirements, workflow, and alerts are relevant to the contract being created.” (pg. 45)
- Contract documents: (pg. 46)
 - o “documents tab captures all documentation associated with the contract through attachments”.
 - o “document has a ‘type’ associated with it that can categorize the documents”
 - o “alerts can be triggered to the user if documentation is missing from the contract record or is nearing expiration”

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH: “has a built-in authoring tool that will allow users to write and redline contracts directly in the Ivalua solution”. “Redlines are tracked from user to user with the ability to compare previous versions of the contract side by side”. “offers a native integration to Microsoft Word, so users redline in the Word can sync their version back to Ivalua”. With “workflow capability, the “authored document can be passed back and forth between users to facilitate redlines, versioning, and approvals”.
- “any subcontractors and distributors that are being used by the prime supplier on the event”.
- “system can also trigger a subcontractor report to prime suppliers “ (pg. 47)
- “accommodates a standard integration with multiple eSignature tools, including DocuSign, Adobe Sign, and Universign.” (pg. 47)

RTM

- POTENTIAL WEAKNESS, CNT-7: System only has check-in/check-out capabilities for "documents authored within Microsoft word". Does not provide this for other documents or templates.
- STRENGTH, CNT-25: Authoring contract documents with MS Word is a significant capability.
- STRENGTH, CNT-50: The history feature capturing "at the clause level" is a significant additional feature.
- WEAKNESS, CNT-51 through CNT-63: The Ivalua "Public Contract Browse" feature cannot be modified to meet State needs/req'ts without "Ivalue security review or custom code".
- Three req'ts need clarification.

Vendor Performance, pg. 48/49:

- “users can create performance assessments against their suppliers or contracts.”
- “can trigger alerts to users if a supplier is consistently performing poorly.”
- “Templates for performance criteria are stored within Ivalua for users to respond to questions related to the supplier’s performance”. Weights for each question determine a total score.
- “Completed performance evaluations can be routed through a workflow if additional review or approval is needed”
- “ability to track exceptions and collaborate with suppliers to address these exceptions”
- “exception documents the issue or non-conformance and the severity, tied to the triggering event”
- “supplier is notified of the exception, allowing them to respond and actively manage any corrective action associated with the exception”
- “workflow to manage each step of the process” of exception management. “workflow can guide end users to collect documents and collaborate with the supplier to mitigate the identified issue.”
- Improvement Plans: (pg. 49)
 - “creating tasks that will lead to overall supplier improvement”
 - “typically tied to an exception”
 - “consist of a list of tasks that can be created from a template or individually”
 - “Each task is assigned to a user with assigned due dates for both internal tasks and supplier actions”
 - “Suppliers can access their improvement plans and update the status of their tasks”

RTM

- WEAKNESS, VPE-2 thru 12: System relies on "questionnaire" and users to respond to capture performance metrics. There is not automated capture of performance based on transactions processed or data.
- Three req'ts need clarification.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Purchasing/Data Analytics, pg. 50-53:

- "three different types of reporting with the Ivalua solution, ranging from simple excel extracts to data visualization dashboards" (pg. 50)
- "Importing data from an external system can be accommodated."
- "over 100 out of the box reports" "that can be filtered and drilled down"
- Super users can configure additional reports
- Ad Hoc Reporting: (pg. 50)
 - o "Any browse page within Ivalua can become a report"
 - o "search and filter on any criteria" and "export their results into excel for a quick report"
- Queries: (pg. 50)
 - o "Excel based reports that are run via SQL statements in Ivalua's reporting module"
 - o "can combine data from multiple modules within a single report as well as conduct calculations"
 - o "parameters can be set up so users can filter the view of the data before extraction"
- Analysis Reports: (pg. 51-53)
 - o "provide data visualization to users in the form of charts, graphs, and pivot tables that can then be combined to create a dashboard view for any users"
 - o "drill down on source data and apply filters to get a comprehensive view of data"
 - o "users can easily create their own dashboards or rearrange existing ones."
 - o Standard reports "can also be embedded" within dashboards.
 - o "New analysis can be built by using a template or by using an analysis builder"

RTM

- STRENGTH, PDA-1: The spend analysis and PBI modules described is more robust than expected and provides some capabilities beyond what was required.
- WEAKNESS, PDA-32: The system reporting tool does not have a means to publish reports on an "internal or public website". Can only make reports available within the system itself.
- Four req'ts need clarification.

Technical Requirements – NOTE: Except for the SLA section, responses to this section are the same as was submitted in Ivalua proposal.

Availability, pg. 55: Meets req'ts.

- "accessible 24 hours a day, 7 days a week"
- "guarantee by Hosting SLA an uptime of 99.8% outside of scheduled maintenance, which will never occur during Peak hours"
- "co-locates its production and DR system in state-of-the-art data centers" "with fully redundant subsystems and compartmentalized security zones"
- "data centers have: Uninterruptible Power Supply (UPS, Diesel Generator); Redundant heating ventilation air conditioning and all components are fully fault-tolerant including uplinks, storage, chillers, HVAC systems, etc. Everything is dual powered."

Accessibility Requirements, pg. 55: Does not meet. NOTE: response indicates that work is underway to become compliant but no information was provided to indicate when.

INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance"
- "is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance"
- "accessibility audit and compliance are broken into 3 manageable areas, corresponding to very distinct user typologies (internal, external, and anonymous),"
- "Ivalua has completed VPATs which can be provided upon request."

Audit Trail and History, pg. 55/56 & TECH-1 thru 5: Meets req'ts.

- "provides robust audit and logging capabilities"
- User logged on... "all actions and activities are registered, logged and time stamped."
- Every transaction "is part of this logging effort"
- Fields have an "auditable checkbox" to mark that the field to have an audit trail.
- "audit train can be produced in reports"
- "approval history shows who validated/ actioned the previous steps and who will validate the current step"
- "mail history frame shows the history of notifications/ emails"

RTM

- Meets req'ts
- One req't needs clarification.

Browsers Supported, pg. 56:

- "Ivalua works with Internet Explorer, Edge, Firefox, Chrome, and Safari."
- IE: all still supported by MS. MS Edge, Chrome, Firefox: last 3 major releases
- Response did not address req't to support "any browser that is ranked as more than 10% of web traffic"

User Accounts and Administration, pg. 56-59 & TECH-6 thru 20: Partially meets. Response did not address the req't to be able to delegate "administration responsibilities" of "specific functions and organizations" and did not properly respond to TECH-20.

- "User roles and user access to Ivalua Solution are defined in the application through the administration components" by "application administrator(s)".
- Access to "application pages and functions are controlled by profiles, authorization, and perimeters."
- "a user has access to data and can transact across a certain region or other logical portion of the enterprise" or "a user has access to certain features and functionality" "or a combination of both."
- Option to "limit data access of business objects on a per user basis" which would allow restrictions for situations like "only access PO of the organization" that the user belongs to.
- "permissions can be controlled at the module, page, tab, and even field level for view and edit rights"

User Authentication, pg. 59/60 & TECH-21 thru 25: Partially meets. Response did not address req'ts for Identify Proofing.

- "supports multiple authentication schemes including:

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o Login / password authentication
- o Single Sign On (SSO) SAML 2 Web based authentication standard
- o Two-factor authentication
- o Reverse Proxy / IIS Agent based authentication (CA Single Sign On, formerly CA Site Minder)
- “can configure password policies to meet State policies”

RTM

- Meets req'ts.

Federated Identity Management, pg. 60: Meets req'ts.

- “Ivalua Solution supports SAML 2.0 protocols for Single Sign On. The Ivalua Solution has been integrated with the most popular Identity providers.”
- “only require one ID and password to access the full solution, with support for auto-provisioning of roles and permissions”

Data Conversion, pg. 61 & TECH-26 thru 34: Partially meets req'ts, see comments for TECH-28 &30.

- “Ivalua EAI/ETL module” to “perform data import, transformation and load the source data into the system”
- “do not use third-party services”
- Will “provide tools” for “data transfer and data cleansing” including “Supplier Cleansing Workbench”
- “includes data transformation and business logic”
- “data conversion dry runs will be limited to three cycles”
- Participating Entity “will be responsible for extracting the data from its current systems and any external third-party systems into an Ivalua defined format”

RTM

- POTENTIAL WEAKNESS, TECH-28: System does not provide an automated means to load/convert active solicitations from an existing system.
- POTENTIAL WEAKNESS, TECH-30: System does not provide an automated means to load/convert Vendor performance data from an existing system.

Interface and Integration, pg. 61-63 & TECH-35 thru 60: Meets req'ts.

- “enterprise-class integration tools... work with all back-end systems, regardless of how many instances or different system types” (pg. 59)
- “has strong integration capabilities with a variety of ERPs including PeopleSoft, CGI Advantage, Oracle and SAP, among others” (pg. 60)
- “includes unidirectional or bidirectional data flows” using batch, asynchronous or synchronous interfaces. (pg. 60)
- integration module includes comprehensive format definitions, rules-based transformations, and validated loading of data. (pg. 60/61)

RTM

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Meets req'ts except TECH-60 where response did not address the req't to have "automated failure recovery".
- Two req'ts need clarification.

Office Automation Integration, pg. 63 & TECH-61: Meets req'ts

- supports all file types as attachments
- Excel support across the sourcing process
- reporting tools natively export to MS Word, MS Excel, and PDF.
- contract tool we can import MS Word documents and break them into clauses
- contract data can be exported into Word or PDF formats

Mobile Device Support, pg. 63 & TECH-62: Meets req'ts.

- "is a fully responsive HTML application"

RTM

- Meets req't.

Mobile Applications, pg. 63: Does not meet req'ts.

- POTENTIAL WEAKNESS, system does not have a Mobile App. Relies on the system being a "fully responsive" application for use on mobile devices to give access to the entire system.

Data Ownership and Access, pg. 64: Meets req'ts

- Customer is "data owner and data controller"
- Customers can "directly export data using features available" in the system

Date Retention, Archive and Purge Considerations, pg. 62 & TECH-63: Meets req'ts

- "Ivalua does not delete or modify customer data, unless requested by the customer to do so
- "deployment allows the implementation project teams to configure when and what frequency to run the offline archiving functionality

RTM

- Meets req't.

Disaster Recovery Plan, pg. 64/65: Meets req'ts.

- "has established a Business Continuity (BC) and Disaster Recovery (DR) Program
- "plan is reviewed and approved by the management annually
- "Program is based on ISO/IEC 22301 standard framework
- "Disaster Recovery Plan is based on a fully duplicated and hot-standby infrastructure".
"Replicated web servers & application servers, replicated database backups and redundant support service"

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "contingency plan includes": "Geographically separate sites, different hosting/internet service providers, recovery site service level equal to primary site.
- "Maximum recovery time can be as low as 4 hours **with the Platinum package**". CONCERN, need to lock in the "package" so there is a specific commitment to recovery time included in proposal and potential contract.
- "DRP plan is tested at least once a year
- Incident Response program "reviewed and approved by the management annually".
- Customer notifications of breaches "within seventy-two (72) hours – unless a shorter time is specified in the contract". NOTE, suggest making sure that the breach notification time limits in any agreement are at least negotiated/locked-in or req'd to meet the notification req'ts specified later in this Security Req'ts section of the RFP.

Solution Environments, pg. 65 & TECH-64 thru 68: Partially meets. Training environment is not included. Need to NEGOTIATE to have Training environment include at no additional cost.

- "Each client will be provided at least 3 environments"
- "can also support the need for a training or other additional environments. All of these "extra" environments may come with additional maintenance fees"

RTM

- POTENTIAL WEAKNESS, TECH-65: Only the "acceptance environment" is "integrated" for testing. The Training environment does have integration.
- One req'ts needs clarification.

Solution Technical Architecture, pg. 65-67: Meets req'ts except response did not provide the req'd information to describe development tools, languages, and techniques "used in developing application modules".

Solution Network Architecture, pg. 67/68: Meets req'ts except response did not address req'ts to provide a diagram of the network architecture.

System Development Methodology, pg. 68/69: Partially meets req'ts.

- Did identify Development Methodology as "based on Agile methodology" and state that they "embeds Quality Assurance into the ongoing development process". However, response discussed the implementation work to configure, test, launch and manage configuration changes for a customer but did not address the req'd detail regarding the following in context of the system development practices they follow with building their software solution:
 - o Testing processes/tools/methods
 - o Stress testing
 - o QA assurance program
 - o Config/Change Mgmt for application development.

Service Level Agreement, pg. 69:

- KPMG

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- In the Help Desk/Managed Services assumptions (pg. 185) KPMG only agrees to be accountable for two Production SLAs, Catalog Onboarding/Maintenance and External Sources Onboarding.
- In their list of Exceptions (pg. 192) they've taken exceptions with the RFP SLA
- Ivalua: "for hosting and maintenance, Ivalua offers its own" SLA which I did not find included in the proposal documents. We will need to clarify what SLA responsibilities KPMG is agreeing to and what Ivalua will be responsible for.

Security Requirements – NOTE: responses to this section are the same as was submitted for Ivalua proposal

Cloud Security Alliance (CSA) Compliance, pg. 71: Meets req't to complete CAIQ.

Security and Privacy Controls, pg. 71: Partially meets.

- WEAKNESS, Ivalua is not currently in compliance with NIST (SP) 800-53. However they are "currently in the process of validating" to this standards at "Moderate" risk controls.

Security Certifications, pg. 71: Meets req'ts. However, note that they are not "currently audited for PCI-DSS compliance" but do have cardholder data controls in place "in accordance with the PCI-DSS standards. Also note that they are "FedRAMP ready".

Annual Security Plan, pg. 71-76: Generally meets req'ts however discussed most req'ts at a high level instead of providing detail.

- "currently in the process of validating controls and safeguards against NIST SP 800-53"
- POTENTIAL WEAKNESS, Annual Security Plan, Encryption Data At Rest, pg. 73: Encrypting data at rest MAY NOT be part of their standard offering. Their HSM module/tool for this is a "paying option". CONFLICT/NOTE: in the Encryption section it states that "Data at-rest and in-transit is encrypted" however in the 2nd paragraph of this section it refers to "HSM-based encryption for data at rest" as a "value-added service (paying option)". So how can data at rest be encrypted as a standard for the Solution but yet be a "paying option"?

Secure Application and Network Environment, pg. 79: Meets req'ts though the detail provided was not comprehensive for the RFP listed req'd topics though some were addressed in previous Security sections of the response.

Secure Application and Network Access, pg. 79-81 & SEC-1 thru 5: Meets req'ts in RFP doc but has weakness in regards to some of the RTM Security req'ts.

RTM

- POTENTIAL WEAKNESS, SEC-1: System can track usage by user account, not device.
- WEAKNESS, SEC-3: System does not provide an admin capability to "force logout/end specific user sessions". Only has an auto logout feature to force all actives users out of the system.
- POTENTIAL WEAKNESS, SEC-4: System does not use "persistent cookies".

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Data Security, pg. 81-83: Meets req'ts. NOTE, Risk Mgmt discussed in Annual Security Plan section on pg. 78.

Personally Identifiable Information Protection, pg. 83/88: Meets req'ts, however did not discuss compliance specifically for "Federal PII" requirements and did take two Exceptions (pg. 192) asking to revise two req'ts:

- "Upon request by the Participating Entity, promptly destroy...all PII received from the Participating Entity": added a statement that allows them to "retain a copy" to "comply with its contractual obligations and applicable professional standards".
- "Cooperate with... Participating Entity to monitor Bidder's compliance...": changed to "Provide commercially reasonable cooperation" and changed "monitor" to "confirm".

Security/Privacy Issue Occurrence, pg. 83 & Exceptions pg. 192: Does not meet and the response on pg. 83 conflicts with the Exception response regarding this req't..

- The response language on pg. 83 indicates notification response time of 72 hours however in the Exceptions the requirement has been re-written for all of the notification timing and added "material" and "where technically and reasonably feasible" language.

PII Data Actual/Attempted Access or Disclosure, pg. 83 & Exceptions pg. 192: Partially meets.

- The Standard for Ivalua does not meet the notification timeline req'ts, instead their default is within 72 hours. However, the response implies that they would follow "reporting obligations... set forth in Ivalua's customer contract". So should NEGOTIATE these RFP req'ts into the contract.
- Exception has language changes
 - o "Fully cooperate with the Participating Entity in estimating..." req't: Removed the "fully" and "the consequences of" language from the req't.
 - o "In the case of a Disclosure" req't:
 - Changed "cooperate full with the Participating Entity to notify the effected persons" to "provide commercially reasonable cooperation to the Participating Entity in connection with the Participating Entity's notification to the effected persons"
 - Changed "Bidder must cooperate fully with all government regulatory agencies" to "Bidder must provide commercially reasonable cooperation to Participating Entity in connections with requests from government regulatory agencies..." and added "related to a Disclosure" to the end of the req't.

Security Breach Reporting, pg. 83 & Exceptions pg. 192: Does not meet and the response on pg. 81 conflicts with the Exception response regarding this req't..

- The response language on pg. 83 indicates notification response time of 72 hours however in the Exceptions the requirement has been re-written for all of the notification timing and made significant language changes to the req't.. NOTE, other than the notification timing conflict, the language changes appear to still fit the intent of the original req't.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Implementation Services Requirements

Project Management, pg. 85-103: Meets req'ts except for need to negotiate to change/remove the deliverable review/approval timelines. *NOTE: same as KPMG-GEP proposal*

- "leverage our Program and Project Management (PPM) Methodology"
- "will implement an integrated Project Management Office (PMO)"
- PMO Tasks: OK
- Scope Management (pg. 85): OK includes defining "formal change control"
- Schedule Management (pg. 86/87): OK
- Budget Management (pg. 88): OK
- Quality Management (pg. 88/89): OK except for issue on review/approval times should be changed during Negotiations.
 - o "before starting project activities" will "work with you to define...each deliverable"
 - o "submit deliverables... based on submission timelines specified"
 - o WEAKNESS (top pg. 89): "As a standard practice, we propose that your organization have five business days to review each submitted deliverable and provide comments". For corrected/resubmitted Deliverables, "expect your organization's approval or additional clarification...within five business days". This time is insufficient for large deliverables such as Design Documents.
- Resource Management (pg. 89): OK
- Communications Management, including Status Reporting (pg. 87/88): OK
- Risk Management (pg. 90/91): OK
- Issue Management (pg. 91-93): OK
- Project Manager Profile (pg. 93): OK
- Sample Implementation Plan (pg. 94): WEAKNESS, plan is for "small State entity" and has 9 months from start to go-live which is too aggressive. Should be 12 months to be realistic.
- Sample Bidder Staffing Plan (pg. 94-97): OK Good representation of what is needed.
- Sample Entity Staffing Plan (pg.97-102): OK
- Project Governance Model (pg. 102-103): OK

Project Implementation Methodology, pg. 103-114: . Meets req'ts. *NOTE: same as KPMG-GEP proposal*

Catalog Support Services, pg. 114-117: Meets req'ts, though need a CLARIFICATION to confirm that they have committed to set up "commercial retail online marketplaces" where the Participating Entity does not have a contract.

- Suppliers "able to manage catalogs in a self-service manner by uploading their own catalogs"
- "internal users can also upload catalogs on a supplier's behalf"
- KPMG (pg. 116):
 - o "will execute a spend analysis to match spend categories to the platform buying channels". "takes a methodical approach in identifying the correct suppliers fit for punch-out and hosted catalogs"
 - o "obtain historical data for the last 2 years along with contract data to assess and prioritize" for "hosted or punchout catalogs"
 - o "will propose a Content Enablement Strategy and finalize the suppliers to move forward with in Ivalua"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Will “begin outreach to suppliers”
- “will begin the setup and configuration of punch-out catalog within Ivalua, setup the online marketplaces”. “will begin to complete the appropriate hosted catalog templates to upload into the system”. “will engage State users to test the catalogs”
- “will train the State to manage punch-out catalogs and suppliers to manage hosted catalogs”
- will train “State users on setting up new punch-out and hosted catalogs” and train to “identify additional vendors to enable”.

Data Conversion Services, pg. 117-125: PROBLEM

- “will automate the various steps” using “Ivalua ETL/EAI module and using internal accelerators”.
- “Ivalua ETL module” to “perform data import, transformation and load”.
- CONCERN... Recommended Data Conversions, pg. 120-122: The list on these pages conflicts with the Assumptions section (16th bullet, pg.186) states that “only active suppliers, purchase orders, and contracts will be converted/moved”.
- OPTIONAL, Cognitive Contract Management (CCM): tool that will “read and ingest documents such as contracts, price lists, and catalogs” to extract/load contract metadata from “enterprise 125state-wide, and local applications and databases”.

Interface/Integration Development Services, pg. 125-130:

- “have experience integrating Ivalua with leading financial and ERP systems” including SAP, PeopleSoft, CGI Advantage, among others”
- Experience “deploying a combination of batch and real-time”
- EVOLVE, Post-Implementation, pg. : CONCERN, response indicates that support will be moved to the State/Entity tech team. Need to NEGOTIATE that maintenance/support for the KPMG portion of interfaces/integration will be covered by the on-going maintenance support services.
- Paragraph just before “System Integrations & Interfaces table, pg. 128: refers to “real-time integrations getting from the source system an “immediate (synchronous) response”. “Immediate” is not viable for some integrations so suggest NEGOTIATE to remove the word “immediate” from this paragraph.
- Table of System Integrations/Interfaces, pg. 128-130: CONCERN,
 - #1 Vendor Sync: identifies this as “Batch” and “Daily”. Need language added to the Notes to say that these may need to change based on design decisions so live procurements (Solicitation Awards, Contracts, Purchase Orders) are not held up for a day waiting for confirmation from ERP that vendor was successfully created.
 - #2 Verification of accounting codes: having this be Batch/Daily means that a requisition will have a 1 day delay before the user can move forward with the procurement. Need to have this changed to Real-Time and to be all of the accounting code values.
 - #3 Requisition & #4 P: need to remove “immediate” to allow for potential actions that may need to happen within the ERP (e.g. RTM req’t TECH-47 Approvals in the ERP) before a response can be returned.

INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Organizational Change Management (OCM Services) , pg. 130-140: Overall meets req'ts however as noted below the more significant services/tools that are discussed are listed as "Additional". So the OCM included is not as strong as it could be.

- The following req'd OCM deliverables are identified in the graphic on pg. 133 but are not listed in the table of OCM Services on pgs. 133-138: Coaching Plan and Resistance Assessment/Mgmt Plan.
- People TRIP, pg. 134: Note, this is a Readiness Assessment service listed separately from the req'd "Readiness Assessment" which they address on pg. 135. This tool is identified with an asterisk meaning it is "Additional" (not included) but pg. 138 it is referred to as a "no cost tool".
- "Additional KPMG recommended services" (bottom of pgs. 133-138): Many of the more valuable tools/services are "Additional" so the included OCM services are actually not extensive. NEGOTIATION, get these to be included at no additional cost.

Training Services, pg. 140-150: Meets req'ts. Train the Trainer approach with State training End Users. Very mature and comprehensive approach to training.

-

Help Desk Services, pg. 150/151 & IMPL-1 thru 5: Meets req'ts.

- Tier 1 is to be provided by the "Client"
- Tier 2 is to be provided by KPMG
- Tier 3 is to be provided by Ivalua or Client, depending on whether the issue is with the Ivalua system or the Client-side integration/interface.
- "would assign anywhere between five and ten FTEs" with the "capacity to expand up to thirty FTEs, as needed"
- "uses ServiceNow cloud-based platform"
- "we've included help desk support for the initial six months post go-live". NOTE: but this is not Tier 1 support.

RTM

- Meets req'ts.

On-Site System Stabilization Support, pg. 152-154: Does not meet req'ts. Services will only "address defects and transition to steady state run and operate mode"..

- "design documents will not be updated due to defects"
- "KPMG can provide Tier 1/Level 1 support as well if desired and contracted by your organization". NEGOTIATION, suggest locking down an Optional price for KPMG to provide Tier 1 support for the 3 month period.
- Response did not address providing
 - o System setup/configuration changes
 - o Monitoring system performance/stability
 - o System use assessment

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Ivalua

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Managed Services Requirements

Solution Support, pg. 156-160 & MNGD-1: Generally meets req'ts however response did not specifically speak to providing the services for "all Production and non-Production environments" as req'd in the RFP.

- "KPMG's Powered Evolution services help sustain your investment"
- Includes (pg. 167)
 - o Triaging functional issues
 - o Assisting with the usage and navigation of features and functions
 - o Troubleshooting technical issues
 - o Assisting with data quality efforts
 - o Coordinating with third-party support organizations to resolve incidents
 - o Ivalua update support and planning
 - o Regression testing
 - o Maintaining configuration documentation
 - o Maintaining standard operating procedures
 - o Report writing
 - o Data load support
 - o Configuration changes
 - o Uptaking new functionality
 - o Governance
 - o Management reporting
 - o Change management (of system changes)
- Enrichment (pg. 167): CONCERN, Enhancements (80hrs or less/deploy in one month) are included but Large Enhancements (>80 hrs) are "considered separate project" (additional costs).
- Configuration Changes (pg. 159): CONCERN, only configuration changes "which require 5 days or less effort" are included in the scope of services. CLARIFICATION, how will configuration changes that require more than 5 days be addressed?
- Service Levels (pg. 159/160):
 - o CONCERN/NEGOTIATE, SLAs do not include response time commitments
 - o STRENGTH, the "Priority/Severity" descriptions are comparable, from business perspective, to those in the RFP SLA. NOTE: the response for the Technical Requirements, Service Level Agreement section does not include this, or any other, definition of Priority/Severity. NEGOTIATION, need to confirm that KPMG is accepting the definitions in the RFP SLA definition for the two SLAs they've agree to follow.

Organizational Change Management (OCM Services) , pg. 161-162: Meets req'ts.

Training Services, pg. 162-164: Meets req'ts.

Catalog Support Services, pg. 164: Meets req'ts.

Help Desk Services, pg. 164-165: Partially meets req'ts. It is unclear whether KPMG would provide Tier 1 support or if the Participating Entity must provide that level. Note that in the Support Services section on pg. 155 the Table list "Base Services" refers to L2 and L3 support which implies that the Participating Entity is providing L1 (Tier 1) support.

Transition Out Assistance Services, pg. 165-167: Tasks/work meets req'ts however the timeline of 10 weeks does not meet the RFP req'd timing of continuing "for a period of up to six (6) months".

Other Available Services - pg. 169-177: *NOTE: same as KPMG-GEP proposa*

- Strategic Sourcing, pg. 169-172: Optional Service. KPMG would provide "strategic sourcing process entails spend analysis, market analysis, demand research, go-to market strategy development, bid document creation, bid evaluation and analysis, supplier negotiations, and contract awards."
- Should-Cost Modeling, pg. 172-175: Optional Service. KPMG would provide cost modeling using "Data Engineering, External Market Data Library, Granular Economic Modeling, Advanced Root Cause Analysis".
- Contract Performance Management (CPM), pg. 175-177: Optional Service. KPMG would provide contract management for the State/Entity, identifying contract leakage and taking corrective action.
- Localization Support, pg. 177: Optional Service. KPMG can "help onboard the remaining agencies as a part of the post implementation activities"... "loading data, training end users, and deploying the solution".

Individual Evaluator Comments:

Ivalua - Unified Business platform.

General Principal and Requirements

- Key Solution Functionality Elements – fully integrated system. Start from single landing page; homogenous look and feel between modules. Single data ecosystem.
 - P5 Ivalua has extensive experience in delivering procurement solutions for State & Local organizations. As we work with our customers, we have continued to build in public sector best practices throughout the solution. Some of these features include:
 - Native public transparency portal
 - Renaming throughout the solution to align to public procurement terminology
 - M/WBE Management
 - Sealed Bidding
 - Subcontractor Reporting
 - Cooperative Reporting
 - Portal entry – single login, configurable dashboards. Collaboration tools – blogs, forums, comments.
 - Open marketplace - hosted catalogs; punchout catalogs (side-by-side hosted and punchout searches; off catalog searches.
 - P5 Integration toolbox capable of connecting with multiple ERP solutions, third-party data providers, suppliers' systems and so on. Likewise, Ivalua supports multiple format options (cXML, XML, SAP Idocs, XLS(x), DOC(x), CSV, AS2, etc.) and in multiple protocols (manual load, batch load, EDI, SFTP, HTTP, etc.). Our integrations toolkit and library connects to over 60+ ERPs and includes hundreds of data mapping formats and standard integration templates.
 - Workflow, Document Management, Configurable (p6 example list), Public portal – transparency.
- User Experience – login routes to homepage unique to user, role and tasks.
 - One or more roles guide the user experience.
 - No cost for suppliers to access portal to submit bids.
 - P7 search capability is accessed directly from the home screen for users to be able to start searching the catalog, or to create new requests.
 - P7 access pending workflow tasks directly from home screen
 - P9 Users or administrators can also set-up out of office forwarding for users. This will delegate all workflow tasks assigned to that user within a defined time period to another user or group of users.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Bidder Best Practices and Roadmap
 - Major releases delivered 2 times per year.
 - Recommends major updates 18 months for best product maintenance
 - Fedramp ready
 - Public sector longtime focused; best practices developer for public sector tailored solution.
 - Roadmap is 60% customer-sourced.
 - Roadmap – web apps; invoicing and payment execution inside Ivalua; contract lifecycle management using AI; supplier risk and performance; StateRamp; enhanced clause libraries; collaborative authoring.
- Innovations and Value-Added Features/Services
 - P11 Ivalua Help Desk as alternative to state-operated. Level 1 with 0-% tickets solved within 1 hour. Level 2 redirect. (Cost item)
 - P12 Advanced Services procurement. (Cost item)
 - Vendor Master Management – supplier data (Cost item)
 - Adoption of ERP specific source schema tables to support bidirectional master data integration
 - Use of a supplier cleansing workbench for merging and deduplicating records from multiple source systems
- Customizations/Extensions – Configuration not custom code.
 - Coding changes part of release cycle.
 - Users have flexibility to deploy releases. Reduces risk of automated upgrades-prompted problems.
- Alternative Funding Models – Two options – hybrid fixed fee (e.g. 75% plus 1-3% transaction fee); value-based funding model that would be an unstated “different implementation model” but proposed to fund through savings. Option 2 would need clarification for any state looking to use it. Should not be considered part of pricing evaluation since it is an optional method and based entirely on projections.
- Contract transition. Existing customers may discuss contract transition with Ivalua. GFE not guarantee.

Functional Requirements

- General Functionality
- Six modules integrated: Supplier Risk & Performance; Solicitations & Bid Management; Contract Management;
 - *P16 Master data throughout the solution for selection of organizations, commodity codes, units of measure,*
 - *Single platform manages the end-to-end solicitation and purchasing process for the organization, suppliers, and political subdivisions*
 - *EPROC-GEN-3 - Posting to Ivalua's native site does not require any integration. Ivalua can also integrate to state's websites or other sites, as needed. Our recommended approach is using Ivalua's public portal and putting a link within the State's website, to leverage the simplicity of standard functionality while easily allowing access for users from the State's website.*
 - *EPROC-GEN-39 - Throughout each implementation, Ivalua works with organizations to identify any additional information outside of standard that should be available on the*

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

public portal. Document posting can be controlled at the individual document level or by document type (Ex. confidential documents not made public). Authorized users will be able to modify the document types made public.

- Supplier Portal – P17 *free supplier portal where suppliers may perform self-registration and other activities with their customers. Ivalua supplier registration & information management capabilities allows to quickly and easily onboard suppliers for RFPs, orders and invoices, and push data to ERP or other relevant system*
 - *Supplier features:*
 - *Managing their supplier information and users*
 - *Submitting reports for cooperative contract usage*
 - *Responding to sourcing events*
 - *Managing/redlining contracts*
 - *Uploading catalogs*
 - *Viewing orders*
 - *Creating advanced shipping notices*
 - *Creating invoices*
 - *Viewing their performance*
 - *Collaborating on improvement plans*
 - **EPROC-SPR-14 Needs clarification** *ERP financial data is integrated into the system as standard throughout the Procure to pay process. Additional fields can be captured through integration. Is this integration included in the price or required to be developed on customer ERP side?*
 - *EPROC-SPR-19 Administrative fee payments will be submitted through a third party payment provider. Ivalua can offer a close integration to the third party provider to track payment within the system*
- Supplier Enablement/Management- p18 *Supplier activation within Ivalua takes place in two parts. The first is a public facing registration page that allows any new supplier to create an account within the system. The second is the 'full enrollment' process, where the supplier can login and collect additional information required to be fully onboarded with the organization and to do business. The registration page can be found by accessing the public facing homepage of Ivalua. Potential suppliers can access the portal 24 hours a day, 7 days a week, 365 days a year. The Ivalua supplier portal is 100% free for the suppliers, no setup and/or transaction fees.*
 - **EPROC-CDR-18 to -27** – *Third party integration to validate supplier data. Needs clarification – Ivalua supplies or customer supplies?*
 - *EPROC-VDR-32 Ivalua segregates organizations – workflow can't pass between organizations.*
 - **EPROC-VDR-40 – Needs clarification** *(vendor email signup) – is this a Customization as marked or a Configuration as stated in comments?*
 - **P 20** *The supplier submits their registration it is processed through an automated workflow that will automatically accept or reject the registration based on system conditions, such as a duplicate check. The workflow process and acceptance/rejection criteria will be established by each client. If the supplier's registration is approved, they will receive an email notification informing them that their account has been created, and they can login using their username and password that were established on the registration page. Needs clarification – is approval following automated step or is there manual intervention by Ivalua or State?*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P21 – documents can be stored in profile for use in response and contract management.
 - P24 – supplier self-service for account maintenance then routes to internal user for approval; can sent updates to ERP.
- Buyer Portal – Internal users log in via username/paw or SSO.
 - P25 Alternatively, **suppliers** can login via SSO with their organization. **Needs clarification** – is this a typo as this is buyer portal response? Is there an SSO supported for suppliers?
 - P26 User role or roles tied to authorizations. Perimeter can limit visibility into certain departments' data or permissions.
 - EPROC-BPRT-8 – Daily summary of notifications not available.
- Need Identification – P27 *Options from home page: Create a Needs Request form; Create a Purchase Request - contract, non-contract, punch-out, non-catalog products, or for the procurement of services; Complete an Exemption Request; Create a sourcing event; Gather quotes; Create a Contract.*
 - **EPROC-Need-3 – Needs clarification** – Why is guided buying listed as a C? Is there not standard or configurable workflow?
- Request through Pay – starts with requisition; routes for budget; moves to sourcing event. Fully integrated process through requisition, purchase order, receipt and approval.
 - P32 – multiple methods of receipt input: PO; from scratch; EDI/cXML; OCR.
 - Integrates to ERP to trigger and record payment.
 - **EPROC-PC-1 thru -9 – Needs clarification** – status of pcard development.
 - EPROC-RC-21 – UOM conversion to set inventory as different from PO is configurable.
- Catalog Capability – items from multiple suppliers can be on the same PO.
 - CXML punchout; unlimited items; unlimited catalogs
 - Spot bid functionality EPROC-CAT-11
 - Supplier uploaded catalogs routes for approval to internal user.
 - P35 Ivalua also has the ability to search both punchout and hosted catalog in the same search. Through an API, external catalog results will be brought into the internal Ivalua catalog. This will provide the user with a single place to conduct a search, instead of having to punch out to the external catalog first.
- Sourcing/Bid Management – All RTM listed sourcing methods supported as standard or configurable.
 - P36 – Suppliers added to tab for solicitation notification in supplier tab manually; suppliers can be searched by any field in supplier database. (This will include supplier record details – contacts, performance, documents.)
 - P37 Documents tab can host unlimited attachments, e.g. T&Cs; workflows for documents and versioning; standardize for agency.
 - Sealed bid management blocks access by internal users until bid due date; time stamp on screen for auditability.
 - Pricing collected in system, p39; Templates permitted; modifications, new fields can be created; system calculates price savings against reference prices if included
 - Public portal for posting – recommendation to host solicitation on Ivalua, link with basic information from state or other sites to minimize integration effort.
 - **P39 – Needs clarification.** *Public sourcing events allow **any user without an account** to view and **respond to event** within the Ivalua sourcing solution. How is user data captured and ongoing communication facilitated without a confirmed account? See EPROC-SRC-66 **If these suppliers choose to respond they will be required to make an account in the system.***

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P43 During active solicitation, internal users can see activity of suppliers including participation, as well as email notifications received; Sealed bids content protected until closing date.
- P44 Contract creation starts with award notifications and carries over solicitation/response fields to avoid duplicate re-entry of data.
- **EPROC-SRC-35 – Needs clarification.** *This can be accomplished via configuration. For editing via Ivalua's Microsoft word authoring - check-in/check-out is supported out of the box, but not for attachments only. What does “not for attachments only” mean?*
- EPROC-SRC-48 *Workflows can be designed by administrators using drag-and-drop capabilities. It is easy to develop tasks for human approval, or routing decisions based on business rules or factors such as threshold amounts*
Configuration will be required to ensure the workflow meets the needs of each organization
- **EPROC-SRC-68 – Needs clarification** – Is eFax a roadmap item or does Ivalua plan to not support?
- EPROC-SRC-76 – *Posting all solicitation documents to state's public website is customization with high complexity. See earlier not for simpler recommended process.*
- EPROC-SRC-83 – No integrated video conference. Third party link can be inserted. Attachment can be uploaded.
- EPROC-SRC-102 – Ivalua native plugins for third-party electronic signatures.
- **Contract Management**
 - P45 *The contract record within Ivalua captures all aspects of contract information, documentation, activity, and performance within the single record.*
The header tab of the contract captures the basic information about the contract brought over from the solicitation as well as manages any dates associated with the contract. Based on the dates that are set-up in the header of the contract, the system will automatically trigger reminders when the contract is nearing expiration.
 - Document management. P46 *Within the document management capability, Ivalua has a built-in authoring tool that will allow users to write and redline contracts directly in the Ivalua solution. All organization contract templates and clauses will be stored within the system that can then be easily pulled into the contract document. Legal users will have the ability to import or edit templates and clauses, when needed. Redlines are tracked from user to user with the ability to compare previous versions of the contract side by side. Ivalua also offers a native integration to Microsoft Word, so users redline in the Word can sync their version back to Ivalua.*
 - P47 *Through the third parties tab, Ivalua can capture any subcontractors and distributors that are being used by the prime supplier on the event. They can define who the subcontractor is, their M/WBE status, as well as the amount of percentage of the total contract value the supplier is responsible for.*
 - P48 *system can also trigger a subcontractor report to prime suppliers. This allows them to report how much has been paid to their defined subcontractors in that period. The report is then routed through a workflow for approval.*
 - EPROC-CNT-72 – Fee comparison. Marked as C, but comments say configuration. Is this code?
- **Vendor Performance** P49 *performance information is maintained within the supplier's profile for reporting, as well as can trigger alerts to users if a supplier is consistently performing poorly.*

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Templates for performance assessments. Vendor score. *As evaluators respond to the supplier assessments, they will be able to add comments and attachments, where needed.*
 - Improvement plans can be set up as collaboration tool to create tasks aimed at supplier improvement. Supplier and Internal user can both access.
- Purchasing/Data Analytics – 100 out of the box reports; ad hoc reports; SQL queries.
 - Analysis reports with data visualizations.
 - Three RTM requirements depending on completion of the Pcard functionality.

Technical Requirements

- Availability – 99.8% uptime. Monthly scheduled maintenance.
 - Service credit 5% for <99/8% increasing through levels to max of 25% for <85%. Credits applied against future prof. serv. Fees. No refunds unless <90 on contract.
- Accessibility Requirements – P55 *Ivalua is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance. Ivalua is committed to being Section 508-compliant (against WCAG 2.0 Level AA requirements) as soon as possible across all application pages.*
- Audit Trail and History – P56 *While a user is logged on, all actions and activities are registered, logged and time stamped. Every transaction created, every status change, every movement through to the next step in a workflow, every addition or deletion of a data item of any kind is part of this logging effort.*
- Browsers Supported – Common browsers – last 3 major releases; Explorer – only MS-supported.
- User Accounts and Administration – Role-based administration to access permitted sections of Ivalua environment.
 - User Authentication – Supported: Login / password authentication; Single Sign On (SSO) SAML 2 Web based authentication standard; Two-factor authentication; Reverse Proxy / IIS Agent based authentication (CA Single Sign On, formerly CA Site Minder)
- Federated Identity Management: SAML 2.0 protocols for Single Sign On. Single login for entire platform.
- Data Conversion – P61 Uses integrated Ivalua ETL (Extract/Transform/Load) utility.
 - KPMG-Ivalua team work with customer to define common data model and data to be exported. Three cycles of dry conversion data runs. Customer responsible for validated exported legacy data. Conversion will be executed multiple times during dev and UAT before Prod.
 - *EPROC-TECH* – Date conversion legacy data supported except for Solicitation data in State's system and Vendor performance data.
- Interface and Integration – P59 Synchronous and Asynchronous data transfers supported. Multiple communication protocols and data formats, including flat files, JSON, XML, cXML, OCI, IDOC (SAP)
 -
- Office Automation Integration – All file types supported as attachment.
 - Excel support across sourcing process.
 - Reporting tools natively export to Word, Excel and PDF
 - Contract tool imports Word documents.
 - Contract data can export Word and Pdf.

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Mobile Device Support – P61 *Ivalua is a fully responsive HTML application; screens adjust to devices, e.g., on when using Ivalua on a mobile device the screen menus change for PC layout to Mobile-friendly layout.*
- Mobile Applications – Mobile solution runs on Webkit-enabled browser; no separate app.
- Data Ownership and Access – P61 *Customers remain the data owner and data controller of all data they place into their Ivalua instance and should apply access controls to restrict access to data within their instances based on their own requirements and needs, in accordance with their access control, data retention and data classification policies.*
Internally, Ivalua has its own data classification policy. All customer data is classified as Confidential and access to the environment where customer data is stored is limited to a small number of individuals on a need-to-know basis.
- Date Retention, Archive and Purge Considerations – P62 *Ivalua does not delete or modify customer data, unless requested by the customer to do so, and only processes data in accordance with its contractual obligations and the customer's configuration of their instance(s).*
- Disaster Recovery Plan – P62 *Ivalua BC and DR Program is based on ISO/IEC 22301 standard framework*
 - Documented backup and recovery procedures
 - Crisis/incident management procedures
 - Stakeholder communication processes
 - Replicated Web server and Application server; replicated database backups; redundant support services; contingency plan for hosting and ISP.
 - P63 *Ivalua notifies impacted customers of data breaches which Ivalua becomes aware of without undue delay, but within seventy-two (72) hours - unless a shorter time is specified in the contract*
- Solution Environments – Minimum 3 environments – Dev, Acc (test), Prod.
 - Training environment available. – add fee.
- Solution Technical Architecture – All customers environments isolated in enterprise grade cloud architecture. End users access Ivalua from web browser – no client software installation required. – 64-bit MS stack. Plus open standards REST, JavaScript, HTML, XML and JSON.
 - Database layer on servers in non-internet routable network segment – requests not made directly to database tier; only issue from customer's instance.
 - No commingling of customer data.
- Solution Network Architecture – All RTMs standard functionality.
 - P66 *Intrusion Detection System and Intrusion Prevention system (IDS/IPS), monitors and blocks malicious traffic or attack on network traffic traversing the device.*
 - *systems log unexpected network activity (volume of traffic, protocol anomaly, signature-based attack) and notify Ivalua IT staff in real time via emails and text messages.*
 - P67 *Equinix DC3 Data Center - Ashburn, VA (Primary, DR); CH3 Data Center - Elk Grove, IL (Primary, DR)*
 - *Ivalua also guarantees a Hosting SLA (hit response time, uptime) and can share a monthly report with the client upon request.*
- System Development Methodology - P67 *secure-SDLC policy and procedures that ensure security-related functions are covered during the development life cycle from design to implementation to testing. New features are evaluated for their security impact during the design phase, regular code reviews (peers and SAST tools) are conducted internally during the implementation phase and tested for effectiveness during the QA process.*

- *Ivalua's development process is based on the Agile methodology with its iterative approach to software development and assessment. This embeds Quality Assurance directly into the ongoing development process.*
 - *P68 Configuration Management Program for its Cloud services in accordance with NIST Security-Focused Configuration Management of Information Systems guidelines. Ivalua applies Security-focused Configuration Management for establishing baselines and for tracking, controlling, and managing many aspects of the secure lifecycle of all information system resources, configurations, and processes.*
 - *All application changes/updates are at the customer request and control, and they will be performed either behind the scenes (for minor updates) or through scheduled downtime (for major updates). Customers typically enforce their own change management process.*
- **Service Level Agreement – Sample attached. 99.8% uptime. Monthly scheduled maintenance.**
 - *Service credit 5% for <99/8% increasing through levels to max of 25% for <85%.Credits applied against future prof. serv. Fees. No refunds unless <90 on contract.*

Security Requirements

- **Cloud Security Alliance (CSA) Compliance – CAIQ 3.0.1 provided (No unusual.)**
 - *IAM-02.7 Ivalua doesn't share internal security metrics with customers. The termination control is tested as part of the SOC control and SOC report is provided to the customers upon request.*
- **Security and Privacy Controls- P69 Needs clarification** *Ivalua is currently in the process of validating controls and safeguards against NIST SP 800-53 Revision 4 "Moderate" risk controls for FISMA compliance with our Commercial Cloud. Is this complete?*
- **Security Certifications - Ivalua has implemented an Information Security Management System (ISMS) in accordance with ISO/IEC 27001. Ivalua is annually audited SSAE-18 SOC1 and SOC2 (US) and ISAE-3402 (Europe). Ivalua is also annually audited HIPAA and complies with business associates' requirements of the Privacy, Security, and Breach Notification Rules.**
 - *P70 Ivalua is not currently audited for PCI-DSS compliance. However, Ivalua has safeguards and security controls in place to protect cardholder data in accordance with the PCI-DSS standards and is leveraging its Hardware Security Module (HSM) infrastructure to manage cryptographic keys used to secure cardholder data.*
 - *Ivalua is FedRAMP Ready with our GovCloud and listed on the FedRAMP Marketplace.*
- **Annual Security Plan – P71 Ivalua has built its security program and implemented an Information Security Management System (ISMS) in accordance with ISO-27001. The security controls deployed are in alignment with ISO/IEC 27001 and NIST SP 800-53 "Moderate" baseline requirements to address the information security risks. We are certified SSAE-18 (US) and ISAE-3402 (Europe).**
 - *Ivalua enforces the principle of least privilege across the entire organization. Role-based access control at directory and application levels and firewall rules are used to manage access.*
 - *Only users with the appropriate profile can load a page or execute a function. It is also possible to limit the data access of business objects on a per user basis.*
 - *Ivalua Solution architecture leverages a multi-instance tenancy model on shared servers. Our model creates a very distinct boundary between the data of each client.*
 - *Ivalua invests a large number of resources to get itself audited by a 3rd party auditor against the SOC and HIPAA security frameworks. Every year it produces a report that is shared with its customers, upon request.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *5-stage incident response: Preparation; Detection and analysis; containment, eradication and recovery; post-incident activity; communication.*
 - *Ivalua applies a single data classification to all customer data it hosts. Ivalua does not inspect or monitor its customers' data and has no ability to understand how any data may have been classified by individual customers.*
 - *Ivalua has implemented numerous privacy and security practices to ensure Ivalua compliance with the GDPR.*
- Secure Application and Network Environment – Equipment hardened; proactive network security. See architecture above.
 - P77 Data at-rest and in-transit is encrypted using the industry-standard AES 256-bit encryption. Ivalua Cloud infrastructure where client data are stored, processed, and transmitted:
 - The web traffic between the end-users and the servers is encrypted using TLS (HTTPS). Ivalua SSL X.509 CA certificates are generated with RSA 2048 key size and SHA-256.
 - P78 *In Ivalua's infrastructure, managed devices (switches, routers, firewalls) and services communicate their activity logs to two different servers, located in two geographically distant data centers.*
 - *While a user is logged on, all actions and activities are registered, logged and time stamped. Every transaction created, every status change, every movement through to the next step in a workflow, every addition or deletion of a data item of any kind is part of this logging effort. As a result, the system can produce a detailed audit trail of exactly who did what, where and when. This audit trail can be produced in reports on a real-time basis.*
 - DLP strategy includes an administrative policy around removable media and data loss prevention.
- Secure Application and Network Access
 - P81 *Each client application instance runs under a dedicated application pool process with a client dedicated identity. This model also facilitates the ability to perform upgrades and maintenance on an individual basis without impacting other clients' instances. This model enables higher instance availability.*
- Data Security – See above. All narrative in this section has been stated in other areas.
- Personally Identifiable Information Protection – P85 *Ivalua has implemented numerous privacy and security practices to ensure Ivalua compliance with the GDPR.*
 - *Customers may configure access to PII such that customer-defined roles have access to PII within the Ivalua platform. When providing customer support, Ivalua may have access to PII data.*
 - *Ivalua is also annually audited for HIPAA and complies with business associates' requirements of the Privacy, Security, and Breach Notification Rules.*
- Security/Privacy Issue Occurrence - *reporting obligations are set forth in Ivalua's customer contract. In the absence of a contractual requirement, in the event of any breach of PII, the customer will be notified without undue delay but no later than 72 hours.*
- PII Data Actual/Attempted Access or Disclosure – See previous
- Security Breach Reporting – See previous

Implementation Services Requirements

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Project Management – KPMG governance and project management plan detailed from p84 in Section III response. KPMG project manager. Integrates key customer stakeholders in the implementation team. Detailed risk management and issue management processes.
- Project Implementation Methodology – 5 phases. Vision, validate, construct, deploy, evolve.
 - Use of pre-configured delivery models, training materials and benchmarks to accelerate project. Avoids reinventing the wheel.
 - P109 Test scripts to be developed in collaboration with customer organizations. Note that in assumptions on p185: KPMG not responsible for developing UAT test plan or UAT scripts.
 - Cutover to production occurs as part of go/no-go prior to full go-live.
 - Post go-live support/hypercare (4 stage severity levels for defect resolution.) Evolve phase.
 - Supplier enablement- start with current/future state identification.
 - Identified org role-based map according to project responsibility: leadership, functional and supplier support; data migration, testing, change mgmt/training, managed services
 - Identifies roles in customer org. including time commitment expected.
- Catalog Support Services – KPMG and customer identify hosted/punchout best fit for each supplier.
 - KPMG does catalog set up with internal users; Vision – 2 years spend data to assess; Validate contracts; Publish punchout and hosted catalogs prior to go-live; construct – configure punchout – setup online marketplace. KPMG engage state users to test catalogs and validate. trains customers on future hosted and punchout catalog set up.
- Data Conversion Services –KPMG works with state on data migration strategy, defining data conversion, mock and production data extracts, data cleansing, transform/load processes, quality assurance.
 - Uses Ivalua ETL/ETA module. Phases: Extract; Transform and Load; Data Reconciliation.
 - 9 preliminary datasets identified as likely for conversion with sources data (ERP or external (existing) systems.
 - P123 Optional Cognitive Contract Management (CCM) KPG platform to read and ingest documents including contracts, price lists and catalogs.
- Interface/Integration Development Services
- Restated 5-step deployment Vision, Validate, Construct, Deploy, Evolve for development. Parallel workstreams for GEP-KPMG and customer teams.
 - 10 integrations identified and process outlined including source and destination systems.
 - KPMG will design the format, develop, and test interfaces feeding in/out of Ivalua.
 - P127 Your organization will be responsible for mapping the data elements to your systems, developing and testing the interfaces coming into your organization systems and out of your organization systems into the proposed solution's services per the project schedule. Interfaces identified and finalized during Design Phase will be built in collaboration with your IT resources. It is assumed that for any interfaces/integrations to other third-party systems, your organization will provide for the necessary licenses, if applicable
 - Middleware solution or adapter will management integration between Ivalua, ERP, other apps.
- Organizational Change Management (OCM Services) – Detailed KPMG OCMT process outlined (can be scaled back for less complex projects)

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Proposal lists included projects and additional KPMG services. Clarification may be needed to state if proposal complies with RFP requirements without the “additional recommended KPMG services” (Difference between OCMT Strategy and OCMT Plan, for example). Are these additional services included in cost workbook? Should they have been referenced in the Value Added section?
- Training Services – KPMG Targeted learning model. Training the Trainer. – combination of instructor-led classroom/online and webinar. Self-service on-demand web-based training. Quick-ref guides.
 - Role-based training needs assessment; table breakdown of topics.
 - Troubleshooting guides. Developed training becomes property of customer.
 - Separate training plans for Trainers, System admins, help desk, suppliers.
- Help Desk Services – P150 KPMG provides Help Desk/Service Desk as part of managed services framework during the implementation. Trains state help desk staff on specific deployment.
 - Augments existing Help Desk by providing case management support for state’s power users via tickets submitted to KPMG’s ServiceNow system. Tickets to:
 - Tier 1 (client org)
 - Tier 2 – KPMG
 - Tier 3 – Ivalua or client IT as applicable.
 - KPMG subcontractor can provide Tier 1. (Needs clarification of optional cost.)
 - Help desk support is included for six months after go-live. Transition to state’s help desk, includes training and knowledge transfer.
 - EPROC_IMPL-3 and -4 – No live chat available.
 - EPROC_IMPL-5 – Ivalua Extranet ticket system can be viewed by customer, but does not integrate to customer’s ticket help system.
- On-site stabilization. Hypercare – 3 months. Monitor rollout; triage and support high-priority tickets; adjust configuration, defects. Focus on end-user adoption; transition to state support team and Ivalua Run team.
 - KPMG knowledge transfer plan
 - Quality gates with exit criteria to help stabilize system during hypercare for longer term managed services transition to steady state operations. 1. Pre-contracting and contacting; 2. Initiation and planning exit; 3. Execute and test exit; 4. Implement and stabilize exit.
 - P185 Assumptions – Assume Tier 1 support during hypercare is performed by customer; KPMG acts as Tier 2 support. Ivalua acts as Tier 3 support.

Managed Services Requirements

- Solution Support – P156 “Powered Evolution Services”: governance; base services; enrichment.
 - Identify support and escalation standards, performance category, issue severity level with descriptions.
- Repeat of description of infrastructure, SLA and environments.
 - SDLC policy and development and testing plans for rollout explained.
 - Testing has 4 levels: Manual tests and code reviews; load and performance testing; functional testing; regression and automated testing.
 - Repeat of contracted level 3 support and optional level 1 supports.
- Organizational Change Management (OCM Services) – P161 – OCMT (referenced in implementation – for areas that are needing to be additionally supported).
 - Focus on 1. Service delivery; 2. Service quality.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 2:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Stakeholder analysis/assessment.
 - Surveys to identify metrics.
 - Communication plan - engage change agent network to review software updates
- Training Services Service Center change monitoring Process – maintain current content.
 - Examples of training modalities: Email; team huddles; quick ref guides; micro-learning videos; eLearning; Instructor-led or Virtual live learning; office hours.
- Catalog support services. **P164** Proposal to refine and maintain existing catalogs, determine new catalogs as hosted or punchout; setup and configure punchout catalogs; publish hosted and punchout catalogs. **Needs clarification – is this in proposal cost or optional cost service?**
- Help Desk Services – case management support for state's power users via tickets submitted to KPBG's ServiceNow system. Tickets to:
 - Tier 1 (client org)
 - Tier 2 – KPMG
 - Tier 3 – Ivalua or client IT as applicable.
 - P186 – 25 ServiceNow licenses provided for power users.
- Transition out - P105KPMG team manages and oversees tasks to remove client users from system and information. In client environment, KPMG execute protocols to ensure KPMG personnel offboard.
 - Phased approach – formal toll gates act as check points to align clients and all parties. Three toll gates with processes totaling up to 10 weeks.
- Other Available Services: KPMG strategic sourcing, Contract Performance Management, Localization.

Video Demonstrations

- Major elements of Ivalua system and scenarios demonstrated.
- Clean system with consistent look and feel.

Other notes on Assumptions – p185

- Client procures 5 environments: 1 prod; 4 non-prod.
- All suppliers register directly in the solution
- KPMG configure 5 contract templates in contracting module
- Maximum of 25 configured fields
- KPMG not responsible for developing UAT test plan or UAT scripts.
- P188 Only active suppliers, POs and contracts converted.; Active solicitations completed in legacy system.
- P188 KPMG will use client's existing LMS.
- P188-189 Proposed training approach assumes Small=20; Medium=30; Large = 60 plus 5 Tech and 10 help desk for on-site end user training not to exceed 3 weeks; KPMG develops training materials.
- KPMG responsible for user documentation and on-demand electronic user materials.
- Client responsible for providing training development software licenses for Adobe Captivate or Articulate storyline to KPMG as requested.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 2-7)

- KPMG LLP is the US firm of the KPMG global organization with 40K+ professionals with "1,200 dedicated procurement professionals" the "bring the state and local government domain knowledge".
- "Featured in Spend Matters' Top 50 Providers to Know Almanac".
- "Designated as a 'Leader' in Gartner's Magic Quadrant for Business Operations Consulting".
- Services support "targeted improvements as well as implementing full-scale procurement transformation solutions".
- "Have particular depth in helping optimize 'Source-to-Pay' processes".
- "Have delivered 300+ cloud eProcurement projects" implementation"
- 400+ Source-to-Pay assessments and efficiency improvement projects completed"
- "Lessons learned" from "Ohio, Arizona, Alabama, Vermont and others will be leveraged"
- "Powered Enterprise approach" delivers "on Day One an out-of-the-box, preconfigured solution based on a leading business practice target" which "can help accelerate the transformation and change process".

2. Previous Projects

- KPMG projects are for Ivalua implementations. They do not demonstrate work with SirionLabs. (pg. 9-13)
- SirionLabs projects (pg. 17/18)
- **State of Ohio:** (pg. 9-11)
 - i. Source-to-Pay implementation, "supplier management, catalogs, sourcing, quote management, contract authoring and management, purchasing, invoice management, expense management, savings tracking, and spend analytics".
Full Suite eProcurement implementation.
 - ii. Batch Interfaces and Realtime /Integrations with PeopleSoft: Org Structure, Users, Chart of Accounts, Thresholds, Controlling Board, UOM, Payment Methods/Terms, Commodity Code, SSO, Addersses, Suppliers, Contracts, eSignature, Catalogs, Budget Validation, Purchase Orders, Change Orders and Invoices.
 - iii. 3 releases: eMarketplace/Supplier Management, Procure-to-Pay, and Source-to-Contract. Conversions: 50K users, 4K Orgs, 150K Suppliers, 2K Addresses,

SME DEPARTMENT/STATE: NASPO

- 1.5K Contracts and 30 Catalogs. Project started 9/7/2018, R1 Go-Live 12/17/2018, R2 Go-Live: 12/4/2019 and R3 Go-Live:
- iv. Train-the-Trainer approach with “25+ instructor-led courses” delivered “both onsite and virtually” and provided webinars. Provided user manuals, job aids, interactive web-based training courses and microlearning videos. 11/2/2020.
- **State of Arizona:** (pg. 11)
 - i. Source-to-Pay... *Full Suite eProcurement implementation.*
 - ii. “35+ Integrations/Interfaces” with CGI Advantage for Vendor, Requisitions, Purchase Orders, Receipts, Invoices, Master Data and Inventory.
 - iii. Project dates: Nov 2017 to Feb 2019
 - **State of Alabama:** (pg. 11/12)
 - i. Source-to-Pay... *Full Suite eProcurement implementation.*
 - ii. “50+ Integrations/Interfaces” with CGI Advantage for Suppliers, Chart of Accounts, Budget Validation, Purchase Orders and Invoices.
 - iii. Migrated 15K+ suppliers and 1.5K+ contracts.
 - iv. Created “localization template to bring additional agencies and state entities onto the Ivalua platform”.
 - v. Project dates: March 2020, on-going. Go-Live June 2021.
 - **Teachers Retirement System of Texas:** (pg. 12/13)
 - i. Source-to-Pay implementation, Supplier Mgmt, Purchase Request/intake, Sourcing, Contract Authoring/Mgmt, KPMG cognitive contract mgmt tool, Purchase/Change Order, Invoicing, Payment and Reporting.
 - ii. Inbound/Outbound interfaces with PeopleSoft: Contracts, Supplier, Account codes, Fund, Depts, PCA, Budget, Invoice OK to pay, Payment info, Users, SSO, DocuSign and auditing.
 - iii. Train-the-Trainer sessions: instructor-led, web-based with quick ref guides.
 - iv. Project dates: Sept 2020 to April 2021, Go-Live Jan 2021
 - **CalTrans:** (pg. 13)
 - i. Supplier and Contract management mentioned but full list of Ivalua modules that were implemented not listed .
 - ii. Migrated contracts
 - iii. Train-the-Trainer w/quick ref. guides.
 - iv. Project dates: Sept 2020 to April 2021, Go-Live Jan 2021
 - **US State Technology Authority:** (pg.17):
 - i. Automate/standardize contract management processes.
 - ii. \$822M contract value, 140+ Suppliers, 3000+ Obligations/SLs managed
 - iii. Advanced analytics & dashboards.
 - **Canada Airport:** (pg. 18):
 - i. Uses contract management and supplier management solutions for monitor/analyze supplier performance, collaboration management, contract storage, and advanced analytics.
 - ii. 800+ suppliers and manage 3500+ “obligations and SLs automatically”
 - iii. C\$570M managed in the system.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-SirionLabs

CATEGORY #(s): 2

DATE: 8/26/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Global Bank: (pg. 19)
 - i. System provided contract repository to manage contract changes, track vendor performance against obligations/SLs and track action items/issues.
 - ii. 100+ suppliers and manage 29K+ obligations/12K+ SLs.
 - iii. \$4.3B managed across 10+ categories.
- 3. Subcontractors (pg. 15-17)
 - SirionLabs Inc.:
 - i. Privately owned global company with over 550 employees.
 - ii. Provides a SaaS “end-to-end contract lifecycle management” platform.
 - iii. Has over “200 customers around the world”.
 - iv. Public and non-profit clients include “Georgia Technology Authority, Greater Toronto Airports Authority, UK Dept of Transportation”.
 - v. Fortune 500 customers include “BNY Mellon, Chemours, and Vodafone”.
 - vi. System includes “Contract authoring, Contract management, Performance management, Financial management, Relationship management and Risk management” with “embedded workflows”.
- 4. Organizational Chart
 - Org chart does reflect a project implementation however it is not clear which positions are State, KPMG or SirionLabs staff. While high level, the chart does reflect the core/key roles. (pg. 21)
 - The Role/Responsibilities table provides detail for the key/core roles but only for only the KPMG resources. SirionLabs responsibility details are about their role as a subcontractor but does not provide details at a role or position level. Similarly for the “Participating Entity”, there is no detail on Roles expected and the relevant responsibilities. The discussion provided is more of an overview. (pg. Does not address Ivalua or State positions. (pg. 22-24).
 - The RACI matrix (pg. 25) does provide good detail on the high level project activities with RACI designations for KPMG, SirionLabs and “Client”.
- 5. Litigation
 - “Have no pending litigation that would materially affect the firm’s operations or our ability to perform services for you”.
 - “KPMG is not aware of any significant issues relating to client contracts, or any terminations of those contracts, which would interfere with KPMG’s ability to successfully perform the services contemplated”.
- 6. Financial Viability (pg. 31-33)
 - Total revenue for fiscal year ending Sept. 2020 was “\$9.6 billion”
 - KPMG’s outstanding debt rating by the National Association of Insurance Commissioners is “NAIC-1”, the “highest credit quality ranking on the NAIC ratings scale”.
 - Only provided 2 of the 3 required recent year Audit reports.

Individual SME Comments:

KPMG Exceptions to Master Agreement, pg. 152-165: Need review by Maine and NASPO ValuePoint

- 31 exceptions to Maine T&Cs
- 28 exceptions to the NASPO ValuePoint T&Cs
- Added terms for Help Desk and Managed Services:
 - o Definitions
 - o Provider Services Personnel
 - o Term and Termination
 - o Disclaimer and Limitation of Liability
 - o Indemnification
 - o Cooperation; Use of information and State Materials.

KPMG Assumptions, pg. 140-187:

- **General**, pg. 140
 - o 1st bullet: Participating Entities will "contract directly with the eProcurement Solution provider for the software licenses and with KPMG for implementation services". CONCERN, this may not be possible with some States or other Participating Entities based on their laws.
 - o 4th bullet: pricing is "subject to five percent year-over-year increase". CONCERN, not all Participating Entities can agree to an automatic price increase. In some cases they may need to use a Term/Condition for price increases based on an index instead. NEGOTIATION, suggest negotiating this.
 - o 7th bullet: "KPMG assumes up to 25% travel". NOTE, pricing reflects this amount of travel expense. NEGOTIATION, suggest having a means to reduce costs if a particular project does not need this much KPMG travel.
 - o 14th bullet: WEAKNESS... KPMG "may not be permitted to participate in a NASPO ValuePoint Administrative Fee or a State imposed administrative fee under this contract"
- **Project Related**, pg. 141
 - o 1st bullet: Fixed prices assume implementation periods of Small State=12 months, Medium State=15 months & Large State=24 months. CONCERN, this may make the prices between proposals not be comparable. Also, the time period for Small and Medium is too short.
 - o 2nd bullet: "Implementation plans provided assume 15 pilot agencies during each implementation. Any additional agencies/localization is out of scope and may be contracted by your organization as a change order." CONCERN, it is unrealistic to have

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

assumed the same number of agencies for each size of State. So the pricing is not realistic and also not going to be comparable to other proposals.

- 9th bullet: “any modifications to the out of the box functionality requiring custom code” is limited to only situations where there are “statutory requirements”. CONCERN, there may be RFP/RTM req’ts that end up requiring “custom code” so suggest getting this language modified to include any changes necessary to comply with RFP/RTM req’ts. NOTE, this assumption is repeated under reports (10th bullet)
- 13th bullet: “Client will procure five environments”. CONCERN, on pg. 63, Solution Environments” it refers to 3 environments. Need to CLARIFY what is included in the pricing.
- 15th bullet” “up to three supplier management questionnaires” will be configured. NEGOTIATION, suggest getting this number increased to five for Medium and Large State implementations.
- 16th bullet: “will configure up to five contract templates”. NEGOTIATION, suggest getting this number increased to ten for Medium and Large State implementations.
- 17th bullet: “maximum of 25 configured fields”. NEGOTIATION, suggest getting this number increased to 50 for Medium and Large State implementations.
- 19th bullet: “eProcurement system is considered the system of record for eProcurement supplier information”. CONCERN, some Participating Entities may have to have the Finance System be the system of record, depends on the implementation. Suggest NEGOTIATING to strike this assumption.
- 24th bullet: “During hypercare” the Participating Entity will “perform Tier 1 support”. “KPMG will act as Tier 2 support” and Ivalua “will act as Tier 3 support”. NOTE, need to check this against the narrative regarding Implementation Services HELP DESK.

- **Help Desk/Managed Services** (pg. 143)

- 1st bullet: Participating Entities will be limited to 25 users that can submit tickets to the KPMG Service Desk. NEGOTIATIONS, suggest increasing this number for Medium and Large States.
- 3rd bullet: On-going help desk services assumes that the Participating Entity will provide “Tier 1 support”. NOTE, need to check this against the narrative regarding Managed Services HELP DESK.
- 6th bullet: “assumes approximately 1% of the users will call/day with an average call duration lasting between 10 to 20 minutes”. CONCERN, what about support for Suppliers? Are the considered “users”?
- 7th bullet: “20 to 35 calls/analyst/day is assumed (8:00 AM to 5:00 pm local time)”. CONCERN, unclear how this metric fits with the “1% of the users” in the previous bullet. Also, what is meant by “local time”? Also, same question as previous bullet regarding Suppliers.
- 9th bullet: End-user support numbers. WEAKNESS
 - the “Total end-users” count does not match the Cost Workbook req’ts.
 - The “At Go-live” numbers are too low
 - “Ramp-up” numbers based on quarters along with the implementation plan months in the Projects assumptions means Large doesn’t get to 8000 users until end of 3rd year of implementation and just past 2 years for Medium and Small. This is not realistic.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- 10th bullet: WEAKNESS, Supplier support numbers for “Total Suppliers” should be 50,000 for each size State according to the Cost Workbook req’ts. Also the numbers are too low for “At Go-live”.
- 13TH bullet: SLA metrics.
 - KPMG is only agreeing to two of the 10 Production SLAs, Catalog Onboarding/Maintenance and External Sources Onboarding.
 - KPMG is not agreeing to any of the Implementation SLAs
 - Ivalua is responsible any other SLAs and according to the Service Level Agreement section they have their own “hosting and maintenance SLA”.
 -
- **Reports/Conversion/Interfaces, pg. 144**
 - 1st bullet: Limits the number of reports for each size of State. NEGOTIATION, suggest increasing to at least twice the listed numbers.
 - 16th bullet: “only active suppliers, purchase orders, and contracts will be converted/moved”. NOTE, this conflicts with Implementation Req’ts Data Conversion Services, pg. 118-120, which states the “preliminary recommendation of the data conversions based on the req’ts state in the RFP” includes In-process Requisitions, Approve Requisitions, Purchase Orders Transactions, Solicitation Data, Contract Data, Vendor Performance Data, User Account Data, Chart of Accounts Data and Historical Spend Data.
 - 10TH BULLET: “any modifications to the out of the box functionality requiring custom code” is limited to only situations where there are “statutory requirements”. CONCERN, there may be RFP/RTM req’ts that end up requiring “custom code” so suggest getting this language modified to include any changes necessary to comply with RFP/RTM reqts.
- **OCM/Training, pg. 145**
 - 4th bullet: Client required to do “analysis of historic purchasing data...” NEED TO CHECK OCM SECTION TO SEE IF THIS ANALYSIS IS INCLUDED.
 - 5TH bullet: KPMG will leverage your organization’s current Learning Management System”. CONCERN, there will be some Participating Entities that do not have LMS’s. What will the impact be?
 - 7th bullet: Limits the number of “Client end users”, “Key Technical Resources” and “Help Desk Administrators” to be trained. NEGOTIATIONS, suggest that getting these numbers increased.
 - 8th bullet: TTT is limited to not “exceed three weeks”. WEAKNESS, this is too short a timeframe to learn the entire system and it will not fit into a phased implementation where training is divided among the phases.

General Principal and Requirements

Key Solution Functionality Elements, pg. 4-9:

- **Single Point of Entry (pg. 4):**
 - “integrates with SSO and can integrate with an entities procurement, ERP, CRM, services desk, etc. systems”.
 - Users are taken to a single, role-based screen w/dashboards.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Smart Routing** (pg. 4):
 - o “delivers an advanced workflow engine that supports high configurability”
- **Compliance:** No response provided
- **Portal** (pg. 4/5):
 - o “provides an integrated portal for suppliers/vendors to collaborate throughout the life of the contract”
 - o External Parties - STRENGTH
 - “Multiple users in parallel can edit parts of the contract... system automatically reconciles and consolidates” changes into single version.
 - “provides collaborative chat functionality within MS Word environment”.
 - “use @ to tag another user” which sends an email to that user
 - “using # user can assign clauses within the contract to other user”. “will navigate the user to the actual clause position the requires review”.
 - Sirion MS Outlook plug-in will automatically capture email notifications to external users and their responses using “# code methodology”. Appends “in the comments and attachments section of the” contract record.
- **Open Marketplace Environment** (pg. 5/6): N/A. Proposal isn't including Catalog functionality. The narrative response in this section describes the Contract Search functionality instead.
- **Integration** (pg. 6):
 - o “provides two-way integration” via REST API-based integration interfaces.
 - o STRENGTH, includes OOTB “integration adapters” ‘such as ERP, P2P, IT Service Management (ITSM), Governance Risk & Compliance (GRC) and CRM systems’.
 - P2P: Ariba, Coupa, Ivalua
 - CRM: MS Dynamics, Salesforce, Oracle
 - ITSM: ServiceNow, Remedy
 - ERP: Oracle, SAP
 - Contingent Workforce Mgmt Systems: Beeline, SAP Fieldglass, Workday
 - GRC: D&B, RSA Archer, MetricStream
- **Workflow** (pg. 6/7), STRENGTH: “provides an advanced engine that supports highly configurable workflows”. “can be conditional, and made contingent on key attributes of the contract”
 - o “unlimited steps, views, permissions, conditional steps”
 - o “Multi-party workflows involving client and their supplier users”
 - o “access controlled” to limit user capabilities for their workflow step
 - o “Ability to configure probes in a workflow to measure lead times, aging, cycle time, etc.”
- **Document Management** (pg. 7):
 - o “tracks all contracts, related attachments, and amendments”.
 - o “no storage limit on contract and related document storage”
 - o “access rights can be configured”
- **Reporting, Dashboards & Data Visualization** (pg. 8):
 - o “over 250 reports and dashboards” OOTB.
 - o Allows users to “create and save customer reports and dashboards”
 - o “dashboards are interactive and exportable”
- **Configurable** (pg. 9):
 - o “user access management provides granular rule, role and instance-based access, with an unlimited variety of combinations”
 - o “allows simple configurations of multi-geography, multi-business unit teams”

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Transparency** (pg. 9): “simple integration with third-party applications, enabling real-time data transfer and can further work to review” needs for contract visibility to existing or new portals”. CONCERN/POTENTIAL WEAKNESS, system does not have public access capabilities OOTB.

User Experience, pg. 9-16:

- **Personalization** (pg. 9/10): “provides user-based views to be saved based on role, need, or use case”
- **Intuitive Navigation** (pg. 10): “navigate with a pop-out menu and functional areas can be access via dashboards”.
- Wizard-driven (pg. 11/12):
 - o “online help manual” that is “full-text searchable, enabling user to find succinct answers”.
 - o “also offers an FAQ section”
 - o “guided navigation with pop-up help and next step guidance for users”
 - o “provides users with the ability to respond to an intuitive questionnaire to answer the type of contract required”. Based on the “values provided”, system “prompts best match templates from the configured template library” to “start the contract creation process”.
- **Portal** (pg. 13): “users can see their actions from their dashboard, while managers can see workloads for reassignment”
- **Mobile access and use** (pg. 13/14): “utilizes a web design that can be accessed on any web-enabled device”. NOTE: “a dedicated mobile app is slated for release later in 2021” which will “allow users to customize dashboards, view/act on requests, conduct advanced search and can open documents via Sirion document viewer”. CLARIFICATION, did this mobile app get released and what are the details of it’s functionality?
- **Workload Mgmt** (pg. 14/15): “provides review & reports of workload, and resassignments are managed within the platform”
- **Role-Based** (pg. 9):
 - o “Role Based Access Control (RBAC) whereby users may be assigned access rights”
 - o **User role groups**: Access templates containing a predefined set of operations a user assigned to **this templates may perform**”
 - o “**Entity** stakeholders”: “platform contains multiple entity types such as counterparty, obligations, actions, etc.” and each “entity type contains a set of stakeholders with assigned permissions”
 - o STRENGTH, “**Individual user access**: Each user has a profile and can be assigned custom permissions to perform system operations and access data”

Bidder Best Practices and Roadmap, pg. 16-18 :

- “multi-tenant SaaS-based application, built for scale and security”
- “has a quarterly release cycle”
- “Sirion was founded by legal and contract practitioners” and with KPMG the “combined approach should help ensure consistent practices and processes”
- “conducts monthly governance meetings and quarterly business reviews with customers to obtain feedback” on support and product enhancements”

Innovations and Value-Added Features/Services, pg. 18: Did not offer anything additional, just promoted their tool.

- “Sirion offers automated obligation and services level management functionality”

**STATE OF MAINE

SME DEPARTMENT/STATE: NASPO

Customizations/Extensions, pg. 18: NOTE, did not commit to incorporate changes required by the Contract into the solution however as they have defined their SaaS, any changes are part of the base system.

- "upgrades are backward compatible"
- Pg. 17: "As a SaaS solution, Sirion is always updated to the latest version automatically with every release"

Alternative Funding Models, pg. 18:

- No response provided.

Contract Transition and Flexibility, pg. 18:

- "Sirion is committed to discussing mutually agreed terms"

Functional Requirements – pg. 20-26

General Functionality: N/A

Supplier Portal: N/A

Supplier Enablement/Management: N/A

Buyer Portal: N/A

Need Identification: N/A

Request through Pay: N/A

Catalog Capability: N/A

Sourcing/Bid Management: N/A

Contract Management, pg. 20-22: Very mature and comprehensive tool.

- STRENGTH, Template Library (pg. 12 & 20)
 - o "Comprehensive clause and template libraries with smart tags" (pg. 20)
 - o "configurable " clause/definition libraries (pg. 12)
 - Can load "several variations of the same clause/definition"
 - "Capture standard and custom attributes for each clause/definition"
 - "Specify position for each clause/definition variation" ("preferred, fall back and walkaway")
 - "Easy identification of required clauses/definitions"
 - Assemble templates by "dragging and dropping clauses"
 - "Templates maintenance process... informs template owners of any updates made to the clauses"
 - "Each clause identifies the related templates"
- "Autosuggestion of templates and wizard" for "draft assembly"
- "Risk scores assigned at the clause level" to calculate "overall risk score"

SME DEPARTMENT/STATE: NASPO

- "Configurable workflows"
- STRENGTH, 3rd Party Paper: AI will extract meta data from an uploaded document and identify the clause sections of the 3rd party paper to standard clauses in the Template and compares automatically to standard clauses in the system to highlight differences. (pg. 20 & Video)
- STRENGTH, pg. 12 & 20: "parallel, access-controlled clause editing and auto reconciliation functionality" allows "multiple users (internal and external)" to edit "parts of the contract" at the same time.
- Collaboration/External Parties – STRENGTH (pg. 4/5 & 20/21)
 - o "Multiple users in parallel can edit parts of the contract... system automatically reconciles and consolidates" changes into single version.
 - o "provides collaborative chat functionality within MS Word environment".
 - "use @ to tag another user" which sends an email to that user
 - "using # user can assign clauses within the contract to other user". "will navigate the user to the actual clause position the requires review".
 - o Sirion MS Outlook plug-in will automatically capture email notifications to external users and their responses using "# code methodology". Appends "in the comments and attachments section of the" contract record.
 - o Collaborative Mode (Video) – multiple editors of the Word doc where only one person can edit a clause section but other users can see the changes that are happening at the same time. Effectively user is checking-out a Clause Section.
- "Hierarchical contract repository"
- "Alerts and advance notifications for upcoming contract renewals/expiration"
- Reports/Dashboards:
 - o "Personalized dashboard configuration for different user roles"
 - o Users can set up a Schedule for a report to be sent out in email to other users. (Video)
 - o from Pg. 8:
 - "over 250 reports and dashboards" OOTB.
 - Allows users to "create and save customer reports and dashboards".
 - "dashboards are interactive and exportable"
- From Video
 - o For reviewing/approving Contracts, each document is routed based on rules.
 - STRENGTH: has Sirion action Bar within Word to make Sirions Contract records and actions available within Word.
 - Directly look at Clause options from Library that could be pulled in to insert or replace existing clauses.
 - "Save to Sirion" to version doc in Sirion. Save has Comment field to explain what's changed and will prompt you to update the Workflow step the doc is at.
 - Can Share drafted Word Doc via email to anyone, not just Sirion user. If that user makes changes, this will go back to Sirion automatically.
 - STRENGTH: Sirion is embedded in Outlook with direct access to Sirion feature of Contract Requests.... So you can initiate a Request from Outlook and access existing Sirion in-process Contract Requests... can drag/drop attached docs in email to the Contract Request record.
 - o Review of edited/changed doc will show specific Clause changes.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH: Routing document for review/editing: can route only specific clauses to specific users for review/editing instead of the entire document.
- Master Agreement Type contracts will let you do child contracts/agreements in a hierarchy and will inherit the detailed Meta data from the Parent MSA
- STRENGTH.... SEARCH- all documents are indexed for full content search and can filter searches to reduce results.
 - For document content matches has a link in the results that will open a Viewer to show directly where that search content exists.

RTM

- STRENGTH, CNT-7: Co-authoring functionality allows for check-out of specific clauses in a document that is being edited by other users at the same time.
- WEAKNESS, CNT-10: Maximum file size for "support document" attachments is 200MB.
- STRENGTH, CNT-23: Document authoring capabilities and integration with MS Office products is very mature, robust.
- STRENGTH, CNT-25: Document authoring capabilities and integration with MS Office products is very mature, robust.
- WEAKNESS, CNG-32: Maximum size for each attached document is 200 MB.
- CONCERN, CNT-38: The described means of capturing Sub-contractors/Re-sellers describes defining suppliers related to each other as long term relationships like a corporate structure, not as a Prime/Sub relationship for a single contract.
- POTENTIAL WEAKNESS, CNG-45: System does not have a public posting capability. Must integrate with another system or website.
- POTENTIAL WEAKNESS, CNG-51 through 66: System does not have a public posting capability. Must integrate with another system or website.
- No req'ts need clarification.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Vendor Performance, pg. 22/23:

- Provides “configurable KPIs” for “flags, validation of invoices, and pricing, supplier types come out-of-the-box”
- “alerts deliver insight and comparison to contractual terms against actuals”
- “platform allows supplier uploads”
- “user-definable thresholds and alerts”
- “real-time visibility into actual performance data with granular comparison against contractually-obligated outcomes”
 - o “Obligation capture, classification and tracking”
 - o “Service level tracking and reporting”
 - o “work orders and request for services (RFS) for specific client relationships”
 - o “Performance metrics to compare performance across categories”

RTM

- POTENTIAL WEAKNESS, VPE-14: Surveys are only for users with logins, individuals without logins cannot be surveyed.
- POTENTIAL WEAKNESS, VPE-17: Must use contract performance obligations feature as components of each Contract Template or manually create these to have a means to issue "cure" tasks to Suppliers.
- POTENTIAL WEAKNESS, VPE-19: POs without a contract ID must be manually updated individually to record a Contract ID.
- WEAKNESS, VPE-25: Attached documents for Vendor Performance are limited individually to 200MB in size.
- One req'ts needs clarification.

Purchasing/Data Analytics: reporting is built into the Contracts Mgmt functionality

Technical Requirements – pg. 26-35

Availability, pg. 26: Does not meet req't for 100%.

- 99.8% availability target 99.8%
- “runs on a fully redundant environments within AWS”.
- “full daily backups” and synchronizes the data geographically every 30 minutes”
- RTO less than 120 minutes and RPO is 30 minutes or less

Accessibility Requirements, pg. 26: Partially meets req'ts.

- Is compliant with Web Content Accessibility Guidelines (WCAG) 2.0 AA

Audit Trail and History, pg. 26, 281 & TECH-1 thru 5: Partially meets req'ts. However is not a history page view for non-Admin users.

- “has full audit trail capabilities and maintains an audit log for each record and entity on the system”
- “captures actions performed...includes timestamp functionality, and tracks the user who performed the action as well as its requestor”.
- “Captures a metadata-level change history for key metadata fields”

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Audit log is "available to authorized users, such as an administrator" and contains a history of all changes"
- Audit Log, pg. 281

RTM

- Meets req'ts.

Browsers Supported, pg. 26: Partially meets req'ts.

- Chrome, IE, Firefox, Safari and Edge.
- Response did not address req'ts
 - o to support "any browser that is ranked as more than 10% of the Web traffic"
 - o to track browser use "to identify browser and platform trends"
 - o present a "notice" if a "page will be rendered inoperable on an older browser"

User Accounts and Administration, pg. 26/27 & TECH-6 thru 20: Partially meets req'ts. System does not provide a means to delegate user Administration to lower levels of the organization and limit their access.

- allows "configurations of global multi-geography, multi-business unit teams"
- "User access management provides granular, rule, role and instance-based access, with an unlimited variety of combinations"
- "exhaustive library of roles"
- "customize access for different user types"
- "role groups for easy allocation to users"
- "advanced user access control by a variety of attributes (e.g. role, geography, function, contract, or supplier/client scope)"
- "Role based access controls (RBAC)"

RTM

- POTENTIAL WEAKNESS, TECH-11: System does not provide means to delegate Admin functions to "lower levels in the organization".
- Two req'ts need clarification.

User Authentication, pg. 27 & TECH-21 thru 25: Meets req'ts.

- "supports single sign-on (SSO)"
- "Additionally, Sirion supports SAML 2.0 integration and two factor authentication"
- Access "is controlled via role-based and user-level access controls"

RTM

- Meets req'ts.
- One req't needs clarification.

Federated Identity Management, pg. 27: Meets req'ts.

- "supports single sign-on (SSO)"
- "Additionally, Sirion supports SAML 2.0 integration and two factor authentication"

Data Conversion, pg. 27-29 & TECH-26 thru 34: Meets req'ts.

- "will work closely with individual entities to determine the right level of data conversion"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "leverages an integration framework to build migration scripts to upload historical data"
- STRENGTH (pg. 28): "system analyzes legacy contracts and provides analytics on missing clauses, usage and deviations"
- STRENGTH, SirionAE: Sirion auto extraction is "an advanced AI/Natural Language Processing" technology used to "extract metadata, clauses, obligations, services levels, price-books from legacy contracts". Can "assist in extracting up to 80 attributes" from each contract.
- Can "extract and transform content from different file types, such as csv, xlsx, data and xml post"

RTM

- Meets req't's.

Interface and Integration, pg. 6, 29/30 & TECH-35 thru 60:

- Integration modes "support unlimited real-time two-way data sync and updates"
 - o Connectors: "provides connectors to interface" for "Salesforce, SAP, Oracle, PeopleSoft, ServiceNow and Docusign"
 - o Enterprise Service Bus (ESB): "exposes required functionality as end-points on ESB"
 - o File Systems: "has the ability to extract and transform content from different file types"
 - o Web services (REST APIs): "Sirion publishes functionality that can be access using Web Services/RSET APIs"
- "All the APIs accept JSON as a Payload and respond in respective JSON formats"
- Connectors, STRENGTH, pg. 6 & 29/30:
 - o P2P: Ariba, Coupa, Ivalua
 - o CRM: MS Dynamics, Salesforce, Oracle
 - o ITSM: ServiceNow, Remedy
 - o ERP: Oracle, SAP
 - o Contingent Workforce Mgmt Systems: Beeline, SAP Fieldglass, Workday
 - o GRC: D&B, RSA Archer, MetricStream

RTM

- Meets req't's.
- Two req'ts need clarification

Office Automation Integration, pg. 30/31, Video & TECH-61: Meets req'ts with notable STRENGTHs.

- "has out-of-the-box MS Word plugins"
- "Users can reply to email via Outlook to move workflow steps forward"
- "allows formatting of MS Word documents" via "plugin during contract authoring"
- "user can also send a PDF version of a draft"
- STRENGTH, pg. 30: Drafts sent to external stakeholder via email, if the "respond to the same email with comments and attachments, these become attached to the relevant system record"
- From Video
 - o For reviewing/approving Contracts, each document is routed based on rules.
 - STRENGTH: has Sirion action Bar within Word to make Sirions Contract records and actions available within Word.
 - Directly look at Clause options from Library that could be pulled in to insert or replace existing clauses.

- “Save to Sirion” to version doc in Sirion. Save has Comment field to explain what’s changed and will prompt you to update the Workflow step the doc is at.
- Can Share drafted Word Doc via email to anyone, not just Sirion user. If that user makes changes, this will go back to Sirion automatically.
- STRENGTH: Sirion is embedded in Outlook with direct access to Sirion feature of Contract Requests.... So you can initiate a Request from Outlook and access existing Sirion in-process Contract Requests... can drag/drop attached docs in email to the Contract Request record.

RTM

- Meets req’ts.

Mobile Device Support & Mobile Applications, pg. 32 & TECH-62: Meets req’ts.

- “is accessible via any mobile device using native browsers”
- From pg. 13/14: “utilizes a web design that can be accessed on any web-enabled device”.
- “A native Sirion mobile app is currently in the beta stage and will be rolled out” at “no additional cost at the end of 2021”

RTM

- Meets req’ts.

Data Ownership and Access, pg. 32/33: Meets req’ts.

- “All data resides in the Sirion application, access to which is controlled via role-based * user-level access controls”
- “customer will always be the owner of the data”

Data Retention, Archive and Purge Considerations, pg. 33 & TECH-63: Meets req’ts.

- “Retention/Archiving capability is built into the solution”
- “Automatic deletion can be set up per retention policy parameters”
-

RTM

- Meets req’ts.

Disaster Recovery Plan, pg. 34: Partially meets req’ts. Response did not address the sequence of events and notifications.

- “maintains business continuity and disaster recovery measures”
- “all production servers are deployed at two locations:
- “in case of failure, an automated process moves customer data traffic away from the affected area”
- “Incremental sync occurs every 30 minutes”

Solution Environments, pg. 34 & TECH-64 thru 68: Does not meet req’ts. There are not separate testing and training environments. A single sandbox environment supports both testing and training.

- “provides Sandbox environments which have data, workflows and configurations similar to production”

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "this environment serves the testing and training needs"

RTM

- WEAKNESS, TECH-65: The Sandbox environment does not provide a means to test/training the actual real-time integrations and batch interfaces.
- WEAKNESS, TECH-67: The Sandbox environment does not provide a means to test/training the actual real-time integrations and batch interfaces.

Solution Technical Architecture, pg. 34 & 212 : Meets req'ts.

- "MVC architecture with some business micro-services"
- "Based on Java, Spring, PostgreSQL and Elasticsearch"
- Architecture, pg. 212

- **Solution Network Architecture**, pg. 35 & 214: Partially meets req'ts. Response did not provide the req'd details about the Hosting Center.
- "A single instance on AWS"
- "Dynamic load adjustment to scale up"
- Network Architecture, pg. 214

System Development Methodology, pg. 35 : Meets req'ts.

- Product Lifecycle Management, pg. 216
- Software Change Management Process, pg. 266
- Quality Assurance Processes, pg. 268

Service Level Agreement, pg. 26 & 35: Partially meets req'ts. Response did not "review and indicate compliance" to the RFL SLA document. Also, did not provide sufficient details to understand the Sirion SLA.

- "In-house support team that provides 8*5 (client's business hours) help desk support at no additional cost"
- Incident Management (pg. 26, 36)
 - o Severity Level 1: Response time 90% in two business hours and update frequency two hours
 - o Severity Level 2: Response time 90% in four business hours and update frequency one business day
 - o Severity Level 3: Response time 90% in one business day and update frequency four business days
 - o CONCERN, there are no definitions provided for the three Severity Levels.
- CLARIFICATION: Pg. 26 states "24x7 support at no additional fees" however on both pg. 26 and 36 it states "additional level of support, including 24x7 support that includes phone support, is available as an option". These statements seem to conflict.
- CONCERN,

Security Requirements – pg. 37-40

Cloud Security Alliance (CSA) Compliance, pg. 37: Meets req'ts.

- "Sirion's application is hosted on AWS which is certified under the Cloud Security Alliance."

**STATE OF MAINE

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "KMPG has submitted the Sirion-provided CAIQ"
- "Sirion is in the process of completing CSA Star registry"

Security and Privacy Controls, pg. 37: Does not meet req'ts. Did not provide the req'd information on level of NIST 800-53 compliance.

- "is committed to data protection/compliance with broader privacy regulations such as GDPR"
- Sirion "has a formal privacy policy and procedures in place"
- "Conducts an annual Data Privacy Impact Assessment"

Security Certifications, pg. 37: Meets req'ts.

- "Compliant with the leading security practices, including"
 - o SOC 1/SSAE 15/ISAE 3042
 - o SOC-2
 - o SOC-3
 - o FISMA, DIACAP, FedRAMP
 - o DOD CSM Leve 1 to 5
 - o PCI DSS LEVEL-1
 - o ISO 9001/ISO27001
 - o ITAR
 - o FIPS 140-2
 - o MTCS Level 3

Annual Security Plan, pg. 37: Does not meet req'ts. Response did not describe a Security Plan or the specific items to be in the plan.

- "SirionLabs is an ISO 27001:2013 certified organization"
- "external audit of Information Security Management Systems (ISMS) is performed annually"
- "ensure compliance with privacy regulations like GDPR"
- "a Data Protection Agreement (DPA) can be signed between the customer and SirionLabs"
- "conducts annual Privacy Impact Assessments for high impact processes"

Secure Application and Network Environment, pg. 38: Partially meets req'ts. Response did not address all req'd areas (see below)

- "deployed on AWS which provide reliable, scalable, secure, and high-performance infrastructure"
- "hosted in a dedicated Virtual Private Cloud"
- Logins are first handled by Application Load Balancer" which distributes incoming traffic among multiple E2 instances.
- "uses Security Groups (firewall) and Web Application Firewall (WAF) to control all inbound and outbound traffic"
- "Security Groups restrict traffic by protocol, service port and IP address"
- "laptops, are encrypted, USB, Bluetooth ports blocked". "Admin rights withdrawn". "Symantec End Point protection controls implemented"
- Building security controls/physical security (see pg. 38)
- Response did not address these req'd topics:
 - o 2 Factor authentication
 - o confirm that Participating Entity data is confidential/critical
 - o isolation of hosted servers
 - o prohibit loading of Participating Entity data on portable devices.

Secure Application and Network Access, pg. 39 & SEC-1 thru 5: Partially meets req'ts. Response did not address all req'd areas (see below)

- "deployed on AWS which provide reliable, scalable, secure, and high-performance infrastructure"
- "hosted in a dedicated Virtual Private Cloud"
- Logins are first handled by Application Load Balancer" which distributes incoming traffic among multiple E2 instances.
- "uses Security Groups (firewall) and Web Application Firewall (WAF) to control all inbound and outbound traffic"
- "Security Groups restrict traffic by protocol, service port and IP address"
- Response did not address these req'd topics:
 - o Network protocols used for the import/export of data
 - o Changes to hypervisor
 - o Security procedures regarding employees who have access to sensitive data.

RTM

- POTENTIAL WEAKNESS, SEC-1: System does not track device usage.
- POTENTIAL WEAKNESS, SEC-2: System does not allow concurrent login sessions.

Data Security, pg. 39: Partially meets req'ts. Response did not address all req'd areas (see below)

- "uses Web Application Firewall (WAF) to protect against common web exploits"
- Implemented "AWS Security Groups Firewall, Network Intrusion Detection Systems (NIDS) and Denial of Service (DoS) Protection" to control inbound and outbound traffic.
- "compliance with " GDPR
- "implemented technical and operational controls to help ensure personal data protection"
- Has "privacy policy and procedures in place and conducts an annual Data Privacy Impact Assessment"
- Response did not address these req'd topics
 - o Accessing user accounts or data
 - o Security measures for "data at rest and in transit
 - o Use of data

Personally Identifiable Information Protection, pg. 39: Partially meets req'ts. Response did not address all req'd areas (see below)

- "compliance with privacy regulations like GDPR"
- "has a privacy policy in place that covers all aspects of the lawful processing of personal data"
- "Data Protection Agreement can be signed between customer and SirionLabs"
- "conducts annual Privacy Impact Assessments"
- Response did not address these req'd topics
 - o "Not sell, rent, lease or disclose" PII
 - o Access to and use of PII by employees
 - o Destroy or return PII received
 - o Cooperate with monitoring of Bidder's compliance

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Security/Privacy Issue Occurrence and PII Data Actual/Attempted Access or Disclosure, pg. 40:

Does not meet req'ts. Response discussed data protection practices but did not address req'ts to address response to an "occurrence of any security or privacy issue".

-

Security Breach Reporting, pg. 40: Does not meet req'ts. Response indicated that Sirion has "incident management policies and procedures in place" but it not provide the req'd details.

Implementation Services Requirements

Project Management, pg. 44-60: Meets req'ts except for need to negotiate to change/remove the deliverable review/approval timelines. *NOTE: same as KPMG*

- "leverage our Program and Project Management (PPM) Methodology"
- "will implement an integrated Project Management Office (PMO)"
- PMO Tasks: OK
- Scope Management: OK includes defining "formal change control"
- Schedule Management: OK
- Budget Management: OK
- Quality Management: OK except for issue on review/approval times should be changed during Negotiations.
 - o "before starting project activities" will "work with you to define...each deliverable"
 - o "submit deliverables... based on submission timelines specified"
 - o WEAKNESS: "As a standard practice, we propose that your organization have five business days to review each submitted deliverable and provide comments". For corrected/resubmitted Deliverables, "expect your organization's approval or additional clarification...within five business days". This time is insufficient for large deliverables such as Design Documents.
- Resource Management: OK
- Communications Management, including Status Reporting (pg. 87/88): OK
- Risk Management: OK
- Issue Management: OK
- Project Manager Profile: OK
- Sample Implementation Plan: WEAKNESS, plan is for "small State entity" and has 9 months from start to go-live which is too aggressive. Should be 12 months to be realistic.
- Sample Bidder Staffing Plan: OK Good representation of what is needed.
- Sample Entity Staffing Plan: OK
- Project Governance Model: OK

Project Implementation Methodology, pg. 60-70 : Meets req'ts. *NOTE: same as KPMG proposal*

Catalog Support Services, pg. 71-73: Meets req'ts, however creation of catalogs is expected to be done by Suppliers.

- "will execute a spend analysis to match spend categories to the platform buying channels"
- "identify a good fit for a supplier"
 - o Vision - obtain historical spend data and contract data for past two years to assess and prioritize

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Validate – identify the proper contacts (buyers and suppliers). Publish templates
- Construct – ‘setup/configure punch-out catalogs, setup the online marketplaces and confirm the necessary items within each catalog’
- Deploy: upload catalogs and train end users on their use. Will train Participating Entity on managing punch-out catalogs and Suppliers on managing hosted catalogs.
- Evolve: train end users on setting up new punch-out and hosted catalogs. Also train on “identifying additional suppliers to enable”

Data Conversion Services, pg. 73-81: PROBLEM

- “will automate the various steps” using “Ivalua ETL/EAI module and using internal accelerators”.
- “Ivalua ETL module” to “perform data import, transformation and load”.
- CONCERN... Recommended Data Conversions, pg. 77/78: The list on these pages conflict with the Assumptions section (16th bullet, pg.145) states that “only active suppliers, purchase orders, and contracts will be converted/moved”.

OPTIONAL, Cognitive Contract Management (CCM): tool that will “read and ingest documents such as contracts, price lists, and catalogs” to extract/load contract metadata from “enterprise state-wide, and local applications and databases”.

Interface/Integration Development Services, pg. 82-87 :

- “have experience integrating Ivalua with leading financial and ERP systems” including SAP, PeopleSoft, CGI Advantage, among others”
- Experience “deploying a combination of batch and real-time”
- EVOLVE, Post-Implementation: CONCERN, response indicates that support will be moved to the State/Entity tech team. Need to NEGOTIATE that maintenance/support for the KPMG portion of interfaces/integration will be covered by the on-going maintenance support services.
- Paragraph just before “System Integrations & Interfaces table: refers to “real-time integrations getting from the source system an “immediate (synchronous) response”. “Immediate” is not viable for some integrations so suggest NEGOTIATE to remove the word “immediate” from this paragraph.
- Table of System Integrations/Interfaces: CONCERN,
- #1 Vendor Sync: identifies this as “Batch” and “Daily”. Need language added to the Notes to say that these may need to change based on design decisions so live procurements (Solicitation Awards, Contracts, Purchase Orders) are not held up for a day waiting for confirmation from ERP that vendor was successfully created.
- #2 Verification of accounting codes: having this be Batch/Daily means that a requisition will have a 1 day delay before the user can move forward with the procurement. Need to have this changed to Real-Time and to be all of the accounting code values.
- #3 Requisition & #4 P: need to remove “immediate” to allow for potential actions that may need to happen within the ERP (e.g. RTM req’t TECH-47 Approvals in the ERP) before a response can be returned.

Organizational Change Management (OCM Services) , pg. 87-97: Overall meets req’ts however as noted below the more significant services/tools that are discussed are listed as “Additional”. So the OCM included is not as strong as it could be.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirioin

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- The following req'd OCM deliverables are identified in the graphic on pg. 90 but are not listed in the table of OCM Services on pgs. 90-95: Coaching Plan and Resistance Assessment/Mgmt Plan.
- People TRIP, pg. 91: Note, this is a Readiness Assessment service listed separately from the req'd "Readiness Assessment" which they address on pg. 91. This tool is identified with an asterisk meaning it is "Additional" (not included) but pg. 95 it is referred to as a "no cost tool".
- "Additional KPMG recommended services" (bottom of pgs. 90-95): Many of the more valuable tools/services are "Additional" so the included OCM services are actually not extensive. NEGOTIATION, get these to be included at no additional cost.

Training Services, pg. 97-106: Meets req'ts. Train the Trainer approach with State training End Users. Very mature and comprehensive approach to training.

Help Desk Services, pg. 107/108 & IMPL-1 thru 5: Partially meets req'ts. No RTM responses were provided.

- Tier 1 is to be provided by the "Client"
- Tier 2 is to be provided by KPMG
- Tier 3 is to be provided by Ivalua or Client, depending on whether the issue is with the Ivalua system or the Client-side integration/interface.
- "would assign anywhere between five and ten FTEs" with the "capacity to expand up to thirty FTEs, as needed"
- "uses ServiceNow cloud-based platform"
- "we've included help desk support for the initial six months post go-live". NOTE: but this is not Tier 1 support.

RTM

- No responses were provided for the IMPL req'ts.

On-Site System Stabilization Support, pg. 108/109: Does not meet req'ts. Services will only "address defects and transition to steady state run and operate mode"..

- "design documents will not be updated due to defects"
- "KPMG can provide Tier 1/Level 1 support as well if desired and contracted by your organization". NEGOTIATION, suggest locking down an Optional price for KPMG to provide Tier 1 support for the 3 month period.
- Response did not address providing
 - o System setup/configuration changes
 - o Monitoring system performance/stability
- System use assessment

Managed Services Requirements

Solution Support, pg. 113-117 & MNGD-1: Generally meets req'ts however response did not specifically speak to providing the services for "all Production and non-Production environments" as req'd in the RFP. Also no response was provided in the RTM for MNGD-1.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "KMPG's Powered Evolution services help sustain your investment"
- Includes
 - o Triaging functional issues
 - o Assisting with the usage and navigation of features and functions
 - o Troubleshooting technical issues
 - o Assisting with data quality efforts
 - o Coordinating with third-party support organizations to resolve incidents
 - o Ivalua update support and planning
 - o Regression testing
 - o Maintaining configuration documentation
 - o Maintaining standard operating procedures
 - o Report writing
 - o Data load support
 - o Configuration changes
 - o Uptaking new functionality
 - o Governance
 - o Management reporting
 - o Change management (of system changes)
- Enrichment: CONCERN, Enhancements (80hrs or less/deploy in one month) are included but Large Enhancements (>80 hrs) are "considered separate project" (additional costs).
- Configuration Changes: CONCERN, only configuration changes "which require 5 days or less effort" are included in the scope of services. CLARIFICATION, how will configuration changes that require more than 5 days be addressed?
- Service Levels:
 - o CONCERN/NEGOTIATE, SLAs do not include response time commitments
 - o STRENGTH, the "Priority/Severity" descriptions are comparable, from business perspective, to those in the RFP SLA. NOTE: the response for the Technical Requirements, Service Level Agreement section does not include this, or any other, definition of Priority/Severity. NEGOTIATION, need to confirm that KPMG is accepting the definitions in the RFP SLA definition for the two SLAs they've agree to follow.

Organizational Change Management (OCM Services), pg. 118/119: Meets req'ts.

Training Services, pg. 119-121: Meets req'ts.

Catalog Support Services, pg. 121: Meets req'ts.

Help Desk Services, pg. 121/122: Partially meets req'ts. It is not clear how the Sirion Help Desk vs. the KMPG Help Desk fit in this proposal.

- Sirion Help Desk: discussed in Technical Req'ts Availability (pg. 26) and under SLA (pg. 35)
- KPMG Help Desk (pg. 121/122)
 - o It is unclear whether KPMG would provide Tier 1 support or if the Participating Entity must provide that level. Note that in the Support Services section on pg. 155 the Table list "Base Services" refers to L2 and L3 support which implies that the Participating Entity is providing L1 (Tier 1) support.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG-Sirion

CATEGORY #(s): 2

DATE: 12/20/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Transition Out Assistance Services: Partially meets req'ts. It is not clear how the Sirion Transition Out services vs. KPMG's fit in this proposal.

- Sirion: Described under Technical Req'ts, Data Ownership/Access (pg. 33/34) and Data Retention (pg. 33)
 - o "will retain data for 30 days after contract expiration"
 - o Will dispose the data "using technology compliant with U.S. Dept of Defense (DOD 5220.22m) standard"
 - o "will make customer-specific data available" for "export or download in a mutually agreed format"
 - o After that 30-day period, Sirion will be under no obligation to maintain or provide customer data"
- KPMG Response (pg. 122-124): Tasks/work meets req'ts however the timeline of 10 weeks does not meet the RFP req'd timing of continuing "for a period of up to six (6) months".

Other Available Services, pg. 126- NOTE: same as KPMG-GEP proposal

- Strategic Sourcing, pg. 126: Optional Service. KPMG would provide "strategic sourcing process entails spend analysis, market analysis, demand research, go-to market strategy development, bid document creation, bid evaluation and analysis, supplier negotiations, and contract awards."
- Should-Cost Modeling, pg. 129: Optional Service. KPMG would provide cost modeling using "Data Engineering, External Market Data Library, Granular Economic Modeling, Advanced Root Cause Analysis".
- Contract Performance Management (CPM), pg. 131: Optional Service. KPMG would provide contract management for the State/Entity, identifying contract leakage and taking corrective action.
- Localization Support, pg. 134: Optional Service. KPMG can "help onboard the remaining agencies as a part of the post implementation activities"... "loading data, training end users, and deploying the solution".

Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Extensive experience delivering government business solutions
 - Identified list of challenges and trends in government procurement
 - Sirion is specifically contract authoring/managment, financial management, risk management. (SAAS) (founded 2013) Contracts authored within platform
2. Previous Projects
 - KPMG - State agencies (Ohio, Arizona, Alabama), local.
 - International.
 - Sirion – Public/private sector,
3. Subcontractors
 - Sirion Labs Inc. (U.S. operation)
 -
 -
4. Organizational Chart
 - 550 employees. Some US based
 - Detailed title-based org chart. Did not identify any key staff.
 - RACI matrix identified Sirion-KPMG-Client responsibilities.
5. Litigation
 - None reported.
 -
 -
6. Financial Viability
 - Low risk.

Individual SME Comments:

Contract Lifecycle Management tool only

General Principal and Requirements – **No General Functionality RTM submitted**

- Key Solution Functionality Elements – Single sign on – integrates with ERP, CRM.
 - Draft contracts – multiple users can input in parallel. Folders show contract documents and note versions.
 - Integrated document viewer.
 - Price sheet can be uploaded or entered into the contract design/template.
 - OCR conversion of non-searchable documents.
 - Rule-based approval workflow with email notifications and reminders.
 - Dashboard with 250 standard reports.
 - Various role- or rule-based accesses.
 - Compare third party and internal documents in review process. AI can flag variations.
- User Experience – intuitive questionnaire to get to contract type; training program; online help/FAQs.
 - Templates — legal and non legal — for contract drafting. Two versions can be compared and tracked using Word plugin.
 - Audit trail
 - Mobile responsive design. (Mobile app planned for 2021)
- Bidder Best Practices and Roadmap – automatic latest version releases – matches – maximum one daily; minor enhancements max1 every two weeks; quarterly major releases.
- Innovations and Value-Added Features/Services – N/A
- Customizations/Extensions normal updates.
- Alternative Funding Models N/A
- Contract transition – may be doable.

Functional Requirements – **Functional RTMs submitted for Contract Management and Vendor Performance only. All are either A, INT or CF.**

- General Functionality
- Supplier Portal
- Supplier Enablement/Management
- Buyer Portal
- Need Identification
- Request through Pay
- Catalog Capability
- Sourcing/Bid Management

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG and Sirion Labs

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract Management – Contract repository – change management, renewals and expirations; notifications.
 - Analytics; invoice management; collaboration tools.
- Vendor Performance – supplier uploads. Kpis for vendors. Performance management. Visibility into contract drafts.
- Purchasing/Data Analytics

Technical Requirements

- Availability – target uptime is 99.8%. Actual is 99.5% Runs on AWS. Daily backups. Environments sync every 30 minutes.
 - 3 severity levels. Response 1 90% in 2 hours. Up to 3 90% in 1 day.
 - 24/7 support (ticketing and email); 24/7 phone support optional.
- Accessibility Requirements -WCAG 2.0
- Audit Trail and History – strong feature/ P27 – full annotation of version changes.
 - Audit trail and audit log – metadata-level change history. Log can't be edited by users.
- Browsers Supported – Standard browsers.
- User Accounts and Administration – exhaustive library of roles. Multiple role configs, and role-based access controls.
 - Documents can be tagged as financial, compliance, others – access controlled by tags.
- User Authentication – form-based user authentication. IDP can integrate, e.g. SAML 2.0 and 2MFA.
- Federated Identity Management – See previous.
- Data Conversion – legacy data can be uploaded. AI-powered auto extraction to OCR documents and load.
 - SirionAE tool may be required. (Cost)
 - Recommendation to move legacy contracts to a data warehouse for access via Rest API – reduces the migration timeline.
 - Digitizing legacy documents for searching.
- Interface and Integration – 3 user categories. – Task Owner, Manager, CXO.
- Integrations – connectors to ERPs, services now, SAP, Peoplesoft, Salesforce etc.; email; file systems; web services; document management hosts (Box, Sharepoint); GRC such as RSA Archer for risk and regulatory information.
- Office Automation Integration – out of the box office plugins; PDFs can be sent with lock function.
- Mobile Device Support – Accessible on mobile devices.
- Mobile Applications – App in 2021. – no additional cost. Functional limitations to approvals and status reviews.
- Data Ownership and Access – Sirion does not own customer data. P34 data exported to secure FTP at contract end. Sirion provides transition at no additional cost.
 - Data disposed 30 days after contract termination.
 - Only authorized individuals have access to customer data.
- Date Retention, Archive and Purge Considerations – See previous.
- Disaster Recovery Plan – RTO – 120 minutes; RPO – 30 minutes. Full daily backup of customer data. AWS mirrors productions instances in geographically diverse location – no single point of failure.
- Solution Environments – Sandbox environments with workflow for testing and training. Available post prod go-live.
 - No prod data in sandbox for security reasons.
- Solution Technical Architecture – Multi-tenant SAAS application -

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG and Sirion Labs

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Solution Network Architecture – AWS scalable. Tech changes common across customers.
- System Development Methodology – SLDC
 - Customer changes go through development, review and approval – QA.
- Service Level Agreement – See availability entry.

Security Requirements

- Cloud Security Alliance (CSA) Compliance – CAIQ provided. AWS common.
- Security and Privacy Controls – GDPR compliant; data privacy plan.
- Security Certifications – See p39. SOC 1, 2, 3, Fedramp. PCI compliant.
- Annual Security Plan – All data in Sirion application.
- Secure Application and Network Environment – AWS. – no Bluetooth or USB allowed on laptops in environment.
- Secure Application and Network Access – AWS/
- Data Security – P 41 web Firewall, DNS protection. GDPR>.
- Personally Identifiable Information Protection
- Security/Privacy Issue Occurrence / PII Data Actual/Attempted Access or Disclosure – ISO 27001:3013 certified. Data encryption at rest and in transit.
- Security Breach Reporting.

Implementation Services Requirements – Common notes to KPMG implementation Stage 4 including notes on offerings not included in Sirion product such as catalog

- Project Management – KPMG governance and project management plan detailed from in Section III response. KPMG project manager. Integrates key customer stakeholders in the implementation team. Detailed risk management and issue management processes.
- Project Implementation Methodology – 5 phases. Vision, validate, construct, deploy, evolve.
 - Use of pre-configured delivery models, training materials and benchmarks to accelerate project. Avoids reinventing the wheel.
 - Test scripts to be developed in collaboration with customer organizations. Note that in assumptions: KPMG not responsible for developing UAT test plan or UAT scripts.
 - Cutover to production occurs as part of go/no-go prior to full go-live.
 - Post go-live support/hypercare (4 stage severity levels for defect resolution.) Evolve phase.
 - Supplier enablement- start with current/future state identification.
 - Identified org role-based map according to project responsibility: leadership, functional and supplier support; data migration, testing, change mgmt/training, managed services
 - Identifies roles in customer org. including time commitment expected.
- Catalog Support Services – KPMG and customer identify hosted/punchout best fit for each supplier.
 - KPMG does catalog set up with internal users; Vision – 2 years spend data to assess; Validate contracts; Publish punchout and hosted catalogs prior to go-live; construct – configure punchout – setup online marketplace. KPMG engage state users to test catalogs and validate. trains customers on future hosted and punchout catalog set up.
- Data Conversion Services – KPMG works with state on data migration strategy, defining data conversion, mock and production data extracts, data cleansing, transform/load processes, quality assurance.
 - Uses Ivalua ETL/ETA module. Phases: Extract; Transform and Load; Data Reconciliation.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG and Sirion Labs

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- 9 preliminary datasets identified as likely for conversion with sources data (ERP or external (existing) systems.
 - Optional Cognitive Contract Management (CCM) KPG platform to read and ingest documents including contracts, price lists and catalogs.
- Interface/Integration Development Services
- Restated 5-step deployment Vision, Validate, Construct, Deploy, Evolve for development. Parallel workstreams for KPMG and customer teams.
 - 10 integrations identified and process outlined including source and destination systems.
 - *KPMG will design the format, develop, and test interfaces feeding in/out of Ivalua.*
 - *Your organization will be responsible for mapping the data elements to your systems, developing and testing the interfaces coming into your organization systems and out of your organization systems into the proposed solution's services per the project schedule. Interfaces identified and finalized during Design Phase will be built in collaboration with your IT resources. It is assumed that for any interfaces/integrations to other third-party systems, your organization will provide for the necessary licenses, if applicable*
 - *Middleware solution or adapter will management integration between Ivalua, ERP, other apps.*
- Organizational Change Management (OCM Services) – Detailed KPMG OCMT process outlined (can be scaled back for less complex projects)
 - Proposal lists included projects and additional KPMG services. **Clarification may be needed** to state if proposal complies with RFP requirements without the “additional recommended KPMG services” (Difference between OCMT Strategy and OCMT Plan, for example). Are these additional services included in cost workbook? Should they have been referenced in the Value Added section?
- Training Services – KPMG Targeted learning model. Training the Trainer. – combination of instructor-led classroom/online and webinar. Self-service on-demand web-based training. Quick-ref guides.
 - Role-based training needs assessment; table breakdown of topics.
 - Troubleshooting guides. Developed training becomes property of customer.
 - Separate training plans for Trainers, System admins, help desk, suppliers.
- Help Desk Services – **KPMG** provides Help Desk/Service Desk as part of managed services framework during the implementation. Trains state help desk staff on specific deployment.
 - Augments existing Help Desk by providing case management support for state's power users via tickets submitted to KPMG's ServiceNow system. Tickets to:
 - Tier 1 (client org)
 - Tier 2 – KPMG
 - Tier 3 – Ivalua or client IT as applicable.
 - **KPMG subcontractor can provide Tier 1. (Needs clarification of optional cost.)**
 - Help desk support is included for six months after go-live. Transition to state's help desk, includes training and knowledge transfer.
 - EPROC_IMPL-3 and -4 – No live chat available.
 - EPROC_IMPL-5 – Ivalua Extranet ticket system can be viewed by customer, but does not integrate to customer's ticket help system.
- On-site stabilization. Hypercare – 3 months. Monitor rollout; triage and support high-priority tickets; adjust configuration, defects. Focus on end-user adoption; transition to state support team and Ivalua Run team.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG and Sirion Labs

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- KPMG knowledge transfer plan
- Quality gates with exit criteria to help stabilize system during hypercare for longer term managed services transition to steady state operations. 1. Pre-contracting and contacting; 2. Initiation and planning exit; 3. Execute and test exit; 4. Implement and stabilize exit.
- P185 Assumptions – Assume Tier 1 support during hypercare is performed by customer; KPMG acts as Tier 2 support. Ivalua acts as Tier 3 support.

Managed Services Requirements - Common notes to KPMG implementation Stage 4 including notes on offerings not included in Sirion product such as catalog

- Solution Support – P156 “Powered Evolution Services”: governance; base services; enrichment.
 - Identify support and escalation standards, performance category, issue severity level with descriptions.
- Repeat of description of infrastructure, SLA and environments.
 - SDLC policy and development and testing plans for rollout explained.
 - Testing has 4 levels: Manual tests and code reviews; load and performance testing; functional testing; regression and automated testing.
 - Repeat of contracted level 3 support and optional level 1 supports.
- Organizational Change Management (OCM Services) – P161 – OCMT (referenced in implementation – for areas that are needing to be additionally supported).
 - Focus on 1. Service delivery; 2. Service quality.
 - Stakeholder analysis/assessment.
 - Surveys to identify metrics.
 - Communication plan - engage change agent network to review software updates
- Training Services Service Center change monitoring Process – maintain current content.
 - Examples of training modalities: Email; team huddles; quick ref guides; micro-learning videos; eLearning; Instructor-led or Virtual live learning; office hours.
- Catalog support services. P164 Proposal to refine and maintain existing catalogs, determine new catalogs as hosted or punchout; setup and configure punchout catalogs; publish hosted and punchout catalogs. Needs clarification – is this in proposal cost or optional cost service?
- Help Desk Services – case management support for state’s power users via tickets submitted to KPBG’s ServiceNow system. Tickets to:
 - Tier 1 (client org)
 - Tier 2 – KPMG
 - Tier 3 – Ivalua or client IT as applicable.
 - P186 – 25 ServiceNow licenses provided for power users.
- Transition out - P105KPMG team manages and oversees tasks to remove client users from system and information. In client environment, KPMG execute protocols to ensure KPMG personnel offboard.
 - Phased approach – formal toll gates act as check points to align clients and all parties. Three toll gates with processes totaling up to 10 weeks.
- Other Available Services: KPMG strategic sourcing, Contract Performance Management, Localization.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- LSI Consulting has provided product design, training design and delivery, organizational change management, and implementation consulting services for SAP customers since the establishment of SAP Public Services Inc.
- LSI has over 1,200 full-time employees,
- Supplier Relationship Management and Procurement (Ariba)
- LSI has developed a national practice across our Public Sector clients including State of Nevada, State of Arkansas, Commonwealth of Pennsylvania, San Diego County, San Bernardino County, Price George County, Clark County, Collier County, Houston Independent School District, City of San Diego, City of Palo Alto, Colorado Department of Transportation, Sedgewick County, Hawaii Department of Transportation, Port of San Diego, and many more which can be best reflected in the
- most recent Ariba implementations at County of San Diego and Sempra amongst others.
- LSi has significant experience implementing SAP ERP solutions but may not have done as much with the proposed full SAP Ariba suite of tools.

2. Previous Projects

- LSI has extensive list of Public Sector and Higher Education clients, though the list (pg. 8) does not specify what SAP solutions were implemented for each.
- **San Diego County** (pg. 9): LSI implemented Ariba Supplier Lifecycle and Contracting modules with integration to Oracle Financials. Also created Single Sign-On software. *Not a Full Suite eProcurement implementation.*
- **University of Kentucky** (pg. 10): LSI implemented SAP HCM, Finance, SAP Student Lifecycle Management, BW, SRM/PPS 7.0, Analytics and Ariba Contracts. *Not a Full Suite eProcurement implementation.*
- **Sempra Energy** (pg. 11): LSI implemented Ariba Contract Management with integration to their existing ERP with Microsoft Dynamics and Active Directory. *Not a Full Suite eProcurement implementation.*
- **City of San Diego** (pg. 12):
 - i. City implemented the "SAP Ariba procurement platform. City manages "buying, contracting, digital purchasing, increased spend visibility and more with SAP Ariba". LSI was not listed as being part of the project.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 8/26/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Washington D.C.** (pg. 13):
 - i. The District has been an Ariba On-Premise user and is now looking to transition to Ariba in the cloud. LSI is not listed as being part of the project.
 - **California Dept of Healthcare Services** (pg. 13):
 - i. "DHCS has deployed the complete SAP Ariba procurement platform, including strategic sourcing and buying & invoicing solutions". LSI was not listed as being part of the project.
3. Subcontractors
- No subcontractors
4. Organizational Chart
- Org chart does reflect an implementation project with high LSI positions identified. State positions are not identified, just listed as "State Team Project SMEs & Project Stakeholders" however the Role/Responsibility table does identify State positions/roles needed. (pg. 14)
 - Role/Responsibility table does identify the appropriate responsibilities for core/key staff (pg. 15-21)
5. Litigation
- No litigation.
6. Financial Viability
- All areas except Financial Stress rated at Low or Low-Moderate risk. (pg. 24)
 - Financial Stress (pg. 26): Moderate Risk, due to "low proportion of satisfactory payment experiences to total payment experiences".
 - One Tax Lien from South Carolina Dept of Employment and Workforce and five open UCC Filings. However, details are not clear as to the situation, circumstances or whether these are related to the proposed solution.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

Exceptions, pg. 142-145:

- LSI takes exception to 7 of the NASPO T&Cs.

General Principal and Requirements – pg. 48-21

Key Solution Functionality Elements, pg. 8-10:

- SAP Ariba is the solution
- Single Point of Entry: "AP Ariba Guided Buying serving as the single point of entry for all procurement-related requests."
- Smart routing: "Ariba includes a highly configurable workflow engine"
- Compliance: "SAP S/4HANA for product compliance, you can manage regulations, track registrations and substance volumes, classify products, and create compliance documents, as well as package, transport, and store hazardous materials properly with accurate labeling."
- Portal: "SAP Portal product portfolio". Available
 - o as "SAP Enterprise Portal (on-premise)
 - o on SAP BTP as SAP cloud Portal service
 - o (portal-like) sap Launchpad serviceCLARIFICATION, need to identify which is being offered.
- Open Marketplace environment: "SAP Ariba Business Network (SBN)". Customers choose to have access to all suppliers on the network or "only to their preferred suppliers". Also have "Spot Buy catalog solution" for "end users to find and buy non-sourced goods".
- Integration: "SAP's holistic integration approach"
- Workflow: "SAP Business Workflow enables the design and execution of business processes"
- Document Management: "SAP Ariba Contract Management module can track, manage, and store documents".
- Reporting, dashboards and data visualization: "SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports."
- Configurable: "configurable workflows to document templates" with "the flexibility to reflect state-wide or agency-specific rule-sets and processes"
- Transparency: "Vendor Portal" and "The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data." (pg. 10)

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

User Experience, pg. 10-12:

- “design to deliver a fast and ergonomic user experience minimizing end user training”
- “has configurable dashboards to meet each of the different type of user’s needs.”
- “SAP Ariba also provides mobile procurement tools to review and approve requisitions”

Bidder Best Practices and Roadmap, pg. 12/13:

- Quarterly Release: Feb, May, Aug & Nov
- Monthly Feature Deliveries: optional, no-impact release. Changes “virtually invisible to the end users”.
- Production quality metrics tracked for improvement needs.

Innovations and Value-Added Features/Services, pg. 13-16:

- SAP FieldGlass:
 - o SAP Fieldglass External Talent Management automates the entire process of procuring and managing flexible labor, from requisition through invoice and payment.
 - o “SAP Fieldglass Services Procurement can handle the management of a variety of Statement of Work (SOW) engagements including projects, offshore/offsite, independent contractors, managed programs, business services and Business Process Outsourcing (BPO) models”.
 - o “SAP Fieldglass Worker Profile Management enables companies to track and manage all non-traditional workers who are not tied to a job posting or Statement of Work (SOW).”
- SAP Ariba Supplier Risk Management: “lets the State tailor risk views and alerts to state’s business, to each supplier relationship, and to the State’s role. The State can also segment suppliers based on risk exposure.”

Customizations/Extensions, pg. 17 : System does not allow customizations but can have “extensions” added outside of the scope of the contract by other “partner” contractors.

- “SAP Ariba application extension partners can create and deliver applications that augment SAP Ariba solutions” (NOTE: these are companies that can create additional functionality from what is being proposed).

Alternative Funding Models, pg. 20 : Response did not offer any alternative funding models. Instead promoted the SAP Fieldglass application.

Contract Transition and Flexibility, pg. 20 :

- “LSI possesses an extremely high level of flexibility to transition from a state’s current contract to a new contract or amendment”

Functional Requirements – pg. 22-46 [Note, narrative same as IBM proposal](#)

General Functionality, pg. 22-24: Meets req’ts.

- “Ariba is a role-based solution”
- SAP Ariba Buying& Invoicing (including Guided Buying)
- SAP Ariba Sourcing
- SAP Ariba Contracts

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- SAP Ariba Supplier Lifecycle & Performance Management
- SAP Ariba Network
- SAP Fieldglass
- "A super user will be granted broader access to the solution by assigning multiple roles" to access functionality across the solution and "provide administration capabilities across the solution or for specific functional areas".
- "Guided Buying is the exception, which is designed for casual users to procure with a consumer like user experience".
- CONCERN, be default the system has built in use of the UNSPSC code set. Since Ariba is a SaaS (shared instance) State/Entities with a different commodity code standard will have to adapt to UNSPSC codes in some areas of the system where a crosswalk to their commodity codes will cannot be incorporated.
- SAP Ariba Business Network is a B2B network ("dynamic, digital marketplace") transacting "business commerce between more than 3.6 million" companies.

RTM

- WEAKNESS, GEN-4: User must manually post copy of a solicitation to a State's public website.
- WEAKNESS, GEN-5: To post Contracts on the public website, integration would be put in place to put a "link" on the website that would go to the Contract BUT only "licensed users" would be able to use the link to see the Contract.

Supplier Portal, pg. 24-30: Generally meets req'ts, however no details provided for public RTM req'ts (see RTM notes).

- Ariba Business Network (aka Ariba Network, Ariba Supplier Network)
 - o Single supplier account to transact with all Ariba customers, "supplier unified seller experience"
 - o State/Entity can choose to only access "their preferred suppliers" or all suppliers that are members of the Network.
- Ariba "Supplier Enablement Services" for the Network are included
 - o "will be responsible for most of the enablement process", onboarding
 - o The services will 'scale' up to meet "the State's volume" of suppliers
 - o Sends request for suppliers to confirm/accept relationship on the Network
 - o Provide phone support for registration "and conduct change management"
 - o Provide training on invoice submission
 - o Provide an Account Manager to State/Entity to "support suppliers and increase project engagement"
 - o Send "go-live letters" to inform suppliers when the State/Entity is going to start doing "electronic transactions"
- Supplier Portal functionality across all customers, not specific to a State/Entity using Ariba
 - o Consolidated order dashboard
 - o Order task reminders and rules-based order routing
 - o Access to Ariba Discovery public solicitation posting (postings by all Ariba customers)
 - o Contract collaboration/redlining
 - o Self-service hosted catalog creation as CIF, cXML and Excel files
 - o Self-service Punchout setup, separate setup for each Ariba customer
 - o Dashboard to manage catalog activity

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Option to have “public catalogs on the SAP Ariba Spot Buy Catalog solution” (similar to putting catalog in Amazon but only accessible by Ariba customers).
- Invoice create/submission to Ariba customers via PO-Flip or electronically from Suppliers internal system (cXML, EDI, CSV). With option to create non-PO invoices.
- Self-service Administration to define Supplier user roles and users
- Link multiple registration accounts to a Parent account
- Mobile app for access to orders, invoices, notifications, order/invoice graphs and can “confirm customer orders”.

RTM

- CONCERN, SPR-9 & 10: Response does not provide details and there is conflicting responses in the Technical Proposal referring to a Transparency Portal (pg. 10), Ariba Discovery (pg. 38) and using Ariba APIs to “exposed data” (pg. 40).
- CONCERN, SPR-18: Response only stated “Partner”. No detailed response provided for req’ts to allow suppliers to respond to a performance complaint/issue.
- CONCERN, SPR-19: Response stated “Not supported - Partner”. No detailed response provided for req’ts to allow suppliers to submit Admin fee payments.
- SPR-12 needs clarification, response did not address the full req’t.

Supplier Enablement/Management, pg. 30 : Generally meets req’ts.

- SAP Supplier Enablement Team will “design and develop the most effective enablement strategy” based on their “profile, PO and invoice volume, and spend”. Segment the “State’s vendor master data to effectively target/onboard suppliers in tiered waves”.
- Provides IRS TIN/Name “verification capabilities”
- For the Ariba Network, offers suppliers “user guides, FAQs, technical documentation, and free online seminars”.
- Can have “account specific information” via a “supplier information portal embedded in the Ariba Network”.

RTM

- NOTE, VDR-1: Registration is for the Ariba Network and uses a “supplier profile questionnaire” to capture State/Entity specific registration data.
- WEAKNESS, VDR-11: The Ariba Network captures UNSPSC codes with registration. State/Entity would have to add to the ‘questionnaire’ a selector for other Commodity Code taxonomies (e.g. NIGP codes) with registration.
- NOTE, VDR-19: Response does not address the req’t to validate IRT TIN/Name but in the Technical Proposal (pg. 25) it does indicate that this verification is available.
- WEAKNESS, VDR-20: Address validation is for “format” only. System does not use anything to confirm that the address is good.
- WEAKNESS, VDR-23: Debarment/watch list verification is an “add-on”, not included in the offering.
- Four req’ts need clarification, response did not address the full req’t.

Buyer Portal, pg. 31-34: Meets req’ts.

- Casual/Power Users, pg. 26/27: CONCERN,
 - Running “pre-packaged reports” is listed for Power Users, not Casual Users.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "Post solicitations" is listed for Power Users, so it may be that Casual Users won't be able to do 3 Bids/Buy (aka Quick Quote) functionality (see PRD-36 & SRC-11 references).

RTM

- Meets req'ts except 3 req'ts that need clarification, response did not address the full req't..

Need Identification, pg. 34/35 :

- Guided Buying, pg. 29: NOTE, Ariba concept for Guided Buying appears to be a Landing Page once the user logs in that provides a variety of options with titles that tries to 'Guide' the user based on what they are trying to do. So it's really up to the user to figure out which 'path' to take from the Landing Page.

RTM

- Meets req'ts.

Request through Pay, pg. 36: Generally meets req'ts.

- pg. 31/32: Ariba Buying/Invoicing module provides
 - Requisition, PO generation with Order delivery to Suppliers and Supplier Invoice submission via Ariba Business Network.
 - Approval workflow is on the Requisition, Change Order, Receipts and Invoices with in-tool/email/mobile approvals.
 - Suppliers can send order confirmation, advanced ship notice and invoices via their acct on the Ariba Business Network.

RTM

- WEAKNESS, PRD-6: System does not provide an automated means to control whether combining purchase for multiple Fiscal Years are allowed on a Requisition/Order.
- STRENGTH, PRD-11: System has the capability for Suppliers to invoice against a Contract instead of a PO.
- "POTENTIAL WEAKNESS, PRD-13:
 - System does not provide a "library concept" for standard specifications.
 - Attachments size is limited to 100MB each."
- WEAKNESS, PRD-15: Attachments throughout the system have individual size limits of 100MB per attachment.
- POTENTIAL WEAKNESS, PRD-23: System does not have a requisition feature for the user to enter a discount percentage that is automatically applied to the requisition pricing. However, can automatically apply a discount that is recorded on an associated contract record.
- STRENGTH, PRD-24: Input forms can have a workflow defined for the individual form.
- STRENGTH, PRD-33: Suppliers can set up their Ariba Network account to route Change Orders differently than original Orders.
- POTENTIAL WEAKNESS, PRD-37: System does not identify matching state source items to non-contract items or save matching items for later analysis.
- POTENTIAL WEAKNESS, PRD-39: System does not identify matching state source items to retail/commercial market items or save matching items for later analysis.
- POTENTIAL WEAKNESS, PRD-53: System does not provide a means for users to enter 'speed codes' that "automatically map/populate" other accounting fields.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, PRD-56: The system does not provide a means to enter 'back dated' requisitions/orders. So system will not be able to allow recording of purchases done outside the system.
- POTENTIAL WEAKNESS, PRD-62: System does not provide a means to specify a payment method "other than invoicing" on the purchase request.
- POTENTIAL WEAKNESS, WRK-10: For an authorized Approver to be able to over-ride/bypass to make a purchase request bypass any steps they have to manually remove each step from the workflow. There is no automation available for this.
- POTENTIAL WEAKNESS, WRK-12: Attachments size is limited to 100MB each.
- POTENTIAL WEAKNESS, WRK-13: Approvers cannot approve/deny by line item. To only approve part of the line items the Approver must delete the line items they want to deny.
- WEAKNESS, WRK-14: When an Approver edits a purchase request the workflow cannot be re-triggered to start again at the beginning.
- POTENTIAL WEAKNESS, PO-2: System does not have the capability to split a Requisition into separate POs for different Fiscal Years, holding the future Fiscal Year POs.
- WEAKNESS, PO-5: System does not provide the capability to have Agency/Organization specific PO templates.
- WEAKNESS, PO-15: The system cannot provide an internal and supplier printed version of an order. Though it can be customized, there is only one print format for an order.
- POTENTIAL WEAKNESS, PO-16: There is not eSignature functionality available for Orders.
- POTENTIAL WEAKNESS, PO-17: Attachments size is limited to 100MB each.
- POTENTIAL WEAKNESS, PO-24: The system does not notify "reviewers, approvers" when a PO has been cancelled.
- POTENTIAL WEAKNESS, PO-27: Orders cannot be created with out create a Requisition.
- POTENTIAL WEAKNESS, PO-28: Orders cannot be created from a Contract directly, must create a Requisition from the Contract.
- POTENTIAL WEAKNESS, PO-29: System does not provide a means to specify payment method, other than invoicing, on the PO.
- POTENTIAL WEAKNESS, PC-3: System does not provide a means to prevent Pcard use based on the type of a Purchase Request.
- WEAKNESS, PC-6: System does not provide a means for a user to enter/maintain their own Pcard information. Must have a Pcard Administrator manage this for users.
- STRENGTH, PC-8: Pcard reconciliation capabilities are comprehensive.
- WEAKNESS, PC-9: System does not have a means for users to record "non-purchase order Pcard transactions" as part of reconciliation.
- POTENTIAL WEAKNESS, PC-16: System does not provide a Pcard transaction integration to the Finance system for budget/funds verification and to encumber funds.
- POTENTIAL WEAKNESS, RC-3: System does not provide a means to record receipts without a corresponding PO in the system.
- POTENTIAL WEAKNESS, RC-4: Receipts cannot be recorded in the system and later associate it to a PO.
- WEAKNESS, RC-16: System does not have Receiving tolerances capability. Tolerances are defined on Invoicing.
- POTENTIAL WEAKNESS, INV-2: System does not provide a means to control which Agencies/Entities that a Vendor may submit electronic invoices for. The only control available is to control which Vendors are able to submit electronic invoices.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH, INV-8: System provides a "messaging feature" on Orders and Invoices to communicate with the Vendor.
- Ten req'ts need clarification, response did not address the full req't.

Catalog Capability, pg. 36 : Generally meets req'ts, with these caveats.

- Ariba Spot Buy catalog solution, pg. 33:
 - o NOTE, Ariba Spot Buy is NOT the equivalent to 3-Bids/Buy (Quick Quote). It is shopping "non-sourced" catalogs in a marketplace that Ariba has available through their Business Network where member suppliers can offer catalogs to sell to Ariba buying customers. Similar to accessing/shopping Amazon.
 - o WEAKNESS, to shop Spot Buy, users have to do a second Search after they have searched the State/Entity catalogs.

RTM

- WEAKNESS, CAT-6: System has a limit of 5000 catalogs.
- WEAKNESS, CAT-7: System has a limit of 500,000 catalog items in a catalog.
- WEAKNESS, CAT-10: System does not provide the capability to have catalog items that provide instructions to users without pricing.
- POTENTIAL WEAKNESS, CAT-11: System does not provide a means
- WEAKNESS, CAT-12: System does not provide catalog capabilities for configurable products or services.
- WEAKNESS, CAT-13: System does not have catalog capability to have pre-configured items with ability to substitute optional components.
- WEAKNESS, CAT-19: System does not allow for negative dollar value catalog items.
- Three req'ts need clarification, response did not address the full req't.

Sourcing/Bid Management, pg. 37-40: Generally meets req'ts, with these caveats.

- pg. 38: Public posting of the solicitation would only be on the Ariba Network "Discovery" website, which has all Ariba customer solicitations. As noted in the response to SRC-52 & 76, an integration would have to be created (not included) using the "Ariba Discovery API" to post on a State/Entity public website.
 - o CONCERN, conflicting answers for public posting
 - o Transparency Portal section, pg. 10: states that "the offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data". Response on pg. 38 only mentions Ariba Discovery.
 - o ALSO, on pg. 40 there is a reference to "Public Access to Data" in the Vendor Performance area which refers to APIs that could be used to "expose data to the public via a public website".
- Project Mgmt, pg. 39: STRENGTH, system provides "project management" feature of defining Phases/Tasks that users are "required to complete as part of the solicitation".

RTM

- POTENTIAL WEAKNESS, SRC-16: System does not have a specific solicitation type for "Invitation for Qualified Products".

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- CONCERN, SRC-23: The reference to access being "based on user licenses" may mean that the sourcing module is licensed separately from other modules. Need to look closely at the Cost Workbook.
- STRENGTH, SRC-28: The messaging feature seems to be a very strong fit to the collaboration requirement.
- WEAKNESS, SRC-35: The system does not provide "check-in/out capabilities for the repository.
- WEAKNESS, SRC-37: System does not provide a means to update documents, terms/conditions, specifications and have Templates that include them be automatically updated.
- WEAKNESS, SRC-38: System does not provide a means to identify templates that include documents, terms/conditions, specifications that have been updated.
- CONCERN, SRC-40: The statement "SAP Ariba will maintain the header data fields on behalf of the State..." implies that the State will not have Admin access to make configuration changes to the system.
- CONCERN, SRC-52, 76, 81, 90, 138 & 147: Response conflicts with responses in the Technical Proposal referring to a Transparency Portal (pg. 10), Ariba Discovery (pg. 38) and using Ariba APIs to "exposed data" (pg. 40).
- CONCERN, SRC-53: The limit of loading 9 attachments at a time may be a frustrating user experience if they have to load more than 9 documents.
- POTENTIAL WEAKNESS, SRC-54: OOTB the system utilizes UNSPSC codes. It may not directly support NIGP codes.
- POTENTIAL STRENGTH, SRC-56: The capability to "assign a weight to graders on a grader by grader basis".
- "WEAKNESS, SRC-63: Solicitations are ""limited to 100 supplier participants"" and to do more you have to set up ""different events"".
-
- CONCERN, SRC-63: The ""100 supplier participants"" limit ""to ensure maximum performance"" may mean that the system can't handle larger numbers of participants. May be a technical limit."
- POTENTIAL WEAKNESS, SRC-64: System does not provide a means for Suppliers to sign up to be notified when a sourcing event for an existing Contract is being issued.
- POTENTIAL WEAKNESS, SRC-67: System does not provide a means for un-registered suppliers to add themselves to a solicitation supplier list.
- STRENGTH, SRC-84: The "message board" can be copied on emails to post the email content into the message board automatically.
- WEAKNESS, SRC-88: The system can workflow full set of Q&A as a "tracking document" but does not support the specific details of this requirement.
- WEAKNESS, SRC-102: The sourcing module utilizes acct login as the esignature on solicitations. However they can do customization to provide DocuSign or Adobe eSign services with bids.
- CONCERN, SRC-118: The system does not have a designed means to capture subcontract data as part of vendor responses. Workaround is to attempt to use "RFx questions, lots and/or line items".
- CONCERN, SRC-120: If the report means that the user has to leave the Solicitation record/screen to run a report then this approach is likely to be frustrating to the user.
- CONCERN, SRC-125: If the report means that the user has to leave the Solicitation record/screen to run a report then this approach is likely to be frustrating to the user.
- WEAKNESS, SRC-129: Attachments sizes are limited to 100MB each.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, SRC-136: The system does not provide means to award directly to a purchase order. You must create a Contract and then do a release from the contract to create a PO.
- CONCERN, SRC-142: If re-seller and delivery locations are captured using "questions" then concerned how this information would be available for placing orders against the contract.
- Ten req'ts need clarification, response did not address the full req't.

Contract Management, pg. 40/41: : Generally meets req'ts, with these caveats.

- No specific detail provided in the Technical Proposal other than to say that the system provides "two components of the contract lifecycle", Contract Management and Contract Administration.

RTM

- "STRENGTH, CNT-2:
 - "redlined versions of a contract either using the application or... Microsoft Word"
 - "new Word document" providing a "version-to-version compare".
 - "final set of documents" to be published "automatically consolidates the selected documents to a final PDF version"
- POTENTIAL WEAKNESS, CNT-7: System does not provide a check-in/check-out feature for maintenance of standard documents/templates
- POTENTIAL WEAKNESS, CNT-8: System does not provide a means to automatically update templates that include standard documents where those document standards have been updated.
- POTENTIAL WEAKNESS, CNT-9: System does not provide a means to identify templates that include standard documents where the standard has been updated.
- WEAKNESS, CNT-10: System limits attachment size to 100MB.
- NEGOTIATION, CNT-12: Suggest negotiating in the integration with DocuSign or Adobe Sign (State/Entity choice of which) to be included in the proposed scope/cost.
- NOTE, CNT-23: Contract document authored is provided. See the response to CNT-2 provides more details on the creation of contract documents.
- NOTE: see response to CNT-2 for more details on MS Office and Adobe PDF with creating contract documents.
- POTENTIAL STRENGTH, CNT-26: Feature in "upcoming release of AI/ML" will give recommended approvals based on history and "automatically include additional review/approval" when modifications are made to contracts.
- WEAKNESS, CNT-38: Attachments must be used to capture subcontractor information.
- CONCERN, CNT-45, 51-62: Response conflicts with responses in the Technical Proposal referring to a Transparency Portal (pg. 10), Ariba Discovery (pg. 38) and using Ariba APIs to "exposed data" (pg. 40).
- STRENGTH, CNT-46: The "full text search" of uploaded documents is a significant feature.
- Six req'ts need clarification, response did not address the full req't.

Vendor Performance, pg. 42-44: Generally meets req'ts, with these caveats.

- No specific detail provided in the Technical Proposal except general info on pg. 40:
 - o System provides "performance surveys" and "KPI based vendor performance scorecards".
 - o Multiple charts available to display "supplier performance data".
- Not clear whether there is a Contract specific performance assessment/survey feature.

STATE OF MAINE INDIVIDUAL SME NOTES

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Public Access to Data, pg. 43: WEAKNESS, Public posting of any data in the solution to a State/Entity "public website" requires use of "a set of APIs" to create integrations to post the information. This work is not included in the proposed solution.

RTM

- Meets req'ts

Purchasing/Data Analytics, pg. 44 : : Meets req'ts.

- Pg. 44/45:
 - o "report can be displayed as a chart or graph (line, bar, pie, donut, etc.) and added to the user's personal dashboard. "
 - o Creating new reports via "3-step report creation wizard"
 - o Charts have dynamic "drill down"
 - o Provides "Parameter-based reports", "Scheduled reports" and can have "visual alerts and grades".
- pg. 45: STRENGTH, report personalization by users. "pre-packaged reports can be modified" by the user and "added to their dashboard".

RTM

- Meets req'ts except for PDA-17 which needs clarification, response did not address the full req't..

Technical Requirements – pg. 47-59

Availability, pg. 47: Partially meets req'ts.

- SAP Cloud Services SLA states "99.5% System Availability Percentage during each Month" based on "Total Minutes in the Month" that "are measured 24 at 7 days a week".

Accessibility Requirements, pg. 47: Partially meets req'ts.

- "target Web Content Accessibility Guidelines Level A and AA and EN 301 549"
- "solutions are not fully optimized for accessibility"

Audit Trail and History, pg. 48 & TECH-1 thru 5: Meets req'ts.

Browsers Supported, pg. 48: Partially meets req'ts. Response did not address these req'ts.

- Support any browser ranked as more than 10% of web traffic
- Track browsers used to access the Solution
- Solution testing with multiple browsers
- Contain a notice if solution is accessed with an unsupported browser.

User Accounts and Administration, pg. 48/49 & TECH-6 thru 20: Overall meets req'ts however as noted below for the RTM, there are a couple Potential Weaknesses & several req'ts that where the response did not address the req't.

- Access is "based on roles and permissions"
- "permissions for a user is derived from the roles mapped to that user and the groups the user"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "can inherit roles and their associated permissions by being a member of a group"
- "User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files"

RTM

- POTENTIAL WEAKNESS, TECH-12: System does not provide "dual sign on" where one login can be both a buyer and supplier.
- WEAKNESS, TECH-13: The only concept of "Super User" in the Ariba system is an Administrator and that user will not have the req'd "access to "any other user transactions" to "create, update, delete".
- POTENTIAL WEAKNESS, TECH-16: "System can't automatically" deactivate users after a period of inactivity. Admins must manually monitor activity and manually deactivate users.

User Authorization, pg. 49 TECH-21 thru 25: Meets req'ts except for State/Entity password policy for complexity which is standard for Ariba.

- Two possible authentication methods: "Regular user authentication" (Ariba system login/password) or "Single Sign-On" ("log into their corporate network")
- "may activate 2 factor authentications if they use SAML based authentication or ADFS"
- Password policy: Single Sign-On uses whatever is in place with the State/Entity system. Ariba login policy is standard. WEAKNESS, not configurable to meet a State/Entity policy. Ariba standard is:
- case-sensitivity between 8 and 16 characters in length. Passwords can include any Latin characters and punctuation marks and must include at least one numeral between the first and last character. They must also include at least one letter.
- Passwords must be changed "at least every 180 days"

RTM

- POTENTIAL WEAKNESS, TECH-23: Password policy is standard across Ariba clients and is not configurable to meet a State/Entity password policy that is different.

Federated Identity Management, pg. 50 : Meets req'ts.

Data Conversion, pg. 50 & TECH-26 thru 34: Does not meet.

- Technical proposal details did not address data conversion. Instead discussed their implementation methodology and staffing plans.

RTM

- Responses to all RTM req't did not address what was req'd. Instead integration to external systems with Ariba and export of data from Ariba was described.

Interface and Integration, pg. 51 & TECH-35 thru 60: Overall meets req'ts however need clarification, response did not address the full req't. 17 RTM req'ts to confirm specific integration points.

- "integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems."

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Real-time and/or batch integration
 - o HTTPS using CSV interface
 - o SAP Web services
 - o REST APIs
- “are based on SSL 256 bit encryption and support various authentication methods such as WS-Security, basic and digital certificate authentication as standard.”

RTM

- Seventeen req'ts did not address the specific integration points required with the Finance system.

Office Automation Integration, pg. 51 & TECH-61: Meets req'ts

Mobile Device Support, pg. 52 & TECH-62: Response described mobile app and did not address whether the Solution can be accessed from mobile devices.

Mobile Applications, pg. 52 : Meets req'ts

- Details on app functionality are described in the Mobile Device Support section.

Data Ownership and Access, pg. 54 : Meets req'ts.

Date Retention, Archive and Purge Considerations, pg. 54 & TECH-63: Partially meets Data Retention however does not have Archive capabilities.

RTM

- WEAKNESS, TECH-63: System does not provide an archive capability. State/Entity can only delete/purge transactions instead.

Disaster Recovery Plan, pg. 54: Meets req'ts.

Solution Environments, pg. 55 & TECH-64 thru 68: Does not meet req'ts. Separate Development and Training environments are not provided. The Test environment will be used for initial configuration and setup. Additional environments for “an additional charge”.

RTM

- Four req'ts need clarification, response did not address the full req't. because they did not address the req'ts .

Solution Technical Architecture, pg. 55-57: Partially meets req'ts. Response did not provide the required “technical architecture diagrams”

Solution Network Architecture, pg. 57/58: Meets req'ts however details on the web -hosting center (e.g. power, HVAC, floor space, etc.) were not provided.

System Development Methodology, pg. 58/59: Meets req'ts.

Service Level Agreement, pg. 59: Partially meets.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Response did not indicate that they had reviewed and whether they complied with the SLA in the RFP.
- The SAP Cloud Services SLA is only for System Availability which is committed to be at 99.5%. No other SLA areas are included.

Security Requirements – pg. 60-72 *Note: Responses in this section are same as IBM proposal*

Cloud Security Alliance (CSA) Compliance, pg. 60: Meets req'ts.

Security and Privacy Controls, pg. 60 : Meets req'ts through SOC compliance

- SAP Ariba is officially not certified NIST 800-53. Ariba uses SOC guidelines.
- Ariba is audited/certified for ISE 3402 DOC1 Type II, SOC2 compliance every 6 months
- SOC 3 report issued annually.
- Hosting facility is audited for compliance to SSAE 16 SOC1 TYPE II, SOC2 Type II

Security Certifications, pg. 60-62: Meets all req'ts except HIPPA (see note below)

- Is Level 1 PCI DSS certified
- Complies with VISA USA Cardholder Information security Program (CISP) and MasterCard Site Data Protection (SDP) Program
- POTENTIAL WEAKNESS, "Ariba is not designed to handle HIPAA data". "Ariba does not support storing HIPAA/PII/Personal data".

Annual Security Plan, pg. 62: Could not assess. Response did not address the req't to describe their Security Plan. Stated that their "annual security plan are internal facing documents" and they do not "attach SOC reports with RFP responses".

Secure Application and Network Environment, pg. 62-66: : Meets req'ts. Security protections are comprehensive.

Secure Application and Network Access, pg. 66-68 & SEC-1 thru 5: Meets req'ts. Security controls are comprehensive

- Response did not address:
 - o Protocols used for import/export of data and relevant interoperability/portability standards
 - o Changes made to any hypervisor

Data Security, pg. 68-71: Meets req'ts.

Personally Identifiable Information Protection, pg. 71: : Does not meet req'ts.

- WEAKNESS, SAP Ariba policy/practices (covered in more detail under Data Security) indicate that the solution "does not support storing HIPAA/PII/Personal data. For example SSN, Personal Banking information, etc.". This does not fit the business req'ts for Supplier registration where the business uses a SSN and Personal Banking (e.g. LLCs). This is a conflict.

Security/Privacy Issue Occurrence, pg. 71/72: Meets intent however there are Gaps (see notes below)

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Issue management practices are similar to what has been required in the RFP however they are focused internally with SAP determining what involvement with customers is necessary and they do not commit to the specific communication/notification timelines req'd in the RFP.

PII Data Actual/Attempted Access or Disclosure, pg. 72: Response is same as the Security/Privacy Occurrence above.

Security Breach Reporting, pg. 72 : Response is same as the Security/Privacy Occurrence above.

Implementation Services Requirements – pg. 73-126

Project Management, pg. 73-75: Generally meets req'ts. Response is high level and did not provide the details listed below.

- "leadership provided by the Program Sponsor, Engagement Lead and Project Manager".
NEGOTIATION, suggest that cost workbook should not include costs for the Program Sponsor and Engagement Lead as they are not direct resources delivering a project.
- Response in this section did not include
 - o Bidders staffing plan w/key positions, roles and responsibilities
 - o Participating Entity required staffing, roles, skills and responsibilities
- NOTE, the req'd example implementation plan & typical project deliverables are detailed in the Project Implementation Methodology section.

Project Implementation Methodology, pg. 75 : Meets req'ts.

- "use the SAP Activate Cloud methodology"
- is lean and fast, while at the same time incorporating the iterative and agile approach where it makes sense
- "has four phases for the implementation project lifecycle: Prepare, Explore, Realize, and Deploy"
- "are four Quality Gates, also called Q-Gates, executed during the implementation" to confirm "deliverables meet the req'ts and... project can continue".

Catalog Support Services, pg. 94 : Partially meets. Service does not provide assessment of contracts and does not create hosted catalogs.

- "We perform cleansing; the supplier is responsible for uploading catalogs on the Ariba Network"
- SAP Ariba catalog management service includes "Supplier Road Mapping, Project Management, Electronic Catalog Enablement, Catalog Maintenance, PunchOut Catalog Enablement, Punch-Out Catalog Maintenance, and State & Supplier Helpdesk Support."
- POTENTIAL WEAKNESS, last sentence in section: "Enablement of Punch Out catalogs are available as an optional item for additional charges." So this part of the "includes" list in previous bullet is only included at an extra cost. NEGOTIATION, need to get this setup/enablement of Punch Out catalogs included in the scope/pricing for situations where a supplier cannot do it for themselves.

Data Conversion Services, pg. 94-98: Meets req'ts.

- "six activities"... Strategy, Analyze, Design, Build, Test/Implement, Deploy

Interface/Integration Development Services, pg. 98/99: Meets req'ts.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “we develop an **Interface Strategy document**”

Organizational Change Management (OCM Services) , pg. 99-109: Meets req’ts. Comprehensive and mature methodology.

Training Services, pg. 109-117: Meets req’ts. Comprehensive and mature practices.

- LSI trains “Project implementation team” on “LSI’s template of the implemented system”
- Project team can also attend SAP Ariba Virtual Live Classroom sessions”
 - o CONCERN, there is a limit for SAP courses of “one student may attend an open session” of a course. “Additional core team training for more than one (1) Customer attendee may be purchased separately”. CLARIFICATION, need to know if only one Core Team person can take these SAP Ariba courses or is it one at a time. NEGOTIATION, need to get additional seats in the training so the Core Team can get the training done quickly to be ready for Design sessions.
- End User training is “train-the-trainer”. LSI will train the State trainers.

Help Desk Services, pg.117 & IMPL-1 thru 5: Meets req’ts however as noted with CONCERN below, it is not clear what level of service is being offered.

- Pg. 58: “Subscription includes system maintenance, automatic upgrades, enhancements and application of service packs, Level 1- 3 help desk support, professional services and best practices built directly into the application.”
- After go-live & hyper-care support, LSI will provide Application Management Services (AMS). “AMS include development, implementation, integration, testing, maintenance and support (technical), and help desk services”. “also includes application monitoring as well as back-up and recovery of applications and interfaces” (pg. 117)
- “Application Helpdesk support covers Level II Application Critical Support, and Level III Application Enhancement Support,” (pg. 119).
- State to provide Level 1 support and only the Level 1 users will have access to submit tickets to LSI helpdesk. (pg. 119)
- Incident priorities and response times are reasonable and comparable to the intent of the RFP SLA. (pg. 120/121)
- CONCERN, pg. 122: “Support Models can range from full time onsite to a pool-of-hours model allowing clients to access expert consultants without the need to bring on full-time resources”. Need clarification, response did not address the full req’t. to know what specifically has been included in the proposed scope/pricing.

RTM

- Meets req’ts.

On-Site System Stabilization Support, pg. 126 : Does not meet req’ts. Response shows very little responsibility on LSI and does not address support req’ts for setup/config changes, system performance/stability monitoring, and coordinate documentation.

- “Run Hypercare Phase” purpose is “to support the users” and “restore/maintain stability of business operations”. (pg. 126)
- Team will “run reports.. to review data entered by various user groups”. Any group identified as “not entering data” will be investigated to identify the reasons and offer assistance. (pg. 126)

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Issues “are logged and assigned to the appropriate member of the State helpdesk for resolution” (NOTE, not assigned to LSI Hypercare staff). Issues that can't be resolved are assigned to State Project Team (State members and “consultants”)
- “quality review of the project is performed to identify lessons learned”

Managed Services Requirements – pg. 127

Solution Support, pg. 127-130 & MNGD-1: Meets req'ts

- “Customers automatically receive patches and upgrades”
- “We deploy and manage the infrastructure”
- “Subscriptions include system maintenance, automatic upgrades, enhancements and application of services packs, helpdesk support, professional services”. Also includes “help diagnose, troubleshoot, and resolve functional and technical problems for users”. (pg. 127)
- LSI's SAP ARIBA Support State Size Offerings table, pg. 128: CONCERN
 - o the number of hours for each type of support per quarter & month are too low
 - o the “Small” state priority response times are different from Medium and Large but should be the same because the criticality to a State is the same regardless of size.
 - o Small and Medium do not get Level 3 supportNEGOTIATION, need to get these values improved/increased.

RTM

- POTENTIAL WEAKNESS, MNGD-1: SAP uses internal monitoring tools instead of an “independent” service.

Organizational Change Management (OCM Services) , pg. 130: Based on the response, it is unclear what OCM services are being made available. If they are the same as described in the Implementation Req'ts section, then this Meets Req'ts.

Training Services, pg. 130: Meets req'ts.

Catalog Support Services, pg. 130: Based on the response, it is unclear what Catalog Support services are being made available. If they are the same as described in the Implementation Req'ts section, then this Partially Meets Req'ts.

Help Desk Services, pg. 130 : Meets req'ts.

Transition Out Assistance Services, pg. 131: No details provided except a “sample” Transition Plan which does not conform to the details of the RFP req'ts. Need clarification, response did not address the full req't. that the LSI Transition Out Assistance Services will meet the RFP req'ts.

-

Other Available Services – pg. 131

- SAP S/4 Financials Assessment, pg. 131: Assessment to “help you to identify whether moving to SAP's S/4 Financials module(s) will streamline financial processes, save money and provide a

Individual Evaluator Comments:

SAP Ariba - Unified Business platform. End-to-end procurement process.

Labyrinth Consulting (LSI); 30 Ariba deployments.

P6 LSI's Proprietary GovOne Accelerator - LSI Consulting has created the GovOne solution for State and Local Government organizations, utilizing SAP's Public Sector business application software. GovOne is our flexible, pre-templated accelerator that provides preconfigured system options and controls, and basic accounting, budgeting and procurement structures.

General Principal and Requirements

- Key Solution Functionality Elements – Guided Buying (state's approved suppliers.)
 - Single-point of Entry; Smart Routing, compliance with SAP S/4HANA, SAP portal for on-prem or cloud deployments, Contract Management module, reporting, configurable.
 - Vendor portal – SAP Business Technology platform.
 - P10 *The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data.*
- User Experience – focus on Guided Buying module and mobile procurement tools.
 - SAP Ariba Best Practices Center – flexible, as-needed support tailored to customer; single, named point of contact; best practices; claimed faster ROI.
- Bidder Best Practices and Roadmap – Standard Ariba quarterly release and monthly feature deliveries.
 - Product roadmap identified
 - Ariba network. Ariba Spot Buy
- Innovations and Value-Added Features/Services
 - SAP Fieldglass
 - AP Ariba Supplier Risk Management
- Customizations/Extensions –
 - Spotline (chatbot)
 - Seal Software (analytics for risk control)
 - Cloud Trade(PDF invoicing)
 - Keelvar Sourcing – optimizer to run, analyze and award events, bidirectional data.
 - Cordis – procure-to-pay integration with Oracle ERP;
 - P-18-20 – long list of extensions.
- Alternative Funding Models – P20. Listed SAP Fieldglass for external workforce strategy. Non-responsive to e-procurement requirements.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract transition: LSI Partner Managed Cloud offering allows contract relationship to be software and incremental services. Responsiveness to RFP question not immediately clear.

Functional Requirements

- General Functionality – Ariba integrated applications. Facilitates occasional and frequent buyers.
 - SAP Ariba Buying& Invoicing
 - SAP Ariba Sourcing
 - SAP Ariba Contracts
 - SAP Ariba Supplier Lifecycle & Performance Management
 - SAP Ariba Network
 - SAP Fieldglass
 - *P23 customers can achieve zero-touch processing and invoicing, eliminating once more non-value added work for AP, Finance, Invoice managers, etc.*
 - *P23 Data is categorized consistently within the solution leveraging a common data model inclusive of suppliers, commodity codes (UNSPSC), Agencies/Organizations, users, etc. Data created as a result of system utilization is available for analysis within the user interface via SAP Ariba's native reporting and analysis engine.*
 - *SAP Ariba supports importing data from external systems.*
 - Most EPROC-GEN requirements listed as Standard functionality. Integrations usually not described.
 - **EPROC_GEN-3, -5 Award posting integration needed. Needs clarification – Is integration added cost? What integration is proposed?**
- Supplier Portal – Supplier Business Network.
 - **P26 Supplier enablement services are included in our offering. This reduces the level of effort/resources required from the State to enable suppliers on the SBN. Our team of 700+ enablement experts will be responsible for most of the enablement process. We also offer flexible partner onboarding: it is simple for ALL types of suppliers, big and small, integrated and portal. Needs clarification – is this SAP or LSI?**
 - **EPROC-SPR-7 – Needs clarification what integration is proposed?**
 - **EPROC-SPR-18, -19 Needs clarification** Comments say “Partner, not supported, but availability listed as A. What is the solution?”
 - **P27 Publicly posted solicitations via Ariba Discovery and the State's Public site Needs clarification. Is this included integration to post direct to state site**
 - Catalog support – hosted and punchout
 - Spot Buy catalog solution
 - Mobile app – rapid request fulfillment; at a glance update to orders, 12 month invoice and order searches.
- Supplier Enablement/Management
 - *P31 Customized enablement strategy: Use our team's expertise to help you design and develop the most effective enablement strategy for your suppliers based on their profile, purchase order (PO) and invoice volume, and spend. Our approach includes duplicate detection (deduping) and segmentation of your vendor master data to effectively target and onboard suppliers in tiered waves that align with your priorities and objectives.*
 - *P31 Supplier education: user guides, FAQs, technical documentation, and free online seminars that explain the basics of using Ariba Network. We can also*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

deliver your account specific information to suppliers through a supplier information portal embedded in Ariba Network.

- **EPROC-VDR-40** – Stated as out of box and configurable; other Ariba bidders were non-responsive on this requirement or partial function claimed. **Needs clarification.**
- Buyer Portal - Offers 2 primary entry points designed for casual user or power user. Casual user gets guided buying experience, can submit requests. Power user enters via dashboard, gets more self-service approach including buying, solicitation development, vendor management, report generation.
- Need Identification – Ariba Guided Buying function
 - Functions stated as supported.
- Request through Pay – Native SAP Ariba Buying and Invoicing module for state ide; invoices to suppliers through Ariba Business Network portal.
 - *P36 Purchase orders will be sent to suppliers via the SAP Ariba Business Network. Subsequent change orders will be routed to suppliers via the Ariba Network as well. Change orders will be subject to a configurable workflow. Leveraging the Ariba Network suppliers can create an order confirmation, advance ship notice and invoice. All of which is accomplished electronically to streamline the source to settle process.*
 - 100MB limit on attachments throughout the portal.
 - **EPROC-PRD-28** – Custom form can be created for special considerations such as trade-in. Is this considered a customization or native functionality? If negative numbers not accepted, how would this be handled? **Needs clarification.**
 - **EPROC-PRD-48 – Needs clarification.** Does LSI proposal encourage native functionality for loading values cited or is this assumed to be an integration. Entry is marked A.
 - **EPROC-PRD-62 and PRO-29 – Needs clarification.** Requirement is for header level; response is that supplier level is common. Non-responsive as presented.
 - **EPROC-PO-16 – clarification needed** – Signatures on POs – LSI says not available in comments, but marked A.
 - EPROC-RC-21 – UOM defined by PO – not convertible to inventory unit UOM for receipt entry.
 - **Note: There are multiple responses in this Requirement set where configurable is stated but the Availability is marked A not CF.**
- Catalog Capability – p36 *With SAP Ariba Catalog, suppliers can upload all their content using a single, simple user interface. And with recently launched, innovative capabilities, they have enterprise-grade content management tools to define, validate, and enrich catalog content. By creating catalog rules to cleanse and enrich the data, you'll be assured of compliant, error-free catalogs while you monitor content quality with your new dashboard reports.* No notes on hands-on customer-side hosted catalog management.
 - **EPROC-CAT-6 & -7 Needs clarification.** Listed as A, but limitations cited. 500,000 items per catalog; 5,000 catalogs per system. This would likely be in excess of catalogs needed by states, but the item threshold would not reach the limit for MRO vendor catalogs, for example. Does 5,000 catalogs include expired or inactive catalogs; can one vendor have multiple catalogs archived and not count against the total?
 - **EPROC-CAT-11- needs clarification. Comments are circular – say to see CAT-11. (possibly means CAT-8 custom forms).**
 - EPROC-CAT-19 – negative values supported requirement not met.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Sourcing/Bid Management - claimed out of box functionality on common procurement types, 50% reduction in solicitation cycle time, savings.
 - Solicitation development using templates inside Ariba Sourcing.
 - P38 *The solution also supports other critical components of the solicitation process including addendums, amendments, Q&A, supplier notifications, supplier communications, internal communications, document management, etc. SAP Ariba Sourcing is natively integrated to SAP Ariba Contract Management and this will allow the State to create state-wide Contracts, Agency-specific contracts, Project-specific/one-time contracts, or Purchase Orders. P39 Proposals are received electronically and are automatically available for comparison side by side within the user interface (unless configured otherwise including envelope and sealed bids). Users may score/grade responses leveraging delivered functionality. Upon completion, side by side comparison by score, price, etc. can be done quickly and easily.*
 - EPROC-SRC-67 – suppliers have to register to postings. Not public facing – **non responsive. Needs clarification.**
 - EPROC-SRC-73 – is posting to state's website included in standard functionality? **Needs clarification. See SRC-77 and -78.**
 - EPROC-SRC-107 – **needs clarification. Does surrogate bid meet requirement for posting?**
- Contract Management
 - P40 *With SAP Ariba Contract Management, the State can connect directly with suppliers when creating, negotiating, executing, and managing the ongoing administration of contracts. SAP Ariba Contract Management is natively integrated with Sourcing which allows the creation of a contract directly from the solicitation award. The resulting contract will be stored in a central repository and can be published to SAP Ariba Buying and Invoicing.*
- Vendor Performance- Cloud-based vendor data model; supplier 360- review; supplier scorecards based on KPIs.
 - P43 - *The State may leverage a set of APIs delivered as part of the SAP Ariba platform to expose data to the public via a public website. Data captured as part of the supplier management process supported by SAP Ariba Supplier Lifecycle and Performance is available via API. Data can be formatted and combined with other data sources and displayed on a public website to meet FOIA requirements.*
 - P44. Supplier surveys can capture stakeholder responses and compile performance score.
- Purchasing/Data Analytics - 3-step report creation wizard; data filtering within Ariba tool rather than having to export data out to Excel to pivot/manipulate.
 - Pre-packaged or ad-hoc reports.
 - EPROC-PDA-35 - *SAP Ariba can support two reporting taxonomies. Supported taxonomies such as UNSPSC, the Ariba Classification taxonomy, and a customer-specific, custom taxonomy.*

Technical Requirements

- Availability— 99.5% uptime. Linked service agreement document provides definitions of credit, maintenance windows, availability calculation etc.
- Accessibility Requirements

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P47 *Accessibility at SAP refers to the possibility for everyone, including and especially people who are differently-abled, to access and use technology and information products. SAP ensures the implementation of user-interface (UI) accessibility features for Products via our SAP Accessibility standard.*
 - P47 *When developing software, SAP's product teams target Web Content Accessibility Guidelines Level A and AA and EN 301 549. **While SAP continues to implement and develop accessibility features across its product portfolio, solutions are not fully optimized for accessibility.***
- *Audit Trail and History – p48 Specific logging takes place that is viewable by the customer administrator or their designee. Audit logs produced through use of the solution are considered customer data and are maintained within the customer's instance of the database. These logs are retained so long as the customer has an active contract. Also see EPROC-TECH-1.*
- *Browsers Supported - Common browsers supported*
- *User Accounts and Administration*
 - *P48 Access to data and functionality within the modules is based on roles and permissions that determine which features of the solution a user can see and work with, and what data the user can access. The set of permissions for a user is derived from the roles mapped to that user and the groups the user may be a member of. Permissions are mapped to roles and then roles can be mapped to other roles, to users and/or to groups.*
 - *The solution also provides a single point of integration and administration for users and user profiles, organizations, groups and group memberships, roles and permission mappings.*
 - *This common data is shared and synchronized across modules automatically. The User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files.*
 - *EPROC-TECH-10 Least privilege: For customer users, this is a customer complementary control consideration due to the fact that the customer administrator manages user access and role assignment.*
 - **EPROC-TECH-12 Needs clarification.** Listed as A, but comments say Dual SignOn via one account is not support.
 - **EPROC-TECH-16 – Needs clarification.** Doesn't meet requirement for automatic deactivation of accounts after 6 months.
- *User Authentication*
 - *P49 Username and password from login page or Single Sign-on from corporate network permitted.*
 - *2FA available for SAML-Based authentication.*
 - **EPROC-TECH-24 – needs clarification** about new password auto generation. Not responsive.
- *Federated Identity Management – See previous answer.*
- *Data Conversion - SAP Activate Methodology for accelerated migration through Delivery team with responsibility for project management, functional and technical expertise, OCM and training to coordinated with customer org.*
 - *EPROC-Tech-27 – detailed description of master data integration and Transaction Data integration.*
- *Interface and Integration – P51 SAP Ariba applications integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.

- P51 - *These standard integration options across our solution portfolio are:*
 - a) Master data integration is done primarily in batch mode, HTTPS using CSV files (Batch integration, and depending on the data volume this can be scheduled to run frequently to achieve near real-time integration)*
 - b) SOAP Web services that use an XML payload (Real-time integration suitable for transactional data)*
 - c) REST APIs (supports both synchronous & asynchronous calls)**All of these integration methods are based on SSL 256 bit encryption and support various authentication methods such as WS-Security, basic and digital certificate authentication as standard. Our customers can opt for two or more or all the options to help achieve the desired level of integration.*
 - *Uses Ariba Open APIs.*
 - *Sample interface plan document supplied – generic – no specific interfaces included.*
- **Office Automation Integration – EPROC-TECH-61**
 - *Support of Excel format for data uploads and downloads. For example, SAP Ariba Sourcing is designed to allow Excel uploads for market designs.*
 - *Support of Excel templates for analysis and reporting:*
 - *Microsoft Outlook – SAP Ariba Sourcing and Contracts can export tasks within projects to Microsoft Outlook.*
 - *Word – SAP Ariba Contracts provides sophisticated contract authoring capabilities using Microsoft Word documents. SAP Ariba Contracts offers bi-directional integration with Microsoft Word to assemble contracts and templates from a clause library, and then to detect changes to contract documents, including automated flagging of alterations to clauses, and support for clause substitution from pre-approved clause libraries.*
- **Mobile Device Support** – site is built for mobile responsiveness. Components with mobile functionality including shopping cart, approvals, viewing reqs. Supplier 360 reports available to view on Airba ios app.
- **Mobile Applications** – ios and Android supported. Touch ID, App pin, fingerprint recognition options for access.
- **Data Ownership and Access** – p54 *The customer owns the data; they can extract the data at point of time during the throughout subscription. Tools to download the data. For example: User Interface (Import CSV), API's.*
- **Date Retention, Archive and Purge Considerations** – p54 *Data retention is governed by the active contract. We retain your data on the service for the duration of the subscription term and any subsequent renewal term.*
 - *EPROC-TECH-63 - Customer is in complete control of data deletion and purging which can be manual or automated via integration.*
- **Disaster Recovery Plan** - Data centers in regional pairs.
 - *URLs will continue to work if failover. Cloud Engineering Services move area within RTO; after switch, secondary becomes the new primary.*
 - *Customer will receive email from SAP notifying of unplanned down time. Expectation for communication not stated in narrative.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Solution Environments – p55 *Customers receive two environments by default: production and test. The test environment is used for initial configuration and setup. The production environment is used for production. Additional environment is available for an additional charge.*
- Solution Technical Architecture – p56 *SAP Ariba applications uses cXML language for the document exchange between SAP Ariba Network and Ariba Modules.*
 - *See Data Conversion for integration to external systems.*
 - *P57 The software's data model keeps customers' data separated. Customer data is isolated via realms. Each individual customer is assigned a distinct realm to identify and store their data.*
- Solution Network Architecture – p57 *The system is powered by high-performance servers and utilizes a network infrastructure designed for scalability, reliability, and security. The SAP Ariba Operations team is constantly monitoring and maintaining the systems.*
- **P58 Needs clarification** *SAP Ariba solution is available only as a SaaS multi-tenant model hosted by us. Who is us — SAP or LSI?*
 - *Our solutions are offered and delivered in a true subscription-based model and shared service (multi-tenant) offering. There is no software to install, no hardware to buy, no maintenance or support costs and no need to hire consultants or tech specialists to run the system.*
 - *Subscription includes system maintenance, automatic upgrades, enhancements and application of service packs, Level 1- 3 help desk support, professional services and best practices built directly into the application.*
 - *Data will be hosted in North American data center.*
- System Development Methodology - Agile scrum implementation of Product Lifecycle Methodology.
- **P58 Ariba leverages a Secure Software Development cycle (Secure SDC) that is aligned with ISO 27034 principles. This includes:**
 - Secure code (OWASP Top Ten) training to engineers*
 - Code review by peers before build cycles*
 - Static and dynamic code analysis, with load testing for resiliency*
 - Reviews and approvals at multiple phases for meeting security criteria prior to release to production.*
- Service Level Agreement – one page SLA attached. Referenced above.

Security Requirements (This section is common with IBM submission)

- Cloud Security Alliance (CSA) Compliance = CAIQ 3.0.1 supplied.
 - **MOS-15 – Clarification needed** – How are changes to mobile operating systems, patches performed if not SAP change management processes? No comments provided.
- **Security and Privacy Controls - Needs clarification.** P60 SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines. **Does will SAP intend to become compliant with NIST requirement?**
- *SAP Ariba is audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 every six months. A SOC 3 report is issued annually. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II, SOC 2 Type II.*
- Security Certifications . See previous entry.
 - PCI Service Level 1 compliant;

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program
 - Not HIPPA certified – limited relevance for procurement
- Annual Security Plan – p62 – states plan is internal document. Gives links to request SAP SOC reports. Not included with response.
- Secure Application and Network Environment - 24/7 system monitoring. Firewall separation of SAP corporate with customer cloud.
 - Only SAP authorized staff using SAP authorized computers in data centers.
 - 2FA authentication for SAP staff entering cloud environment.
 - Exception-based authorization for Cloud Engineering to access specific customer cloud instances.
 - P64 *Data disposal practices are aligned with the NIST 800-88 standards for clearing, sanitizing, and data destruction to prevent data remanence prior to retiring or allowing storage media outside of our security envelope.*
- Secure Application and Network Access
 - EPROC-SEC-2 - *Concurrent login is available. SAP Ariba allows for 2 concurrent session for the same user so that mobile and desktop (e.g. report generation) can be used. However, security measures are in place to detect concurrent logins from multiple IP addresses.*
 - Data at rest and in transit encrypted.
 - Detailed descriptions of security provisions provided for hardware and physical premises.
- Data Security – Stated in narrative. P69-70. SAP has DPA setting out terms. **No NIST standards referenced as proposed in RFP.**
- **Personally Identifiable Information Protection – Needs clarification for responsiveness.** P.71 *SAP Ariba are not designed to handle HIPAA data. Our solutions are designed Business to business transaction, and SAP Ariba does not support storing HIPAA/PII/Personal data. For example: SSN, Personal Banking information etc.*
- Security/Privacy Issue Occurrence – Scenario described. Full process documentation stated to be confidential.
- PII Data Actual/Attempted Access or Disclosure – As previous entry.
- Security Breach Reporting – As previous entry.

Implementation Services Requirements

- Project Management Leadership are Engagement Lead and Project Manager – Operational responsibilities, and Program Sponsor – strategic. (p73)
 - PMO defines scope, finalizes resources; implements toolset for risk and issue management; establishes communication protocols; RTM framework and prepares kickoff presentation to communicate standards and expectations.
 - Kickoff - *Joint PMO and led by the program executives from LSI and the State to reinforce the “one voice” concept of leadership*
 - *LSI and the State maintain primary responsibility for their own project team members. The team leads are responsible for coaching/mentoring under-performing resources and providing training as appropriate.*
 - State responsible for establishing issue management repository: *expectation at each project that the State establishes a project repository (i.e. MS Teams, Slack, SharePoint,*

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Shared Drive, Google Drive, DropBox) as a platform to manage project issues and documentation of resolution. This repository will provide detailed logging of issues, defects and a robust reporting system based on configurable project scope, categorization, and nomenclature. Guidelines will be established for what constitutes an issue, for severity level classification, and escalation procedures. All team members will have access to the issues database; project managers are expected to review issues regularly and review aging open issues for possible escalation. Additionally, the project repository is a customer-provided and customer-maintained site that utilized by both LSI and customer project team members during a project.

- *Project repository site is front loaded with LSI's pre-configured implementation accelerator templates, strategies, organizational structure, and additional project documentation*
 - *Project requirements traceability matrix provides the framework for managing solution scope and quality throughout the project.*
- Project Implementation Methodology - SAP Activate Cloud methodology follows Agile principles.
 - 4-stage delivery model: Prepare; Explore; Realize; Deploy.
 - P76 Quality Gates are performed to confirm that all stakeholders of the implementation project agree that specific deliverables meet the requirements and consequently that the project can continue. Project. Verification; Solution Acceptance; Readiness Acceptance; Go-live.
 - Sample Phase plan demonstrating task descriptions and responsibilities. P79-81.
 - P85 - Realize Phase Sprint 1
 - LSI consultants will perform unit testing of standard transactions and updating the unit test log. LSI Project Manager shall prepare the Unit Test Summary Report; **State** Project Manager is responsible for review and feedback prior to presentation to executive leadership.*
 - State** is responsible for definition and development of test cases, test scenarios and test scripts representing the comprehensive success criteria for this test phase. LSI shall assist with test case and scenario definition and script preparation.*
 - *LSI Training Lead is responsible for the overall training plan; **State** Training Lead is responsible for providing appropriate schedules for end user training delivery, train-the-trainer candidates, and attendee lists.*
 - *Note: This suggests lean LSI project team with heavier participation from state team than some implementers that will design and lead testing phases.*
- Catalog Support Services – *Needs clarification as to involvement*, if any, of LSI personnel in catalog implementation phase. Are SAP staff engaged?
 - ***P94** - SAP Ariba brings to the table specialized Catalog Management services as part of the software subscription to help the State manage their catalog content throughout the State's time using the software.*
 - *SAP catalog management services manage enabled (hosted) catalogs and punchout catalogs. We perform cleansing; the supplier is responsible for uploading catalogs on the Ariba Network. SAP Ariba catalog management services manage the enabled catalogs including validation, cleansing, catalog activation and any subsequent refreshes.*
 - *Enablement of Punch Out catalogs are available as an optional item for additional charges.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Data Conversion Services – Six phase plan. Strategy; Analyze; Design; Build; Test/Implement; Deploy.
 - Minimize data from legacy system.
 - P96 *SAP systems, due to their tight integration, require a very high degree of referential integrity in data being converted. Typical data not converted include inactive vendors and customers, paid invoices, journal entries, requisitions and purchase orders.*
 - P97 *A preliminary analysis is made to determine whether a standard SAP solution exists for the data conversion or whether a custom solution must be built. In addition to this analysis, the best tool is identified for the data conversion, for example, using SAP's Migration Cockpit,*
 - *LSI will be responsible for the design, building, and testing of the programs that read these flat files, as-is, and upload the data to SAP. LSI will rely on State experts to participate in this process by validating the loaded data*
- Interface/Integration Development Services - *LSI will recommend, design and deploy interfaces based on the best practices and the latest tools available with the SAP environment.* P98
 - Interface Strategy Document – LSI designs – includes general architecture of current and future landscapes, file transfer, process of interface design and implementation – evolving document. Sample provided.
- Organizational Change Management (OCM Services) – Note: one of the most detailed parts of the proposal.
 - Change readiness assessment. (4 weeks) Understand leadership alignment; evaluate communications processes; understand stakeholders and influencers.
 - Framework - Leadership Alignment model: collective actions; make decisions; identify solutions; validate common understanding; reality check (internal and external); identify gaps.
 - Factors outlined that determine change impacts (p104)
 - Identify business readiness – workforce preparation. Roles: Business readiness Lead; Change Agent; Superuser; Coordinator.
- Training Services
- P 109 *Training is divided into two different but critical areas: 1. Project Team Training 2. End User Training*
 - *Functional project team receives the training it needs to conduct the Explore phase using the same system that is being implemented.*
 - *In addition to the LSI provided project team training, SAP Ariba services can provide project team training. Training seats can only be used towards attendance in our Virtual Live Classroom (VLC) public sessions. In many cases, it's recommended the project team participate in the SAP Ariba services training first and then attend the LSI project team training.*
 - P111 *Training for end-users is developed and delivered as a part of the implementation project and modeled after the train-the-trainer methods.*
 - *Training development methodology, LSI Perform. 5 phases – planning through delivery.*
 - *Instructor Led Training – with students working on the system*
 - *Small group sessions for audience sizes up to 8 – coaching/training/ classroom or on the job.*
 - *Generic Ariba guides also proposed. (LSI not proposing to customize for customer.)*
- Help Desk Services – Note: Like OCM, also one of most detailed parts of proposal.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 2:

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- After go-live and hypercare, LSI will perform post-implementation support, SAP Application management support.
 - P117 *These services include ensuring systems are up and performing as per SLA, backups are performed regularly, then also perform any additional services not handled directly by the State basis team, e.g., from the list: troubleshoot any system crashes, recover databases if necessary, applying operating system and database patches as needed, transports, SAP application monitoring, day to day Basis support, security, applying OSS notes.*
 - P117 For consideration will also be SAP HR legal patch applications, and SAP Support packs. Needs clarification “For consideration” means what?
 - EPROC-IMPL1 – separate online support sites for Buyers and Suppliers. Needs clarification – Is this SAP license helpdesk or LSI provided as seemed to be stated on p117?
 - EPROC-IMPL-2 Training and documentation available from LSI to State Help Deks.
 - EPROC-IMPL-3 and -4 – Needs clarification – where is Chatbot hosted? Unnamed solution separate from Ariba support listed in EPROC-1?
 - P119-120 – Three tier support levels proposed. Level 1 – All users; Level II – Limited to identified personnel; Level III – Enhancement Support. Separate cost? Retainer hours referenced – not seen pricing yet.
 - 4-level Priority response time table with small, medium, large state response SLAs.
 - AMS staffing – platinum level consultants with 10+years experience.
 - P125-125 Responsibility matrix for support. SAP/LSI/State
- On-Site System Stabilization Support – 3 month hypercare
 - P126 *purpose of this phase is to support the users as they adapt to the new business processes and to restore/maintain stability of business operations*
 - Defect correct; quality review of projects to determine enhancements, future support needs, verify contract compliance.

Managed Services Requirements

- Solution Support
 - EPROC-MNGD-1 Needs clarification – Is the response SAP’s response that they conduct the monitoring rather than an LSI response? Should this be an LSI response? Is the benchmark measurement reported back to state customer?
 - P127 – LSI Ariba customers run latest versions.
 - P127 As part of the Cloud subscription, our solution provides Customer Support services to help diagnose, troubleshoot, and resolve functional and technical problems for users. LSI’s customer service staff can be contacted via phone (toll free), email or Web from Monday-Friday, 24/5.
 - Different Support offerings based on Small/Medium/Large states.
 - P129 *Unscheduled Outage*
LSI will maintain email listings for each business and service owner of the eProcurement solution including third party Solution components. In the event of an outage, LSI will promptly notify the appropriate contacts of such outage and restoration of service in accordance with what was agreed upon in the contract.
P130 LSI Solution Support security responsibilities include:
 - User Management Security

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 3)
 - Founded in 2000, US market entry 2018 with office in New York with 14 staff members.
 - "SaaS experience in public procurement" with their Negometrix solution that is a "Single-page application (SPA)" that is "ISEA3000/SOC2 and ISO 27001 certified".
 - Solution provides "requisition building, sourcing, evaluating, awarding, contracting, and supplier performance monitoring".
 - Has 2,600+ buying agencies and 1M+ suppliers as users.
 - Has "more than 600" staff "in the US and across Europe".
2. Previous Projects
 - **Volusia County:** Implemented "Solicitations Module, Contract Management"
 - **Town of Palm Beach:** Implemented "Intake Management Module, Solicitations Module, Contract Management Module. Town also using surveys for contracts to "track vendor performance".
 - **New York State Office of General Services:** Implemented "Intake Management Module, Solicitations Module, Contract Management Module" for a "vehicle marketplace for all agencies to submit their vehicle requests" and to "source and purchase". Required "API integrations".
3. Subcontractors
 - No subcontractors.
4. Organizational Chart
 - The org chart provided is basic and may not fit for implementations of all modules of the system for a State.
 - The contractor staff identified did not have sufficient details to assess the experience of the individuals.
 - Suggest exploring whether they have sufficient staffing to support multiple State implementations at the same time.
5. Litigation
 - No litigation.
6. Financial Viability

Individual SME Comments:

General Principal and Requirements – pg. 5-15

Key Solution Functionality Elements, pg. 5/6:

- Single Point of Entry: "All modules... accessed via a single login"
- Smart Routing: "guided every step of the way with recommended tasks"
- Compliance: "platform uses templating to streamline and standardize procurement efforts"
- Portal:
 - o "collaboration... for both Agency stakeholders as well as suppliers".
 - o "still customizable to each Agency"
- Open Marketplace Environment: N/A, catalog functionality not included
- Integration:
 - o "use standard API's".
 - o BI webservice can be used to gather information from our system"
- Workflow:
 - o "workflow is configurable"
 - o Available in Intake Management module, Solicitations Module and Contract Management Module.
- Document Management: "manage any documents related to all stages in the procurement workflow.
- Reporting, Dashboards & Data Visualization:
 - o "All modules have their own dashboards"
 - o "data in the system can be managed and reported on using standard and ad-hoc reports"
- Configurable:
 - o "completely configurable"
 - o Needs "will translate those workflows and boilerplates into the system."
- Transparency:
 - o "Agency is in control of which information is shared with the public"
 - o "Solicitations Module, documents and information are only made public when a buyer purposefully opts to publish it."
 - o "in the Contract Management module, the user can choose which contracts and accompanying documents are to be accessible to the public"

User Experience, pg. 6-9:

- **Personalization:** POTENTIAL WEAKNESS, Individual user personalization is currently "not possible"
- **Intuitive Navigation:**

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o “smart notifications that have URL links in the email”
 - o “with Recommended Tasks, the user can navigate directly to where they need to go to complete the item at hand”
- **Wizard-driven:** “software consists of smart (wizard-like) functions to take the user to the right place
- **Portal Informs:**
 - o Suppliers - notified “of any bid opportunities” and “any addenda issued”
 - o Buyers – “My Tasks dashboards will inform the user on what work”
- **Mobile access and use:** “fully supported on any mobile device”
- **Workload Mgmt:** “All items within the platform can be re-assigned to another user.”
- **Role-Based:** “there are role-based rights for different functionalities”

Bidder Best Practices and Roadmap, pg. 9/10:

- Releases/Enhancements
 - o “For system enhancements, our team uses the Agile Method.”
 - o “development team will work during a 4-week period”
 - o “up to the user whether or not to integrate new functionality into their own work”
- Alternatives, Assess/Recommend Opportunities:
 - o “Happy to facilitate additional training sessions for new staff or new workflows as needed – with no additional cost.”
 - o “will constantly strive to assess and recommend any workflow improvements and ways to reduce costs.”
- Roadmap: “General” information provided for Year 1 and beyond. “Our current practice is to not share details of our roadmap with the public”

Innovations and Value-Added Features/Services, pg. 10/11:

- Response discussed their “aftercare” and “continued learning” opportunities that are included with the licensing (managed services).

Customizations/Extensions, pg. 11 :

- “In the event that an Agency need cannot be met through the configuration process, an integration/customization is possible with support from our development team.”
- Response did not address
 - o Customizations becoming part of the base system
 - o Advising of any OCM impacts

Alternative Funding Models, pg. 12-15: NEGOTIATION, need firm definition of Organizations for Contract Management and should negotiate these prices down.

- “offers a per-license cost structure”,
 - o “typically used by smaller organizations”.
 - o “for these smaller/non-state agencies, implementation and training costs are waived.”
 - o Intake Module: \$1500 Annual Fee, unlimited usage
 - o Lead-Buyer License (Solicitations): Purchasing professional- annual fee based on qty (pg. 13) , All other users- “free of charge”
 - o Contract Management Module: Annual fee, Small Org- \$5k/yr, Medium Org- \$10k/yr, Large Org- \$15k/yr
 - o Combine 2 or more modules: “up to 35% discount”

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Supplier Relationship Management Module: \$3k/yr.

Contract Transition and Flexibility, pg. 15:

- "will work with every Agency to tailor the transition to their unique needs and take the current contract situation into consideration"

Functional Requirements – pg. 15-64

General Functionality, pg. 15/16 : Partially meets req'ts with some weaknesses (see RTM notes)

- "entirely cloud-based Software as a Service (SaaS) solution that is hosted on Microsoft Azure"
- "starts with a request for purchase... will be submitted through our 'Intake Management Module'"
- "will be routed through a configured approval workflow"
- "approved request will be displayed on the purchasing dashboard... staff can then initiate the solicitation process"
- "Upon award,... shifts into the next stage: Contract and Supplier Relationship Management"
- "allows for administrating all contract related data and sharing it with the public"

RTM

- POTENTIAL WEAKNESS, GEN-9: System does not have a crosswalk feature of commodity codes to account codes.
- POTENTIAL WEAKNESS, GEN-10: System does not allow the "state to identify additional fields for a search function"
- WEAKNESS, GEN-11: System has a maximum attachment size for an individual document of 2GB.
- POTENTIAL WEAKNESS, GEN-12: System does not have the capability to search for attachments.
- CONCERN, GEN-15: It appears that there are not transaction print formats in the system. Response refers to "all pages" being able to "export and/or print".
- WEAKNESS, GEN-16: System only provides branding for "Public Organization Profile" and in Solicitation document authoring (GEN-15). No branding in the application itself.
- POTENTIAL WEAKNESS, GEN-17: Toggle on/off of features is only available in the Solicitation module.
- CONCERN, GEN-18: Response indicates system cannot have field to track Requesting Agency but this should simply be done by adding a User-defined field. So need to see if adding a field is not possible.
- WEAKNESS, GEN-19: System does not provide capability to load all "Bill To and Ship To addresses". This may mean that these addresses have to be manually entered every time on Intake Form, Solicitations and Contracts.
- WEAKNESS, GEN-20: System only supports NIGP codes taxonomy.
- CONCERN, GEN-20: System may have single version of NIGP codes for all Customers and not be able to have different set to match a State specific ERP use."
- WEAKNESS, GEN-21: Commodity Code upgrades specific to a Customer are not supported.
- POTENTIAL WEAKNESS, GETN-24: Transaction search results will not include references/info on "related" transactions.
- POTENTIAL WEAKNESS, GEN-26 through 28: System does not provide functionality to support/manage Admin Fees.

SME DEPARTMENT/STATE: NASPO

- POTENTIAL WEAKNESS, GEN-32: Application does not have language translation capabilities. Must use a third party tool.
- WEAKNESS, GEN-34: System does not support future/effective dating.
- POTENTIAL WEAKNESS, GEN-35: System does not have a comments library feature.
- WEAKNESS, GEN-36: System does not have eSignature capabilities. "Is on our roadmap".
- Four req'ts need clarification.

Supplier Portal, pg. 16-20: Partially meets req'ts with some weaknesses (see RTM notes)

- "single point of entry for all supplier facing functions"
- "see all solicitations they are participating in"
- "can also click "View Bid Opportunities" to browse through all published bid opportunities"
- Registration
 - o "one user registers the company"
 - o then "can add colleagues to the company profile"
 - o "subscribe themselves to receive alerts when solicitations are published based on the commodity code(s) (includes NIGP Codes) they select"
- POTENTIAL STRENGTH, Supplier solicitation alerts can be "on new solicitations nationwide" (pg. 17)
- "services to suppliers free of charge" (pg. 18)

RTM

- SPR-4, POs: N/A
- SPR-13, Invoicing: N/A
- POTENTIAL WEAKNESS, SPR-19: System does not provide functionality to support/manage Admin Fees.
- POTENTIAL WEAKNESS, SPR-20: System does not provide Suppliers with a dashboard view of summary metrics of Orders, Solicitations, Contracts.
- SPR-21, Order Status: N/A
- SPR-22, Advance Shipping Notices: N/A
- POTENTIAL WEAKNESS, SPR-23: System does not provide a means for Suppliers to request a contract change.
- Three req'ts need clarification.

Supplier Enablement/Management, pg. 20-22: Partially meets req'ts with some weaknesses (see RTM notes)

- "from this single login the supplier can access all account information, solicitations (and responses), and licenses/certificates/other documents."
- Pre-qualified Supplier Lists:
 - o "ongoing solicitation where suppliers that want to become pre-qualified can apply for at any point in time."
 - o "supplier... will submit its application through Negometrix4"
 - o "Purchasing Team will receive a notification of a new application and can evaluate the response and accompanying documents"
 - o "then either be approved as a prequalified supplier or the application can be denied."
- "integration with an Agency's existing financial system is possible"

RTM

**STATE OF MAINE

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, VDR-5: System does not provide Supplier a means to record multiple business locations & addresses. Based on response to VDR-12 Suppliers have to create separate registrations for each location.
- POTENTIAL WEAKNESS, VDR-10: System does not capture ACH Payment Information.
- WEAKNESS, VDR-12: Suppliers with multiple business locations must create separate registrations for each.
- WEAKNESS, VDR-18 through 27: System does not have automate verification capabilities of the req'd Supplier data.
- POTENTIAL WEAKNESS, VDR-29: System cannot restrict edit for only specific fields. Either the Supplier can edit everything or nothing.
- POTENTIAL WEAKNESS, VDR-32: System does not have the capability to route Supplier registrations to other organizations for approval.
- WEAKNESS, VDR-36: System does not send Suppliers a yearly reminder to review/update their account.
- WEAKNESS, VDR-37: System does not capture changes to a Supplier account in an auditable history.
- POTENTIAL WEAKNESS, VDR-40: System does not have a mean for Suppliers to sign up to be notified when a specific contract is to be resolicited.
- One req't needs clarification.

Buyer Portal, pg. 22/23: Meets req'ts.

- "Once a buyer logs in they are directed to their Task Dashboard"
- "Every member of that Agency will have their own personal task dashboard"

RTM

- POTENTIAL WEAKNESS, BPRT-6: System does not have a work management view.
- No req'ts need clarification.

Need Identification, pg. 23-26: Meets req'ts.

- "We build a customized digital form, called the "Purchase Request Form", which all department users can use to submit their purchase requests"
- "purchasing team has the ability to accept or reject requests, and the system automatically notifies department stakeholders"
- "has the ability to take the specifications from the request and create a solicitation"
- "can have as many approval workflows as necessary". "able to include multiple levels of approval as well as either making the workflow sequential or parallel."

RTM

- NEED-5, Ordering source precedence: N/A
- One req't needs clarification.

Request through Pay, pg. 26: N/A

Catalog Capability, pg. 26: N/A

Sourcing/Bid Management, pg. 26-54: Partially meets req'ts.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "post any type of solicitation (RFP's, ITB's, RFQ's, RFI's, Quotations, plus documents like addenda, notice of intent to award, bid tabulation, meeting notices, and notice of awards, etc.)"
- "can choose to publish the solicitation for public participation on the platform, notify supplier via NIGP commodity codes, and/or can choose to invite only certain vendors."
- Responding (pg. 27)
 - o "simplest level... download documents, fill them out, and upload their responses."
 - o "structured responses, which include digital forms where vendors can answer requirements with yes/no, multiple choice, open questions, and more."
 - o "hard copy paper... system allows for the ability for the Agency to then submit the paper response to the system"
- Templates (pg. 27/28)
 - o "create any type of solicitation. These different solicitations can then be saved as templates and stored in the template library"
 - o "Boilerplates/RFX templates"
 - o "Standard Email Messages"
 - o "Scoring Criteria"
 - o "Solicitation Logs/Summary"
 - o "Awarding Emails/Documents"
- Each organization "receives a "Public Organization Profile". The Public Organization Profile contains contact information, all active and closed solicitations, and any published contracts"
- "does not limit the number of documents that can be posted per solicitation, nor do we limit the number of solicitations"
- "no limit on the number of templates the Agency can create."
- "platform can be used to schedule any important events related to the solicitation, like pre-bid/preproposal meetings, Q&A deadline, submission deadline, internal consensus meeting, etc."
- "able to facilitate an internal approval workflow", "buyer can indicate which user(s) need to approve the solicitation". WEAKNESS, workflow is not based on rules that are applied to solicitations. Approvals are defined manually within each solicitation.
- "colleagues can be added to collaborate on the project and assigned to their specific roles"
- Pricing Sheets (pg. 35)
 - o "pricing sheet can be imported from an existing Excel sheet or created directly in the system"
 - o "able to apply formulas to columns so that totals will be automatically calculated using the input from other columns"
- "buyer can select NIGP codes from the same list in the Publication tab". NOTE: Price sheet items in a solicitation do not have the NIGP code.
- "can also personally invite specific suppliers to participate in the opportunity."
- "shows whether the supplier has accepted the invitation to the solicitation or not"
- Q&A (pg. 40)
 - o "questions asked by suppliers are automatically linked to the specific requirement within the solicitation"
 - o "question deadline can be set in schedule".
 - o "questions that submitted after the question deadline will be tagged at "Too Late" on both the supplier and buyers' dashboards" CONCERN, the buyer can see the submitted question even through it is "Too Late". (Fig. 31, pg. 40)
 - o "able to export all the questions in to an excel sheet, provide answers outside of the system, and then upload both the questions and answers back into the software"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o Buyer notified when question asked, Supplier notified when answers are published.
- "able to publish public announcements such as a digital addendum, meeting sign-in sheet, or solicitation results"
- "toggle the Planholders List on/off... the list of participating suppliers will be visible to the public"
- "“Lockdown” technology includes a vault feature for a Sealed Procedure type, which guarantees that the purchasing organization cannot view submitted offers until after the deadline for submission (or a later specified opening of offers date)"
- Tabulations (pg. 43)
 - o "automatically calculates tabulations based on vendor responses"
 - o "ranks all of the responses based on price and quality (quality is calculated, if applicable) criteria"
 - o "The ranking that the system uses is based on predetermined weights tied to each question/requirement that the buyer(s) have set (or lowest price, depending on the solicitation type)."
 - o "along with an award formula, and a price/quality ratio all factor into the automatic system tabulation of offers."
- Evaluation
 - o Each evaluator is "presented with only the questions he/she needs to evaluate."
 - o "Evaluators see the question/criteria from the solicitation text, the rating scale, and the responses to that question from the vendor(s)."
 - o "have the option to hide all pricing during the evaluation phase as well as the name of the Suppliers"
 - o "tabulated scores can be shown in one overview and/or exported"
 - o "By default, the average score of all the evaluators will be displayed"
 - o "lead buyer can "overrule" this score if the committee agrees upon a different score after some discussion". "original comments and evaluator scores are still saved".
 - o "any proposer's offer is found non-responsive or responsible, the offer can be manually rejected and marked as Disqualified"
- Document Authoring Tool (pg. 49)
 - o "manage all types of awarding communications"
 - o "drafting solicitation summaries and other types of informative documents".
 - o "templates can be created using smart placeholders to input data pulled from the solicitation."
 - o "Notice to Proceed", "Notices of Preliminary Award", "Solicitation Log/Summary, Supplier Awarding Communications"
- Can add external subject matter expert as evaluator. (pg. 51)
- "Messaging and Announcements tab. In this tab, you can communicate with your solicitation team (internal) and with your participating suppliers (external)." "can pull from templates"
- "provides a set of standard user roles and configurations for any additional user role required by the Agency to reflect their purchasing operations."

RTM

- POTENTIAL WEAKNESS, SRC-35: System does not have check-in/out capabilities for documents, T&Cs and templates.
- POTENTIAL WEAKNESS, SRC-38: System does not provide a means to identify all templates that include standard documents/terms/specs that have been updated.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- NOTE, SRC-40: User-defined fields are accomplished by defining separate templates with the desired fields.
- WEAKNESS, SRC-45: System does not have the capability to combine multiple Purchase Requests into a single Solicitation.
- WEAKNESS, SRC-46: System does not have configurable rules engine for workflow/approvals. Must define approvals separately within each Template or Solicitation.
- WEAKNESS, SRC-47 through 50: Only the Intake Management (captures Purchase Requisition) has functionality to define business rules for approvals.
- WEAKNESS, SRC-54: System only supports NIGP commodity codes. Cannot use a different taxonomy.
- WEAKNESS, SRC-59: Supplier lists can only be generated based on commodity codes.
- POTENTIAL WEAKNESS, SRC-60: Supplier lists will not include suppliers with prior or active contracts/POs.
- WEAKNESS, SRC-62: System does not allow user to add or remove registered suppliers from the suppliers list.
- POTENTIAL WEAKNESS, SRC-64: System does not have a means for suppliers to sign up to be notified when contract is re-solicited, so can't add these to a Supplier list.
- POTENTIAL WEAKNESS, SRC-67: Suppliers must be registered to be on a solicitation supplier list.
- POTENTIAL WEAKNESS, SRC-73: System does not have any automated publishing of a Solicitation. User must "select the Publish button".
- POTENTIAL WEAKNESS, SRC-75: Suppliers do not have a means to opt out of notifications for a specific solicitation.
- POTENTIAL WEAKNESS, SRC-76: System does not have a means to publish solicitations to a State public website. Public posting is to a public page of the Solution.
- POTENTIAL WEAKNESS, SRC-78: System cannot post an alert on the State's public website.
- POTENTIAL WEAKNESS, SRC-80: System does not have means to gather Supplier information (not registration) when they download solicitation documents.
- POTENTIAL WEAKNESS, SRC-81: Amendment and modifications to a solicitation will post to the system public page, not the State's public website.
- POTENTIAL WEAKNESS, SRC-83: System does not have webinar capabilities.
- POTENTIAL WEAKNESS, SRC-88: the details provided in the Technical Proposal (pg. 40) indicates that Solicitation Team members can access the Questions in the Solicitation but this does not include the req't to break up questions and "workflow" them for review/response.
- POTENTIAL WEAKNESS, SRC-104: Suppliers cannot identify contacts other than the person submitting the response.
- POTENTIAL WEAKNESS, SRC-105: System does not provide a means to submit redacted proposals. However, NOTE that a Supplier could always attach a redacted version.
- WEAKNESS, SRC-107: System does not have a means to only allow suppliers to submit a hard copy response.
- POTENTIAL WEAKNESS, SRC-113: Buyer cannot enter evaluation panel member scores on their behalf.
- POTENTIAL WEAKNESS, SRC-117: System cannot hide supplier names on the Evaluation screen.
- WEAKNESS, SRC-121: System does not have the capability to store attachments to the evaluation.
- Eighteen req'ts need clarification.

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Contract Management, pg. 54 :

- WEAKNESS, “actual drafting of the contract is a responsibility of the legal department (who focuses on the legal language and clauses), this process is deliberately kept outside the platform”
- Completed/signed contract documents would be attached to a Contract record in the system.
- Contracts dashboard: “list of all current and archived contracts divided over different files/folders”
- “can import the Agency’s existing contracts using a master Excel file”
- “Within each contract file there is an assigned workgroup, which includes the colleagues who have any rights to the contracts of that file”
- “tasks can be assigned to any stakeholder involved”
- “contract needs approval from a certain group of people, this task can be assigned to that workgroup”
- “‘changes’ tab, where all changes and amendments to the contract are tracked and time-stamped”
- Templates (pg. 57) (NOTE: contract ‘record’ is created in the system, not the Contract itself)
 - o “create as many customized contract templates as necessary”
 - o “all contract records are drafted from a template.”
 - o “Any type of information can be captured and tracked using the templates”
 - o “any documents, including (but not limited to) the contract itself, insurance documents, bid bonds, and certifications can be uploaded to the contract record within the Files tab”
 - o “Any file type can be uploaded... no limit to the number of documents the Agency can upload per contract”. WEAKNESS, per GEN-11.
- “Relation Tab within a contract allows you to show a relationship between contracts”. “linking old contracts to a current contract and/or showing a parent/child relationship” (pg. 59)
- “With the Contract Management Module, the Agency can decide what (if any) information should be publicly accessible on the Public Organization Profile” (pg. 59)
- “All contract milestones including expiration, renewal dates, insurance certificates, bonds, etc., can have system generated notifications turned on” (pg. 60)
- “Tasks can not only be automatically generated using templates, but customizable tasks can also be assigned to individuals or saved as general to-dos in your contract management dashboard.” (pg. 61)
- “no limit to the number of contracts” (pg. 62)

RTM

- WEAKNESS, CNT-2 through 11: System does not have Contract Authoring functionality to create the legal contract document.
- WEAKNESS, CNT-12: System does not have eSignature capability. Is it "on the development roadmap".
- WEAKNESS, CNT-13: System does not have a means for login credentials to sign the Contract document since that document is created outside the system (see Tech Proposal, pg. 54)
- WEAKNESS, CNT-14: System does not have eSignature capability. Is it "on the development roadmap".
- WEAKNESS, CNT-18: System does not have the capability for one user to create a contract on-behalf of another user.
- WEAKNESS, CNT-23: System does not have Contract Authoring functionality to create the legal contract document.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, CNT-24: System does not have workflow capability for contract documents.
- WEAKNESS, CNT-25: System does not have Contract Authoring functionality to use MS Word or Adobe Acrobat.
- WEAKNESS, CNT-26: System does not have workflow capability for contract documents.
- WEAKNESS, CNT-28: System does not support creation of contracts to a pool of Suppliers with SOW sourcing events issues from the Contract.
- POTENTIAL WEAKNESS, CNT-30: System does not have functionality to capture payment retainage, withholding and retention amounts.
- POTENTIAL WEAKNESS, CNT-31: System does not have capability to capture payment type, terms and discounts.
- POTENTIAL WEAKNESS, CNT-34: System does not provide the capability to prevent backdating of Contract effective dates"
- POTENTIAL WEAKNESS, CNT-35: System does not provide the capability to designate contract use and identify which organizations can use the contract.
- POTENTIAL WEAKNESS, CNT-36: System does not provide the capability to establish default acct. code values.
- WEAKNESS, CNT-37: System does not have the capability to have reminders that notify suppliers.
- POTENTIAL WEAKNESS, CNT-39: System does not provide the capability for suppliers to submit/load subcontract payments.
- POTENTIAL WEAKNESS, CNT-40: System does not provide the capability for Cooperative Purchasing Members (Polisubs) to submit/load spend data.
- POTENTIAL WEAKNESS, CNT-49: System does not have the capability to make changes to the contract record without creating an amendment.
- "WEAKNESS, CNT-51 through 64 & 66: System publishes contracts to a Netometrix provided website (Public Organization Profile), not the State website. Also, the Public Organization Profile contracts posting does not have ""search functionality"", this is on the roadmap for development."
- CNT-68: Capture of purchase orders is N/A
- CNT-69, Track Orders: N/A
- WEAKNESS, CNT-70: System does not have the capability for Suppliers to load/submit sales report or usage data.
- POTENTIAL WEAKNESS, CNT-71 & 72: System does not provide functionality to support/manage Admin Fees.
- CNT-85, Initiate an Order: N/A
- WEAKNESS, CNT-86: Systems does not provide the capability to define/identify contract deliverables as part of the contract record.
- POTENTIAL WEAKNESS, CNT-88: System does not provide the capability to have different pricing for different organizations.
- Two req'ts need clarification

Vendor Performance, pg. 62/63:

- "Supplier Performance Monitoring feature with KPI's". "track how suppliers are performing versus their listed SLA." Using "Performance Surveys"
- Survey invitations go to any "colleague(s) within the organization (or to external parties)"
- "Each poll can be set up with questions and requirements"

RTM

- WEAKNESS, VPE-1: Systems does not provide the capability to define/identify performance milestones as part of the contract record.
- WEAKNESS, VPE-10: System does not have the capability for Suppliers to load/submit sales report or usage data.
- WEAKNESS, VPE-18: System does not provide the capability for suppliers to upload documents to a contract record.
- VPE-19, Link POs to Contracts: N/A
- VPE-20, Orders w/o Contract number: N/A
- POTENTIAL WEAKNESS, VPE-23: System does not send notification to Buyer when Supplier does not meet performance criteria.
- WEAKNESS, VPE-25: Document attachments to a performance survey are limited in size to 2GB each.
- No req'ts need clarification.

Purchasing/Data Analytics, pg. 63 :

- "report manager tool, organizations can build their own reports"
- "All data that enters the system can be reported and exported;"
- "reports can also be scheduled to be automatically sent out via email on a regular basis"
- Sample reports that can be generated
 - o "All procurement projects: planned, current and archived
 - o Suppliers by purchasing process per category, product, services, and commodity-codes
 - o Internal customers (per department) linked to their procurement projects
 - o Member engagement per project
 - o Realized savings per project (e.g., awarded versus budgeted values)
 - o Total procurement volume per department, commodity-code, and/or supplier
 - o Social Return rates (disadvantageous businesses) per project, procedure, procurement category, department, and/or Licensed Buyer"

RTM

- PDA-1, Analyze purchase dollars: N/A
- PDA-7, PO reports: N/A
- PDA-10, Catalog Reports: N/A
- PDA-11, purchase dollar reports: N/A
- POTENTIAL WEAKNESS, PDA-14: System does not currently have report for Responses by Supplier. "Currently in development"
- PDA-18, Track Orders: N/A
- PDA-19, Track Orders: N/A
- PDA-20, Pcard Orders: N/A
- PDA-21, Pcard Orders: N/A
- PDA-25, Orders/Change Orders: N/A
- WEAKNESS, PDA-30: Reports don't have drill down capability. User must create additional reports that "narrow down data".
- WEAKNESS, PDA-32: System cannot publish reports to a public website. Must be exported and manually posted to the website.
- POTENTIAL WEAKNESS, PDA-35: System does not have the capability to report from taxonomies other than NIGP.
- PDA-36, Pcard Orders: N/A

SME DEPARTMENT/STATE: NASPO

- PDA-37, Marketplace price analysis: N/A
- No req'ts need clarification.

Technical Requirements - pg.65-80

Availability, pg. 65 & "Attachment C- Merrell Security Attachment (Part 3)" document: Partially meets req'ts.

- "solution ensures peak availability 24/7 and this includes the business hours during the work week."
- Attached "Part 3" document, pg. 52: "NX guarantees a minimum availability rate (up-time) of 99% for the Web Service outside the exclusions"

Accessibility Requirements, pg. 65: Partially meets req'ts.

- "is compliant with the regulatory requirements of the Americans with Disabilities Act (ADA)."
- "Our standard is Web Content Accessibility Guidelines (WCAG) 2.0, Level AA. In partnership with our industry consultant, we will complete and provide a Voluntary Product Assessment Template (VPAT) to the Agency."

Audit Trail and History, pg. 66 & TECH-1 thru 5: Partially meets req'ts.

- "activities that occur in all user accounts, including login and file uploads, are fully logged and auditable through our platform"
- "can request vendor logfiles"
- "each solicitation and contract has logfiles to manage when specific actions were taken"

RTM

- NOTE, TECH-2: Responses to other req't demonstrate that comment can be captured on Solicitations and Contracts.
- NOTE, TECH-3: Responses on other req'ts demonstrate that transaction status and approval status is available on transactions. eSignature status is not available since there is no eSignature functionality.
- POTENTIAL WEAKNESS, TECH-4: Only the Intake Management Module provides the capability to override approvals.
- No req'ts need clarification.

Browsers Supported, pg. 66/67: Partially meets req'ts. Response did not address providing support for browsers ranked as more than 10% of traffic, tracking browser user and testing with multiple browsers.

- "All major web browsers are supported by the Negometrix4 software and can be used to access the system."

User Accounts and Administration, pg. 67 & TECH-6 thru 20: Partially meets req'ts.

- "User roles can be defined on an organization level and solicitation level"
- Pg. 8, "for a solicitation, a colleague could have the role of a buyer (who can edit all information), an evaluator (who can view all information, and add scores/comments to the items assigned), and a viewer (complete view only rights). Custom roles can also be added"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Pg. 53/54 & Fig. 53, "The platform provides a set of standard user roles and configurations for any additional user role required by the Agency to reflect their purchasing operations." "System Administrators will be able to adjust these roles and permission."
- "on an organization level, the rights/roles look a bit different. By default, there are two groups, Administrators and All Colleagues. To add a new user group, click 'New' within the User Rights tab within the Organization Settings. Give the group a name and select the desired rights"

RTM

- POTENTIAL WEAKNESS, TECH-8: System does not provide the capability to restrict edit access for transactions done on-behalf of another organization.
- WEAKNESS, TECH-9: Only System Administrators can process transactions on-behalf of another user.
- POTENTIAL WEAKNESS, TECH-12: System does not support dual sign-on via one account.
- WEAKNESS, TECH-13: There is not separate Super User role capability. Users would have to be given full System Administrator rights.
- POTENTIAL WEAKNESS, TECH-14: System does not default another user's edits, business rules, etc. when a transaction is done on their behalf.
- POTENTIAL WEAKNESS, TECH-16: System does not have the capability to configure a setting to automatically deactivate user accounts after a period of inactivity.
- WEAKNESS, TECH-18: System does not send email notification to users when there have been changes made to their account.
- POTENTIAL WEAKNESS, TECH-19: System does not provide a view of deactivated users separate from deleted users.
- POTENTIAL WEAKNESS, TECH-20: System does not provide the capability to search all available user roles/rights.
- One req't needs clarification.

User Authentication, pg. 68 & TECH-21 thru 25: Partially meets req'ts. Response did not address Identity Proofing and Logging/Monitoring.

- "can configure User Provisioning, 2-Factor Authentication (2FA), Single Sign On (SSO). SSO is based on SAML2.0, both Microsoft AD and Okta support this authentication method."

RTM

- POTENTIAL WEAKNESS, TECH-23: Password rules are not configurable.
- WEAKNESS, TECH-24: System does not have the capability to auto-generate user passwords.
- POTENTIAL WEAKNESS, TECH-25: System does not provide the capability to automate user acceptance of acceptable use agreements.
- No req'ts need clarification.

Federated Identity Management, pg. 69: Meets req'ts.

- "user provisioning...we use the SCIM 2.0 protocol."
- NOTE, response to User Authentication indicates SSO capability with "SAML2.0"

Data Conversion, pg. 69 & TECH-26 thru 34: Meets req'ts. However response did not describe "preparation requirements and responsibilities".

- "can transfer all existing boilerplates"

SME DEPARTMENT/STATE: NASPO

RTM

- Meets req't.

Mobile Device Support, pg. 70 & TECH-62: Meets req't.

- "fully supported on any mobile device"

RTM

- Meets req't.

Mobile Applications, pg. 71: Does not meet req't.

- "no mobile application to download as any user can simply login using their internet browser of choice"

Data Ownership and Access, pg. 71: Meets req't.

- "data in the Negometrix4 platform is owned by the Participating Agency"
- "Agency will be able to download .zip files to access any (and all) information from within the system" "at no cost"

Date Retention, Archive and Purge Considerations, pg. 71 & TECH-63: Partially meets req'ts.

- "data is stored through Microsoft Azure"
- "application stores its data in SQL Server databases"
- Data purging is only done as part of "termination of services" (pg. 72)

RTM

- POTENTIAL WEAKNESS, TECH-63: System does not provide any specific archive/purge functionality for data retention. Users can elect to purge/delete when needed.

Disaster Recovery Plan, pg. 72-76 & "Attachment C- Mercell Security Attachment (Part 3)" document: Meets req'ts.

- "Two times a year Mercell engages in penetration testing"
- Attached "Part 3" document has their Business Continuity/Disaster Recovery Plan

Solution Environments, pg. & TECH-64 thru 68: Does not meet req'ts.

- "Development Environment – used by the software developers during the implementation"
- "Test Environment – used by the QAs"
- "Acceptance Environment – used by business analysts, consultants, and account managers". CONCERN, this does not appear to be a User Acceptance environment.
- "Live Environment – the production version of the product used by real customers."

RTM

- NOTE, TECH-68: Technical Response to Solution Technical Architecture refers to having scalability standards that would be met.
- Three req'ts need clarification in that they did not address a Training environment or testing of integrations.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Solution Technical Architecture, pg. 77-79 & "Attachment C- Merrell Security Attachment (Part 3)" document: Partially meets req'ts. Response did not address data exchange techniques or shared network components.

- "cloud based SaaS (Software as a Service) web application it relies on the IaaS (Infrastructure as a Service) and PaaS (Platform as a Service) solutions provided by Microsoft Azure"
- Fig. 73 & 74 "display the software architecture"
- Attachment "Part 3" document (pg. 1 & 32) has full description/details of their "Controlled Software Development Policy"

Solution Network Architecture, pg. 79/80 & Attachment C- Merrell Security Attachment (Part 2) document: Meets req'ts.

- Attachment "Part 2" document (pg. 8) has their network "Deployment architecture" diagram and information on platforms and the req'd range of services.
- "web application and web services are only accessible through HTTPS"
- "connection to the database is encrypted, via TLS 1.2."
- "database files (.mdf and .ldf files) are stored in an encrypted form... use Transparent Data Encryption (TDE)"
- "Data is transmitted across a network in encrypted form using Transport Layer Security (TLS)."
- "Sensitive data related to a user's name, password, etc. is also encrypted while at rest."
- "The environment that the Participating Agency will store their data in is single tenant."
- "The Agency's data is separated on the logical level through roles and permissions."

System Development Methodology, pg. & "Attachment C- Merrell Security Attachment (Part 3)" document: Meets req'ts.

- Attachment "Part 3" document (pg. 1 & 32) has full description/details of their "Controlled Software Development Policy"

Service Level Agreement, pg. & "Attachment C- Merrell Security Attachment (Part 3)" document: MAY NOT MEET REQ'TS.

- "Merrell Inc. complies with all items in the provided SLA".
- CONCERN/CONFLICT, the Technical Proposal indicates compliance with RFP SLA however the their SLA, included in Attachment "Part 3" document (pg. 50), does not comply with the RFP SLA.
 - o "Service Hours: the usual office hours of NX (8 AM - 6 PM EST) from Monday to Friday with the exception of recognized Federal public holidays."
 - o Report Categories
 - Category 1: "Web Service is completely unreachable due to a Defect"
 - Category 2: "Defect that generates a serious application error, which may jeopardize the progress of an essential processing period but does not bring the entire Web Service to a standstill."
 - Category 3: "a non-substantial problem in the Web Service that does not require an immediate response"
 - Category 4: "all questions or requests for information"
 - o The following response times apply during Service Hours:
 - Category 1: 4 hours;
 - Category 2: 8 hours;

- Category 3: 24 hours; and
- Category 4: 2 working days.
- “makes every effort to fully restore the Web Service within these response times or to offer an acceptable work-around.”

Security Requirements – pg. 81-85

Cloud Security Alliance (CSA) Compliance, pg. 81: Meets req'ts.

- “Attachment A: Merrell Consensus Assessments Initiative Questionnaire (CAIQ) and Attachment B: Negometrix4 Negometrix CAIQ_v3.1_Final”

Security and Privacy Controls, pg. 81 & “Attachment C- Merrell Security Attachment (Part 1) document: Meets req'ts.

- “Merrell is ISO/IEC 27001:2013 Information security management systems certified. ISO 27001 is consistent with NIST 800-53. Negometrix is ISAE 3000 Type II certified.”
- Attached “Part 1” document (pg. 4) shows their mapping/compliance of ISO 27001 to NIST 800-53.

Security Certifications, pg. 81: Meets req'ts.

- “Merrell is ISO/IEC 27001:2013 Information security management systems certified. ISO 27001 is consistent with NIST 800-53.”

Annual Security Plan, pg. 8283 & Attachment C- Merrell Security Attachment documents, Part 1, 2 & 3: Meets req'ts.

- “Negometrix implements Information Security Management System (ISMS).”
- Attached “Part 2” document
 - o pg. 13, has their Information Security policies.
 - o pg. 16, has their Information Classification, Labeling and Handling Policy
 - o pg. 27, has their Cryptograph information.
 - o pg. 31, has their Operations Security (malware, backup, logging, etc.)
 - o pg. 37, has their Communications Security.
- Attached “Part 3” document (pg. 27) has their security controls.
- Attachment “Part 3” document (pg. 19) has copy of their Business Continuity Plan.

Secure Application and Network Environment, pg. 83 & Attachment C- Merrell Security Attachment (Part 3) document: Meets req'ts.

- Attachment “Part 2” document (pg. 6) has their Operations Manual which addresses Architecture, Maintenance, Backup/Restore, Monitoring, Capacity Planning, Availability and Release Management/Updates.
- Attachment “Part 2” document (pg. 16) has their Information Classification, Labeling and Handling Policy.
- Attachment “Part 3” document (pg. 19) has copy of their Business Continuity Plan.

SME DEPARTMENT/STATE: NASPO

Secure Application and Network Access, pg. 83, SEC-1 thru 5 & Attachment C- Merrell Security Attachment (Part 2): Partially meets req'ts.

- "communication is encrypted and done through HTTPS (with TLS 1.2 or higher)."
- "Security Audit Log.... System Event Log, Web Logs, System Auditing Log"

RTM

- POTENTIAL WEAKNESS, SEC-1: System does not track device usage.
- WEAKNESS, SEC-2: System does not have the capability to set a limit on the number of concurrent login sessions for a user.
- WEAKNESS, SEC-3: System does not provide the capability to force user login or end their session.
- POTENTIAL WEAKNESS, SEC-4: System does not use cookies.

Data Security, pg. 84 & Attachment C- Merrell Security Attachment documents, Part 2 & 3: Meets req'ts.

Personally Identifiable Information Protection, pg. 84 & Attachment C- Merrell Security Attachment documents, Part 2 & 3: Partially meets req'ts. Response did not address compliance with Federal PII, HIPAA and GDPR requirements.

- "Merrell protects Personally Identifiable Information (PII)"

Security/Privacy Issue Occurrence, pg. 72-76, 84 & Attachment C- Merrell Security Attachment (Part 2): Does not meet notification req'ts.

- See pgs. 72-76 for Data Breach Protocol
- Attachment "Part 2" document (pg. 1) has copy of their Incident Management Procedure.
- Attached "Part 2" document (pg. 20) has their Privacy Policy

PII Data Actual/Attempted Access or Disclosure, pg. 84 & Attachment C- Merrell Security Attachment (Part 2): Does not meet notification req'ts.

- See pgs. 72-76 for Data Breach Protocol
- Attachment "Part 2" document (pg. 1) has copy of their Incident Management Procedure.
- Attached "Part 2" document (pg. 20) has their Privacy Policy

Security Breach Reporting, pg. 85 & Attachment C- Merrell Security Attachment (Part 2): Does not meet notification req'ts.

- Attachment "Part 2" document (pg. 1) has copy of their Incident Management Procedure.
- Pg. 72-76 for Data Breach Protocol
 - o "In the event of a breach... customers will be informed within 24 hours after the first detection via email."
 - o "Merrell offers a Data processing agreement with its customers. Merrell has a dedicated Data Processing Officer (DPO)"

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Implementation Services Requirements – pg. 85-102

Project Management, pg. 85: Partially meets req'ts.

- Project Management Methodology: not provided.
- Project Manager: OK
- Implementation Plan: CONCERN, implementation timeline of less than 46 dates is too short for a Statewide implementation of any size. Also does not reflect conversion and integration activities.
- Project Deliverables: OK
- Bidders' staffing plan: No individual identified for OCM. NOTE, NEGOTIATION, should not have costs for Account Manager role.
- Participating Entity staff: Inadequate detail provided to reflect staffing that will be req'd.
- Governance: Describes managing project but not Governance.

Project Implementation Methodology, pg. 89: Partially meets req'ts. CONCERN that practices are for only very small organization implementations, not Statewide.

- Methodology reflected in their "Phases" is too short and not comprehensive enough for a Statewide implementation. CONCERN, Mercell may only be experience/staffed to do small organization (e.g. City or small Department) implementations.
- Design/Configure/Build: did not address configuration/setup of Templates req'd to use the system.
- System Development Methodology: OK NOTE, more detail provided in the notes for Technical Requirements System Development Methodology section.
- Testing
 - o "Mercell Test Environment is used by QAs to verify that the implemented functionalities correspond to the business requirements and that the quality of the end product is at acceptable level."
 - o "specific testing of new functionality that involves the client, we provide the client access to the testing environment."
 - o "if they client however wishes a personal test environment, to test operational user stories, Mercell offers its client an additional 'Test' account on our live instance and restricts those accounts' ability to perform any public facing actions, allowing the client to have a testing like environment."
 - o Config/Change Control: Nothing described and explained "all functionalities are already existing, no need for additional development" (pg. 92). However Attachment C- Mercell Security Attachment (Part 2) document (pg. 39/40) discusses version control/testing as part of the Development Methodology.
- Risk Mgmt: "Mercell will conduct a detailed risk analysis together with the Agency and develop a Risk Management Matrix". "for each risk a control measurement is defined and implemented"
- Issue Tracking/Mgmt: Management discussed but identification/tracking not discussed.

Catalog Support Services, pg. 93: N/A

Data Conversion Services, pg. 94: Partially meets req'ts. Response did not address performing an assessment and has conflicting list of what will be converted (see below)

- Contract Conversion

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “migration of the contracts means the contract dates, documents, reminders, tasks and participants. The migration is carried out by the Mercell Senior Implementation Consultant and a contact person from the Participating Entity”
- “through an Excel export from the current contract management.”
- “Implementation Consultant takes over the duties from the Participating Entity by preparing this information for the migration using a migration document”
- Data Cleansing: “Participating Entities will be responsible for data cleansing”
- Tools: “Excel spreadsheets tend to be the fastest means of data conversion”
- CONCERN, this section only speaks to converting Contracts however the response to the Technical Requirements Data Conversion and the RTM (27,28,30,31) req’ts indicate that other data can/will be converted:
 - Pg. 69, “can transfer all existing boilerplates”. “Boilerplates can include solicitations templates, award language, supplier invitations, requisition forms and more”

Interface/Integration Development Services, pg. 94/95: Partially meets req’ts.

- Assessment: response discusses the work in doing an assessment but does not say the Mercell will do an assessment.
- Design/Develop/Test/Implement: “our integration experts collaborate to design, plan and execute a seamless flow of information between Mercell SaaS solutions and your existing internal systems.”

Organizational Change Management (OCM Services) , pg. 95-97: Does not meet req’ts. Approach and activities are minimal with focus on discussing with Participating Entity what they should do.

- “has adopted a proactive approach to responding to problems and changes in the Project Scope.”
- “to prevent scope creep”
- **Define the Preliminary Scope:** “Mercell consultants will work hand-in-hand with you to define what your current processes look like, gauge initial comfort within the system, and inquire as to outside factors that could impact” “Most of this step occurs within and directly after the Kick-Off meeting”
- **Agree Upon Final Acceptance:** “the Mercell team will meet with the Participating Entities to re-define and evaluate what constitutes the final acceptance of the implementation.”
- “every Participating Entities buying agent is welcome to attend Mercell’s thought leadership webinar series open to the public, and Mercell’s monthly continuous learning events”
- **Assessment/Communications:** “Mercell, along with the Participating Entities will identify stakeholders and impacted groups, such as Departments, Employees, and Vendors. Mercell, in conjunction with the Participating Entities, will communicate the vision and anticipated benefits of the change initiative to stakeholders and impacted groups and identify resistance points”
- **Impact Assessment:** “Mercell consultant will discuss with the Entity who will be affected by the transition to the new platform, how they will be affected, what issues this might cause, and how those issues should be handled. In doing so, we will also help identify potential risks during the transition and develop a best course of action”
- **Communication Plan:** “Mercell consultant will work with you to evaluate your organizational readiness.” “Mercell consultant will be available to discuss the above items with Participating Entities and formulate the best communication plan for them.
- **Coaching Plan:** “Mercell will work with the Participating Entities at their own pace and will gradually transition responsibility”.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Resistance Assessment/Mgmt:** "Prior to the training sessions, a Mercell consultant will work with Participating Entities to analyze the mindset of the stakeholders...discuss influences such as how the platform may impact the work of stakeholders, how the change aligns with the organization's values, and the organization's history to accepting change"

Training Services, pg. 97-100: Minimally meets req'ts. Training req'ts for this functionality are not significant, however the approach in the response are aligned with small organization implementations, not Statewide.

- **Assessment:** "consultant will work with the participating entity to understand their training needs and will proceed accordingly"
- **Training Plan:**
 - o "consultant will sit with the project lead to discuss the best method of training for the organization."
 - o "Consultants are available to conduct as many trainings"
 - o "also provide general monthly trainings available to all users of the Negometrix4 platform"
 - o "If the Participating Entity wishes to move
 - o training responsibilities to an internal staff member, a Mercell account manager can assist in making sure they are comfortable with instructing others."
- **Training Example:** CONCERN, the Supplier and Contract Mgmt parts of system not covered
 - o Nx-Training 1: 1 hour, Overview then preparing/publishing Solicitations and Q&A
 - o Nx-Training 2: 1 hours, Evaluate offers, Awarding, Communicating Awards
 - o "training sequence takes a minimum of two hours total".
- **Delivery Methods:**
 - o On-Site Instructor Lead: "one of our consultants will be able to conduct the necessary training"
 - o Continued Learning: "Mercell hosts Continued-Learning training opportunities for all current customers every third Tuesday of the month."
 - o Office Hours meeting: "is an hour-long Zoom "open-door office" that provides a space for the participating entities to join knowledgeable Mercell staff and other Negometrix4 Users in the room to ask questions (about the training or other items), solidify business relationships, and voice ideas for improvement."
- **Training Materials:** "Participating entities will have the right to publish Negometrix4 training materials on publicly accessible website and the state may distribute these materials as needed". CONCERN, training materials are probably generic, not State specific.

Help Desk Services, pg. 100-102, IMPL-1 thru 5 & Attachment C- Mercell Security Attachment (Part 3): Meets req'ts, however concerned that the Staffing would be insufficient to meet a Statewide implementation.

- "Mercell provides our Service Desk (calling, live chat, and email) free of charge to all suppliers and buyers under the
- Negometrix4 platform. No additional help desk operation is needed." (pg. 102)
- "Mercell offers two levels of support: Level 1 functional support managed through our Service Desk and Level 2 technical support"
- "Service Desk open 7:00 – 8:00 PM EST." CONCERN, Attached "Part 3" document (pg. 51) may conflict where it indicates "Service Hours: the usual office hours of NX (8 AM - 6 PM EST) from Monday to Friday with the exception of recognized Federal public holidays."

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "is accessible during standard business hours by phone, email, or live chat."
- "manage our tickets through the service FreshDesk"
- "are recorded videos available for system users and vendors that offer additional assistance on a variety of topics"
- "we continually monitor our performance on the Service Desk", "Average pick up time", "resolution during first customer contact", "many more performance metrics".
- Issue categorization & solution times on pg. 101.
- "Over the last 12 months (July 1st, 2020 to July 1st, 2021) our support desk handled 1,331 support calls" CONCERN, the Mercell Help Desk may not be staffed sufficiently to handle Statewide or multiple State implementations. The number for one year (1,311) is small as compared to likely Statewide implementation demand.

On-Site System Stabilization Support, pg. 102: Meets req'ts.

- "account manager will be able to address all minimum requirements listed above (system setup/configuration changes, issue assessment/resolution, system performance and stability monitoring/adjustment, system use assessment, mentoring of Agency operations staff, coordination of Contractor off-site tasks and support resources, coordinate documentation) and will be able to provide on-site support if needed."

Managed Services Requirements – pg. 102-109

Solution Support, pg. 102-107 & MNGD-1: Meets req'ts.

- Pg. 10, "For Mercell aftercare means:
 - o Providing a highly educated Service Desk which is available free of charge on working days from 7am – 8pm EST
 - o Having a dedicated Account Manager who knows the workflows of the agency and makes sure that the Service Desk has knowledge of all relevant information
 - o Planning contact moments between the Account Manager and contact person(s) of the agency
 - o Submitting management reports during these contact moments (showing the use of the Service Desk as well as the use of the platform)
 - o Advising on adjustments in the templates and extra training for the users, based on these management reports"
- "guarantees the software is always up to date."
- "Several times (usually 8) per year, an update with new or improved functionalities is pushed live"
- "Mercell broadcasts system messages regarding system downtime due to maintenance" and "posted throughout the system at a minimum of two weeks before the scheduled downtime."
- "Users are fully informed on all updates occurring in the system"
- "will be able to reasonably accommodate the participating entity testing, review, and approval processes"
- "All environments will be monitored, have patches applied, and system logs administered"
- "All environments will be included in regularly scheduled backup, maintenance, updates, patching, monitoring, and so forth"
- "will be sure to identify to the Participating Entity any issues that may adversely affect the in-scope environment and operational requirements"

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercel

CATEGORY #(s): 2

DATE: 12/21/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "account managers will be assigned to Participating Entities and will be available to address corrections to performance, functional, integration or technical issues with in-scope environments." Will also "routinely review their usage of the software and will be available for any questions, needed training opportunities, and general assistance"
- "will promptly notify the appropriate users of an outage and restoration of service accordingly"
- "will be monitoring their system use and
- "will be able to discuss growth plans when necessary"
- "will manage the security functions"

Organizational Change Management (OCM Services) , pg. 107: Does not meet req'ts.

- Response did not address the req't to provide OCM services.

Training Services, pg. 107: Meets req'ts.

- Response did not address the req't to provide Training Services, however in the Implementation Requirements Training Services section (pg. 99) the response identified the following training that is available post implementation:
 - o Continued Learning: "Mercell hosts Continued-Learning training opportunities for all current customers every third Tuesday of the month."
 - o Office Hours meeting: "is an hour-long Zoom "open-door office" that provides a space for the participating entities to join knowledgeable Mercell staff and other Negometrix4 Users in the room to ask questions (about the training or other items), solidify business relationships, and voice ideas for improvement."

Catalog Support Services, pg. 107: N/A

Help Desk Services, pg. 107: Meets req'ts, though with concern about the capability to scale up to a Statewide implementation level of support.

- Response did not address the req't to provide Help Desk services, however the response to Implementation Requirements Help Desk Services, which continues as part of the Licensing, does meet req'ts

Transition Out Assistance Services, pg. 72 & 108 :

- Pg. 72, "If the Agency were to change vendors, see below for the data transition process:"
 - o "Upon termination of the Agreement, Mercell will close access to the Web Service for regular use on the end date.
 - o "With a maximum of 2 End Users, the Client will have access to the Web Service for 1 month after termination for the purpose of exporting the desired Data.
 - o "The Client exports Data via the standard functions.
 - o "The Client's Data will be kept for 6 months after termination. After 6 months, Mercell will remove the Data and issue a written confirmation to the Client.
 - o "If and insofar as agreed in writing, the Client shall have the option of an extended data retention on termination of the Agreement for a period of a maximum of 6 years after termination on payment of an amount equal to 8% of the most recent User Fee. If the Client wishes to make use of this extended data retention, this must be formalized within 6 months after termination.
- "the account's dedicated account manager will handle all items related the process,"

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments: Although the lack of detail and majority of implementation staff based outside the U.S. is a concern, multiple projects completed in U.S. appear to support ability to perform with this model.

Organization Qualifications and Experience

1. Overview of the Organization
 - E-procurement since 2000.
 - Contract authoring/contract management. Negometrix NX4 model.
2. Previous Projects
 - Local government projects in U.S.
 - State of New York transportation purchasing model.
3. Subcontractors
 - None
 -
4. Organizational Chart
 - Only 14 in U.S. Remainder of 500+ staff overseas. Two U.S.-based implementation staff identified.
 - Org chart lacked detail and definition for roles. More detail preferred.
5. Litigation
 - None reported.
 -
 -
6. Financial Viability
 -

Individual SME Comments:

Mercell – flexible template-based procurement platform

Single agency system rather than enterprise level.

Focus on buyer side – limited supplier toolset outside of solicitation response and document management during contract cycle.

General Principal and Requirements

- Key Solution Functionality Elements – eprocurement sourcing system: Solicitations and Contract Management modules
 - Single login access
 - No marketplace module.
 - API integrations
 - Reporting dashboards and visualizations.
 - Data/documents published when the customer decides.
- User Experience – Negometrix4 software guides the user through actions, email notifications linked to tasks or from task access from dashboard
 - Modules can be implemented standalone or combined.
 - Bid notifications by location and NIGP code.
 - Contract action notifications by email and reminder in the portal.
 - Role-based functionality for drafting, review, approval, evaluation.
- Bidder Best Practices and Roadmap – Agile development for enhancements; release notes and support articles published
 - Updates occur when user is ready to integrate.
 - Roadmap – supplier database functions; clause library; user role increased flexibility;
 - >1 yr: DBE registrations; digital signatures; spend management tools
- Innovations and Value-Added Features/Services – Free servicedesk on work days 7a-8p EST; dedicated account manager; advising on templates and training needs
 - Continud opening training for customers third Tuesday; office hours – open door third Thursday for questions.
- Customizations/Extensions – integrations possible if need demonstrated – joint effort.
- Alternative Funding Models (Is this the bid pricing?)
 - Purchasing: Enterprise fee or per license structure.
 - Implementation and training costs waived for small agencies.
 - Lead buyer licenses; approval and auditor licenses are included with no license cost.
 - Contract Management – Enterprise fee based on org size. –
 - 35% discount fro multiple muldes.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercell

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract transition – flexible.

Functional Requirements

- General Functionality – configure for agency requirements.
 - P15 Solicitation module. RFx draft; upload docs; advertise. Q&A through portal; response submission through lockbox; public bid opening online; tabulations/evaluations and document drafter of notice of intent.
 - Contract and Supplier Relationship Management (Negometric4) administer and post
 - contract awards; manage renewals, contract actions; monitor vendor performance
 - Not available RTMs
 - EPROC-GEN-9 or -21– No code crosswalk or upgrade.
 - EPROC-GEN-19 – No bill-to or ship-to address – Needed for non marketplace?
 - EPROC-GEN-24 – Transaction search not available
 - EPROC-GEN-26-27 – No admin fee functionality
 - EPROC-GEN-35 – no comments library
- Supplier Portal -P16 point of entry for supplier functions; responses, update certs; comms with buying agency.
 - P17 Registration in Negometrix4 platform. Single supplier profile with multiple employees as needed. Account needed to respond to solicitation.
 - Registration gets alerts ; access to service desk submission;
 - EPROC-SPR-4 or -13 – No PO or invoicing functionality
 - EPROC-SPR-16 – No catalog functionality.
 - EPROC-SPR-19-21 – No supplier order/receipt functionality.
- Supplier Enablement/Management – See previous.
 - Dynamic Purchasing module from pre-qual vendors.
 - Standard API's for A/P payment integrations.
 - BI data exports.
 - EPROC-VDR-19-27 – No supplier validation.
 - EPROC-VDR-36-37 – No supplier reminder to update details or change audit.
- Buyer Portal – P23 – Task list for with status – only modules enabled for their role.
- Need Identification – customized digital form for purchase requests. Intake/approval workflow.
 - EPROC-NEED-5 – no functionality for contract sequence.
- ~~Request through Pay~~
- ~~Catalog Capability~~
- Sourcing/Bid Management – p27 *preparation, publication, broadcast, receiving responses, opening offers, offer evaluation, award, contract, vendor performance monitoring, and reporting/exporting of solicitation and contract data.*
 - *(RFP's, ITB's, RFQ's, RFI's, Quotations, plus documents like addenda, notice of intent to award, bid tabulation, meeting notices, and notice of awards,*
 - *Digital pricing sheets / product list creation*
 - *Automated bid tabulation; consensus scoring*
 - *Paper docs can be submitted to the system for digital evaluation with responses submitted through the portal; upload/download.*
 - *Templates can be created for reuse.*
 - *Integrated website to push solicitations and contracts.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercell

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *Integrated messaging with solicitation team (internal) and participating suppliers (external).*
 - *EPROC-SRC-83 – teleconferencing not available – load recordings only.*
 - *EPROC-SRC_106 – redacted proposals can't be submitted.*
 - *PROC-SRC-117 – Suppliers names cannot be hidden during Eval.*
- Contract Management – **RTM- missing a lot of functionality.**
 - Contract management functions relate to digital record of contracts, document management (e.g. insurance and certifications) and contract modification tasks; lacks functionality for ordering, expenditure reporting,
 - EPROC-CNT-2-11 – no Contract authoring functionality.
 - EPRIC-CNT-13, -18, -23 – no digital signature
 - EPROC-CNT-26-27 - no contract approval workflow
 - EPROC-CNT-30 -31 – payment functionality missing
 - No order tracking functionality.
- Vendor Performance – purchasing surveys used to track performance against SLAs. Dashboard view of KPS scores.
 - RTM – most elements available.
- **Purchasing/Data Analytics** –
 - eReporting linked to contract activities.
 - **Needs clarification** – Is monthly/quarterly expenditure reporting by vendors on contracts a native feature or is this a configuration? Can expenditures be integrated from financial system for contract management?
 - RTM - No order reporting functionality

Technical Requirements

- Availability – 24/7. 99% in SLA.
- Accessibility Requirements – P66 *in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines*
- Audit Trail and History - activities that occur in all user accounts, including login and file uploads, are fully logged and auditable through our platform. The agency can request vendor logfiles that include activity description and date/time stamp.
- Browsers Supported – Microsoft browser (Not specified if Edge or Explorer); Chrome; Firefox
- User Accounts and Administration – Rights and roles control access levels.
- User Authentication – 2FA, SSO based on SAML 2.0; Microsoft AD, Okta.
- Federated Identity Management – SCIM 2.0 protocol
- Data Conversion – P69 Based on what modules are implemented, the Mercell consultants can transfer all existing boilerplates into the Negometrix4 system. Boilerplates can include solicitations templates, award language, supplier invitations, requisition forms and more.
 - If the agency is using the contract management solution all existing contracts can be imported into Negometrix4.
- Interface and Integration – Rest APIs used to integrate with other functions including Oracle and SAP. Modules integrated in single environment.
 - EPROC-TECH-37-38 – No integration for MWDBE or SOS registrations.
 - EPROC-TECH_30 -58– No integration to so support requisition or financial replrting.
- Office Automation Integration – Office and PDF files can be imported into the Mercell platform Exports in Microsoft or Adobe.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercell

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Mobile Device Support – functions on mobile devices.
- Mobile Applications – no standalone app.
- Data Ownership and Access – data owned by participating agency. Extractable via zip files.
- Date Retention, Archive and Purge Considerations – Microsoft Azure servers in Virginia.
 - Full database backup weekly – transaction log backup hourly; differential database backup daily; 14 day retention.
 - Post contract, Mercell close web service access; 2 users will have one month access to export data. Mercell holds data for 6 months before removing unless data retention agreement of up to 6 years executed with 6 months of contract end.
- Disaster Recovery Plan – protocol in place. No occurrences in past 5 years. Customers informed within 24 hours.
 - Data processing agreement and definitions included.
- Solution Environments – Dev, Test, Acceptance, Live. Only live production environment is US-based.
 - P77 *The live environment is updated and planned in advance date after the approval of the product owner(s). Normally the live update of a given sprint is done 3 weeks after the end of the sprint*
- Solution Technical Architecture – Data stored in SQL servers – Azure data centers.
- Solution Network Architecture – System only accessible through https: Encrypted database connection and database files.
 - Agency data is single tenant (separated with roles and permissions.)
- System Development Methodology – New functionality released several times per year. Release cycle publish.
- Service Level Agreement – Sample provided. 99% uptime guarantee.

Security Requirements

- Cloud Security Alliance (CSA) Compliance – Provided CAIQ.
- Security and Privacy Controls - *Mercell is ISO/IEC 27001:2013 Information security management systems certified. ISO 27001 is consistent with NIST 800-53. Negometrix is ISAE 3000 Type II certified.*
- Security Certifications – See previous.
- Annual Security Plan – Detailed plan provided in attachments.
- Secure Application and Network Environment – Systems protected behind firewalls in cloud environment.
 - **P83 Backup data retention – 3 months. Needs clarification.** Data Retention narrative above says 14 days.
- Secure Application and Network Access
 - P84 The system collects a number of different log entries:
 - • *System Event Log - used to log administrators' actions and Operational System events.*
 - • *Web Logs – all requests to the web server are logged in the web log.*
 - • *System Auditing Log –*
- Data Security -GDPR compliant. Other practices included in security attachment.
 - P107 (Managed Services)
 - All Mercell data is stored on one database (and recovery database). The database resides on the Mercell platform hosted in Microsoft Azure. The safeguards in place to protect and shield Organization or User specific data are:

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercell

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Encrypted communication
- User Authentication (username & passwords)
- IP-restrictions (optional)
- Active access control list.
- Some of the agency's data needs to be readily accessible by any user, e.g. to read and respond to RFPs from the agency. Other data (e.g. the details of the Authority's internal evaluation of offers) is accessible only to those users that are granted the proper user rights (by the agency). Such data cannot even be accessed by our support desk, unless specifically granted by the individual user from the agency by clicking on "grant service desk access". Strict technical access to the database (for technical maintenance) is restricted to Microsoft certified Negometrix senior engineers verified in our ISO27001 and ISEA3000 (SOC2) framework. Additionally, Azure is FedRAMP certified, which is a government-wide program for the security assessment of cloud products and services.
- Personally Identifiable Information Protection – Attachment C2-23 *Negometrix processes personal data of its Users; for those data processing operations Negometrix is a processor in the sense of the AVG. This means that Negometrix processes personal data based on the need and the instructions from its users. The users of Negometrix must therefore be regarded as the Processing Officer for this data processing, in the sense of the AVG. Users will have their own privacy policy that Negometrix is not responsible for.*
- Security/Privacy Issue Occurrence
- PII Data Actual/Attempted Access or Disclosure – Notification to customer of disclosure of PII data/attempt within 2 hours of finding out; corrective action; cooperate with customer and others to notify fact and circumstances.
- Security Breach Reporting – See attachment C.

Implementation Services Requirements

- Project Management – Project manager and sample implementation calendar (5 weeks) presented.
 - P. 87 – Deliverables and key staff positions defined.
- Project Implementation Methodology – 4 phases approach, strategy, methodology, and change control.
 - High level overview, time frame and personnel involved from customer and vendor identified.
 - Testing. Mercell Test Environment is used by QAs to verify that the implemented functionalities correspond to the business requirements and that the quality of the end product is at acceptable level. The QAs check all user stories done in the current sprint and should verify that the major workflows in the system are operational
 - Risk Management matrix to look at project impact.
 - Scrum process with emphasis on QA.
 - detailed implementation as well as a communication plan will be composed by Mercell in accordance with the Agency. Both plans will outline a structured way of working and elaborate on the functioning of for example the service desk, account manager and implementation consultants.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Mercell

CATEGORY #(s): 2

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Mercell will have on-site scrum sessions with both developers and super users of the participating entities. This will ensure correct specification of requirements suiting both business needs and system possibilities.
- ~~Catalog Support Services~~
- Data Conversion Services – Mercell consultant assists review and migrate contracts.
 - Implementation consultant prepares for migration using migration document; approved by PA; loaded outside business hours.
 - Entity responsible for data cleansing prior to Mercell data load.
- Interface/Integration Development Services – Questions to determine need for integration. Design, development, testing and implementation if needed.
- Organizational Change Management (OCM Services) – System to prevent scope creep.
 - Define prelim scope.
 - Agree upon final acceptance; Document; Embrace innovation.
 - Stakeholder analysis/assessment – communicate vision of benefits to stakeholders.
 - Communications and Coaching plans development.
 - Pace of implementation agreed between Mercell and customer agency.
 - Resistance Assessment and Management Plan.
- Training Services - *P98 Prior to training, a Mercell consultant will sit with the project lead to discuss the best method of training for the organization. Consultants are available to conduct as many trainings as the Participating Entity needs at the pace that would be easiest for them.*
 - *On-site instructor led; continued learning webinar; office hours; though leadership.*
 - *Step-by step written training materials become property of the participating entity.*
- Help Desk Services- Level 1 – Service Desk; Level 2 – Technical support;
 - Dedicated account manager; six month reviews.
 - The Service Desk is accessible during standard business hours by phone, email, or live chat.
 - Four tier issue definition. Category 1 is most serious; Category 4 is least and relates to use of web service.
 - Helpdesk is included; no local help desk personnel needed.
- On-Site System Stabilization Support – account manager takes over after go-live.
 - *able to address all minimum requirements listed above (system setup/configuration changes, issue assessment/resolution, system performance and stability monitoring/adjustment, system use assessment, mentoring of Agency operations staff, coordination of Contractor off-site tasks and support resources, coordinate documentation) and will be able to provide on-site support if needed.*

Managed Services Requirements

- Solution Support – Software updates ~ 8 per year.
 - Functional upgrades based on user or advisor board recs; trends and feedback from account managers.
- Organizational Change Management (OCM Services) - See implementation.
- Training Services – See implementation.
- **Catalog support services. (Says all platforms are supported – but this isn't Mercell functionality.)**
- Help Desk Services - See implementation.
- Transition Out Assistance Services – 1 month data available for self-service.

Individual SME Comments:

Integrated system – currently used by Missouri and Rhode Island. (WebProcure)

General Principal and Requirements

- Key Solution Functionality Elements – COTS system – designed for public sector.
 - P5 Real-time integration capable with external systems and ERPS using ProcureLINK
 - Users are assigned roles and permissions to determine access.
 - Modular implementation – gives flexibility.
 - Customizable vendor registration process.
 - Solicitation mgmt.; Contract mgmt; Catalog mgmt.; Request mgmt..Order Mgmt; Invoice mgmt.; Analytics and Reporting; supplier portal; public components.
- User Experience – single point of entry for new transactions.
 - Home page with dashboards designated by user or org.
 - Notifications for task reminders on every page user button
 - Responsive web design natively formats for tablet and smartphone (no separate app)
- Bidder Best Practices and Roadmap – lean-Agile approach to software dev. 6-8 releases per year.
 - Review current and future business practices during implementation.
 - Strategic account manager – conduct business reviews through contract
- Innovations and Value-Added Features/Services
 - Civic Initiatives value-added services. (Acquisition Support; Strategic Procurement Transformation; Procurement Automation)
 - Proactis: For suppliers: InstantMarkets – search engine for intelligently searching solicitation packets. Sources from entity including federal government sites.- Proactis proposes including InstantMarkets in the deployment.
- Customizations/Extensions – configurable without complex coding.
 - Platform, template and supplemental data fields.
 - Registration template is fully customizable by the state.
 - Unlimited line items to requisitions
- Alternative Funding Models – Open to this. No specifics.
- Contract transition – Will allow customers to transition to better terms in PA if benefitis them.

Functional Requirements

- General Functionality – Modular installation: Vendor Management; Solicitation Management; Contract Management; Procurement; Invoice Management; Reporting & Analytics
 -
 - EPROC-GEN-3 - State can deploy any number of bid boards for its primary as well as sub-agencies. For example, DAFS may deploy its own version showing all bids across

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

the State, while other departments can deploy their own versions to only show those bids from their departments

- EPROC-GEN-20 – Can match commodity code being used by State ERP. (State pays license cost). **Needs clarification at time of contract – is state buying license or allocating any sets to Proactis, or is this a state use-only cost.**
- EPROC-GEN-27 and -28 – State admin fee management and billing is not available – would required third party integration.
- EPROC-GEN-32 – Only English and French currently supported. Additional languages would be cost option.
- Supplier Portal – **No narrative – requirements pasted into File 3 only.**
 - EPROC-SPR-18 – No vendor complaint communication tool
 - EPROC-SPR-19 – no native functionality to accept payments (can use paypal as T/P)
 - EPROC-SPR-23 – No supplier request method for contract changes in tool
- Supplier Enablement/Management. – Vendors register in Webprocure – self-service with ability to require fields including NIGP or UNSPSC for complete registration.
 - P24 – state notified of new registrants and can approve, reject or set vendor to “pending”. Pending vendors can submit bids but not receive awards.
 - P24 – Vendors responses/bids submitted through vendor portal; answer questions, submit documents; digitally sign.
 - P24 *Key Performance Indicators (KPI) framework to collect and manage supplier performance criteria. The KPI scorecard provides the ability to create and assign KPIs to both vendor and buyer users. Authorized users can create scorecards composed of performance assessment questions.*
 - **P25** – ACH Banking Management listed as key feature. **Needs clarification** – is this for data transfer to ERP only or is there ACH payment functionality?
 - EPROC-VDR – certain fields require integrations to validate.
 - EPROC-VDR-28 – Field can be added for state solicitation ID if different from system-generated identifier.
- Buyer Portal – login from state’s website or stat’s authentication service. Buyer home page tailored to ser. – Other RTMs – standard functionality.
- Need Identification – From home page, modules can be selected for specific need – bid solicitation or purchase request via catalog, punchout etc. Pre-defined approvals workflow follows.
 - EPROC-NEED-5 – Inventory levels require a vendor integration.
- Request through Pay – Multiple types of purchase requests can be generated — catalog, round trip punchout, off-catalog (spot buy.) Templates can be made from existing requests p36
 - P37 Approvals triggered in workflow; Admins can set up users, roles and workflows. Different approval workflows can exist with rule order guiding the process.
 - Status of workflows can be monitored in WebProcure.
 - Orders sent to vendors via portal or integrations via XML, EDI, email or fax.
 - Order receipt can be entered with comments and attachments.
 - Invoices can be created by buyers with multiple POs; vendors can create invoices through portal. Buyers can create payment vouchers or issue credit memos.
 - EPROC-PRD-19 – Supplemental fields for Purchase Requests are custom development.
 - EPROC-PRD-32 – Sales tax is assigned based on location. Tax on specific items would be custom deliverable.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- EPROC-PRD-46-48 – Integrations required for accounts data and codes from state's system. Needs clarification. Has Proactis got developed APIs for common ERPs that could be integrated?
 - EPROC-PO-9 – Field validation at org/enterprise level not line level.
 - EPROC-CT-19 – Negative dollar values handled with credit memos.
- Catalog Capability – Search hosted or punchouts by keyword, commodity code, supplier, manufacturer, part number.
 - P56 Advanced catalog – end user search manager and catalog manager.
 - P56 *Catalog manager solves the problems associated with catalog creation and ongoing maintenance.* Vendors can be active participants in catalog creation, state retains control.
 - Only buyer-approved supplier content is available in search manager.
 - P57 *For the State, catalog manager helps to control, administer and release vendor catalogs. Buyers are provided with detailed information regarding catalog updates and changes in the form of a diffing report. Based on this information, buyers can verify, accept or reject line items changes and/or the associated terms.*
 - Automated catalog approval thresholds can be set.
 - Vendors can: upload content – CSV XLS, XML online or via FTP; validate content based on state check routines
- Sourcing/Bid Management
 - P64 *Solicitation management supports multi-round evaluations as well as two envelope bid types to separate technical from pricing evaluations. The State can automatically add vendors to the bid, deselect vendors, or add new vendors to the list. Solicitations are automatically posted to the State's bid board once an event is active*
 - Solicitation board has direct links to social media.
 - Posting to public sites automatically managed through webprocure
 - Unlimited solicitation types
 - P65 *The commodity code selected during creation not only automatically suggests all registered vendors that provide such goods or services, but also notifies them via email and within the portal when the bid starts.*
 - P66 *State can collaborate with vendors via the Q&A center where vendors can post questions anonymously, review responses, and view bulletin board messages from the State.*
 - P67 *solicitation can then be converted either into a contract or a request that will result in a purchase order. See other features bulleted on p67*
 - EPROC-SRC-12-14 Reverse Auction / Surplus Auction and Sealed Bids – third party integration
 - EPROC-SRC-34-45 (CNT-6 and -7)– Version control and document check-in, check-out – future integrations
 - EPROC-SRC-117 – hiding supplier names – future enhancement
 - EPROC-SRC-83 – No integrated video conference. Third party link can be inserted. Attachment can be uploaded.
- Contract Management – create and manage contracts; track contract spend; establish open market contracts for punchouts; create contracts from template; associate catalogs to contracts; digital signature.
 - P81-83 *Once solicitations created from a master contract are issued, evaluated, awarded, and finalized, purchase orders can be created and released against the resultant contract.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *Ability to flip a solicitation award automatically into a contract.*
 - *Hyperlink to original solicitation for historical reference.*
 - *Supports diversity allocation by dollar or percentage.*
 - *Contract scorecards for performance evaluation.*
- Vendor Performance – p91 *WebProcure provides a Key Performance Indicators (KPI) framework to collect and manage vendor performance through customer-defined scorecard criteria. The scorecard provides the ability to create and assign KPIs to both vendor and buyer users.*
 - *EPROC-VPE-10 Vendor eProcurement fees invoiced and payments made: Reporting can be used to track these metrics and associated with KPI values. Payment data for administrative fees would be external to our solution.*
- Purchasing/Data Analytics – P94 Standard and adhoc reporting.
 - *P94 Crosstab views consolidate data in a similar fashion to PivotTables, allowing a user to select a measured value and drill down into the data which roll up into the summary metrics.*
 - *All RTMS except EPROC-PDA-34 – standard functionality.*

Technical Requirements

- Availability – P99 – detailed description of data center ops.
 - *Recovery Time Objective is less than 8 hours. Needs clarification – RTO 6 hours on p128*
 - *Our systems can be rolled back to any point in the preceding 30 days with our EMC Recover Point appliance.*
 - *File level replication and storage has a snapshot every 2 weeks and is saved for 6 months.*
 - *Database snapshots (deltas) happen daily with two full backups (level 0) every week.*
 - *Needs clarification – what is the uptime SLA?*
- Accessibility Requirements – P100 *WebProcure was designed with Section 508 standards in mind. In support of Web-Based Intranet and Internet Information Applications Standards (section 1194.22), WebProcure enables access for people with vision impairments who depend on external assistive products to access computer-based information. – Needs clarification – Is the system actually compliant with an accessibility standard?*
- Audit Trail and History – P101 *The audit engine logs all user activity including changes at the field level with date and time stamps. WebProcure's automated audit tool also provides a manual audit feature to capture events like phone calls and emails, which occur outside of the system.*
- Browsers Supported – Chrome, Firefox, Edge, Safari; Not IE.
- User Accounts and Administration – Hierarchical structure for roles and permission. Enterprise-level users determine access for their agencies, agencies for their users.
 - *Workflows can accommodate existing and new multilevel orgs. Admins can assign individual approvers or group.*
- User Authentication – Username/password or SSO.
 - *Password standards, lockout, security questions – acceptable.*
 - *Webprocure passwords can be administered by state administrators.*
 - *EPROC_Tech-25 – future enhancement. (Automate acceptance of end user acceptable use agreements requiring scheduled renewal.)*
- Federated Identity Management – SAML for SSO. User provision module and functionality access based on roles and permissions; one login for all modules.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Data Conversion –
 - P107 *Bulk upload tools allow our customers to collect or export data from existing data sources and format them into an easy to use Excel file.*
 - *The Excel file can then be uploaded into WebProcure by a system administrator. Proactis will perform the initial data upload into WebProcure as part of our implementation services, but these utilities will also be available to the State for future use.*
 - All data conversions are initially performed in the stage/test environment , and then in production once review and testing is complete. These tasks are shared between the implementation team and the State subject matter experts, IT staff and data owners. See matrix on p107.
 - EPROC-TECH-30 – vendor needs clarification about connection with ERP. Vendor Performance data may be handled through integration rather than upload.
- Interface and Integration – ERP agnostic. Real time or batch data transfer.
 - Formats; XML, CSV, tab separate, Excel, xCML and xCBL or EDI.
 - *ProcureLINK utilizes established, standard, distributed information exchange mechanisms like web services, SOAP (Simple Object Access Protocol), XML over HTTP, SMTP, and IMAP to achieve this form of secure and reliable data interchange.*
- Office Automation Integration – data can imported, exported or attached. Microsoft office supported.
- Mobile Device Support – Web responsive framework; Mobile devices not recommended as primary toolset.
 - P116 *Currently, there are no apps required to access any of the WebProcure modules*
- Mobile Applications – See previous.
- Data Ownership and Access - *Ownership of any and all data provided by the State whether existing in electronic, magnetic or any other tangible or intangible form that is uploaded, collected, stored, held, hosted, located or utilized within the system is at all times and will always remain vested in the State.*
- Date Retention, Archive and Purge Considerations – P119 *The State has access within numerous areas of the solution to download its data on demand without cost.*
 - *EPROC-TECH-63 - Our solution archives records and keeps them online for historical access. Unless specified in an executed agreement, Proactis will not purge data from our solution.*
- Disaster Recovery Plan – P120 *Proactis maintains a comprehensive disaster recovery plan designed to combat any number of eventualities which might interrupt service. WebProcure is hosted in both a primary and secondary data center with full replication between locations and a distance of more than 700 miles between each data center.*
 - *The Proactis disaster recovery process is regularly tested and audited to ensure compliance with published and audited disaster recovery procedures, and as part of our ISO 27001 certification.*
- Solution Environments – 2 environments: Production and UAT/Traning.
 - *software development team maintains additional development and QA instances. However, the development and QA instances are not customer accessible.*
- Solution Technical Architecture – Java-based cloud environment. Scaleable – vertically and horizontally.
 - *P122 peak usage reaches 75-80% utilization, additional servers are added to handle the load. All of these servers are load balanced using redundant Cisco ACE Load Balancers.*

- Secure Application and Network Environment – P 128 *Proactis has developed, implemented and maintains a comprehensive security plan that comports with ISO 27001 and ISAE 3402 standards*
 - *Proactis utilizes two factor authentication for some internal systems and some SaaS solutions. At the current time, two factor authentication is not utilized in the WebProcure solution, however, personally identifiable information is minimally contained within the product and the Client can control the information contained within the product.*
 - *Proactis replicates data across a secure data connection between our primary and secondary data centers utilizing block level duplication on our SAN solution, and has a recovery point objective (RPO) of 30 minutes and a recovery time objective (RTO) of no more than six hours which support our business continuity plan. Needs clarification – RTO was listed as less than 8 hours on p99. Which is more accurate?*
- Secure Application and Network Access – p129 *Proactis supports modern standard such as TLS 1.2 and TLS 1.3.*
 - *We allow no non-encrypted traffic to be used in conjunction with our services. Integration data will normally be provided using either in-built-in web APIs, SFTP or site to site VPN connectivity.*
 - *Proactis implements protocols such as logical separation; least access privilege controls; employee background checks and confidentiality agreements; and fault logging to assist in achieving its security goal.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *key administrative information within the system is retained for the life-cycle of the customer.*
 - *Server log files are maintained for a minimum of 6 months including security and application logs.*
 - *EPROC-SEC-5 Our solution incorporates full redundancy within the data centers as well as fail-over redundancy to a secondary data center.*
- *Personally Identifiable Information Protection – p134 Proactis does not require personal data of the type considered to be special categories of personal data (as defined in the GDPR), nor HIPAA data, nor Federal PII. Personal data used in the solutions is akin to that typically presented on a business card.*
 - *Any personal data processed in the Hosted Environments is only done so in accordance with client contracts and in alignment with applicable data privacy legislation.*
- *Security/Privacy Issue Occurrence – P135 Customers will be notified about security or privacy issues which involve their particular solution and/or service as soon as reasonably possible after Proactis has confirmed a security or privacy event has occurred. Needs clarification. What does Proactis determine reasonable. Has Proactis previously established an SLA for this type of response notification?*
 - *P135. – additional discovery of communications type and method.*
- *PII Data Actual/Attempted Access or Disclosure – See previous entry.*
- *Security Breach Reporting – See previous entry.*

Implementation Services Requirements

- *Project Management – Phased project life cycle. Measured by tailored deliverable development and incremental reviews.*
 - *Systematic approach that incorporates comprehensive documentation and progress analyzes to minimize redundancy, ensure traceability of requirements and effectively managed risk.*
 - *Integrated team approach of Proactis and client team.*
 - *P137 Proactis ensures active involvement by the client in the detailed planning phase in order for us to identify the skills needed to develop a detailed understanding of the project requirements, design requirements, testing parameters, and training needs, as well as ensuring effective transfer of knowledge.*
 - *Project Planning – includes risk management, comms and requirements, data conversion plans, test plan and training plan. All project records will be stored and maintained in the Proactis Wiki, a web-based, secure collaboration platform.*
 - *Project Tracking, Oversight*
 - *Change Control/Configuration Management*
 - *Communication Management*
 - *Issues Management - Issue management begins when someone suggests a matter should come to the attention of the project management team. Management may conclude the matter is not a concern, but more often decides otherwise... allows for escalation of an issue to a risk.*
- *P145 Issues will be logged in a tracking database and reviewed by project management for completeness, relevance, and duplication. At any time a client would be able to review a list of issues and run various reports to check on progress or gather additional information about an issue.*

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Document Management
 - Schedule Management
 - Subcontractor Management - *subcontractor management methodology focuses on establishing strong partnerships with Proactis' subcontractors. To establish and maintain effective business relations, we feel clear expectations and accountabilities must be defined upfront. See p149-150 for Proactis subcontractor management.*
 - Project workplan and RACI matrix guide project timeline and responsibilities for Proactis and State.
 - Resumes provided for Civic Initiatives subcontractors to Proactis and Proactis staff.
- Project Implementation Methodology –
 - P193 *Our methodology utilizes iterative and agile methods for delivery, and structured risk and change management for the project management.*
 - *Our product development organization utilizes highly optimized Kanban methodology enabling consistent delivery of products meeting customers' demands on time while continuously adapting to change on a weekly basis.*
 - *Methodology: Project Planning; Solution Design; Solution Build; Test Readiness; Solution Deployment; Transition.*
 - *Test readiness – Needs Clarification – P197 – Is all testing scripted and performed by state or does Proactis team have testing roles and at what stage of implementation?*
- Catalog Support Services – p199 *our catalog enablement team will provide the services necessary for the initial launch of the marketplace. These services include the creation, loading, management, and maintenance of hosted catalogs and punchout sites.*
 - *Supplier and spend assessment to identify and prioritize contracts as potential for hosted or punchout catalog*
 - *Conversion plan for catalog data (i.e. contract line item or legacy catalogs)*
 - *Creation of hosted catalogs*
 - *Setup/configuration of punchout sites*
 - *On-boarding and training of suppliers to prepare them to manage catalog content*
 - *Training of State support staff to assume catalog management duties*
 - *Post-implementation. Proactis can continue to monitor and expand the catalog environment with additional suppliers, products and services as needed. Our support team is capable identifying and building new content through review of new contracts or solicitation awards.*
 - *P200 The overall goal of our catalog enablement team is to initiate catalog use, making it easy for stakeholders to view and order materials online, with less human interaction and with improved accuracy.*
- Data Conversion Services – p201 *Proactis will perform the initial data upload into WebProcure as part of our implementation services. Additionally these same utilities will be available directly to our customers for future use.*
 - *The data migration and conversion tasks are shared between the Proactis implementation team and the customer's subject matter experts, IT staff and data "owners". – See matrix for responsibilities.*
- Interface/Integration Development Services – p202 *The majority of the transaction interchanges take place through the integration platform ProcureLINK. ProcureLINK utilizes established, standard, distributed information exchange mechanisms like web services, SOAP (Simple Object Access Protocol), XML over HTTP, SMTP, and IMAP to achieve this form of secure and reliable data*

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Perfect Commerce

CATEGORY #(s) 2:

DATE: 1/17/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

interchange. WebProcure is capable of real-time integration with a variety of external systems and ERPs.

- P203 ProcureLINK records each action during the down time and subsequent remedial actions once the system is restored which can later be reviewed to ensure all data has been properly accounted for. This functionality ensures that all the integrated data is consistent, accurate and never overlooked.
 - Clarification needed: Since ProcureLink is a Proactis tool, what resources are required from state ERP team to perform an integration; is all coding on the Proactis side?
- Organizational Change Management (OCM Services) – p 203 during implementation, where OCM processes are embedded in tasks related to process design, configuration, report development and of course training.
 - Key Process: managing stakeholders; identifying changes and impacts; planning and executing communication; assessing change readiness; ensuring knowledge acquisition via education and training; ensuring sustainment of an innovation.
- Training Services – p206 informal training begins at the very outset of our projects. Before the initial discovery sessions, all system training documentation will be delivered to the project team for their review.
 - Detailed walkthrough with core team during Discovery. The core team and relevant subject matter experts will receive additional training during the configuration process, and again prior to the user acceptance test.
 - End user training. Specific training approach for all end users which will be tailored to meet the State's needs. Frequently this approach includes predefined training courses based on users' roles and the timing of the rollout.
 - broad based training sessions used to train large numbers of users. We will conduct as many web-based training sessions as is necessary to adequately train the anticipated 100+ users.
 - remote web-based training sessions are the most effective way to deliver end user training to a large number of end-users, but we can also conduct on-site, in-person trainings provided logistical constraints allow. All training exercises will be conducted on a live training environment with State data, which is by far the most effective hands-on learning experience.
 - Train-the-Trainer program has proven to be the most effective method to encourage customer ownership and system usage. To begin to build confidence using WebProcure the identified State internal trainers will participate in training sessions on each module of WebProcure lead by a Proactis head instructor... trainers will receive certification and reference materials so they can schedule and conduct future sessions independent of a Proactis instructor.
 - P207 Continuing with the effort to achieve self-sufficiency, the State will identify system administrators who will be eligible for system administration training designed to allow system administrators to manage and administer the state-wide configuration of the system for the State
 - The State will identify the individuals it chooses to be the state supplier management administrators.
 - P208 Suppliers can call us directly for help related to WebProcure. We also provide material to suppliers that contains step-by-step instructions on how to review and respond to bids and purchase orders; how to manage the supplier user profiles; and how

- to create invoices. Also have access to computer-based tutorials and video recordings of instructor-led training.*
 - o Full release notes explaining new functionality and enhancements is made available prior to release data. Significant functionality changes will come to state via training session*
- *Help Desk Services – P208 Ongoing help desk support is available for both buyers and suppliers who interact with the State via our solution. Client-facing support is available 24/7 for mission critical items. First level procurement support is available Monday through Friday from 8:00 a.m. to 8:00 p.m. Eastern Standard Time, excluding holidays.*
 - o Support is accessible via email, telephone, and our on-line support ticketing system Help Desk.*
 - o Online context sensitive help is available for both the State and its suppliers. Help includes video tutorials that contains step-by-step instructions on how to complete any action in the system.*
 - o EPROC-IMPL-4 – Live chat functionality is in development. Needs clarification – is it ready yet?*
- *On-Site System Stabilization Support – p211 stabilization period of 3 months post project implementation. This resource(s) will monitor and facilitate system setup and configuration changes; issue assessment and resolution; system performance and stability monitoring; and system use assessment.*
 - o EPROC-MNGD-1 – Needs clarification - Is the response indicating third party monitoring could be integrated?*
 - o In addition to the standard support provided, and as previously described, the State will also be assigned a customer operations manager (COM) and strategic account manager (SAM) for the lifecycle of the contract. Our primary goal is to ensure our products and services contribute to rapid return on investment, increased process efficiency, and enhanced strategic decision-making.*

Managed Services Requirements – Proactis listed this section as Not applicable.

- Solution Support
- Organizational Change Management (OCM Services)
- Training Services
- Catalog support services.
- Help Desk Services
- Transition Out Assistance Services

Video Demonstrations

- Micro videos showing overall platform and individual sections.
- Nice demo of “tutorials” in online help. Voiceover training with “show me and try me”.
- Demo Missouri Buys (using WebProcure) and Rhode Island. – Showed instructional docs for suppliers.
- Showed the contract clauses that are optional or mandatory in solicitations and contract modules.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Public Sector clients: "8 states, 1 US Territory, and over 1,000 cities, counties local agencies, and special districts" (pg. 1)
- Provide "supplier services to ensure vendors are registering with the right commodity codes, receiving the right bids, and can easily enable their catalogs". (pg. 1)
- "Staff consists of former state procurement directors and a host of individuals with combined decades of public policy expertise". (pg. 1)
- In 2019 launched Marketplace, "a shopping environment" that can be "stand-alone" or part of the eProcurement solution. (pg. 4)
- "Periscope holds the exclusive license to maintain, enhance, and market the NIGP Commodity / Services Code". (pg. 4)
- Periscope "manages the NIGP Consulting Program on behalf of NIGP". (pg. 4)
- Periscope Supplier Network "created specifically for the public sector and higher education, connects over 500,000 suppliers... to public sector agencies and organizations". It also supports 90K+ buying organizations that "include cities, counties, state agencies, non-profits and higher education institutions". (pg. 4)
- Periscope "only serves the public sector". "ePro was designed by public sector professionals for public sector purchasing". (pg. 6)
- Periscope implementation approaches: Phased system functionality, Agency on-boarding in waves, Core/Pilot agencies first with remaining agencies on-boarded by the State.
- "Range of prove licdensing, financing, and delivery options": SaaS, Perpetual license w/annual support, Financing of Perpetual Licens, Leasing of Perpetual License, and risk-sharing of admin fees/revenue.
- Has integrated with "mainframe systems, ERP systems, B2G/supplier validation systems and maintenance management systems". (pg. 8)

2. Previous Projects

- **Arkansas:** ePro full suite implementation with integration to State finance system (SAP). Periscope responsible for "Project Governance and Project Management activities". Office of State Procurement live May 2021, remaining departments and local entities "scheduled to be live at the end of this year". (pg. 14)

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 8/26/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Oregon:** ePro full suite implementation with integration to State financial system. Periscope performs “overall project management activities” including “coordination of State tasks and responsibilities”. Self-funded model “leveraging an administrative fee for vendors selling to local government through select contracts”. Will rollout to “145 agencies and nearly 800 locals this Summer”. (pg. 14)
 - **Illinois:** ePro implementation except for Contract Management. Includes integration with State finance system (SAP). Implementation began in 2015. (pg. 15)
 - **Massachusetts:** ePro full suite implementation through 3 Phases. Local Gov’t and non-profiles have access “to manage sourcing and catalog-ordering”. (pg. 15)
 - i. 8,296 solicitations in FY17
 - ii. \$358M in FY17 catalog/punchout spend
 - iii. 21,000 suppliers
 - iv. 240,000 buyers
 - v. 15,000 bids managed
 - vi. 970,000 statewide contract catalog items
 - vii. Over \$1B in orders over past 4 years
 - **New Jersey:** ePro full suite implementation began April 2014 with integration to State financial system. (pg. 16)
3. Subcontractors
- “Periscope can sub-contract with companies like CGI, Accenture, PCG, Guidehouse, Deloitte, Civic Initiatives, and more.” (pg. 18)
 - CGI (pg. 18)
 - i. Serve more than 300 state and local government clients.
 - ii. In 2016 signed managed services contract with Maine through 2026.
4. Organizational Chart
- The org chart is a very high level representation of a project implementation. It does represent State and Contractor roles but does not provide any detail. (pg. 20)
5. Litigation
- No litigation.
6. Financial Viability
- 2018-May 2021 Gross Profit and EBITDA show a profit growth each year with a much larger EBITDA for the partial year of 2021 than prior full three years. (pg. 23).

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements, pg. 2-27:

- **Single Point of Entry:** "Both the supplier community and agency users have a single point of entry" (pg. 2)
- **Smart routing:** "can create rule-based fields to route or streamline end-users down the appropriate path based on specified business practices" (pg. 3)
- **Compliance:** "our solutions have evolved to changing processes, regulations, and technology demands" (pg. 5)
- **Portal:** (pg. 5)
 - o "a single portal that seamlessly connects each and every part of the procurement lifecycle for both buyers and suppliers"
 - o "also delivers in-system chat for collaboration."
 - o "Users can configure landing page dashboards providing personalization to the tasks and work that matter to them."
- **Open Marketplace environment:** (pg. 6)
 - o "Marketplace enables an unlimited number of catalogs (punchouts level 1 and 2, external cooperative contracts, hosted catalogs loaded by the Supplier or State and other agencies publicly sourced and publicly shared catalogs)"
 - o "Periscope Marketplace also supports open market suppliers, if desired, to enhance price comparison and potential cost savings."
- **Integration:** "has provided proven integrations to State systems across our different customers and customer needs." (pg. 7)
- **Workflow:** (pg. 26)
 - o "Organization Administrator manage approval workflow configurations"
 - o Provides "inherited (statewide or multi-org) approval workflow" and "local workflow" rules. Local Gov'ts normally setup to not inherit state rules.
 - o "Users can be added to an approval path for special routing"
 - o CONCERN, approvers can "cancel" a transaction (e.g. cancel a Requisition)
- **Document Management:** provides "a central location to store all records and documents." (pg. 26)
- **Reporting, dashboards and data visualization:** "Every field within ePro, including State Defined Fields, may be used when creating published reports, ad-hoc reports, and dashboards." (pg. 27)
- **Configurable:** "extensive configurability through our solution to support unique processes and needs". (pg. 27)

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Transparency:** (pg. 27)
 - o “Bid Solicitation or Contract is published, ePro will automatically post it publicly through the portal.”
 - o “publicly posted contracts will show all content (not marked as confidential or proprietary) including spend to date.”

User Experience, pg. 28-37:

- “provides a uniform look-and-feel for all users”
- **Dashboards**
 - o Users can “select their individual dashboard from among a list of published dashboards”
 - o “administrator can select default dashboards for each role type”
 - o “Users with ad hoc report creation privileges can build their own custom dashboards”. WEAKNESS, you must give users ad hoc report creation privileges to be able to make their own dashboard.
- **Intuitive Navigation** (pg. 29)
 - o “left navigation bar provides access to your documents by type” (pg. 29)
 - o “Central Search Bar that remains at the top of the page and allows the user to perform a quick search for documents, suppliers, and items.”
- **Wizard-driven:** “also add user-defined fields that may be linked to a guided narrative text informing a user to the appropriate steps and fields to successfully create a new transaction” (pg. 31)
- **Portal that informs:** (pg. 31/32)
 - o “six colored boxes on the Homepage change based on the user’s role and display the number of documents for each status that requires the user’s attention and/or action.”
 - o “displays the five most recent documents the user has accessed”
 - o “alerts provide access to events, reminders, and systems messages”
- **Mobile Access:** “designed to support mobile use delivering different screen size options” (pg. 34)
- **Workload Management:** “proxy and or “mass user replace” features may be utilized to ensure projects continue to flow smoothly.” (pg. 35)
- **Role-Based:** (pg. 35)
 - o “user’s role and privileges will determine available functionality within the solution.”
 - o “users’s role carries through to all organizations they have access to”. CONCERN, users may not be able to have a different role with different organizations that they support.

Bidder Best Practices and Roadmap, pg. 38-45:

- “accustomed to providing product enhancements to meet new legislation or new business initiatives” (pg. 38)
- “current schedule allows 4 new releases a year,” (pg. 39)
- “creating our roadmap, we evaluate both our client and known industry pain points”
- “SupplierWorkbench – the supplier’s best practice to interact with their government customers”

Innovations and Value-Added Features/Services, pg. 46- 53:

- **Periscope Supplier Network**, pg. 46: STRENGTH, the network gives Suppliers access to all Periscope customers, not just the State.
- **ePro For Locals:** (pg. 49)

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH, Local gov't will have free access to most, but not all, of the eProc functionality.
 - CONCERN, the list of what locals can use does not include full Contract Management and setting up their own Catalogs for Marketplace. CLARIFICATION, need full description of what Locals will NOT have access to.
- **Periscope Reconciler**, (pg. 49): functionality for transaction/admin/convenience fees on contracts
 - Buyers features: control fee rates & pay periods, receive payment automatically, reports, integrated with Periscope ePro
 - Supplier features: manage payment one place for all Periscope customers, review/approve fees, upload additional purchases (outside ePro), pay fees
 - CONCERN, this is an add-on for \$150,000/year and need to consider impact to any RTM req't that identifies Reconciler as means to meet it. NEGOTIATION, need to at least get this price reduced as an Optional component.
- **Payment Gateway**, (pg. 49/50): Partnered with NIC "to collect current contract utilization fees" integrated with Reconciler and can process "credit card, debit card, PayPal, and eCheck (ACH) transactions".
- **Ecovadis**, (pg. 50-52): "helps buyers and suppliers adopt more sustainable practices and reduce the carbon footprint of their activities". Add on cost for \$30k-\$50k/year.
- **Grants Management**, (pg. 52): the included Sourcing Open Enrollment feature allows Grant "respondents to submit proposals without due dates, and the managing buyer/grant administrator can make awards at any time".
- **NIGP Consulting Services** (pg. 52): "Periscope is the exclusive program manager of the NIGP Consulting program". "The cost of NIGP consulting services is dependant on Project Scope"
- **Strategic Sourcing**, (pg. 52/53): "can include a contract portfolio analysis, data analytics, assessment, market analysis, and opportunity assessments with guidance and support in the procurement event execution."
- **Diversity Equity and Inclusion**, (pg. 53): "Periscope solutions accommodate the promotion of Diversity, Equity, and Inclusion (DEI)."
- **SAP Experts – Phoenix Team**, (pg. 53): "We can partner with Phoenix Business Team to assist with SAP integration"
- **Procurated**, (pg. 53): "can integrate to Procurated, the new "Yelp-like" supplier rating system for the public sector ". "Pricing TBD based on level of desired integration"

Customizations/Extensions, pg. 54:

- "If a new enhancement is the best solution, Periscope will provide a quote and timeline to add the request in the next available release."
- "request will be added and available as standard functionality into the product"

Alternative Funding Models, pg. 55-57:

- Periscope has developed a range of proven subscription, licensing, financing, and delivery options, including perpetual license with annual support, financing of a perpetual license, Software-as-a-Service (SaaS), and risk-sharing of convenience fees and revenue generated by the eProcurement solution"
- "can also offer a hybrid of traditional SaaS and self-funded"

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Contract Transition and Flexibility, pg.58: "Periscope will work with any existing clients to provide them the best contract options at the time of renewal or when their current contract has exceeded extensions."

Functional Requirements

General Functionality, pg. 61 : Overall, meets req'ts.

- Solution created "by public procurement professionals" (pg. 59)
- "all enhancements made to our solutions are specific to government procurement" (pg. 60)
- "AWS (Amazon Web Services), our hosting provider, will dedicate resources to establish and support the hosting infrastructure" (pg. 61)

RTM

- POTENTIAL WEAKNESS, GEN-6: System does not provide integration with a State data warehouse & BI reporting tool
- POTENTIAL WEAKNESS, GEN-12: System only searches attachment titles in the CLM module.
- WEAKNESS, GEN-15: To print procurement transactions will require defining a report in the BI module.
- WEAKNESS, GEN-20: System keeps the "newest version" of Commodity codes, does not keep in sync with the version that is in Finance System.
- POTENTIAL WEAKNESS, GEN-23: State cannot determine which Supplier name field will be used throughout the system.
- CONCERN, GEN-26 & GEN-27: Response refers to "Reconciler module" but this is not included in the "Proposed Tools" column (Column D).
- POTENTIAL WEAKNESS, GEN-32: Solution does not provide foreign language versions of web/application pages.
- POTENTIAL WEAKNESS, GEN-34: System does not support future/effective dating except on Master Blanket PO line items.
- POTENTIAL WEAKNESS, GEN-36: System only has eSignature capabilities with CLM.
- Three req'ts need clarification.

Supplier Portal, pg. 61/62 : Meets req'ts.

- "Through this portal, a supplier may self-maintain their profile, read State posted communications, review and respond to bid opportunities, create and review quote history, receive and acknowledge purchase orders, receive contracts, create and track invoices, maintain catalogs, etc" "Supplier user roles may be assigned to control specialized access"

RTM

- CONCERN, SPR-19: Reconciler module is identified on this requirement as tool to meet it however response says "Periscope offers" and in Technical Proposal Innovation section (pg. 359) it is identified as an "optional" tool. So not clear whether this tool is included in the proposal.
- One req't needs clarification

Supplier Enablement/Management, pg. 62/63: Overall, meets req'ts.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH, pg. 63: "having a "history of the EIN/SSN numbers" is an uncommon feature. Most systems require a Vendor to create a new account instead of giving them a way to update their existing account should TIN be accidentally entered wrong or there is a 'real' change to TIN.
- Pre-Qualify Suppliers, pg. 63: POTENTIAL STRENGTH, this feature might be usable to have Suppliers indicate being available for Emergencies.

RTM

- CONCERN, VDR-13: Foreign vendors may be required to have a tax ID number to be able to register in the system.
- NOTE, VDR-23: The "integration to verify debarment status" is not included in the proposed scope/pricing.
- NOTE, VDR-24: The "integration to verify licensure" is not included in the proposed scope/pricing.
- "NOTE, VDR-25:
 - The ""integration to verify tax data"" is not included in the proposed scope/pricing."
- NOTE, VDR-27: The "integration to verify certification of businesses" is not included in the proposed scope/pricing.
- WEAKNESS, VDR-36: System does not have an automated "yearly reminder" notification to vendors to update their account. Instead must set the account to "inactive" with "reason code of Outdated Profile".
- WEAKNESS, VDR-39: System does not automatically "capture relevant vendor performance information/metrics" from the eProcurement components. System has a performance survey ("Evaluation ticket) concept instead.
- WEAKNESS, VDR-40: System does not provide a means for suppliers to "sign up for e-mail notification when a specific contract" is re-solicited.
- Four req'ts needs clarification

Buyer Portal, pg. 64: Meets req'ts.

- "uniform look-and-feel for all users, with a Homepage portal that is designed to provide quick and efficient access to documents that require attention"

RTM

- Meets req't's.
- Three req'ts needs clarification

Need Identification, pg. 64/65: Meets req'ts.

- "Once a Need is Identified and submitted, the ePro approval and workflow engine are triggered."

RTM

- Meets req'ts
- Two req'ts needs clarification

SME DEPARTMENT/STATE: NASPO

Request through Pay, pg. 65-72:

- "provides an easy-to-use, guided shopping experience of all State-enabled catalogs for authorized users by allowing the State to configure which catalogs (state contracts, cooperatives, punchouts, Periscope's Open Market Network Catalogs) are displayed and available for purchasing" (pg. 68)
- POTENTIAL STRENGTH, pg. 68: System seems to allow for different catalog prioritization settings for different departments.
- STRENGTH, pg. 68/69: "Organization Administrator" feature allowing agency specific workflow to be managed at agency level.
- "local government/co-op members are typically set up as standalone organizations. That means that they do not inherit statewide approval paths from the State." (pg. 69)
- "can support both central and desktop receipts" (pg. 69)
- "supports manual entry of invoices... as well as eInvoicing and purchase order flip" (pg. 71)
- CONCERN, pg. 71: Data defaulted from the PO to an invoice "cannot be updated by accounts payable staff". This will prevent A/P from being able to adjust values when an invoice is different but correct instead of what the PO has pushed forward.
- STRENGTH, pg. 71/72: The system has credit memo functionality to capture receiving adjustments and can apply these when processing invoices.
- STRENGTH, Subcontractor Payment Tracking, pg. 72: System provides a means for subcontractors to confirm that "they have been paid" on an invoice.

RTM

- WEAKNESS, PRD-8: Requisition collaboration to "solicit demand" is only done across "all State agencies", does not support doing this "within the same Organization or across the multiple organizations".
- WEAKNESS, PRD-11: System does not provide means to set up a "standard purchase request for recurring purchases" with "automatic schedule to submit".
- STRENGTH, PRD-20: The capability to also set defaults based on "location, role, privileges" and to control "drop-down options" as well.
- WEAKNESS, PRD-24: System does not provide a Forms builder capability to "define input forms" that can be "used for entry of items on a Purchase Request".
- STRENGTH, PRD-29: The capability to have "items where the value has been disabled".
- CONCERN, PRD-33: Changes to an order are done as a change to the order, not the requisition. (see response to PRD-33 for additional information).
- STRENGTH, PRD-44: "a based item could be configured or built based on potential add on or removable options"
- WEAKNESS, PRD-52: Accounting field splits cannot be done by Quantity, only by "dollar or percent".
- WEAKNESS, WRK-10: System does not provide a means for "authorized Approvers to override/bypass specific approvals".
- WEAKNESS, WRK-13: System does not provide means to approve at "line-item level".
- WEAKNESS, WRK-14: System does can provide a means for an approver to make requisition, purchase order or solicitation changes that do not, based on rules, re-start approvals.
- WEAKNESS, PO-17: System does not send Purchase Orders by email. Vendors will get email notification to go into the system to "access the purchase order".
- STRENGTH, PO-21: Can "require the Supplier to accept the changes or just to acknowledge receipt of the changes".

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, PC-3: System does not provide a means to specify "unable to use Pcard" on purchase requests, contracts or Vendors.
- POTENTIAL WEAKNESS, PC-5: System does not provide a Pcard Administrator concept. Users must manage Pcards themselves. Need to discuss whether this impacts the State or not.
- POTENTIAL WEAKNESS, PC-8 through PC-20: System does not provide Pcard reconciliation capabilities. Need to discuss whether this impacts the State or not.
- WEAKNESS, RC-16: System does not provide a means to "load Vendor electronic Advance Shipping Notices" into the system.
- POTENTIAL WEAKNESS, INV-8: System does not have the capability to send email notification to a supplier when invoice is rejected.
- NEGOTIATION, INV-11: Need to get the integrating of attached documents to an invoice included in the scope/pricing instead of the "extra" referenced in the response.
- Twelve req'ts needs clarification

Catalog Capability, pg.73-75: Meets req'ts.

- following capabilities are included in Marketplace: (pg. 74)
 - o Unlimited catalogs from the State
 - o Level 1 and Level 2 punchouts
 - o External cooperative contracts
 - o Other publicly sourced contracts provided by suppliers
 - o Automatically displayed price comparison shopping between all types of contracts, including open-market
 - o Supplier enabled/updated catalogs and pricing with automatic administration notification if there is a price change
 - o Multi-catalog capability for the same supplier
 - o Open market / off-contract access to catalogs
 - o Workflow and approvals that can be configured based on specific business unit requirements
 - o Order generation and electronic delivery to vendors
 - o Payment methods including P-Card and purchase orders
 - o Administering and collecting administrative fees
- "our supplier enablement team will also assist suppliers." (pg. 75)

RTM

- POTENTIAL WEAKNESS, CAT-19: Catalogs cannot have negative dollar value items. However, user can free-form a requisition line item to record a negative dollar value item.
- Two req'ts needs clarification

Sourcing/Bid Management, pg.76-87:

- "conduct all types of solicitations, including reverse auctions" (pg. 77)
- "enable RFx documents to be drafted using stored templates and clauses. Once drafted,
- "identified users can collaborate on the RFx document" (pg. 77)

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "Auto-attached documents can be configured" (pg. 78)
- "Periscope Supplier Network (PSN) database, allowing the State to extend notifications beyond those suppliers who are directly registered in the State's system" (pg. 78)
- Special Bid Types
 - o Solicitation-enabled Contracts: "pre-approved multi-supplier agreements... from which future price quotes/RFRs may be conducted". POs/Contractds from these "are considered releases" against that contract.
 - o Demand Requisition: "ability to poll organizations to assess their needs and aggregate" into a bid.
 - o Reverse Auction
 - o Open and Rolling Enrollment: STRENGTH, "menu of approved suppliers that can be added to on an ongoing basis". "Grant solicitations" is an example of use.
- "Bid amendments can be created within the bid document at any time between when a bid is published (sent) and opened." (PG. 82)
- "compiles supplier responses into a Bid Tabulation document for easy review" (PG. 83)
- "contract manager can request a clarified or "Best and Final" offer from suppliers" (pg. 85)
- "allows each user to enter notes on a bid evaluation summary" (pg. 85)
- "has the ability to tabulate solicitations after solicitation opening and apply preferences based on supplier categories." (pg. 86)
- "support an Intent to Award status" as a "tentative award.... When some agencies have a protest period" (pg. 86)
- Protest Submission/Mgmt, pg. 87: Documents "negotiation records, additional evaluation forms, etc.,"

RTM

- POTENTIAL WEAKNESS, SRC-34: To force cost and technical to not be viewable at the same time user would need to do separate rounds on the solicitations... one for technical and 2nd for cost.
- WEAKNESS, CAT-37: Users cannot return to their search results "once they have selected an item". Users must "conduct a new search".
- POTENTIAL WEAKNESS, SRC-4: System does not support 2-Step Invitation to Bid type solicitations.
- POTENTIAL WEAKNESS, SRC-13 & 14: System does not support Surplus auctions. Will be additional costs to add this capability to the system.
- POTENTIAL WEAKNESS, SRC-22: To force cost and technical to not be viewable at the same time user would need to do separate rounds on the solicitations... one for technical and 2nd for cost.
- WEAKNESS, SRC-28: System does not have a collaboration tool within solicitations. Users would post notes on the solicitation to communicate instead.
- WEAKNESS, SRC-35: System does not provide check-in/out capabilities for content in the solicitation "document repository".
- WEAKNESS, SRC-60: System does not automatically include vENDors "with prior or active contracts/purchase orders" where the commodity code on those transactions is the same codes as on the solicitation.
- WEAKNESS, SRC-64: The system does not provide a means for suppliers to sign up for notification when a contract is to be re-solicited.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, SRC-65: System does not "eliminate duplicate e-mail addresses" from the vendor list.
- WEAKNESS, SRC-67: A supplier must be registered (have a "profile") to be able to add themselves to a solicitation vendor list. Un-registered vendors cannot add themselves.
- WEAKNESS, SRC-75: System does not provide a means for vendors to "opt out of notifications for a specific solicitation".
- WEAKNESS, SRC-78: System does not have a means to only post an alert about a solicitation. Must post an amendment to be able to post an alert.
- "WEAKNESS, SRC-80: System does not provide a means to ""gather basic information"" from vendors downloading a solicitation from the public procurement website.
- STRENGTH, SRC-80: The capability to add vendors ""with a pending registraiton status"" to solicitation notifications."
- WEAKNESS, SRC-83: System does not have "web-conferencing" capabilities but recorded web-conferencing sessions can be attached.
- POTENTIAL WEAKNESS, SRC-88: System does not provide a means to "workflow vendor questions" to specific users for review/response.
- WEAKNESS, SRC-105: System does not provide alert to unqualified vendor if they try to submit response to MBE set-aside solicitation.
- POTENTIAL WEAKNESS, SRC-117: System cannot hide Supplier names on the Evaluation screen.
- WEAKNESS, SRC-120: System does not provide a means to "export" response/score data. Can be printed.
- POTENTIAL WEAKNESS, SRC-130: System does not have a collaboration tool within solicitations for evaluation panel members.
- WEAKNESS, SRC-131: System does not have a collaboration tool within solicitations for Buyer/Agency representatives. Would have to record notes on the solicitation to capture communications.
- WEAKNESS, SRC-133: System does not "notify the BuyerAnalyst" after each approval of award.
- WEAKNESS, SRC-143: The system does not provide the capability to cancel a fully awarded contract and award to a different supplier.
- WEAKNESS, SRC-146: System does not provide notifications that are specific to non-awarded Vendors.
- POTENTIAL WEAKNESS, SRC-151: System does not provide unit of measure conversion capabilities.
- Twenty req'ts needs clarification

Contract Management, pg. 87-91:

- "has the ability to tabulate solicitations after solicitation opening and apply preferences based on supplier categories." (pg. 88)
- "drafting contract documents (using stored templates and clauses), conducting electronic negotiations, obtaining signatures, creating reports, tracking supplier performance." (pg. 88)
- Contract approvals: "Power users can override the approval workflows as needed" (pg. 89)
- "can configure, monitor, complete, and enforce milestones... workflows or tasks" (pg. 89)
- "supports electronic signatures via DocuSign™" (pg. 90)
- STRENGTH, "user may define the Supplier Fees associated with that contract".

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “may be defined as flat percent across all line items”
- “flat percent with a max fee cap for the payment period”
- “flat fee”
- “auto-calculated fees are then assigned to the supplier to pay using Periscope’s Reconciler module”
- Suppliers “may also add additional spend on a contract that occurred outside ePro”

RTM

- POTENTIAL WEAKNESS, CNT-10: System does not provide capability to define standard specifications and have attached document.
- "NOTE: Response to CNT-25 does indicate that system has MS Word integration for document authoring capabilities.
-
- STRENGTH, CNT-23: ""Versions of a contract document can be compared""."
- POTENTIAL WEAKNESS, CNT-27: System does not have a means to specify access restrictions for specific documents attached to a contract.
- STRENGTH, CNT-32: Readable PDF documents are "searchable".
- WEAKNESS, CNT-34: System does not have controls to limit who can enter backdated contracts.
- WEAKNESS, CNT-66: System does not provide a means to publicly post alert associated with a contract. User must post an attached document to communicate this.
- POTENTIAL STRENGTH, CNT-70: Reconciler module to upload "sales/usage details".
- POTENTIAL STRENGTH, CNT-71: Reconciler module.
- POTENTIAL STRENGTH, CNT-72: Reconciler module.
- STRENGTH, CNT-73: Task functionality to assign contracts for review by "project management and/or project quality office".
- WEAKNESS, CNT-83: System does not "provide data balances" on "remaining contract limits, remaining budgets and applicable thresholds".
- Six req'ts needs clarification

Vendor Performance, pg. 91: NEED TO SEE IF THERE IS A SURVEY FEATURE FOR SUPPLIER PERFORMANCE ACROSS ENTIRE SYSTEM

- WEAKNESS: Performance measuring is only against a contract. “may complete and track Supplier Performance on a contract” (pg. 91)
- Ticket option: State “defines performance issues” in a document that is sent to the supplier and supplier “may respond... defining upcoming actions”
- Contract review: “creates a performance rating for that specific supplier and contract”

RTM

- POTENTIAL WEAKNESS, VPE-12 System does not provide supplier performance reporting from transaction data captured in the system. Can only capture/report on survey inputs.
- NEGOTIATION, VPE-14: OOTB CLM does not include setup contract surveys. This would be an additional cost. Suggest negotiating this to be included as a standard feature without additional cost.
- Two req'ts needs clarification

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Purchasing/Data Analytics, pg. 92- : Meets req'ts.

- Reporting tool works from a copy of production data: "Replicated database refers to our standard architecture, where the ePro™ production database is replicated nightly and copied to the BI database" (pg.95)
- STRENGTH, Reports can be made public (pg. 92)
- Standard Reports
 - o Spend Analysis Reports: existing, standard reports of spend by Commodity, On/Off Contract, Supplier, Purchasing Statistics (pg. 92/93)
 - o Cycle Time Reports: for PO, Requisition & Bid (pg. 93)
 - o Workload Management Reports (pg. 93)
 - o Contract usage Reports (pg. 93)
 - o Financial management Reports: Open POs, Received/Not Invoiced, Unpaid Receipts (pg. 93/94)
 - o Supplier Reports (pg. 94)
- Ad Hoc Reports: "ad-hoc reports can then be published to allow end users to run them from within ePro™, or they can be embedded in dashboards" (pg. 94/95)
- Dashboards: (pg. 95)
 - o "any standard or any ad-hoc report to be converted into a dashboard"
 - o "end-user can configure their individual dashboard themselves on their "My Account" screen." WEAKNESS, this capability is limited to "Users with ad hoc report creation privileges" (pg. 28)
 - o "Dashboards can be published for suppliers as well."

RTM

- STRENGTH, PDA-22: ePro BI and Reporting module reports "can be shared publicly".
- No req'ts needs clarification

Technical Requirements - pg. 100-144

Availability, pg. 100: Meets req'ts.

- "Solution will be available 99.99% of the time (excluding scheduled maintenance" (SLA Attachment A, pg. 6 which is pg. 7 of Part 2 doc).

Accessibility Requirements, pg. 100: Meets req'ts.

- "We provide regularly updated accessibility compliance certification through our Voluntary Product Assessment Template (VPATs). With new feature releases, our software is tested for web accessibility standards with the Rehabilitation Act Federal ICT Accessibility / Section 508, W3C Accessibility Initiative, and WCAG 2.1 Level AA (which exceeds Section 508's standards)."
- "Our Quality Assurance program utilizes both the WAVE and ANDI toolsets, along with randomized keyboard testing."

Audit Trail and History, pg. 100 TECH-1 thru 5: Partially meets. Response did not address req't to have a "history page other option" accessible "without support from an Administrator".

- "Auditing Event Tracking"

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "application has high-level/logical audit trails built into its core operations, allowing every step in a transaction to be tracked."
- "The DBMS has configurable row-level DML and DDL audit trails as well providing the ability to track, record, and review"

RTM

- WEAKNESS, TECH-4: System does not provide a means for an authorized user to override approval rules.

Browsers Supported, pg.101: Meets req'ts

- "products and all their features are designed to be browser and operating system agnostic and work best on all the latest manufactures' supported browsers."
- "look and function the same if the user is on a Windows, Android, Apple, or another device; and with Google Chrome, Mozilla Firefox, Microsoft Edge, or Apple Safari browsers."
- "Periscope's goals include supporting browsers that are greater than 10% of market penetration. We manage this by tracking browser types of inbound users."

User Accounts and Administration, pg. 102/103 & TECH-6 thru 20: Meets req'ts

- "provides roles that have clear separations of responsibilities"
- "User accounts may be created by Internal Administrators or Organization Administrators"
- Multiple versions of "SuperUser", "Standard User" and "Marketplace User" roles
- CLARIFICATION, response did not address req't to "describe all capabilities for the definition of additional roles".

RTM

- WEAKNESS, TECH-4: System does not provide a means for an authorized user to override approval rules.
- NOTE, TECH-11: Response did not fully respond to the req'ts however the details in the Tech Proposal (pg. 102) provided detail that met this req't.
- POTENTIAL WEAKNESS, TECH-12: System does not support dual sign-on via one account.
- NOTE, TECH-14: Response did not fully respond to the req'ts however the details in the Tech Proposal (pg. 102) provided detail that met this req't.
- POTENTIAL WEAKNESS, TECH-18: System does not email users when there have been changes to their account.
- Three req'ts need clarification.

User Authentication, pg. 104 TECH-21 thru 25: Partially meets

- ePro™ provides SAML (Security Assertion Markup Language) single sign-on integration
- Active Directory Federation Services (ADFS) 2.0 and 3.0
- provides user security and controls by having group and user-defined solution privileges.
- a profile is secured with 2-factor authentication
- System has default password policy"

RTM

- POTENTIAL WEAKNESS, TECH-25: System does not have functionality to automate acceptance/tracking of acceptable use agreements.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Federated Identity Management, pg. 105: Meets req'ts

- "Periscope SSO is based on SAML 2.0 specifications"
- Successful SSO integrations include "Active Director Federation Services (ADFS) 2.0 and 3.0"

Data Conversion, pg. 105 TECH-26 thru 34: Partially meets req'ts.

- "our approach focuses on migrating ONLY that data necessary to support core business functions in the new system at go-live"
- "in-scope data migration includes the following data elements: *NOTE, the list of included data migration here (pg. 105) does not include "User data/role assignments" which shows as included under Implementation Req'ts/Data Conversion Services (pg. 190)*
 - o Organizational setup, including departmental structures (including 2 levels of organizational hierarchy and bill-to/ship-to addresses)
 - o Active term contracts/Master Blanket POs and related vendor data (to support ordering at go-live)
- WEAKNESS, PG. 105: Supplier migration is not included in proposed scope/pricing. "can provide optional pricing to the State to migrate existing vendors using standard ePro data migration templates and utilities"
- "State is responsible for extracting data into standard ePro templates, data cleansing, and validation/signoff on migrated data before loading in production"

RTM

- POTENTIAL WEAKNESS, TECH-27: Conversion of Requisitions & POs is NOT included in the proposed scope/pricing.
- POTENTIAL WEAKNESS, TECH-28: Conversion of Solicitations is NOT included in the proposed scope/pricing.
- POTENTIAL WEAKNESS, TECH-30: Conversion of Vendor Performance Data is NOT included in the proposed scope/pricing.

Interface and Integration, pg. 106 TECH-35 thru 60: Meets req'ts.

- Periscope has extensive experience with multiple systems, including ERP's such as Oracle, CGI, SAP, and PeopleSoft
- "in the development interfaces, both batch and realtime, ePro's™ Financial System Integration is typically used to create and maintain a customer's supplier records.
- customer and Periscope will determine together at which point in the purchasing process that the agency would like ePro™ to trigger transactions to their financial system
- Accounting Codes may be accepted into ePro™ from the financial system.
- ePro™ provides a high degree of configurability to allow clients to define when integration transactions occur and how those transactions process.
- The ePro™ Financial System Integration uses simple Transaction Validation steps to ensure that all financial transactions and their corresponding records are successful and complete

RTM

- POTENTIAL WEAKNESS, TECH-38: Integration with Secretary of State licensing system is not included in the proposed costs.
- POTENTIAL WEAKNESS, TECH-43: Integration to an inventory system "outside of SAP" will be additional costs.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, TECH-50: The integration functionality does not have integrate receipt data to finance systems.
- Three req'ts need clarification.

Office Automation Integration, pg. 109 & TECH-61: Meets req'ts.

- Microsoft Office suite of products (.docx, xlsx, pptx, etc. – and previous versions) are considered a standard for business automation and used for digital transformation.
- also accept Adobe products and other standard transformation file formats such as RTF, JPG, XML, & CSV for uploading, attaching, and linking for business documentation
- CLM has
- integration into Microsoft Word for contract redlining between both parties.

RTM

- Meets req't.

Mobile Device Support and Mobile Applications, pg. 111 & TECH-62: Meets Mobile Device Support. Does not meet Mobile Applications.

- Users can utilize the Periscope suite of products on all their devices
- Periscope utilizes responsive web design rather than unique applications for each device type.
- POTENTIAL WEAKNESS, system does not have Mobile Apps.

RTM

- Meets req't

Data Ownership and Access, pg.112-114: Partially meets. Response discussed ways for customer to get copy of data but did not address ownership of the data.

Date Retention, Archive and Purge Considerations, pg. 114 & TECH-63: Meets req'ts.

- Periscope can configure it to
- meet State-specific retention policies.

RTM

- Meets req't.

Disaster Recovery Plan, pg. 115 : Meets req'ts.

- "Periscope's Contingency Plans and Disaster Recovery Plans (CP / DRP) are designed to mitigate the risk of system and service unavailability by providing written solutions for the prompt and effective continuation or resumption of mission-critical services in the event of an incident or disaster."
- "Periscope's Business Continuity Plans have been developed to comply with the compliance requirements, such as those of the Federal Information Security Modernization Act (FISMA), National Institute of Standards and Technology (NIST) 800-53 requirements."

Solution Environments, pg. 116 & TECH-64 thru 68: Meets req'ts.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- standard environment deployments provide users acceptance (UAT), training, and production environments.
- Our non-production environments can be integrated into the State's lower testing environments to facilitate end-to-end testing.

RTM

- NOTE, TECH-65: Integration with Test and Training environments addressed in the Technical Proposal, pg. 116.
- Meets req'ts.

Solution Technical Architecture, pg. 117-125: Partially meets req'ts. Periscope will not provide technical architecture information without "execution of a non-disclosure agreement".

- BuySpeed™ modules are written with Java technology
- supports both SOAP and REST web service formats

Solution Network Architecture, pg. 126: Partially meets req'ts. Periscope will not provide technical network information without "execution of a non-disclosure agreement".

- "Periscope strictly adheres to the NIST 800-53 standards and is certified annually via a FISMA audit as well as SOC
- II and PCI-DSS audits. All of our architecture and tools, and associated policies and procedures, are examined and
- certified by these audits as being on par with industry best practices.

System Development Methodology, pg. 126 : Meets req'ts.

- Periscope develops and manages a Software Development Life Cycle (SDLC)
 - o "have a role-based access control system to restrict system access privileges"
 - o "there is a separation between non-production and production application environments"
 - o "three operational environments": Development, Test/QA, Production and Training."
 - o Performance testing with "JMeter and automated test scripts"
 - o Quality assurance program
 - o Configuration/Change Management methodologies.

Service Level Agreement, pg. 130-144: Partially meets req'ts.

- Did not provide a review of or accept States' SLA. Provided their Standard SLA but indicated that they are willing to negotiate "addition of certain elements". NOTE: details of their SLA are not bad. Focus is more 'customer/business operations' focused than is common in the industry. Though their Sev 2 definition would have been a Sev 1 with State's SLA.
- WEAKNESS, no Implementation SLAs.
- CONCERN, pg. 134 (pg. 4 of 14 in SLA): The available days/times in SLA states M-F, 6am-7pm MT" but in the Implementation Req'ts, Help Desk section (pg. 204 & 205) it states "M-F, 8AM-7PM ET".
- Attachment A-2, pg. 141 (pg. 11 of 14 in SLA): Positive is that SLA does cover Prod, Training, UAT and Demo environments.
- WEAKNESS, Attach A-2, Sev 2, pg. 142 (pg. 12 of 14 in SLA): The "Events" listed would have been Severity 1 in State SLA.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Security Requirements 145-155 (see Part 2 doc)

Cloud Security Alliance (CSA) Compliance, pg.145: Does not meet req't. Did not provide either the CAIQ or a report "documenting compliance with CCM".

- We strictly adhere to the NIST 800-53 standards and are certified annually via a FISMA audit as well as SOC II and PCI-DSS audits. We are confident that the control families in the CAIQ are already addressed by these audits.

Security and Privacy Controls, pg. 145: Meets req'ts.

- "confirmed that the hosting environment satisfied the required technical controls as specified within NIST 800-53 revision 4 for a moderately categorized SaaS solution."

Security Certifications, pg. 145: Partially meets req'ts. Response did not indicate whether they have certifications/credentials for HIPPA, FERPA, CJIS, IRS Publication 1075, NIST SP 800-71 and FIPS 200.

- Periscope is annually audited by a third-party firm and certified FISMA, SOC II-Type II, and PCI-DSS compliant.

Annual Security Plan, pg. 145 : Does not meet req'ts. Periscope will not provide the req'd details without "execution of a non-disclosure agreement".

- "We strictly adhere to NIST 800-53 standards. As a standard part of our operations, we develop an annual security plan based, in part, on findings returned from"
- "Because the security information is sensitive and we have a high desire to protect all of our clients, we will only provide details of our security footprint with the execution of a non-disclosure agreement."

Secure Application and Network Environment, pg. 147: Meets req'ts.

- "Periscope secures the environment to ensure that perimeter devices such as firewalls and IDS are configured correctly to allow only recognized and valid connections"
- Tier III data center provides for a completely redundant and continually operating facility that has a 99.9% uptime track record. It is a carrier-neutral environment with 24 / 7 security and engineering staff."
- "Periscope uses the AWS application firewalls with elastic IPs."
- "Activity login is tracked"
- "All personnel "required to use multi-factor authentication"
- "has clearly defined data classification policies and procedures"
- "utilizes and monitors using Meraki IDS/IPS."
- "Secure data is encrypted at rest and data transfers are only accomplished via secure TLS 1.2 HTTPS protocols"
- "Periscope Platform is architected as a 3-tier application with a clear separation between the web, application, and database layers."
- "Periscope's Business Continuity Plans have been developed to comply with the compliance requirements, such as those of the Federal Information Security Modernization Act (FISMA), National Institute of Standards and Technology (NIST) 800-53 requirements."
- "Access to any client data is highly restricted (principles of least privilege) and monitored."

- "All Periscope computing devices have administrator-controlled anti-virus and system-controlled password protection."

Secure Application and Network Access, pg.150 & SEC-1 thru 5:

- "is hosted with AWS. Access to the system is restricted via VPN authentication, AWS Identity management, and ssh keys. Application access is secured with SSL (port 443) certificates supplied by the customer or issued through AWS route 53."
- "No customer Hypervisor settings are in place"
- "The system is scanned for vulnerabilities by Rapid7 and patched as available."
- "Meraki IDS is in place to detect and mitigate external threats to the network."
- "Being hosted in AWS, physical access is limited to AWS personal"

RTM

- POTENTIAL WEAKNESS, SEC-4: System does not use persistent cookies.

Data Security, pg. 151: Meets req'ts.

- "Adhere to NIST 800-53 standards"
- "certified annually via a FISMA, SOC II and PCI-DSS audits"
- System interoperability executed via HTTPS and TLS 1.2
- Data classification is based on the concept of need to know. "people who have a legitimate business need for the information"
- "controls are in place to authenticate the identity of users"
- "sensitive information is provided only after the written authorization of the Data Owner has been obtained".
- Data disposal, "a method must be used that completely erases all data". For media where data cannot be erased, the media "must be destroyed"

Personally Identifiable Information Protection, pg. 153: Meets req'ts.

- Periscope Solutions do not have PII information as a part of its data set. Should a supplier use their social security
- number as their tax-id the solution encrypts at rest, the tax-id, and any associated data points.

Security/Privacy Issue Occurrence, pg. 153/154: Partially meets req'ts. However the SLA document does specifically identify what Severity level a "security or privacy issue" would be classified as. CLARIFICATION, need Periscope to identify that a security or privacy issue would be classified as Severity 1 for their SLA.

- "Our service level agreements are designed to accommodate the handling of all issues, including Security and Privacy Issues"

PII Data Actual/Attempted Access or Disclosure, pg. 154: Response did not address the req't of responding to PII actual/attempted access. Though Periscope's position is that the "Solution does not have PII information as a part of its' data set" they do acknowledge that a supplier may use their social security number as their tax-id, so a response for that situation should be addressed.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Security Breach Reporting, pg. 154: Partially meets req'ts. However, need Periscope to identify that a Security Breach would be classified as Severity 1 for their SLA.

Implementation Services Requirements – pg. 156-207

Project Management, pg. 156-177: Partially meets req'ts.

- Periscope understands the importance of status reporting, deliverable management, issue management, and risk assessment and mitigation for the delivery of a successful project". "we discuss each of these" during "initial Project Set-Up"
- "The named Project Manager dedicated to the project will not be assigned to other projects during the implementation period."
- "Project Managers are PMP certified and many have public sector experience"
- CONCERN, Fig. 7.2 Sample Implementation Plan does not indicate if it represents a Small, Medium or Large State implementation, however the timeline of being 'live' with all functionality in 12 months is too aggressive. (pg. 157)
 - o 24 Months, System live in 12 months, Wave Rollout 2nd 12 months
 - o Unclear which "End Users" will be going live in months 11/12.
 - o Vendor Registration, live end Month 4... No System Test/UAT, without Integration
 - o Rest of system Big Bang over Months 11-12... No System Test/UAT
 - o Go Live Support, only month 12... does not reflect the req'd 3 month support and isn't providing support for what about adjustments during Rollout?
 - o Interface/integration goes live Months 11-12 but what about Vendor integration when Vendor goes live in Month 4
 - o OCM not included in the project tasks
- Typical PM deliverables: Proj Schedule Baseline, Scope/Change Control Plan, Risk Mgmt Plan/Risk Register, Status report, Payment/Billing Schedule
- Staffing plan (pg. 158-179): looks good
- State Project Support Plan (pg. 180-182) looks good.

Project Implementation Methodology, pg. 182-191: Generally meets req'ts however concerns about the workload on the Participating Entity at Go-Live (see below)

- "the plan is organized in a sequential manner, we have worked with clients to create and implement in a more agile manner than this plan's waterfall layout."
- Four phases: Project Setup/Analysis, Exploration & Design, System Implementation/Configuration, Post Implementation Go Live & Support (pg. 183)
- WEAKNESS, Administrative Data Migration and Data Entry, pg 188: As noted in the Data Conversion section, Periscope methodology only plans to migrate only Contracts and no other transaction data. Also, Supplier data migration is not planned.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- CONCERN, Go-Readiness, Configuration, pg. 189/190: the Participating Entity will be responsible for entry of configuration ("user data, approval paths, etc., customized printing/report features, punchouts, functional options") in the Production environment.

Catalog Support Services, pg. 192-194: Meets req'ts however note that Periscope does not create catalogs for Suppliers/State.

- "Periscope will analyze and consolidate data provided by the State on current suppliers."
- "Periscope will develop a comprehensive communication framework used to manage supplier outreach"
- "Periscope's supplier enablement team works with the supplier to enable their catalog and prepare them for successful, ongoing management of their catalog." (pg. 188)
- "Many suppliers complete this upload process without requiring assistance from Periscope, but our Supplier
- Enablement team conducts online meetings with suppliers to assist and review their catalog setup." Suppliers are expected to create/upload their catalogs. Periscope services does not include creating catalogs.
- Punchout: "Periscope will manage this configuration for the state and engage with
- the appropriate state and supplier resources to test, approve, and promote production." (pg. 189)
- "Periscope's support team will provide ongoing support of the State's suppliers"

Data Conversion Services, pg. 195: Meets req'ts.

- "our approach focuses on migrating only that data
- necessary to support core business functions in the new system at go-live."
- NOTE, the list of included data migration under Technical Req'ts/Data Conversion (pg. 105) does not include "User data/role assignments" which shows as included here.
- "Periscope will work with the State to develop a Data Migration Plan" State is responsible for extracting data into standard ePro™ data migration templates, data cleansing, and validation/signoff of migrated data."

Interface/Integration Development Services, pg. 196/197: Meets req'ts. NOTE: if any integration/interface requires changes from "existing" Periscope "specifications/capabilities" then there will be additional costs.

- POTENTIAL STRENGTH, Integration Module, pg. 72: Periscope has optional services to setup and manage the State's side of integration if needed.
- "Integration module was developed to enable integration across multiple financial systems"
- "our proposal includes services to review our existing integration module specifications and capabilities as described below to determine a fit-gap with the financial system. If they can be leveraged, then enablement is included as part of our project costs. If Periscope needs to accommodate a custom element to support integration to the financial system, we can work with the State to scope any required development to meet such custom elements and determine the impact on project cost and timelines."
- "the analysis phase, we also collect information on the requirements"
- "An Interface Design document will be developed, including specific data definitions, file formats, processing triggers, and processing and update requirements in both systems, using the Periscope ePro™ Standard Integration Module and the output available from it."

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Organizational Change Management (OCM Services), pg. 197-203: Meets req'ts

- "Periscope uses Prosci's ADKAR® Model of individual change". "acting as an assessment tool, providing guidelines for structuring key parts of our change management program, and facilitating important conversations about the change throughout the organization." (pg. 198/199)
- "change management must leverage both an individual change management model and an organizational change management approach." (pg. 199)
- "makes use of an informational project website and an email campaign to effectively communicate messages" (pg. 199)
- Agency Core Teams (pg. 200): "Each agency's core team is comprised of subject matter experts from the functional areas impacted by the system." "Core Team members later become "power users", providing support to the end-users in their agencies".
- Change Liaisons (pg. 200): "make use of departmental change advocates". "will be focused on assisting with the organizational change management activities for their agency
- Change Management Plan (pg. 200): "the communication plan, the sponsorship roadmap, the stakeholder engagement plan, the training plan, and the resistance management plan"
- Sponsorship Roadmap (pg. 202): "Sponsorship Roadmap is to create an actionable plan for preparing and leveraging all the sponsors to promote, gain support for, and drive adoption of the change"
- Stakeholder Engagement Plan (pg. 202): "approach to ensure that individuals or groups impacted by a change and those who can positively affect the overall success of the change are engaged in the change effort".
- Resistance Management Plan (pg. 203): "proactive resistance management and reactive resistance management tactics".

Training Services, pg. 203-208: Meets req'ts. The content in this section is repeated in the Managed Services Training Services section along with the sample Training Plan, see notes there.

Help Desk Services, pg. 209-212 & IMPL-1 thru 5: Meets req'ts.

- Periscope shall provide the following Support Desk services to User:
 - o Online support portal and ticketing system to report and track issues: Available 24 hours a day, 7 days a week; monitored during Business Hours (Monday-Friday 8am - 7pm Eastern excluding Periscope holidays);
 - o Ability to contact call center to report technical and functional issues during Business Hours;
 - o An easily accessible frequently asked question list and a technical and functional team available during Business Hours;
 - o Non-Business Hours response to tickets reported as Severity Level One issues;
 - o Ability to review responses to and update issues in the Online Support Portal;
 - o Ability to access online functional help tools such as quick reference guides and online video tutorials; and
 - o Ability to view all functional issues reported by the Customer in the Online Support Portal.
- "Support Analysts are equipped with industry-standard tools to meet the Support needs, including the Zendesk ITSM, telephone system, chat support and FAQ resources" (pg. 209) "will provide the State with read-only access to the State's instance of the Zendesk ITSM system" (pg. 211)
- "Customer Satisfaction (CSAT) surveys are provided to every user at the end of every ticketing experience." (pg. 211)

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope

CATEGORY #(s): 2

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Tier 1: by State unless alternate funding model accepted. Tier 2 & 3 by Periscope (pg. 211/212)

RTM

-

On-Site System Stabilization Support, pg. 212: Meets req'ts.

- "will enable the system setup and configuration tuning"
- "provide system utilization assessment, shoulder-to-shoulder mentoring of State operations staff, documentation of lessons-learned, resource management, and ongoing identification of opportunities to maximize the value of the e-Procurement solution assets."

Managed Services Requirements – pg. 213-253

Solution Support, pg. 213 & MNGD-1: Meets req'ts. However the Release testing program timing has concerns.

- CONCERN, 20/10/10 Program for releases, pg. 181 & pg. 213: Unless the functionality being testing is small in size, the number of days allocated in this plan is unrealistic.
 - o 20 days for Participating Entity to do UAT
 - o 10 days for Periscope to resolve issues found during UAT
 - o 10 days for Participating Entity to confirm fixes
- Performance metrics "set forth in the SLA", Participating Entity can request a review to the performance metrics "once a year". (8.1.7, pg. 214)

RTM

- MNGD-1: Periscope uses "Pingdom" to "monitor average response time"

Organizational Change Management (OCM Services) , pg. 218-224: Meets req'ts. Content in this section is exacts repeat of Implementation Reqs OCM Services, see notes there.

Training Services, pg. 225-245: Meets req'ts.

- "Using the ADDIE (Analyze, Design, Develop, Implement and Evaluate) Instructional Design Methodology" (pg. 226)
- STRENGTH, Micro-Learning videos (pg. 226): "Micro-learning videos" is a very effective approach to training videos.
- User-based Training Summary Table 8.4 - 9.10, pg. 226-229:
 - o POTENTIAL STRENGTH, the training curricula appear to be comprehensive and good fit for users.
 - o WEAKNESS, curricula are 'generic', not State specific, so State will have to build out companion materials to give State specific guidance.
- "we know that 70% of an individual's competency development comes through assignments (e.g., on-the-job experiences)" (pg. 229)
- "Core Team will have "Core Team Orientation" that "in-depth exploration of all major ePro™ functionality associated with the scope of the project." (pg. 229)
- Additional Training, pg. 229: CONCERN, the "knowledge transfer with key stakeholders" is only to the "Core Team" which is a limited/small number of people. So the issue of addressing "on-the-job experiences" to the broad number of users that will be trained is not going to be sufficiently

Individual SME Comments:

Public sector focused only. – Periscope ePro

8 states /1000 locals

Integrate to ERPS and financial systems

Equal opportunity and support local and MWDBEs – integrates to B2Gnow.

Modular standalone or full epro

General Principal and Requirements

- Key Solution Functionality Elements
 - P15 Single point of entry; SSO supported; ePro is transparency portal for posted solicitations and awards; contract spend; state supplier lists.
 - P16 Routing based on business rules; state establishes user-defined fields by enterprise or org. Admin set, not custom.
 - P18 Periscope cloud (instance) is portal to connect all aspects of the process for buyers and suppliers. – In-system chat for collaboration. Supplier side allows registration, bid responses, contract negotiations, PO receipt; invoicing; performance resolution; transaction fee submission.
 - P19 Marketplace catalogs for buying on contract; open-market catalogs;
 - P20 - list of examples ERPs and systems that integrate. (White paper on integration process). P23 *While Periscope Holdings will provide example XML and XSD schema documents for all XML transaction generated by this integration solutions, Periscope Holdings also offers XSLT transformation services, giving this solution additional flexibility in how the XML is formatted in the transaction.*
 - Default is that agency tool handles integration, but Periscope can provide transformation services to convert XML into acceptable format.
- User Experience – P41 Options: user can personalize home screen relevant to role; Admin defaults dashboard to role.
 - Some users will have ability to create ad hoc reports.
 - P42 Intuitive navigation aimed at fewest clicks to completion.
 - Central search bar on all pages; advanced search with field level search config with dropdown and free fields.
 - Guided workflows. (Wizard-drive fields - Nevada)
 - P45 – Color-coded homepage dashboard displays actions required or statuses of workflows. P46 – Alerts and reminders Alarm at top of every page.
 - Mobile access through browser.
 - Managers can track assignments and reassign with org/dept/location. Proxy features available.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P 48 Role-based functionality – *Standard roles are: department user, basic purchaser, accounts payable, auditor, super users, and multiple administrative roles) with the ability to assign unique privileges to each user.*
 - *Multi-organization access is granted to users as part of their overall user profile. This access is granted by Internal Administrators, a role that provides administrative privileges across all organizations.*
- Bidder Best Practices and Roadmap – Configurable – ca make changes through life of application.
 - P51 *ability to track a subcontractor from solicitation through contract utilization*
 - P51 - focus on public sector only, therefore only public approach contracting supported.
 - Agile development. – new features can be configured and phased in after go-live.
 - 2020 – added PCI compliant P-card vault; Added Reconciler to supplier report and payment portal.
 - P53 – ability to compare contracts based on value and sourced credentials.
 - Next steps – Predictive Intelligence, Guided Buying.
 - LMS for end users – appropriate to user group.
 - Roadmap: enterprise customer success; grow supplier network; continued innovation.
 - P55 – Triangle stack from bottom- Business intelligence; supplier fee admin; catalog loading and shopping; ux/ui design.
- Innovations and Value-Added Features/Services
 - Grants management. – deployed by Texas Department of Agriculture - ePro Sourcing variation that has rolling enrollment solicitation .Included as no0cost/value add.
 - NIGP consulting services
 - Strategic Sourcing
 - Diversity inclusion – integration to B2G; integrate to SAP by Phoenix Team; Procured vendor performance integration.
- Customizations/Extensions – P67 *Periscope development methodology follows the Agile method, which allows enhancements to be applied at a rapid pace. All enhancements built into our software are available to every customer. Our roadmap is published year ahead of schedule so customers may align their organization needs with the right tools provided on a scheduled basis.*
- Alternative Funding Models – Self-funded model – See p69. Shared revenue and opens the following:
 - Strategic Sourcing;
 - Supplier Support (tier 1) and enablement; account management; marketing of contracts; train poli-subs; admin fee collection.
- Contract transition – existing clients will determine best contract option for them. Previously have transitioned clients between contracts.

Functional Requirements

- General Functionality – COTS Marketplace – standalone or functional within the ePro system.
 - Can be used by all state agencies and polisubs.
 - Seamless integration of procurement functions: *online supplier registration, requisitions, online solicitations, online bid/quote, reverse auctions, evaluations, and tabulations, purchase order and contract awards, contract and catalog management, a public shopping Marketplace, delivery of orders to vendors, minority participation tracking, receiving, and invoice matching.*
 - Cloud-based SAAS. Hosted on AWS.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P74 *Much of the work performed by Periscope's Hosting and Infrastructure Team will be performed behind the scenes, setting up and supporting the off-site hosting infrastructure for the solution.*
 - ERPOC-GEN-6 – Integration with state data warehouse and State BI reporting – not available – roadmap item.
 - EPROC-GEN-32 – Only English language system available
- Supplier Portal – P75 *Once a supplier has completed their registration and received their unique login information, they may log into their portal. A supplier may self-maintain their profile, read State posted communications, review and respond to bid opportunities, create and review quote history, receive and acknowledge purchase orders, receive contracts, create and track invoices, maintain catalogs, etc.*
- Supplier Enablement/Management – State will onboard suppliers or Periscope can provides as additional offering or in alternative funding model.
 - P76 *State users with roles of Internal Administrator (who have full administrative privileges in the system) or supplier Administrator (whose administrative privileges are limited to supplier data) can manage supplier settings and supplier records in ePro.*
 - P77 *Typically, active suppliers are loaded into ePro using data from the financial/ ERP system at go-live, with a synchronized Alternate ID linking the ePro supplier account to the existing account (as well as a link for each supplier's address). After go-live, supplier data is sent to the financial/ERP system when an award is made to a supplier (the specific timing will be determined with the State as part of integration design).*
 - EPROC-VDR – certain data validations will require integrations. Pricing varies by state's need.
- Buyer Portal – P77 *All buyers will initiate and utilize activities to complete the full life cycle of procurement activities through this portal. ePro allows users to create new procurements, search for existing procurement and purchasing documents, update their user profile, view alerts, and access other system features all from the Homepage.*
- Need Identification - P77 – based on the item being requested, privileges, and configured business rules to route that request through the appropriate steps to facilitate efficient procurement completion.
 - ePro demand aggregation functionality allows for ease of combining all agencies ' needs for the same items and/or services into one solicitation without the redundant work of recreating the line items.
 - P78 *Once a Need is Identified and submitted, the ePro approval and workflow engine are triggered. This provides the ability to easily configure and manage automated approval workflows meeting State business rules and can be based on a range of criteria, including; document type (requisition, solicitation, contract, etc.), dollar amount, organizational unit or department, commodity code (e.g., IT goods/services, vehicles, etc.) and general ledger account code.*
 - EPROC-NEED-5 *ePro supports all types of needs. A user can request items (services and commodities) off contract through catalogs and punch outs. Requisitions can also be placed as RPA, open market, or demand. A solicitation can be created for unique purchases such as a quick quotes, emergency purchase, competition impractical, etc.*
- Request through Pay – claimed request-to-pay cycle time reductions over 40% for state clients.
 - Roles and privileges limit access to areas staff don't need and guide them through procurement steps.
 - Search marketplace catalogs from PC or mobile devices.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P81 Guided buying process. Hosted catalogs; Punchout level 2; option to add noncontract vendors.
 - P82 POs central document for tracking; receipts of good and services can be entered based on quantity or dollar.
 - P84 Pcards can be used to pay transactions processed through the system for suppliers that accept it.
 - P85 Credit memos can be used to adjust for canceled or returned goods or services.
 - P85 Subcontractor payments can be tracked; subs will login to verify their payments to the state.
 - P85 Epro can integrate with sending XML files via HTTP or web services delivery to financial systems
 - P85 Epro can managed pre-approved multi-supplier agreements – obtaining future price quotes. *POs and contracts generated through Solicitation-Enabled Contracts are considered “releases” against that Solicitation-Enabled Contract (the PO # is the Solicitation-Enabled Contract concatenated with the release number). Spend recorded through those POs and contracts is aggregated and displayed on the Solicitation-Enabled Contract as “Dollars Expended to Date.”*
 - PROC-PRD-11 – recurring orders – not part of functionality
 - EPROC-PRD-59 – non workdays not specifically highlighted. Weekday/weekend shown.
 - EPROC-WRK-10 – override function not available for approvers – only creators have the capability to override or bypass.
 - EPROC-WRK-13 – line level approvals not part of functionality.
 - EPROC-PC8-21 – Pcard reconciliation not part of functionality.
 - **EPROC-RC-3 and -4 – Entering receipts without PO not part of functionality. Periscope asks for use case to determine if it should be. Cites not best practice.**
 - EPROC-INV-8 – No email functionality for invoices with comments and attachments.
- Catalog Capability – Marketplace. Claim is contract spend increases of 51% adopting marketplace.
 - All catalogs in one location; no limit to number of catalogs; Periscope will promot catalogs.
 - *P 87Working with our client-partners has afforded us the ability to create a solution that solves many of the issues that*
 - *continue to plague public sector procurement.*
 - *Marketplace is built to provide agencies, users, and suppliers with a streamlined user interface, but with government required*
 - *control. The following capabilities are included in Marketplace:*
 - *1. Unlimited catalogs from the State*
 - *2. Level 1 and Level 2 punchouts*
 - *3. External cooperative contracts*
 - *4. Other publicly sourced contracts provided by suppliers*
 - *5. Automatically displayed price comparison shopping between all types of contracts, including open-market*
 - *6. Supplier enabled/updated catalogs and pricing with automatic administration notification if there is a price*
 - *change*
 - *7. Multi-catalog capability for the same supplier*
 - *8. Open market / off-contract access to catalogs*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- 9. Workflow and approvals that can be configured based on specific business unit requirements
 - 10. Order generation and electronic delivery to vendors
 - 11. Payment methods including P-Card and purchase orders
 - 12. Administering and collecting administrative fees
- P88 Catalog suppliers have numerous methods to connect to the State. They are able to provide Level 1 and Level 2 Punch Out, XML Sync, CSV, or utilize internal catalog management. Our supplier enablement team will be responsible for working with the suppliers to load/enable their catalogs, and we will work with the State's catalog administrator to decide which catalogs to turn on and when.
- Catalogs can be loaded by suppliers, agency personnel or, Periscope. Periscope typically takes on the supplier enablement responsibilities, assisting suppliers.
- punchouts are based on industry-standard cXML.
- Sourcing/Bid Management
 - P89 process. All related documents created during the purchasing cycle are linked, stored in the solution, and searchable, allowing for easy retrieval of information and availability for audit purposes. Documents are routed through the solution based on predetermined approval authority, and the solution automatically tracks and updates the status of individual procurement documents, attachments/templates/forms and processes (with dates and times for changes in status provided) based upon the automatic or manual completion of related documents and events. This linkage provides an inherent method of audit tracking all activity throughout the process and enables a guided procurement process, from initial submission of qualifying docs and price points, through award and contracting activities.
 - P90 modules also enable RFx documents to be drafted using stored templates and clauses. Once drafted, identified users can collaborate on the RFx document (storing all versions for comparison), and finalize it prior to including it on the solicitation to be posted publicly. Posted bids are published on the web to enable public transparency and electronic response by registered suppliers. After the response time has ended, bid responses can be viewed, evaluated, and awarded via the BID tab, which can be sorted by different criteria.
 - P91 integrated into the Periscope Supplier Network (PSN) database, allowing the State to extend notifications beyond those suppliers who are directly registered in the State's system.
 - P93 – unique solicitation types. Solicitation-enabled contracts; Demand Req; Reverse auction exceeding 1k items; open and rolling enrollment.
 - P82 – Open, informal, closed bid options supported. Q&A option through portal.
 - Supplier responses can be encrypted and locked until opening date; vendors can withdraw submitted bids and resubmit prior to opening time.
 - Epro compiles bid tabulation to review. BAFO can be requested through portal. Bid tabulation not public until award completed/PO or contract issued.
 - Intent to award status; multi awards supported.
 - P87 Evaluators can log in to submit individual responses and attachments. *Evaluation committee members, predetermined by the State, may log into a secure scoring/evaluation tool that tabulates individual responses into configurable reports.*
 - Protest submission and management.
 - EPROC-SRC-3 – Two step ITB not supported.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- EPROC-SRC-83 – No integrated video conference. Third party link can be inserted. Attachment can be uploaded.
 - EPROC-SRC-117 – cost can be hidden from evaluators but not bidders' names.
- Contract Management – P101 *web-based contract management solution that allows users to create, approve, negotiate, execute, manage, retrieve, and report on every contract type and version across the organization.*
 - *Built-in automated workflow and approval paths enable projects to flow seamlessly through drafting, negotiating, maintaining, and closeout. The solution also has electronic signature capability between the State and a supplier.*
 - *solution provides the ability to create contracts from custom templates, providing common language needed to meet legal directives, or any other regulations, standards, and guidelines required. Based on user input, the appropriate clauses are joined together in a contract document wherever they are needed. Clause library available.*
 - Standard and ad hoc reporting. Automated reports to user or groups.
 - Contracts can be archived.
 - Visibility into contract spend. Change order functionality.
 - Supplier fees can be managed from item pricing or ad-onn fee.
 - EPROC-CNT-34 – backdated contracts can be entered. Marked BP.
- Vendor Performance
 - P104 State can define performance issues to be reviewed and responded by supplier; Along with scheduled contract review, supplier performance rating created for supplier profile.
 - EPROC-VPE-20 – Orders for contract items cannot be sent without the contract number in ePro, therefore notifications as stipulated would not be sent.
- Purchasing/Data Analytics – Epro Business Intelligence Solution.
 - Pre-built analytical reports. KPIs.
 - Multiple spend analysis, cycle time, workload management, contract usage and supplier reports bundled. Ad hoc reports available.
 - Dashboards streamline reporting and review.
 - EPROC-PDA-37 – price comparison for contract items and non-contract items in the Marketplace not available.

Technical Requirements

- Availability – sample SLA – 99.99% time outside schedule maintenance. 5% credit of monthly cost if not met.
- Accessibility Requirements – good faith. P113 *With new feature releases, our software is tested for web accessibility standards with the Rehabilitation Act Federal ICT Accessibility / Section 508, W3C Accessibility Initiative, and WCAG 2.1 Level AA (which exceeds Section 508's standards).*
- Audit Trail and History – Robust tracking claimed. Logs: User ID; date//time; changed information; outcome; if NIST800-53; other state-required info. Admin can set permissions to grant deletion or modifications; can export logs; can generate reports.
 - **EPROC-TECH-4 – Marked A** but comments say not part of solution. Override approvals not permitted.
- Browsers Supported – Chrome, Firefox, Edge, Safari – Mac or PC.
- User Accounts and Administration – Combination of Superuser and Standard User roles.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Superuser roles breakdown responsibilities for internal and external, enterprise and agency.
 - Standard users limit access to appropriate modules.
 - Marketplace User Roles. – Agency users for shoppers, admins, approvals; Supplier Users for seller (maintain catalogs) and seller admins (maintain profiles and catalogs).
 - P116 Unlimited user access provided – not seat-based license costs.
 - EPROC-TECH-12 – Dual Buyer and supplier account logins not supported.
 - EPROC-TECH-18 – Email confirmations of account changes not supported. (listed as BP, but this is actually non-compliant functional)
- User Authentication – P117 SSO – SAML (XML-base) – 2.0.
 - ADFS, oneLogin, Okta, Auth0, Salesforce – previously integrated.
 - User security and controls – group and user-defined solution privileges.
 - P17 – passport controls listed.
- Federated Identity Management – See previous.
- Data Conversion – P118 *approach focuses on migrating ONLY that data necessary to support core business functions in the new system at go-live. Historical data should be accessed outside of the new eProcurement system (e.g., in a data warehouse, etc.).*
 - *Best practices recommend that clients work with vendors to create new accounts once ePro goes live, as many times additional data elements are requested beyond what is captured in legacy systems. However, we can provide optional pricing to the State to migrate existing vendors using standard ePro data migration templates and utilities.*
 - *Periscope resources will work with the State to develop a Data Migration Plan, addressing the scope, timing, and validation steps to be used in migrating in-scope data elements.*
 - *P119 The State is responsible for extracting data into standard ePro templates, data cleansing, and validation/signoff on migrated data before loading in production.*
- Interface and Integration - P119 *standard XLM Interface Module to facilitate integrations, as well as the capability for customized integrations*
 - *integration can either create a new supplier record or make updates to an existing record. To update an existing supplier record, updates are passed from ePro to the financial system whenever updates are made to a supplier record within ePro.*
 - *When configuring an agency's integration, the customer and Periscope will determine together at which point in the purchasing process that the agency would like ePro to trigger transactions to their financial system. (automated process.)*
 - *Additional detailed description of transcription integration process and examples of validation messages.*
- Office Automation Integration – Office files are incorporated and can be loaded for procurement activities. – Exports are CSV.
- Mobile Device Support – As noted in general functions, responsive web-based design makes Periscope systems work on iOS and Android tablet and phones.
- Mobile Applications – See previous.
- Data Ownership and Access – Detailed explanation of reporting capabilities and spend reports. Not responsive to Data ownership.
- Date Retention, Archive and Purge Considerations – *P127 Periscope's ePro solution, by default, maintains information in perpetuity. However, Periscope can configure it to meet State-specific retention policies.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- EPROC-TECH-63 ePro provides the ability to archive data from a production environment while keeping the data available for reporting on historical data.
- Disaster Recovery Plan – P128 Initial assessment of damage/disruption may lead to Continuity or Disaster Recovery plans being implemented. (Periscope plans are separate from AWS DRP)
 - Annual failover testing performed.
 - In the event of a disaster declaration, SLAs are suspended until the primary site is restored. Needs clarification – who declares a disaster declaration – a state declaration? If the system is offline, why would SLAs be suspended? For example, if this means a state declaration, the entire state of Texas is under a COVID disaster declaration for nearly 2 years, but that is not impactful for a data center, compared to the Texas storm that caused significant power outages in the state? Shouldn't the data centers have backup plans to ensure continuity?
 - Full disaster recovery is defined as a full loss of critical systems within the primary data center for an extended period of time. The RTO for recovery is 24 hours. Before performing a full failover, executive management and IT meet to determine the extent of the outage and if a full failover must occur. Only authorized Periscope IT and Executive management can approve the execution of a full failover recovery.
 - Periscope Platform is architected as a 3-tier application with a clear separation between the web, application, and database layers.
 - Periscope's Business Continuity Plans have been developed to comply with the compliance requirements, such as those of the Federal Information Security Modernization Act (FISMA), National Institute of Standards and Technology (NIST) 800-53 requirements.
- Solution Environments – P129 Periscope's standard environment deployments provide users acceptance (UAT), training, and production environments.
 - Our non-production environments can be integrated into the State's lower testing environments to facilitate end-to-end testing.
- Solution Technical Architecture – P130 adheres to the NIST 800-53 standards and are certified annually via a FISMA audit as well as SOC II and PCI-DSS audits.
 - Periscope solutions are hosted with Amazon Web Services (AWS) with each ePro client segregated in their own virtual private clouds to ensure absolute isolation between clients. All system interoperability between Periscope and our clients is executed via HTTPS and TLS 1.2.
 - supports both SOAP and REST web service formats and easily integrates with many standard systems.
 - does not use open APIs, but we build each integration/interface to the specifications of the client.
- Solution Network Architecture – P139 All databases reside solely in US-based cloud storage and are strictly segregated from any other databases.
 - Periscope applies the principles of least trust in all of our environments.
- System Development Methodology – P139 Periscope develops and manages a Software Development Life Cycle (SDLC) for the organization.
 - SDLC activities and tasks address the following ten activity areas:
 - 1. Project Initiation/Definition – Discovery, Estimation, SOW, High-level Requirements
 - 2. Risk Assessment

- 3. Functional User Requirements (User Stories)
 - 4. Technical and Architectural Systems Design
 - 5. System Programming or Customized Off the Shelf (COTS) Software Development/Acquisition
 - 6. Quality Assurance
 - 7. Documentation and Training
 - 8. Systems Testing and Acceptance
 - 9. Installation
 - 10. Maintenance / Application Sunset
- Service Level Agreement – File3 – Part 2 sample SLA provided **MARKED CONFIDENTIAL**
 - Details issue severity levels. Highest level – Severity 1 addressed 24/365.
 - Scheduled maintenance – 2nd Friday per month during non business hours or mutually agreed time.
 - Disaster Recovery – RPO of no more than 1 hour of lost data. RTO = <24hours.
 - Contractor support desk – 24/7 electronic online support and ticketing. Call center to report issues during business hours; technical and functional team available during business hours.
 - Severity level 1.- response in non-business hours. Response time stated in attachment A - 15 minutes.

Security Requirements

- **Cloud Security Alliance (CSA) Compliance**
 - P2-16 We strictly adhere to the NIST 800-53 standards and are certified annually via a FISMA audit as well as SOC II and PCI-DSS audits
 - CAIQ not provided without NDA.
- Security and Privacy Controls - Periscope performs an annual FISMA compliance audit administered by an independent third party to ensure that we maintain the appropriate security posture for a medium categorized offering. The audit confirmed that the hosting environment satisfied the required technical controls as specified within NIST 800-53 revision 4 for a moderately categorized SaaS solution.
- Security Certifications
 - HIPAA, FERPA, CJIS Security Policy, PCI Data Security Standards (DSS), IRS Publication 1075, FISMA, NIST 800-53, NIST SP 800-171, and FIPS 200 if they apply.
 - Periscope is annually audited by a third-party firm and certified FISMA, SOC II-Type II, and PCI-DSS compliant.
- **Annual Security Plan** – Repeated NIST 800-53 statement **Plan not provided without NDA.**
- Secure Application and Network Environment – Internal **Plan not provided without NDA.**
 - P2-18
 - Externally: Periscope uses the AWS application firewalls with elastic IPs. Login is established with SSL encryption.
 - Internally: Host to host communication is limited to specific use only.
 - Periscope's Business Continuity Plans have been developed to comply with the compliance requirements, such as those of the Federal Information Security Modernization Act (FISMA), National Institute of Standards and Technology (NIST) 800-53 requirements. Each BCP is maintained on an ongoing basis, with critical processes tested at regular periodic intervals. The BCPs will not only provide for recovery from an

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

interruption of services but also put measures in place to prevent or reduce the likelihood of an interruption.

- Secure Application and Network Access
 - ePro is hosted with AWS. Access to the system is restricted via VPN authentication, AWS Identity management, and ssh keys. Application access is secured with SSL (port 443) certificates supplied by the customer or issued through AWS route 53.
 - No customer Hypervisor settings are in place. Virtualization is controlled with Terraform and its version controlled.
 - EPROC-SEC-1 – Because of browser-based password storage, new user functionality not tracked as new device. N.
 - EPROC-SEC-4 – Persistent cookies not used. N.
- Data Security – See previous.
 - P2-24 Data classifications provided.
- Personally Identifiable Information Protection – P24 No PII in Periscope data. Tax-id and associated data points encrypted.
- Security/Privacy Issue Occurrence -P2-24 *The contractor will notify the Customer any time the Solution is not available as soon as practical, but not more than one hour, after becoming aware of such unavailability.*
 - *4-stage severity level. Level 1 – 15 minute response – 24hr restoration.*
- PII Data Actual/Attempted Access or Disclosure – See previous PII
- Security Breach Reporting – See previous Security occurrence response.

Implementation Services Requirements

- Project Management – P2-27 Shared Ownership/Collaborative decision-making/Sustained focus on project goals/right resources.
 - Dedicated project manager. Details of PM provided with implementation sample timeline.
 - 4 phases: 1. Project setup and process analysis; 2. Exploration and design; 3. system implementation and configuration; 4. Go live and go live support.
 - In addition to the implementation activities and deliverables, Periscope will provide ongoing project management services throughout the life of the project
 - • Project Schedule Baseline; including key milestones and project deliverables
 - • Scope & Change Control Plan
 - • Risk Management Plan & Risk Register
 - • Status Report & Monthly Reporting Templates
 - • Payment/Billing Schedule
 - Staffing: Project Director; PM; business lead; technical lead; organizational change manager; hosting and infrastructure team (supports AWS); Supplier enablement and marketplace onboarding; customer success and (ongoing) Support team.
 - Table of time commitment for each of major staff identified.
 - P2-32 *Periscope will provide on-site support including representatives from the project team (including project manager and functional analyst representation). These resources will assist in monitoring user adoption, resolving issues, and helping the Support Team defined below to resolve issues. Face-to-face contact is imperative for a successful project, however, this approach is not necessary for all stages of implementation. In fact, our experience is that projects are most successful when the project team is onsite just the right amount of time. Post go-live onsite 30 days.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Periscope Holdings

CATEGORY #(s) 2:

DATE: 1/18/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Project Implementation Methodology
 - P2-48 *plan is organized in a sequential manner, we have worked with clients to create and implement in a more agile manner than this plan's waterfall layout. For example, we often prioritize and accelerate the implementation of certain ePro modules that do not require interfaces with other systems (e.g., supplier registration, Marketplace, solicitations/ awards, etc.) or in cases where integrations will be developed and implemented in subsequent project phases. We have found this approach to be effective in creating momentum and early successes, smoothing workloads, and minimizing risk concentrations.*
 - P2-50 *business process focus is used throughout our implementation to ensure that we are focused on the underlying changes affecting end-users and on the key targets for process and management effectiveness. Our approach is to focus on improving business functions, not just implementing new software.*
 - P2-51 *Core Team Orientation, Periscope leads the State in an in-depth orientation to familiarize the core project team with Periscope ePro.*
 - *training is designed to provide core team members with hands-on experience in system navigation, baseline functions, configuration options, and common uses of the system. The objectives of this orientation are to provide a level of comfort with the system that will allow core team members to identify process improvements that can be realized as part of system implementation, to support configuration and usage decisions, and to identify gaps to be addressed. (orientation include a core team consisting of the project manager(s), future system administrators, and key stakeholders and users who will be affected directly.)*
 - *We will work with the State personnel to gather, format, load, and validate the following data:*
 - • Contract header data
 - • Contract items (descriptions, pricing, unit of measure, etc.)
 - • Organizational data including agencies, departments, users
 - • Departmental bill to/ship to addresses
 - *Periscope will also provide guidance and templates to the State for collecting approval and user data that will support the State's creation of approval paths and user rights.*
 - *Periscope supports the planning phase of user testing by providing the State with guidance and recommendations on the user testing approach, user testing scenarios, and user testing tracking templates. We highly encourage our customers to adopt a user testing approach based on functional scenarios rather than scripts.*
 - *During the user testing process, we work closely with the State to understand, investigate, and respond to testing issues.*
 - ***Needs clarification P2-56 Periscope will provide on-site support for ninety (90) days following system go-live. (P2-32 said on-site staff for 30 days.)***
 - *Team members participating in on-site support will work with the State's support resources to manage the diagnosis and response to user and technical issues. Where necessary, issues will be escalated to Periscope's dedicated support team for analysis and resolution.*
 - *Periscope testing:*
 - *The following test processes are executed on every release:*
 - • Unit Testing

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- • *Functional Testing*
 - • *Integration Testing*
 - • *Regression Testing*
 - • *Interface Testing*
 - • *Microarchitecture Testing*
 - • *Multitenancy / Multiplatform / Multidevice / Multi-browser testing*
 - • *Private / Public Cloud testing with third-party vendors*
 - • *Compliance / 508 testing*
 - • *Security / Penetration testing*
 - • *Performance / Availability and Scale testing*
- *Releases are issued quarterly, following our 20-10-10 program:*
 - *User Testing – the 20/10/10 Program*
 - • *(20) After deployment to UAT, customers are provided 20 business days to test their business processes across the newly released product features and to gain familiarity before going live.*
 - • *(10) Periscope then resolves issues specific to the release, over the course of 10 business days, deploying a patch to UAT by the end of this period.*
 - • *(10) After the patch is deployed, customers have 10 business days to confirm that the issues identified during the first 20 days in the patch have been resolved.*
 - • *Following the completion of testing, the release is promoted to Production and Training regions.*
- *Catalog Support Services – P2-56 The primary and initial focus will be on suppliers that have a statewide contract and then shift to other suppliers doing business with the state wishing to do so.*
 - *Suppliers will be categorized into distinct groups in order to provide a structured and tailored approach to enablement, based on how those suppliers currently do business with the State. Each supplier category can potentially have a different business relationship with the State, which affects the timing for outreach, how we message them, and the degree of data needed for them.*
 - *P2-59 Periscope will manage a webpage to provide information for potential, new, and existing suppliers. Throughout the initial campaign, the focus of the website will be encouraging supplier registration and participation.*
 - *Periscope will develop materials to provide suppliers with knowledge on how to complete the activities required of them in ePro. Rather than provide a formal, classroom training program, suppliers will be provided with online materials published on the Supplier website. Videos – specific supplier activities; quick ref guides.*
 - *P2-60 Ongoing support: Periscope's support team will provide ongoing support of the State's suppliers. Our supplier enablement team and our support teams combine to serve our supplier users throughout the life of the contract with the State. While suppliers are trained and able to inactivate their catalog offerings and to set parameters on which agencies they allow to use their catalogs, our supplier enablement team can also assist them in turning off published catalogs.*
- *Data Conversion Services – Pretty much the same as Data Conversion description in Functional Requirements.*
 - *Periscope will work with the State to develop a Data Migration Plan; addressing the scope, timing, and validation steps to be used in migrating in-scope data elements. We will also document data requirements for ePro conversion utilities, and develop extract*

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- plans from existing legacy systems. We will develop a plan for gathering such data, loading it into test environments, validating, and preparing for production data loads.*
- Interface/Integration Development Services – P2-62 *During the analysis phase, we also collect information on the requirements associated with any planned interfaces/integrations. Periscope technical analysts will work with the State to review the data flows between Periscope ePro and the financial system.*
 - *The State will be responsible for providing technical resources with expertise on the financial and other State systems.*
- Organizational Change Management (OCM Services)
 - *OCM approach is focused on the organizational change management elements of communication, stakeholder engagement, and resistance management. The objective is to provide key stakeholders with the information and tools needed to successfully transition to the new ways of working.*
 - *Engage early and often; use various channels to communicate messages repeatedly.*
 - *Actively manage resistance. Monitor and measure effectiveness.*
 - *ADKAR is an important element of our structured approach to managing change and we use it to:*
 - *• Develop a change management plan for your employees*
 - *• Diagnose employee resistance to change*
 - *• Develop tactics to address employee resistance to change*
 - *• Help employees' transition through the change process*
 - *We proactively track and manage feedback along the way and when resistance is encountered, we react rapidly and appropriately with resistance management techniques.*
 - *Tailoring the communication activities to the audience needs.*
 - *Change Curve Exit – Awareness; Desire; Knowledge; Ability; Reinforcement.*
 - *The purpose of the Sponsorship Roadmap is to create an actionable plan for preparing and leveraging all the sponsors to promote, gain support for, and drive adoption of the change. As early as possible, Periscope's Change Management Lead will also make recommendations to address any sponsorship gaps that must be addressed for successful adoption of the change.*
 - *Stakeholder engagement plan and Resistance management plan.*
- Training Services *Training plan: training roles; learning approach & tools; learning development methodology; state resources.*
 - *P2-71 Microlearning videos; e-learning & simulations; virtual instructor-led training; classroom training.*
 - *Blended user training approach that allocates training resources to best meet needs and contain costs. That means leveraging technology to deliver training content to many users (through a Learning Management system or other web-based programs).*
- Help Desk Services
 - *Tier 1 Level Support – Provided by Periscope or the State depending on funding model. If the State assumes Tier 1 support responsibilities, Periscope will work with the State to set up a sustainable Help Desk for Tier 1 Level Support by defining support staffing requirements, including the number of resources, identification of training requirements, and definition of roles and responsibilities.*

- *Tier 2 Level Support – Provided by Periscope. Tier 2 Support Analysts have a deep understanding of the ePro solution and are experienced in providing detailed guidance to user stakeholders*
- *Tier 3 Level Support: Periscope will provide Tier 3 Support services in accordance with the State's description. The Tier 3 Support analysts have extensive experience with Periscope's product as well as the implementation and operation in multiple client environments.*

On-Site System Stabilization Support The post-go-live support stabilization team will enable the system setup and configuration tuning as deemed appropriate by the State Stakeholder team.

Managed Services Requirements

- Solution Support
 - Periscope will maintain the performance and availability of the Solution throughout the life of agreement.
 - Anticipated changes are outlined for each release in a series of release notes which are provided to Customers. The first set of release notes are provided to participating entities twenty (20) days prior to a scheduled release being deployed in a Customer's UAT environment of our Release Management Program
- Organizational Change Management (OCM Services) – See OCM description in Implementation.
- Training Services – Separate or does it need to be incorporated in existing state LMS?
 - Sample Training plan provided.
- Catalog support services. – Same as implementation.
- Help Desk Services – 4 phase severity plan.
- Transition Out Assistance Services – See value-added from introduction.

Video Demonstration

- Demoed elements and implementations services.
- Requisition, solicitation, catalogs, POs and Invoicing. Reporting through procurement process.
- CLM contract life cycle; S2G supplier to govt.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 1)
 - Provides services “automating RFS, FRQ, SOQ, RP, General/Sub and Trade Contractor bids”.
 - SaaS platform that “electronically distributed, bid and solicited” capital improvements.
 - It is unclear whether they provide tools for organizations issues solicitations or for Suppliers trying to submit bids/responses to solicitations.
2. Previous Projects (pg. 2)
 - Projects identified did not provide details to assess.
 - While the letters of reference do demonstrate positive customer perceptions of this company and the technologies they provided they do not give real insight to the work or solutions that ProjectDog provided.
3. Subcontractors
 - No subcontractors.
4. Organizational Chart (pg. 67)
 - Project org chart provided with named staff but no details provided to assess the staff/roles.
 - Suggest exploring whether they have sufficient staffing to support multiple State implementations at the same time.
5. Litigation
 - No litigation.
 -
 -
6. Financial Viability
 - D&B report not provided.
 - 3 years financials not provided.
 - Insufficient details provided to assess.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Sysintellects (CMX)

CATEGORY #(s): 2

DATE: 9/17/21

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - U.S.-based – formed 2013
 - contract development or contract management tools. (life cycle)
2. Previous Projects
 - Local governments / state transportation.
3. Subcontractors
 - None
 -
4. Organizational Chart
 - Org chart listed certain titles for roles. More detail preferred.
 - Limited project name information (unidentified).
5. Litigation
 - None reported.
 -
 -
6. Financial Viability
 - D&B report seems incomplete.

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 1)
 - “SaaS technology and business process automation company”.
 - Provide “advisory & spend management services and eCatalog technology”.
 - Build/maintain “customized electronic catalogs”.
 - “eLink platform has managed over \$300M in transactions from over 100,000 users”
2. Previous Projects (pg. 2/3)
 - Experience shown for marketplace creation and integration with finance and other procurement systems.
 - **Northwestern University:** Developed marketplace of “local vendors”. Integrated it with procurement platform.
 - **City of Cincinnati:** Developed marketplace “for electrical supplies”. Assessment of “workflow, business rules and integration points”. Integrated with finance and Maximo systems.
 - **Premier Inc.:** “Provided perpetual license” so they could create an online marketplace.
 - **Johnson & Johnson (J&J) companies:** Integrated eLink to their Ariba procurement platform for use by 70 J&J companies with “decentralized workflow and business rules”.
 - **Northrop Grumman:** “Built a marketplace” and integrated to procurement platform.
 - **Atrium Health:** “supported a double punchout integration”... unclear what this means.
 - **PepsiCo:** “supported a double punchout integration”... unclear what this means.
 - **US Postal Service:** Implemented “office supply marketplace”.
 - **City of Evanston:** “Consulting project demonstrating” how to “increase spend with local and diverse businesses”.
 - **National Drug Source:** “Built custom marketplace” to “sell products to international hospitals”
3. Subcontractors
 - No subcontractors.
4. Organizational Chart
 - Org charge is for the company, not a project implementation. Could not assess.
 - Suggest exploring whether they have sufficient staffing to support multiple State implementations at the same time.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Provider of enterprise Procure-to-Pay (P2P) solutions.
2. Previous Projects
 - Provided 3 contacts, but only supplied contact information. No description of projects were provided. **Therefore, unable to comment or determine if projects meet category 3 (eSoftware only).**
3. Subcontractors
 - Vendor states there are no subcontractors.
4. Organizational Chart
 - Did not provide a project organization chart; however, did provide job descriptions with a list of people that would be assigned.
5. Litigation
 - **Yes, provided** chart of four litigation cases.
6. Financial Viability
 - They provided Office Depot financials.
 - On page 15 where it says on February 18, 2021, OD acquired BuyerQuest.
 - Provided DnB. **HIGH Risk** to High to moderate risk.
 - **Because this was a very recent acquisition, would have liked to see past 3 years of financials or past DnB report for BuyerQuest as I feel this is not an accurate reflection of BuyerQuest.**

Individual Evaluator Comments: Procure-to-Pay

Organization Qualifications and Experience

1. Overview of the Organization
 - Founded in 2012
 - Procure to Pay Cloud based solution
 - **Very Limited information supplied**
2. Previous Projects
 - Listed retail client but no state or county clients
 - **Stated Confidential so supplied very little information. Pointed out Maine Freedom of Access Act.**
 -
3. Subcontractors
 - Stated no subcontractors would be used
 -
 -
4. Organizational Chart
 - Supplied the company org chart with role names and some contact personnel
 - **Did not supply the state org chart, roles descriptions or responsibilities**
 -
5. Litigation
 - Supplied a list of their litigations with one of them still ongoing.
 - **One litigation should be a concern**
 -
6. Financial Viability
 - Supplied DUNS Report
 - **The report lists the company name as "Office Depot"?**
 -

.....

Individual Comments:

A. General Principal and Requirements Pages 2 - 18

1. Key Solution Functionality Elements (pages 2 – 3)

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

- Product/Solution components:
 - a. SAP Ariba Cloud-based. For eProcurement solution (Sourcing, Contracts, Procure to Pay, etc.)
- Single point of entry. Yes – Single Sign on.
- Smart routing. Yes
- Compliance. Yes
- Portal. Yes . “SAP Portal product portfolio”. Can obtain as:
 - o as “SAP Enterprise Portal (on-premise)
 - o on SAP BTP as SAP cloud Portal service
 - o (portal-like) sap Launchpad service
- Open Marketplace Environment. Yes – uses the SAP Ariba Business Network (SBN) for business-to-business network (B2B) and use Spot Buy as the catalog solution.
- Integration. Yes. With the use of integration with out-of-the-box SAP's intelligent suite along with end-to-end business process.
- Workflow. Yes. “SAP Business Workflow enables the design and execution of business processes”
- Document management. Yes. “SAP Ariba Contract Management module can track, manage, and store documents”.
- Reporting, dashboards and data visualization. Yes. “SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports.”

- Configurable. Yes. “Configurable workflows to document templates” with “the flexibility to reflect state-wide or agency-specific rule-sets and processes
- Transparency. Yes - “Vendor Portal” built on SAP’s Portal Services. “The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data.” .

2. User Experience: pages 4 - 6

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.
- **Do not cover all the characteristics in the user experience explanation, but they do offer that “The interface has been designed with special attention to:**
 - Minimizing clicks and number of steps
 - Seamless transition from mobile app to desktop with "follow-me" process from one another
 - Community help
 - Visual workflows, reminders and notifications
 - Bulk actions over many items (i.e. bulk receive purchase orders)
 - Integrations to facilitate multiple catalog search (items in the material master, inventoried items, MRO Supplies and contracted supplier catalogs), cost accounting and more”

3. Bidder Best Practices and Roadmap: pages 7 - 8

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.
- **“Quarterly Releases – Releases are delivered every quarter in February, May, August, and November each year. Individual products may be released on any or all of the quarterly dates. You should expect to receive advance communication of features and should allow time to prepare for impactful changes to your systems. “**
- **“Monthly Feature Deliveries – Major products may have an optional, no-impact release on harmonized monthly feature delivery weekends. As with the quarterly releases, each product has the option to release during any or all these windows. You should not need to prepare for or take action for the monthly feature deliveries. Changes delivered in a feature delivery should be virtually invisible to the end users. Many of our largest cloud products follow a harmonized release calendar.”**
- **Road Map is provided in an attachment.**

4. Innovations and Value-Added Features/Services: pages 9 -12

In addition to the stated requirementGES, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

- **Inline Narrative:** If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these

benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

Yes . they give some past and present innovations.

- SAP Ariba has:
 - Launched the first online catalog for procurement.
 - Developed the first software to conduct reverse auctions.
 - Created the Ariba Network, the first business network that today is the largest, most global on the planet, with more than 2 million companies transacting nearly \$1 trillion in commerce on an annual basis.
 - Went live with Ariba Discovery, the first business matching service that like Match.com, connects buyers with needs to sellers who can fulfill them.
 - Ariba Spot Buy
- SAP FieldGlass.
- SAP Ariba Supplier Risk Management.

5. Customizations/Extensions: pages 13 - 16

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- SAP Ariba Application Extension Partners and Applications
- Help deliver new and innovative applications that augment SAP Ariba solutions. List of SAP Ariba App Extensions and our Partners:
 - **Spotline Inc.** Chatbot
 - **Seal Software.** Helps organizations gain visibility, control, mitigate risk and better manage their contracts o Seal Contract Discovery and Analytics helps organizations gain visibility, control, mitigate risk and better manage their contracts in conjunction with various SAP products including SAP Ariba. Seal's AI powered engine extracts many types of data elements, and presents that data in an intuitive user experience. Seal integrates to SAP Ariba to load contracts and metadata directly into Ariba leveraging APIs. New and existing SAP Ariba contract workspaces can be sent to Seal to clean up existing content and for many high-value use cases such as regulatory, risk, M&A, audit, etc.
 - **CloudTrade** - Optimize your PDF Invoicing channel
 - ISMS Applications. Provide compliance to suppliers for a healthy supply chain
 - Keelvar Sourcing. The Keelvar Sourcing Optimizer Connector to send event data (suppliers & item master data) from SAP Ariba to Keelvar Sourcing Optimizer. Run, analyze and award complex or large events in Keelvar Sourcing Optimizer, then send awarded supplier data back to SAP Ariba Contracts.
 - AppZen AI. Real-time accounts payable fraud and non-compliance detection
 - Cordis.
 - Procure-to-Pay integration between SAP Ariba and Oracle
 - Add a layer of protection to personally identifiable information .
 - Digitize your supplier invoices into a single compliant e-invoice process o Intelligent Invoice Express (IIE) allows you to automatically capture and register purchase invoices in one application for verification, validation and efficient processing in Ariba

- Invoicing or ERP Accounts Payable, even for suppliers who are not yet on the Ariba Network (AN).
 - A prebuilt analytical dashboard for procurement using SAP Ariba and SAP ERP data
 - o Category Manager Dashboard provides valuable insights and reporting, plus the ability to integrate aggregated data across Sourcing, Contracts, Spend, Performance and Risk. It provides a status for each project to manage the category of spend, including a display of all associated business documents.
 - Combine your catalog and non-catalog requests into the e-procurement process, Intelligent Content Capture.
- o Fairmarkit.
 - Automatically get quotes for purchase requests from your existing suppliers.
 - Empower end users to competitively bid their purchases
- o Vertex - Tax calculation during purchase requisition and invoice reconciliation
 - o Vertex provides automated tax calculation during requisition & invoice reconciliation. During requisition, purchasing managers can view tax implications when approving or rejecting a purchase request and during invoice reconciliation.
- o • Accenture - Intelligent chatbot for a simplified buying experience
 - o Paula is an intelligent chatbot designed to modernize user's experience through a simple and intuitive process allowing organization to transform their tasks into value-added work..
- o • EcoVadis - Sustainability ratings for procurement - Manage supplier risk and performance.
- o • D&B- Proactively identify vendor financial stress to mitigate supply chain disruption.
- o • APOS Systems - Live mode data connectivity for SAP Ariba
 - o Live Data Gateway for SAP Ariba provides virtualized data connectivity to SAP Ariba data from SAP Analytics Cloud. Live Data Gateway can also serve data to SAP Data Warehouse Cloud, SAP HANA, and many others.
- o • Nitor Relish Xbridge – Seamless SAP Ariba & Qualtrics XM for suppliers integration.
- o Nitor Relish DATA ASSURE - Fully automatic supplier data validation in one step, without human interaction.
- o • iCertis AI - AI from Icertis turns contracts into live documents connected to your business
 - o Icertis is enabling SAP users to address previously intractable contract challenges. This includes digitizing legacy contracts and importing third-party contracts at scale, analyzing past negotiation history to gain insights for improvement, and deep data visualization.
- o • Globality - Seamlessly Integrate Globality's Platform with SAP Fieldglass
 - o Globality's AI Platform transforms sourcing of high-value, complex services by automating the demand creation, supplier identification, tendering, proposal evaluation, and SoW creation process through a self-serve, consumer-like solution. SoW data are automatically sent to SAP Fieldglass

6. Alternative Funding Models: Page 17

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

The do not offer any alternative funding models, but do recommend SAP Fieldglass app.

7. Contract Transition and Flexibility: Page 18

- Carahsoft quoted on page 18 - *“Carahsoft has experience in all aspects of Master Aggregator Program and Contract Management. From initial response to the solicitation, negotiation of the offer with the government, contract award, ongoing schedule management, renegotiation and renewal, Carahsoft will handle all aspects of contract management. Currently, Carahsoft manages 24 Federal Contracts and 48 State and Local Contracts. Additional contracts are regularly being pursued and added. Carahsoft will leverage the program knowledge and best practices gained from this experience to provide streamlined support and superior program management for the State of Maine”*

B. **Functional Requirements:** pages 19 -

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The electronic procurement solution **must** be cloud-based with a Software as a Service (SaaS) delivery model

1. **General Functionality.** Tab 2, GEN-1 through GEN-40. Currently the following applications are widely deployed and support the procurement functions of Ariba customers:

- SAP Ariba Buying& Invoicing
- SAP Ariba Sourcing
- SAP Ariba Contracts
- SAP Ariba Supplier Lifecycle & Performance Management
- SAP Ariba Network
- SAP Fieldglass

- Uses Native Integration for integration of purchase requests.
- Supports all types of files and mentions a “really robust search engine” in many of the comments.
- “A super user will be granted broader access to the solution by assigning multiple roles” to access functionality across the solution and “provide administration capabilities across the solution or for specific functional areas”. Except for Guided Buying.
- #3 is marked as “partial”, which is not a choice in the codes. Based on the notes it looks like they do not have the ability to integrate to post on the State’s procurement website.
- #38 is marked N/A, which is not a choice in the codes. After reading the reply – it seems the answer is “N” as they do not comply with this.
- For most of the items in 1 – 7 GPE offers use of their system, but these questions are about being able
- Many of the Comments state “Standard Functionality” (there are 22 of these). As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.

2. **Supplier Portal.** Tab 3, SPR-1 through SPR-23.

- a. 1 – INT.
- b. 2 - Medium

- Ariba seems to have a good handle on the Supplier portal side and a understanding of what the suppliers need.
- SAP Ariba Business Network (SBN) for the supplier portal includes:
 - Ariba Business Network (aka Ariba Network, Ariba Supplier Network)
 - Ariba “Supplier Enablement Services” for the Network are included
 - Supplier Portal functionality across all customers, not specific to a State/Entity using Ariba
- #3 states suppliers can integrate their financial systems to Ariba Network. While the State will want supplier spend reports, I am not certain about connecting to the system – for security reasons the State would want to look into this.
- #7, 8, where allow supplier to access solicitations and to submit proposals... IBM responds that State APIs are available to post but suppliers will need to be directed to an external State website. This is concerning – as this is a requirement of the eprocurement system.

3. **Supplier Enablement Management Workstream.** Tab 3, VDR-1 through VDR-43.

- a. 9 – INT.
- b. 9 - Medium

- SAP Supplier Enablement Team will “design and develop the most effective enablement strategy” based on their “profile, PO and invoice volume, and spend”. Segment the “State’s vendor master data to effectively target/onboard suppliers in tiered waves”.
 - Provides IRS TIN/Name “verification capabilities”
 - For the Ariba Network, offers suppliers “user guides, FAQs, technical documentation, and free online seminars”.
 - Can have “account specific information” via a “supplier information portal embedded in the Ariba Network”.
 - Suppliers are able to self register and meet requirements 1 – 10
 - It’s not clear if the system accepts commodity codes, as the answers given to the questions are not straightforward.
 - #18 - #27 are marked as “INT” and the State asks that the verification of the supplier items be done. IBM’s answer is they can validate the format, I am unsure if this will meet the requirement.
4. **Buyer Portal.** Tab 3, BPRT-1 through BPRT-15.
- a. 1 – INT.
 - The answer to #11 is of concern. The State can download any account information (data) as long as subscribed, but only within the functionality of their application. It doesn’t answer the question if we can get the minimum items that are asked for in the requirement.
5. **Need Identification.** Tab 3, NEED-1 through NEED-7.
- The CF item does not seem to pose a problem. Other items seem to be standard within the software.
6. **Request through Pay Workstream.** Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11.
- PRD 4 – Doesn’t seem to answer the Role question. They answer it with groups, but not by role.
 - PRD 15 and 16, WRK12, PO11 and 12 – Limit attachments to 100MB size limit, but can support any type of attachment.
 - PRD49 – Ariba uses UNSPSC (United Nations Standard Products and Services Code) – it seems much configuration will need to be done to work in State’s chart of accounts.
 - PRD59 – is essentially **not answered**. Gives “Standard Functionality supported and configurable”.
 - WRK28 – only one user in Que at a time.
 - PC 6 – Comment that it’s not supported; however, they list as “Available”.
7. **Catalog Capability** - Tab 3, CAT-1 through CAT-40.
- a. 1 – Not Available
 - #3 - 3 channels that catalogs can be updated from: (1) Loaded directly by customer via CSV or CIF format, (2) Loaded by us acting as the catalog management service to the customer, (3) Self-loaded by the supplier via the Ariba Network.
 - #6 and 7. Catalogs are limited to 5,000 catalogs and there is a limit to 500,000 items in a catalog.
 - #19 – To enter Items of negative values is not an option.
8. **Sourcing/Bid Management Workstream.** Tab 3, SRC-1 through SRC-151.
- #2 – System has several solicitation templates to use; however, most all State’s will want to use their AG approved templates and forms. Some such as the RFI are delivered out of the box, unsure if can configure.
 - #36, 52, 63, 70 – limited to 100MB
9. **Contract Management.** Tab 3, CNT-1 through CNT-88.
- #45 – **CLARIFY** – eVA’s public posting site? Guessing Virginia’s, but this is a cooperative Contract. Maybe an error in completing the proposal?
 - #52 through #62 and #64 – Carahsoft doesn’t support posting of various items to State’s public Contracts website and points to using a service Partner.
10. **Vendor Performance** Tab 3, VPE-1 through VPE-25.

- VPE 21 – **CLARIFY** that the system provides this requirement as IBM says it does, because they comment that the best way is through scorecards, which in my mind is paper or a simple excel form. Maybe scorecards is a name of one of their forms. **If not, this does not meet the requirement.**
 - VPE 25 – **File size limit 100MB per attachment. – does not meet requirement.**
11. **Purchasing/Data Analytics** Tab 3, PDA-1 through PDA-37.
- PDA 1 – Ariba solutions comes with 250 pre-packaged reports.

C. **Technical Requirements:** pages 52 - 76

1. **Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*

Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.
 - SAP offers a 99.5% system availability percentage during each month for production versions, with exception of **regularly scheduled and emergency maintenance. CLARIFY** – How often is regular maintenance and during what hours and days. Additionally, how often in the past has SAP had emergency maintenance (example of how many times in one year?).
2. **Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
 - Page 45. They state they will provide accessibility to customers upon request. **It seems the software does not come with accessibility requirements.**
3. **Audit Trail and History** RTM: Tab 4, TECH-1 through TECH-5.
 - TECH 3 – 5 are “INT”; however, they repeat TECH 1 and do not explain/detail out how or why integration or interface is needed.
4. **Browsers Supported**
 - The general web browsers are supported (Microsoft Internet Explorer, M Edge, M Edge Chromium, G Chrome, Firefox, and Safari). Microsoft Internet Explorer compatibility mode is not supported. No concerns.
5. **User Accounts and Administration** RTM: Tab 4, TECH-6 through TECH-20.
 - TECH 12 – Does not meet requirement.
6. **User Authentication** RTM: Tab 4, TECH-21 through TECH-25.
7. **Federated Identity Management**
 - Refers to a link. Page 50
8. **Data Conversion** RTM: Tab 4, TECH-26 through TECH-34.
 - SAP plans to use “SAP’s Activate Methodology”
 - Integration of legacy systems are extra cost 10
9. **Interface and Integration** RTM: Tab 4, TECH-35 through TECH-60.
 - “integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.”
 - Real-time and/or batch integration
 - HTTPS using CSV interface
 - SAP Web services
 - REST APIs
10. **Office Automation Integration**
 - Yes, they integrate with Microsoft products listed and others.
11. **Mobile Device Support** RTM: Tab 4, TECH-61.
 - Yes it can be accessed Mobile
12. **Mobile Applications** - TECH 62.

- Nothing to add here..
- 13. Data Ownership and Access**
 - State owns the data.
- 14. Date Retention, Archive and Purge Considerations** RTM: Tab 4, TECH-63.
 - Data retention is governed by the active contract.
- 15. Disaster Recovery Plan**
 - Meets requirements.
- 16. Solution Environments** RTM: Tab 4, TECH-64 through TECH-67.
 - State would receive two environments by default: Test and Production.
 - Additional environments (i.e. Development, Quality Control/User Acceptance, Training) are additional charges.
- 17. Solution Technical Architecture**
 - Diagram provided. No narrative. Does not meet the narrative requirement. – page 71
- 18. Solution Network Architecture**
 - Diagram on page 72.
 - SAP Ariba solutions are offered and delivered in a true subscription-based model
- 19. System Development Methodology**
 - Based upon Agile Scrum Development methodology.
- 20. Service Level Agreement**
 - Page 76 - Refer us to the SLA pdf. Contains one page. Would need to be reviewed in negotiations if contract awarded.

D. Security Requirements: pages 77 - 99

- 1. Cloud Security Alliance (CSA) Compliance**
 - Page 77. Referred to attachment CAIQ – completed.
- 2. Security and Privacy Controls**
 - We addressed this in SOC Compliance, we officially not certified for NIST 800-53, we use SOC guidelines.
- 3. Security Certifications** – nothing to add.
- 4. Annual Security Plan** – nothing to add.
- 5. Secure Application and Network Environment**– nothing to add.
- 6. Secure Application and Network Access** – Tab 5, SEC-1 through SEC-6.
 - Mentions backup policies.
- 7. Data Security** – nothing to add.
- 8. Personally Identifiable Information Protection** – nothing to add.
- 9. Security/Privacy Issue Occurrence** – nothing to add.
- 10. PII Data Actual/Attempted Access or Disclosure** – nothing to add.
- 11. Security Breach Reporting** – nothing to add.

E. Implementation Services Requirements:

- N/A

F. Managed Services Requirements:

- N/A

G. Other Available Services:

- N/A

H. Video Demonstrations: page100

- 44 minute demo.
- Some areas the author kept saying they would show more at the demo. Which is confusing since this is the demo.
- Looks very user friendly for Catalog purchasing of items.

Individual SME Comments:

SAP Ariba

General Principal and Requirements

Key Solution Functionality Elements Single point of entry, smart routing that is configurable, product compliance under SAP S/4HANA. SAP portal product portfolio, open marketplace environment under SAP our Reba Business Network document management, reporting, dashboards and data visualization, User Experience Guided buying capabilities designed 4 ergonomic user experience and minimal user training, minimizing clicks, transition from mobile app to desktop with follow me process , community help, visual workflows , reminders and notifications bulk actions integrations to facilitate multiple catalog search.

Bidder Best Practices and Roadmap Quarterly releases February, may, August and November. Monthly feature deliveries. SAP Road Maps support the journey to SAP's future product portfolio and the Intelligent Enterprise. SAP Ariba offers The SAP® Ariba® Best Practices Center service provides business commerce professionals with access to our process expertise to help ensure greater adoption and sustainable results from your SAP Ariba solutions. SAP Ariba Best Practices Center team members leverage their knowledge of best practices within each solution area to provide strategic advice, allowing you to make the most effective use of all features of your SAP Ariba solutions:

- ☐ Best Practice Center Benefits:
- ☐ Best Practices Center service provides the following benefits
- ☐ Flexible, as-needed support tailored to your specific needs and projects
- ☐ Single, named point of contact who understands your unique situation
- ☐ Access to a world-leading commerce process and solution expertise and experience
- ☐ Proven processes and best practices for nearly all SAP Ariba solutions
- ☐ Faster ROI from software initiatives

The primary focus of SAP Ariba Best Practices Center is the use of methodologies that advance the implementation and adoption of SAP Ariba solutions, while enabling you to build internal skills and capabilities. With SAP Ariba Best Practices Center, you have access to solutions experts who have business backgrounds and can offer strategic guidance. Our remote support model is designed to be flexible so you can get the support you need, when you need it. Tap into the expertise of our experienced consultants to help you to get the most out of SAP Ariba solutions.

Innovations and Value-Added Features/Services

- ☐ Launched the first online catalog for procurement.
- ☐ Developed the first software to conduct reverse auctions.
- ☐ Created the Ariba Network, the first business network that today is the largest, most global on the planet, with more than 2 million companies transacting nearly \$1 trillion in commerce on an annual basis.
- ☐ Went live with Ariba Discovery, the first business matching service that like Match.com, connects buyers with needs to sellers who can fulfill them.

☐ Rolled out Ariba Spot Buy, the first solution to combine the technology, content and expertise needed to gain visibility into unplanned buys with workflow capabilities to get them under control

☐ SAP Fieldglass

☐ SAP Ariba Supplier Risk Management

Customizations/Extensions List of SAP arriba app extensions; spot line, seal software, cloud trade, I SMS applications, kill the sourcing, app Zen AI, kordys, fair market, vertex, Accenture, echo vedis, D&B, APOS systems, niter relish Xbridge, nitor relish data assure, iCertis AI, Globality.

Alternative Funding Models Pay as you go

Contract Transition and Flexibility not answered...list of previous contracts/experience

Functional Requirements

General Functionality – **RTM not completed**

Supplier Portal – 1 INT w/med LOE, 22 OOBX

Supplier Enablement/Management 9 INT w/med LOE, and 33 OOBX.

Buyer Portal 1- INT w/low LOE, 14 OOBX.

Need Identification 7 OOBX

Request through Pay 62 OOBX – **Purch Req**, 28 OOBX for **Wrkflw mgt**, 29 OOBX for **PO gen and mgt**, 21 OOBX for **Pcard**, 21 OOBX for **Receiving**, 11 OOBX for **invoicing**.

Catalog Capability 1 N/A and 39 OOBX

Sourcing/Bid Management 151 OOBX

Contract Management 88 OOBX

Vendor Performance 25 OOBX

Purchasing/Data Analytics 37 OOBX

Technical Requirements

Availability 99.5% system availability percentage during each month for production versions, with the exception of regularly scheduled and emergency maintenance.

Accessibility Requirements SAP's product teams target Web Content Accessibility Guidelines Level A and AA and EN 301 549.

Audit Trail and History specific logging takes place, specifics not provided, customers are responsible for monitoring the proper entry of data to the solution and reviewing reports generated by the system.

Browsers Supported Apple Safari (64-bit)Google Chrome (64-bit)Microsoft Edge (32-bit)Mozilla Firefox (64-bit)Microsoft Internet Explorer (32-bit) until December 31, 2021Note: Compatibility mode isn't supported

User Accounts and Administration The solution also provides a single point of integration and administration for users and user profiles, organizations, groups and group memberships, roles and permission mappings. This common data is shared and synchronized across modules automatically. The User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files.

User Authentication Users can log in using two possible authentication methods:

☐ Regular user authentication. Users have configured user names and passwords that they manually enter on the login page.

☐ Single Sign-On. Users log into their corporate network, which automatically logs them in to their SAP Ariba applications when needed. SSO with corporate authentication requires your network administrator to enable communication between your user authentication system and the SAP Ariba applications.

Customers may activate 2 factor authentications if they use SAML based authentication or ADFS for accessing the SAP Ariba Cloud Services. The customer assigns one or more Customer Authorized Administrators to oversee activity within the system. The Customer Authorized Administrator(s) assigns

and maintains login ID's and user permissions and can view and manage administrative tasks within the system. A password complexity scheme is in place and mandates case-sensitivity between 8 and 16 characters in length. Passwords can include any Latin characters and punctuation marks and must include at least one numeral between the first and last character. They must also include at least one letter.

Federated Identity Management– see user authentication above

Data Conversion leverage SAP's Activate Methodology.

Interface and Integration SAP Ariba applications integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems. SAP Ariba supports standard and secure methods of integration that to support Real time and/or Batch integration. These standard integration options across our solution portfolio are:

- a)HTTPS using a CSV interface (Batch integration, and depending on the data volume this can be scheduled to run frequently to achieve near real-time integration)
- b)SOAP Web services that use an XML payload (Real-time integration suitable for transactional data)
- c)REST APIs (supports both synchronous & asynchronous calls)

Office Automation Integration SAP Ariba supports a wide array of document types and formats as attachments or documents stored within a workspace. For examples: Word, Excel, and PowerPoint. Using User Interface, Using CSV, customer with proper access can import data into Ariba or Export out of Ariba.

Mobile Device Support Ariba Mobile app includes the following features:

☐ Shopping Cart: Allows you to create requisitions from the Ariba Mobile app on your mobile device. The Shopping Cart includes the following features:

oCatalog Search. Users can search their organization's catalog and order items from it.

oSpot Buy Purchases. Users who are enabled to use the Ariba Network Spot Buy feature see search results from eBay and can purchase directly from eBay sellers.

☐ Requisition Approval: Approvers can quickly approve or deny requisitions. Approvers can view requisition details and history, view attachments, add comments, and receive reminder nudges from the requester.

☐ Requisition Tracking: Users can track the requisitions they submitted. They can view requisition details and history, view the approval flow, and nudge the current approver. They can also withdraw requisitions.

☐ Viewing Requisitions as a Watcher: Users who are watchers in an approval flow can monitor requisitions. Watchers can view requisition details and history, view attachments, add comments, and nudge the current approver.

☐ Viewing Previous Approvals and Denials: Approvers can review the details and attachments of requisitions they recently approved or denied.

☐ Ariba Exchange User Community Access: Users can read and comment on articles on the Ariba Exchange User Community.

☐ Touch ID Support for iOS Devices: If your iOS device has Apple Touch ID capability, and you have enabled it on your device, you can use it to access the Ariba Mobile app instead of using a PIN

☐ Sending the Supplier 360° Report to an iOS Device: If you have an Apple iOS device, you can send the Supplier 360° report to the Ariba Mobile app, allowing you to view a PDF version of the report on your mobile device.

☐ Pinning Requisitions: While viewing a requisition in the Ariba Mobile app, an approver can "pin" the document for later viewing in their Ariba Procurement Solution. Pinned requisitions are added to the Pinned Items action tile on the dashboard of the Ariba Procurement Solution

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Mobile Applications SAP Ariba mobile app supports the following operating systems and devices:

- iOS versions 7.x and later on:

- o iPad 2, Air, mini, mini with retina

- o iPhone 4, 4s, 5, 5s, 5c, 6, 6 Plus, 6s, 6s Plus With iOS, the app works best when viewed on iPhone 5s, 5c, 6, 6 Plus, 6s, or 6s Plus; iPad Air.

- Android KitKat 4.4 and Lollipop 5.0 on:

- o Samsung Galaxy S4, S5, and S6 o Samsung Galaxy Tab S, Tab 2 o Samsung Galaxy Note 2 (KitKat 4.4), 3, 4, 5 With Android, the app works best when used on Samsung Galaxy S5 and S6 devices.

The SAP Ariba mobile app is not certified with mobile device management (MDM) platforms.

- The Touch ID Support feature is only supported on iOS versions 7.x and later on the following devices: o iPad Air 2, Mini 3 o iPhone 5s, 6, 6 Plus, 6s, 6s Plus Security features in the SAP Ariba mobile app help protect your data and the communication between the app and the SAP Ariba. • App activation code: Users receive a code on their device and enter it in the SAP Ariba solution. The code allows the SAP Ariba mobile app to communicate with the SAP Ariba solution and access solution data. • App pin: Users create a 6-digit PIN that they use to log in to the SAP Ariba mobile app. • Touch ID support for iOS devices: allows users with iOS devices to use Apple Touch ID instead of a PIN to access the SAP Ariba mobile app. • App timeout: By default, the user is logged out of the app after 5 minutes of inactivity. The length of the timeout is configurable by SAP Ariba via a site parameter. • Data encryption: All data is encrypted, including data transmitted over the network and data stored on the device (for offline access). o All communication between the device and the server is over TLS 1.2. o Data stored on mobile devices is encrypted using AES 256. • Certificate pinning: The mobile app (a client) is hard-wired with the SAP Ariba servers' certificate digest to ensure that the app is communicating only with the correct servers. • Jailbreak and rooting detection: You can have SAP Ariba configure a parameter on your site to detect jailbreaking or rooting, forcing the app to close if either state is detected. Jailbreaking and rooting are ways of removing restrictions put in place by device manufacturers. • Data removal from deactivated devices: SAP Ariba solution data stored on the device is automatically removed from the device when the device is deactivated.

Data Ownership and Access The customer owns the data; they can extract the data at point of time during the throughout subscription. We provide various tools to download the data. For example: User Interface (Import CSV), API's.

Date Retention, Archive and Purge Considerations We retain customer data for the life of the subscription and in accordance with the Ariba Data Policy. Data retention is governed by the active contract. We retain your data on the service for the duration of the subscription term and any subsequent renewal term, subject to legal requirements imposed on auction site operators. During this time, you may download your data using the functionality within the application, in order to meet your specific retention requirements.

Disaster Recovery SAP Ariba solutions are deployed in regional data center pairs so, in the event of a failover, the data will remain within region. Failover from one site to another has a design goal for its recovery time objective (RTO) to not exceed four hours. The design goal for the recovery point objective (RPO) is five minutes. Disaster recovery options are included for all cloud services for SAP Ariba solutions. In the event of a failover to the secondary data center, no customer changes are required, as all URLs that customers use to reach the applications will continue to work. SAP will notify customers through e-mail in the event of unplanned downtime. **Internally**, SAP Ariba solutions use a **documented system recovery plan** that outlines the approach and steps for recovering the applications. This document defines roles and responsibilities in the event of disaster: **SAP tests power outage backup**

DEPARTMENT/STATE: Maine

scenarios and the disaster recovery plan on a periodic basis to ensure it is up-to-date, successful, and effective.

Solution Environments **Production and test \$ for more**

Solution Technical Architecture **Architecture diagram on page 71**

Solution Network Architecture **The system is powered by high-performance servers and utilizes a network infrastructure designed for scalability, reliability, and security. The SAP Ariba Operations team is constantly monitoring and maintaining the systems. Redundant load balancing and security firewall devices are inserted between each tier. Diagram of the network architecture including network configuration is on page 72. We maintain the main hardware and software components used to power the system including:**

a)Web servers

b)Application servers

c)Database servers

d)NFS and Block storage subsystems

e)Load balancers

f)Switches and routers

g)Firewalls

h)Internet connections

SAP Ariba solution is available only as a SaaS multi-tenant model hosted by us.

System Development Methodology Ariba leverages a Secure Software Development cycle (Secure SDC) that is aligned with ISO 27034 principles. This includes:

☐ **Secure code (OWASP Top Ten) training to engineers**

☐ **Code review by peers before build cycles**

☐ **Static and dynamic code analysis, with load testing for resiliency**

☐ **Reviews and approvals at multiple phases for meeting security criteria prior to release to production.**

Service Level Agreement see SLA agreement

Security Requirements

Cloud Security Alliance (CSA) Compliance CAIQ completed

Security and Privacy Controls addressed in SOC Compliance, we officially not certified for NIST 800-53.

SAP Ariba is audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 every six months. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II, SOC 2 Type II.

Security Certifications See SOC above. Fed ramp. ISO 27034. attained PCI (Payment Card Industry) - DSS (Data Security Standard) certification as a Level 1 Service Provider and compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program.

Annual security plan Annual security plan are internal facing documents

Secure Application and Network Environment Boundary Protection: SAP Ariba provides 24/7 monitoring from a SOC as part of the service. application also generates logs and alerts when exceptions occur. firewall separates the SAP Ariba corporate network from SAP Ariba cloud solution infrastructure.

Authentication: SAP users are required to log on via jump hosts to the cloud customer systems using 2-factor authentication (user name, password and a token) compliant to SAP security policies.

Unauthorized Access: All devices are under continuous monitoring, comparing their running configuration to an approved stored configuration. Maintenance Tools: Equipment removal is required to be managed using both an internal ticketing system as well as a data center ticketing system for process control, audit and tracking purposes. Business Continuity Plan: SAP Ariba's disaster recovery plan is updated at least

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 1/3/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

annually. The company uses a variety of techniques to provide assurance that the plan will operate in real life. These include table-top testing of various scenarios (discussing the business recovery arrangements using example interruptions), simulations (particularly for training people in their post-incident/crisis management roles), technical recovery testing (so information systems can be restored effectively), testing recovery at an alternate site (running business processes in parallel with recovery operations away from the main site), tests of supplier facilities and services (so that externally provided services and products will meet the contracted commitment) and complete rehearsals (testing that our personnel, equipment, facilities, and processes can cope with interruptions). Portable media storage is not permitted in the production environment.

Secure Application and Network Access Both data at rest as well as data in transit are encrypted. We encrypt sensitive data elements stored in the databases using minimum 256-bit AES (Advanced Encryption Standard) encryption. AES is the federal standard for data encryption. Encryption technology is also applied for the client connection to the Web site (Transport Layer Security (TLS) min v1.2 and preferred v1.2) and to the hosted application passwords in storage. Customer user passwords are one way hashed using SHA256 and salted with random data. Limited SAP Ariba Operations personnel have data query access and monitoring rights for the SAP Ariba hosting program. Both data at rest as well as data in transit are encrypted. We encrypt sensitive data elements stored in the databases using minimum 256-bit AES (Advanced Encryption Standard) encryption. AES is the federal standard for data encryption. Encryption technology is also applied for the client connection to the Web site (Transport Layer Security (TLS) min v1.2 and preferred v1.2) and to the hosted application passwords in storage. Customer user passwords are one way hashed using SHA256 and salted with random data. Limited SAP Ariba Operations personnel have data query access and monitoring rights for the SAP Ariba hosting program. Security Incident and Event Logging SAP Ariba solutions implements a dedicated appliance to provide security analytics and to meet compliance requirements with SIEM in production environments. A SIEM is classified as a “**security information and event management**” utility. employment subject to background checks and reference validation

Data Security All customer data received, processed and stored within the solution is classified as highly confidential and is subject to confidentiality terms based upon our agreements with customers. We access customer information only to debug based on customer request. Access to information must be based on business requirement using the principle of least privilege. Employees and external parties must have access only to the information they require to carry out their work and are responsible for protecting information and assets to prevent unauthorized access, disclosure, modification, removal, destruction, and improper use. Access granted to SAP information systems from internal and external parties requires the implementation of authorization and authentication access controls that are proportional to the associated risk.

Personally Identifiable Information Protection not designed to handle HIPAA data. Our solutions are designed Business to business transaction, and we do not support storing HIPAA/PII/Personal data.

Security/Privacy Issue Occurrence We can provide a general overview of our incident response procedures but our full documentation is confidential. Depending on the nature of the incident and impact to customer(s), security incidents are not formally closed by the board until all affected customers are made aware of the incident and appropriate measures to remediate the initial threat are formally communicated. **No times given**

EVALUATOR NAME: Michael Bacu

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- SAP provider
- Lists services out of scope or more inclined to a full solution
- Carahsoft is a reseller, validate of liability terms
- SAP Ariba cloud solution

2. Previous Projects

- DC is a large project, still in process, no description of realized success
- California DHSS is a partial state implementation of a single agency
- City of San Diego is also a smaller in scale compared to a statewide project

3. Subcontractors

- Question if SAP should be a subcontractor
- Would read agreement terms closely to understand the relationship
-

4. Organizational Chart

- SAP executive board provided, nor clear is Carahsoft is separate
- Unspecific on how a team or organization would support NASPO
-

5. Litigation

- Non in last 5 years
-
-

6. Financial Viability

- Brief financial response
- Provided SAP 2021 half-year and other reporting
-

Individual SME Comments:

General Principal and Requirements

- SAP Ariba Solution
- Highly configurable workflow
- Document management
- Reporting
- Guided Buying capability
- Each module has configurable dashboard
- Mobile app
- Quarterly releases
- Monthly feature deliveries
- Many app extensions and partners

Functional Requirements

- Procurement Functions
 - —SAP Ariba Buying& Invoicing
 - —SAP Ariba Sourcing
 - —SAP Ariba Contracts
 - —SAP Ariba Supplier Lifecycle & Performance Management
 - —SAP Ariba Network
 - SAP Fieldglass
- Single point of entry for suppliers
- World's largest B2B trading platform
- Role based access and functionality
- Small fonts
- Supplier enablement
- Need Identification appears intrusive
- SAP Ariba catalog
- Spot Buy catalog
- Vendor performance management
- Supplier surveys
- Reports prepackaged and ad hoc

Technical Requirements

- Audit logs

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Cat 3 eSoftware, Stage 2 Proposed Services

DATE: 1/14/2022

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

- Can import data for population from existing systems
- 2 factor authentication
- Data integration real time or batch
- Mobile app
- Mobile app system support seems dated
- Only two environments provided, additional cost for another

Security Requirements

- Complies with industry standards
- Does not handle HIPAA data
- Data encrypted at rest and transit
- Limited access to production environment

Implementation Services Requirements

- No proposal response provided
- Implemented by SAP?

Managed Services Requirements

- No proposal response provided
- Managed Services provided by SAP?

Video Demonstrations

- POSITIVE – SAP is large solution end to end
- QUESTIONING – Is guided buying only view available to buyers, would not like to be overly restrictive
- QUESTIONING – Is there a training session available for new users, solution appears complex
- POSITIVE Dashboard seems beneficial
- QUESTIONING – Data appears a great advantage to power users, can be overwhelming to casual users.

Individual SME Comments:

SAP Ariba is the solution

General Principal and Requirements

Key Solution Functionality Elements

2-19	Single Point of Entry -	
	Smart routing – SAP Ariba includes a highly configurable workflow engine	
	Compliance – Compliance is enforced at each step of the product lifecycle with our product compliance software. With SAP S/4HANA for product compliance, you can manage regulations, track registrations and substance volumes, classify products, and create compliance documents, as well as package, transport, and store hazardous materials properly with accurate labeling.	
	Portal – The SAP Portal product portfolio provides employees, customers and partners an intuitive, single point of access to applications, content and analytics for cloud and on-premise scenarios via a flexible UI integration.	
	Open marketplace environment – The SAP Ariba Business Network (SBN) is the world's largest B2B network, a dynamic, digital marketplace that facilitates trillions of dollars in annual business commerce between more than 3.6 million connected companies	
	Buy: Approved purchase requisitions trigger checkout, secure payment, and shipment of goods Integration –	
	Workflow – SAP Business Workflow enables the design and execution of business processes within SAP application systems: Workflow processes are delivered as content across the SAP Ariba modules.	
	highly configurable workflow engine

	Document management – SAP Ariba Contract Management module can track, manage, and store documents that can help digitize the contracting process. In addition, past versions of contracts and related documents are also stored within the application; along with tracking of changes and other audit trail capabilities.	
	Reporting, dashboards and data visualization – SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports.	
	Configurable – From configurable workflows to document templates t	

User Experience

Bidder Best Practices and Roadmap

4-6	The solution follows the SAP latest principles of design to deliver a fast and ergonomic user experience minimizing end user training. In context help and intuitive process flows help users achieve tasks quickly. The interface has been designed with special attention to: • Minimizing clicks and number of steps • Seamless transition from mobile app to desktop with "follow-me" process from one another • Community help • Visual workflows, reminders and notifications • Bulk actions over many items (i.e. bulk receive purchase orders) • Integrations to facilitate multiple catalog search (items in the material master, inventoried items, MRO Supplies and contracted supplier catalogs), cost accounting and more	
-----	--	--

Innovations and Value-Added Features/Services

9-12	Below we are presenting three tools that we believe will bring tremendous value to Maine: • SAP Fieldglass • SAP Ariba Supplier Risk Management Lever People Potential challenges • Do we have the right resource for the job? • Can we leverage same resources across state agencies? • Do I know who has access to what systems or locations? • Do resources have the right job credentials, or training to perform the job they were hired to do? • Should I hire a contingent worker or perform a service via SOW? Where are the savings opportunities for contingent workforce or procurement services? Solution Benefits SAP Fieldglass is a cloud-based, open vendor management system (VMS) that helps organizations find, engage and manage their external workforce and services procurement resources – from temporary staff to Statement of

	<p>Work-based consultants to freelance workers, gig workers, contractors and more. The only solution in the industry that offers a direct candidate website within our core application enabling contingent workers to apply directly for temporary roles. • External Talent Management SAP Fieldglass External Talent Management automates the entire process of procuring and managing flexible labor, from requisition all the way through invoice and payment. With visibility into this key labor segment, organizations SOLICITATION # 202102021 11 Lever People can reduce costs through stronger enforcement of program budgets, while strengthening compliance, improving worker quality and supply, and increasing program efficiencies. The open platform supports any program model including those managed inhouse, or through one or more Managed Service Providers (MSPs) on- or offsite. • Services Procurement SAP Fieldglass Services Procurement simplifies how external services providers are engaged to help gain control of services spend that is outside the scope of traditional contingent labor, measure the quality of services being delivered, and ensure compliance to safety and security policies. SAP Fieldglass Services Procurement can handle the management of a variety of Statement of Work (SOW) engagements including projects, offshore/offsite, independent contractors, managed programs, business services and Business Process Outsourcing (BPO) models • Worker Profile Management SAP Fieldglass Worker Profile Management enables companies to track and manage all non-traditional workers who are not tied to a job posting or Statement of Work (SOW). With Worker Profile Management, companies can ensure greater external workforce security and compliance, while enhancing visibility and efficiency.</p>

RTM Functional Req'ts tab responses the same except for the following req'ts.

SPR: 9, 10, 18, 19

SRC: 66, 67, 76-80, 90, 138, 147 (most are related to public posting)

CNT: 45, 51-62 & 64 (all related to public posting)

Individual SME Comments: SAP Ariba is the solution name

General Principal and Requirements

Key Solution Functionality Elements – PDF Page 4

- Guided Buying is the single point of entry
- Smart routing is the workflow engine
- Supplied compliance information
- Offers various portal deployment options
- Has open marketplace functionality – Spot Buy catalog solution
- Offers workflow, document management and reporting dashboards and data visualization options

User Experience - PDF Page 6

- Guiding Buying capabilities with the interface designed for those areas listed on PDF Page 6
- Each module has configurable Dashboards. Example on PDF Page 7
- Provide mobile capabilities. PDF Page 8
-

Bidder Best Practices and Roadmap - PDF Page 9

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Offers quarterly releases and monthly feature delivers.
- Want more input from their customer base
- Offer link to corporate website to explore roadmaps
- Offers the SAP Ariba Best Practices Center

Innovations and Value-Added Features/Services - PDF Page 11

- Listed some functionalities that SAP Ariba has on PDF Page 11
- Moving away from customized systems to configurable systems. PDF Page 11
- Offers SAP APIs
- Offered new tools that could bring extra value. SAP Fieldglass, and SAP Ariba Supplier Risk Management. Provided links to a video of these 2 solutions

Customizations/Extensions - PDF Page 15

- Use SAP Ariba Application Extension Partners PDF Page 15 and 16
- Provide list and explanations of each of these partners on PDF Page 16, 17, and 18
- **Are these offered at any additional cost?**

Alternative Funding Models - PDF Page 19

- Offered SAP Fieldglass which allows agencies to strengthen their external workforce

Contract Transition and Flexibility - PDF Page 20

- I don't believe that this supplier understood what we were asking here. The response stated contracts that they manage or currently hold with NASPO?
- Did mention experience in negotiating and administering contracts.

Functional Requirements - PDF Page 21

General Functionality - PDF Page 21

- Provided a figure showing the model of workstreams on PDF Page 21
- SAP Ariba Solutions figure supplied on PDF Page 22
- Offered the following applications - SAP Ariba Buying & Invoicing, Sourcing, Contracts, Supplier Lifecycle & Performance Management, Ariba Network and SAP Fieldglass
- Offers Guided Buying solution along with SAP Ariba Spot Buy Catalog which will search across all catalogs
- Users are added by roles, permissions, and workgroups
- Powerful search feature which is configurable
- Suppliers organized by commodity codes
- Has import/export capabilities with data.
- **Did not submit information in the General Functionality RTM Tab?**

Supplier Portal - PDF Page 25

- SAP Ariba Business Network (SBN) is the front door solution
- This solution allows complete administration of business with entities
- Landing page on PDF Page 26
- Solution is an open network
- Supplier enablement services are included in this offering
- Shows Supplier Enablement Overview on PDF Page 28
- Simple registration with collaboration on sourcing events, contracts, catalogs, and invoicing
- Mobile app available and what it supports is listed on PDF Page 30

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Provided screenshot of Supplier mobile dashboard on PDF Page 30
- CONCERN - EPROC-SPR-9 – Tab 3 Line 13 - Supplier stating leaving this blank as requirement is for a service partner?
- CONCERN - EPROC-SPR-10 – Tab 3 Line 14 - Supplier stating leaving this blank as requirement is for a service partner?
- CONCERN - EPROC-SPR-18 – Tab 3 Line 22 - Supplier stating leaving this blank as requirement is for a service partner?
- CONCERN - EPROC-SPR-19 – Tab 3 Line 23 - Supplier stating leaving this blank as requirement is for a service partner?

Supplier Enablement/Management – Page 30 -

- Buyers can manage the entire purchasing process.
- Offers a supplier enablement team
- Offer supplier education and training materials
- Help manage data collection.
- CONCERN - EPROC-VDR-19 thru EPROC-VDR-27 – Line 48 thru line 56 – The responses here are labeled as needing an “integration”, but I am not clear what integration is required?
- CONCERN - EPROC-VDR-31 thru EPROC-VDR-39 – Lines 60 thru line 68 - Concern - This is a duplicate response from requirements in this section. Does the system offer this requirement?
- CONCERN - EPROC-VDR-43 - Concern - This is a duplicate response from requirements in this section. Does the system offer this requirement?

Buyer Portal – Page 31 thru Page 34

- Can have a configurable landing page with a dashboard, or have a user experience a guidance in buying.
- User will log in using the same portal and what they see can be set up within their roles.
- Casual users purchase, complete forms and be linked to other solutions like ServiceNow
- Power users can have dashboards, run reports, manage records, and post solicitations.
- Provided screen shots on pages 33 and 34

Need Identification – Page 34 thru Page 36

- Guided Buying provides access to catalogs and state contracts and the vendor thinks this is the perfect solution to Need Identification.
- Can trigger workflows that can be configured.
- Can configure a landing page dashboard containing widgets to guide the user in the buying process.

Request through Pay – Page 36

- The narrative response from this supplier is very limited on information.
- **Interpretation of Purchase Request – Could be a form or “request” that is filled out or could be the result of submitted a “shopping cart” that goes to a PR (purchase request or requisition) and then to a purchase order. See response in RTM line 106**
- CONCERN - EPROC-PRD-15 – Line 116 - Attachment size limit is 100 MB per attachment
- CONCERN - EPROC-WRK-12 – Line 177 – Can you add comments, and can you control if comments go to the vendor?

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-WRK-14 – Line 179 - States the workflow will not be re-triggered. Would if we want workflow started again?
- **CONCERN - EPROC-PO-3 – Line 198 – Response states requirement needs an integration, but “Availability” is marked with A which means out of box?**
- CONCERN - EPROC-PO-6 – Line 201 – PO number is not configurable by the State.
- CONCERN - EPROC-PO-16 – Line 211 – Cannot electronically sign Purchase Orders
- CONCERN - EPROC-PC-6 – Line 232 – Pcard as part of the user's profile is not supported.
- CONCERN - EPROC-PC-10 – Line 236 - Availability states out of the box, but wouldn't this require an integration? Loading data from the bank.
- CONCERN - EPROC-RC-4 – Line 253 – Cannot record a receipt without a reference to a PO.

Catalog Capability – Page 36 – 37

- Cross- catalog search among the catalogs.
- Spot Buy catalogs for those items not found in other catalogs.
- CONCERN - EPROC-CAT-6 – Line 291 – Does not have an unlimited number of catalogs. 5000
- CONCERN - EPROC-CAT-7 – Line 291 – Does not have an unlimited number of items. 500,000
- CONCERN - EPROC-CAT-10 – Line 295 - Supplier availability states out of box but response is talking about custom forms - Should be labeled C for customization?
- CONCERN - EPROC-CAT-11 – Line 296 - Supplier availability states out of box but response is talking about custom forms - Should be labeled C for customization?
- EPROC-CAT-19 – Line 304 - Items with negative dollar value not supported
- CONCERN - EPROC-CAT-39 – Line 324 - This response is the same requirement in line 323. Does not address the publish announcement about new catalog requirement.

Sourcing/Bid Management – Page 37 thru Page 40

- SAP Ariba Sourcing is the solution name.
- Ariba Discovery is the supporting public posting.
- Integrates with SAP Ariba Contracts solution
- Configurable templates allow for agency process variations
- Has project management process – Page 39
- Side by side comparison
- Offered links for more information on Public Posting which is also contained in Section 10 Vendor Performance of their response. Page 40
- CONCERN - EPROC-SRC-15 – Line 342 - This response shows the functionality of qualified vendor lists and not if the Sourcing module can handle this solicitation type.
- CONCERN - EPROC-SRC-39 - The system assigned number is not configurable by the State
- CONCERN - EPROC-SRC-41 - Does it support Adobe Acrobat?
- CONCERN - EPROC-SRC-63 – Line 390 - The system has a 100-supplier limit for events
- CONCERN - EPROC-SRC-76 – Line 403 - Response does not state what means this information is to be posted? Integration? Line 404 states integration with that requirement?
- CONCERN - EPROC-SRC-102 – Line 429 - eSignature functionality is limited to contracts not sourcing events.
- CONCERN - EPROC-SRC-130 – Line 457 - The response references communication between buyer and supplier, but requirement is referencing evaluation panel members?
- CONCERN - EPROC-SRC-131 - The requirement references communication between the "buyer side" of the application, but the response references the supplier communication ability?

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-SRC-143 – Line 470 - I interpret this requirement as being able to "unaward" and awarded solicitation and then awarding it to the next responsive supplier. The response submitted does not address that requirement.

Contract Management – Page 40 thru Page 42

- SAP Ariba Contract Management is the solution proposed
- Offers both Contract Management and Administration
- Bridges the sourcing process to the transactional procurement process.
- Contract can be published to SAP Ariba Buying and Invoicing and then leverage Guided Buying
- Leverage workspaces, templates, documents, and libraries
- Configure contract dashboards to help manage contracts
- Contains numerous pre-packaged reports
- CONCERN - EPROC-CNT-25 – Line 505 – Does the solution support Adobe Acrobat?
- CONCERN - EPROC-CNT-65 – Line 545 – Buyer cannot control which contracts or content is displayed on public site. Can the system use the contract status?
- CONCERN - EPROC-CNT-71 – Line 551 – The vendor's response did not address the administrative fee requirement. Only talked about updating prices on price file.

Vendor Performance – Page 42 thru Page 44

- SAP Ariba Supplier Lifecycle and Performance is the solution name.
- Supplier has self-service access to maintain data
- Centralized view of supplier's data
- Offers vendor performance tool.
- Can use API to display supplier performance.
- Can send surveys and system automatically scores the response.

Purchasing/Data Analytics – Page 44 thru Page 47

- SAP Ariba Reporting is the solution name.
- Reporting can be created with many data elements and displayed on personal dashboards.
- System offers pre-packaged reports across the solution.
- Offer Ad Hoc Reports. (Wizard driven)
- I liked that they copied a duplicate response on lines 602 thru 608 but bolded the requirement in the duplicate response that showed they could meet the requirements. This practice is better than "see requirement XXX".

Technical Requirements –

Technical Requirements tab removed from the RTM

Availability – Page 47

- Guarantee 99.5% availability.
- Offered example of their SLA

Accessibility Requirements – Page 47

- Offered link to a design guide of the system.

Audit Trail and History – Page 48

- Meets requirements

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

Browsers Supported – Page 48

- Listed browsers supported and noted compatibility mode is not supported

User Accounts and Administration – Page 48 – 49

- Based on roles and permissions and assignment to groups
- Common data is shared across modules automatically
- CONCERN - EPROC-TECH-12 – Line 16 Dual sign-on via one account is not supported. Buyer/Supplier
- CONCERN - EPROC-TECH-16 – Line 20 - Deactivating an account is not automated.
- CONCERN - EPROC-TECH-17 – Line 21 – System does NOT display profile information, even under the user profile?
- CONCERN - EPROC-TECH-20 – Line 24 - This response does not address the searchable functionality that was mentioned in the requirement?

User Authentication – Page 49 – 50

- Offers regular authentication or single sign on
- Supplied password information policies

Federated Identity Management – Page 50

- Suppliers' response referred back to previous section, User Authorization section 6 Page 49-50

Data Conversion – Page 50

- Plan to leverage SAP's Activate Methodology which provides tools with rapid migrations.
- Supplied suggested role names and responsibilities.
- CONCERN - EPROC-TECH-26 – Line 30 - Legacy integration is provided as an extra cost

Interface and Integration – Page 51

- Stated 3 kinds of integration options, HTTPS, SOAP, and REST
- CONCERN - EPROC-TECH-57 – Line 61 - The supplier response refers to THEIR SLA. I thought the requirement was to address an SLA entered in the system.

Office Automation Integration – Page 51

- Meets requirements

Mobile Device Support – Page 52

- Uses the mobile "app" to perform system tasks and supplied list of features available with the app.

Mobile Applications – Pages 52 – 54

- Listed the operating system that the mobile app supports
- SAP Ariba mobile app is not certified with mobile device management (MDM) platforms. Page 53
- Listed security features offered by the app

Data Ownership and Access – Page 54

- Customer owns the data throughout the life of the subscription

Date Retention, Archive and Purge Considerations – Page 54

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Does not mention how the purge and archive functionality works in the narrative response.
- CONCERN - EPROC-TECH-63 – Line 67 – Does not provide detailed information about the purge process

Disaster Recovery Plan – Page 54 -55

- SAP Ariba uses a documented system recovery plan.
- **Would have been beneficial to share this documented plan?**

Solution Environments – Page 55

- Narrative offered very limited information on environments proposed other than to mention test and production.
- CONCERN - EPROC-TECH-64 – Line 68 - This response does not address the "refresh" functionality

Solution Technical Architecture – Page 55 thru Page 57

- Solution is single platform with solutions natively integrated.
- The SAP Ariba Cloud Integration Gateway allows all the solution modules to be integrated.
- cXML language for document exchange.
- Offered information on integration to external systems. Page 56
- System shares servers.

Solution Network Architecture – Page 57 – 58

- Chart on page 57 shows network structure

System Development Methodology – Page 58 – 59

- Uses Product Lifecycle Methodology to help with development.
- Some changes are subject to change management procedures.

Service Level Agreement – Page 29

- Provided/referenced the embedded SLA offered in their response. 2 different versions.

Security Requirements – Page 60 –

Security Requirements TAB REMOVED from the RTM?

Most of my responses to this section I will need to defer to a security SME

Cloud Security Alliance (CSA) Compliance – Page 60

- Referenced the CAIQ document embedded in this response. Excel spreadsheet looks complete

Security and Privacy Controls – Page 60

- Not officially NIST 800-53 certified.
- Offered link to certification compliance Page 60
- Offered link to Attestation of Compliance.
- Defer rest of evaluation to Security SME

Security Certifications – Page 60 thru Page 62

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Current certificates available upon request. Provided link
- Offer link to Service Organization Controls (SOC) reports. Page 61
- PCI and DSS certified
- Provided link to current Attestation of Compliance
- Defer rest of evaluation to Security SME

Annual Security Plan – Page 62

- SAP does not attach SOC reports with an RFP.
- Provided link to request SOC report

Secure Application and Network Environment – Page 62 thru Page 66

- Boundary Protection – Page 62
- Network logs are available
- Has firewall functionality
- Has security plans and policies
- Suggested to request the SAP Cloud Security Framework document for more detail – Page 64.
- Provide list of Maintenance tools – Page 64
- Defer rest of evaluation to Security SME

Secure Application and Network Access – Page 66 thru 68

- Uses encryption to protect information
- Leverages Secure Software Development (SDC)
- Suggested to request the SAP Cloud Security Framework document for more detail.
- Defer rest of evaluation to Security SME

Data Security – Page 68 thru Page 71

- Have established formal process to protect data – Page 68
- Data is encrypted. Page 69
- Moderate Business Impact Data is considered person contact information.
- Provided URL to their data policy and privacy statement. Page 69
- Defer rest of evaluation to Security SME

Personally Identifiable Information Protection – Page 71

- Not designed to handle HIPAA data including SSN, and Personal Banking information

Security/Privacy Issue Occurrence – Page 71

- Can provide general overview of their incident response but their full documentation is confidential. Page 71

PII Data Actual/Attempted Access or Disclosure – Page 72

- Response states “see our response to Section 9”

Security Breach Reporting- Page 72

- Response states “see our response to Section 9”

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Service = Cost estimation business. They list several tools they use including their own "AI-driven tool, success 2.0".
2. Previous Projects
 - Only one project given (startup business). Determine a should-cost for a new model embedded system. Believe project meet Category 3, **but may need a bit more information.**
3. Subcontractors
 - Vendor states there are no subcontractors.
4. Organizational Chart
 - **No, an org. chart and job descriptions were not provided.** They did provide a short list of individuals at the company.
5. Litigation
 - Vendor states there are no litigation.
6. Financial Viability
 - Provided DnB, **but unsure of financial status based on what they provided.**

It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, no cyber liability insurance
 - software cost engineering calculation services - proprietary methodology
 - enables customers to perform their own software cost estimation calculations
2. Previous Projects
 - Honda of Ohio - should-cost for a new model embedded-system for one of their software-driven dashboard elements.
 - New startup – not willing to share more projects at this time
3. Subcontractors
 - none
 -
4. Organizational Chart
 - Only provided brief profiles of the 2 owners
 - A separate file was submitted with a more detailed company profile
5. Litigation
 - There is no litigation in progress against effution LLC or effution GmbH
 -
 -
6. Financial Viability
 - D&B profile dated 8/2019
 -
 -

Individual Comments:

Overall/General

- Product is GEP Software Source-to-Pay process.
- Note: NB Ventures Inc. dba Global eProcure (GEP)
- Product is cloud platform. SaaS.
- The technical proposal begin with small portions of information and I was unsure if they were meeting the mark, but once I was able to dig into the matrix it helped further see what they can do.
- Overall, it looks like much configuration can take place for any State entity. While this is great, I question how this would affect updates to the software (Clarification).
- Matrix - I like seeing that the level complexity is not all "L". It shows GEP put thought into each for each item.

A. General Principal and Requirements

1. Key Solution Functionality Elements (pages 8 – 14)

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

1. Product is GEP Software Source-to-Pay process. With modules of sourcing, savings tracking, category management, contract management, supplier management, and procure-to-pay.

- Single point of entry – yes – a centralized intake form. When I think Single point of entry- I do not think intake form.
- Smart routing – yes – GEP combined this bullet point with Compliance and Workflow. They state the platform can be configured to meet specific compliance policies/rules. GEP gives examples of Guided Buying, Robust Rule Engine, and Category Playbook.
- Compliance – refer to the second bullet.
- Portal – yes – buyers and suppliers have access to dedicated home page portal

- Open marketplace environment – yes – **Configure** hosted catalogs/punchouts.
- Integration – yes – has out of the box integration tool kit and use JSON protocols for document exchange.
- Workflow – yes – refer to the second bullet.
- Document management – yes – stored in centralized repository and accessed per user role.
- Reporting, dashboards and data visualization – yes – in-house cross-functional reporting framework.
- Configurable – yes – GEP Software cloud platform is a preconfigured application. GEP states they will use agile approach to preconfigure sandbox to align to State specific cases / requirements.
- Transparency – Yes – and mention track status on documents.

2. User Experience - pages 14 - 16

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.

2. GEP discusses their intuitive user interface built by using feedback from Fortune 500 costumers, user group requirements, industry standard practices, etc. **I have concerns with the Fortune 500 customers because we want a system that is more relatable to Govt/State business.**

- Initial Screen – yes, mention users can mark initial screen as landing page – **not sure this is what is meant in this section.**
- Intuitive Navigation – yes, GEP combines this bullet with “Wizard-driven capabilities” addresses few clicks, **but doesn't really address wizard capabilities.**
- Wizard-driven capabilities – Refer to second bullet.
- Informative Portal – Yes
- Mobile Optimization – yes, they call it Mobile App – IOS and Android.
- Workload Mgt Functionality – Yes they call it Work Management, addressed; however, **unsure if it contains the same intention of abilities as wanted in the RFP.**
- Role-Based Functionality – Yes, addressed.

3. Bidder Best Practices and Roadmap – pages 16 - 21

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.

3. GEP introduced 4 best practices and roadmap: (1) Unified Source-to-Pay Platform, (2) Agile Methodology for Software Development, (3) Software Release and Update Cycles, and (4) Customer Success: Providing a High Touch Support Experience Throughout Engagement.

- Latest Technology – No – don't address any. Address their process as in number 3 above.
- Timely updates – yes – Quarterly and biweekly; however, **it's a bit confusing as they use words such as “generally available” Would like to see a more definite timeframe and surety.**
- Alternative Best Practices – yes see below bullet.

- Cost Reduction – Yes – Claim price compression will save 4% – 7% average realized savings, spend compliance 10%-50% reduction of noncompliant spend, productivity 40%-60% reduction in non-value added work, and working capital 10-20% extension in pay terms and 5-30% Increase in early pay discounts.
- Product Roadmap and Cont. Improvement. – Yes – see number 3 above.

4. Innovations and Value-Added Features/Services – pages 21 - 22

In addition to the stated requirements, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

4. Yes - Completed section. They list Level (1) Organization Maturity Assessment, (2) Opportunity Assessment (3) Market Intelligence (4) Category Management. Explained further below.

- GEP illustrates their Assessment Approach in a 4 graphs and explains they would work with State to create a plan to outline desired outcomes by looking at various pieces of procurement operating models and identifying areas of improvement along with other types of analysis. **This reminds me of a BPM.**
- GEP illustrates in 3 graphs how they can analyze procurement spend to identify savings opportunities using GEP benchmarks, SME inputs, and industry best practices.
- GEP illustrates in 5 graphs how leveraging GEP's extensive network of SMEs and researchers could elevate the knowledge and awareness of State's procurement.
- GEP illustrates in 2 graphs a process for end-to-end category management across categories for sustainable outcomes

5. Customizations/Extensions – pages 22 - 23

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

They provide preconfigured application deployed as a standard configuration. They suggest using the standard out of the box software, but will configure as necessary per the requirements of the State.

6. Alternative Funding Models – Pages 23 - 27

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outlined above for each recommended funding model.

GEP does not have alternate funding models. They refer to Exhibit 3. Cost Proposal and other revisions of cost proposal.

7. Contract Transition and Flexibility – page 27

GEP complies with the contract review process and transition if negotiate terms. I feel they misunderstood the point of this question.

B. Functional Requirements: pages 28 – 48

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The **electronic procurement solution must be cloud-based with a Software as a Service (SaaS) delivery model**

1. General Functionality. Tab 2, GEN-1 through GEN-40. Matrix completed. 5 – High (21, 26, 27, 28, 39), 3 – Medium (9, 25, 36), rest are all “L” Low level of complexity, 3 – “CF Configuration Items (3, 5, 25), 1 – “C Customization/Extension” (39), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Core Platform, GEP Request through Pay Software, GEP Sourcing/Bid Management Software, Contract Management, Procure-to-Pay.
 - For most of the items in 1 – 7 GPE offers use of their system, but these questions are about being able to integrate with other eProcurement Workstreams. In areas where GEP does do this they suggest links or to CF.
 - I do like seeing that the level complexity is not all “L”. It shows GEP put thought into each for each item.
 - The C and CF items do not seem to pose a problem. Other items seem to be standard within the software.
 - #36 GEP has their own built in electronic signature solution instead of a partnership like docusign, or adobe sign
 - #38 For number of licenses – sounds like gave cost based on what was provided in proposal; however, they confirm licensing is unlimited for business and supplier users. This may be deceiving, might want to confirm again that it's unlimited also for “State users”
2. Supplier Portal. Tab 3, SPR-1 through SPR-23. Matrix was completed. 1 – High (19), 1 – Medium (6), rest are all “L” Low level of complexity, 1 – “INT - Integration/Interface”(19), 1- “CF-Configuration Item” (6), and the rest “A – Available”. Solutions/Tools/Modules covered – Supplier Enablement / Management Software, GEP Core Platform, Contract Management, Request through Pay.
 - #13 I find it interesting that GEP has their own OCR in-house system. Nice to know, if State did not want to use or integrate theirs.
 - The C and CF items do not seem to pose a problem. Other items seem to be standard within the software.
3. Supplier Enablement Management Workstream. Tab 3, VDR-1 through VDR-43 Matrix – was completed. 1 – Medium (36), rest all “L” Low level of complexity, 1- “CF-Configuration Item”, and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Supplier Enablement / Management, Core Platform.
 - The “A” fields seem to be satisfactorily answered and their solution meets the standards.
 - For the INT items 19-27. GEP has a partnership with Global Risk Management Solutions (GRMS), Rapid Ratings and with TinCheck that provides most of these services. GEP Software will enable a link to these partners to allow users to view. My concern here would be the risk of leaving their system (if any), what security measures are in place?
4. Buyer Portal. Tab 3, BPRT-1 through BPRT-15. Matrix completed. 1 – Medium (9), rest are all “L” Low level of complexity. 1- “CF-Configuration Item”(9), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Core Platform, GEP Request through Pay Software, GEP Supplier Enablement / Management.
 - The “A” fields seem to be satisfactorily answered.
 - The C and CF items do not seem to pose a problem. Other items seem to be standard within the software.
5. Need Identification. Tab 3, NEED-1 through NEED-7 Matrix completed. All “L” Low level of complexity. 1-“CF-Configuration Item”(5), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Sourcing Bid Management, Contract Management, and Request through Pay Software.

- The CF item does not seem to pose a problem. Other items seem to be standard within the software.
6. Request through Pay Workstream. Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11. Matrix completed. 1–High (PRD28), 5–Medium (PRD11, PRD56, WRK13, PO16, PC1-3, PC5-8, PC10-15, PC17-PC19, and PC21, RC4), rest are all “L” Low level of complexity, 17 – “IN - in development” (PC1-3, PC5-8, PC10-15, PC17-PC19, and PC21), 1- “CF-Configuration Item” (RC21), and the rest “A – Available”. Solutions/Tools/Modules covered–GEP Request through Pay Software, Contract Management.
 - For PRD (Purchase Request Development): No issues with this section. GEP’s responses meet the standards and our requests.
 - WRK (Workflow Management): All requirements in this section are sufficiently answered.
 - PO (Purchase Order Generation & Management): All requirements in this section are sufficiently answered.
 - PC (Payment Card Functionality): Much of the complexity is medium and the availability is “in development”. This is concerning if a State is counting on this service.
 - RC (Receiving): All requirements in this section are sufficiently answered.
 - INV (Invoicing): All requirements in this section are sufficiently answered.
 7. Catalog Capability - Tab 3, CAT-1 through CAT-40. Matrix completed. 1–High (19), 5–Medium (4,21,25,32,33) and the rest all “L” Low level of complexity, 4–“CF Configuration Item” (31-34), 1 – “ID - in development” (38), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Request through Pay Software, Contract Management.
 - Missing 38 – “The eProcurement Catalog functionality should provide the ability for catalogs to be accessible and searchable without requiring the user to login (e.g. public access for read/search only access). State must be able to specify any fields that will not be publicly visible (e.g. Tax ID).” GEP says “ID” and will work with State to have.
 - Other than 38 - All requirements in this section are sufficiently answered.
 8. Sourcing/Bid Management Workstream. Tab 3, SRC-1 through SRC-151. Matrix completed. 1–High (151), 5–Medium (31,77,78,83,138) and the rest all “L” Low level of complexity, 7–“CF Configuration Item” (17,18,73,76,102,138,147), 1–“ID - in development”(109), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Core Platform, GEP Sourcing/Bid Management Software, Contract Management.
 - Items 15 and 16 – GEP says they can handle a surplus sealed bid and IFQC, but then say they would further like to discuss the requirement in detail with State as we move ahead in this process. Clarify – can they handle this type of procurement?
 - In some areas they offer multiple ways to tackle a situation – for example SRC72. This is seen throughout the Matrix.
 - Rest of requirements in this section are sufficiently answered.
 9. Contract Management. Tab 3, CNT-1 through CNT-88. Matrix completed. 3–High(30,71,72), 4–Medium (38,41,45,70) and the rest all “L” Low level of complexity, 8–“CF Configuration Item”(20,34,45,51,65,66,71,72), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Supplier Enablement/Management, Request through Pay Software, Contract Management.
 - Items 71 and 72 – GEP says they can track suppliers admin fees , but then say they would further like to discuss the requirement in detail with State and understand the logic behind the calculation.
 - Rest of requirements in this section are sufficiently answered.
 10. Vendor Performance Tab 3, VPE-1 through VPE-25. Matrix completed. 1–High(14), and the rest all “L” Low level of complexity, 1–“CF Configuration Item”(15), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Supplier Enablement/Management, Request through Pay Software, Contract Management.
 - Requirements in this section are sufficiently answered.
 11. Purchasing/Data Analytics Tab 3, PDA-1 through PDA-37. Matrix completed. 2–High(32,33) and the rest all “L” Low level of complexity, 1–“CF Configuration Item”(37), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Platform.

- Question #37 – where GEP can offer comparison of punchout item to non contract item. They state yes as long as the supplier is ok exposing themselves to GEP web crawlers. Even if they are ok with this, is there enough security for State and any other web crawlers?
- Rest of requirements in this section are sufficiently answered.

C. **Technical Requirements: pages 49 - 74**

1. **Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*

Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.
 - Maintains a 99.8% uptime with a 24x7 availability.
 - Use Microsoft Azure (for backup)
2. **Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
 - Short 3 sentence slide that gives confirmations that GEP: Observes ADA compliance standards, follows WCAG2.1 level AA guidelines, and will provide ACR.
3. **Audit Trail and History RTM:** Tab 4, TECH-1 through TECH-5. Matrix completed. 1–Medium(5) and the rest all “L” Low level of complexity, All “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - Audit logs are retained until end of contract life.
 - Mentions backup policies and use of Microsoft Azure backup.
 - Much crossover between slide in technical proposal and matrix. No concerns.
4. **Browsers Supported**
 - The general web browsers are supported (Microsoft Internet Explorer, M Edge, Chrome, Firefox, and Safari). No concerns.
5. **User Accounts and Administration RTM:** Tab 4, TECH-6 through TECH-20. Matrix completed. 1–Medium(12) and the rest all “L” Low level of complexity. 1–“CF Configuration Item”(16), and the rest “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - No concerns. Meets requirements.
6. **User Authentication RTM:** Tab 4, TECH-21 through TECH-25. Matrix completed. 1–High(24) and the rest all “L” Low level of complexity, 1–“ID In Development”(25), and the rest “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - #21 – Like the fact that they use Microsoft Active Directory for Single Sign on.
7. **Federated Identity Management –** No concerns. Meets requirements.
8. **Data Conversion RTM:** Tab 4, TECH-26 through TECH-34. Matrix completed. 1–High(28), 1–Medium(30), and the rest all “L” Low level of complexity. With all “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform, Software Implementation services for Supplier Enablement Management, Services for Software Implementation, Services for Spend Analysis, Services for Sourcing/Bid Management, and Services for Request through Pay.*
 - Seem flexible in their approach to converting data and working with the State. A couple assumptions, but they are reasonable.
 - GEP provided many slides with graphs and pics laying out the conversion process. – I found this helpful.
9. **Interface and Integration RTM:** Tab 4, TECH-35 through TECH-60. Matrix completed. 1–Medium(60) and the rest all “L” Low level of complexity, 1–“ID In Development”(55), and the rest “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform, Request through pay software, contract management, supplier enablement management.*
 - Met all requirements besides the Pcard #55 which is ID.
 - They list many ERP systems they have or currently integrate with (SAP, Oracle, PeopleSoft, JD Edwards, MS Dynamics, CGI Advantage, etc.) and provide options of how to integrate.

10. Office Automation Integration
 - Yes, GEP integrates with Microsoft products listed and others.
11. Mobile Device Support RTM: Tab 4, TECH-62. Matrix completed. "L" Low level of complexity, "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - Yes it can be accessed Mobily
12. Mobile Applications - Nothing add here.
13. Data Ownership and Access
 - State will retain all ownership of data.
14. Date Retention, Archive and Purge Considerations RTM: Tab 4, TECH-63. Matrix completed. 1– "L" Low level of complexity, "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - Met all requirements. No concerns.
15. Disaster Recovery Plan
 - Coupa.
16. Solution Environments RTM: Tab 4, TECH-64 through TECH-67. Matrix completed "L" Low level of complexity, "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - State would receive four environments Development, Quality Control/User Acceptance Testing, Training, and Production.
 - Graphs of each environment are provided and at what point in the process they are used.
17. Solution Technical Architecture
 - Met all requirements. No concerns.
 - Graphs and tools that will be used are provided in the tech. proposal.
18. Solution Network Architecture
 - Again – great graphs listing the software used and when scans, patching, etc. are done.
19. System Development Methodology
 - Normal PM with much explanation and tables/graphs.
20. Service Level Agreement
 - GEP notes they want to discuss and finalize SLA requirements with State and refers us to the GEP SLA.

D. Security Requirements: pages 75 - 94

1. Cloud Security Alliance (CSA) Compliance
 - GEP supplied a CAIQ in file 3; I will rely on my more experienced SMEs to help evaluate the CAIQ.
2. Security and Privacy Controls
 - No Concerns based on data in the proposal.
3. Security Certifications
 - No Concerns based on data in the proposal.
4. Annual Security Plan
 - GEP details out their annual security plan.
 - GEP notes that they understand NASPO has asked for any additional documents and to see refer to GEP Appendix 2' which is their Information Security Policy. This will need to be reviewed when negotiating.
5. Secure Application and Network Environment
 - refer to GEP Appendix 3' which is their SMART Application Architecture & Security Overview.
6. Secure Application and Network Access – Tab 5, SEC-1 through SEC-6. Matrix completed. 2– Medium(1,2) and the rest all "L" Low level of complexity, 1–"CF Configuration Item"(2), 1–"ID In Development"(3), and the rest "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - Mentions backup policies and use of Microsoft Azure backup.
 - GEP meets some of the requirements in this section but need to customize or develop others.
7. Data Security – nothing to add.
8. Personally Identifiable Information Protection – nothing to add.
9. Security/Privacy Issue Occurrence – nothing to add.
10. PII Data Actual/Attempted Access or Disclosure – nothing to add.
11. Security Breach Reporting – nothing to add.

E. Implementation Services Requirements: pages 95 - 127

- Matrix completed. 1–High(5) and rest “L” Low level of complexity and all “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - Seems to have many options for finding help and solutions for customers.
1. Project Management
 - GEP recommends AGILE implementation methodology with sprints and multiple workstreams.
 - They provide graphs and timelines.
 2. Project Implementation Methodology –
 - Reference bullets in #1 above.
 - Roles of both side are explained well.
 - Typical challenges are outlined.
 - The rest is fairly basic project knowledge or definitions of such.
 3. Catalog Support Services
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 4. Data Conversion Services
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 5. Interface/Integration Development Services
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 6. Organizational Change Management (OCM Services)
 - Change Management is nice to have as an option. GEP would be performing this. The approach they offer is standard.
 7. Training Services
 - good, maybe a bit more.
 8. Help Desk Services – good.
 - #3 – GEP provides a dedicated team of resources (helpdesk) for users and providers to call 24x5 via phone or email. This is a nice plus.
 - Great.
 9. On-Site System Stabilization Support – nothing to add.

F. Managed Services Requirements: pages 128 - 136

- Matrix completed. All “L” Low level of complexity and “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
1. Solution Support
 - Lay out roles in GEP and what each role will be responsible for after the implementation.
 - Lay out graphs of how the system is supported as well.
 2. Organizational Change Management (OCM Services) – see section E comments above, but also a nice graph on explaining ADKAR of Change Management.
 3. Training Services – see section E comments above.
 4. Help Desk Services – see section E comments above.
 5. Transition Out Assistance Services
 - GEP says they will be flexible when transitioning out and believes 4-6 months is optimized timeline for transitioning out.

G. Other Available Services: pages 137 - 139

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

- RTM: Tab 7, MNGD-1
- Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).
- Points to slides 18-37. Which is their Innovations and Value-Added Services Section.

H. Video Demonstrations: pages 140 - Page 140 of their technical proposal – a link

- Yes provided. Detailed and covered all of their 45 min.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 09/22/2021

EVALUATOR NAME: Joe Zrioka

EVALUATOR DEPARTMENT/STATE: State of Maine - Division of Procurement Services

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - GEP Smart Unified Source to Pay software
 - GEP NEXXE Cognitive Supply Nexus
 -
2. Previous Projects
 - Viatris – implemented direct and indirect buying and accounts payable
 - UCAL – Spend Analysis, Sourcing, Contract Management, Supplier Management
 - Chevron – eProcurement not present in project
 - LDS Church – Contract and Supplier Management
 - UMASS – no evidence of eProcurement
 - Reference calls should be coordinated through GEP
3. Subcontractors
 - None
 -
 -
4. Organizational Chart
 - Combined state and GEP org chart specific to the project
 - Roles defined
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - D&B report 10/19/2020
 -
 -

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): 3
DATE: 12/16/2021
SME/EVALUATOR NAME: Joe Zrioka
DEPARTMENT/STATE: Maine

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements **YES**

User Experience **YES**

Bidder Best Practices and Roadmap **AGILE, Maintenance Release/testing tight window for bug fixes, minor/low impact enhancements, manage commercials?**

Innovations and Value-Added Features/Services **Organizational Maturity Assessment – IT Procurement not identified, spend analysis, Market Intelligence. How is category management providing more value than the solution itself? I expect increased spend visibility, contract compliance, improved Supplier Performance – Is this innovation or additional cost?**

Customizations/Extensions **YES**

Alternative Funding Models **"GEP does not have any alternate funding models."**

Contract Transition and Flexibility **"GEP is able to comply with the contract review process and transition to a state's current contract terms"**

Functional Requirements

General Functionality **YES - 1 Customized, 3 configurations w/one medium effort, and 36 out of the box.**

Supplier Portal - **1 configuration w/medium effort, 1 integration w/high effort, and 21 out of the box**

Supplier Enablement/Management **9 integrations w/low effort and 34 out of the box.**

Buyer Portal **1 configurations w/medium effort, and 14 out of the box**

Need Identification **1 configurations w/low effort, and 6 out of the box**

Request through Pay **62 out of the box – Purch Req, 28 out of the box for Wrkflw mgt, 29 out of the box for PO gen and mgt, 17 in devp and all w/medium effort and 4 out of box for Pcard, 1 configuration w/low effort, and 20 out of the box for Receiving, 11 out of the box for invoicing.**

Catalog Capability **4 configurations w/medium (2) and low (2) LOE, 1 in devp w/low LOE, 34 OOBX**

Sourcing/Bid Management **7 configurations w/medium (1) and low (6) LOE, 1 in devp w/low LOE, 141 OOBX**

Contract Management **8 configurations w/medium (1) and low (5) and high (2) LOE, 80 OOBX**

Vendor Performance **1 configuration w/low LOE, 24 OOBX**

Purchasing/Data Analytics **1 configuration w/low LOE, 36 OOBX**

Technical Requirements

Availability **7 days/week twenty-four hours/day excluding scheduled maintenance and outages**

Accessibility Requirements **WCAG2.1 and Accessibility Conformance Report (based off a VPAT)**

Audit Trail and History **not sure minimum was met for user identifier, date/time stamp, field that was changed and the change that was made.**

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): 3
DATE: 12/16/2021
SME/EVALUATOR NAME: Joe Zrioka
DEPARTMENT/STATE: Maine

Browsers Supported **YES** Microsoft Edge (Version 70.0 and above), Google Chrome (Version 70.0 and above), Firefox and MacOS Safari
User Accounts and Administration **RBAC**
User Authentication **SAML**
Federated Identity Management – **SSO MFA**
Data Conversion **ETL**, Cleanse and Standardize addresses (Country, Region, City & Street), “Harmonize”
Interface and Integration **CGI Advantage** (example) 2 options for integration
Office Automation Integration **hosted on Microsoft Azure** and integrates with Microsoft Office products
Mobile Device Support **GEP Software** is a mobile-native procurement platform
Mobile Applications **GEPSMART** mobile app on Apple App Store and Google PlayStore
Data Ownership and Access **Missing?**
Data Retention, Archive and Purge Considerations **Yes but what standard?**
Disaster Recovery Plan **Annual test does it include clients, is this Azure's DR test?**
Solution Environments **Development/Quality Control, UAT, Training, Production Environments, multi-tenant mode**
Solution Technical Architecture **YES**
Solution Network Architecture **YES**
System Development Methodology **Agile development life cycle using Azure Dev Ops development tools, Functional, SIT, UAT, Regression/Automation, performance testing. Change Request Governance Process.**
Service Level Agreement **GEP would like to discuss and finalize the SLA requirements**

Security Requirements

Cloud Security Alliance (CSA) Compliance **CAIQ**
Security and Privacy Controls **Did not answer NIST 800-53 question**
Security Certifications **SOC1 Type II and SOC2 Type II, ISO 27018, PCI DSS v1.1, FedRAMP High, CJIS, IRS Publication 1075, HIPAA**
Annual Security Plan **No**
Secure Application and Network Environment **YES**
Secure Application and Network Access **YES**
Data Security **YES**
Personally Identifiable Information Protection **GDPR compliance**
Security/Privacy Issue Occurrence **reports any high severity security breach within 4 hrs – define high**
PII Data Actual/Attempted Access or Disclosure **YES**
Security Breach Reporting **2 hour and 24 hour notification cannot be met**

Implementation Services Requirements

Project Management **AGILE, roles/responsibilities defined**
Project Implementation Methodology **Sm Med Lrg, Risk/Mitigation strategies, Configuration/change control, Issue Tracking/Management,**
Catalog Support Services **hosted and punchout catalogs**
Data Conversion Services **Data centralization, Standardization, enrichment, and optimization**
Interface/Integration Development Services **YES**
Organizational Change Management (OCM Services **Human Centric Change Management**
Training Services **Train the trainer approach no training plan example**
Help Desk Services **global, severity levels**
On-Site System Stabilization Support **On site is on call**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3 – eSoftware Only

DATE: 8/22/2021

EVALUATOR NAME: Michael Bacu

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Heavy marketing visuals in presentation
 - Overuse of market buzzwords
 - Underwhelmingly curious if they perform in all capacities the proposal identifies
2. Previous Projects
 - Results are buzz word driven. No savings identified worthy of expense beyond process efficiencies
 - Results achieved are just marketing focused, with vague points
 -
3. Subcontractors
 - GEP is full-service (why also submitting proposals with subcontractors?)
 -
4. Organizational Chart
 - Separate Org Chart from other GEP proposals.
 - Personnel role responsibilities are general in nature.
 - Different titles of employees from other proposals
5. Litigation
 - No litigation identified
 -
 -
6. Financial Viability
 - D&B results not showing concern
 - Unsure about their subcontract KPMG
 -

Individual SME Comments:

General Principal and Requirements

- (Page 5) Centralized platform. Is this all or none, integration with other platforms?
- (8) Do suppliers have access outside of the portal?
- (10) High levels of functionality
- (13) Non-Value-added work reduction 40-60% is valuable
- (14) Agile no customization to cloud, unclear any potential impact to existing processes
- (15) Bi-Weekly maintenance releases seem overly frequent
- (23) Good gap analysis linking to reporting capabilities
- (24) Would like to see F2F workshops offered as well as virtual
- (30) How does Supplier database incorporate local and OSD vendors?

Functional Requirements

- (48) Interesting how the document process moves from one action to the next
- (46) Show good functionality across different workflows, very robust
- (60) Unsure if catalog search includes both hosted and punchouts including level 2
- (65) Concerned about the "Preferred Supplier" and what makes them chosen over others.
- (70) alludes to level 2 punchouts (searchable in the platform) but only if suppliers allow. How many suppliers allow this?
- (73) Sourcing seems very intuitive
- (79) Vendor Performance is good in the way it creates scorecard type data
- (82) Purchasing data has lots of functionality, would like to better understand if it is perhaps too much
- (RTM Tab 3, line 11, EPROC-SPR-7). Allow supplier access to solicitations, both invited and all others. Response did not meet the requirement. Did not address access to suppliers that have not been invited.

Technical Requirements

- (86) Availability should consider maintenance both planned and unplanned. The method identified is only identifying unexpected events relative to the vendor. The customer is inclusive of all events of any form where the service is unavailable. Their method is providing questionable percentages.
- (97) Single Sign on is preferred
- (102) Good data normalization
- (107) ERP integration is important as most states have existing solutions they will not abandon

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Cat 3, Stage 2 Proposed Services

DATE: 11/02/2021

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

Security Requirements

- (CAIQ line 135) Does not support BYOD. Would Single Sign On at state level allow this?
- (CAIQ line 207) Unsure if test environments are available
- (CAIQ lines 216-219) Unsure of liability relationship with GEP and MSFT using Azure. GEP reference to MSFT portal only raise concerns with data breaches or problems and who is liable.
- (CAIQ line 245) No BYOD support, how will this impact states that do not provide state owned laptops/mobile devices to all employees?
- (160) Breach does not include any credit monitoring by vendor or liability acknowledgement

Implementation Services Requirements

- (163+) Project Implementation Methodology is robust
- (167) Projected time periods are not discussed, only unspecified milestones
- (192) How does future state design consider state needs

Managed Services Requirements

- (234) MSFT Intune is MSFT service, GEP does not manage.
- (215) Are training options varied (virtual/In-Person)

Video Demonstrations

- Dashboard formatting is hard on the eyes
- Can create solicitations within the platform
- Scoring withing platform with weighted percentages or formulas
- Can invite suppliers, can suppliers invite themselves?
- Evaluators score within
- Interesting Parent-Child relationships
- Unknown if shopping search looks at punchout catalogs
- Results show non-contracted items. Where are they coming from?
- Where do accounting details come from?
- Can reject line items in requisitions or only entire request?
- Does this work with Peoplesoft?
- Supplier management is manual process for data entry?
- Does supplier profile integrate with Oracle or other platforms?
- Arbitrary supplier scorecard?
- Reporting seems intuitive

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements

7	Single point of entry for all procurement activity based on their needs or use of the solution	
7	Smart Routing – Wizard driven capabilities	Positive
7	Portal – informs users and supports user work management	

User Experience

8	Wizard driven capabilities	Positive
8	Mobile app has access to many areas. Catalogs, create requisitions, approvals and to view dashboard.	Strength
8	User sets up the look of the dashboard and it stays that way for next login	

Bidder Best Practices and Roadmap

14	Approach to implementation is based on progress made and not timeline	Positive
15	Quarterly general release sent to UAT for a week and then to production. It is sent to production in Default Off mode	Weakness
15	Maintenance release every 2 weeks to fix bugs. Handle like quarterly release – sent to UAT for 1 week first. “the participating entity is not obligated to accept and implement any recommendations.”	Weakness

EVALUATOR DEPARTMENT/STATE: State of Montana

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - 20 + years experience. Formed in 1999
 - Minority and Women owned
 -
 -
2. Previous Projects
 - University client
 - Church client
 - Large Gas Company
 -
3. Subcontractors
 - No Subcontractors for this response
 - GEP would provide software, implementation and value added services
 -
4. Organizational Chart
 - Supplied extensive organizational chart
 - Supplied roles and definitions for GEP team
 - Supplied roles and definitions for entity team
5. Litigation
 - Bidder stated none to report
 -
 -
6. Financial Viability
 - Supplied Duns & Bradstreet report.

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): Stage 2, Category 3
DATE: 11/08/2021
SME/EVALUATOR NAME: Tom Hastings
DEPARTMENT/STATE: State of Montana

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

One of my major concerns with this response is the vendor has requested many times that they would like further discussion on some of the requirements listed. This response also has many concerns where the entire requirement listed was not addressed in their response.

I believe the concerns would need to be addressed (i.e., PCard functionality) in order for their solution could be offered. I think some of the "clarifications" need be addressed for me to feel comfortable with their solution offering.

General Principal and Requirements

Key Solution Functionality Elements

- PDF Page 5 – Need form completed to be taken to proper module. Page 6 -Will configure catalogs and punchouts. Restrict access to documents. STRENGTH – Cross Functional reporting. Will configure to state specific cases.

User Experience

- STRENGTH Page 8 PDF – User personalization and access tasks from landing page
- Mobile Capability

Bidder Best Practices and Roadmap

- PDF Page 13 – STRENGTH – Best Practices. PAGE 15 – Default OFF Releases!

Innovations and Value-Added Features/Services

- PDF Page 19 – Organizational and Opportunity Assessment, Market Intelligence and Category Management. Lots of information and informational charts!

Customizations/Extensions

- PDF Page 39 – Highly configurable and lays out customer roadmap

Alternative Funding Models

- CONCERN – No alternative funding models available.

Contract Transition and Flexibility

- This vendor complies to this statement.

Functional Requirements

General Functionality

- STRENGTH EPROC-GEN-5 – Multiple options for posting data.
- WEAKNESS -EPROC-GEN-7 – Fill form to gain access?
- WEAKNESS -EPROC-GEN-8 – Can search by commodity code?
- STRENGTH - EPROC-GEN-11 – Can increase the file limit of 30MB.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Stage 2, Category 3

DATE: 11/08/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- STRENGTH - EPROC-GEN-17 – Nice to be able to have new release data in the OFF by default mode.
- WEAKNESS - EPROC-GEN-25 – Does not allow email domain change to state email domain on emails sent from the system.
- CONCERN - EPROC-GEN-26 – Need to integrate with ERP to track administrative fees.
- STRENGTH - EPROC-GEN-36 – System has its own “built in” signature process but can integrate as well.

Supplier Portal

- STRENGTH - EPROC-SPR-13- Multiple ways for supplier to submit invoices.
- CONCERN - EPROC-SPR-15 – Did not mention if the SUPPLIER could not get to the historical data in the supplier portal?
- CONCERN - EPROC-SPR-19- Must submit administrative fees via an integration.
- CONCERN - EPROC-SPR-20 – Response seems to be on the user side rather than the supplier portal side?
- CONCERN - EPROC-SPR-23 – Response seems to be on the user side rather than on the supplier side?

Supplier Enablement/Management

- STRENGTH - EPROC-VDR-6 – Each contact can have their own log in to the supplier portal.
- CONCERN - EPROC-VDR-13 – Response did not address the foreign suppliers designation?
- STRENGTH - EPROC-VDR-16 - Triggers expire notifications on certificates
- CONCERN - EPROC-VDR-20 thru EPROC-VDR-27 – These responses ALL refer to the response in EPROC-VDR-19 which provides “link” to a management service solution. We need to ask for clarification on these requirements.

Buyer Portal-

- CONCERN -EPROC-BPRT-6 – System admin might have to run reports on behalf of the user?
- STRENGTH - EPROC-BPRT-10 – Can perform a “system-wide” search from the buyer landing page.
- **CONCERN - EPROC-BPRT-14 -Need to discuss further specific integration requirements? Needs to be addressed at implementation.**
- CONCERN - EPROC-BPRT-15 – Did not state if communication would default to user email address?

Need Identification

- PDF PAGE 62 - The need starts with a request form user needs to fill out.
- Meets all other requirements

Request through Pay

- PDF PAGE 66 – Core Features list is pretty extensive
- STRENGTH - EPROC-PRD-8 – Collated purchase requests into one centralized dashboard.
- CONCERN - EPROC-PRD-24 – Can you limit the user access to the form?
- CONCERN - EPROC-PRD-46 – Did not address the political subdivision unique chart?
- CONCERN - EPROC-PRD-47 – Can you control fields availability based on the agency?
- CONCERN - EPROC-PRD-56 – Vendor response states wants further discussion. Not sure they can meet this requirement.
- CONCERN - EPROC-PRD-59 – Did not submit information of calendar functionality.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Stage 2, Category 3

DATE: 11/08/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-WRK-9 and EPROC-WRK-10 – Did not state if the user could enter a reason for workflow by pass?
- WEAKNESS - EPROC-WRK-22 – Referenced a previous requirement as their response to this requirement.
- CONCERN - EPROC-PO-2 – Supplier wants further discussion.
- CONCERN - EPROC-PO-15 – Did not state if they could print in groups?
- CONCERN - EPROC-PC-1 thru EPROC-PC-3, EPROC-PC-5 thru PC – 8, PC-10 thru PC – 15, PC -17 thru PC -19 and PC - 20 – Pcard functionality in development.

Catalog Capability

- PDF Page 69 – Has 3 catalog options with the Internal Catalog being new to me.
- CONCERN - EPROC-CAT-11 – Supplier has requested further discussion on ability to obtain quotes.
- CONCERN - EPROC-CAT-20 - Concern - Response is quick quote process where I thought we were looking for the ability to enter a quote in the punch out catalog?
- CONCERN - EPROC-CAT-38 – Search catalogs without logging in is in development.

Sourcing/Bid Management –

- PDF Page 74 – Comprehensive Automatic Scoring.
- CONCERN - EPROC-SRC-15 and SRC – 16- Supplier would like further discussions of IFQC and IFQP
- CONCERN - EPROC-SRC-19 thru EPROC-SRC-21 – Supplier response did not address if these event types could be done in the system?
- CONCERN - EPROC-SRC-28 – Response was directed at the supplier side and not for participants on the buyer side (solicitation participants).
- CONCERN - EPROC-SRC-37 – Need ability to update templates automatically but this supplier does not recommend.
- CONCERN - EPROC-SRC-83 – Did not address if recording of pre-proposal conference could be stored as part of the event?
- CONCERN - EPROC-SRC-102 – Response is NOT an electronic signature process.
- CONCERN - EPROC-SRC-109 – The ability to enter paper responses in under development and will aligned with entity's go live date.
- CONCERN - EPROC-SRC-130- Supplier wants further discussion on online collaboration.

Contract Management

- PDF – Page 76 – Key Highlights to their Contract Management Solution.
- The contract request form goes directly to creation of a contract avoiding the need for a bid.
- STRENGTH - EPROC-CNT-8 – Mass update to contracts that have the same contract clause that has been updated.
- STRENGTH - EPROC-CNT-12- Built in electronic signature process but can also integrate.
- CONCERN - EPROC-CNT-18 – Supplier response does not address the sharing of responsibility of the contract record.
- CONCERN - EPROC-CNT-20 - This response does not address the contract number being the same as the solicitation number.
- CONCERN - EPROC-CNT-38- Supplier wants further discussion on the ability to capture subcontractor information.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM - Kyndryl

CATEGORY #(s): 3

DATE: 10/29/2021

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- IBM - Est. 1911.
- IBM – infrastructure services for hybrid cloud, enterprise application management, business resiliency, network, digital workplace, and technology support.
- Kyndryl (page 6) is an IBM company. Says they are going to be launched later in 2021. This is somewhat concerning. But on the next page says they have been doing this for 30 years. Unsure here.
- Concerns on how they could meet category 3

2. Previous Projects

3 projects provided. Kyndryl is mentioned nowhere in the references. No State examples given. Only one Ariba reference, but done by an IBM subcontractor.

- PayPal Giving Fund – project is still ongoing since 2011. IBM migrated PPGF's ERP platform to SAP Cloud.
- Shared Services Canada – project ongoing. It says the reference is mandated to consolidate and modernize the Government of Canada's IT infrastructure. It discusses Experis (subcontractor) and IBM provide technical support.
- Santander Group Ongoing project – ManpowerGroup's IT brand "Experis" delivering E-procurement solution – "SAP Ariba"

3. Subcontractors

- Yes. Experis, ManpowerGroup, Jefferson Wells, Amick Brown

4. Organizational Chart

- Provides a high-level organizational chart with subcontractors underneath it and a layout of job titles under that.

5. Litigation

- Page 18, yes, they list they have several; however, they do not list any.

6. Financial Viability

- DnB provided. Low – Moderate risk. For IBM only.

It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Deploying Ariba
 - New company in 2021?
 - Developed implementation process stated
2. Previous Projects
 - Unconvincing previous projects
 - Projects do not show capability of IBM to implement state procurement solutions
3. Subcontractors
 - Amick Brown as consultants
 - Manpower Group – are they going to provide a staffing resource for the states? Not clear on what their role will be performing in this contract scope.
 - Experis – Resources for implementing?
 - Jefferson Wells – Consultants?
4. Organizational Chart
 - Seems very diluted with numerous subcontractors as project leads
 - Unclear what role Kyndryl or IBM has in the process
 -
5. Litigation
 - Response does not identify litigation pending only that there is
 - Question on responsiveness to this section
 -
6. Financial Viability
 - IBM D&B is good, unknown for Kyndryl of numerous Subcontractors identified.
 - Noteworthy that IBM is moderate risk
 -

Individual Evaluator Comments: Same as submitted response for Stage 1, Category 1 Full Solution. They reference the SAP Ariba software solution.

Organization Qualifications and Experience

1. Overview of the Organization
 - Providing link to website
 - Kyndryl is an IBM company will be launched later in 2021
 - Spin off company- Recognized by Gartner, IDC, HFS Research, and Everest Group
 - Combined team with Manpower Group and Amick Brown
 - Cloud Management, Security, Migration, Managed SAP & Oracle Services, Data Management and Cloud Infrastructure
 - Proposing SAP Ariba to integrate with on prem Oracle Peoplesoft. Uses Cloud Exchange for virtual network
 - Supplied table on page 7
2. Previous Projects
 - Canada project- modernize the IT structure of the Government of Canada
 - Pay Pal project is to update their ERP system to handle more load.
 - Bank project – mentioned this contained “procurement transactions”
 - No government client examples with eProcurement experience.
3. Subcontractors
 - Amick Brown – ISO certified and an SAP partner. Consultant services for SAP. Provided Link
 - ManpowerGroup- staffing brands, Manpower and Experis. Hold State contracts. Seems to be a recruiter for businesses. Provided link
 - Experis – Professional Resourcing – Provided link
 - Jefferson Wells – offers help with Business Optimization Risk & Compliance, Finance & Accounting and Tax Services
4. Organizational Chart
 - Only provided company org chart with some names and titles. Did not provide job descriptions
 - Did not provide the org chart for the client, nor job titles or descriptions
 -
5. Litigation
 - State they have been involved in litigation as plaintiff or defendant but did not offer specific information.

Individual Comments:

Overall/General

- Proposal is for a Contract Intelligence Platform with Sourcing and Reporting.
- Cloud
- Called: Icertis Contract Intelligence (ICI) platform.

A. General Principal and Requirements pages 2-11

1. Key Solution Functionality Elements – p. page 2 - 4

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

Note: proposal does not follow this section well – did best that I could to find items. Also it mentions KSU to manage the risks. Maybe Kansas University?

- Single Point of Entry: Yes for the ICI
- Smart Routing: Yes.
- Compliance: Yes in diagram.
- Portal: Unsure, can't find..
- Open Marketplace environment: Yes
- Integration: Yes. Page 4 diagram.
- Workflow: Yes. Discussed on page 3
- Document Management: Yes.
- Reporting/dashboards/ rule role based: Unsure, can't find. It does mention analytics.
- Configurable: Yes.
- Transparency: Unsure, can't find.

2. User Experience – p. page 5 - 6

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.
 - **Capability:** They infer that it is a user-friendly system “easy to use”. No demo.
 - **Intuitive:** Doesn't mention
 - **Wizard driven:** Yes, “contextual user experience”
 - **Portal work management:** Yes.
 - **Mobile access:** Yes – page 5
 - **Workload:** - They use MS Office for their products and integrate with them.
 - **Role-based:** Yes.
 - **Recognized by Gartner (Magic Quadrant) and Forrester (the WAVE report)**

3. Bidder Best Practices and Roadmap – p. page 7 and roadmap attachment

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.
 - **Icertis provides a release every quarter, as well as two major and two minor releases in a year.**
 - **Release webinars held 4 times a year**
 - **Connects events – all customers invited**
 - **Customer Meetups**
 - **Cost portion not addressed.**

4. Innovations and Value-Added Features/Services – p. page 8 - 9

In addition to the stated requirement GEs, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• **Inline Narrative:** If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).

- **“AI continues to drive efficiency, compliance and more intelligent spend management. The Icertis AI offering consists of DiscoverAI, Negotiate AI and Visualize AI.”**
- **DiscoverAI:** Built on the Icertis Contract Intelligence (ICI) platform, the ICI DiscoverAI application addresses these challenges by using the power of AI/ML to quickly and efficiently discover attributes and clauses, and surface them in the ICI platform. By matching contract language in legacy and third-party contracts to library clauses using fuzzy matching techniques, it can provide a more complete picture of how a contract compares a company's standard terms.
- **NegotiateAI:** Built on the Icertis Contract Intelligence (ICI) platform, the ICI NegotiateAI app gives businesses the AI-powered insights they need to optimize their contractual negotiations. With the help of this app, you can easily analyze high volumes of contracts, understand their component terms and clauses, and find similar precedents from across your company's entire contract repository. You can also quickly create clause deviations to ensure compliance and improve business velocity. The app works as a plug-in for Microsoft Word to seamlessly surface

these insights right within the familiar user experience that professionals already know and use every day.

- **VisualizeAI:** *The Icertis VisualizeAI application, built on top of the Icertis Contract Intelligence (ICI) platform, enables users to quickly find and load a large volume of contract data, navigate relationships, and easily discover patterns. This app instantly gives users a much broader and more insightful view of the entire contract portfolio.*

5. Customizations/Extensions – p. page 10

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- **Doesn't really address this requirement**
- **It does address good information on their internal practices for a secure platform from an internal QA team to the system having vulnerability assessment and penetration testing process in place..**

6. Alternative Funding Models – p. page – Not found.

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

- **N/A.**

7. Contract Transition and Flexibility – p. page 11

- **N/A**

B. Functional Requirements: pages 11 - 15

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The electronic procurement solution **must** be cloud-based with a Software as a Service (SaaS) delivery model

1. General Functionality. Tab 2, GEN-1 through GEN-40

- **Gen 1: "eProcurement tools proposed are built on top of the same platform ensuring complete seamless compatibility and sync."**
- **Meets most of the general requirements.**
- **CF for Gen 26 – 28.**

2. Supplier Portal. Tab 3, SPR-1 through SPR-23

- **SPR 1: "Icertis offers a collaboration Portal through which suppliers can natively manage all aspects of onboarding, sourcing and contracting. This Portal does not extend to cover P2P functionality. Icertis can however integrate with P2P systems to either transfer data downstream**

for consumption in and adherence to contractual terms in the PO and Invoicing process. Icertis can also ingest data from those systems to display metrics, alerts, consumption and other data coming from P2P systems”

- SPR 19: Icertis can integrate to process 3rd party payments such as administrative fees, but it will take customization and is a high level of complexity.
- Many of the comments say supported without any detail.

3. Supplier Enablement Management Workstream. Tab 3, VDR-1 through VDR-43

- VDR 2 -11: *“Icertis Vendor Relationship Management module covers the enrollment and onboarding of vendors and enables them to capture and maintain their profile information. Vendor registration process to capture of data and documents on configurable forms. Vendor qualification process configuration – initiate evaluation record with inheritance from registration - Configuration of assessment checklists, Assemble / select qualification team, workflow setup to complete qualification, automated setup of supplier master record post qualification decisions. This information can also be integrated from the State systems. All the data, documents and fields captured as part of the onboarding process and completely configurable and defined as part of the implementation process. The fields mentioned here are standard fields available as part of the vendor profiles.”*
- Some comments say “Fully Supported” while others “Supported” Would prefer detailed comments here as it seems the supported ones **may only partially be met.**
-

4. Buyer Portal. Tab 3, BPRT-1 through BPRT-15

- No inline narrative response provided.
- BPRT 1: *‘Standard platform capability. The business apps are built on top of our contract intelligence platform making it seamless and a single platform’*

5. Need Identification. Tab 3, NEED-1 through NEED-7

- N/A

6. Request through Pay Workstream. Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11

- N/A

7. Catalog Capability - Tab 3, CAT-1 through CAT-40

- N/A

8. Sourcing/Bid Management Workstream. Tab 3, SRC-1 through SRC-151

- SRC 1: *“Icertis delivers sourcing capability that enables customers to manage the request process, RFx formulation, event management and the evaluation and selection process. Using Icertis robust REST API library it can easily be integrated with the Need Identification component to pull relevant information into ICI. All information collected can be pre populated into respective solicitation.”*
- **Again – not much detail in many of the requirements or they are left blank. Can not evaluate these.**
-

9. Contract Management. Tab 3, CNT-1 through CNT-88

- CNT 1: *“Supported. ICI provides the capability to experience no-touch contract creation within the line of business systems like CRM, Sourcing or Procurement (or the Need Identification component) by leveraging the Icertis contract creation API that can connect into the sell-side, buy-side processes to take input and auto build a contract for the user based on the business rules defined.”*
- **Again – not much detail in many of the requirements or they are left blank. Can not evaluate these.**

10. Vendor Performance Tab 3, VPE-1 through VPE-25

- No inline narrative response provided.

- VPE 1: *"Icertis is a highly configurable platform and provides the ability to easily setup performance milestones such as completion criteria, payment value amounts etc. associated with suppliers."*
- Many items to be configured.
- Again – not much detail in many of the requirements or they are left blank. Can not evaluate these.

11. Purchasing/Data Analytics Tab 3, PDA-1 through PDA-37

- PDA 1: *"Icertis delivers robust operational reports on contracts and all related information. The system has default reporting capability that can be changed to customer needs and new reports can be easily created during or after the implementation. Icertis system also enables on-the-fly reporting leveraging the search infrastructure. Icertis Contract Management has a full feature analytics module fully integrated into the core product. Contract analytics provides valuable performance insights on all areas of contracts from legal, finance, sales, and procurement. The system enables insights on cycle times, deviations, risks, statistics (expiry, renewal, pending etc.), procurement and sales business metrics on contract revenue / spend, savings etc. The analytics dashboards are configurable for a user and can be enabled only for power users that need to have the deeper business metrics reporting for decision making."*
- ALL requirements in this section except for #1 are commented as "supported" and need "CF". Unsure if this contradicts the statement of a robust system.
- Page 20

C. Technical Requirements: Pages 20 -23

1. Availability.

The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.

Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.

- Uses Azure.
- Commits to 99.5% uptime.

2. Accessibility Requirements.

The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.

- Nothing provided.

3. Audit Trail and History RTM: Tab 4, TECH-1 through TECH-5 and

- TECH 1: *"Icertis Contract Intelligence (ICI) platform offers detailed application level auditing. The transaction audit log is captured in history of the transaction and captures all user actions on the record with date and time stamp. It also captures the change log which includes any changes, history of the change log including changes in user permissions or roles. "*
- Can meet requirements either by "INT" or "A"

4. Browsers Supported

- The general web browsers are supported (Microsoft Internet Explorer, M Edge, M Edge Chromium, G Chrome, Firefox, and Safari). Microsoft Internet Explorer compatibility mode is not supported. No concerns.

5. User Accounts and Administration RTM: Tab 4, TECH-6 through TECH-20

- TECH 6: *"Icertis Contract Intelligence (ICI) platform has granular RBAC (Role-based Access Control) module with least privileges implemented in the application, based on business user roles and responsibilities. The authorization model is completely configurable, defined and controlled by customer using ICI platform's web interface based on customer's business and functional needs. Icertis supports both profile and role-based authorization model. The authorization model permits users to access the functionality of the solution (through*

authorization with roles and permissions) works in tandem with the organizational hierarchy (e.g. functionality, contract clauses, contract terms, supporting documentation, etc.) or manipulate functions and data. Hierarchical or function-based authorization schema can be implemented as well. ICI platform also supports dynamic authorization model that can also be used to replicate customer's internal authorization model in ICI platform to drive the permissions and role of a user in ICI platform."

- Can meet all requirements either by "INT", "CF" or "A" and most are at a medium level

6. User Authentication RTM: Tab 4, TECH-21 through TECH-25

- Do not meet most requirements. *"Icertis Contract Intelligence (ICI) Platform do not have its own native authentication mechanism and do not manage any user credentials. ICI strongly recommends integration with customer's Identity Provider for user authentication and to provide single sign-on capabilities. All authentication and password policies including multi-factor authentication are driven by customer's Identity Provider."*

7. Federated Identity Management

- Yes - "provide single sign-on capabilities using SAML 2.0, Oauth, OpenID, or WS-Federation

8. Data Conversion RTM: Tab 4, TECH-26 through TECH-34

- TECH26: *"Icertis has robust historical data migration process. Icertis can enable data upload from existing repository. The legacy migration\data upload can be enabled by integration with the repository or upload of extracted data. For bulk legacy data upload, Icertis Contract Intelligence (ICI) platform various options like bulk REST APIs, SFTP based file upload. The robust data migration process is based on AIML capabilities of ICI platform. The bulk API's support migration of legacy contracts, metadata as well as supporting documents."*

The platform has its own robust, generic integration framework which is capable of integrating with any system using various secured integration options provided by the platform for inbound and outbound integrations. The integration framework offers integration options like API based integration, file-based integration using SFTP with support for various file formats, integration using middle ware like Azure Service Bus, MuleSoft Kafka Service Bus etc. but not limited to. The integration framework is capable of calling REST\SOAP services from external systems as well to push or pull data.

The platform provides various connectors to connect with ERP systems like (Oracle/SAP), CRM's such as SFDC and Microsoft Dynamics. In addition to that the platform also provides out-of-the-box integration capabilities with Coupa, Workday, Box, Thomson Reuters, D&B etc. using connectors provided by the platform. Please refer "ICI Integration Options.pdf" and "Contract Migration.pdf" for more details."

- TECH 27 - 33: Icertis responds to requirements with: *"Icertis Contract Intelligence (ICI) Platform has out of the adapters available for ERP systems like Oracle, SAP, SAP Ariba, CRMs like SFDC and Microsoft Dynamics, for Workday and Coupa. All these adapters are configurable and can be used with State's financial system to push or pull transactional data. The platform also has Integration Framework which can be used to set up the integration interface with State's financial system if default ICI adapters are not available using any of the integration option available as mentioned in "ICI Integration Options.pdf" to facilitate the data push\pull or data conversion."*

9. Interface and Integration RTM: Tab 4, TECH-35 through TECH-60

- TECH 35: *"The platform has its own robust, generic integration framework which supports real time, near to real time and batch\scheduled integration capabilities. For real time integration, platform has its own REST API layer as well as integration framework is capable of calling SOAP or REST APIs provided by customer landscape systems to push\pull data. ICI platform has Asynchronous Message Driven Architecture to achieve downstream Integration at Scale with Publish / Subscribe model. This near to real time integration capability can be implemented using middleware's like Azure Service Bus, MuleSoft Kafka Service Bus etc. but not limited to. ICI*

integration framework has out of the box support for file based integration using SFTP which can be scheduled interface. Icertis can provide its own SFTP server for file based integration or it can be integrated with customer's SFTP server for the integration.

The scheduling capabilities are provided for all integration options like REST APIs, File based integrations or using publish-subscribe patterns with the help of middleware's

Please refer "ICI Integration Options.pdf" for more details"

10. Office Automation Integration RTM: Tab 4, TECH-61

- Icertis Contract Intelligence (ICI) Platform supports all industry standard file formats including all types of MS Office documents.

11. Mobile Device Support RTM: Tab 4, TECH-62

- TECH 62: *"Icertis Contract Intelligence (ICI) Platform has a responsive UI which is mobile adaptive and responsive to all type of devices. The operating systems needs are not applicable as ICI platform is a SaaS offering to end customers hosted on Microsoft Azure cloud. The platform is accessible over the internet using any of the recommended web browsers like Google Chrome, Internet Explorer - IE 11 and above and Edge 44, Mozilla Firefox- Version 67 and above, Apple Safari-Version 12 and above."*

12. Mobile Applications

- Yes, have an app.

13. Data Ownership and Access

- No response provided.

14. Date Retention, Archive and Purge Considerations RTM: Tab 4, TECH-63

- TECH 63: *"By default, all data is retained till end of an engagement. No data is hard deleted from Icertis Contract Intelligence (ICI) platform. All data is soft deleted. All contract related data always remain within the database and there is no need to archive old data unless it is needed for compliance reasons by customer. Icertis can archive data and apply customer's archival policies for contract data archival if required."*

For purging, Icertis has a data purging policy in place which can be customized as per customer requirements. Data that is marked for "soft" deletes is purged or "hard" deleted after defined period to recover database space. Orphaned documents are purged after every define interval to recover storage space. Logs are purged every 90 days."

15. Disaster Recovery Plan

- Meets requirements

16. Solution Environments RTM: Tab 4, TECH-64 through TECH-67

- TECH 64: *"During implementation, Icertis provides non-production and production environment. The non-production environment is used for testing and training of new features and configurations and it is replica of production environment. The patches and upgrades are first deployed on non-production environment where customer can perform user acceptance tests. The non-production environments can be refreshed on request. The data from production environment does not go to non-production instances for any purposes unless it is required by customer. The availability of non-production environment post go-live will be decided as per the licensing agreement. Icertis also facilitates additional environments as per customer requirement which can be decided as per the agreement."*

17. Solution Technical Architecture

- Meets specs.
- Attachment B lays out their network.

18. Solution Network Architecture

- Meets specs.
- Attachment B lays out their network.

19. System Development Methodology

- Can't find a response.

20. Service Level Agreement

- Page 23 – points to the Azure SLA link
- Can't find their SLA or that they reviewed the Master SLA

D. Security Requirements: p. pages 69 - 87

1. Cloud Security Alliance (CSA) Compliance

- Cannot find where Icertis is officially certified for NIST 800-53 or has completed the CAIQ.

2. Security and Privacy Controls – nothing to add.

3. Security Certifications – nothing to add.

4. Annual Security Plan – nothing to add.

5. Secure Application and Network Environment– nothing to add.

6. Secure Application and Network Access – Tab 5, SEC-1 through SEC-6.

- All five of the requirements are either vague or are not met.

7. Data Security – nothing to add.

8. Personally Identifiable Information Protection – nothing to add.

9. Security/Privacy Issue Occurrence – nothing to add.

10. PII Data Actual/Attempted Access or Disclosure – nothing to add.

11. Security Breach Reporting – nothing to add.

E. Implementation Services Requirements: Pages x -x

- N/A

F. Managed Services Requirements:

- N/A

G. Other Available Services: p page 106: RTM: Tab 7 MNGD-1

- N/A

H. Video Demonstrations:

- No video/demo provided.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: (Icertis Inc)

CATEGORY #(s): 3

DATE: (10/3/2021)

EVALUATOR NAME: (Joe Zrioka)

EVALUATOR DEPARTMENT/STATE: (State of Maine Division of Procurement Services)

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- All 3 Preliminary docs, cyber liability 5 mil
- enterprise Contract Intelligence platform in the cloud
- Gartner contract lifecycle management Magic Quadrant in Q1 2020
- Forrester WAVE report identified Icertis as market leader in contract lifecycle management in Q1 2019 and Q1 2021

2. Previous Projects

- Microsoft - Icertis assembles enterprise license agreements representing \$115bn revenue to Microsoft.
- Large Aerospace & Defense Company - Deployed the Icertis Contract Intelligence platform on Azure Gov GCC high - security and compliance (Azure Gov, ITAR, FAR and DFAR)
- Offshore Oil & Gas Platforms Contractor – monitor regulatory compliance in their global contracts governance - analyzed to detect FAR/DFAR/ITAR clauses
- World Leader in Thermal Imaging – regulation and compliance - Hosted on Azure.gov
- Ivy League University in New York: - centralize contracting processes across all 14 schools and ensure compliance, while also expanding within the platform to include all of the University's contract types – sell-side, buy-side, and internal
- MassTech: - ensure compliance with public agency requirements.
- Large Private University in DC: - Contract Intelligence with key integrations into ERP and procurement software
- **unable to provide contact information at this stage due to the contractual obligations**

3. Subcontractors

- None for Category 3: eSoftware Only

4. Organizational Chart

- No chart
- Roles defined for Icertis and state

5. Litigation

- no litigation in which Icertis is currently named or within the past (5) years

6. Financial Viability

- privately held company; DUNS number, 965502482. Addition financial viability information can be made available under a mutual NDA.

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: **Icertis**
CATEGORY #(s): 3
DATE: **1/5/2022**
SME/EVALUATOR NAME: **Joe Zrioka**
DEPARTMENT/STATE: **Maine**

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements **Icertis Contract Intelligence (ICI) platform manages the complete lifecycle from authoring, negotiation, approval, execution, compliance, risk, and expiry. Includes a rules engine. Configurable design and architecture so clients can set up their own contract types in related metadata. Product portfolio consists of contract intelligence platform, business in AI applications. User Experience intuitive user interface, Dashboards and personalization that are role based Ms office integration, mobility experience with IOS, Android , and windows**
Bidder Best Practices and Roadmap **Release every quarter as well as two major and two minor releases in a year. Work with each customer on each release to avoid disruptions. Icertis Connects Online, Product Release Webinars, Customer Meetups, always open, interactive, Icertis Customer Community. (best practices).**

Innovations and Value-Added Features/Services

The Icertis AI offering consists of DiscoverAI (By matching contract language in legacy and third-party contracts to library clauses using fuzzy matching techniques, it can provide a more complete picture of how a contract compares a company's standard terms.), Negotiate AI (analyze high volumes of contracts, understand their component terms and clauses, and find similar precedents from across your company's entire contract repository. You can also quickly create clause deviations to ensure compliance and improve business velocity. The app works as a plug-in for Microsoft Word), and Visualize AI (The app uses cognitive skills to derive contextual insights from contract data. It does this by first recognizing the patterns and relationships that exist within ICI contract data and then linking this data to outside sources like Dun & Bradstreet. This enables users to group and link contracts based on their status, risk level, or other attributes and then navigate across the entire contract portfolio based on these insights.).

Customizations/Extensions All customizations and extension go through a rigorous review for compatibility, applicability to other customers, security, and performance. Customization is not available for individual entities.

Alternative Funding Models Not answered/offered.

Contract Transition and Flexibility This is not applicable as Icertis has just launched our Public Sector group and do not currently have an existing State Government contract. Does not answer the possibility of future Transition and flexibility.

Functional Requirements

General Functionality – 3 configurations w/med LOE, 37 OOBX

Supplier Portal – 1 customization w/High LOE (Icertis can **integrate to process 3rd party payments such as administrative fees) is this a custmz? in general principles and requirements they did not **customize** unless it benefited all customers. , 22 OOBX**

Supplier Enablement/Management 1 Configuration w/med LOE, and 42 OOBX.

Buyer Portal 15 OOBX.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: **lcertis**
CATEGORY #(s): 3
DATE: **1/5/2022**
SME/EVALUATOR NAME: **Joe Zrioka**
DEPARTMENT/STATE: **Maine**

Need Identification **RTM not completed**
Request through Pay **RTM not completed**
Catalog Capability **RTM not completed**
Sourcing/Bid Management **35 configurations w/24 low and 11 med LOE, 1 INT w/med LOE, 111 OOBX**
Contract Management **21 configurations w/11 Low and 10 med LOE, 67 OOBX**
Vendor Performance **16 configurations, w/12 low and 4 med LOE, 9 OOBX**
Purchasing/Data Analytics **37 configurations w/low LOE**

Technical Requirements

Availability **99.5% uptime. As part of the standard service, it offers a RPO of 24 hours and an RTO of 8 hours.**

Accessibility Requirements **did not answer**

Audit Trail and History **Create specific templates and workflows for your vendor processes with each step and modification tracked for a full history and audit trail.**

Browsers Supported **Chrome, Safari and Firefox supported across mobile platforms only?**

User Accounts and Administration **not discussed**

User Authentication **Authentication driven by customer's Identity Provider•Federation with any Identity Provider (IdP)•Integration protocols supported by ICI•WS-Federation•SAML 2.0•OAuth 2.0•OpenID (Identity + OAuth 2.0)**

Federated Identity Management– **see user authentication above**

Data Conversion **not discussed.**

Interface and Integration **lcertis offers pre-built experiences on CRM Solutions like Salesforce, Microsoft Dynamics, Microsoft Teams, Office 365, and Workday. lcertis also offers pre-built Adapters for integration scenarios with SAP, Oracle, Workday, Ariba, and Coupa. Framework supports following integration modes - File Based – SFTP, Azure Blob, SSH - Message Based – Using Azure Service Bus as Middleware The platform is also supports Asynchronous Message Driven Architecture to achieve downstream Integration at a scale with Publish / Subscribe model using other middle wares like Kafka Service Bus, Mule Soft Service Bus, IBM MQ etc. but not limited to. The platform provides various connectors to connect with ERP systems like (Oracle/SAP), CRM's such as SFDC and Microsoft Dynamics. In addition to that the platform also provides out-of-the-box integration capabilities with Coupa, Workday, Box, Thomson Reuters, D&B etc. using connectors provided by the platform. Default adapters for eSignature providers like (DocuSign/Adobe). The platform also supports low friction integration using iPaaS (Integration Platform As A Service) frameworks like MuleSoft, Azure iPaaS, Dell Boomi**

Office Automation Integration **MS Office integration.**

Mobile Device Support **iOS, Android, and Windows**

Mobile Applications **none discussed**

Data Ownership and Access **not discussed**

Date Retention, Archive and Purge Considerations **none discussed**

Disaster Recovery **A DR and BCP plan was attached. It included customer roles in the plan but it's not clear whether it is tested and whether the customer is part of that testing.**

Solution Environments **unknown**

Solution Technical Architecture **Architecture diagrams provided in both in the response and the tech arch attachment. Offered in single and multi-tenant deployment model. Deployment support for Azure Government cloud including those workloads covered by The DoD Cloud Computing Security Requirements Guide.**

EVALUATOR NAME: Michael Bacu

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Contract Intelligence platform
 - Contract Lifecycle Management
 - Very little about its product
2. Previous Projects
 - Commercial project example given
 - Lesser examples of public sector business
 -
3. Subcontractors
 - Uses subcontractors but not for category bid in this instance
 -
 -
4. Organizational Chart
 - Very general role description
 - Unsure how roles apply to NASPO responsibilities
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - Did not provide viable information to discuss this section
 - Would consider if NDA was warranted or possible to gather information not provided
 -

Innovations and Value-Added Features/Services

8	DiscoverAI Built on the Icertis Contract Intelligence (ICI) platform, the ICI DiscoverAI application addresses these challenges by using the power of AI/ML to quickly and efficiently discover attributes and clauses, and surface them in the ICI platform. By matching contract language in legacy and third-party contracts to library clauses using fuzzy matching techniques, it can provide a more complete picture of how a contract compares a company's standard terms	
	NegotiateAI Built on the Icertis Contract Intelligence (ICI) platform, the ICI NegotiateAI app gives businesses the AI-powered insights they need to optimize their contractual negotiations. With the help of this app, you can easily analyze high volumes of contracts, understand their component terms and clauses, and find similar precedents from across your company's entire contract repository. You can also quickly create clause deviations to ensure compliance and improve business velocity. The app works as a plug-in for Microsoft Word to seamlessly surface these insights right within the familiar user experience that professionals already know and use every da

Functional Requirements

General Functionality

11	a comprehensive Contract Intelligence solution that manages the complete lifecycle from authoring, negotiation, approval, execution, compliance, risk, and expiry.	
	Icertis Contract Intelligence delivers a comprehensive rule engine to not only orchestrate zero touch contract lifecycle processes but also light's up enhanced rule based proactive monitoring mechanisms to improve compliance on all dimensions – statutory, policy, process. With its next generation architecture, the system is even more scalable on cloud and delivers enhanced support for integration, mobility, and analytics. Icertis Contract Intelligence (ICI) has a configurable design and architecture that allows customers to setup their own contract types and related metadata. This configurable capability enables capture and management of any information related to contracts that helps improve compliance and reduce risk. Clients have no restrictions on setting up the objects, relationships, folder structure and related attributes.

Sourcing/Bid Management

14	Complete RFx Management Automate the entire Request-to-Award process, using pre-approved templates for RFIs, RFQs, and RFPs with multi-currency, multilingual support. Enable business users to initiate requests using an intuitive self-service request process.	
	Excel-based Bid Evaluation and Selection Use the built-in team management capability to unite stakeholders. Perform side-byside analysis of bids or proposals and score them using both qualitative and quantitative criteria.	
	Dynamic Associations and Workflow Approvals Use a built-in rules engine to automatically associate key information to RFx events such as pricing sheets. Configure different workflow approvals for different types of sourcing events.	
	Integrated Risk Management and Compliance Gain full visibility into supplier risk and ensure compliance across source-to-contract process. Leverage built-in performance dashboards to get directional insights into RFx cycle time, supplier risk, or contractual obligations.	
	Cognitive Sourcing Intelligence Use AI/ML-based contract terms and clause recommendations to negotiate into RFx events. Analyze deviation as a part of the bid analysis. Initiate legal contracts based on RFx awarding.	
	Simplified Supplier Collaboration Enable suppliers to participate in RFx bidding with an integrated supplier portal. Suppliers can also self-register, or submit bids and proposals with an Excel file	
	Personalized Operational Dashboard Get quick insights on the state of sourcing events with easy-to-configure, role-based dashboards across your organization.	
	Full-text Global Search across sourcing and contract repositories from single full text or a structured search capability. Personalize your search experience by using saved search	
	Most of RTM for Sourcing Bid Management – they just put “supported”	concern

Contract Management

15-19	Smart Contract Initiation	
	Self-Service Contracting Achieve faster time to execution with business users creating contracts in a self-service mode. Enabling self-service not only helps to improve cycle times, but also significantly reduces the legal teams operating expenses.	
	No-Touch Auto Initiation Experience no-touch contract creation within your internal systems like CRM, solicitations, or procurement, by leveraging the Icertis contract creation API that can connect into the sell-side and buy-side processes to take input and auto build a contract for the user based on the business rules defined	
	Intuitive Request Wizard Improve collaboration between your departments and legal with a structured flow of information using intuitive request forms.	
	Bulk create contracts Significantly improve productivity and response times with the ability to bulk create contracts. Contract teams can process requests quickly by leveraging the MS Excel based bulk contract create capability.	
	Clause Management Drive contract standardization for reduced risk with the usage of standard approved language from the clause library.	
	Template Management Icertis Contract Intelligence delivers a comprehensive template lifecycle management capability that drives contract creation based on template selection rules. Template authoring in MS Word using Icertis Word Add-in, allows library clauses to be pulled into the document, entry of custom text, tagging of metadata in the document, and the tagging of exhibits/annexures etc. The system enforces the approval process before the template is available for contract creation by rules.	
	Intelligent Contract Authoring Contact us: icertis.com/contact 17 Significantly improve governance and compliance with intelligent authoring of contracts by the Icertis system.	
	Commercial Terms Management Leverage the flexible platform capability in Icertis, to model all the commercial terms associated with the increasingly complex contracts in government.	
	Most of RTM for Contracts – they just put “supported”	concern

Individual SME Comments: This supplier is proposing a Contract Intelligence platform
Concern that many responses on requirements are a "configurable item" and some responses just state "Fully Supported". This leads me to believe that this supplier is relying on integrations to have those fields display in their solution to meet requirements.

This response is relying on many integrations to meet requirements and my concern is where in the system is this data going to be housed? Is this system that customizable?

Supplier is missing sections that required narrative and sections on the RTM that are relevant to their response. No Video was provided.

General Principal and Requirements

Key Solution Functionality Elements – Page 2

- Manages complete lifecycle from authoring, negotiation, approval, execution, compliance, risk, and expiry
- delivers enhanced support for integration, mobility, and analytics
- Icertis Contract Intelligence (ICI) has a configurable design and architecture that allows KSU to setup their own contract types and related metadata. **What is KSU?**
- Contains contract intelligence platform, applications that address specific public sector challenges, and ICI Experiences that embed the power of the ICI platform within common software
- Provided list of capabilities on Page 4

User Experience – Page 5

- Maintain system as system administrator
- Role based dashboards configured by admins for groups or individuals can configure their own
- Has integration with MS Office Suite.
- Can use with the Icertis mobile app
- Provided awards received on page 6

Bidder Best Practices and Roadmap – Page 7

- Provides releases every quarter as well as 2 major and 2 minor in a year
- Offer numerous ways to improvements and learn from others
- Connect Online, Product Release Webinars, and Customer Meetups. Page 7

Innovations and Value-Added Features/Services – Page 8

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Est. 2009.
 - Infosys eProcurement Solution – software as a service system (cloud based)
 - End-to-end, Source-to-pay, SAAS system.
 - Partner with Ernst & Young (EY) and SAP Ariba (SAP), Infosys-EY-SAP partnership under the banner of “Team Infosys”
2. Previous Projects

5 projects listed. All projects are Category 3 related.

 - Public Services and Procurement Canada. Implemented EPS (e-procurement solution)
 - Eversource Energy. Implemented a supply chain procure to pay system.
 - Zoetis. Implemented and supported the SAP Ariba eprocurement solution.
 - Chicago Public Schools. EY provided consulting and project management.
 - California Dept. of Healthcare Services. Deployed the entire SAP Ariba procurement platform.
3. Subcontractors
 - Ernst & Young (EY) - consulting
 - SAP Ariba (SAP SE) – the eprocurement solution
 - Allied Digital Services LLC – IT Transformation
4. Organizational Chart
 - Yes, provided along with job descriptions.
5. Litigation
 - Vendor states none.
6. Financial Viability
 - DnB provided and audited financials. Low risk.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, cyber liability insurance 1 mil
 - SAP Ariba modules – turnkey
 - Gartner has placed Infosys in the LEADERS QUADRANT for SAP **Implementation** Services worldwide.
2. Previous Projects
 - Public Services and Procurement Canada (eProcurement - Complex integration) **Implementation**
 - Eversource, Berlin, Connecticut (Supply Chain Mgt) **implement complete functionality**
 - Zoetis implementation & support of SAP Ariba eProcurement -**Implementation, upgrade & Managed Service**
 - Chicago Public Schools - Supply Portfolio Optimization – Category Mgt & Strategic Sourcing – **EY assisted with implementation**
 - SAP Ariba procurement for California Department of Healthcare Services – **this may have been strictly a purchase of SAP Ariba**
 - Concerned this category is used to offer software but sell implementation behind the purchase
3. Subcontractors
 - Ernst and Young
 - Allied Digital Services
 - Each sub credentialed by the prime with history and metrics
4. Organizational Chart
 - Proposed Maine and Infosys org charts specific to the project
 - Roles defined
 -
5. Litigation
 - No litigation
 -
 -
6. Financial Viability
 - D&B “snapshot” dated 10/5/2021????????
 - Financial Statements going back to 2018

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - SAP Ariba Cloud Solution
 - Azure / Oracle Cloud
 - Somewhat general information, but references capabilities to NASPO needs
 - Action driven response instead of marketing centered
2. Previous Projects
 - More prevalent overseas referenced
 - Canada Government large scale, not mature to show true ROI
 - Energy Company Eversource does not show breadth for statewide engagement, Supply Chain Management; no reference to purchase flow through solution compared to prior.
 - Zoetis is new enablement 2020, not mature to show results or effectiveness
3. Subcontractors
 - Ernst & Young (EY) for consulting, business strategy
 - EY more active in Canada
 - SAP is subcontractor
 - Allied Digital Services system design
4. Organizational Chart
 - Good to see customer org chart to show team approach and ed user commitment needed
 - Personnel descriptions are vague and general
 -
5. Litigation
 - No litigation to InfoSys
 - No discussion around subcontractors
 -
6. Financial Viability
 - Partial B&B snapshot submitted.

.....

Individual Comments:

Overall/General

- The Ivalua Solution.
- SaaS Hybrid Cloud Solution.
- State that they built it for the public sector.

A. General Principal and Requirements

1. Key Solution Functionality Elements – p. page 3 - 7

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.
- Single landing page for the single point of entry with same look and feel throughout the whole system.
- Smart Routing: workflow is tailored to meet each organization's needs
- Compliance: Ivalua continues to build in public sector best practices throughout the solution. Some of these features include:
 - Native public transparency portal
 - Renaming throughout the solution to align to public procurement terminology
 - M/WBE Management
 - Sealed Bidding
 - Subcontractor Reporting
 - Cooperative Reporting
- Portal: All users (internal and external) have ability to access their account through portal and personalize their page.
- Open Marketplace Environment: They express they want it like a “Google experience” - modern digital and ecommerce experience, driven by search and content.
- Integration: Robust Integration Toolbox with capability to connect with multiple ERP solutions, third-party data providers, and suppliers' systems. Ivalua supports multiple format options (cXML, XML, SAP Idocs, XLS(x), DOC(x), CSV, AS2, etc.) and in multiple protocols (manual load, batch load, EDI,

SFTP, HTTP, etc.). Our integrations toolkit and library connects to over 60+ ERPs and includes hundreds of data mapping formats and standard integration templates.

- **Workflow:** Ivalua expresses this area as one of their “crown jewels” – area of expertise.
- **Document Management:** Core platform with an integrated foundation.
- **Reporting:** Many out of the box reports and the ability for users to create their own. Reports can be simple to graphs, bar, line, pie, etc.
- **Configurable:** Ivalua claims their SaaS solution is the most configurable hosted solution on the market as extensively reported by industry analysts.
- **Transparency:** public portal allows for transparency and authorized users have ability to get oversight through audit trail.

2. User Experience – p. page 7 - 8

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.
- **Ivalua's explanation to User Experience is short, but addresses most of the points. I do not see anything on Wizard-driven capabilities.**

3. Bidder Best Practices and Roadmap – p. page 9 - 11

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.
- **Major Software Product releases are delivered by the Ivalua R&D division twice a year.**
- **Client can choose to upgrade their client application either 18 months or 24 months**
- **Ivalua leverages advanced technologies such as machine learning, natural language processing (NLP) etc. and are members of various industry and procurement or supply chain associations, that contributes to their knowledge.**
- **Updates can be scheduled by the State**
- **During the implementation phase, Ivalua together with State will work to better, more effective solutions, processes, and approaches, based on their experience. These will then be built into the design of the solution.**
- **Product Roadmap: No direct 3 year map, but a high level of what is being worked on.**
 - Investing heavily in developing specific capabilities to meet Public Sector Procurement needs. Approximately 60% of the roadmap items coming from the customers information.
 - They have a dedicated Public Sector team.
 - Enhancements in mobile experience.
 - Invoicing and payments investments.
 - Enterprise-wide AI powered **Contract Lifecycle Management (CLM)**
 - Supplier Risk and Performance – adding and enhancing new features / capabilities
 - Highest level of security – investing resources to maintain highest level.
 - Continue toward more seamless and simpler.

4. Innovations and Value-Added Features/Services – p. page 11 - 13

In addition to the stated requirement/GEs, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

1. **Help Desk – level 1:** Provide suppliers or internal users to get on- demand help from Ivalua if they run into difficulties using the system. Level 1 help desk is the users first interaction when they need help, as opposed to a State/organization managed help desk.
2. **Cooperative reporting enables:**
 - Definition of cooperative contracts within the contract record, including administrative fee
 - Reports automatically generated and sent to suppliers on a given time period (ex. quarterly)
 - Supplier submission of spend on cooperative contracts by external bodies with automated calculation of owed administrative fees
 - Workflow for approval of supplier reports
 - Integration with a payment provider to capture administrative fees if needed

5. Customizations/Extensions – p. page 14

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- The Ivalua SaaS platform relies on configuration, not custom code, as the means for clients to modify and maintain a solution that meets their needs.
- enhancements are not custom code but instead configuration & data and that configuration & data is carried forward with the State's instance as the Ivalua solution is updated.
- Ivalua keeps an extra environment of a copy of the State's customizations / extensions.

6. Alternative Funding Models – p. page 14

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

- **No alternative funding proposed. They are open to discussion and options.**

7. Contract Transition and Flexibility – p. page 14

- **Ivalua answers this in one sentence: *Ivalua is certainly willing to enter into good faith discussions with Participating Entities that wish to explore transitioning their current contract under the terms of the newly awarded Master Agreement.***

B. Functional Requirements: pages 28 – 48

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- All 3 Preliminary docs, cyber liability 10 mil
- cloud based Spend Management solutions
- S2C (source to contract) and P2P (Procure to pay)
- Ivalua solution is modular: Supplier Risk & Performance, Solicitations & Bid Management, Contract Management, eProcurement, Invoicing, and Spend Analytics
-

2. Previous Projects

- City of New York - SRM, eSourcing, Contracts & Catalogs, eProcurement, Invoicing and Business Intelligence
- State of Maryland - implemented eMaryland Marketplace Advantage (eMMA), digital platform integrates with other State systems for all users and procurement processes
- State of Ohio – “OhioBuys” an online purchasing solution for buyers within state government and suppliers to the government
- State of Alabama - Ivalua’s Source to Pay solution
- Los Angeles Department of Water and Power - Solicitation and Supplier Information Management solution; part of the Ivalua Source to Pay platform
- Did not provide client contacts now but will if they move forward in selection

3. Subcontractors

- Ivalua Cloud (except for Azure based regions) is hosted in third-party datacenters, and all the infrastructure equipment is owned, administered, and monitored by Ivalua personnel only. Since Ivalua does not rely on any 3rd party personnel or 3rd party infrastructure, we know at all times where the client data is stored.
-
-

4. Organizational Chart

- Combined state and Ivalua proposed project org chart
- Roles not defined
-

5. Litigation

- No litigation

Contract Management 3 customizations with low level of effort, 24 configurations w/low and medium LOE, Three Third parties with low level of effort , 58 OOBX
Vendor Performance 14 Configurations with low level of effort , 11 OOBX
Purchasing/Data Analytics, 1 customization with medium level of effort, 7 configurations with low level of effort, 1 in development with medium level of effort, 1 integration with medium level of effort, 27 OOBX

Technical Requirements

Availability Accessible 24 hours a day seven days a week hosting SLA uptime 99.8% outside of scheduled maintenance.
Accessibility Requirements Working towards meeting WCAG 2.0 level AA. Working with third party company to audit and value a platform VPAT completed in available upon request
Audit Trail and History All user actions and activities are registered logged in time stamped. Every transaction created every status change every movement to the next step in a workflow in every addition or deletion of a data item is logged. If audit trail must be activated for specific field the auditable checkbox can be marked corresponding to the field on the value a table.
Browsers Supported Internet Explorer all Microsoft supported versions , Microsoft Edge last three major releases, Chrome last three major releases, Firefox last three major releases.
User Accounts and Administration Application pages and functions are controlled by profiles , authorization, and perimeters. A perimeter can be geographic or functional , or a combination of both. User roles and user access are defined through administrative components. Only users with the appropriate profile can load a page or execute a function. Possible to limit the data access of business objects on a per user basis.
User Authentication Supports multiple authentication schemes; login password authentication, single sign on with saml 2, two factor authentication, reverse proxy II S agent. Password rules are fully customizable.
Federated Identity Management– supports SAML 2.0 protocols for Single Sign On
Data Conversion Conduct a data assessment. Data strategy will be established identifying the data conversion scope. Leverage ivalua tools. Combination of ivalua and participating entity resources perform data conversions which include methodology to perform several iterations in small batches to test and validate. Too Simple? Data cleansing not evident at the source or during testing.
Interface and Integration Integration capabilities with major ERP systems and standard integration with suppliers and 3rd party business services. Offer standard interface templates out of the box.
Office Automation Integration Word excel and PDF
Mobile Device Support Screen menus change from PC layout to mobile friendly layout.
Mobile Applications Mobile solution is not based on mobile app but mobile web solution
Data Ownership and Access Applies a single data classification to all customer data. Internally customer data is confidential and limited to a small number of individual individuals on a need to know basis. Customers remain the data owner and data controller of all data and control it in accordance with their access control data retention and data classification policies. Through the term of contract customers can export data.
Date Retention, Archive and Purge Considerations Customers decide what information is to be stored, how it is to be used, and how long it is retained. I value a does not delete or modify customer data unless requested by the customer , and only processes data in accordance with contractual obligations and customers configuration of their instances

DEPARTMENT/STATE: Maine

Disaster Recovery Plan BC and Dr program is based on ISO I EC 22301 standard framework and is tested annually. Not clear if clients are involved with testing unless they are relevant stakeholders.

Solution Environments Development, acceptance, production.

Solution Technical Architecture Multi instance architecture delivers a logical single tenancy by isolating all customers data from each other. Application servers are in a discrete network segment. Database layer consists of database servers, installed in a discrete non Internet routable network segment. No Co mingling of any customer data between application instances and databases.

Solution Network Architecture Dedicated DMZ, network segmentation, dedicated URL, and site to site VPN which is a paid service. Intrusion detection system and intrusion prevention system monitors.

Firewalls filter inbound and outbound connections to the Internet as well as between intra sites VLAN zones. VLAN partition various networks. Principle of least access. Monitoring logs unexpected network activity and notifies staff in real time via emails and text messages physical access control through identity control, badge access, interior and exterior video surveillance . Security guards 24 7365 dedicated locked racks on interruptible power supply with diesel generator redundant heating ventilation air conditioning firesafety inert gas all components are fully fault tolerant including uplinks storage chillers HVAC systems HV AC everything is dual powered.

System Development Methodology Open web application security project OWASP. Secure SDLC policy and procedures. New features are evaluated for security impact during design phase with regular code reviews peers and SA St tools. Tested for effectiveness during the QA process. Development process based on agile methodology with iterative approach. Penetration testing conducted prior to major software release by independent security firm. Cloud services are in accordance with NIST security focused configuration management of information systems guidelines. All application changes and updates are at the customer request and controlled by the customer they are performed behind the scenes for minor updates or through scheduled downtime for major updates.

Service Level Agreement SLA performance credits When performance falls below 99 point 8%. RTO 48 hours 8 hours 4 hours RPO 24 hours 24 hours 12 hours these are standard premium and platinum service levels and presumably additional cost

Security Requirements

Cloud Security Alliance (CSA) Compliance CAI Q completed

Security and Privacy Controls currently validating controls and safeguards against NIST SP 800 53 revision 4 moderate

Security Certifications ISO IEC 27001, SOC2 , ISAE 3402 Europe , annually audited for HIPAA. Not currently audited for PCI DSS compliance. Fedramp ready with our Gov cloud

Annual Security Plan Ivalua has built its security program and implemented an Information Security Management System (ISMS) in accordance with ISO-27001. The security controls deployed are in alignment with ISO/IEC 27001 and NIST SP 800-53 "Moderate" baseline requirements to address the information security risks. We are certified SSAE-18 (US) and ISAE3402 (Europe).

Secure Application and Network Environment Ivalua has implemented proactive security procedures, such as perimeter defense and network intrusion prevention systems to secure its perimeter. Dedicated DMZ, network segmentation, dedicated URLs, and Site-to-Site VPN (note: a paid service) are some of the other measures implemented to protect customer instances from cyber-attacks.

Secure Application and Network Access Ivalua uses a variety of strong encryption and key management protocols, cyphers, and processes from encrypting data/files in transit and at rest

Data Security Ivalua Solution architecture leverages a multi-instance tenancy model on shared servers.

Our model creates a very distinct boundary between the data of each client. Each client application instance runs under a dedicated application pool process with a client dedicated identity. This model also

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Collaborative Network
 - Six modules
 - Proposal for this section not specific to what workstream it would provide, same as Category 1
 - Take note of how modules integrate with outside solutions in practice
2. Previous Projects
 - NYC Mayor's office is a very narrow implementation
 - Maryland Good reference of Statewide implementation; however unspecific results given to validate the value of efforts.
 - Ohio good representation of state implementation; only a single module test to limited agencies in 2018. Supplier supports expanding, no mention if Ohio does or will.
 - Alabama is limited in scope and still in implementation; unknown if successful
 - LA water department limited scope and still in implementation; premature reference as there is no ROI provided
3. Subcontractors
 - Interesting that Data for on-prem is stored by third party. Exploration is needed on data security and liability to end users.
 -
 -
4. Organizational Chart
 - Extremely brief and general org chart
 - Note that a minimal number of resources are lvalua resources; most are Customer Resources. This lends itself to customer providing more effort than lvana for solution
 -
5. Litigation
 - No Litigation
 -
 -
6. Financial Viability
 - Statements in Euros
 -
 -

Individual SME Comments:

General Principal and Requirements

- POSITIVE (p.4)– Routing workflow appears efficient
- QUESTIONING (p.5) Is/can MWBE be broken out into subcategories or customized?
- QUESTIONING (p.5) Search 360 appears to be level 2 punchout but uncertain if that is the functionality
- POSITIVE – document management across modules is very efficient
- QUESTIONING – Is FedRAMP ready the same as FedRAMP certified?

Functional Requirements

- QUESTIONING – Is every supplier even for low dollar purchase required to establish an account?
- QUESTIONING – Can Supplier portal import other ERP solution data
- QUESTIONING – can buyers be restricted to certain business practices?
- POSITIVE – Audi workflow is good. How long is it maintained?
- QUESTIONING – are hosted catalogs searchable withing the solution and not just independently?
- POSITIVE – Search 360 ability to consider punchouts in the search
- POSITIVE – Document versioning
- INTERESTING – Public portal can act similarly to current webpage activities
- POSITIVE – MS Word document synching seems a valuable tool to save time. Would like to see more on what that looks like
- POSITIVE – reporting seems to give the user many options

Technical Requirements

- POSITIVE – multiple authentication options
- QUESTIONING – Data conversion seems very tentative and non-committal to success, just explains a very broad set of all potential options
- QUESTIONING – What ERP systems are supported?
- QUESTIONING – WebKit is for iOS. How are PC devices supported?
- POSITIVE – different environments are needed to properly test
- QUESTIONING (p.70) When will lvalua be compliant with PCI-DSS for payment cards
- QUESTIONING – How long is the FedRAMP process to become authorized?

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Cat 3 eSoftware, Stage 2 Proposed Services

DATE: 1/13/2022

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

Security Requirements

- POSITIVE – limitations of access based on need
- POSITIVE – data at-rest and in-transit encrypted
- QUESTIONING – Customer data is limited, but customer should apply access controls. What responsibility does Ivalua have in a breach?
- QUESTIONING – What does Ivalua do in a breach situation aside from notification within 72 hours?

Implementation Services Requirements

- QUESTIONING – Imbalance of customer resources to Ivalua resources.
- QUESTIONING – very general process information. What percentage of clients achieve implementation on time and within original budget?
- POSITIVE – different levels and types of training identified
- QUESTIONING (p.98) 90% of tickets level one and solved within 1 hour. Does this demonstrate a challenge to client training quality?

Managed Services Requirements

- Standard services presented
- QUESTIONING – What is Ivalua data retention schedule

Video Demonstrations

- POSITIVE - Modules
- INTERESTING – FOIA request from the solution
- POSITIVE – repository for documents
- POSITIVE – Other third-party integration (which ones?)
- POSITIVE – Catalog Management
- POSITIVE – Roles
- POSITIVE – Workflows and notifications on dashboard
- POSITIVE – Good supplier data
- NEGATIVE – P2P information limits supplier access to RFPs?
- INTERESTING – Project types can be for individual low dollar quotes
- QUESTIONING – are Outlook addresses imported for SME's?
- QUESTIONING – how are suppliers not in the system notified and able to respond?
- POSITIVE – email templates are good
- NEGATIVE – How are small businesses with technology challenges able to respond?
- QUESTIONING – Have SME expressed concern with challenges to evaluate, there are many steps and files to review?
- QUESTIONING – how are no definite quantity awards considered
- POSITIVE – contract templates
- INTERESTING – Parent child hierarchy
- POSITIVE – proposal pricing comes from vendor bid
- POSITIVE – Edit versioning is good
- POSITIVE – workflows triggered by sections edited are efficient

Customizations/Extensions

13-14	The Ivalua SaaS platform relies on configuration, not custom code, as the means for clients to modify and maintain a solution that meets their needs. As a result, the enhancements are not custom code but instead configuration & data and that configuration & data is carried forward with your instance as the Ivalua solution is updated. Ivalua does not make coding customizations specific to individual clients; all coding changes on the Ivalua platform are part of their release cycle and are by definition part of the baseline product	
-------	---	--

Alternative Funding Models

14	Did not offer	
----	---------------	--

Contract Transition and Flexibility

14	Ivalua is certainly willing to enter into good faith discussions with Participating Entities that wish to explore transitioning their current contract under the terms of the newly awarded Master Agreement.	
----	---	--

Functional Requirements

General Functionality

15-16	Ivalua's single complete unified suite will provide participating organizations with a highly configurable, robust, and comprehensive e-Procurement Solution, purpose built for the public sector. Ivalua is a cloud based, SaaS solution RFP# 202102021 eProcurement Solutions and Services File 3 Ivalua Inc. CONFIDENTIAL © 2021 Ivalua, Inc. This document contains information confidential and proprietary to Ivalua. The information may not be used, disclosed, or reproduced without the prior written authorization of Ivalua. Page 16 and offers the most comprehensive, natively built Source-to-Pay suite in the market which includes Public Portal, Supplier Risk & Performance Management, Sourcing, Contract Management and P2P processes, standard integrations and extensive system administration and reporting capabilities	
GEN 15	Transaction print formulas are based on the layout of the page and may need additional effort	weakness

DEPARTMENT/STATE: Purchasing North Dakota State University

Supplier Portal

16-18	Ivalua offers a free supplier portal where suppliers may perform self-registration and other activities with their customers. Ivalua supplier registration & information management capabilities allows to quickly and easily onboard suppliers for RFPs, orders and invoices, and push data to ERP or other relevant systems. Suppliers can easily register with basic information such as their tax identification number, email address, and company name to establish an account within the system. Note that in the Ivalua system, there is no charge for suppliers to use the solution, allowing organizations to have unlimited suppliers with unlimited users registered to do business with their organization	
-------	---	--

Supplier Enablement/Management

18-25	Registration is 2 parts. Available 24/7 365 days. No charge for suppliers conditional logic can be utilized to tailor the registration page to specific information required by type – such as US vs. non-US suppliers. At this time, the supplier can register for notifications for solicitations that are released within their scope, based on the commodity code(s) that they register for and/or the areas they serve across the organization. Fields captured through the registration process will be tailored to your needs	
VDR 15	Does not check for duplicate registrations	
VDR 19,20 & 24-27	State will have to license 3 rd party system	

Buyer Portal

25-28	internal users can login to the system through their secure username/password, where password rules can be setup by each organization. Alternatively, suppliers can login via SSO with their organization. Once the user login they will be directed to their homepage. Each homepage features a dashboard is unique to the user based on their user. Page 26 role. In addition, authorized users can also add new aspects to their homepage or rearrange the webparts on the screen, to ensure that their portal caters to their unique needs. From the user's homepage they will have access to all the actions throughout the solution that they support. In addition, the user's homepage will have a quick link to all their workflow tasks as well as shortcuts to their frequently created or in-progress objects.

DEPARTMENT/STATE: Purchasing North Dakota State University

Need Identification

26-27	Ivalua offers a suite of integrated procurement services, entity buying profiles, and entity data-driven dynamic workflow. Ivalua provides users the ability to initiate any procurement action from a single spot through the platform. Each action is driven by data setup (entity buying profile) and workflow setup specific to that user and heir organization. Ivalua also provides a powerful and flexible workflow engine that not only invokes approval flows, but also provides the ability to invoke processes. This ability to invoke business processes allows procurement policies and regulations to become part of workflow and not something the end-user needs to think about. Ivalua will guide the end user to begin any type of procurement activity by clearly identifying and outlining the process and steps that need to be taken	
-------	--	--

Request through Pay

27-33	Did not address the requirements for external retail	
27-33	All purchases within the Ivalua solution will begin from a purchase request within the tool. These can be created from a catalog, automatically carrying over all item information, or from scratch. Requests can accommodate multiple types of requests ranging from goods and services, as well as deliverable-based purchases and subscriptions	
	Once the requisition is submitted, it will route through organization users for approval, where needed. Ivalua uses a combination or algorithms and user approval to navigate through the approvals that are necessary, as well as performing automated checks to verify if there are any issues. The organizations/agencies and public bodies will have the ability to define conditional logic to determine when and who should be approving each requisition. This makes our workflow dynamic, so they are automatically routed to the appropriate approvers. Additionally, different organizations and commodities can also trigger different workflows to accommodate for varying business processes, as well as trigger different workflows on goods vs. services purchases. Approvers will have a full audit trail of approval activity directly on their workflow screen, including any rejections and comments. They will also receive email notifications of workflow tasks pending their approval, as well as can receive reminders if they do not act. Ivalua workflows can also trigger real-time integrations to external systems, such as an ERP at a workflow step, such as checking if budget is available for the purchase.	
	Invoices can be created in multiple ways within the Ivalua solution • PO flip • From scratch • EDI/cXML transmission (for enabled suppliers) • OCR capability

Contract Management

44-48	The contract record within lvalua captures all aspects of contract information, documentation, activity, and performance within the single record. The tabs on the left, shown in figure 51 can capture the different areas that will consist of the contract record, including dates, items, documents, subcontractor information, among others.	
	Contracts can be created from a complete solicitation or from scratch.	
	MS WORD can be used for authoring contracts	
CNT 1-88	yes	

Vendor Performance

49-50	Over the life of the supplier, users can create performance assessments against their suppliers or contracts. All performance information is maintained within the supplier's profile for reporting, as well as can trigger alerts to users if a supplier is consistently performing poorly.	
	Performance assessments can be triggered manually or periodically. Templates for performance criteria are stored within lvalua for users to respond to questions related to the supplier's performance and based on the weights of each question, will roll up a total score.	
	lvalua provides the ability to track exceptions and collaborate with suppliers to address these exceptions. If a supplier scores poorly on a performance or risk assessment, exceptions can be created to inform the supplier of areas that need improvement. The exception documents the issue or non-conformance and the severity, tied to the triggering event (for example, contract, delivery, or invoice exception). The supplier is notified of the exception	
	Improvement plans provide a collaboration tool to help improve supplier performance at a granular level by creating tasks that will lead to overall supplier improvement	
VPE 2-12	System relies on "questionnaire" and users to respond to capture performance metrics. There is not automated capture of performance based on transactions processed or data

Purchasing/Data Analytics

51-54	There are three different types of reporting with the lvalua solution, ranging from simple excel extracts to data visualization dashboards. The system can, by default, report on all data stored within the system from across modules. Importing data from an external system can be accommodated. lvalua has over 100 out of the box reports that are provided within our system, but additional reports can be configured during implementation or by super users. The different types are reports within lvalua are detailed below.	
	Any browse page within lvalua can become a report by utilizing powerful search and filter capabilities combined with the ability to extract pages into excel.	
	Queries are Excel based reports that are run via SQL statements in lvalua's reporting module	
	Analysis reports provide data visualization to users in the form of charts, graphs, and pivot tables that can then be combined to create a dashboard view for any users.

THIS RESPONSE IS THE SAME RESPONSE THAT WAS SUBMITTED FOR STAGE 2 CATEGORY 1 – FULL SOLUTION. I HAVE COPIED THE EVAL AND RTM NOTES FROM THE FULL SOLUTION STAGE TO THIS STAGE 2 CATEGORY 3 – ESOFTWARE ONLY.

Individual SME Comments: The video demonstrated an overview of the solution and provided information from both sides of the application. The response could have offered more information in some of the areas that seemed to need a better explanation. The solution does NOT offer PCard functionality and some of the help desk requirements are not available either. The supplier does state these requirements are in development. This supplier could offer a solution over time, but the client needs to be made aware of the functionality that does not exist.

General Principal and Requirements Page 3 – Addressed all requirements listed.
Key Solution Functionality Elements – Page 3

- Single landing page with access to other modules from this landing page.
- Workflow can be attached to any object in the system or be based on different criteria. Workflow is configured during implementation. Figure 2 page 4 is sample workflow.
- Can configure solution to meet our needs which include personal dashboards and internal collaboration tools (blogs, forums, and comments)
- Google search experience in the open marketplace which allows for side-by-side comparison of products.
- Robust integration capability which supports multiple formats. Can connect to any data source
- Workflows come out of the box with best practices but can configure workflows.
- Documents are available throughout all the modules.
- Reporting is out of the box, or users can create their own reports and use graphics for display
- Highly configurable.
- Transparency from the supplier portal with authorized user have oversight to all procurement activity.

User Experience – Page 7

- Homepages are configurable. Sample Homepage Page 8 Figure 3
- User experience is role based
- Tasks assigned can be accessed from the user's home screen (i.e., workflow)
- Can delegate functionality – Page 8 Figure 4

Bidder Best Practices and Roadmap – Page 8 – 9

- Releases are performed twice a year and allows the client to choose which version and when to apply upgrades. Customers are in control of the upgrades
- Constant communication with customers to stay up to speed with new technologies.
- Work closely with customers to learn their best practices
- 60% roadmap comes from clients with 20% reserved for innovation and 20% for market trends.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Areas of significant investment are Mobile, Invoicing, Contract Management, Supplier Risk and Security.
- Leveraging new AI technologies. Page 10
- Automated obligation tracking and management is being enhanced. Page 11

Innovations and Value-Added Features/Services – Page 11

- Offers Help Desk support. Page 12 Figure 5
- 90% of tickets solved in an hour.
- Advanced Services Procurement - Improvements to contingent labor
- Expenses – Capture PCard transactions
- Vendor Master Management – Better manage vendor data.

Customizations/Extensions – Page 14

- Client is responsible for when they go through an upgrade cycle.
- The platform relies on configuration not custom code.
-

Alternative Funding Models – Page 14

- Not proposing alternative funding but is open to discussion

Contract Transition and Flexibility – Page 14

- Willing to enter into good faith discussions about this process

Functional Requirements – Page 15

General Functionality – Page 15 – 16

- Full Source to Pay Solution - Page 16 Figure 6
- Automated notifications
- Single Platform and configurable solution – Page 16
- Offers native public site for posting – RTM line 7
- CONCERN - EPROC-GEN-6 – TAB 2 Line 10 – Can the system be integrated based on this response?
- CONCERN - EPROC-GEN-11 -TAB 2 Line 15 - Has a limit on a file type (executables) and states size limits do exist?
- CONCERN - EPROC-GEN-15 – TAB 2 Line 19 - PO is the only printing format that is printable?

Supplier Portal – Page 17

- Unlimited suppliers with free supplier portal.
- After establishing an account, the supplier portal has a one stop shop on their homepage. Page 17 Figure 7
- Self-manage users with roles when they set them up in the system. Account has system admin to manage supplier's account.
- CONCERN - EPROC-SPR-5 – TAB 3 Line 9 – Does the system notification get sent via email, or does supplier just have to monitor notifications on their supplier dashboard?

Supplier Enablement/Management – Page 18

- Enablement is 2 parts, public facing page to create an account, and “full enrollment” used to be fully onboarded – Page 18

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Sample supplier registration Page 19 Figure 8
- Supplier Full Enrollment happens after workflow approval. The information required here is banking information and W9 documents. Page 20 Figure 9
- Integrations can be designed to verify real-time profile information. Page 21 Figure 10
- Can create their own user contacts. Page 21 Figure 11
- Supplier accounts have document storage and tracking. Page 22 Figures 12 and 13
- Solution has supplier workflow. Page 23 Figure 14
- Internal users (Buyers) can have access to search for suppliers. Page 23 Figure 15
- Access to view the supplier record. Page 24 Figure 16
- Suppliers maintain their own profiles, but changes can be put into workflow for approval by internal users.
- STRENGTH - Ability to have "changes" done on a registration get put into workflow.
- CONCERN - EPROC-VDR-32 – Line 61 – Supplier's response leads me to believe they did not understand the requirement. We asked if other agencies be put into workflow, not have data passed into other state systems?
- CONCERN - EPROC-VDR-36 – Line 65 – Need to release an RFI to remind suppliers to log in and update their registration?

Buyer Portal – Page 25

- This is the access point for procurement activities. Homepage Dashboard -Page 25 Figure 17
- SSO can be a login and each user's dashboard are based on their user roles
- User roles are tied to authorizations and the user is assigned a "perimeter". Page 26 Figure 18
- CONCERN - EPROC-BPRT-7 – Line 81 – The requirement is for the Buyer Portal, but the response received is for the "vendor" portal?
- CONCERN - EPROC-BPRT-8 – Line 82 – Does not support daily summaries of buyer notifications.
- CONCERN - EPROC-BPRT-9 - Line 83 – Cannot provide link to external users due to security
- CONCERN - EPROC-BPRT-15 – Line 89 - Supplier notification needs to be handled through the RFI module?

Need Identification – Page 26-27

- The solution has a single point of entry and can manage a request in several ways via "requests".
- Options include request form, purchase, or exemption request, create a sourcing event or contract, or gather quotes. Page 27

Request through Pay – Page 28

- Process starts with a "request" that will populate relevant requisition details. Page 28 Figure 19
- Exceeding contracted amount could be triggered by the allocations grid. Page 29 Figure 20
- Requisitions are submitted to workflow. Page 29 Figure 21
- Once approved, the requisition is flipped to a purchase order. Page 30 Figure 22
- CONCERN – Page 30 – "At the same time, the order is transmitted to the supplier through their email, including a PDF version of the order". No other way to send order to supplier.
- Can flip purchase orders into receipts. Page 30 Figure 23
- Receipts are shown on the receipt page (Page 31 Figure 24) and then the receipt is submitted to workflow. Page 31 Figure 25
- Invoice will be created (Page 32 Figure 26), and then payment can be applied to the invoice. Page 32 Figure 28

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-PRD-1 – Line 102 - Response refers to Sourcing event from the requisition, but requirement is asking for need identification to Purchase Request?
- CONCERN - EPROC-PRD-15 – Line 116 – Does not support executables file type
- CONCERN - EPROC-PRD-37 – Line 138 – Capturing noncontract price for later analysis is not supported.
- CONCERN - EPROC-WRK-24 Line 189 – Can the PO, PR or change request be re-submitted after it was changed?
- CONCERN - EPROC-PO-17 – Line 212 – eFax submission of orders in not supported.
- CONCERN - EPROC-PO-26 – Line 221 - Additional configuration will be required for facilitate fiscal year end.
- CONCERN - EPROC-PC-1 thru EPROC-PC-4 – Lines 227 thru 230 – These PCard requirements are in the process of being developed.
- CONCERN - EPROC-PC-5 – Line 231 - Full administration of PCards is not available in the system
- CONCERN - EPROC-PC-6 – Line 232 – Pcard maintenance is not currently available but is anticipated for release in 2022.
- CONCERN - EPROC-PC-7 – Line 233 – Ghosted cards are not currently available but is expected to be released mid to late 2022
- CONCERN - EPROC-PC-8 thru EPROC-PC-21 – Lines 234 thru 247 – These requirements will require some kind of customization, configurable item, or integration.

Catalog Capability – Page 33 – 34

- Ability to view catalogs are limited to the user's organization scope
- Search results landing screen – Page 34 Figure 29
- Can shop via hosted or punch out catalogs. Page 34 Figure 30
- Hosted catalog process can be done by supplier. Internal user can compare catalog versions Page 34 Figure 31
- Users can use the search functionality to search and filter results. Page 35 Figure 32
- Item tags to find preferred items
- Search punchout and hosted in the same search. Page 35 Figure 34
- CONCERN - EPROC-CAT-32 – Line 317 – The ability to compare catalog item search results in NOT supported.
- CONCERN - EPROC-CAT-34 – Line 319 – Additional functionality is required to compare items and will be based on number of punchouts required.

Sourcing/Bid Management – Page 36 thru Page 44

- Wizard solicitation set up – Page 36 Figure 35
- Supplier can be added several ways (commodity code selection, public site, etc.) – Page 37 Figure 36
- Has Sealed Bid functionality
- Conditionality can be applied to questions.
- Item grid (pricing) has multiple set up options. Page 39 Figure 40
- Notifications to supplier about event and has access to public portal
- Suggest posting information to client's website and provide link to public portal to view full solicitation. Page 40 Figure 42
- Suppliers need to add open solicitations to their account to create a response. Page 41 Figure 44
- Supplier can Management of Responses. Page 42 Figure 46

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: lvalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Users can monitor suppliers' activity and award events
- Can notify suppliers and create a contract from the solicitation. Page 44 Figure 50
- CONCERN - EPROC-SRC-3 thru EPROC-SRC-9 and EPROC-SRC-11 – Lines 330 thru 336 and 338 – Responses to these requirements refers back to EPROC-SRC-2, Line 329 which did NOT require a response? **Attention to detail!**
- CONCERN - EPROC-SRC-14 thru EPROC-SRC-21 – Lines 341 thru 348 - Responses to these requirements refers back to EPROC-SRC-2, Line 329 which did NOT require a response? **Attention to detail!**
- CONCERN - EPROC-SRC-22 -Line 349 – The response talks about envelope bidding, but requirement talks about separate Cost and Technical sections?
- STRENGTH - Has no limit on number of suppliers being invited to an event.
- CONCERN - EPROC-SRC-68 – Line 395 – eFax is not supported
- CONCERN - EPROC-SRC-70 – Line 397 – This response does not address the requirement that states the eProcurement file of the event needs to be “complete” to meet public records laws. SRC 71 has this same response which meets that requirement.
- CONCERN - EPROC-SRC-83 – Line 410 – System does not support web conferences, but supplier offered the ability to upload the recorded conference. Do they support that file type?
- STRENGTH – Size limitations can be set up by system administrator
- CONCERN - EPROC-SRC-143 – Line 470 - Must start a new solicitation instead of cancelling award on bid and move to the next highest bidder?

Contract Management – Page 44 – 45

- Wizard driven entry. Page 45 Figure 51
- Information brought over from the contract header
- Alerts on documents uploaded to the document section – Page 46 Figure 53
- Native authoring (Word) – Page 47 Figure 54
- Subcontractors can be added.
- Can integrate with multiple eSignature tools. Page 48 Figures 57 and 58
- CONCERN - EPROC-CNT-16 – Line 496 – Loading of external price list for contracts will need to be worked out to identify data elements. Additional cost possible?
- CONCERN - EPROC-CNT-52 thru EPROC-CNT-63 – Line 532 thru line 543 – The supplier has used the same response for all of these requirements, but the response does not mention the requirement? Also see lines 555 and beyond as an example. These responses are duplicate but at least start with “this information”.
- CONCERN - EPROC-CNT-66 – Line 546 – Response states alert could be posted to public portal, but requirement asks if it can be posted to state’s procurement website.
- CONCERN - EPROC-CNT-67 – Line 547 – The response does not address the email notification listed in the requirement?

Vendor Performance – Page 49

- System has supplier performance dashboard. Page 49 Figure 59
- Allows ability to track a supplier’s performance.
- Improvement plans provide a collaboration tool to help improve the supplier performance. Page 50
- CONCERN - EPROC-VPE-3 thru EPROC-VPE-11 – Line 573 thru line 581 – The response to each of these requirements refers back to the response on line 572 which states vendor performance needs to be handled by a questionnaire.

Purchasing/Data Analytics – Page 51

- System has 3 different types of reporting, Ad Hoc, Queries and Analysis
- Reports are compiled by running a search and exporting data to Excel.
- Analysis reports can be put on dashboard for view of any user.
- Offers 100 standard reports
- CONCERN - EPROC-PDA-5 thru EPROC-PDA-16 – Line 602 thru line 613 – A duplicate response was used to answer all of these requirements, but the response does not reference the reporting requirement? Can this supplier supply reports based on the listed requirement?
- CONCERN - EPROC-PDA-20 and EPROC-PDA-21 - Line 617 and 618 – This supplier currently does not have PCard functionality.
- CONCERN - EPROC-PDA-36 – Line 633 – This supplier currently does not have PCard functionality.

Technical Requirements – Page 55

Availability – Page 55

- Meets requirements

Accessibility Requirements – Page 55

- CONCERN – States they are committed to being Section 508-compliant as soon as possible.

Audit Trail and History – Page 56

- Meets requirements

Browsers Supported – Page 56 – 57

- Supports the most update browser versions

User Accounts and Administration – Page 57

- Controlled by an authentication method and roles, authorization and perimeters.

User Authentication – Page 58

- Supports multiple authentications and password rules are fully customizable.

Federated Identity Management – Page 58

- Meets requirements

Data Conversion – Page 59

- Offers data assessment to determine data requirements
- Historical data conversions require a larger scope where cost needs to be determined
- CONCERN - EPROC-TECH-28 -Line 32 – Solicitation data conversion is NOT supported.
- CONCERN - EPROC-TECH-30 -Line 34 – Vendor performance data conversion is NOT supported.

Interface and Integration – Page 59

- Provided communication protocols and data formats that are supported.
- CONCERN – Did NOT identify all finance system/ERP's where their solution has existing interface/integration capabilities in the narrative.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-TECH-35 – Line 39 - Did not supply complete technical details on interface.

Office Automation Integration – Page 60

- STRENGTH – Can import Word documents in the contract tool and break them into clauses
- Supports Word, Excel and PDF

Mobile Device Support – Page 61

- Meets requirements

Mobile Applications – Page 61

- Based on a mobile web solution rather than a mobile application

Data Ownership and Access – Page 61

- Meets requirements

Date Retention, Archive and Purge Considerations – Page 62

- Should be discussed at implementation.

Disaster Recovery Plan – Page 62

- Notification of data breach is 72 hours.
- CONCERN – Could have supplied more detailed information about this requirement

Solution Environments – Page 63

- CONCERN – Could have supplied more detailed information in the narrative but did list 3 environments that are offered with some offered at additional maintenance fees.

Solution Technical Architecture – Page 64

- Supplied application and environment architecture. Page 64 Figure 66
- Application Architecture. Page 65 Figure 67
- Supplied Database Architecture. Page 65

Solution Network Architecture – Page 65-66

- Provided Ivalua Network Architecture. Page 66 Figure 68
- Supplied data center locations. Page 67
- Mentioned briefly monitoring and maintenance. Page 67
- Can compare KPI's with SLA's
-

System Development Methodology – Page 67 – 68

- Defer to subject matter experts

Service Level Agreement – Page 68

- Referenced the attached SLA submitted with their response

Security Requirements – Page 69

Cloud Security Alliance (CSA) Compliance – Page 69

- Referenced attached CAIO that was submitted with their response.

Security and Privacy Controls – Page 69

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN – Currently validating controls and safeguards against NIST. Page 69

Security Certifications – Page 69-70

- CONCERN - Not currently audited for PCI-DSS compliance. Page 70
- Defer rest of response to Security SME.

Annual Security Plan – Page 70 – 71 thru Page 75

- Uses Role Based Access Control, Secure Customer Data
- Mentioned Physical Security. Page 72
- Defer comments to Security SME

Secure Application and Network Environment – Page 76 – 77 thru Page 79

- Supports 2 factor authentication
- Defer comments to security SME

Secure Application and Network Access – Page 79 – 80

- Lists Encryption and Protocols. Page 80

Data Security – Page 82 – 83

- Secure Customer Data
- Network and Physical Security
- Applies single data classification to customer data
- Offers Ivalua Access Control and Applicable Laws – Page 84
- Data is encrypted and upon contract termination is destroyed.
- Defer to security SME

Personally Identifiable Information Protection – Page 85 – 86

- Meets requirements but will defer to Security SME

Security/Privacy Issue Occurrence – Page 86

- These are set forth in the customer's contract.
- Will be notified no later than 72 hours. Our requirement states 2 hours

PII Data Actual/Attempted Access or Disclosure – Page 86 – 87

- Requirements are set forth in the customer's contract.
- Will be notified no later than 72 hours. Our requirement states 2 hours

Security Breach Reporting – Page 87

- Requirements are set forth in the customer's contract.
- Will be notified no later than 72 hours. Our requirement states 2 hours

Implementation Services Requirements – Page 88

Project Management – Page 88

- Composed of Mobilize, Explore/Design, Build/Configuration, Test, Deploy/Go-Live, and Run
- Supplied key activities. Page 88
- Showed project team structure. Page 89 Figure 69
- Typical Project steps. Page 90 Figure 70

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): Stage 2 Category 3 eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

Project Implementation Methodology – Page 90 – 91

- Development is based on Agile methodology. Interactive approach to software development

Catalog Support Services – Page 91 – 92

- 2 Options – Catalog Import or Supplier Created catalog
- Stated offered the setup/configuration of punch out sites
- Link provided for list of Ivalua partners

Data Conversion Services – Page 92

- Stated could meet all requirements and provided link to list of partners.

Interface/Integration Development Services – Page 93

- Uses “the approach to integration is to integrate by configuration”. Page 93
- Supplied list of connectors
- Stated an integration lead with work with State entity on this project.

Organizational Change Management (OCM Services – Page 93 – 94

- Includes Leadership/Stakeholder Engagement, Change Impact Assessment, Change Readiness, Training and Communication

Training Services – Page 95

- Offers users access to Ivalua Academy where they can gain “Ivalua Certification”
- Also offers role-based training to end users using a variety of methods. Page 96

Help Desk Services – Page 96 – 97

- Technical Support (Level 3)
- End users help desk, suppliers help desk and Administrators Configuration Support
- Level 1 help desk for users rather than calling state help desk
- Help Desk Flow – Page 98 Figure 71

On-Site System Stabilization Support – Page 98

- Provide stabilization support for 3 months after go live

Managed Services Requirements Page 99

Solution Support – Page 100 thru 102

- Showed development process – Page 101
- Software is tested prior to making it available
- Planning, Architecture and Monitoring are steps in this process
- Maintenance and Security, SLA and Support were mentioned here. Page 102
-

Organizational Change Management (OCM Services) – Page 103

- Stated they included this in their implementation proposal section of this RFP

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

Catalog Support Services – Page 103

- Stated they included this in their implementation proposal section of this RFP

Help Desk Services – Page 103 – 104

- Provided Help Desk Flow chart – Page 104 Figure 72
- CONCERN - EPROC-IMPL-3 thru EPROC-IMPL-5 – Tab 6 Line 6 thru line 8 – These requirements for help desk services are not available.

Transition Out Assistance Services – Page 104 – 105

- Supplier will assist with data to be exported

Other Available Services

- Tool called Aware is available to track all activities of the solution. Page 106

Video Demonstrations

Full Suite platform containing end to end procure to pay. Supplier Login screen has additional links to other services, FOIA request, public bid site, new supplier registration and help desk information. Supplier portal page has announcements, registration progress and many other widgets showing information about the vendor. Links on left takes supplier to registration information. Has change log for changes to registration. Links across top takes them to contracts, bids, catalogs, invoicing and performance links. Buyer has landing page with to do lists and many other widgets and analytical reports. Links on right allow access to supplier registration, sourcing, contracts, etc. Across the top has links to the other modules they have access based on the roles assigned. Can search suppliers from the supplier landing screen. 360 supplier is available, and the left side of the landing page give the user access to each of the section of a supplier's registration. Bid Management module has search ability and project creation. Solution is wizard driven and has setup options on left side of screen. Has scoring capability and houses templates and libraries to aid in bid creation. Supplier can view bids without logging into their portal. If interested, can add themselves to the bid and log into their portal. Responses are wizard driven. The system allows for individual and consensus scoring of proposals. Can send out award notifications to suppliers by creating scenarios. Can create separate contract record or create a contract from a sourcing event. The creating contract process is wizard driven. Offers Word authoring of contracts and a library to house contract templates that can be used to create contracts. Can submit contracts into workflow approval. Has integration with DocuSign and other solutions. Buyers search for products via the procurement home page with is configurable dashboard. Can have hosted or punch out catalogs which are searched on with each search. Can put items in a "kit" search. Requisitions can be configured with budget information sent over from the ERP. Workflow can be applied to each requisition. Requisition and PO are linked in the system. Supplier logs in to their support to manage orders. Invoicing module has several invoice options. User can flip an invoice to a receipt which can be put into workflow. Supplier can see payment status in their customer portal. System does have analytics with 3 different options for reports including queries and data visualization.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3

DATE: 8/27/2021

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - “Implementation and Development Services” Gold Partner of SAP (Ariba)
 - “Reseller” of SAP software.
2. Previous Projects
 - 5 listed. All fit within Category 3.
 - San Diego County, CA. Implemented Ariba public sector supplier and Contract mgt. and integrated it with Oracle.
 - University of Kentucky. Implemented SAP HCM, Finance, SAP Student Lifecycle Management, BW,SRM/PPS 7.0 and Analytics.
 - Sempra Energy. Implemented Ariba Contract mgt. and integrated to MS Dynamics ERP.
 - City of San Diego, CA. Implemented SAP Ariba procurement platform.
 - CA Dept. of Healthcare Services. Deployed SAP Ariba procurement platform.
3. Subcontractors
 - Vendor states it will not be utilizing subcontractors for this engagement.
4. Organizational Chart
 - Yes, Org. chart provided along with job descriptions
5. Litigation
 - Vendor states no litigation.
6. Financial Viability
 - DnB provided. Low to Moderate risk.

Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

.....

Individual Comments:

Overall/General

- Hybrid Cloud Solution.
- Product is SAP Ariba. Cloud Services with technical architecture of SaaS
- LSI Consulting is a Gold Partner and is submitting proposal as a part of the Partner Managed Cloud (PMC) who is offering the professional services portion of the proposal (implementation, long-term support, etc)
- Really touts the Spend Management portion of SAP Ariba.
- LSI takes seven exceptions (pages 142 – 145), These will want to be reviewed carefully and negotiated should this offeror be in negotiations.
- There are 34 items in the "Assumptions" (page 140 – 141) that require CLARIFICATION or negotiation where many or most States could or would not agree. Examples are: #4 State must follow the LSI provided methodology to implement software, #6 – can't revisit deliverables once they have been closed, #18 – Postponements and delays of scheduled events due to lack of State staff availability will likely result in an extended project schedule and/or additional fees, #12 –in case of sickness or vacation, the key State decision-makers will have an alternate assigned.

A. General Principal and Requirements

1. Key Solution Functionality Elements (pages 8 – 21)

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls "baked in" (See APSM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a "catalog of catalogs" like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

1. Product/Solution components: pages 8 - 10

a. SAP Ariba Cloud-based. For eProcurement solution (Sourcing, Contracts, Procure to Pay, etc.)

- Single point of entry. Yes – Single Sign on.
- Smart routing. Yes

- Compliance. Yes
- Portal. Yes . “SAP Portal product portfolio”. Can obtain as:
 - as “SAP Enterprise Portal (on-premise)
 - on SAP BTP as SAP cloud Portal service
 - (portal-like) sap Launchpad service
- Open Marketplace Environment. Yes – uses the SAP Ariba Business Network (SBN) for business-to-business network (B2B) and use Spot Buy as the catalog solution.
- Integration. Yes. With the use of integration with out-of-the-box SAP's intelligent suite along with end-to-end business process.
- Workflow. Yes. “SAP Business Workflow enables the design and execution of business processes”
- Document management. Yes. “SAP Ariba Contract Management module can track, manage, and store documents”.
- Reporting, dashboards and data visualization. Yes. “SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports.”
- Configurable. Yes. “Configurable workflows to document templates” with “the flexibility to reflect state-wide or agency-specific rule-sets and processes
- Transparency. Yes - “Vendor Portal” built on SAP's Portal Services. “The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data.” .

2. User Experience - pages 10 - 12

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.
- **Do not cover all the characteristics in the user experience explanation, but they do offer that “The interface has been designed with special attention to:**
 - Minimizing clicks and number of steps
 - Seamless transition from mobile app to desktop with "follow-me" process from one another
 - Community help
 - Visual workflows, reminders and notifications
 - Bulk actions over many items (i.e. bulk receive purchase orders)
 - Integrations to facilitate multiple catalog search (items in the material master, inventoried items, MRO Supplies and contracted supplier catalogs), cost accounting and more”

3. Bidder Best Practices and Roadmap – pages 12 - 13

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.

- “Quarterly Releases – Releases are delivered every quarter in February, May, August, and November each year. Individual products may be released on any or all of the quarterly dates. You should expect to receive advance communication of features and should allow time to prepare for impactful changes to your systems. “
- “Monthly Feature Deliveries – Major products may have an optional, no-impact release on harmonized monthly feature delivery weekends. As with the quarterly releases, each product has the option to release during any or all these windows. You should not need to prepare for or take action for the monthly feature deliveries. Changes delivered in a feature delivery should be virtually invisible to the end users. Many of our largest cloud products follow a harmonized release calendar.”
- Road Map is provided in an attachment.

4. Innovations and Value-Added Features/Services – pages 13 - 16

In addition to the stated requirement(s), the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).

Yes . they give some past and present innovations.

- SAP Ariba has:
 - Launched the first online catalog for procurement.
 - Developed the first software to conduct reverse auctions.
 - Created the Ariba Network, the first business network that today is the largest, most global on the planet, with more than 2 million companies transacting nearly \$1 trillion in commerce on an annual basis.
 - Went live with Ariba Discovery, the first business matching service that like Match.com, connects buyers with needs to sellers who can fulfill them.
 - Ariba Spot Buy
- SAP FieldGlass.
- SAP Ariba Supplier Risk Management.

5. Customizations/Extensions – pages 17 - 20

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder’s base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder’s product roadmap submitted with the proposal.

• Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- SAP Ariba Application Extension Partners and Applications
- Help deliver new and innovative applications that augment SAP Ariba solutions. List of SAP Ariba App Extensions and our Partners:
 - **Spotline Inc.** Chatbot
 - **Seal Software.** Helps organizations gain visibility, control, mitigate risk and better manage their contracts o Seal Contract Discovery and Analytics helps organizations gain visibility, control, mitigate risk and better manage their contracts in conjunction with various SAP products including SAP Ariba. Seal’s AI powered engine extracts many types of data elements, and presents that data in an intuitive user experience. Seal integrates to SAP Ariba to load contracts and metadata directly into Ariba leveraging APIs. New and existing SAP

Ariba contract workspaces can be sent to Seal to clean up existing content and for many high-value use cases such as regulatory, risk, M&A, audit, etc.

- **CloudTrade** - Optimize your PDF Invoicing channel
- ISMS Applications. Provide compliance to suppliers for a healthy supply chain
- Keelvar Sourcing. The Keelvar Sourcing Optimizer Connector to send event data (suppliers & item master data) from SAP Ariba to Keelvar Sourcing Optimizer. Run, analyze and award complex or large events in Keelvar Sourcing Optimizer, then send awarded supplier data back to SAP Ariba Contracts.
- AppZen AI. Real-time accounts payable fraud and non-compliance detection
- Cordis.
 - Procure-to-Pay integration between SAP Ariba and Oracle
 - Add a layer of protection to personally identifiable information .
 - Digitize your supplier invoices into a single compliant e-invoice process o Intelligent Invoice Express (IIE) allows you to automatically capture and register purchase invoices in one application for verification, validation and efficient processing in Ariba Invoicing or ERP Accounts Payable, even for suppliers who are not yet on the Ariba Network (AN).
 - A prebuilt analytical dashboard for procurement using SAP Ariba and SAP ERP data o Category Manager Dashboard provides valuable insights and reporting, plus the ability to integrate aggregated data across Sourcing, Contracts, Spend, Performance and Risk. It provides a status for each project to manage the category of spend, including a display of all associated business documents.
 - Combine your catalog and non-catalog requests into the e-procurement process, Intelligent Content Capture.
- Fairmarkit.
 - Automatically get quotes for purchase requests from your existing suppliers.
 - Empower end users to competitively bid their purchases
- Vertex - Tax calculation during purchase requisition and invoice reconciliation o Vertex provides automated tax calculation during requisition & invoice reconciliation. During requisition, purchasing managers can view tax implications when approving or rejecting a purchase request and during invoice reconciliation.
- • Accenture - Intelligent chatbot for a simplified buying experience o Paula is an intelligent chatbot designed to modernize user's experience through a simple and intuitive process allowing organization to transform their tasks into value-added work..
- • EcoVadis - Sustainability ratings for procurement - Manage supplier risk and performance.
- • D&B- Proactively identify vendor financial stress to mitigate supply chain disruption.
- • APOS Systems - Live mode data connectivity for SAP Ariba o Live Data Gateway for SAP Ariba provides virtualized data connectivity to SAP Ariba data from SAP Analytics Cloud. Live Data Gateway can also serve data to SAP Data Warehouse Cloud, SAP HANA, and many others.
- • Nitor Relish Xbridge – Seamless SAP Ariba & Qualtrics XM for suppliers integration.
- Nitor Relish DATA ASSURE - Fully automatic supplier data validation in one step, without human interaction.
- • iCertis AI - AI from Icertis turns contracts into live documents connected to your business o Icertis is enabling SAP users to address previously intractable contract challenges. This includes digitizing legacy contracts and importing third-party contracts at scale, analyzing past negotiation history to gain insights for improvement, and deep data visualization.
- • Globality - Seamlessly Integrate Globality's Platform with SAP Fieldglass o Globality's AI Platform transforms sourcing of high-value, complex services by automating the demand creation, supplier identification, tendering, proposal evaluation, and SoW creation process through a self-serve, consumer-like solution. SoW data are automatically sent to SAP Fieldglass

6. Alternative Funding Models – Pages 20

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and

be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
 - Explain how each model would work;
 - Identify the benefits that Participating Entities and their suppliers would realize; and
 - Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

They do not offer any alternative funding models, but do recommend SAP Fieldglass app.

7. Contract Transition and Flexibility – page 20 - 21

LSI possesses an extremely high level of flexibility to transition from a state's current contract to a new contract or amendment".

B. Functional Requirements: pages 22 – 46

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The **electronic procurement solution must be cloud-based with a Software as a Service (SaaS) delivery model**

1. General Functionality. Tab 2, GEN-1 through GEN-40. Currently the following applications are widely deployed and support the procurement functions of Ariba customers:

- SAP Ariba Buying& Invoicing
- SAP Ariba Sourcing
- SAP Ariba Contracts
- SAP Ariba Supplier Lifecycle & Performance Management
- SAP Ariba Network
- SAP Fieldglass

- Uses Native Integration for integration of purchase requests.
- Supports all types of files and mentions a “really robust search engine” in many of the comments.
- “A super user will be granted broader access to the solution by assigning multiple roles” to access functionality across the solution and “provide administration capabilities across the solution or for specific functional areas”. Except for Guided Buying.
- #3 is marked as “partial”, which is not a choice in the codes. **Based on the notes it looks like they do not have the ability to integrate to post on the State's procurement website.**
- #38 is marked N/A, which is not a choice in the codes. **After reading the reply – it seems the answer is “N” as they do not comply with this.**
- For most of the items in 1 – 7 GPE offers use of their system, but these questions are about being able
- Many of the Comments state **“Standard Functionality”** (there are 22 of these). As a nonuser of ASP Ariba's system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to *“describe how the identified tools/solution will meet the requirement. Include benefits or limitations.”* **Based on the vagueness and essentially a guess on my part, these lines won't be evaluated.**

2. Supplier Portal. Tab 3, SPR-1 through SPR-23.

- Ariba seems to have a good handle on the Supplier portal side and a understanding of what the suppliers need.
- SAP Ariba Business Network (SBN) for the supplier portal includes:
 - Ariba Business Network (aka Ariba Network, Ariba Supplier Network)
 - Ariba “Supplier Enablement Services” for the Network are included
 - Supplier Portal functionality across all customers, not specific to a State/Entity using Ariba
- #3 states suppliers can integrate their financial systems to Ariba Network. While the State will want supplier spend reports, **I am not certain about connecting to the system – for security reasons the State would want to look into this.**

- #7, 8, where allow supplier to access solicitations and to submit proposals... IBM responds that State APIs are available to post but suppliers will need to be directed to an external State website. **This is concerning – as this is a requirement of the eprocurement system.**
3. **Supplier Enablement Management Workstream.** Tab 3, VDR-1 through VDR-43.
 - SAP Supplier Enablement Team will “design and develop the most effective enablement strategy” based on their “profile, PO and invoice volume, and spend”. Segment the “State’s vendor master data to effectively target/onboard suppliers in tiered waves”.
 - Provides IRS TIN/Name “verification capabilities”
 - For the Ariba Network, offers suppliers “user guides, FAQs, technical documentation, and free online seminars”.
 - Can have “account specific information” via a “supplier information portal embedded in the Ariba Network”.
 - Suppliers are able to self register and meet requirements 1 – 10
 - **It's not clear if the system accepts commodity codes**, as the answers given to the questions are not straightforward.
 - #18 - #27 are marked as “INT” and the State asks that the verification of the supplier items be done. **IBM's answer is they can validate the format, I am unsure if this will meet the requirement.**
 4. **Buyer Portal.** Tab 3, BPRT-1 through BPRT-15.
 - The answer to #11 is of concern. The State can download any account information (data) as long as subscribed, but only within the functionality of their application. It doesn't answer the question if we can get the minimum items that are asked for in the requirement.
 5. **Need Identification.** Tab 3, NEED-1 through NEED-7.
 - The CF item does not seem to pose a problem. Other items seem to be standard within the software.
 6. **Request through Pay Workstream.** Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11.
 - **PRD 4 – Doesn't seem to answer the Role question. They answer it with groups, but not by role.**
 - **PRD 15 and 16, WRK12, PO11 and 12 – Limit attachments to 100MB size limit, but can support any type of attachment.**
 - **PRD49 – Ariba uses UNSPSC (United Nations Standard Products and Services Code) – it seems much configuration will need to be done to work in State's chart of accounts.**
 - **PRD59 – is essentially **not answered**. Gives “Standard Functionality supported and configurable”.**
 - **WRK28 – only one user in Que at a time.**
 - **PC 6 – Comment that it's not supported; however, they list as “Available”.**
 7. **Catalog Capability -** Tab 3, CAT-1 through CAT-40.
 - **#3 - 3 channels that catalogs can be updated from: (1) Loaded directly by customer via CSV or CIF format, (2) Loaded by us acting as the catalog management service to the customer, (3) Self-loaded by the supplier via the Ariba Network.**
 - **#6 and 7. Catalogs are limited to 5,000 catalogs and there is a limit to 500,000 items in a catalog.**
 - **#19 – To enter Items of negative values is not an option.**
 8. **Sourcing/Bid Management Workstream.** Tab 3, SRC-1 through SRC-151.
 - **#2 – System has several solicitation templates to use; however, most all State's will want to use their AG approved templates and forms. Some such as the RFI are delivered out of the box, unsure if can configure.**
 - **#36, 52, 63, 70 – limited to 100MB**
 - **#76 – Ariba's system doesn't provide ability to post solicitation documentation unless **manually done**.**
 - **#138 – Ariba's system does not post award results to State's procurement website. It must be **done manually**.**
 9. **Contract Management.** Tab 3, CNT-1 through CNT-88.
 - **#45 – Ariba's system doesn't support read only format with redaction properties.**

- #52 through #62 – Ariba's system doesn't support posting of various items to State's public Contracts website. The State must manually post
10. **Vendor Performance** Tab 3, VPE-1 through VPE-25.
- VPE 21 – **CLARIFY** that the system provides this requirement as IBM says it does, because they comment that the best way is through scorecards, which in my mind is paper or a simple excel form. Maybe scorecards is a name of one of their forms. **If not, this does not meet the requirement.**
 - VPE 25 – **File size limit 100MB per attachment. – does not meet requirement.**
11. **Purchasing/Data Analytics** Tab 3, PDA-1 through PDA-37.
- PDA 1 – Ariba solutions comes with 250 pre-packaged reports.

C. **Technical Requirements: pages 47 - 59**

1. **Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*
- Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.*
- SAP offers a 99.5% system availability percentage during each month for production versions, with exception of **regularly scheduled and emergency maintenance. CLARIFY** – How often is regular maintenance and during what hours and days. Additionally, how often in the past has SAP had emergency maintenance (example of how many times in one year?).
2. **Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
- Page 45. They state they will provide accessibility to customers upon request. **It seems the software does not come with accessibility requirements.**
3. **Audit Trail and History** RTM: Tab 4, TECH-1 through TECH-5.
- TECH 3 – 5 are “INT”; however, they repeat TECH 1 and do not explain/detail out how or why integration or interface is needed.
4. **Browsers Supported**
- The general web browsers are supported (Microsoft Internet Explorer, M Edge, M Edge Chromium, G Chrome, Firefox, and Safari). Microsoft Internet Explorer compatibility mode is not supported. No concerns.
5. **User Accounts and Administration** RTM: Tab 4, TECH-6 through TECH-20.
- TECH 12 – **Does not meet requirement.**
6. **User Authentication** RTM: Tab 4, TECH-21 through TECH-25.
7. **Federated Identity Management**
- Refers to a link. Page 50
8. **Data Conversion** RTM: Tab 4, TECH-26 through TECH-34.
- SAP plans to use “SAP's Activate Methodology”
 - Integration of legacy systems are extra cost 10
9. **Interface and Integration** RTM: Tab 4, TECH-35 through TECH-60.
- “integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.”
 - Real-time and/or batch integration
 - HTTPS using CSV interface
 - SAP Web services
 - REST APIs
10. **Office Automation Integration**
- Yes, they integrate with Microsoft products listed and others.

11. **Mobile Device Support** RTM: Tab 4, TECH-61.
 - Yes it can be accessed Mobily
12. **Mobile Applications** - TECH 62.
 - Nothing to add here..
13. **Data Ownership and Access**
 - State owns the data.
14. **Date Retention, Archive and Purge Considerations** RTM: Tab 4, TECH-63.
 - Data retention is governed by the active contract.
15. **Disaster Recovery Plan**
 - Meets requirements.
16. **Solution Environments** RTM: Tab 4, TECH-64 through TECH-67.
 - State would receive two environments by default: Test and Production.
 - Additional environments (i.e. Development, Quality Control/User Acceptance, Training) are additional charges.
17. **Solution Technical Architecture**
 - They described some tools and gave some “various” options for exchanging data between SAP Ariba and external system.
18. **Solution Network Architecture**
 - Diagram on page 57.
 - SAP Ariba solutions are offered and delivered in a true subscription-based model
19. **System Development Methodology**
 - Based upon Agile Scrum Development methodology.
20. **Service Level Agreement**
 - UNABLE to open embedded document.
- D. **Security Requirements:** pages 60 - 72
 1. **Cloud Security Alliance (CSA) Compliance**
 - SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines.
 2. **Security and Privacy Controls**
 3. **Security Certifications**
 4. **Annual Security Plan**
 5. **Secure Application and Network Environment**
 6. **Secure Application and Network Access** – Tab 5, SEC-1 through SEC-6.
 - Mentions backup policies.
 7. **Data Security** – nothing to add.
 8. **Personally Identifiable Information Protection** – nothing to add.
 9. **Security/Privacy Issue Occurrence** – nothing to add.
 10. **PII Data Actual/Attempted Access or Disclosure** – nothing to add.
 11. **Security Breach Reporting** – nothing to add.
- E. **Implementation Services Requirements:** pages 73 - 126
 1. **Project Management**
 - LSI provides a basic PM layout diagram on page 73 explanation of PM.
 - Very prescriptive in nature, almost regulatory.
 - Do not see a timeline
 - Does not address most of PM section in RFP.
 2. **Project Implementation Methodology**
 - Very prescriptive in nature, almost regulatory.
 - LSI would like that most SAP cloud implementations use the SAP Activate Cloud methodology. The SAP Activate Cloud methodology follows Agile principles and is well suited to cloud software implementation.
 - Sample role assignment charts are provided for deliverables (pages 79 – 81 and 83 and 88 – 90 and 93). Will want to review these for negotiations if are awarded a contract.
 - **Note:** There are many PM areas that should be reviewed in the Assumptions section (pages 140 – 141) of this proposal.
 3. **Catalog Support Services**

- Uses SAP Ariba Catalog management services or Spot Buy.
- The supplier is responsible for uploading catalogs on Ariba Network.
- Suppliers hosting content on their sites provide a catalog feed with links to their content as authenticated by Ariba Network. Both Level 1 PunchOut (Site and Aisle/category level) as well as Level 2 PunchOut (Aisle, Shelf, and Item level for cross-PunchOut search experience) are supported. SAP Ariba catalog management services manage the enabled catalogs including validation, cleansing, catalog activation and any subsequent refreshes. The catalog set-up includes setting up a catalog hierarchy. Enablement of Punch Out catalogs are available as an optional item for additional charges – Clarify charges.
- Doesn't address training staff or suppliers on catalog management roles.

4. Data Conversion Services

- 6 activities make up the conversion project:
 - Strategy
 - Analyze
 - Design
 - Build
 - Test/Implement
 - Deploy

5. Interface/Integration Development Services

- Pages 98-99 - *“LSI will recommend, design and deploy interfaces based on the best practices and the latest tools available with the SAP environment. In addition to technical assessment, we develop an **Interface Strategy document** that includes the general architecture of the Current and Future Landscape, describes various Interface types, file transfer and process of interface design and implementation.”*

6. Organizational Change Management (OCM Services)

- Explains their OCM method well and with diagrams. They seem to have done OCM before.
- Meets requirements.

7. Training Services

- Training is divided into two different but critical areas:
 - Project Team Training
 - End User Training

8. Help Desk Services – good.

- Page 117 - *“LSI will provide post implementation support / SAP Application Management Services (“AMS”) Services.”*
- Confusion on what LSI is providing and what SAP might be providing or if LSI is providing all.

9. On-Site System Stabilization Support

- LSI explains post go-live stabilization support and some of the help desk again, but don't seem to commit to the 3-month post go-live coverage requirement.

F. Managed Services Requirements: pages 127 - 131

1. Solution Support

- Yes seems to meet requirements

2. Organizational Change Management (OCM Services)

- They offer an hourly rate in their cost proposal, but do not offer any description of services. Unable to evaluate.

3. Training Services

- Meets requirements – point to Section E for description of services.

4. Catalog Support Services

- Provided at an hourly rate but separate from services from proposal. No description of services offered. Unable to evaluate.

5. Help Desk Services

- Meets requirements. – point to Section E for description of services.

6. Transition Out Assistance Services

- Sample transition plan offered. Would like to see a description of how they help transition out. Does not meet requirement.

G. Other Available Services: pages 131 - 138

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

- RTM: Tab 7, MNGD-1

- Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

- SAP S/4 Financials Assessment.
- SAP Fieldglass

H. Video Demonstrations: page 139

- 44 minute demo.
- Some areas the author kept saying they would show more at the demo. Which is confusing since this is the demo.
- Looks very user friendly for Catalog purchasing of items.

EVALUATOR NAME: (Joe Zrioka)

EVALUATOR DEPARTMENT/STATE: (State of Maine Division of Procurement Services)

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, cert of ins SAMPLE but appeared to be completed with 5 mil cyber
 - Gold Partner of SAP Software including SAP Ariba
 - Partner Managed Cloud Model – Choice of cloud?
2. Previous Projects
 - San Diego County - Ariba Supplier Lifecycle and Performance and Contracts Management - **integration and deployment services**
 - University of Kentucky - Ariba Contracts - **full implementation**
 - Sempra Energy - SAP Ariba Contracts Management **partnered with SAP Ariba and LSI to integrate**
 - City of San Diego - implemented the SAP Ariba procurement platform to modernize their legacy procurement processes – **purchase only?**
 - Washington DC government - SAP Ariba On-Premise Software strategic move to the cloud with Ariba - **purchase only?**
 - California Department of Healthcare Services - Ariba procurement platform, including strategic sourcing and buying & invoicing solutions - **purchase only?**
 - Reference contact information facilitated through LSI...but did provide info
3. Subcontractors
 - None listed
 -
4. Organizational Chart
 - Combined State and LSI project specific org chart
 - Roles defined
 -
5. Litigation
 - None

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements **SAP ARIBA** implemented by **LSI Consulting**. single point of entry
smart routing compliance portal open marketplace environment integration workflow document
management reporting configurable transparency

User Experience "Guided Buying" capabilities, - UX experts redesigned user's view to deploy a platform adaptable on multiple platforms (desktop, tablets, mobile) •Minimizing clicks and number of steps•Seamless transition from mobile app to desktop with "follow-me" process from one another•Community help•Visual workflows, reminders and notifications•Bulk actions over many items (i.e. bulk receive purchase orders)•Integrations to facilitate multiple catalog search (items in the material master, inventoried items, MRO Supplies and contracted supplier catalogs), cost accounting and more Bidder Best Practices and Roadmap **A configurable system** is OOBX solution that allows the owner to easily personalize certain aspects of the system, without the help of costly software developers. Configurable software is flexible, scalable and can be continually shaped to meet an organization's industry-specific and organization-specific needs. Configurable solutions carry a much lower total cost of ownership. You don't pay for updates. **A customized system** is developed specifically and only for one customer, locking that organization into a static workflow that can only be changed by hiring cost prohibitive engineers to make updates to the system's code. This increases the total cost of ownership exponentially. The system is static and does not evolve with the industry. SAP® Ariba® Best Practices Center.

Innovations and Value-Added Features/Services •SAP Fieldglass•SAP Ariba Supplier Risk Management - Customizations/Extensions SAP arriba application extensions and partners; spot line chat bot, seal software, cloud trade, I SMS applications, kill var sourcing, app Zen artificial intelligence, core disc, fair market, vertex, Accenture, echo vedis, Dun and bradstreet, APOS systems, nitor, iCertis artificial intelligence, globality.

Alternative Funding Models **LSI CONSULTING** did not propose any

Contract Transition and Flexibility flexibility to transition from a state's current contract to a new contract or amendment under the terms of a newly awarded Master Agreement and Participating Addendum.. SI becomes a one-stop-shop for the participating State for software and services contracting. **Could not open PDF**

Functional Requirements

General Functionality - 2 integration w/medium and low LOE, 1 not available, 1 partial requirement met for posting solicitations on state website, 36 Out of the box.

Supplier Portal - 1 integration w/Medium Loe an API where suppliers can access a posted solicitation , and 21 out of the box, 1 business process to handle vendor complaints outside of the tool.

Supplier Enablement/Management 9 integrations w/med LOE and 34 out of the box.

RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: LSI Consulting
CATEGORY #(s): 3
DATE: 1/6/2022
SME/EVALUATOR NAME: Joe Zrioka
DEPARTMENT/STATE: Maine

Buyer Portal 15 out of the box
Need Identification 7 out of the box
Request through Pay 62 out of the box – Purch Req, 28 out of the box for Wrkflw mgt, 29 out of the box for PO gen and mgt, 21 out of box for Pcard, 21 out of the box for Receiving, 11 out of the box for invoicing.
Catalog Capability 1 not available items with negative dollar value, 39 OOBX
Sourcing/Bid Management Three not available, 1 partial sourcing bid management not displayed publicly, 147 OOBX
Contract Management 74 OOBX, One not supported 11 not available and must be performed manually. 2 Available however these are manual processes.
Vendor Performance 25 OOBX
Purchasing/Data Analytics 37 OOBX

Technical Requirements

Availability 99.5% system availability percentage during each month for production versions, with the exception of regularly scheduled and emergency maintenance.
Accessibility Requirements 301 549 is a European standard for digital accessibility.
Audit Trail and History logs are retained so long as the customer has an active contract with SAP.
Browsers Supported Apple Safari (64-bit)•Google Chrome (64-bit)•Microsoft Edge (32-bit)•Microsoft Edge Chromium (32-bit and 64-bit)•Mozilla Firefox (64-bit)•Microsoft Internet Explorer (32-bit) until December 31, 2021oNote: Compatibility mode isn't supported
User Accounts and Administration RBAC
User Authentication Customers may activate 2 factor authentications if they use SAML based authentication or ADFS for accessing the SAP Ariba Cloud Services.
Federated Identity Management– see user authentication above
Data Conversion LSI will leverage SAP's activate methodology however methodology was hard to determine as far as specific data conversion tasks.
Interface and Integration Using SAP ARIBA open APIs. Oracle and PeopleSoft and they also integrate with SAP?
Office Automation Integration Word excel and Powerpoint
Mobile Device Support the Ariba Mobile app to view, track, and approve purchase requisitions, nudge approvers, and access informative articles on the Exchange User Community, all from their mobile devices.
Mobile Applications IOS version 7. X, Android Kit Kat 4. 4 and lollipop 5.0
Data Ownership and Access Data retained so long as the contract is active however it's not clear how long they will keep data after termination
Date Retention, Archive and Purge Considerations Retains customer data for the life of this subscription in accordance with their terms and conditions
Disaster Recovery Plan Annual test does it include clients? Data centers appear to be SAP owned RPO 5 minutes. (RTO) to not exceed four hours. LSI Consulting leveraging SAP plan.
Solution Environments production and test; Extra charge for more environments
Solution Technical Architecture The native integration with SAP ECC and S/4HANA covers the full suite of SAP Ariba applications including Ariba Network Automation, SAP Ariba Buying and Invoicing master data and transactional interfaces as well as SAP Ariba Sourcing and SAP Ariba Contracts and direct materials management. This is accomplished by using the SAP Ariba Cloud Integration Gateway (CIG). The Cloud Integration Gateway provides a means of integrating SAP Ariba with SAP ERP products (S/4 and ECC6) without the use of middleware for delivery. Detailed architectural diagram provided.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Installing Ariba SAP
 - LSI is consulting role
 - Partner managed cloud; should consider liability and data security terms
 - Gateway to full SAP saturation
2. Previous Projects
 - Large list of clients; all but a few are municipalities/cities or smaller entities than full statewide scope
 - Provide examples, but no reference to ROI; provides limited value to spend the money for the services
 -
3. Subcontractors
 - No subcontractors; should be identifying SAP?
 -
 -
4. Organizational Chart
 - All work aside from highest level is done by Ariba and SAP resources
 - Job descriptions show limited responsibilities of LSI. Majority of work appears by States
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - Research needed if LSI absorbs risk to project or defers to SAP or others. States should be aware of liability limits for prime vendors when acting as project managers but do not own solution

Individual SME Comments:

General Principal and Requirements

- SAP Ariba Solution
- POSITIVE SAP Ariba Solution, SaaS
- POSITIVE SAP manages infrastructure
- QUESTIONING Spot buy catalog avenue to encourage off contract purchases.
- POSITIVE mobile platform focus
- POSITIVE End to end system, task management functions
- NEGATIVE Many value-added services, why not included in base products
- QUESTIONING Extension partners for functionality what is relationship and liability
- POSITIVE – Gold Partner for SAP
- QUESTIONING – GovOne Accelerator template benefits or restriction
- POSITIVE – SAP is widely used throughout the industry
- POSITIVE – Modules are beneficial to choose which are best
- QUESTIONING – Is vendor portal a barrier to entry for technology challenged small business
- QUESTIONING – SAP Fieldglass and Supplier Risk Management, using LSI as a third party to implement, and various application extension partners demonstrates a complex fragmented solution.

Functional Requirements

- POSITIVE – separate modules
- POSITIVE – Use of UNSPSC codes is preferred
- POSITIVE – Ariba is far reaching
- QUESTIONING – how simple is the network considering the size and effort needed to implement
- POSITIVE – Resources on page 30 seems interesting
- QUESTIONING – mention of approval workflows
- QUESTIONING – page 34 references guided buying, how does this influence the buyer
- INTERESTING – Need guidance seem very manipulative
- POSITIVE – Catalog features and attribute designations are good
- QUESTIONING – How do technologically challenged vendors submit a bid response?

Technical Requirements

- QUESTIONING – accessibility for differently-abled?

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Cat 3 eSoftware, Stage 2 Proposed Services

DATE: 1/13/2022

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

- QUESTIONING – Has lack of browser compatibility mode created problems for customers?
- POSITIVE – Single sign-on and 2 factor is good and appears standard
- QUESTIONING - Organizational change management details are deferred in response
- POSITIVE – Mobile App has basic functionality of solution
- QUESTIONING – Is response page 53, mobile applications dated? iPhone should work on phones above 6s.

Security Requirements

- QUESTIONING – Mobile app does not work if MDM platform?
- NEGATIVE – continuous referral to sap policies for compliance is difficult to determine clear response
- POSITIVE – limited access to data is appropriate
- QUESTIONING (p.76) SAP does not handle HIPAA data, possible concern?
- POSITIVE – Secure systems in place

Implementation Services Requirements

- POSITIVE Good overview of project plan processes
- QUESTIONING – How is responsibility clarified with LSI and State for implementing. LSI places many obligations on the State in the proposal.
- POSITIVE Level 2 punchout is a very good attribute

Managed Services Requirements

- QUESTIONING – quarterly hours for monitoring, what is more are needed?
- NEGATIVE – Training at hourly rate
- NEGATIVE – Catalog Support Services at hourly rate
- NEGATIVE – Help desk services at additional cost
- QUESTIONING – Additional costs may challenge end user ROI

Video Demonstrations

- POSITIVE – SAP is large solution end to end
- QUESTIONING – Is guided buying only view available to buyers, would not like to be overly restrictive
- QUESTIONING – Is there a training session available for new users, solution appears complex
- POSITIVE Dashboard seems beneficial
- QUESTIONING – Data appears a great advantage to power users, can be overwhelming to casual users.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3 Stage 2

DATE: 12/20/2021

SME/EVALUATOR NAME: Stacey Winter

DEPARTMENT/STATE: Purchasing North Dakota State University

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

Overall

Exception to #7 of NASPO T' & C's

General Principal and Requirements

Key Solution Functionality Elements

8-10	Ariba is the solution	
	Single point of entry	
	Smart routing – dynamic workflow engine	
	Compliance – SAP s/4 HANA – you can manage regulations, track registrations and substance volumes, classify products and create compliance documents	
	Portal – SAP portal product	
	Open Marketplace Environment – users choose to have access to all of the available catalogs or just their own. Also has spot buy catalog solution available	
	Integration – holistic integration application	
	Document Management – module can track, manage and store documents that can help digitize the contracting process.	
	Reporting, dashboard, and data virtualization. – native reporting and analytics including-packaged reports	
	Configurable – highly configurable solution	
	Transparency – Vendor Portal streamline operations and engagement with your vendor community.	

User Experience

10-12	Guided buying	
	Multiple platforms. Designed to deliver a fast and ergonomic user experience.	
	Interface designed to minimize clicks, seamless transition from mobile to desktop app, visual workflows, bulk actions, and integration s to facilitate multiple catalog searches

THIS RESPONSE IS THE SAME RESPONSE THAT WAS SUBMITTED FOR STAGE 2 CATEGORY 1 – FULL SOLUTION.

Individual SME Comments: The video provided did show the functionality of the system, but at a very high level. It concentrated more on tips and lessons learned rather than getting deep into the functionality of the system. I got the impression this company wanted to provide a deeper explanation of the system when they offer a "demo" but not sure what that meant?

Some of the responses in the RTM are completed by stating "standard functionality" which does not show me they understand the requirement and can state that their solution can perform the requirement. Another issue is the vendor's response comments state an integration will be needed, but the "availability" on the RTM is labeled "A" which means out of the box. See example on Tab 3 Line 198 on suppliers RTM.

I am confident that the system can be offered to state clients but would feel that the concerns listed in these notes would need to be addressed/verified so clients and this supplier are clear on any discrepancies.

General Principal and Requirements – Page 8

Key Solution Functionality Elements – Page 8

- Offers the SAP Ariba Guided Buying with SSO
- Smart Routing is workflow that can be configured.
- Compliance helps track registrations.
- Portal provides access for employees
- Have open marketplace functionality with Spot Buy catalog solution to aid buyers in finding goods.
- Offers integration, workflow, document management and configurable dashboards.
- The vendor portal helps with the transparency requirements.

User Experience – Page 10

- Each module has configurable dashboards - Page 11
- Allows for mobile use to save time.

Bidder Best Practices and Roadmap – Page 12

- Presents both Quarterly and Monthly releases.
- Supplied 2 attachments embedded in the response document showing their expected road maps. These documents contain good information and could be very useful
- Best Practices Center service provides access to knowledge of best practices

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

Innovations and Value-Added Features/Services – Page 13

- “Moving away from customized systems to configurable systems is the key to enable innovation”
Page 14
- Offers SAP Ariba APIs.
- Does offer some other tools that would be advantageous to the State. SAP Fieldglass and SAP Ariba Supplier Risk Management. Page 15
- Supplied Link to YouTube video explaining that SAP Fieldglass aids to develop external workforces. Can submit a SOW and then work with the vendor. Can integrate with existing systems.
- Supplied YouTube link to explain Supplier Risk Management. I tried to access the video but received a warning stating this is a “private video” – Page 16

Customizations/Extensions – Page 17 thru Page 20

- Supplied a well define list of extensions and partners. Page 17
- Chat bots, pdf invoices, integrations with Oracle, supplier data validation are some examples. I am just curious if these are included or offered at an additional cost.

Alternative Funding Models – Page 20

- SAP Fieldglass is offered with an option to pay as you go and only pay for what you use at the end of the month.

Contract Transition and Flexibility – Page 20 – 21

- Partner Managed Cloud (PMC) is a tool to offer expedition the legal review process.
- Referred to document titled LSI Partner Managed Cloud attachment which provided information on the benefits for using this tool.

Functional Requirements – Page 22

General Functionality – Page 22 thru Page 24

- Single platform for supplier and buyers
- Buying & Invoicing, Sourcing, Contracts, Supplier Lifecycle and Performance, Ariba Network and Fieldglass are the solutions listed.
- Profiles can be set up via an integration.
- User should configure their own dashboards to simplify the user experience.
- CONCERN - EPROC-GEN-11 – Line 15 - Did not address the ability to Import/Export attachments
- CONCERN - EPROC-GEN-13 – Line 17 - Did not address the ability to re-assign work to another user?
- CONCERN - EPROC-GEN-26 – Line 30 - The ability to track admin fees in not available with integration to state's ERP?

Supplier Portal – Page 24 thru Page 30

- Proposing the SAP Ariba Business Network (SBN) as the single point of entry.
- Landing page for all suppliers has access to all procurement related transactions.
- Offers Open, Smart, and Simple network services.
- Sourcing, contracts, catalogs, and invoice access for the suppliers.
- Supplier support with training tutorials and documentation.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Has supplier mobile app functionality
- CONCERN - EPROC-SPR-9 and EPROC-SPR-10 – Lines 13 and 14 - The comment response of "Partner" is not familiar to me?
- CONCERN - EPROC-SPR-18 and EPROC-SPR-19 – Lines 22 and 23 – One line is not supported and the other line the comment response of "Partner" is not familiar to me?

Supplier Enablement/Management – Page 30

- Buyers can manage the entire purchasing process.
- Offers a supplier enablement team
- Offer supplier education and training materials
- Help manage data collection.
- CONCERN - EPROC-VDR-19 thru EPROC-VDR-27 – Line 48 thru line 56 – The responses here are labeled as needing an “integration”, but I am not clear what integration is required?
- CONCERN - EPROC-VDR-31 thru EPROC-VDR-39 – Lines 60 thru line 68 - Concern - This is a duplicate response from requirements in this section. Does the system offer this requirement?
- CONCERN - EPROC-VDR-43 - Concern - This is a duplicate response from requirements in this section. Does the system offer this requirement?

Buyer Portal – Page 31 thru Page 34

- Can have a configurable landing page with a dashboard, or have a user experience a guidance in buying.
- User will log in using the same portal and what they see can be set up within their roles.
- Casual users purchase, complete forms and be linked to other solutions like ServiceNow
- Power users can have dashboards, run reports, manage records, and post solicitations.
- Provided screen shots on pages 33 and 34

Need Identification – Page 34 thru Page 36

- Guided Buying provides access to catalogs and state contracts and the vendor thinks this is the perfect solution to Need Identification.
- Can trigger workflows that can be configured.
- Can configure a landing page dashboard containing widgets to guide the user in the buying process.

Request through Pay – Page 36

- The narrative response from this supplier is very limited on information.
- Interpretation of Purchase Request – Could be a form or “request” that is filled out or could be the result of submitted a “shopping cart” that goes to a PR (purchase request or requisition) and then to a purchase order. See response in RTM line 106
- CONCERN - EPROC-PRD-15 – Line 116 - Attachment size limit is 100 MB per attachment
- CONCERN - EPROC-WRK-12 – Line 177 – Can you add comments, and can you control if comments go to the vendor?
- CONCERN - EPROC-WRK-14 – Line 179 - States the workflow will not be re-triggered. Would if we want workflow started again?
- CONCERN - EPROC-PO-3 – Line 198 – Response states requirement needs an integration, but “Availability” is marked with A which means out of box?
- CONCERN - EPROC-PO-6 – Line 201 – PO number is not configurable by the State.
- CONCERN - EPROC-PO-16 – Line 211 – Cannot electronically sign Purchase Orders

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-PC-6 – Line 232 – Pcard as part of the user's profile is not supported.
- CONCERN - EPROC-PC-10 – Line 236 - Availability states out of the box, but wouldn't this require an integration? Loading data from the bank.
- CONCERN - EPROC-RC-4 – Line 253 – Cannot record a receipt without a reference to a PO.

Catalog Capability – Page 36 – 37

- Cross- catalog search among the catalogs.
- Spot Buy catalogs for those items not found in other catalogs.
- CONCERN - EPROC-CAT-6 – Line 291 – Does not have an unlimited number of catalogs. 5000
- CONCERN - EPROC-CAT-7 – Line 291 – Does not have an unlimited number of items. 500,000
- CONCERN - EPROC-CAT-10 – Line 295 - Supplier availability states out of box but response is talking about custom forms - Should be labeled C for customization?
- CONCERN - EPROC-CAT-11 – Line 296 - Supplier availability states out of box but response is talking about custom forms - Should be labeled C for customization?
- EPROC-CAT-19 – Line 304 - Items with negative dollar value not supported
- CONCERN - EPROC-CAT-39 – Line 324 - This response is the same requirement in line 323. Does not address the publish announcement about new catalog requirement.

Sourcing/Bid Management – Page 37 thru Page 40

- SAP Ariba Sourcing is the solution name.
- Ariba Discovery is the supporting public posting.
- Integrates with SAP Ariba Contracts solution
- Configurable templates allow for agency process variations
- Has project management process – Page 39
- Side by side comparison
- Offered links for more information on Public Posting which is also contained in Section 10 Vendor Performance of their response. Page 40
- CONCERN - EPROC-SRC-15 – Line 342 - This response shows the functionality of qualified vendor lists and not if the Sourcing module can handle this solicitation type.
- CONCERN - EPROC-SRC-39 - The system assigned number is not configurable by the State
- CONCERN - EPROC-SRC-41 - Does it support Adobe Acrobat?
- CONCERN - EPROC-SRC-63 – Line 390 - The system has a 100-supplier limit for events
- CONCERN - EPROC-SRC-76 – Line 403 - Response does not state what means this information is to be posted? Integration? Line 404 states integration with that requirement?
- CONCERN - EPROC-SRC-102 – Line 429 - eSignature functionality is limited to contracts not sourcing events.
- CONCERN - EPROC-SRC-130 – Line 457 - The response references communication between buyer and supplier, but requirement is referencing evaluation panel members?
- CONCERN - EPROC-SRC-131 - The requirement references communication between the "buyer side" of the application, but the response references the supplier communication ability?
- CONCERN - EPROC-SRC-143 – Line 470 - I interpret this requirement as being able to "unaward" and awarded solicitation and then awarding it to the next responsive supplier. The response submitted does not address that requirement.

Contract Management – Page 40 thru Page 42

- SAP Ariba Contract Management is the solution proposed

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Offers both Contract Management and Administration
- Bridges the sourcing process to the transactional procurement process.
- Contract can be published to SAP Ariba Buying and Invoicing and then leverage Guided Buying
- Leverage workspaces, templates, documents, and libraries
- Configure contract dashboards to help manage contracts
- Contains numerous pre-packaged reports
- CONCERN - EPROC-CNT-25 – Line 505 – Does the solution support Adobe Acrobat?
- CONCERN - EPROC-CNT-65 – Line 545 – Buyer cannot control which contracts or content is displayed on public site. Can the system use the contract status?
- CONCERN - EPROC-CNT-71 – Line 551 – The vendor's response did not address the administrative fee requirement. Only talked about updating prices on price file.

Vendor Performance – Page 42 thru Page 44

- SAP Ariba Supplier Lifecycle and Performance is the solution name.
- Supplier has self-service access to maintain data
- Centralized view of supplier's data
- Offers vendor performance tool.
- Can use API to display supplier performance.
- Can send surveys and system automatically scores the response.

Purchasing/Data Analytics – Page 44 thru Page 47

- SAP Ariba Reporting is the solution name.
- Reporting can be created with many data elements and displayed on personal dashboards.
- System offers pre-packaged reports across the solution.
- Offer Ad Hoc Reports. (Wizard driven)
- I liked that they copied a duplicate response on lines 602 thru 608 but bolded the requirement in the duplicate response that showed they could meet the requirements. This practice is better than "see requirement XXX".
-

Technical Requirements Page 47

Availability – Page 47

- Guarantee 99.5% availability.
- Offered example of their SLA

Accessibility Requirements – Page 47

- Offered link to a design guide of the system.

Audit Trail and History – Page 48

- Meets requirements

Browsers Supported – Page 48

- Listed browsers supported and noted compatibility mode is not supported

User Accounts and Administration – Page 48 – 49

- Based on roles and permissions and assignment to groups
- Common data is shared across modules automatically

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-TECH-12 – Line 16 Dual sign-on via one account is not supported. Buyer/Supplier
- CONCERN - EPROC-TECH-16 – Line 20 - Deactivating an account is not automated.
- CONCERN - EPROC-TECH-17 – Line 21 – System does NOT display profile information, even under the user profile?
- CONCERN - EPROC-TECH-20 – Line 24 - This response does not address the searchable functionality that was mentioned in the requirement?

User Authentication – Page 49 – 50

- Offers regular authentication or single sign on
- Supplied password information policies

Federated Identity Management – Page 50

- Suppliers' response referred back to previous section, User Authorization section 6 Page 49-50

Data Conversion – Page 50

- Plan to leverage SAP's Activate Methodology which provides tools with rapid migrations.
- Supplied suggested role names and responsibilities.
- CONCERN - EPROC-TECH-26 – Line 30 - Legacy integration is provided as an extra cost

Interface and Integration – Page 51

- Stated 3 kinds of integration options, HTTPS, SOAP, and REST
- CONCERN - EPROC-TECH-57 – Line 61 - The supplier response refers to THEIR SLA. I thought the requirement was to address an SLA entered in the system.

Office Automation Integration – Page 51

- Meets requirements

Mobile Device Support – Page 52

- Uses the mobile "app" to perform system tasks and supplied list of features available with the app.

Mobile Applications – Pages 52 – 54

- Listed the operating system that the mobile app supports
- SAP Ariba mobile app is not certified with mobile device management (MDM) platforms. Page 53
- Listed security features offered by the app

Data Ownership and Access – Page 54

- Customer owns the data throughout the life of the subscription

Date Retention, Archive and Purge Considerations – Page 54

- Does not mention how the purge and archive functionality works in the narrative response.
- CONCERN - EPROC-TECH-63 – Line 67 – Does not provide detailed information about the purge process

Disaster Recovery Plan – Page 54 -55

- SAP Ariba uses a documented system recovery plan.

- Would have been beneficial to share this documented plan?

Solution Environments – Page 55

- Narrative offered very limited information on environments proposed other than to mention test and production.
- CONCERN - EPROC-TECH-64 – Line 68 - This response does not address the "refresh" functionality

Solution Technical Architecture – Page 55 thru Page 57

- Solution is single platform with solutions natively integrated.
- The SAP Ariba Cloud Integration Gateway allows all the solution modules to be integrated.
- cXML language for document exchange.
- Offered information on integration to external systems. Page 56
- System shares servers.

Solution Network Architecture – Page 57 – 58

- Chart on page 57 shows network structure

System Development Methodology – Page 58 – 59

- Uses Product Lifecycle Methodology to help with development.
- Some changes are subject to change management procedures.

Service Level Agreement – Page 29

- Provided/referenced the embedded SLA offered in their response. 2 different versions.

Security Requirements – Page 60 – Most of my responses to this section I will need to defer to a security SME

Cloud Security Alliance (CSA) Compliance – Page 60

- Referenced the CAIQ document embedded in this response. Excel spreadsheet looks complete

Security and Privacy Controls – Page 60

- Not officially NIST 800-53 certified.
- Offered link to certification compliance Page 60
- Offered link to Attestation of Compliance.
- Defer rest of evaluation to Security SME

Security Certifications – Page 60 thru Page 62

- Current certificates available upon request. Provided link
- Offer link to Service Organization Controls (SOC) reports. Page 61
- PCI and DSS certified
- Provided link to current Attestation of Compliance
- Defer rest of evaluation to Security SME

Annual Security Plan – Page 62

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- SAP does not attach SOC reports with an RFP.
- Provided link to request SOC report

Secure Application and Network Environment – Page 62 thru Page 66

- Boundary Protection – Page 62
- Network logs are available
- Has firewall functionality
- Has security plans and policies
- Suggested to request the SAP Cloud Security Framework document for more detail – Page 64.
- Provide list of Maintenance tools – Page 64
- Defer rest of evaluation to Security SME

Secure Application and Network Access – Page 66 thru 68

- Uses encryption to protect information
- Leverages Secure Software Development (SDC)
- Suggested to request the SAP Cloud Security Framework document for more detail.
- Defer rest of evaluation to Security SME

Data Security – Page 68 thru Page 71

- Have established formal process to protect data – Page 68
- Data is encrypted. Page 69
- Moderate Business Impact Data is considered person contact information.
- Provided URL to their data policy and privacy statement. Page 69
- Defer rest of evaluation to Security SME

Personally Identifiable Information Protection – Page 71

- Not designed to handle HIPAA data including SSN, and Personal Banking information

Security/Privacy Issue Occurrence – Page 71

- Can provide general overview of their incident response but their full documentation is confidential. Page 71

PII Data Actual/Attempted Access or Disclosure – Page 72

- Response states “see our response to Section 9”

Security Breach Reporting- Page 72

- Response states “see our response to Section 9”

Video Demonstrations

SAP Ariba is the solution that is being proposed with this response. The first step in the solution is Guiding Buying which helps the user decide what path to take for procurement. The access is given to

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

users by roles and permissions and access to ordering certain items can be restricted to users. Can support any catalog, internal or external. Search feature results are from all catalogs across the solution. Can configure alerts on purchases and accounting information to show up on the requisition along with workflow. Once flipped to a PO, the user can request a change request on the order as this is now a PO that has already been sent to the supplier. The supplier receives an alert and then logs into his supplier portal. The supplier can create an invoice for the order. The AP staff for the state will receive an alert that the supplier has invoiced them for the order. The system from the accounts payable view has a landing page containing data generated for reports. The order can now be received by the AP person.

Sourcing – User has a landing page that can be configured with tiles of tasks need to be performed. Manager of user can assign or re-assign workloads of users. Events can be created from templates or copied from a previous event. Event can be awarded to multiple vendors and allows to create different award scenarios. Can view bid content, suppliers, reports, messages, and award content.

Contract Management – Can configure their own landing page that will contain all information related to contracts. The creation of contracts is wizard driven and information is populated from the event. You can also use a template to create contracts. After contract creation, tabs available are overview, documents, tasks, team, message board and history. You can see the contract spend on the contract and enter tasks assigned to team members. Can sign documents electronically.

Supplier Management – Has a configurable landing page with tasks or reporting available. Allows to view and report on supplier performance. User can create supplier requests which contains custom fields, and templates can be used here as well. Can view supplier information in a 360 view.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 8/27/2021

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Supplier Portal and Supplier Enablement /Management (a business identity platform).
 - Think “gatekeeper” between customers vendor files and their ERP system
2. Previous Projects
 - Three listed. The projects meet Category 3, but also goes beyond and provides support.
 - All listed are universities that used PaymentWorks to somehow mediate their risks.
 - North Carolina State Univ.
 - University of Kentucky.
 - University of Tennessee.
3. Subcontractors
 - Vendor states there are no subcontractors.
4. Organizational Chart
 - Yes, a project organization chart and job descriptions were provided.
5. Litigation
 - Vendor states there are no litigation.
6. Financial Viability
 - Provided DnB number and a printout of top of the page; however, **I cannot ascertain any financial information from this.**

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Payment Works

CATEGORY #(s): 3

DATE: 1/21/2022

EVALUATOR NAME: Angie Scherbenske

EVALUATOR DEPARTMENT/STATE: ND State Procurement Office

Instructions: The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

Individual Comments:

Overall/General

- Proposal is for Supplier Portal and Supplier Enablement/Management.
- Cloud based SaaS solution
- Allows for payers and payees to exchange validated information in order to conduct business and send /receive payment securely.
- They state it's the "first and only of its kind" and typically "sole sourced"

A. General Principal and Requirements pages 2 - 6

1. Key Solution Functionality Elements – p. page 2 - 3

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

- **Single Point of Entry: Yes. Accessed by State employees behind existing SSO. And allows one point of entry for suppliers.**
- **Smart Routing: Yes. For supplier enrollment – not sure after that.**
- **Compliance: yes. Federal.**
- **Portal: Yes.**
- **Open Marketplace environment: N/A**
- **Integration: Yes. With all major ERP systems**
- **Workflow: Yes. Can be customized by State.**
- **Document Management: Yes.**
- **Reporting/dashboards/ rule role based: Doesn't address..**
- **Configurable: Yes.**
- **Transparency: Doesn't address.**

2. User Experience – p. page 3 - 4

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
 - Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
 - Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
 - Portal that informs users and supports user work management.
 - Functionality optimized for mobile access and use.
 - Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
 - Role-based functionality for drafting, review and approval, evaluator and other processes.
- **Capability: yes.**
 - **Intuitive: Yes**
 - **Wizard driven: yes.**
 - **Portal work management: Yes.**
 - **Mobile access: Yes, but no app.**
 - **Workload: yes, customizable.**
 - **Role-based: Yes.**

3. Bidder Best Practices and Roadmap – p. page 4

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.

- **Page 4 - “PaymentWorks is an evolving and nimble solution that caters to our customers requirements and goals. We are cloud-based and hosted on AWS to provide our customers with a flexible, optimized and most importantly a secure solution to supplier information management.”**
- **They maintain strict SLA's**
- **Doesn't address a Roadmap**
- **Doesn't address updates or time of them**
- **Doesn't address any opportunities to reduce costs.**

4. Innovations and Value-Added Features/Services – p. page 4 - 5

In addition to the stated requirement GEs, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: **OPTIONAL**

• **Inline Narrative:** If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).

- **Monitors IP addresses, email domains and website domains to ensure identity**
- **They describe what their system does once a payee registers.**

5. Customizations/Extensions – p. page 5

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.

- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- Page 5. *"After 100+ enterprise customer enablements PaymentWorks has a number of out-of-the-box best practices for deploying the SaaS solution"*
- *"There are some custom fields or modifications that customers can make to their vendor facing intelligent enrollment form, but for the most part the experience we have gained over the past 8 years with similar enterprise level customers has allowed for the solution to meet supplier information management requirements out-of-the-box."*

6. Alternative Funding Models – p. page 5

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.

- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

- N/A.

7. Contract Transition and Flexibility – p. page 6

- Page 5. *"PaymentWorks is flexible and open to contract amendment or transition to newly awarded master agreements. However, the terms and conditions of such a transition would need to be agreed by both parties prior to initial contract change, transition or adoption of a new agreement"*

B. Functional Requirements: pages 6 - 10

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The electronic procurement solution **must** be cloud-based with a Software as a Service (SaaS) delivery model

1. General Functionality. Tab 2, GEN-1 through GEN-40

- Page 6 – *"PaymentWorks is ERP agnostic, Payment Type agnostic, Bank agnostic and meant to complement your existing tech stack while providing identity certainty for every payee and every payment. The State is able to grant access to employees through your existing Single Sign On (SSO) which PaymentWorks can live behind. PaymentWorks will replace manual collection of forms and vendor certificates, eliminate manual lookups TIN matching or vendor validations, and indemnify against the risks of payments fraud"*
- Payment Works Platform functionalities:
 - Payments Fraud Indemnification (underwritten by CHUBB)
 - Robust Payee Registrations and KYB (Know your Business Management)
 - Easy ERP Complex Account Structures
 - Automated Payee Identity Validations and Sanction Monitoring
 - Internal Workflows Approvals, and Business Controls
 - The Network
 - Receive & Send Messages
 - Report/Export (Data Extraction of Payee records)
 - Reimbursements
- Gen 2 – 10, 13-16, 18 – 21, 24 – 28, 31 – 32 : **Not Available**. Some are not a function of their system and some they do not meet.

- Gen 1 – “PaymentWorks is responding to the eSolutions portion of the State's RFP: Supplier Portal & Supplier Enablement/Management only. As a business identity platform it is the role of PaymentWorks to act as a front-door for all payee enrollments and changes to ensure only accurate and compliant data is relayed to the State's ERP (CGI) system. PaymentWorks is a validator to ensure the state always has an identity-proofed, compliant and fraud-proofed vendor file. Some of the procurement related questions and functions will not apply to PaymentWorks as we act as the gatekeeper to the vendor file/ERP and not a full P2P suite. “
- Gen 38: Does provide unlimited licenses through an annual subscription model.

2. Supplier Portal. Tab 3, SPR-1 through SPR-23

- Page 10 – “ PaymentWorks supports ongoing compliance and debarment monitoring and notifies customers of sanction alerts as they occur. PaymentWorks partnership with Chubb (www.chubb.com) provides payments fraud indemnification that is built into the product and a risk transfer for our customers. Most supplier portals stop after the collection of vendor data. It is at this point where PaymentWorks continues to provide value by solving the critical business needs of our customers when it comes to vendor risk management, business email compromise, business payments fraud and vendor compliance. “
- SPR 1 – 3: Meets Requirements.
- SPR 4 – 11, 13, 15-16, 19-23: Not Available to N/A.

3. Supplier Enablement Management Workstream. Tab 3, VDR-1 through VDR-43

- Page 10 – “ PaymentWorks can communicate with the ERP system (CGI) continuously receiving invoice status files to ensure up to date payment and invoice information is at the fingertips of payees. PaymentWorks is the vehicle from which all payees will manage their identity credentials, connections and review payment history, details and statuses.

PaymentWorks is not a bid management system for managing bids, solicitation responses or where invoices are submitted. “

- Meets most requirements besides VDR 11-12, 22, 27, 30, 39-41,43.

4. Buyer Portal. Tab 3, BPRT-1 through BPRT-15

- N/A

5. Need Identification. Tab 3, NEED-1 through NEED-7

- N/A

6. Request through Pay Workstream. Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11

- N/A

7. Catalog Capability - Tab 3, CAT-1 through CAT-40

- N/A

8. Sourcing/Bid Management Workstream. Tab 3, SRC-1 through SRC-151

- N/A

9. Contract Management. Tab 3, CNT-1 through CNT-88

- N/A

10. Vendor Performance Tab 3, VPE-1 through VPE-25

- N/A

11. Purchasing/Data Analytics Tab 3, PDA-1 through PDA-37

- N/A

C. Technical Requirements: Pages 11 - 32

1. Availability.

The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.

Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.

- Page 11. “The cloud-based PaymentWorks solution is available to customers and payees 24 hours a day and 7 days a week. This includes peak use hours of 7am-6pm local time, Monday-Friday. All PaymentWorks systems are 100% hosted within Amazon Web Services. We leverage the redundancy and high availability capabilities it provides. These redundancy capabilities ensure back up and ongoing solution availability “.

2. Accessibility Requirements.

The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.

- Partially meets. “PaymentWorks current VPAT form, which responds to Web Content Accessibility Guidelines 2.0 levels A, AA and AAA, is available at this link: <https://www.dropbox.com/s/150bc17aedbxs3m/VPAT%C2%AE2.1Paymentworks%20March%202019.pdf?dl=0>. “

3. Audit Trail and History RTM: Tab 4, TECH-1 through TECH-5 and

- Page 11: “Audit logs are stored in AWS CloudTrail. A user's most recent login is visible within the app to account administrators. All other logs are available through the PaymentWorks internal administration console, and can be available upon request. “
- Meets all 5 TECH requirements.

4. Browsers Supported

- Page 12 – “All major web browsers are supported including:
 - Google Chrome: Version 36 and newer
 - Microsoft Edge: Version 20 and newer
 - Firefox: Version 37 and newer
 - Internet Explorer Version 9 and newer
 - Safari: Version 5.x and newer
 No browser add-ins such as Flash or Silverlight are required.
- The PaymentWorks solution continues to adapt and evolve to ensure continuous support of new versions of browsers”

5. User Accounts and Administration RTM: Tab 4, TECH-6 through TECH-20

- Page 12 - “With PaymentWorks living behind the State's SSO, the State is able to grant permission based on user groups, user rights & permissions, specific functions and administration roles “

6. User Authentication RTM: Tab 4, TECH-21 through TECH-25

- Page 12 – “PaymentWorks requires customers to authenticate through Single Sign On (SSO). As a result Two-Factor Authentication is enabled through your IdP. Two-Factor Authentication for vendors is available to the payee community. PaymentWorks monitors IP addresses, email/website domains and enforces specific password requirements.

PaymentWorks is a SAML2-compliant Service Provider that supports integrations with a variety of Identity Provider types, including Shibboleth and ADFS. All authentication is managed through the AWS infrastructure “

- TECH 25 – Will need CF and extra cost \$\$ to meet requirement. The eProcurement Solution should provide capability to automate acceptance and tracking of end user 'acceptable use' agreements and provide electronic notice to users to "renew/reaccept" on a scheduled basis (e.g. annually, bi-annually) as part of the login process. “This functionality is possible, but may require additional cost and configuration. Additionally, customers can utilize the Newsletter functionality to sent out new agreements, attestations or other information at the intervals of their choosing.”

7. Federated Identity Management

- Page 12 -13: “ The PaymentWorks Solution provides user login capabilities that can be integrated with the Participating Entities existing Federated Identity Management system and allow that system centralized administration and synchronization of user identities to enable user provisioning and de-provisioning of identity and access across the Participating Entity’s systems with single sign ons”

8. Data Conversion RTM: Tab 4, TECH-26 through TECH-34

- Page 13: “PaymentWorks can receive information such as Invoice statuses, remittance details and payment history via an API connection or SFTP. This information can be scheduled to automatically feed the vendor facing PaymentWorks system so vendors can always have up to date information and self-service. This type of history and legacy system can come to PaymentWorks directly from the CGI ERP system. PaymentWorks does not receive or display contract data, solicitation data, vendor performance data or chart of accounts data. Therefore this type of legacy information would not be received “
- TECH 27: One completed it and marked as a medium. a. In-process Purchase Request and Purchase Order transactions from the state's financial system. “ The vendors would also be able to see pending invoice statuses and remittance details. They also have the ability to send payment inquiries through the messaging service to the state. This is accomplished with a scheduled invoice status file being sent from the ERP to PaymentWorks. “
- Tech 33: Completed: Historical Spend data: “ PaymentWorks can accept payment history for vendors that they would be able to see upon initial login to the PaymentWorks network. The vendors would also be able to see pending invoices and remittance details. This is accomplished with a scheduled invoice status file being sent from the ERP to PaymentWorks. “
- The remaining TECH 26 and 28 – 32 and 34: are marked as Not Available “ Not a PaymentWorks function.”

9. Interface and Integration RTM: Tab 4, TECH-35 through TECH-60

- Page 13: “ Integration involves a set of four scheduled routines:
 1. New vendor records retrieved from PaymentWorks (typical interval: 15 minutes)
 2. Vendor confirmation files uploaded to PaymentWorks after new vendors are created in ERP
 3. Approved Vendor profile modifications sent to the State's ERP (CGI).
 4. Nightly snapshots of new and modified invoice records for Vendor viewing.
- PaymentWorks is ERP agnostic and has integrated with most major ERP applications”
- TECH 35: PaymentWorks provides integration through REST API or by asynchronous files exchange through SFTP server.
- Integration involves a set of four scheduled routines:
 1. New vendor records retrieved from PaymentWorks (typical interval: 15 minutes)
 2. Vendor confirmation files uploaded to PaymentWorks after new vendors are created in ERP
 3. Approved Vendor profile modifications sent to the State's ERP
 4. Nightly snapshots of new and modified invoice records for Vendor viewing.
 PaymentWorks is ERP agonistic and has yet to come across and ERP system that it could to integrate with. Currently there are no active CGI customers, but there are several in the queue.
- TECH 38: Doesn't meet requirements, but PaymentWorks would consider doing the integration for the SOS licensing and certification system for an additional fee. It's possible that the 3rd party sanction and compliance partner (RDC) may be able to cover the desired requirements for the state.
- TECH 41 – 50 and 55 - 59: are marked as Not Available “ Not a PaymentWorks function.”

10. Office Automation Integration RTM: Tab 4, TECH-61

- Page 14. “ PaymentWorks displays Invoice statuses, payment history and remittance details to the vendor community. PaymentWorks is not a big management solution and does not receive or display documents such as purchase orders, solicitations, or contracts to the vendor network “
- TECH 61: Can facilitate job Microsoft product types.

11. Mobile Device Support RTM: Tab 4, TECH-62

- *"The PaymentWorks solution does render appropriately on a tablet or mobile device. At present there is not yet an APP for download from the Apple or ios app-stores."*

12. Mobile Applications - TECH 62

- PaymentWorks does not have an app. yet.

13. Data Ownership and Access

- Page 14: *"Any data received by PaymentWorks for the purpose of vendor enrollment and validation is the property of the State of Maine."* **CLARIFY** – other States?

14. Date Retention, Archive and Purge Considerations RTM: Tab 4, TECH-63

- Page 15. *"PaymentWorks retention policy is to maintain data as long as an organization remains a customer. In the event data needs to be purged for any reason, we're happy to work with our customers to meet their requirements."*

15. Disaster Recovery Plan

- Yes meets requirements

16. Solution Environments RTM: Tab 4, TECH-64 through TECH-67

- Page 17: Does not meet req'ts. *"only provides two "environments" to our customers: Sandbox and Production."*
- Sandbox allows for a Dev and Test accounts which can update the Production environment when appropriate. This allows for multiple environments and ongoing testing, training and update reviews prior to any changes to the Production site.

17. Solution Technical Architecture

- Page 30. Uses AWS. Provides a diagram.

18. Solution Network Architecture

- *"All PaymentWorks systems are 100% hosted within Amazon Web Services. We leverage the redundancy and high availability capabilities it provides."*

19. System Development Methodology

- PaymentWorks team continues to develop an extensive library of tests that are applied to prior new releases.
- Cloud Services – secured operated images
- Jenkins – automated code testing
- Django framework – further augment secure development practices
- Application infrastructure
- Slack channel – foster communication
- *Access to source code is restricted to employees with a legitimate need for access. Developed code is pushed to the repository and added to the appropriate feature branch; the master repository is stored in GitHub and only available to authorized users.*

20. Service Level Agreement

- Master SLA is not addressed nor is a copy of their SLA provided.
- They do provided some information on their customer support.

D. Security Requirements: p. pages 32 - 40

1. Cloud Security Alliance (CSA) Compliance

- Does not have CAIQ or CCM

2. Security and Privacy Controls

- originally developed for ISO 27001 controls. Sounds as though they have partial NIST 800-53 as needed, but not all.

3. Security Certifications – nothing to add.

4. Annual Security Plan – nothing to add.

5. **Secure Application and Network Environment–**
 - documented in a series of AWS white papers which will share if required.
6. **Secure Application and Network Access –** Tab 5, SEC-1 through SEC-6.
 - SEC 1 – Yes they track vendor IP. **Tracking the device usage** by state employees is typically administered through the integration PaymentWorks has with our customers SSO.
 - SEC 2 - **The eProcurement Solution should provide capability for users to have concurrent login sessions with controls to allow the State to specify and limit the number of concurrent login sessions allowed.** Payment Works replies with “This would be a control to discuss at the time of enablement.” **This is considered a nonreply. CLARIFY can they do this?**
 - Hosted within **Amazon Web Services.**
7. **Data Security –** nothing to add.
8. **Personally Identifiable Information Protection –** nothing to add.
9. **Security/Privacy Issue Occurrence –** nothing to add.
10. **PII Data Actual/Attempted Access or Disclosure –** nothing to add.
11. **Security Breach Reporting –** nothing to add.

E. Implementation Services Requirements:

1. **Project Management:**
 - Pages 40 – 44: will provide standard out of the box and services;
 - Platform Implementation services
 - Configure the testing and prod environments
 - Configure Roles/Permissions
 - Configure Business Control Approval Process
 - Configure single Sign **on their side only**
 - Perform Training
 - PM to coordinate resources and project deliverables
 - Preimplementation
 - Submission of supplier file
 - Submission of invoice file
 - Submission of payment file
 - Coordinate with bank – begin/confirm resource allocation and confirm authorization / access requirements.
 - Automated Integration
 - ERP integration is the responsibility of Maine (states??). They offer (page 43) a third party to **help consult and assist with this for \$18,000.00 capped at 150 hours.**
 - Resources for the project along with role and duration are given – pages 44 – 45.
2. **Project Implementation Methodology:**
 - They do not require, but a phased approach is recommended. – pages 46 - 47
3. **Catalog Support Services – N/A**
4. **Data Conversion Services – Not entirely applicable to PaymentWorks –** page 47
5. **Interface Integration Development Services –** pages 48 - 51
 - *“resources. Before these files can be exchanged PaymentWorks will need to get set up behind the state’s SSO in order to grant staff access and proper permissions. Traditionally the only system PaymentWorks is communicating with is the ERP as we continue to act as the gatekeeper to the vendor file.”*
6. **Organization Change Management (OCM) Services**
 - Page 51-52: Will provide Maine a dedicated CSM to provide OCM services.
 - The OCM services described are not OCM services, they are more of a project management after implementation
 - **Requirement not met**
7. **Training Services:**

- Yes. Train key end users and administrators
- Provide the CSMs
- options to train an internal trainer(s) with ongoing support, training plans and a video library that is at their fingertips.

8. Help Desk Services

- Support to payees is available (page 54)
-

9. On-Site System Stabilization Support

- Yes – provides support. (Page 55)
- IMPL 4: No live chat.
- IMPL 5: Their helpdesk does not integrate with their ticketing component but, they will consider integration for an additional fee.

F. Managed Services Requirements:

- N/A

G. Other Available Services: p page 106: RTM: Tab 7 MNGD-1

- N/A

H. Video Demonstrations:

- Yes page 56

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: (PaymentWorks Inc)

CATEGORY #(s): 3

DATE: (10/3/2021)

EVALUATOR NAME: (Joe Zrioka)

EVALUATOR DEPARTMENT/STATE: (State of Maine Division of Procurement Services)

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, 5 mil each occurrence and 10 mil aggregate cyber liability
 - managing identity elements around a B2B relationship
 - ERP, P2P, paymenttype and Bank agnostic
 - able to indemnify against the risks of payments fraud and vendor impersonation due to our partnership with Chubb (the largest provider of cyber and crime insurance). This fraud warranty comes standard with the PaymentWorks solution
 -
2. Previous Projects
 - North Carolina State University – Supplier Information Management System
 - University of Kentucky. - controlled system to initiate new vendor invites, approve new vendors and approve updates, sends payee invitation; screens TINs and sanction lists, confirms banking, sends new vendor registrations and notifications, and sends push updates to the university, Suppliers/payees create a PaymentWorks account and complete the university's form
 - University of Tennessee.- bank account verification software. university concluded that a supplier portal without validations or fraud indemnification would not be a complete solution to vendor information management.
3. Subcontractors
 - Does not use
 -
 -
4. Organizational Chart
 - No org chart
 - PaymentWorks roles identified and described in table
5. Litigation
 - There is no litigation or closed cases to disclose.
 -
6. Financial Viability
 - D&B number
 - D&B profile with incorrect employee count and revenue according to vendor

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements **PaymentWorks** SaaS solution is a cloud-based business identity platform that allows for payers and payees to exchange validated information in order to conduct business and send/receive payment securely. B2B relationships. SSO (single sign-on). dynamic smart-routing – unsure how routing is accomplished; need more detail. payees enroll on the network their identity information is validated automatically via 3rd party integrations such as the US Postal Service, IRS TIN Matching service, the Early Warning Banking Consortium, OFAC, sam.gov, state/federal debarment lists and other compliance reviews. agnostic solution PaymentWorks does integrate with all major ERP systems.

User Experience **Role-based functionality and approval models.**

Bidder Best Practices and Roadmap **The current solution roadmap aims to focus on adding new validations, and partnerships with banks, P2P systems and ERP systems to further simplify the connections and ability to “turn on PaymentWorks.” Version/Release schedule not discussed. Could not determine latest technology utilization.**

Innovations and Value-Added Features/Services **At our core PaymentWorks is a validator of vendor's identity credentials. Validations automatically occur on tax identification number, sanction list and debarment status, remittance and corporate addresses, bank account details, payment fraud protection and transfer of liability.**

Customizations/Extensions **vendor facing online registration is dynamic based on the selections made by the payee.**

Alternative Funding Models **did not propose any**

Contract Transition and Flexibility **PaymentWorks is flexible and open to contract amendment or transition to newly awarded master agreements. However, the terms and conditions of such a transition would need to be agreed by both parties prior to initial contract change, transition or adoption of a new agreement.**

Functional Requirements

General Functionality – **24 not available, 16 Out of the box.**

Supplier Portal – **16 N/A and 7 OOBX**

Supplier Enablement/Management **9 N/A and 34 out of the box.**

Buyer Portal **N/A**

Need Identification **N/A**

Request through Pay **N/A**

Sourcing/Bid Management **N/A**

Contract Management **N/A**

Vendor Performance **N/A**

Purchasing/Data Analytics **N/A**

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 1/6/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Technical Requirements

Availability available to customers and payees 24 hours a day and 7 days a week. All PaymentWorks systems are 100% hosted within Amazon Web Services. We leverage the redundancy and high availability capabilities

Accessibility Requirements VPAT link provided. 17 does not support w/o explanation.

Audit Trail and History Audit logs are stored in AWS CloudTrail. A **user's most recent login** is visible within the app to account administrators. **All other logs are available through the PaymentWorks internal administration console, and can be available upon request.**

Browsers Supported

- Google Chrome: Version 36 and newer
- Microsoft Edge: Version 20 and newer
- Firefox: Version 37 and newer
- Internet Explorer Version 9 and newer
- Safari: Version 5.x and newer

No browser add-ins such as Flash or Silverlight are required.

User Accounts and Administration requires customers to enable Single Sign-on for their users to authenticate. role-based permissions; Over 80 permission areas are defined for roles that the system administrator sets up and manages.

User Authentication Two-Factor Authentication is enabled through your IdP. Two-Factor Authentication for vendors is available to the payee community. PaymentWorks monitors IP addresses, email/website domains and enforces specific password requirements. PaymentWorks is a SAML2-compliant Service Provider that supports integrations with a variety of Identity Provider types, including Shibboleth and ADFS. All authentication is managed through the AWS infrastructure.

Federated Identity Management– PaymentWorks Solution provides user login capabilities that can be integrated with the Participating Entities existing Federated Identity Management system and allow that system centralized administration and synchronization of user identities

Data Conversion agnostic to 3rd party integrations. can receive information such as Invoice statuses, remittance details and payment history via an API connection or SFTP.

Interface and Integration PaymentWorks provides multiple ways to retrieve and upload data. Most customers use either our customer-specific SFTP file exchange service or our REST-based API for the integration process. Integration involves a set of four scheduled routines:

1. New vendor records retrieved from PaymentWorks (typical interval: 15 minutes)
2. Vendor confirmation files uploaded to PaymentWorks after new vendors are created in ERP
3. Approved Vendor profile modifications sent to the State's ERP (CGI).
4. Nightly snapshots of new and modified invoice records for Vendor viewing.

PaymentWorks is ERP agnostic and has integrated with most major ERP applications.

Office Automation Integration Documents can be attached in a variety of formats but I only read about PDFs.

Mobile Device Support solution does render appropriately on a tablet or mobile device

Mobile Applications At present there is not a PaymentWorks mobile app available, but this is something the organization is considering, as the vendor network continues to grow exponentially.

Data Ownership and Access Data owned by state. obtain/extract a copy of their data upon demand, including the associated data dictionary, and at no cost/charge.

Date Retention, Archive and Purge Considerations PaymentWorks retention policy is to maintain data as long as an organization remains a customer. In the event data needs to be purged for any reason, we're happy to work with our customers to meet their requirements.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 1/6/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Many PaymentWorks customers retain invoice and supplier records for a set period of time.

ARCHIVING?

Disaster Recovery Plan Link to DRP provided. Testing appears to be Desktop variety.

Solution Environments production and sandbox (which includes test and Dev)

Solution Technical Architecture narrative on payment methods (API) and a diagram of AWS Arch.

Solution Network Architecture AWS?

System Development Methodology library of tests that are applied prior to any new release to ensure quality and long-term solution success. Jenkins is used for automated code testing, and the Django framework is used to further augment secure development practices. Application infrastructure includes controls to encrypt data in transit and at rest, to sanitize all input to the applications and databases, to perform strict validation of input against defined parameters, and to restrict exposure of the application solely to authorized users/organizations. Code is reviewed by at least one peer prior to being committed to the staging branch; code peer review approvals are tracked and retained indefinitely. master repository is stored in GitHub and only available to authorized users.

Service Level Agreement Payment works commits to the following response times during the support hours of 8:00 AM to 5:00 PM priority one system is unavailable business critical two hours, priority two system is moderately impaired not business critical six hours, priority three basic functionality questions 24 hours.

Security Requirements

Cloud Security Alliance (CSA) Compliance does not have a CAIQ or CCM.

Security and Privacy Controls policies and procedures were originally developed around applicable ISO 27001 controls. As needed we have additionally included relevant NIST 800-53 and best practices recommended by AWS.

Security Certifications Not applicable.

Annual Security Plan A security policy was provided and did not meet NIST standards.

Secure Application and Network Environment AWS White Papers, use port 443 (HTTPS) for typical browser access, and port 22 for SFTP access. All sensitive data and documents are encrypted at rest with 256-bit AES encryption. Data backups are stored on AWS S3 in an encrypted bucket. Encryption key management utilizes built in AWS encryption features. Backups stored in multiple AWS availability zones. Data in transit through our APIs or via the user's web browser occurs over HTTPS/TLS 1.2. All FTP communications are done via SFTP.

Secure Application and Network Access PaymentWorks utilizes SSL with an extended validation certificate on our production servers. We have a number of alerts and paging system setup. Our software updates happen seamlessly, so clients will experience no disruption whatsoever, and are not required to perform any action to enable the update. Critical patches are applied to the system in the same manner as all updates, as described above. All emergency changes must be approved by the CTO. If there are security implications, they are approved by our Security Officer. Security policy was provided as another resource to meet this requirement.

Data Security Meets..extensive list

Personally Identifiable Information Protection keep and process sensitive PII in accordance with its legal obligations under the General Data Protection Regulation (GDPR).

Security/Privacy Issue Occurrence discussed in general but did not provide details

PII Data Actual/Attempted Access or Disclosure PaymentWorks would align with the State's requirements and accidental disclosures. However, all notifiable breaches will be reported to the relevant supervisory authority within 72 hours of the company becoming aware of it.

DEPARTMENT/STATE: Purchasing North Dakota State University

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements

1-2	SaaS solution is a cloud-based business identity platform that allows for payers and payees to exchange validated information in order to conduct business and send/receive payment securely.	
	PaymentWorks is accessed by State employees behind your existing SSO (single sign-on).	
	When accessing PaymentWorks for the first time there is a dynamic smart-routing function that will direct individuals to questions relevant to individuals, corporates to questions relevant to corporates, international entities to questions relevant to international entities and so on.	
	As payees enroll on the network their identity information is validated automatically via 3rd party integrations such as the US Postal Service, IRS TIN Matching service, the Early Warning Banking Consortium, OFAC, sam.gov, state/federal debarment lists and other compliance reviews. Compliance monitoring is ongoing and can screen against over 400 potential debarment and sanction lists.	
	The PaymentWorks portal/network is meant to complement existing ERP and eProcurement solutions to provide identity verification and certainty for every payee the State will issue a payment to. PaymentWorks is not a marketplace or catalog for buyers. PaymentWorks is not a contract or bid-management tool. PaymentWorks will be responding to the eSoftware sections of the State's RFP for Supplier Portal and Supplier Enablement/Management. As an ERP agnostic solution PaymentWorks does integrate with all major ERP systems. PaymentWorks lives in front of the ERP as the front door for all payees to ensure compliance and verified information is received and relayed to the ERP (vendor master file). Integrations with CGI can be accomplished with an API, SFTP calls

DEPARTMENT/STATE: Purchasing North Dakota State University

	<p>or simply by utilizing the PaymentWorks UI “unintegrated”. 2 Since staff access PaymentWorks behind the State’s SSO permissions, approvals, permissions and workflows can all be customized by the state. PaymentWorks can also collect and maintain documents such as insurance, diversity (MWBE), and conflict of interest attestations. When a certificate is set to expire the system can automatically notify the vendor alerting them prior to the expiration date and prompting them to update their certificate on PaymentWorks.</p>	
--	---	--

User Experience

3	<p>The solution can be branded appropriately for the customer, and the vendor community so that it is clear invitations are being sent from the State of Maine. The solution will render appropriately on a mobile device, and the system has a variety of prompts and notifications to assist both payers and payees in order to optimize their work management experience. PaymentWorks allows for customizable user rights and permissions so staff with certain job requirements are only able to action or view data relevant to their job description and requirements. Role-based functionality and approval models can be customized to meet the needs of the State.</p>	
---	--	--

Bidder Best Practices and Roadmap

3-4	<p>PaymentWorks is an evolving and nimble solution that caters to our customers’ requirements and goals. We are cloud-based and hosted on AWS to provide our customers with a flexible, optimized and most importantly a secure solution to supplier information management.</p>	
	<p>The PaymentWorks in-house engineering team is constantly working to improve the application with a focus on user-experience and additional vendor validations (diversity certificate validations is currently one being considered). The current solution roadmap aims to focus on adding new validations, and partnerships with banks, P2P systems and ERP systems to further simplify the connections and ability to “turn on PaymentWorks.” T</p>

DEPARTMENT/STATE: Purchasing North Dakota State University

Innovations and Value-Added Features/Services

4-5	<p>Tax Identification Number: PaymentWorks utilizes a Third-Party Service which checks against the IRS database to make sure that the legal name submitted by a vendor matches with their submitted TIN, EIN or SSN. If the name and TIN are both valid in the IRS database, but do not match each other, this will trigger an 'invalid' response code.</p> <p>Sanction List/Debarment Status: PaymentWorks leverages the online service (RDC) to check against hundreds of sanction and debarment lists, including OFAC, SAM.gov., and state/local debarment lists. If the vendor is on any of the lists, the report will identify which specific lists the vendor is on along with the reason for their inclusion. This service is initiated during the onboarding process and is continuously monitored throughout the payee relationship. Customers will be notified of a change in status for any of the lists that are checked.</p> <p>Remittance/Corporate Addresses: PaymentWorks validates addresses by performing a real-time verification check of US addresses against the US Postal Service database. When a payee submits their new vendor registration form or makes an update to their address on their PaymentWorks profile, a real-time address validation occurs.</p> <p>Bank Account Details: PaymentWorks utilizes a proprietary algorithm to check supplier submitted bank account numbers, routing numbers and the name on accounts. This includes third-party databases, like the Early Warning Banking Consortium, and additional due diligence and internal resources to determine if the payee's submitted information is accurate, associated with the same account, and in good standing.</p>

Functional Requirements

General Functionality

6-9	PaymentWorks is a cloud based, SaaS, solution hosted on AWS.	
	PaymentWorks is a full-service supplier portal that also validates payee details at the time of enrollment, provides ongoing compliance and sanction monitoring services and indemnifies against the risks of payments fraud.	
	PaymentWorks is built as a network resulting in easy access and adoption for your agencies and payees. For example, if a payee is already registered in the PaymentWorks network doing business with another one of your agencies, this payee will already be on the network and can easily log back in with their username and password to provide their information to the new requester

Security and Privacy Controls

32-33	PaymentWorks policies were originally developed around applicable ISO 27001 controls. As needed we have additionally included relevant NIST 800-53 and best practices recommended by AWS. We have a 32 number of alerts and paging system setup. We utilize a number of monitoring tools including Guard Duty, Amazon's Intelligent Threat Detection, the AWS WAF, and Tripwire. Our policies have been developed to address risks specific to our organization and the data that we process/store.	
-------	---	--

Security Certifications

33	Not applicable.	
----	-----------------	--

Annual Security Plan

33	Yes, PaymentWorks has a robust security plan. Please find the PaymentWorks information security policy below:	
----	---	--

Secure Application and Network Environment

33-34	<p>We use port 443 (HTTPS) for typical browser access, and port 22 for SFTP access. PaymentWorks access by the State would be controlled behind the state's SSO. PaymentWorks by the vendor community is facilitated via two-factor authentication.</p> <p>All sensitive data and documents are encrypted at rest with 256-bit AES encryption. Data backups are stored on AWS S3 in an encrypted bucket. Encryption key management utilizes built in AWS encryption features. Backups stored in multiple AWS availability zones. Encryption is a fundamental control that we use in every place technically feasible. Data in transit through our APIs or via the user's web browser occurs over HTTPS/TLS 1.2. All FTP communications are done via SFTP.</p>	
-------	---	--

Secure Application and Network Access

34	PaymentWorks utilizes SSL with an extended validation certificate on our production servers. We have a number of alerts and paging system setup.

This supplier is submitted a response where their solution offers payment information on suppliers. We have this already part of our vendor registration in our system but we do not have the validation engine that is part of this system.

Individual SME Comments: *This supplier does offer a solution that may bring value, but I am afraid that other options might be available that meet our requirements. I did not fully evaluate this response as I found too many requirements cannot be met. Since the evaluation team had so much information too cover, I elected not to spend a good amount of time on this response due to the inability of this supplier to meet requirements. I found that some sections have over half of the requirements not being able to be met by this supplier.*

Video – Supplier stated the following; *Please excuse delay from 28:20 - 29:30 as the VPN connection was made and the tutorial switched from the State facing instance of PaymentWorks to the Vendor facing instance of PaymentWorks

Helps with eliminating fraud when it comes to payments made to suppliers. Showed what they hear from clients and only go to them after they have experienced fraud. Provided list of goals that their clients that they pay.

General Principal and Requirements

Key Solution Functionality Elements – Page 2

- “The PaymentWorks SaaS solution is a cloud-based business identity platform that allows for payers and payees to exchange validated information in order to conduct business and send/receive payment securely.”
- Payee or vendor needs to be invited to the PaymentWorks network
- Vendors can view invoice statuses and remittance details.
- User access this behind their existing SSO
- “this will complement the State's security efforts and allow single point of access for all staff to invite, review or approve supplier enrollments or changes”
- Payees enroll on this network and information is validated using embedded tools.
- System lives in front of an ERP to ensure compliance
- Can collect other documents like insurance

User Experience – Page 3

- Two-sided network for both payers and payees.
- Is customizable for user rights and permissions. Approvals can also be done.
- Payees can see history, invoices, tax information, etc.

Bidder Best Practices and Roadmap – Page 3

- Now offers ACH payments since 2020

Helps with eliminating fraud when it comes to payments made to suppliers. Showed what they hear from clients and only go to them after they have experienced fraud. Provided list of goals that their clients that they pay.

Business Identity Platform – network of payers and payees. Lives between these network users. They exist to target the “risk” of payments. The payments are still made in the client’s instance. Payer invites the payee to the system. The payee populates their details in their profile. The record can be approved and then go to either a new vendor or update an existing record. The record can then be integrated to ERP. They offer to eliminate fraudulent payments. Gives value to vendor community as well.

2-sided solution, entity and the vendor. Can be customized and message vendors one on one. The payment information the vendor enters is relayed to their bank. Can view vendor profiles after it has been approved. The solution has built in validations. Houses an auto-generated a W-9 document in the system. Can see the progression of all of the enrollments. Can send out mass communications to all vendors.

Payee side is the vendor information and asks the vendor to fill out a form. Insurance information can be found. Form is customizable by the state and has conditionality questions.

Vendor can see all of the payees that are connected with. Can update any part of their registration profile. Can search for invoices and their status and use the messaging option.

Individual Comments:

Overall/General

- Sirion is SaaS solution.
- Workstreams being offered:
 - Contract Management
- Sirion founded by legal and contract practitioners.
- Possible Subcontractors, Intergration documents are found as attachments in appendix and are:
 - Coupa
 - Ariba
 - ServiceNow
 - Salesforce
 - KPMG

A. General Principal and Requirements

1. Key Solution Functionality Elements – p. page 5 - 10

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

- Single Point of Entry: Yes. Sirion Contract Lifecycle Management integrates with SSO
- Smart Routing: Yes. Sirion template wizard pulls information.
- Compliance: No. not addressed.
- Portal: Yes. Integrated portal for suppliers. Doesn't mention State.
- Open Marketplace environment: Yes. Sirion provides a hierarchical document tree with a full text search option.
- Integration: Yes. Sirion provides two-way integration via connector or application programming interfapce (API) to a variety of systems . .
- Workflow: Yes. Sirion has an engine that supports workflows that can be configured.

- Document Management: Yes. Siriion for contracts. No storage limit on contract an related document storage.
- Reporting/dashboards/ rule role based: Yes. Sirion over 250 standard reports
- Configurable: Yes.
- Transparency: Yes.

2. User Experience – p. page 10 - 16

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.
 - Capability: Sirion provides user-based views to be saved based on role, need or use case to view and access their contracts.
 - Intuitive: pop-out menu with dashboards based on role and access.
 - Wizard driven: Help manual and FAQ section.
 - Portal work management: Yes.
 - Mobile access: No App., but can be viewed on phone.
 - Workload: Sirion – review and reports of workload, reassignments are managed within the platform.
 - Role-based: Doesn't cover specifically, but is mentioned throughout this section.

3. Bidder Best Practices and Roadmap pages 16 - 17

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.
 - Quarterly release cycle with patches on an ad-hoc basis
 - Multi-tenant Saas-based App
 - Alternative approaches: Sirion does surveys and reviews. They also have a Customer Advisory Council to solicit feedback

4. Innovations and Value-Added Features/Services pages 18

In addition to the stated requirementGEs, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

- Automated obligation and service level management. No further explanation.

5. Customizations/Extensions pages 18

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.

- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- They list that they develop functions, features, fixes, and updates that will benefit its users. Not sure this meets this requirement.

6. Alternative Funding Models – n/a

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

- N/A.

7. Contract Transition and Flexibility – pages 18

- Didn't agree to, instead they State: "Sirion is committed to discussing mutually agreed terms that would help ensure long-term relationships and continued use of the platform"

B. Functional Requirements: pages 19 - 21

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The electronic procurement solution **must** be cloud-based with a Software as a Service (SaaS) delivery model

1. General Functionality. Tab 2, GEN-1 through GEN-40

- N/A

2. Supplier Portal. Tab 3, SPR-1 through SPR-23

- N/A

3. Supplier Enablement Management Workstream. Tab 3, VDR-1 through VDR-43

- N/A

4. Buyer Portal. Tab 3, BPRT-1 through BPRT-15 and

- N/A

5. Need Identification. Tab 3, NEED-1 through NEED-7

- N/A

6. Request through Pay Workstream. Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11

- N/A

7. Catalog Capability - Tab 3, CAT-1 through CAT-40

- N/A

8. Sourcing/Bid Management Workstream. Tab 3, SRC-1 through SRC-151

- N/A

9. Contract Management. Tab 3, CNT-1 through CNT-88 and - p. 20 - 22

- 15 - "INT-Integration/interface", 4 – CF "Configuration Item"

- 17 – Medium

- CNT 14: **CLARIFY** – it seems they do not meet the E-Signature requirement with their answer, but the answer is vague.

- Meets most of the CNT requirements with many integrations needed.
- Sirion's end-to-end AL-powered Contract Lifecycle Management Solutions Software.
- Software aligns around: Procurement, legal, finance, and others.
- The solution provides:
 - Contract repository
 - Contract Analytics
 - Invoice Management
 - Collaboration
 - Reports and Dashboards

10. Vendor Performance Tab 3, VPE-1 through VPE-25 and - p. 22 - 23

- 3 -"INT-Integration/interface", 2 – CF "Configuration Item"
- 3 – Medium
 - 20 out-of-the-box, 3 integration, and 2 configurations with 92% requiring low effort.
 - Real-time visibility and drill-down actionable items.
 - Supporting documents can be attached to associated vendor performance records. Sirion provides the ability to include attachments in formats such as doc, docx, xls, xlsx, pdf, jpg, png etc. Please note that the maximum file size allowed is 200Mb.

11. Purchasing/Data Analytics Tab 3, PDA-1 through PDA-37

- N/A

C. Technical Requirements: pages 22 - 30

- Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*

Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.

- Availability is 99.95% - doesn't meet requirement of 99.8%
 - Uses AWS.
 - 2 locations used for AWS
 - 24x7 support at not additional fees.
 - Provides incident management chart from their SLA (page 25)
- Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
 - Yes, meets.
 - Audit Trail and History** RTM: Tab 4, TECH-1 through TECH-5
 - Sirion has full audit trail capabilities. Sirion maintains an audit log for each record and entity on the system. It captures all actions performed (creation, modification, workflow step, deletions, archival, etc.), timestamp, who performed the action, and who it was requested by. It even captures metadata level change history for key metadata fields.
 - Browsers Supported**
 - The general web browsers are supported (Microsoft Internet Explorer, M Edge, G Chrome, Firefox, and Safari). No concerns.
 - User Accounts and Administration** RTM: Tab 4, TECH-6 through TECH-20
 - Sirion provides several modes of permissioning via its User admin module:
 1. Role based (e.g. Contract Manager, Finance Approver, etc.)
 2. Rule based (e.g. see data of a particular business unit, geography, etc.)
 3. Instance based (this includes individual based permissions)
 4. Counterparty permissions (e.g. what specific modules, features, IDs, does the counterparty see or not see)
 5. User group based (e.g. alias which includes all lawyers, etc.)

- Sirion's unique permissioning mechanism allows easy and quick configurations of global multi-geography, multi-business unit teams, therefore allowing for short implementation times. Further details regarding our permission mechanisms are provided below:
- Sirion offers Role Based Access Control (RBAC). Each user may be assigned access rights in the following ways:
 - User Role Groups: These are access templates containing a predefined set of all operations a user assigned this template may perform on Sirion. Such a template can be given a name, such as 'Operations Director' or 'Finance SME', and any number of users may be assigned a template or what is known as a user role group. In some cases, the client's identity management system may maintain a mapping of a user's organization profile/title and their Sirion user role group. The identity management system may also contain details of the access rights the user role group entails. Any changes in access rights associated with a user role group or an individual user are updated in the identity management system on a periodic basis.
 - Entity Stakeholders: For effective supplier governance, the Sirion platform contains multiple entity types such as supplier, obligations, actions, etc. Each entity type on Sirion has a set of stakeholders with assigned permissions. If a user is assigned as a stakeholder in an entity, they automatically receive all associated permissions for that entity. For example, if John Doe has been entered as the 'Approver' stakeholder in obligation X, and the obligation 'Approver' stakeholder has been assigned permission to view and push the approve/reject buttons on obligations, then John Doe will automatically receive these permissions for obligation X by virtue of being the Approver.
 - Individual User Access: Each user has a profile and can be assigned custom permissions to perform system operations and access data on the system from their page in the user admin module.

6. User Authentication RTM: Tab 4, TECH-21 through TECH-25

- 1 – CF "Configuration Item"
 - Form based user authentication module that allows users to be authenticated via a login/PW. Can also support State's SSO.
 - Supports SAML 2.0 and 2-factor integration.
 - Tech 25 – Needs configuration
- Federated Identity Management** – Pages 27
- Yes.

7. Data Conversion RTM: Tab 4, TECH-26 through TECH-34 and - p. 27

- 9-"INT-Integration/interface"
- 9 – Medium
 - They state that Sirion will work with State closely to determine right level of data conversion for a successful integration.
 - **TECH 26 – 34 are all INT and M and state:** " Yes. Sirion uses its integration framework to build migration scripts to upload historical data such as supplier and supplier metadata, contract and contract metadata, historical invoices, SLs etc. It also has in-built bulk and batch processing capabilities using end-user managed utilities which can upload historical data through easy to use Sirion templates.
In addition, the system analyses legacy contracts and provides analytics on missing clauses, usage and deviations. Sirion's advanced AI-powered auto extraction engine OCRs documents (if required) and enables extraction of key metadata values from executed contracts. This data can be utilized to benchmark against standard contract language. The system further enables users to create business intelligence dashboards to monitor and regularly benchmark against standard contract language.
Please note that the scope of integrations will be finalized during the implementation phase. "

8. Interface and Integration RTM: Tab 4, TECH-35 through TECH-60

- 5-"INT-Integration/interface"
- 5 – Medium
 - Sirion supports many integration modes.

- **TECH 35 – 38 are all INT and M and state:** “ Yes. Sirion supports various integration modes to support a diverse set of data transfer mechanisms for integrations with other systems-of-record.

These modes support unlimited real-time two-way data sync and updates.

- *Connectors: Sirion provides connectors to interface into Sirion features for all major platforms like Salesforce, SAP, Oracle, PeopleSoft, ServiceNow, DocuSign. These connectors enable two-way communication between SirionLabs applications and client applications*
- *Email: Provides standard email formats and executes the required functionality when an email is received from known certified senders*
- *Enterprise Service Bus (ESB): Sirion exposes required functionality as end-points on ESB based on agreed requirements*
- *File Systems: Sirion has the ability to extract and transform content from different file types like csv, xlsx, dat and xml post which they are uploaded into Sirion at a pre-defined location (e.g. SirionLabs SFTP Server) Web Services (REST APIs): Sirion publishes functionality that can be accessed using Web Services / REST APIs. List API and GET API (Search APIs) are available for all entities of Sirion. All the APIs accept JSON as a Payload and provide response in respective JSON formats.*
- *For the ability for developing integrations for bulk data processing, please refer to the response provided above for Req #4.1.5.*
- *Sirion also has connectors with many standard enterprise systems. Some examples are:*

- *P2P and ERP, such as SAP, wherein data is pulled to provide spend analytics on Sirion*
- *Document management systems such as Box, SharePoint, OneDrive, wherein documents can be migrated, Sirion's AI engine extracts relevant data and creates dashboards, such as contract portfolio risk analytics.*
- *CRM, such as Salesforce, wherein account and contract data is exchanged, and contracting analytics are generated including account size, contract status, etc.*
- *GRC such as RSA Archer, wherein risk related data can be pulled in and composite views of regulatory and other risk can be viewed on Sirion*
- *Performance management systems, such as ServiceNow or Remedy, wherein raw performance data is pulled in to Sirion, fulfilment of SLs and obligations is computed, and presented through Sirion dashboards.*
- *Sirion can integrate with databases like Dun & Bradstreet to pull in relevant data.*

Sirion is a listed technology partner for RSA Archer (look here:

<https://community.rsa.com/community/products/rsa-ready>). Sirion also offers easy integration with all leading TPRM solutions (e.g. Hiperos, ServiceNow etc.), enabling real-time data transfer and pull-in 3rd party risk data (for example PESTLE from LexisNexis). The scope of integrations is discussed during the implementation phase.

For details on Sirion's integration capabilities, please refer to the documents 'Sirion - Architecture, Security & Integration.pdf', 'SirionLabs - Integration Case Studies.pdf', 'Ariba Sirion Integration.pdf', 'Coupa Sirion Integration.pdf', 'ServiceNow Sirion Integration.pdf', 'Salesforce Sirion Integration.pdf' “

- **TECH 40 – 46 : N/A**

9. Office Automation Integration RTM: Tab 4, TECH-61

- Yes – out of the box MS Word plugins.

10. Mobile Device Support RTM: Tab 4, TECH-62

- Available to view on mobile devices, but no application yet.

11. Mobile Applications -

- Available to view on mobile devices, but no application yet.

12. Data Ownership and Access

- Yes, at end of contract, all information will be exported to a secure FRP location.
- Data disposed of 30 days later.

13. Date Retention, Archive and Purge Considerations RTM: Tab 4, TECH-63

- During contract – archiving ability is built into solution – see Page 33 – **does not fully meet requirement.**
- Data retained 30 days after contract expiration.
- TECH 63: *“Archiving capability is built into the solution. Automatic deletion can be set up as per the State's retention policy parameters. For active contracts in Sirion, the owner will get a notification for confirmation to terminate or archive a contract beyond expiry date. This is to ensure that no contract which is being worked upon for renewal gets archived on the system. Any archived entity can be accessed only with special privileges as it might disrupt the renewal process.”*

14. Disaster Recovery Plan

- Yes page 34

15. Solution Environments RTM: Tab 4, TECH-64 through TECH-67

- x-“INT-Integration/interface”, x- “BP-BusinessProcess”
 - x – Medium
- Sandbox environments provided, but no other. The claim is this environment serves for testing and training needs for any new feature or enhancement before releasing into Production. **Doesn't meet requirement**

16. Solution Technical Architecture

- Yes meets.

17. Solution Network Architecture

- Yes meets. AWS

18. System Development Methodology

- Yes, Appendix D. Meets.

19. Service Level Agreement

- 8 to 5 and 24 to 7 support

D. Security Requirements: p. pages 31 - 34

1. Cloud Security Alliance (CSA) Compliance

- Sirion's application is hosted on Amazon Web Services which is certified under the Cloud Security Alliance. KPMG completed the CAIQ.

2. Security and Privacy Controls – nothing to add.

3. Security Certifications – nothing to add.

4. Annual Security Plan – nothing to add.

5. Secure Application and Network Environment– nothing to add.

6. Secure Application and Network Access – Tab 5, SEC-1 through SEC-6.

- 2 - N

- SEC 2 Doesn't meet requirement.– *“ Compliant with hardening principles and secure system development principles, Sirion does not allow concurrent users. “*

7. Data Security – nothing to add.

8. Personally Identifiable Information Protection – nothing to add.

9. Security/Privacy Issue Occurrence – nothing to add.

10. PII Data Actual/Attempted Access or Disclosure – nothing to add.

11. Security Breach Reporting – nothing to add.

E. Implementation Services Requirements:

- N/A

F. Managed Services Requirements:

- N/A

G. Other Available Services: RTM: Tab 7 MNGD-1

- N/A

H. Video Demonstration:

- Yes

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: (SirionLabs Inc)

CATEGORY #(s): 3

DATE: (10/3/2021)

EVALUATOR NAME: (Joe Zrioka)

EVALUATOR DEPARTMENT/STATE: (State of Maine Division of Procurement Services)

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, Information & Communication Technology Liability Insurance 7.5 mil
 - Artificial Intelligence (AI) platform
 - contract lifecycle management platform
 - ISO27001: 2013 certified SOC2 Type1, GDPR compliant.
 - CLM Leader in The Forrester Wave™
 - Visionary in Gartner's Magic Quadrant for CLM, 2020 and 2021
 - Value Leader in Spend Matters' Contract Lifecycle Management Solution Map Fall 2020 Report, for the sixth time in a row.
 - 2020 Deloitte Technology Fast 500 Winner
2. Previous Projects
 - Georgia Technology Authority – automate and standardize contract management processes, digitizing contracts repository with auto extraction of contract data; performance monitoring with obligation and service level management; and enabling business intelligence and analytics
 - Greater Toronto Airports Authority - contract management & supplier management - Sirion is used for collaboration management, contract storage, and advanced analytics.
 - BNY Mellon - Centralized repository of contracts, AI powered automation of contract management processes, standardized authoring process, spend visibility, and third party governance
3. Subcontractors
 - KPMG
4. Organizational Chart
 - Corporate org chart with key personnel profiles
 - Account management org chart
 - Roles not defined
5. Litigation
 - no pending matter that could or would materially impact or affect our ability to deliver our services considered in this proposal
6. Financial Viability
 - private company, we are unable to share written financial information at this stage
 - The DUNS for SirionLabs is 65-923-3290 where reports are available on request for from the D&B portal.

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements **Sirion Labs solution** single sign-on (SSO) and can integrate with an entities procurement, ERP, CRM, service desk, etc. systems. advanced workflow engine supports high configurability and guided contracting and routing. Sirion Template Wizard pulls information provided in the request form to automatically generate the first draft. These 'smart tags' populate information across the entire contract package with a single click. **Multiple users in parallel can edit parts of the contract** they have been authorized to edit within the familiar MS Word environment, after which the system automatically reconciles and consolidates all the changes into a single version. electronic environment of goods and services that provides a "catalog of catalogs" system includes keyword, phrase, Boolean, and wild card searches on long text fields. a hierarchical document tree (displaying parent-child relationship) Key capabilities:

—Complete document repository containing all drafts and final versions along with related comments and communications, allowing easy navigation to the version user requires.

—Conversion of non-searchable documents into searchable documents using optical character recognition (OCR).

—AI-powered digitization of contract portfolio through contract metadata extraction from legacy documents.

—AI-driven automated extraction of data from all types of pages, including multicolumn pages and tables in different languages.

—A hierarchical document tree (displaying parent-child relationships) with full text search capability, and an integrated document viewer.

—Robust access control to prevent unauthorized access to sensitive information, and detailed audit trail.

—Intuitive, single-click access from a contract page to contained obligations, changes, interpretations, and service levels and vice versa.

—Comprehensive listing of contract draft requests with current status, priority, and assignee details, and the ability to filter this list by key attributes.

—Fully searchable, allowing full-text search of documents as well as detailed search of stored contract metadata.

—Contract draft linked to prior contracts, issues, disputes, and risk items related to the counterparty, enabling the creation of better contract.

Sirion's workflow engine supports:

—Customizable workflows with unlimited steps, views, permissions (can include customer + third party users), and conditional steps

—Multi-party workflows involving client and their supplier users (can provide limited access to certain user types)

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: SirionLabs

CATEGORY #(s): 3

DATE: 1/8/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

—Workflow capabilities such as create, prioritize, edit, record, assign/reassign, monitor, resolve, report, escalate, re-open etc., each of which are access controlled

—Easy addition or removal of workflow steps

—Define stakeholders responsible for each step

—Ability to configure probes in a workflow to measure lead times, aging, cycle time, etc.

Additional workflow attributes:

—Serial and parallel workflows

—Addition or removal of workflow steps at once

—Define stakeholders responsible for each step

—Conditional workflows based on system attributes

—Ability to configure probes in a workflow to measure lead times, aging, cycle time, etc.

—Metadata field configurability to make fields mandatory/editable/non-editable, show/hide fields, etc.

—Configuring email notifications for any workflow steps

—Weekly reminder to users with list of overdue and upcoming tasks. All email notifications include a direct link to the records for easy navigation. The system can also send alerts or notifications to supervisors/managers if the current task has been pending for more than a predefined number of days.

—Delegation of a task to another person

User Experience user-based views to be saved based on role, need, or use case – **no personalization** pop-out menu and functional areas can be accessed via dashboards, reducing the need to click. **No wizards** web design that can be accessed on any web-enabled device—desktop, laptop, tablet, mobile phone, workload mgt - reassignments are managed within the platform

Bidder Best Practices and Roadmap Quarterly release cycle. Emergent patches R performed on an ad hoc basis. SaaS based application which is multitenant. Net Promoter score survey and customer Advisory Council.

Innovations and Value-Added Features/Services Automated obligation and service level management functionality.

Customizations/Extensions Upgrades are backward compatible

Alternative Funding Models Not Applicable

Contract Transition and Flexibility Sirion is committed to discussing mutually agreed terms that would help ensure long-term relationships and continued use of the platform.

Functional Requirements SirionLabs Contract Lifecycle Management does not include sourcing

General Functionality – RTM not completed for this section.

Supplier Portal - RTM not completed for this section.

Supplier Enablement/Management RTM not completed for this section.

Buyer Portal RTM not completed for this section.

Need Identification RTM not completed for this section.

Request through Pay RTM not completed for this section.

Catalog Capability RTM not completed for this section.

Sourcing/Bid Management RTM not completed for this section.

Contract Management 6 configurations w/low LOE, 18 INT w/med LOE, , Three Third parties with low level of effort , 68 OOBX

Vendor Performance 2 Configurations with low LOE , 23 OOBX

Purchasing/Data Analytics, RTM not completed for this section.

Technical Requirements

Availability availability target in MSA is 99.8%. fully redundant environment within Amazon Web Service (AWS). RTO for all customers is less than 120 minutes and RPO is 30 minutes or less of data loss.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: SirionLabs

CATEGORY #(s): 3

DATE: 1/8/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Accessibility Requirements compliant with Web Content Accessibility Guidelines (WCAG) 2.0 AA.

Audit Trail and History compliant with Web Content Accessibility Guidelines (WCAG) 2.0 AA.

Browsers Supported Google Chrome version 67 and above, Internet Explorer version 11 and above, Mozilla Firefox version 60 and above, apple safari version nine and above, Microsoft Edge version 25 and above.

User Accounts and Administration User access management provides granular rule, role and instance-based access, with an unlimited variety of combinations. Role based access controls (RBAC) Sirion provides several modes of permissioning:

—Role-based (e.g., contract manager, finance approver, etc.)

—Rule-based (e.g., view data of a particular business unit, geography, etc.)

—Instance-based (includes individual-based permissions)

—Counterparty permissions (e.g., Counterparty access to specific modules, features, IDs, etc.)

—User-group based (e.g., alias which includes all lawyers, etc.)

User Authentication form-based user authentication module that allows users to be authenticated via a login/ password. The Sirion platform also supports the use of customer's single sign-on (SSO) and hence can integrate with the client's Identity Provider system (which may be based on different types of protocols, (e.g., SAML), to allow login into Sirion. Additionally, Sirion supports SAML 2.0 integration and two-factor authentication.

Federated Identity Management– supports SAML 2.0 protocols for Single Sign On

Data Conversion Sirion leverages an integration framework to build migration scripts to upload historical data such as supplier and supplier metadata, contract and contract metadata, historical invoices, SLs, etc. It also has in-built bulk and batch processing capabilities using end-user managed utilities which can upload historical data via Sirion templates. Sirion has the ability to extract and transform content from different file types, such as csv, xlsx, data and xml post, which are uploaded into Sirion at a pre-defined location (e.g., SirionLabs SFTP server).

Interface and Integration Sirion offers integrations with most typical data connection to a CLM solution, including Oracle, Peoplesoft, CGI, SAP Ariba, Jaggaer, Ivalua, RSA Archer, ServiceNow, DocuSign and others. Sirion uses an ETL tool to achieve deep integration functionality by implementing an integration layer which helps integrate with other enterprise systems. The integration uses an inbuilt processor, but if the functionality is unavailable, the Integration Team can write a reusable customer processor to achieve the missing functionality. In category three folder there were white papers for integration with arriba, Coupa, Salesforce, ServiceNow, and an overall integration white paper.

Office Automation Integration Sirion has out-of-the box MS Word plugins that works seamlessly with MS Office applications. Sirion also works seamlessly with Microsoft Outlook via email notifications and alerts. A Sirion user can also send a PDF version of a draft, so they can provide comments but not edit the draft.

Mobile Device Support Sirion is accessible via any mobile device using native browsers where all capabilities are made available. A native Sirion mobile app is currently in the beta stage and will be rolled out to customers at no additional cost at the end of 2021. Mobile app functionality will mirror platform functionality, however, it is important to understand the needs of a user and thus there will likely be limits to what a user would want to accomplish on a mobile app outside of approvals or status reviews.

Mobile Applications Same as above

Data Ownership and Access at the end of the contract all customer data is exported to a secure FTP location and credentials are shared with the customer so data can be downloaded from that location. Data will be disposed of after 30 days of termination or expiration of the agreement between the customer and Sirion (or as defined in the contract). Sirion will dispose the data on the Sirion instance hosted on AWS using technology compliant with U.S. Department of Defense (DOD 5220.22M) standard. If required, the data volume will also be deleted, and Sirion's infrastructure provider, AWS, will

decommission the hardware using techniques outlined in DoD 5220.22-M ("National Industrial Security Program Operating Manual") or NIST 800-88 ("Guidelines for Media Sanitization"), and in certain cases, degauss or physically destroy the hardware in accordance with industry-standard practices.

Date Retention, Archive and Purge Considerations Sirion does not take ownership of an entities' data.

Archiving capability is built into the solution. Automatic deletion can be set up per retention policy parameters. For active contracts in Sirion, the owner will receive a notification for confirmation to terminate or archive a contract beyond expiry date. This will help ensure that contracts up for renewal will not be archived on the system. Archived entities can be accessed only with special privileges as it might disrupt the renewal process. Sirion takes regular incremental backups of customers' production data every 30 minutes. The system also takes a full back up of customer data daily. These backups are stored in the secondary data centers (i.e., disaster recovery locations).

Disaster Recovery Plan Sirion maintains business continuity and disaster recovery measures that help ensure the RTO of 120 minutes and the RPO of 30 minutes. Sirion takes regular incremental back up of customers' production data every 30 minutes. The system also takes a full back up of customer data daily. As a disaster recovery strategy, all production servers are deployed at two locations, so the system can switch between servers in case of failure. Each production instance is mirrored in a geographically-diverse location. Sirion regularly moves processing to the mirrored location to enable maintenance and new releases. **No plan, no testing**

Solution Environments sandbox and production.

Solution Technical Architecture a modern MVC architecture with some business micro-services. IT is based on Java, Spring, PostgreSQL and Elasticsearch. For more details on Sirion technical architecture, see Sirion - Architecture, Security & Integration within Appendix D: SirionLabs technical documentation

Solution Network Architecture Sirion is hosted on AWS, which provides the following key advantages:

—A single instance on AWS, dedicated to the client, is technically no different from the client's other on-premise infrastructure. In fact, AWS is the world's leading provider of scalable and secure cloud infrastructure and would be a logical addition to the client's on-premise infrastructure.

—Sirion is optimized for AWS, hence the cost on a non-AWS platform to host Sirion will be significantly higher (3-5x) given incremental instance maintenance and deployment resource requirements.

—Any tech stack changes to the Sirion product will be managed by Sirion if hosted on AWS. If hosted on a non-AWS platform, tech stack changes may be quite expensive, and in certain situations, may not be possible.

—Dynamic load adjustment to scale up based on multiple factors like utilization, speed and response time is critical for the success of any SaaS solution, and Sirion on AWS comes in-built with such capabilities.

On a non-AWS platform, such automated capabilities may not exist, or may need to be added at additional costs to the client.

—If hosted on AWS, SirionLabs will be responsible for the implementation of the instance and ongoing maintenance. In an on-premise scenario, SirionLabs will not be responsible for infrastructure, set up, or management, hence all infrastructure-related issues will need to be managed by the respective entity resources.

System Development Methodology Every new feature, enhancement, or change requested by the customer goes through a thorough design, specification development, and review and approval process before development begins. Upon development, thorough testing is performed by the QA team to identify and report any bugs to the development team. Post the elimination of bugs and prior to going live, all in-scope functionality is tested by the client SMPs in the sandbox environment.

Service Level Agreement Sirion has an in-house support team that provides 8*5 (client's business hours) help desk support at no additional cost. Standard help desk services are provided in English and include

access to ticketing and email support. An additional level of support, including 24x7 support, is available as an option.

Sirion standard SLAs

—Severity Level 1: Response time 90% in two business hours and update frequency two hour

—Severity Level 2: Response time 90% in four business hours and update frequency one business day

—Severity Level 3: Response time 90% in one business day and update frequency four business days

Security Requirements

Cloud Security Alliance (CSA) Compliance hosted on Amazon Web Services (AWS) which is certified under the Cloud Security Alliance CAIQ completed (titled KPMG in CAT3 folder). in the process of completing CSA Star registry

Security and Privacy Controls Sirion is committed to data protection and compliance with broader privacy regulations such as GDPR that provides a mechanism to address multiple privacy regulations and requirements. Sirion has implemented technical and operational controls to help ensure personal data protection. Sirion also has a formal privacy policy and procedures in place and conducts an annual Data Privacy Impact Assessment for high impact processes that involve personal data and helps ensure remediation of gaps, if any.

Security Certifications Sirion's application is hosted on **AWS and compliant** with the leading security practices, including:

—SOC 1/SSAE 16/ISAE 3042(formerly SAS 70)

—SOC-2

—SOC-3

—FISMA, DIACAP and FedRAMP

—DOD CSM Level 1 to 5

—PCI DSSLEVEL-1

—ISO 9001 / ISO 27001

—ITAR

—FIPS 140-2

—MTCS Level 3

Annual Security Plan No annual security plan but they will sign Data Protection Agreement (DPA).

Secure Application and Network Environment has implemented proactive security procedures, such as perimeter defense and network intrusion prevention systems to secure its perimeter. Dedicated DMZ, network segmentation, dedicated URLs, and Site-to-Site VPN (note: a paid service) are some of the other measures implemented to protect customer instances from cyber-attacks.

Secure Application and Network Access AWS references, laptop security, physical building security at SirionLabs

Data Security SirionLabs uses a Web Application Firewall (WAF) to protect against common web exploits that may affect availability, or compromise security. AWS Security Groups (firewall), Network Intrusion Detection Systems (NIDS), and Denial of Service (DoS) Protection are also implemented to control inbound and outbound traffic. The Security Groups restrict traffic by protocol, service port and IP address. Personally Identifiable Information Protection SirionLabs is committed to data protection and to helping ensure compliance with privacy regulations like GDPR.

Security/Privacy Issue Occurrence Discuss controls but there are no incident procedures.

PII Data Actual/Attempted Access or Disclosure same as above

Security Breach Reporting Sirion has documented incident management policies and procedures in place. In case of errors, failures, outages, anomalies, irregularities, breaches, etc., Sirion will share the detailed RCA of the incident.

EVALUATOR NAME: Michael Bacu

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Contract Lifecycle Management
- Global Company
- Partners with Coupa for P2P
- Sirion product for contract management and post award management
- Detailed description of their platform

2. Previous Projects

- Reduced manual efforts
- Central repositories
-

3. Subcontractors

- KPMG as subcontractor which also bid
-
-

4. Organizational Chart

- Very broad organizational chart
- Unsure how it will be utilized for NASPO requirements
-

5. Litigation

- Did not identify previous litigation
- Only stated not a pending matter
-

6. Financial Viability

- Provided a press release instead of financials
- D&B identified as available on request. The RFP made that request.
- Would consider nonresponsive to this criteria

This response is the same response as that submitted in CATEGORY 2 with KPMG as noted below.

I have copied the notes and RTM from the Category 2 to Category 3 here

Sirion: Sirion Category 3 submissions was the same as KPMG-Sirion Category 2 submission documents

- RTM same
- Technical Proposal sections with content the same (NOTE they added two initial sections called "Why Sirion CLM" and "Supporting State Entity Initiatives", pg. 4)
 - o General Principal and Requirements (Key Solution Functional Elements, User Experience, bidder Best Practices/Roadmap, Innovations/Value-Added, Customizations/Extensions, Contract Transition/Flexibility)
 - o Functional Requirements
 - o Technical Requirements
 - o Security Requirements

Individual SME Comments: This supplier's response is submitting only for Contract Management Section 7 and Supplier/Vendor Performance as noted on PDF Page 4 of their response. Requirement EPROC-CNT-83 on Tab 3 Line mentions modules titled "Financial Management?"

The video was a helpful demonstration of how their solution works for contract management and vendor performance. They state they have financial management module, but I did not seem to find it in the video, and they did not submit a response to the technical and functional requirements for financials?

This solution has some innovative functions (WORD integration) that I believe would benefit our entities. The CLM solution would be beneficial, and I would hope that the clarifying questions and those requirements they do not support could be addressed.

General Principal and Requirements

Key Solution Functionality Elements – PDF Page 6

- Single Sign On with integration option
- Smart routing with form that pulls information to generate first draft
- Portal for suppliers to collaborate through the life of the contract
- Parallel edit access and chat functionality within WORD.
- Has Sirion MS Outlook integration
- Shows integration information on PDF Page 8
- Provides highly configurable workflows

- CONCERN - EPROC-CNT-32 – Tab 3 Line 514 - Maximum allowed attachment is 200MB
- CONCERN - EPROC-CNT-43 – Tab 3 Line 525 - Does the supplier have their own system account, or the same access as the buyer?
- CONCERN - EPROC-CNT-70 – Tab 3 Line 552 - Requirement asks if "suppliers" have the ability to load sales reports. This response states the user has this ability?
- CONCERN - EPROC-CNT-83 – Tab 3 Line 565 – Confused here as the response states the solution has a “Financial Management” module?
- CONCERN - EPROC-CNT-87 – Tab 3 Line 569 - Need to clarify their statement made in the comment section of this requirement? “UB to confirm with product about procedure to reactivate”

Vendor Performance – PDF Page 24

- User role-based dashboards and configurable KPI's
- Provided features of performance management
- CONCERN - EPROC-VPE-15 – Tab 3 Line 587 - Response does not specify if the “vendors” can complete the survey?

Purchasing/Data Analytics – N/A

Technical Requirements

Availability – PDF Page 27

- Availability exceeds 99.95%
- Supplied standard SLAs for incident management
- Referenced Appendix D

Accessibility Requirements - PDF Page 27

- “Sirion is compliant with Web Content Accessibility Guidelines (WCAG) 2.0 AA.”

Audit Trail and History - PDF Page 27

- MS Word plug in enables comparison
- Has full audit capabilities

Browsers Supported - PDF Page 28

- Supplied list of browsers supported

User Accounts and Administration - PDF Page 28

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: SirionLabs

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- User based roles with standard role groups
- Offers advanced user access control
- RBAC – Role based access controls
- CONCERN - EPROC-TECH-7 – Tab 4 line 12 - This requirement asks about solicitations and contracts, but supplier response is N/A?
- CONCERN - EPROC-TECH-12 – Tab 4 Line 15 - This requirement asks about both the buyer (user) and the supplier accounts, but the response is N/A?
- CONCERN - EPROC-TECH-18 – Tab 4 Line 20 - This response leads me to believe that the ability to deactivate users is not "automatic"?

User Authentication - PDF Page 29

- Supports SSO functionality

Federated Identity Management - PDF Page 29

- Meets requirements

Data Conversion - PDF Page 29

- Suggest using auto extraction method
- Seems an INTEGRATION will be needed to help with data conversion.

Interface and Integration - PDF Page 31

- Supports various integrations modes. Listed on PDF Page 31
- Listed connectors examples on PDF Pages 31 and 32
- Referenced Appendix D
- Does not support technical requirements EPROC-TECH-41 thru EPROC-TECH-46 on RTM as they are only bidding Contract Management and Vendor Performance workstreams
- CONCERN - EPROC-TECH-47 – Tab 4 Line 51 – Response states can have invoice in the solution?
- CONCERN - EPROC-TECH-49 – Tab 4 Line 53 – Supplier states “only bidding Contract Management and Vendor Performance workstreams
- CONCERN - EPROC-TECH-52 – Tab 4 Line 56 - Supplier did not supply a response here?
- CONCERN - EPROC-TECH-54 – Tab 4 Line 58 – Supplier states “only bidding Contract Management and Vendor Performance workstreams
- CONCERN - EPROC-TECH-55 – Tab 4 Line 59 – Supplier states “only bidding Contract Management and Vendor Performance workstreams
- CONCERN - EPROC-TECH-58 – Tab 4 Line 62 - Did not provide availability or level of complexity?

Office Automation Integration - PDF Page 32

- Offered screenshots of the integration the system has with WORD

Mobile Device Support - PDF Page 34

- Meets requirements

Mobile Applications - PDF Page 34

- Meets requirements

THE RESPONSE FOR THE REST OF THIS SUPPLIER RESPONSE IS TIED TO KPMG AND I HAVE NOTICED THE RESPONSE IS THE SAME AS SUBMITTED FOR THE FULL SOLUTION. I HAVE COPIED MY NOTES FROM KPMG FULL SOLUTION TO THIS KPMG INDIVIDUAL WORKSTREAMS. THE PAGE NUMBERS DON'T APPLY TO THIS RESPONSE.

Implementation Services Requirements – PDF Page 84 –

Project Management – PDF Page 85 thru PDF Page 103

- Program and Project Management Methodology is the tool that the KPMG team uses.
- PPM Framework chart on PDF page 85
- Listed Key Project Management Tasks PDF Page 86
- Provide both Scope and Schedule Management PDF Page 86
- Implementation Plan Development will help manage requested services.
- Provide a sample implementation plan PDF Page 94 thru PDF Page 103
- Offers Budget and Quality Management PDF Page 88
- Will team up with state entities using deliverables management
- Offers Resource, Staff and Communications Management tools. PDF Page 89
- Provide periodic status meetings and share status reports.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: SirionLabs

CATEGORY #(s): Stage 2 Category 3 – eSoftware Only

DATE: 12/29/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Risk Management will be implemented to reduce risk
- Mitigation is key and they supplied list of topics to approach risk Management. PDF Page 91
- Issue Management is used to help solve issues quickly. PDF Page 92
- Project Management Deliverables were listed, and they use a Project Manager to manage project

Project Implementation Methodology – PDF Page 103 thru PDF Page 114

- Uses the Vision, Validate, Construct, Deploy, and Evolve phases. PDF Page 104
- State experience in procurement enablement mention on PDF Page 105
- They described in detail each phase of the implementation mentioned above.
- Provided testing approach on PDF Page 109

Catalog Support Services – PDF PAGE 114 thru PDF Page 117

- Provided shopping screenshot on PDF Page 115
- Stated they support Punch out or hosted catalogs
- Suppliers can upload the catalogs from the portal. Files can be compared before approved.
- The 360 search is used to search across catalogs
- Uses the Vision, Validate, Construct, Deploy, and Evolve phases to identify the correct suppliers fit for a catalog in the system.

Data Conversion Services – PDF Page 117 thru PDF Page 125

- Initial Data Extract PDF Page 117
- Mock Data Extract PDF Page 118
- Production Data Extract PDF PAGE118
- Provide data cleansing and harmonization
- Transform and Load Process
- Quality Assurance and Reconciliation
- Provided roles and responsibilities. PDF Page 119
- Data Load Templates. PDF Page 122

Interface/Integration Development Services - PDF Page 125 thru PDF Page 130

- Provided table of each phase of an integration that included a description.
- Provided table of integration activities with the KPMG and the state entity responsibilities. PDF Page 127
- Provide list of integrations and Interfaces. PDF Page 128
-

Organizational Change Management (OCM Services) - PDF Page 130 thru PDF Page 140

- KPMG's "Make it" Methodology. PDF Page 132
- Supplied benefits of using above methods. PDF Page 133
- Provided a comprehensive view of the OCM services. PDF Page 133 – thru 138
- Offers TRIP – A tool used to analyze the readiness of an organization. PDF Page 138
- Listed additional optional tools PDF Page 139 and 140

Training Services - PDF Page 140 thru PDF Page 150

- Provided chart that explains their approach to training. PDF Page 141
- Target Learning Model, (TLM). PDF Page 142
- Collaborative approach as implementations requires process changes. PDF Page 143. First Paragraph

SironCLM – Has wizard driven options with left hand side menu bar. Has authoring option icon on this menu bar. The system has tabs across the top for different sections of the contract record. Can see tasks assigned on a personal dashboard. Color coded statuses show where the contract is in the lifecycle. Uses create request forms to start the contract process. Then it allows the addition of other information from the template and clause library. Users receive email notifications about the status of the contract record. System has data conditional fields to help drive workflow. System shows the cycle time of the contract after it has been submitted. Can communicate in the system with other users about the contract. Sets up a possible master services agreements with all other supporting documentation attached. Versions are tracked and can upload other attachments to the contract. Can add or upload contract line items. Contracts are generated in WORD. Sirion is added to the word toolbar in WORD that can be used to update the document. Can insert clauses and languages to the document. Changes made drive workflow for approvals. Can work on contracts in Sirion or in WORD. All changes are tracked in the system. Can collaborate with the vendors from the system or from WORD. No spoofing of email addresses and a reply email goes back into the system and in OUTLOOK. Has drag and drop functionality for contracts. Uses a joint collaboration with other participants in the collaboration mode. Only one person edits a section at a time with one consolidated view and it tracks versions. Can do a comparison of changes done. Workflow could be driven by many triggers. Email notifications are used to notify approvers. Has integration with DocuSign or AdobeSign and the data is updated in the system.

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - BuyerQuest, Inc., is a leading provider of enterprise Procure-to-Pay (P2P) solutions
 - Founded in 2012 by an experienced team of sourcing and procurement, customer delivery, and engineering leaders,
 - Recognized:
 - i. Gartner's Peer Insights "Voice of the Customer:" Procure-to-Pay Suites as the "Highest Overall Procure-to-Pay" Software Vendor
 - ii. G2 Crowd "Best Procure-to-Pay Software Vendor,"
 - Initially a catalog/purchasing solution (2012-2015), in 2016 launched its cloud Procure-to-Pay solution.
 - 2020 Patent issued for "proprietary design and engineering of BuyerQuest's P2P marketplace and catalog validation and updating methods".
 - Purchased by ODP Corporation (Office Depot/Officemax) in January 2021.
2. Previous Projects
 - No project information provided.
 - References provided for Skookum, Chick-Fil-A and Giant Eagle.
3. Subcontractors
 - No subcontractors.
4. Organizational Chart
 - Org chart not provided.
 - Example project staffing list was provided which identified contractors core/key positions with basic list of responsibilities that do fit the identified role.
 - State team was not described.
5. Litigation
 - List of four "legal matters" provided
 - i. Two were 'employee matters'
 - ii. One had settlement in favor of BuyerQuest
 - iii. One is on-going. Given that the issues includes "Breach of Contract" suggest that this may warrant further attention.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

Carahsoft (pg. 1-4)

- Carahsoft has assembled a team for the initiative that includes our Solution Provider, SAP”.
- An IT solutions provider delivering best-of-breed hardware, software, and support solutions to federal, state and local government agencies since 2004”.
- “Carahsoft has leveraged its vast experience and extended it to quoting and order management.”
- Carahsoft annual revenue growth: \$3.4M in 2004 to \$6.6B in 2019.
- Awards:
 - i. Top Ranked GSA Schedule 70 Contract holder for software
 - ii. #30 on Washington Business Journal's Largest Government Contractors List for 2016
 - iii. #40 on Washington Technology's Top 100 Government Contractors List for 2017
 - iv. Fed 100 Winner and Ernst & Young Entrepreneur of the Year, Craig P. Abod, President and CEO; Fed 100 Winner, John Lee, Vice President of Cloud Services
- Proposal “features the SAP Ariba eProcurement solutions Strategic Sourcing Suite including Supplier Lifecycle and Performance, SAP Ariba Sourcing, SAP Ariba Contracts and Supplier Buying and Invoicing.” (pg. 5)

SAP (pg. 4-7)

- Global provider of “business applications and analytics software”.
- “Over 200 million cloud users”.
- “440,000 customers in more than 180 countries”.
- SAP Ariba cloud solutions has “largest business network” with “cloud-based applications” across the “source-to-settle process” from “indirect spend to direct materials to labor”.

2. Previous Projects

- Carahsoft was not identified as being involved in any of the previous projects.
- **Washington, DC (Government):** Currently has SAP Ariba On-Premise software and is transitioning to the Ariba cloud platform.

Individual SME Comments:

General Principal and Requirements – pg. 2-19: [Note, narrative same as LSI Cat 3 proposal except for "Contract Transition and Flexibility" sub-section.](#)

Key Solution Functionality Elements, pg. 2/3:

- SAP Ariba is the solution
- Single Point of Entry: "AP Ariba Guided Buying serving as the single point of entry for all procurement-related requests."
- Smart routing: "Ariba includes a highly configurable workflow engine"
- Compliance: "SAP S/4HANA for product compliance, you can manage regulations, track registrations and substance volumes, classify products, and create compliance documents, as well as package, transport, and store hazardous materials properly with accurate labeling."
- Portal: "SAP Portal product portfolio". Available
 - o as "SAP Enterprise Portal (on-premise)
 - o on SAP BTP as SAP cloud Portal service
 - o (portal-like) sap Launchpad serviceCLARIFICATION, need to identify which is being offered.
- Open Marketplace environment: "SAP Ariba Business Network (SBN)". Customers choose to have access to all suppliers on the network or "only to their preferred suppliers". Also have "Spot Buy catalog solution" for "end users to find and buy non-sourced goods".
- Integration: "SAP's holistic integration approach"
- Workflow: "SAP Business Workflow enables the design and execution of business processes"
- Document Management: "SAP Ariba Contract Management module can track, manage, and store documents".
- Reporting, dashboards and data visualization: "SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports."
- Configurable: "configurable workflows to document templates" with "the flexibility to reflect state-wide or agency-specific rule-sets and processes"
- Transparency: No response provided

User Experience, pg. 4-6:

- "design to deliver a fast and ergonomic user experience minimizing end user training"
- "has configurable dashboards to meet each of the different type of user's needs."
- "SAP Ariba also provides mobile procurement tools to review and approve requisitions"

Bidder Best Practices and Roadmap, pg. 7/8:

- Quarterly Release: Feb, May, Aug & Nov

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Monthly Feature Deliveries: optional, no-impact release. Changes “virtually invisible to the end users”.
- Production quality metrics tracked for improvement needs.

Innovations and Value-Added Features/Services, pg. 9-12:

- SAP FieldGlass:
 - o SAP Fieldglass External Talent Management automates the entire process of procuring and managing flexible labor, from requisition through invoice and payment.
 - o “SAP Fieldglass Services Procurement can handle the management of a variety of Statement of Work (SOW) engagements including projects, offshore/offsite, independent contractors, managed programs, business services and Business Process Outsourcing (BPO) models”.
 - o “SAP Fieldglass Worker Profile Management enables companies to track and manage all non-traditional workers who are not tied to a job posting or Statement of Work (SOW).”
- SAP Ariba Supplier Risk Management: “lets the State tailor risk views and alerts to state’s business, to each supplier relationship, and to the State’s role. The State can also segment suppliers based on risk exposure.”

Customizations/Extensions, pg. 13-16: System does not allow customizations but can have “extensions” added outside of the scope of the contract by other “partner” contractors.

- “SAP Ariba application extension partners can create and deliver applications that augment SAP Ariba solutions” (NOTE: these are companies that can create additional functionality from what is being proposed).

Alternative Funding Models, pg. 17: Response did not offer any alternative funding models. Instead promoted the SAP Fieldglass application.

Contract Transition and Flexibility, pg. 18:

- “LSI possesses an extremely high level of flexibility to transition from a state’s current contract to a new contract or amendment”

Functional Requirements - pg. 20-51: [Note, narrative same as LSI Cat 3 proposal](#)

General Functionality, pg. 20-22: Does not meet req’ts. General Req’ts tab was removed from the RTM, no responses provided.

- “Ariba is a role-based solution”
- SAP Ariba Buying& Invoicing (including Guided Buying)
- SAP Ariba Sourcing
- SAP Ariba Contracts
- SAP Ariba Supplier Lifecycle & Performance Management
- SAP Ariba Network
- SAP Fieldglass
- “A super user will be granted broader access to the solution by assigning multiple roles” to access functionality across the solution and “provide administration capabilities across the solution or for specific functional areas”.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "Guided Buying is the exception, which is designed for casual users to procure with a consumer like user experience".
- CONCERN, by default the system has built in use of the UNSPSC code set. Since Ariba is a SaaS (shared instance) State/Entities with a different commodity code standard will have to adapt to UNSPSC codes in some areas of the system where a crosswalk to their commodity codes will cannot be incorporated.
- SAP Ariba Business Network is a B2B network ("dynamic, digital marketplace") transacting "business commerce between more than 3.6 million" companies.

RTM

- **WEAKNESS**, RTM section was removed but should have been kept and filled out since most req'ts are functional and are relevant for the solution proposed.

Supplier Portal, pg. 23-28: Generally meets req'ts, however no details provided for public RTM req'ts (see RTM notes).

- Ariba Business Network (aka Ariba Network, Ariba Supplier Network)
 - o Single supplier account to transact with all Ariba customers, "supplier unified seller experience"
 - o State/Entity can choose to only access "their preferred suppliers" or all suppliers that are members of the Network.
- Ariba "Supplier Enablement Services" for the Network are included
 - o "will be responsible for most of the enablement process", onboarding
 - o The services will 'scale' up to meet "the State's volume" of suppliers
 - o Sends request for suppliers to confirm/accept relationship on the Network
 - o Provide phone support for registration "and conduct change management"
 - o Provide training on invoice submission
 - o Provide an Account Manager to State/Entity to "support suppliers and increase project engagement"
 - o Send "go-live letters" to inform suppliers when the State/Entity is going to start doing "electronic transactions"
- Supplier Portal functionality across all customers, not specific to a State/Entity using Ariba
 - o Consolidated order dashboard
 - o Order task reminders and rules-based order routing
 - o Access to Ariba Discovery public solicitation posting (postings by all Ariba customers)
 - o Contract collaboration/redlining
 - o Self-service hosted catalog creation as CIF, cXML and Excel files
 - o Self-service Punchout setup, separate setup for each Ariba customer
 - o Dashboard to manage catalog activity
 - o Option to have "public catalogs on the SAP Ariba Spot Buy Catalog solution" (similar to putting catalog in Amazon but only accessible by Ariba customers).
 - o Invoice create/submission to Ariba customers via PO-Flip or electronically from Suppliers internal system (cXML, EDI, CSV). With option to create non-PO invoices.
 - o Self-service Administration to define Supplier user roles and users
 - o Link multiple registration accounts to a Parent account
 - o Mobile app for access to orders, invoices, notifications, order/invoice graphs and can "confirm customer orders".

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

RTM

- WEAKNESS, SPR-9 & 10: Solution will not give suppliers access to solicitation results or awarded contracts.
- CONCERN, SPR-18: Response only stated "Partner". No detailed response provided for req'ts to allow suppliers to respond to a performance complaint/issue.
- CONCERN, SPR-19: Response stated "Not supported - Partner". No detailed response provided for req'ts to allow suppliers to submit Admin fee payments.
- SPR-12 needs clarification, response did not address the full req't.

Supplier Enablement/Management, pg. 29/30: Generally meets req'ts.

- SAP Supplier Enablement Team will "design and develop the most effective enablement strategy" based on their "profile, PO and invoice volume, and spend". Segment the "State's vendor master data to effectively target/onboard suppliers in tiered waves".
- Provides IRS TIN/Name "verification capabilities"
- For the Ariba Network, offers suppliers "user guides, FAQs, technical documentation, and free online seminars".
- Can have "account specific information" via a "supplier information portal embedded in the Ariba Network".

RTM

- NOTE, VDR-1: Registration is for the Ariba Network and uses a "supplier profile questionnaire" to capture State/Entity specific registration data.
- WEAKNESS, VDR-11: The Ariba Network captures UNSPSC codes with registration. State/Entity would have to add to the 'questionnaire' a selector for other Commodity Code taxonomies (e.g. NIGP codes) with registration.
- NOTE, VDR-19: Response does not address the req't to validate IRT TIN/Name but in the Technical Proposal (pg. 25) it does indicate that this verification is available.
- WEAKNESS, VDR-20: Address validation is for "format" only. System does not use anything to confirm that the address is good.
- WEAKNESS, VDR-23: Debarment/watch list verification is an "add-on", not included in the offering.
- Four req'ts need clarification, response did not address the full req't.

Buyer Portal, pg. 31-33: : Meets req'ts.

- Casual/Power Users, pg. 26/27: CONCERN,
 - o Running "pre-packaged reports" is listed for Power Users, not Casual Users.
 - o "Post solicitations" is listed for Power Users, so it may be that Casual Users won't be able to do 3 Bids/Buy (aka Quick Quote) functionality (see PRD-36 & SRC-11 references).

RTM

- Meets req'ts except 3 req'ts that need clarification

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Need Identification, pg. 34-35: Meets req'ts.

- Guided Buying, pg. 29: NOTE, Ariba concept for Guided Buying appears to be a Landing Page once the user logs in that provides a variety of options with titles that tries to 'Guide' the user based on what they are trying to do. So it's really up to the user to figure out which 'path' to take from the Landing Page.

RTM

- Meets req'ts.

Request through Pay, pg. 36/37: Generally meets req'ts.

- pg. 31/32: Ariba Buying/Invoicing module provides
 - o Requisition, PO generation with Order delivery to Suppliers and Supplier Invoice submission via Ariba Business Network.
 - o Approval workflow is on the Requisition, Change Order, Receipts and Invoices with in-tool/email/mobile approvals.
 - o Suppliers can send order confirmation, advanced ship notice and invoices via their acct on the Ariba Business Network.

RTM

- WEAKNESS, PRD-6: System does not provide an automated means to control whether combining purchase for multiple Fiscal Years are allowed on a Requisition/Order.
- STRENGTH, PRD-11: System has the capability for Suppliers to invoice against a Contract instead of a PO.
- "POTENTIAL WEAKNESS, PRD-13:
 - System does not provide a "library concept" for standard specifications.
 - Attachments size is limited to 100MB each."
- WEAKNESS, PRD-15: Attachments throughout the system have individual size limits of 100MB per attachment.
- POTENTIAL WEAKNESS, PRD-23: System does not have a requisition feature for the user to enter a discount percentage that is automatically applied to the requisition pricing. However, can automatically apply a discount that is recorded on an associated contract record.
- STRENGTH, PRD-24: Input forms can have a workflow defined for the individual form.
- STRENGTH, PRD-33: Suppliers can set up their Ariba Network account to route Change Orders differently than original Orders.
- POTENTIAL WEAKNESS, PRD-37: System does not identify matching state source items to non-contract items or save matching items for later analysis.
- POTENTIAL WEAKNESS, PRD-39: System does not identify matching state source items to retail/commercial market items or save matching items for later analysis.
- POTENTIAL WEAKNESS, PRD-53: System does not provide a means for users to enter 'speed codes' that "automatically map/populate" other accounting fields.
- WEAKNESS, PRD-56: The system does not provide a means to enter 'back dated' requisitions/orders. So system will not be able to allow recording of purchases done outside the system.
- POTENTIAL WEAKNESS, PRD-62: System does not provide a means to specify a payment method "other than invoicing" on the purchase request.

**STATE OF MAINE

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- POTENTIAL WEAKNESS, WRK-10: For an authorized Approver to be able to over-ride/bypass to make a purchase request bypass any steps they have to manually remove each step from the workflow. There is no automation available for this.
- POTENTIAL WEAKNESS, WRK-12: Attachments size is limited to 100MB each.
- POTENTIAL WEAKNESS, WRK-13: Approvers cannot approve/deny by line item. To only approve part of the line items the Approver must delete the line items they want to deny.
- WEAKNESS, WRK-14: When an Approver edits a purchase request the workflow cannot be re-triggered to start again at the beginning.
- POTENTIAL WEAKNESS, PO-2: System does not have the capability to split a Requisition into separate POs for different Fiscal Years, holding the future Fiscal Year POs.
- WEAKNESS, PO-5: System does not provide the capability to have Agency/Organization specific PO templates.
- WEAKNESS, PO-15: The system cannot provide an internal and supplier printed version of an order. Though it can be customized, there is only one print format for an order.
- POTENTIAL WEAKNESS, PO-16: There is not eSignature functionality available for Orders.
- POTENTIAL WEAKNESS, PO-17: Attachments size is limited to 100MB each.
- POTENTIAL WEAKNESS, PO-24: The system does not notify "reviewers, approvers" when a PO has been cancelled.
- POTENTIAL WEAKNESS, PO-27: Orders cannot be created with out create a Requisition.
- POTENTIAL WEAKNESS, PO-28: Orders cannot be created from a Contract directly, must create a Requisition from the Contract.
- POTENTIAL WEAKNESS, PO-29: System does not provide a means to specify payment method, other than invoicing, on the PO.
- POTENTIAL WEAKNESS, PC-3: System does not provide a means to prevent Pcard use based on the type of a Purchase Request.
- WEAKNESS, PC-6: System does not provide a means for a user to enter/maintain their own Pcard information. Must have a Pcard Administrator manage this for users.
- STRENGTH, PC-8: Pcard reconciliation capabilities are comprehensive.
- WEAKNESS, PC-9: System does not have a means for users to record "non-purchase order Pcard transactions" as part of reconciliation.
- POTENTIAL WEAKNESS, PC-16: System does not provide a Pcard transaction integration to the Finance system for budget/funds verification and to encumber funds.
- POTENTIAL WEAKNESS, RC-3: System does not provide a means to record receipts without a corresponding PO in the system.
- POTENTIAL WEAKNESS, RC-4: Receipts cannot be recorded in the system and later associate it to a PO.
- WEAKNESS, RC-16: System does not have Receiving tolerances capability. Tolerances are defined on Invoicing.
- POTENTIAL WEAKNESS, INV-2: System does not provide a means to control which Agencies/Entities that a Vendor may submit electronic invoices for. The only control available is to control which Vendors are able to submit electronic invoices.
- STRENGTH, INV-8: System provides a "messaging feature" on Orders and Invoices to communicate with the Vendor.
- Ten req'ts need clarification, response did not address the full req't.

Catalog Capability, pg. 38: Generally meets req'ts, with these caveats.

- Ariba Spot Buy catalog solution, pg. 39:

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- NOTE, Ariba Spot Buy is NOT the equivalent to 3-Bids/Buy (Quick Quote). It is shopping "non-sourced" catalogs in a marketplace that Ariba has available through their Business Network where member suppliers can offer catalogs to sell to Ariba buying customers. Similar to accessing/shopping Amazon.
- WEAKNESS, to shop Spot Buy, users have to do a second Search after they have searched the State/Entity catalogs.

RTM

- WEAKNESS, CAT-6: System has a limit of 5000 catalogs.
- WEAKNESS, CAT-7: System has a limit of 500,000 catalog items in a catalog.
- WEAKNESS, CAT-10: System does not provide the capability to have catalog items that provide instructions to users without pricing.
- POTENTIAL WEAKNESS, CAT-11: System does not provide a means
- WEAKNESS, CAT-12: System does not provide catalog capabilities for configurable products or services.
- WEAKNESS, CAT-13: System does not have catalog capability to have pre-configured items with ability to substitute optional components.
- WEAKNESS, CAT-19: System does not allow for negative dollar value catalog items.
- Three req'ts need clarification, response did not address the full req't.

Sourcing/Bid Management, pg. 40-42 : Generally meets req'ts, with these caveats.

- pg. 38: Public posting of the solicitation would only be on the Ariba Network "Discovery" website, which has all Ariba customer solicitations. As noted in the response to SRC-52 & 76, an integration would have to be created (not included) using the "Ariba Discovery API" to post on a State/Entity public website.
 - CONCERN, conflicting answers for public posting
 - Transparency Portal section, pg. 10: states that "the offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data". Response on pg. 38 only mentions Ariba Discovery.
 - ALSO, on pg. 40 there is a reference to "Public Access to Data" in the Vendor Performance area which refers to APIs that could be used to "expose data to the public via a public website".
- Project Mgmt, pg. 39: STRENGTH, system provides "project management" feature of defining Phases/Tasks that users are "required to complete as part of the solicitation".

RTM

- POTENTIAL WEAKNESS, SRC-16: System does not have a specific solicitation type for "Invitation for Qualified Products".
- CONCERN, SRC-23: The reference to access being "based on user licenses" may mean that the sourcing module is licensed separately from other modules. Need to look closely at the Cost Workbook.
- STRENGTH, SRC-28: The messaging feature seems to be a very strong fit to the collaboration requirement.
- WEAKNESS, SRC-35: The system does not provide "check-in/out capabilities for the repository.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, SRC-37: System does not provide a means to update documents, terms/conditions, specifications and have Templates that include them be automatically updated.
- WEAKNESS, SRC-38: System does not provide a means to identify templates that include documents, terms/conditions, specifications that have been updated.
- CONCERN, SRC-40: The statement "SAP Ariba will maintain the header data fields on behalf of the State..." implies that the State will not have Admin access to make configuration changes to the system.
- CONCERN, SRC-52, 76, 81, 90, 138 & 147: Response conflicts with responses in the Technical Proposal referring to a Transparency Portal (pg. 10), Ariba Discovery (pg. 38) and using Ariba APIs to "exposed data" (pg. 40).
- CONCERN, SRC-53: The limit of loading 9 attachments at a time may be a frustrating user experience if they have to load more than 9 documents.
- POTENTIAL WEAKNESS, SRC-54: OOTB the system utilizes UNSPSC codes. It may not directly support NIGP codes.
- POTENTIAL STRENGTH, SRC-56: The capability to "assign a weight to graders on a grader by grader basis".
- "WEAKNESS, SRC-63: Solicitations are ""limited to 100 supplier participants"" and to do more you have to set up ""different events"".
- CONCERN, SRC-63: The ""100 supplier participants"" limit ""to ensure maximum performance"" may mean that the system can't handle larger numbers of participants. May be a technical limit."
- POTENTIAL WEAKNESS, SRC-64: System does not provide a means for Suppliers to sign up to be notified when a sourcing event for an existing Contract is being issued.
- POTENTIAL WEAKNESS, SRC-66: Solution will not provide a means for un-registered suppliers to be added to the system generated supplier list.
- POTENTIAL WEAKNESS, SRC-67: System does not provide a means for un-registered suppliers to add themselves to a solicitation supplier list.
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- CONCERN, SRC-52, 76, 81, 90, 138 & 147: Response conflicts with responses in the Technical Proposal referring to a Transparency Portal (pg. 10), Ariba Discovery (pg. 38) and using Ariba APIs to "exposed data" (pg. 40).
- STRENGTH, SRC-84: The "message board" can be copied on emails to post the email content into the message board automatically.
- WEAKNESS, SRC-88: The system can workflow full set of Q&A as a "tracking document" but does not support the specific details of this requirement.
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- WEAKNESS, SRC-102: The sourcing module utilizes acct login as the esignature on solicitations. However they can do customization to provide DocuSign or Adobe eSign services with bids.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- CONCERN, SRC-118: The system does not have a designed means to capture subcontract data as part of vendor responses. Workaround is to attempt to use "RFx questions, lots and/or line items".
- CONCERN, SRC-120: If the report means that the user has to leave the Solicitation record/screen to run a report then this approach is likely to be frustrating to the user.
- CONCERN, SRC-125: If the report means that the user has to leave the Solicitation record/screen to run a report then this approach is likely to be frustrating to the user.
- WEAKNESS, SRC-129: Attachments sizes are limited to 100MB each.
- WEAKNESS, SRC-136: The system does not provide means to award directly to a purchase order. You must create a Contract and then do a release from the contract to create a PO.
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- CONCERN, SRC-142: If re-seller and delivery locations are captured using "questions" then concerned how this information would be available for placing orders against the contract.
- CONCERN, SRC-76 through 80, 90, 138 & 147: Response conflicts with responses in the Technical Proposal pg. 26 that refers to Ariba Discovery as providing "Publicly post solicitations".
- Ten req'ts need clarification, response did not address the full req't.

Contract Management, pg. 43-45: Generally meets req'ts, with these caveats.

- No specific detail provided in the Technical Proposal other than to say that the system provides "two components of the contract lifecycle", Contract Management and Contract Administration.

RTM

- "STRENGTH, CNT-2:
 - o ""redlined versions of a contract either using the application or... Microsoft Word""
 - o ""new Word document"" providing a ""version-to-version compare"".
 - o ""final set of documents"" to be published ""automatically consolidates the selected documents to a final PDF version""
- POTENTIAL WEAKNESS, CNT-7: System does not provide a check-in/check-out feature for maintenance of standard documents/templates
- POTENTIAL WEAKNESS, CNT-8: System does not provide a means to automatically update templates that include standard documents where those document standards have been updated.
- POTENTIAL WEAKNESS, CNT-9: System does not provide a means to identify templates that include standard documents where the standard has been updated.
- WEAKNESS, CNT-10: System limits attachment size to 100MB.
- NEGOTIATION, CNT-12: Suggest negotiating in the integration with Docusign or Adobe Sign (State/Entity choice of which) to be included in the proposed scope/cost.
- NOTE, CNT-23: Contract document authored is provided. See the response to CNT-2 provides more details on the creation of contract documents.
- NOTE: see response to CNT-2 for more details on MS Office and Adobe PDF with creating contract documents.
- POTENTIAL STRENGTH, CNT-26: Feature in "upcoming release of AI/ML" will give recommended approvals based on history and "automatically include additional review/approval" when modifications are made to contracts.
- WEAKNESS, CNT-38: Attachments must be used to capture subcontractor information.
- WEAKNESS, CNT-45, 51-62 & 64: no public posting of Contracts is being proposed.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH, CNT-46: The "full text search" of uploaded documents is a significant feature.
- WEAKNESS, CNT-45, 51-62 & 64: no public posting of Contracts is being proposed.
- Six req'ts need clarification, response did not address the full req't.

Vendor Performance, pg. 46-48: Generally meets req'ts, with these caveats.

- No specific detail provided in the Technical Proposal except general info on pg. 47:
 - o System provides "performance surveys" and "KPI based vendor performance scorecards".
 - o Multiple charts available to display "supplier performance data".
- Not clear whether there is a Contract specific performance assessment/survey feature.
- Public Access to Data, pg. 47: WEAKNESS, Public posting of any data in the solution to a State/Entity "public website" requires use of "a set of APIs" to create integrations to post the information. This work is not included in the proposed solution.

RTM

- Meets req'ts

Purchasing/Data Analytics, pg. 49-51: Meets req'ts.

- Pg. 49/50:
 - o "report can be displayed as a chart or graph (line, bar, pie, donut, etc.) and added to the user's personal dashboard. "
 - o Creating new reports via "3-step report creation wizard"
 - o Charts have dynamic "drill down"
 - o Provides "Parameter-based reports", "Scheduled reports" and can have "visual alerts and grades".
- pg. 50: STRENGTH, report personalization by users. "pre-packaged reports can be modified" by the user and "added to their dashboard".

RTM

- Meets req'ts except for PDA-17 which needs clarification, response did not address the full req't.

Technical Requirements - pg. 52-76: [Note, narrative same as LSI Cat 3 proposal except for "Solution Technical Architecture" sub-section and WEAKNESS](#), RTM section was removed but should have been kept and filled out since req'ts are relevant for the solution proposed.

Availability, pg. 52: Partially meets req'ts.

- SAP Cloud Services SLA states "99.5% System Availability Percentage during each Month" based on "Total Minutes in the Month" that "are measured 24 at 7 days a week".

Accessibility Requirements, pg. 53: Partially meets req'ts.

- "target Web Content Accessibility Guidelines Level A and AA and EN 301 549"
- "solutions are not fully optimized for accessibility"

Audit Trail and History, pg. 54 & TECH-1 thru 5: Does not meet narrative req'ts and the Technical Req'ts tab of the RTM was removed, so no responses.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "specific logging takes place that is viewable by the customer administrator or their designee."
- Narrative response did not address req'ts
 - o to capture "date, time, user, action taken, status changes, content changes and approval or rejection history"
 - o "history would be accessible to users by reports, a history page or other option that is accessible without support from an Administrator."

Browsers Supported, pg. 55: Partially meets req'ts. Response did not address these req'ts.

- Support any browser ranked as more than 10% of web traffic
- Track browsers used to access the Solution
- Solution testing with multiple browsers
- Contain a notice if solution is accessed with an unsupported browser.

User Accounts and Administration, pg. 56/57 & TECH-6 thru 20: Narrative generally meets req'ts , however does not meet RTM req'ts because the Technical Req'ts tab of the RTM was removed, so no responses.

- Access is "based on roles and permissions"
- "permissions for a user is derived from the roles mapped to that user and the groups the user"
- "can inherit roles and their associated permissions by being a member of a group"
- "User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files"

User Authentication, pg. 58/59 & TECH-21 thru 25: Narrative generally meets req'ts , however does not meet RTM req'ts because the Technical Req'ts tab of the RTM was removed, so no responses.

- Two possible authentication methods: "Regular user authentication" (Ariba system login/password) or "Single Sign-On" ("log into their corporate network")
- "may activate 2 factor authentications if they use SAML based authentication or ADFS"
- Password policy: Single Sign-On uses whatever is in place with the State/Entity system. Ariba login policy is standard. WEAKNESS, not configurable to meet a State/Entity policy. Ariba standard is:
- case-sensitivity between 8 and 16 characters in length. Passwords can include any Latin characters and punctuation marks and must include at least one numeral between the first and last character. They must also include at least one letter.
- Passwords must be changed "at least every 180 days"

Federated Identity Management, pg. 60: Meets req'ts.

Data Conversion, pg. 61 & TECH-26 thru 34: Does not meet narrative req'ts and the Technical Req'ts tab of the RTM was removed, so no responses.

- Technical proposal details did not address data conversion. Instead discussed their implementation methodology and staffing plans.

Interface and Integration, pg. TECH-35 thru 60: Narrative generally meets req'ts , however does not meet RTM req'ts because the Technical Req'ts tab of the RTM was removed, so no responses.

- "integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems."

BIDDER NAME: Carahsoft

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Real-time and/or batch integration
 - o HTTPS using CSV interface
 - o SAP Web services
 - o REST APIs
- “are based on SSL 256 bit encryption and support various authentication methods such as WS-Security, basic and digital certificate authentication as standard.”

Office Automation Integration, pg. & TECH-61: Narrative generally meets req’ts , however does not meet RTM req’ts because the Technical Req’ts tab of the RTM was removed, so no responses.

- “supports a wide array of document types and formats as attachments or documents stored within a workspace. For examples: Word, Excel, and PowerPoint”

Mobile Device Support, pg. 64 & TECH-62: Does not meet. Response described mobile app, did not address whether the Solution can be accessed from mobile devices. Does not meet RTM req’ts because the Technical Req’ts tab of the RTM was removed, so no responses.

Mobile Applications, pg. 65/66: Meets req’ts

- Additional details on app functionality are described in the Mobile Device Support section.

Data Ownership and Access, pg. 67: Meets req’ts.

Date Retention, Archive and Purge Considerations, pg. 70 & TECH-63: Does not meet req’ts. Narrative response addressed retention but not archive or purge. Does not meet RTM req’t because the Technical Req’ts tab of the RTM was removed, so no responses.

- “We retain customer data for the life of the subscription and in accordance with the Ariba Data Policy and Privacy Statement”
- “Data retention is governed by the active contract”
- “you may download your data using the functionality within the application, in order to meet your specific retention requirements.”

Disaster Recovery Plan, pg. 69: Meets req’ts.

- “Disaster recovery options are included for all cloud services for SAP Ariba solutions”
- “SAP Ariba solutions use a documented system recovery plan”

Solution Environments, pg. & TECH-64 thru 68: Does not meet req’ts. Does not meet RTM req’t because the Technical Req’ts tab of the RTM was removed, so no responses.

- Separate Development and Training environments are not provided.
- The Test environment will be used for initial configuration and setup.
- Additional environments for “an additional charge”.

Solution Technical Architecture, pg. 71: Partially meets. An architecture diagram was provided but there was no narrative response, so the specific detailed response regarding “techniques used to exchange data” and “shared” network components was not provided. NOTE: the details about their

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Carahsoft is SAP reseller.
 - SAP Ariba – full service/modules for sourcing, buying/invoice, contracts and supplier management.
 -
2. Previous Projects
 - Washington DC (in process),
 - California DSHS – strategic sourcing, buying and invoicing. (*Infosys also lists this project.)
 - City of San Diego.
 -
3. Subcontractors
 - None. (Although it appears that SAP does all the work and Carahsoft is the seller only.)
 -
 -
4. Organizational Chart
 - Not provided.
 - Link to SAP corporate leadership page.
 -
5. Litigation
 - None
 -
 -
6. Financial Viability

Individual SME Comments:

SAP Ariba solution.

RTM – only Functional requirements returned. All other tabs deleted. **Non-responsive?**

Much of this solution response is identical to LSI SAP Ariba proposal.

General Principal and Requirements

- Key Solution Functionality Elements – p4 *SAP Ariba Guided Buying serving as the single point of entry. SAP Ariba Guided Buying serving as the single point of entry.*
 - SAP Portal integrated applications. – several deployment options.
 - SAP Ariba Business Network and SpotBuy catalog – marketplace.
 - P5 *Workflows are configured leveraging the user interface, not complex coding. The dynamic workflow engine allows administrators and key users to define any dependency of parallel and/or sequence routings. As a result, the State can maintain workflows as required as agencies/organizations are added to the solution, or policies change.*
- User Experience - focus on Guided Buying module and mobile procurement tools.
 - P6 *key advantages of using Ariba solution is that it simplifies procurement and sourcing process with easy synchronization to traditional ERP / Financials software.*
- Bidder Best Practices and Roadmap - Standard Ariba quarterly release and monthly feature deliveries.
 - Product roadmap identified
 - SAP Ariba Best Practices Center – flexible, as-needed support tailored to customer; single, named point of contact; best practices; claimed faster ROI.
- Innovations and Value-Added Features/Services
 - SAP Fieldglass
 - AP Ariba Supplier Risk Management
- Customizations/Extensions
 - Spotline (chatbot)
 - Seal Software (analytics for risk control)
 - Cloud Trade(PDF invoicing)
 - Keelvar Sourcing – optimizer to run, analyze and award events, bidirectional data.
 - Cordis – procure-to-pay integration with Oracle ERP;
 - P-18-20 – long list of extensions.
- Alternative Funding Models
 - P17. Listed SAP Fieldglass for external workforce strategy.
 - **Needs clarification “able to support supplier funded model.”**

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 1

DATE: 1/14/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract transition – p20 States Carahsoft has a lot of contract management experience. Response does not directly speak to transition.

Functional Requirements – No RTM for General Functionality though Narrative references it

- General Functionality – Ariba integrated applications. Facilitates occasional and frequent buyers.
 - SAP Ariba Buying& Invoicing
 - SAP Ariba Sourcing
 - SAP Ariba Contracts
 - SAP Ariba Supplier Lifecycle & Performance Management
 - SAP Ariba Network
 - SAP Fieldglass
 - P24 *customers can achieve zero-touch processing and invoicing, eliminating once more non-value added work for AP, Finance, Invoice managers, etc.*
 - P24 *Data is categorized consistently within the solution leveraging a common data model inclusive of suppliers, commodity codes (UNSPSC), Agencies/Organizations, users, etc. Data created as a result of system utilization is available for analysis within the user interface via SAP Ariba's native reporting and analysis engine.*
 - SAP Ariba supports importing data from external systems.
- Supplier Portal
- P27 *Supplier enablement services are included in our offering. This reduces the level of effort/resources required from the State to enable suppliers on the SBN. Our team of 700+ enablement experts will be responsible for most of the enablement process. We also offer flexible partner onboarding: it is simple for ALL types of suppliers, big and small, integrated and portal.*
 - P28 Portal functionality integration - *Support for a consumerized buying experience through direct integration of back-end systems using cXML, EDI, or SAP Ariba Integration Adapters.*
 - P28 Solicitations:
 - *Publicly posted solicitations via Ariba Discovery and the State's Public site*
 - *Simple solicitation response via user interface or file upload*
 - *Contract collaboration and redlining via the Ariba Network and/or email*
 - *Support for CIF, cXML, and Excel e-catalogs, plus integration of online commerce storefronts via the Punch-Out feature*
 - *One-step CIF catalog validation and publication*
 - *Invoice validation and reconciliation.*
 - *SSO for managing accounts and network profiles.*
 - *Mobile availability*
 - *24/7 self service training and documentation – business hours phone and chat support.*
- Supplier Enablement/Management
 - P31 *Customized enablement strategy: Use our team's expertise to help you design and develop the most effective enablement strategy for your suppliers based on their profile, purchase order (PO) and invoice volume, and spend. Our approach includes duplicate detection (deduping) and segmentation of your vendor master data to effectively target and onboard suppliers in tiered waves that align with your priorities and objectives.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 1

DATE: 1/14/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P32 *Supplier education: user guides, FAQs, technical documentation, and free online seminars that explain the basics of using Ariba Network. We can also deliver your account specific information to suppliers through a supplier information portal embedded in Ariba Network.*
 - EPROC-VDR-18, -27 and -27 – needs clarification -references correct field.
 - EPROC-VDR-40 – Stated as out of box and configurable; other Ariba bidders were non-responsive on this requirement or partial function claimed. Needs clarification.
- Buyer Portal - Offers 2 primary entry points designed for casual user or power user. Casual user gets guided buying experience, can submit requests. Power user enters via dashboard, gets more self-service approach including buying, solicitation development, vendor management, report generation.
- Need Identification – Ariba Guided Buying function
 - Functions stated as supported.
 - P38 *Purchase orders will be sent to suppliers via the SAP Ariba Business Network. Subsequent change orders will be routed to suppliers via the Ariba Network as well. Change orders will be subject to a configurable workflow. Leveraging the Ariba Network suppliers can create an order confirmation, advance ship notice and invoice. All of which is accomplished electronically to streamline the source to settle process.*
 - 100MB limit on attachments throughout the portal.
 - EPROC-PRD-28 – Custom form can be created for special considerations such as trade-in. Is this considered a customization or native functionality? If negative numbers not accepted, how would this be handled? Needs clarification.
 - EPROC-PRD-48 – Needs clarification. Is this native functionality for loading values cited or is this assumed to be an integration? Entry is marked A.
 - EPROC-PRD-62 and PRO-29 – Needs clarification. Requirement is for header level; response is that supplier level is common. Non-responsive as presented.
 - EPROC-PO-16 – clarification needed – Signatures on POs – Carahsoft response says not available in comments, but marked A.
 - EPROC-RC-21 – UOM defined by PO – not convertible to inventory unit UOM for receipt entry.
 - Note: There are multiple responses in this Requirement set where configurable is stated but the Availability is marked A not CF.
- Catalog Capability – p41 *With SAP Ariba Catalog, suppliers can upload all their content using a single, simple user interface. And with recently launched, innovative capabilities, they have enterprise-grade content management tools to define, validate, and enrich catalog content. By creating catalog rules to cleanse and enrich the data, you'll be assured of compliant, error-free catalogs while you monitor content quality with your new dashboard reports.* No notes on hands-on customer-side hosted catalog management.
 - EPROC-CAT-6 & -7 Needs clarification. Listed as A, but limitations cited. 500,000 items per catalog; 5,000 catalogs per system. This would likely be in excess of catalogs needed by states, but the item threshold would not reach the limit for MRO vendor catalogs, for example. Does 5,000 catalogs include expired or inactive catalogs; can one vendor have multiple catalogs archived and not count against the total?
 - EPROC-CAT-11- needs clarification. Comments are circular – say to see CAT-11. (possibly means CAT-8 custom forms).
 - EPROC-CAT-19 – negative values supported requirement not met.
-

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 1

DATE: 1/14/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Sourcing/Bid Management - claimed out of box functionality on common procurement types, 50% reduction in solicitation cycle time, savings.
 - Solicitation development using templates inside Ariba Sourcing.
 - P42 *The solution also supports other critical components of the solicitation process including addendums, amendments, Q&A, supplier notifications, supplier communications, internal communications, document management, etc. SAP Ariba Sourcing is natively integrated to SAP Ariba Contract Management and this will allow the State to create state-wide Contracts, Agency-specific contracts, Project-specific/one-time contracts, or Purchase Orders. P43 Proposals are received electronically and are automatically available for comparison side by side within the user interface (unless configured otherwise including envelope and sealed bids). Users may score/grade responses leveraging delivered functionality. Upon completion, side by side comparison by score, price, etc. can be done quickly and easily.*
 - EPROC-SRC-67 – requirement not native in platform
 - EPROC-SRC-73 – is posting to state's website included in standard functionality? **Needs clarification. See SRC-77 and -78.**
 - EPROC-SRC-107 – needs clarification. **Does surrogate bid meet requirement for posting?**
- Contract Management
 - P45 *With SAP Ariba Contract Management, the State can connect directly with suppliers when creating, negotiating, executing, and managing the ongoing administration of contracts. SAP Ariba Contract Management is natively integrated with Sourcing which allows the creation of a contract directly from the solicitation award. The resulting contract will be stored in a central repository and can be published to SAP Ariba Buying and Invoicing.*
- Vendor Performance- Cloud-based vendor data model; supplier 360- review; supplier scorecards based on KPIs.
 - P49 - *The State may leverage a set of APIs delivered as part of the SAP Ariba platform to expose data to the public via a public website. Data captured as part of the supplier management process supported by SAP Ariba Supplier Lifecycle and Performance is available via API. Data can be formatted and combined with other data sources and displayed on a public website to meet FOIA requirements.*
 - P48. Supplier surveys can capture stakeholder responses and compile performance score.
- Purchasing/Data Analytics - 3-step report creation wizard; data filtering within Ariba tool rather than having to export data out to Excel to pivot/manipulate.
 - Pre-packaged or ad-hoc reports.
 - EPROC-PDA-35 - *SAP Ariba can support two reporting taxonomies. Supported taxonomies such as UNSPSC, the Ariba Classification taxonomy, and a customer-specific, custom taxonomy.*

Technical Requirements – No RTM provided

- Availability– 99.5% uptime. Linked service agreement document provides definitions of credit, maintenance windows, availability calculation etc.
- Accessibility Requirements

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 1

DATE: 1/14/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P55 *Accessibility at SAP refers to the possibility for everyone, including and especially people who are differently-abled, to access and use technology and information products. SAP ensures the implementation of user-interface (UI) accessibility features for Products via our SAP Accessibility standard.*
 - P55 *When developing software, SAP's product teams target Web Content Accessibility Guidelines Level A and AA and EN 301 549. **While SAP continues to implement and develop accessibility features across its product portfolio, solutions are not fully optimized for accessibility.***
- *Audit Trail and History p56 Specific logging takes place that is viewable by the customer administrator or their designee. Audit logs produced through use of the solution are considered customer data and are maintained within the customer's instance of the database. These logs are retained so long as the customer has an active contract*
- *Browsers Supported - Common browsers supported*
- *User Accounts and Administration*
 - *P60 Access to data and functionality within the modules is based on roles and permissions that determine which features of the solution a user can see and work with, and what data the user can access. The set of permissions for a user is derived from the roles mapped to that user and the groups the user may be a member of. Permissions are mapped to roles and then roles can be mapped to other roles, to users and/or to groups.*
 - *The solution also provides a single point of integration and administration for users and user profiles, organizations, groups and group memberships, roles and permission mappings.*
 - *This common data is shared and synchronized across modules automatically. The User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files.*
- *User Authentication*
- *Federated Identity Management – See previous answer.*
- *Data Conversion - SAP Activate Methodology for accelerated migration through Delivery team with responsibility for project management, functional and technical expertise, OCM and training to coordinated with customer org.*
- *Interface and Integration – P64 SAP Ariba applications integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.*
 - *P51 - These standard integration options across our solution portfolio are:*
 - a) Master data integration is done primarily in batch mode, HTTPS using CSV files (Batch integration, and depending on the data volume this can be scheduled to run frequently to achieve near real-time integration)*
 - b) SOAP Web services that use an XML payload (Real-time integration suitable for transactional data)*
 - c) REST APIs (supports both synchronous & asynchronous calls)*
- *All of these integration methods are based on SSL 256 bit encryption and support various authentication methods such as WS-Security, basic and digital certificate authentication as standard. Our customers can opt for two or more or all the options to help achieve the desired level of integration*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Carahsoft

CATEGORY #(s): 1

DATE: 1/14/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Office Automation Integration P56 *SAP Ariba supports a wide array of document types and formats as attachments or documents stored within a workspace. For examples: Word, Excel, and PowerPoint.*
Using User Interface, Using CSV, customer with proper access can import data into Ariba or Export out of Ariba.
- Mobile Device Support – site is built for mobile responsiveness. Components with mobile functionality including shopping cart, approvals, viewing reqs. Supplier 360 reports available to view on Airba ios app.
- Mobile Applications – ios and Android supported. Touch ID, App pin, fingerprint recognition options for access.
- Data Ownership and Access – p69 *The customer owns the data; they can extract the data at point of time during the throughout subscription. Tools to download the data. For example: User Interface (Import CSV), API's.*
- Date Retention, Archive and Purge Considerations - Date Retention, Archive and Purge Considerations – p70 *Data retention is governed by the active contract. We retain your data on the service for the duration of the subscription term and any subsequent renewal term.*
- Disaster Recovery Plan - Data centers in regional pairs.
 - URLs will continue to work if failover. Cloud Engineering Services move area within RTO; after switch, secondary becomes the new primary.
 - Customer will receive email from SAP notifying of unplanned down time. Expectation for communication not stated in narrative.
- Solution Environments– p72 *Customers receive two environments by default: production and test. The test environment is used for initial configuration and setup. The production environment is used for production. Additional environment is available for an additional charge.* Solution Technical Architecture
- Solution Technical Architecture – Graphic shows a sample map connecting SAP and non SAP systems. No narrative provided. No RTM provided.
- Solution Network Architecture – p57 *The system is powered by high-performance servers and utilizes a network infrastructure designed for scalability, reliability, and security. The SAP Ariba Operations team is constantly monitoring and maintaining the systems.*
- P58 Needs clarification SAP Ariba solution is *available only as a SaaS multi-tenant model hosted by us. Presumably us is SAP?*
 - *Our solutions are offered and delivered in a true subscription-based model and shared service (multi-tenant) offering. There is no software to install, no hardware to buy, no maintenance or support costs and no need to hire consultants or tech specialists to run the system.*
 - *Subscription includes system maintenance, automatic upgrades, enhancements and application of service packs, Level 1- 3 help desk support, professional services and best practices built directly into the application.*
 - Data will be hosted in North American data center.
- P76 *Ariba leverages a Secure Software Development cycle (Secure SDC) that is aligned with ISO 27034 principles. This includes:*
 - Secure code (OWASP Top Ten) training to engineers*
 - Code review by peers before build cycles*
 - Static and dynamic code analysis, with load testing for resiliency*

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Reviews and approvals at multiple phases for meeting security criteria prior to release to production.

- Service Level Agreement – one page SLA attached. Referenced above.

Security Requirements – No RTM provided

This section is common with IBM and LSI submissions)

- Cloud Security Alliance (CSA) Compliance = CAIQ 3.0.1 supplied.
 - **MOS-15 – Clarification needed** – How are changes to mobile operating systems, patches performed if not SAP change management processes? No comments provided.
- Security and Privacy Controls - **Needs clarification**. P80 SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines. **Does will SAP intend to become compliant with NIST requirement?**
- *SAP Ariba is audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 every six months. A SOC 3 report is issued annually. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II, SOC 2 Type II.*
- Security Certifications . See previous entry.
 - PCI Service Level 1 compliant;
 - compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program
 - Not HIPPA certified – limited relevance for procurement
- Annual Security Plan – p62 – states plan is internal document. Gives links to request SAP SOC reports. Not included with response.
- Secure Application and Network Environment - 24/7 system monitoring. Firewall separation of SAP corporate with customer cloud.
 - Only SAP authorized staff using SAP authorized computers in data centers.
 - 2FA authentication for SAP staff entering cloud environment.
 - Exception-based authorization for Cloud Engineering to access specific customer cloud instances.
 - *P88 Data disposal practices are aligned with the NIST 800-88 standards for clearing, sanitizing, and data destruction to prevent data remanence prior to retiring or allowing storage media outside of our security envelope.*
- Secure Application and Network Access
 - Data at rest and in transit encrypted.
 - Detailed descriptions of security provisions provided for hardware and physical premises.
- Stated in narrative. P94-96. SAP has DPA setting out terms. **No NIST standards referenced as proposed in RFP.**
- **Personally Identifiable Information Protection – Needs clarification for responsiveness.** P.71 *SAP Ariba are not designed to handle HIPAA data. Our solutions are designed Business to business transaction, and SAP Ariba does not support storing HIPAA/PII/Personal data. For example: SSN, Personal Banking information etc.*
- Security/Privacy Issue Occurrence – Scenario described. Full process documentation stated to be confidential.
- PII Data Actual/Attempted Access or Disclosure – As previous entry.
- Security Breach Reporting – As previous entry.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 1)
 - “effution LLC was formed in late 2018 and started operations in January 2019”.
 - “effution GmbH, headquartered in Augsburg, Bavaria, Germany. effution GmbH and its predecessor CostXpert AG has been providing software cost engineering calculation services”.
 - “effution LLC is the sole proprietor of effution GmbH’s software and services in the Americas.”
 - “AI-driven tool, sucCXess 2.0, provides the most accurate and precise software estimations”.
 - Concerned that the solution is not a software/service that fits any of the eProcurement workstreams.
2. Previous Projects (pg. 2)
 - Local Automaker located in Ohio: Determined a “should-cost for a new model embedded-system for one of their software-driven dashboard elements”.
 - “Being a new startup business and given the impacts of the pandemic, this is all we are prepared to share.”
3. Subcontractors (pg. 2)
 - No subcontractors.
4. Organizational Chart (pg. 2)
 - No org chart provided.
 - U.S. owner is the only U.S. employee. GmbH has 5 engineers and 8 developers.
 - Concerned that the company is not staffed to support multiple, concurrent projects.
5. Litigation (pg. 2)
 - No litigation.
6. Financial Viability (D&B snapshot file)
 - Submitted D&B report does not provide financial information. This may be because they are a “new startup business”.

Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

- **Individual Evaluator Comments:** Unclear how the software fits in the public procurement sphere – prior experience appears to be industrial clients. Company appears to be extremely small, with limited U.S. footprint, no public sector experience, and no proposal for implementation.

Organization Qualifications and Experience

2. Overview of the Organization

- Bidding SucCXess 2.0 – software cost estimation tool.
- Unclear what the connection is between prior company and current company.

•

3. Previous Projects

- Provided example of Honda software cost estimate savings.
- No details provided of other projects.

•

4. Subcontractors

- None.

•

•

5. Organizational Chart

- Note. One U.S.-based employee. Development at German subsidiary.
- No project implementation outline.

•

6. Litigation

- None.

•

•

7. Financial Viability

- Company profile is 2 years old.
- No D&B provided as noted.

•

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): 3
DATE: 8/23/21
SME NAME: Robert Sievert
SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization - GEP

- Global providing “end-to-end procurement and supply chain services” w/ 20+ years “delivering procurement success” (pg. 4)
- “Top-ranked by Gartner, Forrester, IDC, Spend Matters” (pg. 4)
- “Woman and minority-owned enterprise” (pg. 4). Minority Owned cert- Tennessee, Women Owned cert- New Jersey (pg. 10)
- Can provide Full Suite eProcurement solution and “Managed Services” (pg. 6)

2. Previous Projects (pgs. 13/15)

- Overall:
 - i. Higher Education but no State/Local Gov’t examples
- **Viatris:** Referred to “Unified direct and indirect buying and accounts payable” but they do not clearly say what GEP modules were implemented. Implies it was the Purchasing and Supplier Management modules. \$40B+ spend, 75K suppliers uploaded. *Not a Full Suite eProcurement implementation.*
- **UCAL:** Appears that GEP S2C (“Spend Analysis, Sourcing, Contract Management, Supplier Management) and a “public bid site” were implemented. Spend under management increased to \$47.5B, 1K+ sourcing events. *Not a Full Suite eProcurement implementation.*
- **Chevron:** “Unified, mobile-enabled system” but does not say what GEP modules were implemented. Provided Change Management for “users and suppliers”. *Unclear whether this was a Full Suite eProcurement implementation.*
- **LDS Church:** Contract and Supplier Management. “Managed over 8k suppliers and integrated over 25k contracts”. *Not a Full Suite eProcurement implementation.* Subcontractors
- **UMASS:** “Full suite of Source-to-Pay execution tools and process flows”. “Campus-wide Procurement Support desk and portal”. “Highly effective change management and communication plan”. *Appears to be a Full Suite eProcurement implementation however*

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements

- Single unified platform, pg. 4: "all relevant functionality in a single unified platform:- sourcing, savings tracking, category management, contract management, supplier management, and procure-to-pay"

User Experience

- Intuitive User Experience, pg. 8:
STRENGTH
 - o Users can pick which screen will be their landing page
 - o Users can drag/drop, reorder different sections of the screen. System retains changes for next log in.CONCERN: the "pending tasks" list has all tasks, mixing all types of transactions/tasks in a single list that must be filtered or searched. Will likely be too much in a single list for users.
- Mobile, pg. 9: STRENGTH, iOS and Android apps have very robust functionality.

Bidder Best Practices and Roadmap

- Agile Implementation Methodology, pg. 14: STRENGTH, methodology focused on "Progress over perfection" as detailed allows State/Entity to learn from decisions they make for setup configuration and adjust instead of settle.
- Release/Update Cycles, pg. 15: WEAKNESS, for New Releases and Maintenance Releases the State/Entity will only have a release in UAT for one week before it goes to Production.

Innovations and Value-Added Features/Services

All of these services are likely to be only an occasional fit/need for States/Entities. Suggest making sure these are negotiated and moved to be Optional and are not included in the proposal scope/pricing.

- **Organizational Maturity Assessment**, pg. 19-24: CONCERN, Maturity Assessment work is not often needed/desired by States and is very 'heavy'/intensive work (16 weeks minimum).
- **Opportunity Assessment**, pg. 25-28: CONCERN, Opportunity Assessment is another heavy/intensive effort towards recommending Sourcing actions by the State. This is outsourcing

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

the 'strategy' part of Strategic sourcing and it requires a lot of data that is not easily obtained or categorized... so lot of work to gather and then analyze/classify.

- **Market Intelligence**, pg. 30-34: Reports from GEP resources/data to support a State's Strategic Sourcing efforts. This is not likely to be a heavily use resource/service since it would target situations where the State/Entity feels they don't have sufficient insight for a planned sourcing event.
- **Category Management**, pg. 36-37: This appears to be full outsourcing of Strategic Sourcing work.

Customizations/Extensions

- Customizations/Extensions, pg. 39: NOTE, GEP uses a "Product Advisory Group (PAG)" to get customer feedback on current features, new features and feature enhancements. Should GEP move forward, suggest negotiating to have some part of the post-award ValuePoint Team to be members of this Group to insure that NASPO members have a 'voice' for the roadmap of the system.

Alternative Funding Models

- None offered

Functional Requirements

General Functionality

- Modules included, pg. 46: Spend Analysis, Sourcing/Bid Mgmt, Contract Mgmt, Supplier Mgmt, Item Master, Vendor Master, Reporting/Analytics, Invoice Mgmt, Purchasing, Catalog Mgmt, Guided Buying.

RTM

- WEAKNESS, GEN-3: Suppliers must register to be able to use an RFx link to access a Solicitation Event.
- STRENGTH, GEN-12: System search can search "content with any readable attachments" (e.g. pdf, excel).
- WEAKNESS, GEN-25: All emails generated by the system will have a From email address domain of "gep.com" instead of the State/Entity.
- POTENTIAL WEAKNESS, GEN-35: System does not have a "comment library" feature to store standard comments for use on Transactions.
- WEAKNESS, GEN-38: GEP licensing does not provide for "unlimited licenses for business users and supplier users."

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Supplier Portal: does have the functionality.

- GEP Supplier Enablement Team, pg. 50: "will take ownership of onboarding all State/Participating Entity suppliers... at the time of implementation". CLARIFICATION, will this team be responsible for on-going supplier onboarding post-implementation of the system?
- "GEP does not charge the suppliers to transact on our platform" (pg. 50)
- Suppliers have "single login to transact with different States/Participating Entities (pg. 51). So single supplier account to work with all Coupa customers.

RTM

- STRENGTH, SPR-13: Supplier emailed invoices can be OCR scanned to extract metadata and automatically load this into the system.

Supplier Enablement/Management: does have the functionality

- "Pre-Qualified Supplier", pg. 54: CLARIFICATION, are these lists required to be used as the invited supplier list for sourcing events?

RTM

- Meets req'ts

Buyer Portal: does have the functionality

RTM

- Meets req'ts

Need Identification: does have the functionality

- "Central intake form", users provide details on product/service with "category/commodity specific questions/fields". (pg. 62)

RTM

- Meets req'ts.
- STRENGTH, NEED-3: System allows creation of multiple "intake form" capabilities to address different kinds of procurement needs.

Request through Pay: does have the functionality

- pg. 64: CONCERN, "connecting every order to a contract" may mean that the system does not provide means to do non-contract orders in the system.
- pg. 66: Can create purchase orders "without a requisition".
- Services Procurement, pg. 67: STRENGTH, 3 ways to address services procurement
 - o User creates requisition with Milestone line items on a PO.
 - o User creates requisition with Contingent Worker details.
 - o Supplier creates "service entry sheets" with "service line items/rates" from the contract that are "sent for approval".

RTM

- NOTE, there are many req'ts where the response is "yes" and basically repeating the req't without providing details of how the system would do it.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- POTENTIAL WEAKNESS, PRD-13: System does not provide a "library concept of standard specification text or attachments associate with specific commodity codes".
- POTENTIAL WEAKNESS, PRD-37: System does not capture "non-contract match" items when purchasing from a State source.
- POTENTIAL WEAKNESS, PRD-37: System does not capture prices for matching State sources when a non-contract item is selected.
- CONCERN, PRD-56: Response is would "like to discuss" in regards to being able to enter "backdated purchase requests".
- POTENTIAL WEAKNESS, PO-16: System only offers "signature image" for electronic signature of the PO.
- NOTE, PC-1: Pcard functionality for the system is not scheduled for release unty Q1-2022.
- POTENTIAL WEAKNESS, RC-3: System does not provide a means to record receipts in the system without a PO being in the system.

Catalog Capability: does have the functionality

- pg. 69: CONCERN, "catalogs linked with contract" may mean that the system does not support non-contract catalogs.
- pg. 70,
 - o "At the time of implementation, GEP will configure any State/Participating Entity specific punchout catalogs".
 - o "supports level-2 punchouts", suppliers must "expose their APIs to GEP web crawlers".
 - o "Internal Catalogs" that integration with inventory master provides "visibility in on-hand balances/quantity, price to the users".

RTM

- Meets req'ts except, POTENTIAL WEAKNESS, CAT-19: Catalogs cannot have negative values to identify trade-in values.

Sourcing/Bid Management: does have the functionality

- pg. 74, "line sourcing events from opportunities identified through spend analysis".

RTM

- STRENGTH, SRC-29: System allows users to copy/paste from Excel to the price sheet screen.
- POTENTIAL WEAKNESS, SRC-37: Changes to a Solicitation Template may automatically "make specific updates to the sourcing events" where users have used the templates.
- POTENTIAL WEAKNESS, SRC-67: System does not provide a means for suppliers to add themselves to a solicitation bidders list. The buyer must do it manually.
- WEAKNESS, SRC-97: Suppliers cannot withdraw a response once it has been submitted. They must revise their response to say not responding and re-submit to replace their previous response.
- POTENTIAL WEAKNESS, SRC-102: System does not provide a capability for supplies to electronically sign their response. They must sign a printed copy, then scan & attach the document.
- WEAKNESS, SRC-107: System does not provide a way to prevent Suppliers from submitting on-line responses for 'hard copy submission only' Solicitations.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- NOTE, SRC-109: The capability for buyers to enter paper responses on-behalf of Suppliers is not currently a feature but is expected to be available by Award.
- WEAKNESS, SRC-122 & 123: System does not provide a means to define and apply Preferences to response evaluation.
- POTENTIAL WEAKNESS, SRC-148: For cancelled solicitations, any submitted responses will not be locked/encrypted to prevent buyer access and Suppliers cannot withdraw their responses.

Contract Management: does have the functionality

- Pg. 77
 - o Collaborative Authoring", route contract draft internally and externally to suppliers for "review, editing and redlining"
 - o Very comprehensive integration with MS Word with check-out/check-in document control and access clause library from within MS Word.

Video - Strengths

- Contract Wizard method, prompts user for info and system suggests relevant templates then creates draft contract.
- Contract Examiner: loads and scans PDF docs extracting Meta data
- In MS Word editing of contract language redlining user can see list of Clauses from library (Variable Library) that can be added while editing in Word.
- Contract Search from Workbench searches all Contract Metadata and all readable documents.

RTM

- STRENGTH, CNT-8: System has a 'mass' update feature to amend all existing contract to get updated clauses/templates.
- NOTE, CNT-23: Response did not address Contract Authoring however on pg. 77 of the Technical Response this capability is discussed.
- POTENTIAL WEAKNESS, CNT-27: System does not provide a means to restrict access to specific attachments on a Contract.
- POTENTIAL WEAKNESS, CNT-36: System does not provide a means to define default account coding as part of the Contract record that would then be used as default for requisitions/orders from the contract.
- WEAKNESS, CNT-38: To capture Contract subcontractors, resellers, dealers and franchises they must be issued their own contracts in the system.
- WEAKNESS, CNT-41: To capture Contract SWAM certification/participation data each subcontractor must be issued their own contract in the system.

Vendor Performance: does have the functionality

- Pg. 79/80,
 - o Survey questionnaires to users
 - o Initiate performance improvement plans w/ milestones and activities.
 - o Link to Contract obligations to generate "Contract score"
 - o

RTM

- Meets req'ts.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): 3
DATE: 12/27/21
SME NAME: Robert Sievert
SME DEPARTMENT/STATE: NASPO

Purchasing/Data Analytics: does have the functionality

- pg. 82: CONCERN, "GEP Minerva" cited as providing AI and machine learning but it is not listed in the components included in the proposal (pg. 46).

RTM

- Meets req'ts

Technical Requirements

Availability

Pg. 86: Meets req'ts.

Accessibility Requirements Pg. 88: Meets req'ts for components behind the login, however response did not address compliance of "publicly available" components.

Audit Trail and History

Pg. 90 & TECH-1 thru 5: Meets req'ts

Browsers Supported

Pg. 92: Meets req'ts

User Accounts and Administration

- Pg. 94/95: Meets User Acct/Admin req'ts except response did NOT address req't to be able to delegate Admin role to agencies.

RTM

- POTENTIAL WEAKNESS, TECH-12: System does not provide a 'one account' feature for user that is both a buyer and a supplier. User must have two accounts.

User Authentication & Federated Identity Management

Pg. 97 & TECH-21 thru 25: Meets req'ts.

Data Conversion

Pg. 99-105 & TECH-26 thru 34: Meets req'ts.

- CONCERN, response refers to "item master data management and vendor harmonization services" but does not indicate whether these are included in the proposed scope/pricing.
- CONCERN, pg. 105 figure references "UNSPSC classification". Does this mean that the system only support UNSPSC commodity codes?

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Interface and Integration

Pg. 107-109: Meets req'ts except for real time integration.

- NOTE, pg. 108 of proposal assumes that the State/Entity will provide Middleware for integration.

RTM

- GAP, TECH-35: System does not provide real-time integration capabilities. Can be "Near Real time and Batch file-based transfers".

Office Automation Integration

Pg. 111 & TECH-61: Meets req'ts.

Mobile Device Support & Mobile Applications

Pg. 113/114 & TECH-62: Meets req'ts

- Pg. 113: STRENGTH, includes both iOS and Android apps which allow approving orders, requisition and invoices, service confirmation, view dashboards, access catalogs, and create requisitions. Apps support "biometric authentication".

Data Ownership and Access

No response provided. This section is missing from the proposal.

Date Retention, Archive and Purge Considerations

Pg. 116 & TECH-63: Meets req'ts.

Disaster Recovery Plan

Pg. 118: WEAKNESS, the proposal did not provide details regarding GEP's Disaster Recovery plan as required.

Solution Environments

Pg. 120: WEAKNESS, the UAT environment is to be used as the Training environment. The required separate training environment is not provided.

RTM

- WEAKNESS, TECH-64 thru 67: A separate Training environment is not provided.

Solution Technical Architecture

Pg. 122/123: Meets req'ts.

Solution Network Architecture

Pg. 125-127: Meets req'ts

System Development Methodology

Pg. 129-132: Discussion/information is not indepth but does present high level of the requested information. Meets req'ts

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Service Level Agreement

Pg. 134 & GEP Appendix 1-SLA Standard doc: Not comprehensive or good protections for States/Entities

- Support services are only available to State/Entity "Designated Support Contacts" (pg. 1)
- Only service level warranty is "System Availability" at 99.8% avail, 7days/24 hours (pg. 2)
- Service Credits=% of monthly fees... must fall below SL for "three (3) consecutive calendar months" (pg. 2)
- Severity Levels: Sev 1 & 2 are about complete unavailability of entire system or a major feature. Issues around functionality on specific types of transactions (button not visible) or with a specific transaction are Sev 3. SLA does not indicate who sets the Severity. (pg. 3).
- Response Times: most critical State issues will be Sev 3 and response times are not good.
 - o Sev 1: Initial response - 1 hr, Workaround - 1 business day, Fixed – 10 business days
 - o Sev 2: Initial response - 4 hrs, Workaround - 1 business day, Fixed – 20 business days
 - o Sev 3: Initial response - 1 business day, Workaround - 10 business days, Fixed – 45 business days

Security Requirements

Cloud Security Alliance (CSA) Compliance

Pg. 136: Meets req'ts. Completed a CAIQ

Security and Privacy Controls

Pg. 139: Did not indicate level of compliance with NIST 800-53 as req'd however system is "modelled as per ISO 27001" which is international standard on security management systems.

Security Certifications

Pg. 141: Meets req'ts

Annual Security Plan

Pg. 144/145: Response did not "describe the Security Plan" but instead described their security practices and provided copy of their internal "Information Security Policy".

Secure Application and Network Environment

Pg. 147/148: Details are not comprehensive but does meet req'ts.

Secure Application and Network Access

Pg. 149/150 & SEC-1 thru SEC-5: Meets req'ts.

Data Security

Pg. 153/154: Meets req'ts.

Personally Identifiable Information Protection

Pg. 156: Meets req'ts

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- CONCERN, GEP's definition of PII did not include Tax ID and may not match each State's/Entities' definition of PII.

Security/Privacy Issue Occurrence & PII Data Actual/Attempted Access or Disclosure

Pg. 158: Does not meet. WEAKNESS, GEP will not comply with the notification/communication req'ts specified in the RFP. Only commits to report/notify "customers within 4 hours of an incident/breach".

Security Breach Reporting

Pg. 160: Meets req'ts. Will not provide initial response within req'd 2 hours but will provide detailed notification will be within 4 hours instead of the req'd 24 hours.

Implementation Services Requirements

Project Management & Project Implementation Methodology

Pgs. 163-183:

- *Detailed Implementation Tasks*, pg. 164:
 - o CONCERN, feels like GEP expectation is little or no special setup for client. OOTB and GEP std setup is expected to fit the client.
 - o WEAKNESS,
 - Req't Gathering & Solutioning: don't see Integration
 - Cutover & GO Live: OCM communications is not happening until cutover phase. Too late for good OCM.
 - Hyper Care: waiting to establish Help Desk and do FAQs until after Go-Live is late, should be earlier.
- *Multiple Workstreams*, pg. 165:
 - o Interfaces Development: CONCERN, chart is showing that the State/Entity must lead SIT testing. This should be GEP led.
 - o Supplier Enablement: CONCERN, chart shows GEP as lead on "Set up Catalogs", need to determine if they are actually creating catalog files and see if there are any assumed limits on the number of catalogs/punchouts.
- *Organizational Chart*, pg. 166: NOTE, unusual to have an org chart that shows Contractor Leads reporting to State/Entity Leads.
- *Timelines*, pg. 167-
 - o Upstream/Downstream separation is good.
 - o Large:
 - Overall timeline of 18 months to final Go-Live is too aggressive. Should be something like 24 months.

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Instructions: The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

Individual Evaluator Comments:

GEP – Global eProcure platform - modules in integrated platform.

General Principal and Requirements

- Key Solution Functionality Elements – Required elements provided in integrated tools. Narrative lacked detail. Video demonstrated functionality and user experience. Elements explained on narrative p46.
- User Experience - Integrated functionality.
- Bidder Best Practices and Roadmap
- Innovations and Value-Added Features/Services – Mostly focused on consulting and reports. (Swamped the narrative description of the primary sourced product.)
- Customizations/Extensions – vague description that future customer needs could be developed. Focused on existing SAAS. **EPROC-PRD-56**
- Alternative Funding Models N/A

Functional Requirements

- General Functionality – Only configuration items relate to publishing to state's website.
 - **EPROC-GEN-25** – Notifications will have @gep.com email domain / doesn't integrate to state's domain. Non-compliant. **Needs clarification.**
 - EPROC-GEN-39 – High level of configuration required to set external posted content. No additional cost proposed or problem identified.
- Supplier Portal - EPROC-SMR-19 – high level of integration for admin fee payments with state's portal. Doable.
- Supplier Enablement/Management – All requirements noted as Native to application.
- Buyer Portal – Out of box
- Need Identification – Out of box except for E-PROC-NEED-5 which would configure priority of state contracts/purchase channels.
- Request through Pay — Out of box **EPROC-PRD-11** (recurring purchase function) noted as Medium complexity to set up. **Clarification needed** if this is a configuration or actually out of box.
 - – backdated function. **Needs clarification.** Response notes as out-of-box, but statement does not address role-based authority or the functional requirement of backdated orders
 - **EPROC-PC** – Listed as in development- **Needs clarification** if functionality available.
- Catalog Capability – **EPROC-CAT-38** – Public-facing search without login not available. Can be developed. **Needs clarification** as is listed as Low complexity.
- Sourcing/Bid Management – All requirements listed as out of box or low complexity configurable except **EPROC-SRC-109** bid submissions entered by purchasing staff – currently requires GEP staff

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

to load into back-end. Listed as in development by contract award date. Needs clarification if functionality now exists.

- Contract Management - All listed as out of box except:
 - **EPROC-CNT-20 – Needs clarification.** Response appears to refer to each individual document internal ID not an overall contract number that may be a single document/file or a collection of files depending on structure.
 - **EPROC-CNT-71 and EPRPOC-CNT-72** – Functionality listed as high complexity config. **Needs clarification** if requirement understood. Is there admin fee functionality/invoicing/tracking separate from payment processing?
- Vendor Performance – all listed as out of box.
- Purchasing/Data Analytics – listed as out of box with some config for level 2 punchout search.

Technical Requirements

- Availability – 24x7 SLA 99.8%
- Accessibility Requirements – WCAG 2.1
- Audit Trail and History – Out of box
- Browsers Supported – Edge/Chrome recommended. Native mobile functionality for ipad and android.
- User Accounts and Administration – MS AD. 2MFA. SAML 2.0 for SSO.
 - **EPROC-TECH-12** – requires SSO for buyer/supplier dual accounts single login config. **Conditional compliance.**
 - **EPROC-TECH-24** – 2MFA doesn't autogenerate new password. 6 digit code required for access to password reset. **(acceptable standard but doesn't meet requirement.)**
- User Authentication – Non SSO – upper/lower/number/special char. 5 attempt lockout. 90 day.
- Data Conversion – Multiple dataset approach. Import of migrated data (flat file). Import of ERP live data. Process to harmonize extensive list of fields where data variation is common. (master file cleanup)
 - **EPROC-TECH-30** – Ongoing vendor performance integration is additional cost.
- Interface and Integration – 50 in-house integration experts for ERP connection. (SAP, Oracle, PS etc.) Real-time and scheduled data migration as appropriate for master or transactional (JSON) data. Customer is responsible for SLI integration. GEP will use state-preferred middleware for integration between ERP and GPE.
 - **EPROC-TECH-55** – P-card hosting is planned for 1Q22 – **needs clarification if available.**
- Office Automation Integration – MS Azure-hosted. Word integrates with GEP through plugin allowing redlining of contract document. "Contract Examiner" extracts clauses from scanned PDFs. Price sheets can be edited offline in Excel and loaded back into GEP. Integrates with Outlook for alerts/notifications.
- Mobile Device Support – Dashboards, viewing catalogs, Approvals. Unclear if ordering can be performed in mobile environment. (Secure biometric access.) Unclear if VPN is required to log into mobile environment.
- Mobile Applications
- Data Ownership and Access – After contract termination, customer data returned in mutually acceptable file format; then purged and destroyed. Time period not stated other than with customer agreement.
- Data Retention, Archive and Purge Considerations
- Disaster Recovery Plan – 1 hour RPO. RTO 4 hrs.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Solution Environments – UAT and Production. UAT environment developed through investigation and requirements gathering. GEP to develop testing scenarios to validate function prior to go-live.
 - Scalable through MS Azure data centers.
 - Automated processes to maintain continuity between UAT and production environments.
 - Mobile – native adaptive UI
- Solution Technical Architecture - .Net built on Azure.
- Solution Network Architecture
- System Development Methodology
- Service Level Agreement – 99.8% system availability. 4-level Severity priority for cases with response times 1 hour, 4 hour, 1 business day 4 business days initial response provided followed b 3-step support timeline for each level to conclusion. (Appendix 1.) 24x5 (M-F) support services assistance via email, online and phone.

Security Requirements

Notes: GEP SMART Application Architecture & Security Overview, SOC 2 and Information Security policy provided in appendices.

- Cloud Security Alliance (CSA) Compliance – Yes. Completed. No answers of concern.
- Security and Privacy Controls
- Security Certifications - datacenters are SSAE16 certified. The datacenters are SOC1 and SOC2 as well as ISO / IEC 27001:2005 certified and hosts data for Fortune 500 as well as Global 2000 companies.
- Annual Security Plan
- Secure Application and Network Environment -
- Secure Application and Network Access – EPROC-SEC-2 – configuration required for concurrent login limitations in conjunction with customer.
- **EPROC-SEC-3** – forced login **not currently available** – would be developed with customer – no extra cost proposed.
- EPROC-SEC-5 – almost real-time snapshots. Daily, weekly and monthly off-site backups. Primary data center VA, Secondary CA.
- Data Security – Azure PAAS.
- Personally Identifiable Information Protection – Lists compliance in narrative.
- Security/Privacy Issue Occurrence – Acceptable response listed in CAIQ.
- PII Data Actual/Attempted Access or Disclosure
- Security Breach Reporting – Notification with 4 hours of occurrence - Narrative.

Implementation Services Requirements - GEP

- Project Management – Detailed org, role description. GEP and state responsibility.
- Project Implementation Methodology – Agile sprints / JIRA tracking
 - 5 stages: Requirements; Development/config; UAT; go-live; hypercare
 - Implementation schedules for small, med, large [provided.
 - Challenge/risk mitigation strategies identified (p180)
- Catalog Support Services – Separate implementations with suppliers for hosted/punchout catalogs by supplier enablement team. Ongoing hosted owned by customer; ongoing punchout.
 - GEP will test punchout catalogs – signoff required from customer and supplier before go-live.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 3

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Needs clarification: UNSPSC is referenced in graphics – does GEP support NIGP?
 - Needs clarification: GEP Catalog management services – works with suppliers pre- and post-go-live. Is this a supplied cost option?
- Data Conversion Services – emphasis on understanding data, process standards, data mapping prior to migration.
 - Data standardization – centralized data platform for all systems.
 - Clarification needed: who authorizes decision process for “GEP supplier database” to be the data of record when conflicting data exists or is entered in customer system?
- Interface/Integration Development Services – Defined rules established; standard APIs developed; transaction failure notification monitored by GEP integration team; will be retriggered to correct.
- Organizational Change Management (OCM Services) – Steps designing change process; identified stakeholders and impacted by People, Process, and Technology.
 - Communication and training plans based on stakeholders’ impact.
 - Identify readiness through process; communicate change reasons and processes to drive adoption. Change agent roles: Sponsors, Champions, Agents. (Profile of agents)
- Training Services – Train the trainer; self-study modules powerpoint; quick ref guides; desktop procedures; faqs. Delivered in-person and remotely. Staged training based on role/audience.
 - GEP train superusers; end users trained by customer agency superusers.
 - GEP provide technology documentation; customer agency develop process docs.
 - Needs clarification: No online self-paced training mentioned – is this because of configured toolset that requires training of this type to be developed by the customer?
- Help Desk Services – GEP Success portal – 24x7 – case reporting, knowledge bases.
 - 24x5 helpdesk for customer users. Phone, email and chat. Suppliers by email and phone only.
 - EPROC-IMPL-1 - Needs clarification – new release, product update training through webinars – are these webinars for all GEP or customer-specific?
 - Needs clarification: p222 Best practices support model. Is GEP/State helpdesk staffed by GEP or a combination of GEP and customer staff?
 - EPROC-IMPL-2 – ongoing training provided as needed: who defines as-needed? Are their additional cost thresholds for training? For smaller agency, if train the trainer needs to be performed at future stage in the contract due to staff turnover, is GEP committed to providing this post-implementation or is this a cost option? Needs clarification.
- On-Site System Stabilization Support – agreed hypercare period to handhold initial document creation, complete key issues detected post launch; configuration support; issue cleanup; on-demand supplier support.

Managed Services Requirements

- Solution Support – governance plan for ongoing system support;
 - Specific Director; technical account manager, customer support lead roles in addition to customer support team.
 - Repeated 24x7 system uptime/99.8% SLA. Off-business hour updates; vulnerability and patch policy and practice.
 - EPROC-MNGD-1 – findings reported on “regular basis” – is this quarterly meetings? Needs clarification.
- Organizational Change Management (OCM Services) – Repetitive of implementation slides.

Individual SME Comments:

Organization Qualifications and Experience

Solution proposed is SAP Ariba. "selecting SAP Ariba for the eProcurement solution, the selection of the Equinix Cloud Exchange (ECX) Fabric Platform to provide the virtual network backbone " (pg. 9)

1. Overview of the Organization

- IBM (pg. 4)
 - i. IBM Infrastructure Services will be providing services for projects.
 - ii. Services include: "managed services, IT Infrastructure Services for hybrid cloud, enterprise application management, business resiliency, network, digital workplace, and technology support".
- Kyndryl
 - i. "will be launched later in 2021 as a spin off company founded from IBM Infrastructure Services", so it may not exist yet. (pg. 5)
 - ii. Will have 90,000 employees, 4,600 global customers. (pg. 5)
 - iii. "Kyndryl team brings to the State of Maine and NASPO is our infrastructure services capability to design and deliver unique solutions to help create an agile, resilient organization through hybrid multicloud digital transformation." (pg. 7)

2. Previous Projects

- **PayPal Giving Fund:** (pg. 9)
 - i. "migrated PPGF's ERP platform to SAP S/4HANA Cloud".
 - ii. Not a Full Suite eProcurement implementation project.
- **Shared Services Canada:** (pg. 9/10)
 - i. "Experis has provided IBM with a team of 100+ data center resources providing technical support for SSC's Enterprise Command Centre (ECC) which encompasses a wide variety of platforms and applications in order to manage the complex environment of SSC".
 - ii. This example is Managed Services, not a Full Suite eProcurement implementation project.
- **Santander Group:** (pg. 10)

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM-Kyndryl

CATEGORY #(s): 3

DATE: 10/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- i. “Experis, has delivered SAP and Ariba implementations for medium and large sized global customers”. “One of our success stories is Santander”.
 - ii. Not clear whether this was a Full Suite eProcurement implementation project or only a portion of the Ariba solution.
3. Subcontractors (pg. 12-14)
 - Not clear what role each of the Subcontractors would have for an eProcurement project.
 - Amic Brown
 - i. “focuses on specific technology areas associated with Cloud, SAP and Business Insights & Analytics.”
 - ii. “provides a full range of SAP and Analytics consultancy services to support all SAP technology implementations.”
 - iii. “helps customers migrate their SAP solutions from on-premise to cloud, ECC to S/4HANA and BW to BW/4HANA.”
 - iv. SAP implementer, not Ariba.
 - ManpowerGroup
 - i. “family of brands—Experis, Jefferson Wells, Manpower, and Talent Solutions”
 - ii. “provide staffing and other contingent workforce solutions to state and local governmental agencies”
 - iii. No specific staffing or experience with Ariba implementations noted.
 - Experis
 - i. “IT professional resourcing and managed services”
 - ii. “empowers organizations across the full lifecycle of technology adoption, providing flexible solutions that adapt to their needs”
 - iii. This is the only company that had Previous Project experience cited with Ariba.
 - Jefferson Wells
 - i. “delivers solutions and experienced talent to solve emerging challenges in Risk & Compliance, Finance & Accounting, Tax Services, and Business Optimization.”
 - ii. No specific experience with Ariba implementations noted.
4. Organizational Chart
 - Org chart is for an implementation project, identifying positions in the key project areas.
 - Did not include any details or job descriptions for any of the positions.
 - Did not provide any information regarding staffing a State would need for a project.
5. Litigation
 - No specific information provided on litigation but did note that “IBM is involved in a variety of ongoing claims, demands, suits, investigations, and proceedings that arise from time to time in the ordinary course of its business.”
6. Financial Viability (pgs. 15-38)
 - Overall: Low-Moderate business risk.
 - Failure Score: Moderate risk

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s): 3

DATE: 1027/21

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Identical proposal document to full service category 1. All of the subcontractors are listed. The Kyndryl solution does not address software sales only. It does not seem appropriate for Category 3.

Organization Qualifications and Experience

1. Overview of the Organization

- IBM new spinoff company Kyndryl to deploy SAP Ariba
- Proposal states "new company" has 30 years in infrastructure business.
- Source to pay. Supplier management.
- Impact for Ariba solution.
- Unclear what Kyndryl's role is or why it is being spun out of IBM to deploy Ariba.
- SAP Ariba is full service ERP includes e-procurement options.

2. Previous Projects

- Private sector – Paypal Giving Fund – deployed SAP ERP cloud
- Public sector - Canadian government – shared services. – Experis deployment data centers. Not clear procurement toolset.
- Private sector (banking) – Santander. Experis (Manpower Group) SAP Ariba implementation.
-
-

3. Subcontractors

- The following subcontractors are listed but not relevant to the e-software solution only.
- Amick Brown – SAP implementation service, post go-live support.
- Manpower group – staffing services for IT projects extensive state and local government. (Includes Manpower, Experis and Jefferson Wells).
-

4. Organizational Chart

- Role map org chart. Identifies subcontractor contact (incomplete). No detail.

5. Litigation

- IBM faces claims but not material in 3 prior years.
-
-

6. Financial Viability

- IBM – low risk
-

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icetis

CATEGORY #(s): 3

DATE: 8/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 3)
 - "Icetis is headquartered in Bellevue, WA, USA and has been in business for over 10 years. Our 1,400+ employees are".
 - "Gartner recognized Icetis in its first-ever contract lifecycle management Magic Quadrant in Q1 2020".
 - "Forrester in its WAVE report on Contract Intelligence in Q1 2019 and again in Q1 2021 has identified Icetis as a market leader in contract lifecycle management".
 - Icetis "has 200+ customers using the Icetis Contract Intelligence platform for their contracting requirements" including Microsoft, Large Aerospace & Defense Company, Offshore Oil & Gas Platforms Contractor, World Leader in Thermal Imaging, University in New York, MassTech, and University in D.C.
2. Previous Projects (pg. 6/7)
 - **BASF:** ICI platform provides workflows, automate contract processes, visibility into obligations, and deviations.
 - **Daimler:** ICI platform unities "procurement process to ensure full visibility, global agility, and state-of-the-art contract analysis" across 500,000 suppliers. Also provides "item-level quote comparisons, automated sourcing requests" and analytics.
 - **Microsoft:** ICI platform simplifies/digitizes the "contract-management process" for 1.2M+ contracts.
3. Subcontractors
 - No subcontractors.
4. Organizational Chart (pg. 7- 9)
 - No org chart included but did identify a staffing for a "typical project" for both Icetis and the Customer.
 - Staffing list does identify core/key staff that would be on a project and the "Responsibility" details do look appropriate for the roles.
5. Litigation
 - No litigation.
6. Financial Viability

Individual SME Comments:

Proposal is for CLM with Sourcing and Reporting.

NOTE: Much of the proposal was not structured to match the RFP, so had to pull notes from multiple places in the Technical Proposal and the Attachments to associate them to the relevant sections of the RFP.

Video Demonstrations – No Video provided.

General Principal and Requirements – pg. 2-11

Key Solution Functionality Elements, pg. 2-4: Response did not address the areas/topics required.

- "Contract Intelligence platform in the cloud,"
- "NextGen User Interface – Ease of use and adoption across the University"
- "Speed of Implementation – Rapid implementation with an ability to go-live in 2-5 months"
- "Configurable Business Rules Management – Control rule definitions on an intuitive user interface while driving comprehensive capabilities on approval policies, clause and template rules, and dynamic data and agreement relationships across the **University**."
- "Contract Compliance Management – Ensure adherence to contractual terms within and across the **University** powered by strong commitment management functionalities"
- "Integration Infrastructure and Capability – Comprehensive set of web service APIs allow integration with other enterprise systems like ERP, CRM, Sourcing platforms, etc."
- "Contract Risk Management – Understand risk beyond language and contracts terms to cover SLAs, past performance, and external information from sources like D&B, etc."
- "Cloud Native Architecture – Natively architected and built in the Microsoft Azure cloud platform with the available option of Azure for Government, the system delivers high scalability and flexibility by leveraging the best and most secure cloud platform in the market."

User Experience, pg. 5/6: Response address personalization but not the other areas called out in the RFP.

- Personalization:
 - o "With full mobility support, deep MS Office integration and configurable personalization present the contract information relevant to the context of the user"
 - o "Role based dashboards give real time visibility into key metrics and statistics"
 - o "Admins can easily configure dashboards to track contract lifecycle, contract statistics and metrics and publish them for user groups."
 - o Individual users can easily create new dashboard" "personalize the dashboard"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icertis

CATEGORY #(s): 3

DATE: 12/28/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- MS Office Integration - STRENGTH
 - o "Work in MS Word to setup templates, draft and review agreements while connected to the system to access the clause library and sync data with the system"
 - o "MS Excel add-in for bulk updates and actions on agreements and associated documents."
 - o "Integration with Outlook enables automated intake of emails and attachments"
- Mobility
 - o "Icertis Contract Intelligence mobile apps enable users to get push notifications on tasks, view dashboards, search and view contracts and associated information, take approval actions, update notes, take actions on commitments etc. "
 - o "Icertis also enables touch friendly web access to the system on all mobile devices and tablets with browser support across IE, Chrome, Safari and Firefox."
- Gartner: "recognized for leading the CLM market in product vision and strong ability to execute"
- Forrester: "identified Icertis as a market leader in contract lifecycle management"

Bidder Best Practices and Roadmap, pg. 7:

- "provides a release every quarter, as well as two major and two minor releases in a year. Icertis works with each customer on each release to ensure there are no disruptions to your day to day processes."
- "Connects Events, which often cover the latest Icertis updates, product insights, and the opportunity to hear client stories directly from your peers."
- "webinars offer an exclusive preview of future releases from Icertis and feature the Icertis product roadmap. Release Webinars are generally held four times a year"
- "Customer Meetups. Customer end users can improve their skills, preview new technology, and network with other companies"
- "Icertis Customer Community. This Community offers insight into the most recent tips and tricks, support, and product information, as well as opportunities to collaborate, network, and make connections"

Innovations and Value-Added Features/Services, pg. 8/9:

- DiscoverAI application
 - o "quickly and efficiently discover attributes and clauses, and surface them in the ICI platform"
 - o "convert images, tabular data, and a variety of PDF documents into text" (OCR)
 - o "highlight important terms after the contract is imported"
 - o "Extract structured data contained in tables to associations"
 - o "match discovered clauses to your own taxonomy, swiftly compare each clause to the closest match in the clause library and track deviations"
 - o "Perform bulk actions on large-scale batches of contracts"
- NegotiateAI
 - o "analyze high volumes of contracts, understand their component terms and clauses, and find similar precedents from across your company's entire contract repository."
 - o STRENGTH, "app works as a plug-in for Microsoft Word"
 - o "breaks down any contract into its component clauses and attributes for fast analysis."
 - o "analyzes third-party contracts that do not match standard templates"
 - o "confidence ratings for each discovered contract element"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icertis

CATEGORY #(s): 3

DATE: 12/28/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “Compares similar clauses with easy-to-understand redlined differences”
- VisualizeAI application
 - “enables users to quickly find and load a large volume of contract data, navigate relationships, and easily discover patterns.”
 - “uses cognitive skills to derive contextual insights from contract data”
 - “recognizing the patterns and relationships that exist within ICI contract data and then linking this data to outside sources like Dun & Bradstreet.”
 - “links and maps all the associations between contracts with the same characteristics across the entire contract portfolio”

Customizations/Extensions, pg. 10: Response did not address the req't to have customizations/extensions become part of the base product.

- “follows secure coding practices based on Microsoft SDLC.”
- “All customizations and extension go through a rigorous review for compatibility, applicability to other customers, security, and performance”
- “Every major and minor release... goes through rigorous functional testing by an internal QA team, as well as UAT is performed by customers.”
- “provides a non-production environment that is used for actual integration interface testing.”
- Major/minor releases “goes through internal and external security testing. The external security testing is performed by various vendors that are geographically located.”

Alternative Funding Models: No response provided.

Contract Transition and Flexibility, pg. 11: May need to revisit this if Icertis has any Political Subdivision customers. NEGOTIATIONS

- “not applicable as Icertis has just launched our Public Sector group and do not currently have an existing State Government contract.”

Functional Requirements – pg. 11-15:

General Functionality, pg. 11: Generally meets req'ts for CLM purposes.

- “comprehensive Contract Intelligence solution that manages the complete lifecycle from authoring, negotiation, approval, execution, compliance, risk, and expiry.”
- “delivers a comprehensive rule engine”
- “has a configurable design and architecture that allows customers to setup their own contract types and related metadata”
- “no restrictions on setting up the objects, relationships, folder structure and related attributes.”

RTM

- POTENTIAL WEAKNESS, GEN-3: Integration must be put in place to publish Solicitation to State website.
- POTENTIAL WEAKNESS, GEN-5: Integration must be put in place to publish Contract to State website.
- STRENGTH, GEN-17: System can be deployed as either a Single or Multi-Tenant model.

- NOTE, GEN-21: Commodity Code version updates will be the responsibility of the Participating Entity, not Icertis.
- Nine req'ts need clarification.

Supplier Portal, pg. 12/13: Meets req'ts.

- Collaboration Portal App
 - o "Third-party, self-service registration and automatic onboarding"
 - o "Step-by-step wizard to assist parties in bidding and contract negotiation events"
 - o "Post-execution functionality allowing users to submit SLA reports, compliance data and documents, action obligations, and transaction data"
 - o "Flexible dashboard customizable by users to their individual needs and preferences"
 - o "Flexible dashboard configuration options to grant external parties secure, role-based access to data, actions, and processes"
 - o "Electronic communication with third parties, including the ability to exchange redlines and view all past communication"
 - o "Third-party initiation of contracts, renewals, and amendments within an organization's guidelines"
 - o "Real-time notifications and alerts at each stage of the contract lifecycle data and documents"

RTM

- POTENTIAL WEAKNESS, SPR-19: Must integrate with a 3rd party tool (not included) for Admin fee payment submission.
- N/A, SPR-21
- N/A, SPR-22
- No req'ts need clarification

Supplier Enablement/Management, pg. 13/14: Meets req'ts for CLM purposes.

- "manage end-to-end supplier onboarding, performance management, contract governance, compliances, and disengagement."
- "visibility into supplier risk and ensure compliance across the source-to-contract process"
- ICI SRM app figure, pg. 14:
 - o "Supplier Selection & Segmentation"
 - o "Supply Onboarding"
 - o "Supplier Qualification"
 - o "Supplier Performance & Management"
 - o "Supplier Information Management"
 - o "Supplier Risk, Diversity & Compliance Management"
 - o "Supplier Dis-engagement"

RTM

- POTENTIAL WEAKNESS, VDR-43: System does not have pre-qualification concept for specific categories of goods/services as req'd with an application separate from registration.
- Three req'ts need clarification

Buyer Portal –No narrative response provided, however based on RTM responses meets req'ts for CLM purposes.

RTM

- Two req'ts need clarification.

Need Identification – N/A

Request through Pay – N/A

Catalog Capability – N/A

Sourcing/Bid Management, pg. 14: Partially meets req'ts.

- "pre-approved templates for RFIs, RFQs, and RFPs with multi-currency, multilingual support."
- "initiate requests using an intuitive self-service request process."
- "Excel-based Bid Evaluation and Selection", "side-by-side analysis of bids or proposals and score them using both qualitative and quantitative criteria"
- "multiple RFx rounds either sequentially or in parallel to negotiate prices and shortlist best suppliers. Initiate the awarding process based on specific rounds".
- "built-in rules engine to automatically associate key information to RFx events"
- "Configure different workflow approvals for different types of sourcing events."
- "dashboards to get directional insights into RFx cycle time, supplier risk, or contractual obligations"
- "contract terms and clause recommendations"
- "Suppliers can also self-register, or submit bids and proposals with an Excel file"
- "Search across sourcing and contract repositories from single full text or a structured search capability."

RTM

- CONCERN, 94 responses simply stated "Supported" without providing details to assess the system capabilities.
- POTENTIAL WEAKNESS, SRC-28: System does not have an online collaboration/messaging tool within a solicitation to collaborate with solicitation participants.
- POTENTIAL WEAKNESS, SRC-83: System does not have a webinar feature. Must integrate with an external system.
- CONCERN, SRC-113: "Excel-based collaborative scoring" may mean that scoring is not a system feature and must be done outside the system in Excel.
- POTENTIAL WEAKNESS, SRC-128: System does not have an online collaboration/messaging function for collaborating within a solicitation.
- POTENTIAL WEAKNESS, SRC-130: System does not have an online collaboration/meeting function for a solicitation evaluation panel to communication to each other.
- NOTE, SRC-147: Response indicates "supported" for for posting a notice on State website however the response to GEN-3 explains that this requires an integration with the State website.
- Five req'ts need clarification.

SME DEPARTMENT/STATE: NASPO

Contract Management, pg. 15-19: Meets req'ts.

- "Smart Contract Initiation capability"
- "auto route requests to legal for complex and/or high-risk contracts"
- "business users creating contracts in a self-service mode"
- "capability to setup clauses, templates, and business rules, that govern the process of contract creation"
- "contract creation API that can connect into the sell-side and buy-side processes to take input and auto build a contract"
- "intuitive request forms... correct capture of data and documents, workflows it through the review process, and identifies the right expert or group to send it to"
- "MS Excel based bulk contract create capability... auto create contracts in bulk and push the output to external systems. The utility supports intake of contracts in different lifecycle statuses, along with supporting documents"
- Clause Management, pg. 16
 - o "standard approved language from the clause library"
 - o "manage fallbacks and dependents, making language mandatory for certain contracts, support for localization, deviation tracking, clause approval workflow, and version management"
 - o "tracks clause usage in templates and agreements for deeper insights on clauses."
- Template Management, pg. 16, STRENGTH
 - o "template lifecycle management capability... based on template selection rules."
 - o "Template authoring in MS Word using Icertis Word Add-in, allows library clauses to be pulled into the document, entry of custom text, tagging of metadata in the document, and the tagging of exhibits/annexures etc."
- Contract Authoring, pg. 16/17
 - o "rules engine to dynamically create contracts from templates and clauses, by assembling the content automatically"
 - o "driven by any criteria associated with the contract such as region, products and services, price terms, etc"
- Commercial Terms Management, pg. 17
 - o "del all the commercial terms associated with the increasingly complex contracts in"
 - o "capture products and services, price lists, prices and discounts, tiered discount terms, rebates and incentives, and related terms that are associated with the contracts"
 - o "with other enterprise systems via APIs to drive compliance"
- Negotiations/Collaboration, pg. 17
 - o Third Party Collaboration: "Third parties can access their contracts online, submit contract redlines, review their contracts, upload compliance documentation, get alerts, and update obligation assignments. Icertis also supports an email-based collaboration process with ability to automatically upload emails and attachments to the system"
 - o Redlines/Version Mgmt: "automated ability to identify content changes in documents. Redlines are saved as a new version and evaluated for impact on the approval workflow."
 - o Negotiation Intelligence: "enables smart visibility into the repository to lookup similar contracts to help facilitate the negotiation process"
- Workflows/Approvals/Reporting, pg. 18
 - o Dynamic approval workflow: "Rule based workflow... leverage all the data associated with the contract". "supports sequential and parallel approvals, with dynamic changes"

Accessibility Requirements – No response provided

Audit Trail and History, pg. 13/22 & TECH-1 thru 5: Minimal narrative response provided but based on RTM responses, meets req'ts.

- Pg. 13: "each step and modification tracked for a full history and audit trail."
- Pg. 22: "detailed audit history and monitoring capabilities give unique insights"

RTM

- Meets req'ts.

Browsers Supported – No response provided except in regards to Mobile Devices (pg. 5)

User Accounts and Administration, pg. 22, Attachment D & TECH-6 thru 20: Minimal narrative response provided, however based on RTM responses meets req'ts.

- "comprehensive Role Based Access Control (RBAC) system governs access to contract data at a granular level based on user roles and access permissions"
- "Attachment D - ICI_Authentication_Authorization_Overview" document: additional details provided.

RTM

- NOTE, TECH-8: Regarding transacting on-behalf of another user, per Attachment D there is a "Matrix" concept to assign a user to "multiple security groups and organization paths" which would achieve the on-behalf of req't.
- POTENTIAL WEAKNESS, TECH-9: To process a transaction on-behalf of another user that user must delegate "the task" to the other user.
- POTENTIAL WEAKNESS, TECH-11: System does not provide the capability to delegate Admin functionalities to a lower level of the organization to manage only their users.
- WEAKNESS, TECH-13: There is not a separate role concept for Super User. The user must be a System Admin.
- NOTE, TECH-14: Regarding transacting on-behalf of another user, per Attachment D there is a "Matrix" concept to assign a user to "multiple security groups and organization paths" which would achieve the on-behalf of req't.
- Two req'ts need clarification

User Authentication, pg. 22, Attachment D & TECH-21 thru 25: Does not meet req'ts.

Minimal narrative response provided. WEAKNESS, system does not have it's own user authentication functionality. Must be integrated with a Participating Entities own "Identity Provider" system.

- "supports client specific Identity Provider for user authentication, and to provide single sign-on capabilities using SAML 2.0, Oauth, OpenID, or WS-Federation."
- "Attachment D - ICI_Authentication_Authorization_Overview" document, pg. 5/6: additional details provided.

RTM

- WEAKNESS, TECH-21 through 24: System does not have its "own native authentication mechanism" for user authentication. Must use "customer's Identify Provider".
- No req'ts need clarification.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

SME DEPARTMENT/STATE: NASPO

Federated Identity Management, pg. 22: Meets req'ts.

- "provide single sign-on capabilities using SAML 2.0, Oauth, OpenID, or WS-Federation."

Data Conversion, pg. TECH-26 thru 34: Meets req'ts.

- STRENGTH, Pg. 8: "Automatically convert images, tabular data, and a variety of PDF documents into text using advanced optical character recognition (OCR) capabilities."
- Pg. 16, "Bulk Create Contracts": "utility supports intake of contracts in different lifecycle statuses, along with supporting documents"

RTM

- Meets req'ts.
- One req't needs clarification.

Interface and Integration, pg. 22/23, Attachment C document & TECH-35 thru 60: Meets req'ts.

- Pg. 22/23: "offers pre-built Adapters for integration scenarios with SAP, Oracle, Workday, Ariba, and Coupa."
- Pg. 23:
 - o "has its own robust, generic integration framework capable of integrating with any system using various secured integration options provided by the platform for inbound and outbound integrations for data push or pull. ICI is an API first platform."
 - o "platform provides REST APIs with bulk data import and export capabilities. The platform is also capable of calling SOAP services or REST APIs provided by customer landscape system for data push or pull."
 - o "also supports Asynchronous Message Driven Architecture to achieve downstream Integration at a scale with Publish / Subscribe model using other middle wares like Kafka Service Bus, Mule Soft Service Bus, IBM MQ etc"
 - o "various connectors to connect with ERP systems like (Oracle/SAP), CRM's such as SFDC and Microsoft Dynamics. In addition to that the platform also provides out-of-the-box integration capabilities with Coupa, Workday, Box, Thomson Reuters, D&B etc. using connectors"
 - o "platform also supports low friction integration using iPaaS (Integration Platform As A Service) frameworks like MuleSoft, Azure iPaaS, Dell Boomi etc"
- Additional details and diagrams: "Attachment C - ICI Integration Capabilities" document

RTM

- Meets req'ts.
- N/A, TECH-41 (P2P)
- N/A, TECH-43 (P2P)
- N/A, TECH-46 (P2P)
- N/A, TECH-48 (P2P)
- N/A, TECH-49 (P2P)
- N/A, TECH-50 (P2P)
- N/A, TECH-55 (P2P)
- N/A, TECH-59 (P2P)
- Two req'ts need clarification.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icertis

CATEGORY #(s): 3

DATE: 12/28/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Office Automation Integration, pg. 5 & TECH-61: Meets req'ts. STRENGTH

- Pg. 5: "integration with MS Office suite. Work in MS Word to setup templates, draft and review agreements while connected to the system to access the clause library and sync data with the system. Leverage the MS Excel add-in for bulk updates and actions on agreements and associated documents. Integration with Outlook enables automated intake of emails and attachments."

RTM

- Meets req't.

Mobile Device Support, pg. 5 & TECH-62: Meets req'ts.

- Pg. 5: "Icertis also enables touch friendly web access to the system on all mobile devices and tablets with browser support across IE, Chrome, Safari and Firefox"

RTM

- Meets req't.

Mobile Applications, pg. 5: Meets req'ts

- "The Icertis Contract Intelligence mobile apps enable users to get push notifications on tasks, view dashboards, search and view contracts and associated information, take approval actions, update notes, take actions on commitments etc."

Data Ownership and Access – No response provided.

Date Retention, Archive and Purge Considerations, TECH-63: Per RTM response, meets req'ts, however no narrative response provided.

RTM

- TECH-63
 - o "all data is retained till end of an engagement."
 - o "No data is hard deleted" "All data is soft deleted."
 - o "Icertis can archive data and apply customer's archival policies for contract data archival if required."
 - o "For purging, Icertis has a data purging policy in place which can be customized as per customer requirements."
 - o "Logs are purged every 90 days."

Disaster Recovery Plan, pg. 23 & Attachment A: Meets req'ts.

- "To handle any disasters, Icertis has BCP and DR plans in place. As part of the standard service, it offers a RPO of 24 hours and an RTO of 8 hours. More stringent SLAs are available at additional cost if that is required."

Solution Environments, pg. & TECH-64 thru 68: Does not meet req'ts.

- Per RTM responses, only two environment, "non-production and production", are provided. The req'd Development and Training environments are not provided.

- WEAKNESS, TECH-64 through 67: System has only one environment for both Testing and Training.
- No req'ts need clarification.

Solution Technical Architecture, pg. 21-23 & Attachment B: Meets req'ts.

- Pg. 21,
 - o "platform allows for extreme scalability and is routinely tested for scalability and performance"
 - o "High-level architecture diagram" provided
- Pg. 22:
 - o "Key application components are implemented as loosely coupled services and are individually scalable to form the basis of a Service Oriented Architecture"
 - o "platform interface is built fully on the Icertis API. The business and mobility services layer provide an API driven service interface for the UI framework on all form factors, including smart phones."
- Pg. 23:
 - o "All services are configured in such a way to ensure no single point of failure due to unavailability"
 - o "Microsoft will be the hosting provider and the ICI platform uses PaaS services from Microsoft."
- "Attachment B - ICI Architecture & Deployment" document, pg. 2
 - o "Highly configurable platform with over 200 out-of-the-box APIs."
 - o "Architected natively on the Cloud with deployment flexibility, high security & scalability. Host on client subscription, store data on client network, Bring Your Own Keys (BYOK) for encryptions."
 - o "Offered in single and multi-tenant deployment model. Deployment support for Azure Government cloud including those workloads covered by The DoD Cloud Computing Security Requirements Guide"
 - o "API first, integration first approach – Easy to integrate with enterprise-wide applications."
 - o "Asynchronous Message Driven Architecture to achieve downstream Integration at Scale with Publish / Subscribe model."
 - o "Intelligent Storage – Distributed Storage to address data Residency, Security and Compliance Requirements."
 - o "Security Development Lifecycle (SDL) across development, deployment and support and is ISO/IEC 27001 certified."

Solution Network Architecture, pg. 21 & Attachment B: Meets req'ts.

- Pg. 21: "cloud native software solution completely architected and built in the Microsoft Azure Government cloud platform"
- "Attachment B - ICI Architecture & Deployment" document, pg. 4... Network diagram

System Development Methodology – No response provided.

Service Level Agreement, pg. 21/23: Does not meet req'ts. Response did not provide the review/comment on the RFP SLA and did not include a copy of their own SLA.

Individual SME Comments:

Contract life cycle tool – authoring.

No eprocurement or marketplace functionality.

(Proposal content cut and pasted from previous response to a university - KSU.)

General Principal and Requirements

- Key Solution Functionality Elements – P3 *complete lifecycle from authoring, negotiation, approval, execution, compliance, risk, and expiry.* (
 - rule engine to orchestrate zero touch contract lifecycle processes
 - enhanced rule based proactive monitoring mechanisms to improve compliance on all dimensions – statutory, policy, and process
 - P4 web service APIs allow integration with other enterprise systems like ERP, CRM, Sourcing platforms
 - Contract Risk Management – SLAs, past performance, external e.g.D&B
- User Experience – p5, mobility support; MS office integration.
 - *configure the system to present the contract information relevant to the context of the user*
 - *Role based dashboards give real time visibility into key metrics*
 - *configure dashboards to track contract lifecycle, contract statistics*
 - *create new dashboard metrics and personalize the dashboard*
 - *Work in MS Word to setup templates, draft and review agreements while connected to the system to access the clause library and sync data*
 - *MS Excel add-in for bulk updates and actions on agreements*
 - *Integration with Outlook enables automated intake of emails and attachments*
 - *touch friendly web access to the system on all mobile devices and tablets*
- Bidder Best Practices and Roadmap
 - P7 *release every quarter, as well as two major and two minor releases in a year.*
 - Release webinars (4/yr); customer meetups.
- Innovations and Value-Added Features/Services –
 - P8 Discover AI - *discover attributes and clauses, and surface them in the ICI platform; matching contract language in legacy and third-party contracts to library clauses using fuzzy matching techniques to see comparison with company's standard terms.*
 - Image/PDF conversion; export structured data; identify risky clauses/overall risk score.; bulk contract actions.
 - P9 Negotiate AI - *analyze high volumes of contracts, understand their component terms and clauses; create clause deviations to ensure compliance and improve business velocity. The app works as a plug-in for Microsoft Word to seamlessly surface these insights*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icertis

CATEGORY #(s): 3

DATE: 1/23/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *breaks down any contract into its component clauses and attributes for fast analysis*
 - *Enables users to update contract language and terms based on best practices from similar contracts or from past deals negotiated with the same counterparty*
 - *Compares similar clauses with easy-to-understand redlined differences, reducing the time required for manual review.*
 - *and discover the patterns and relationships that exist within contract attributes such as names, places, and organizations.*
- Customizations/Extensions – SDLC-based coding practices; rigorous compatibility review.
 - *P11 Each release goes through rigorous functional testing by an internal QA team, as well as UAT is performed by customers. Every integration is tested with mock data. Icertis provides a non-production environment that is used for actual integration interface testing.*
- Alternative Funding Models – **Skipped in response.**
- Contract transition – N/A – no existing state government contracts.

Functional Requirements

- General Functionality – P11 *authoring, negotiation, approval, execution, compliance, risk, and expiry*
 - *configurable design and architecture that allows customers to setup their own contract types and related metadata*
 - *no restrictions on setting up the objects, relationships, folder structure and related attributes*
 - *EPORC-GEN-26-27 – No payment processing; can be configured for some payment tracking.*
 - *EPROC-GEN-32 – browser-based translation.*
- Supplier Portal
 - *EPROC-SPR-1 collaboration Portal through which suppliers can natively manage all aspects of onboarding, sourcing and contracting. This Portal does not extend to cover P2P functionality. Icertis can however integrate with P2P systems*
 - *P12 Step-by-step wizard to assist parties in bidding and contract negotiation events*
 - *P12 Post-execution functionality allowing users to submit SLA reports, compliance data and documents, action obligations, and transaction data*
 - *Electronic communication with third parties, including the ability to exchange redlines and view all past communication*
 - *Third-party initiation of contracts, renewals, and amendments within an organization's guidelines*
 - *Real-time notifications and alerts at each stage of the contract lifecycle*
 - *EPROC-SPR-3 suppliers have the ability to self-register and self- maintain their account. Supplier information from the eProcurement system can also be linked*
 - *EPROC-SPR-19 integrate to process 3rd party payments such as administrative fees.*
- Supplier Enablement/Management – P13 *Create specific templates and workflows for your vendor processes with each step and modification tracked for a full history and audit trail*
 - *documents, forms, and vendor related information will be associated and stored together for easy access, review, and modifications*
 - *documents, forms, and vendor related information will be associated and stored together for easy access, review, and modifications*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icertis

CATEGORY #(s): 3

DATE: 1/23/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *visibility into supplier contracts and total contract value.*
 - *integrated supplier portal that enables ongoing collaboration with suppliers to ensure compliance with organizational policies and regulations,*
 - *EPROC-VDR-39 – CF- robust REST API library that enables easy integration with external systems like the eProcurement system. It allows for data visibility within Icertis supplier portal. Integrations can be setup as bi-directional to feed data into Icertis supplier portal or out of the supplier portal; can mark metrics on supplier scorecard.*
 -
- Buyer Portal – **No narrative for this section; RTM submitted** with all requirements listed as standard.
- ~~Need Identification~~
- ~~Request through Pay~~
- ~~Catalog Capability~~
- Sourcing/Bid Management
 - *P14 - pre-approved templates for RFIs, RFQs, and RFPs with multi-currency, multilingual support. Enable business users to initiate requests using an intuitive self-service request process. P15. -Excel-based bid evaluation and election: Perform side-by-side analysis of bids or proposals and score them using both qualitative and quantitative criteria.*
 - *Multi-round RFx negotiations supported.*
 - *P15 visibility into supplier risk and ensure compliance across source-to-contract process. Leverage built-in performance dashboards to get directional insights into RFx cycle time, supplier risk, or contractual obligations.*
 - *Cognitive Sourcing Intelligence (?) Analyze deviation as a part of the bid analysis. Initiate legal contracts based on RFx awarding.*
 - *Enable suppliers to participate in RFx bidding with an integrated supplier portal. Suppliers can also self-register, or submit bids and proposals with an Excel file*
 - *EPROC-SRC-81 – When solicitation is modified all buyers automatically notified by email.*
 - *EPROC-SRC-83 – integration to web hosting platform and storage of video. (not specific on how it would integrate.)*
 - *EPROC-SRC-149 Icertis provides a central repository to stores all documents and solicitation related information.*
- Contract Management – Self-service option: business users creating contracts in a self-service mode. Improves cycle times, reduced legal costs. *ICI capability to setup clauses, templates, and business rules, that govern the process of contract creation by business users*
 - *RTMs all supports or config.*
 - *P16 no-touch contract creation within your internal systems like CRM, solicitations, or procurement, by leveraging the Icertis contract creation API that can connect into the sell-side and buy-side processes to take input and auto build a contract for the user based on the business rules defined*
 - *bulk API can also be leveraged to auto create contracts in bulk and push the output to external systems. The utility supports intake of contracts in different lifecycle statuses, along with supporting documents*
 - *contract standardization for reduced risk with the usage of standard approved language from the clause library.*

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Icertis

CATEGORY #(s): 3

DATE: 1/23/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *template lifecycle management capability that drives contract creation based on template selection rules. Template authoring in MS Word using Icertis Word Add-in, allows library clauses to be pulled into the document*
- *Configure the data model to capture products and services, price lists, prices and discounts, tiered discount terms, rebates and incentives, and related terms that are associated with the contracts. Easily assemble them in contract documents, integrate with other enterprise*
- *P18 Onboard third parties on the portal with a secure registration process to not only collaborate on contract negotiations but allow self-service profile maintenance and contract administration; maintenance and contract administration. Third parties can access their contracts online, submit contract redlines, review their contracts, upload compliance documentation, get alerts, and update obligation assignments*
- *Redlines are saved as a new version and evaluated for impact on the approval workflow. The system then ensures that the exceptions get routed through the right review process; two-way sync between the system and the contract document that ensures integrity between the system and the document.*
- *Users can access the library content while reviewing negotiated clauses, or access related agreement content, such as the master agreement clauses, while reviewing the statement of work.*
- *Dynamic approval workflow - system automatically assembles the workflow and orchestrates the approval process. The system supports sequential and parallel approvals, with dynamic changes to workflow based on negotiation updates to ensure governance.*
- *out of box integrations to electronic signature platforms*
- *P20 Consolidate all contracts into a single enterprise wide repository to enable a single source of truth.*
- *P20 Contract Admin: administration capability includes contract close-out processes, termination checklists, notices etc. for full end to end management.*
- *modifications can be amendments to clauses and terms of the contract. Icertis enables the definition of templates, clauses, and attributes, specific to types of amendments. The platform also provides deep capabilities to handle modifications to contract related execution aspects like delivery schedule*
- **Vendor Performance – No narrative provided. RTMs submitted.**
 - *EPROCVPE-13 Supplier performance is calculated based on performance evaluation criteria. Performance data is typically imported from a source system e.g. ERP system and performance scores can be calculated using the evaluation criteria.*
 - *Example of supplier score cards include factors related to pricing, payment terms, quality, ease of communication, flexibility, on time delivery etc.*
- **Purchasing/Data Analytics – P20 system enables insights on cycle times, deviations, risks, statistics (expiry, renewal, pending, etc.), procurement, with sales business metrics on contract revenue/spend, savings**
 - *default reporting capabilities that can be tailored to client needs, with new reports able to be easily created during or after the implementation. The Icertis platform also enables on-the-fly reporting, leveraging the search infrastructure. Personalized searches can be saved and exported to Excel*
 - *All RTMs configurable.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- "Infosys Public Services (Infosys) has partnered with SAP and Ernst & Young LLP (EY)"
- "full implementation experience for modern governments such as the Florida State Board of Administration & Public Services and Procurement Canada" (pg. 5, 11)
- "process design methodology anchored in the use of our proprietary "Collaboration Hub" approach that accelerates consensus building across disparate stakeholder groups." (pg. 6)
- "we have experienced resources and functional/process experts in eProcurement, who have delivered e-Procurement implementations of similar size and complexity to engage with the State." (pg. 6)
- "Over a decade of experience with over 100+ Ariba project implementations at the world's largest public and private sector organizations (including Fortune 500 Companies)." (pg. 9)
- "a team experienced through 100+ SAP Ariba and public sector technology deployments." (pg. 11)
- "Early ROI with UpStream and DownStream modules implementation in parallel. UpStream modules like Source to Contract go live within 6 months and DownStream modules Procure to Pay in parallel and within 9 months from start of the program" (pg. 11)
- "EY's large scale procurement transformation experience together with Infosys' implementation and managed services expertise" (pg. 12)
- Infosys Public Services "helps federal, state and local, provincial, municipal, and government organizations renew existing systems and build new capabilities". 11+ years in business. (pg. 13)
- "Gartner has placed Infosys in the LEADERS QUADRANT for SAP Implementation Services worldwide" (pg. 15)
- "Forrester recognizes Infosys as one of the top, largest global, SAP Service Providers" (pg. 15)
- "Infosys has a mature SAP ARIBA practice with over 250 consultants that have completed +80 engagements for 25+ clients over the last 20+ years." (pg. 15)
- "extensive experience across all ARIBA major releases - 7.0.2, 7.0.4, 7.0.6, 7.1a, 8.2.2, ASM 4 all the way up to 9R1 and ARIBA On Demand source-to-pay modules (ARIBA 10S2, 12S2 and 13S2, 14S2 and the latest CI versions)" (pg. 15)

- “services in all areas including Consulting, Implementation, Maintenance, integration with external system or ERPs across all modules of Ariba Spend Management suite” (pg. 15)
- Figure 3 **does not** list any U.S. State or Local Gov’t “representative” Ariba engagements.
-

2. Previous Projects

- **Public Services and Procurement Canada:** Ariba “e-sourcing, contract lifecycle management, spend analysis, supplier relationship management and e-purchasing through catalogues”, Public portal, Azure Identity/Credential/Access management services and Service Desk services. Partnered with Ernst & Young and SAP for implementation. 2018-2023 contract. *Full Suite eProcurement implementation.* (pg. 17)
- **Eversource Energy:** Infosys implemented Ariba Sourcing, Contracts, Supplier Information/Performance Management, Catalogs, Spend Visibility and Commerce Automation/Dynamic Discounting. 2015-2017 contract. *Full Suite eProcurement implementation.* (pg. 18)
- **Zoetis Inc.:** Infosys implemented Ariba Sourcing, Supplier lifecycle performance, Buying, Guided buying, Cloud Integration Gateway, Fieldglass and Supply Chain collaboration. *Not a Full Suite eProcurement implementation.* (pg. 20)
- **Chicago Public Schools:** Ernst & Young provided “assistance” with Category management, project management and change management. March – Nov. 2016 (pg. 21)
- **California Dept of Healthcare Services:** SAP “deployed the complete SAP Ariba procurement platform”. *Full Suite eProcurement implementation.* (pg. 22)

3. Subcontractors

- **Ernst & Young LLP:** (pg. 23/24)
 - i. Ariba SAP practice, “last three years, EY has completed Ariba implementations for 19 clients (62 modules) averaging 60,000 employees (or citizens) and \$5–6 billion in indirect spend in 37 countries”.
 - ii. Won SAP Ariba NA Services Partner Pinnacle award
 - iii. “Leader position in Gartner’s Magic Quadrant and IDC MarketScape for SAP Implementation Services”.
 - iv. Deployed Ariba to “more than 100 organizations”
 - v. 900K+ users enabled/trained
 - vi. \$85B+ spend enabled in Ariba deployments
 - vii. Ariba public engagements include New York Power Authority and Gov’ts of Canada, Ontario, & Toronto.
- **SAP:** (pg. 27/28)
 - i. SAP serves over 400K customers in over 180 countries
 - ii. Will provide “advisory services” to Infosys

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Infosys

CATEGORY #(s): 3

DATE: 8/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- iii. "SAP Ariba SMEs will take part in the business requirements analysis, to perform assessments along with Infosys on how the requirements can be met and identify potential risks and mitigations actions" and "will also take part in key design planning activities and functional and technical design workshops".
- **Allied Digital Services LLC:** (pg. 29)
 - i. No mention of this company in the Overview of the Organization section.
 - ii. Based on the description of this company as a subcontractor it appears that they will be providing a role of some sort as a Help/Service Desk.
 - iii. "currently handle over 2.5 million contacts per year for End User Support globally.
 - iv. "our processes to ensure customer satisfaction with 99.9% SLA adherence."
- 4. Organizational Chart
 - Did provide both State and Contractor organization charts for an engagement/project.
 - While project oriented, the org charts only provide high level detail of the core areas of work without staffing detail.
 - Table 3, Infosys Team & Table 4, State Team: the details documented do fit the typical areas of work that would be needed for an implementation.
- 5. Litigation
 - No litigation.
- 6. Financial Viability
 - The provided D&B Summary Page provided shows a summary rating of "Low" risk. (pg. 35).
 - Audit reports for both Infosys show that they are profitable (pgs. 36-51)

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Infosys eprocurement system (SAP, Azure identity management, AWS, Servicenow)
 - Ernst and Young deploy SAP Ariba
 - Partner with Ernst and Young and SAP.
 - Identified possible project risks.
 - >100 SAP deployments
 -
2. Previous Projects
 - Public sector – expansive includes sourcing/CM – Florida
 - California Department of Healthcare Services.– strategic sourcing, buying and invoicing. (*Infosys also lists this project.)
 - Private sector – extensive.
 -
3. Subcontractors
 - E&Y
 - SAP
 - Allied Digital Services (ADSL)
4. Organizational Chart
 - High level org chart Customer Role and Infosys project team.
 - Detailed role description.
 -
5. Litigation
 - None listed.
 -
 -
6. Financial Viability
 - D&B low risk

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 3/4)
 - Founded in 2000
 - “Over the last two years Ivalua continued to invest and focus on the public sector by establishing a dedicated Public Sector Practice and fully dedicated team.”
 - Public Sector team includes “Product Development staff” to “enhance current solution to support public sector” and “develop new products”.
 - “We view our investment and focus on the Public Sector” to “ensuring our Public Sector customers achieve their goals and objectives”
 - Gartner Magic Quadrant
 - i. Sourcing Applications: 2015, 2017, 2018
 - ii. Procure-to-Pay: 2019, 2020
 - Forrester Leader
 - i. Supplier Risk/Perf Mgmt: 2018
 - ii. E-Procurement: 2019
 - iii. Source to Contract: 2019
 - World Procurement Awards “Best P2P Solutions Specialist Provider”: 2019, 2020
2. Previous Projects
 - City of New York: “Full-suite Ivalua implementation”, “SRM, eSourcing, Contracts & Catalogs, eProcurement, Invoicing and Business Intelligence”. Included SSO and Supplier integration with finance system. (pg. 5)
 - State of Maryland: “Ivalua’s complete platform”, “1.) Public Portal, 2.) Supplier Management, 3.) Solicitation to Bid Management, 4.) Strategy & Analytics, 5.) Contract Management, 6.) Procurement, and 7.) Invoicing”. “Stood-up within 4.5 months”. (pg. 5/6)
 - State of Ohio: “Initial deployment” to “12 early adopter agencies” of full suite with “21 key integration points”. Maintaining the solution for 130 State Agencies, 24 Cabinet Agencies and 12 Early Adopter Agencies. (pg. 6)
 - State of Alabama: “Selected Ivalua’s Source to Pay solution because of the flexibility of configuration, and the reporting and dashboard functionality”. (pg. 7)
 - Los Angeles Dept of Water/Power: “First phases of the project were implementing the Solicitation and Supplier Information Management solution which is part of the Ivalua full Source to Pay platform”. (pg. 7)

3. Subcontractors

- No subcontractors.
-
-

4. Organizational Chart

- Organization chart does represent an implementation project and includes both State and Contractor positions. Though generic it does reflect core/key positions.

5. Litigation

- No litigation.

6. Financial Viability

- D&B report not provided. RFP required "3 most recent" Financial Statements but Ivalua only provided 2018 & 2019 reports. Don't know if 2020 hasn't been completed but do note that the 2018 report does show 2017 values (noted below).
- **2017:** "Net Income" shows positive 1.192M euros (pg. 20). "Closing cash position" was 29.599M euros (pg. 22)
- **2018:** "Net Income" shows loss of 870K euros (pg. 20). "Closing cash position" was 31.405M euros (pg. 22)
- **2019:** "Net Income" shows loss of 7.615M euros (pg. 29). "Closing cash position" was 74.829M euros (pg. 31)

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements, pg. 3-7 :

- Single Point of Entry: "has a single landing page when a user logs in. At this point user/profile-specific content is displayed." (pg. 3/4)
- Smart Routing: "Workflow routing is attached to any object in the system". "determine the workflow routing based on business rules for each object." (pg. 4)
- Compliance: "lvalua understands that each organization has their own procurement code they must follow". System has the "flexibility to tailor the solution to meet the needs of individual public organizations" with a "robust configuration layer that allows organizations to add new fields, tailor business rules, add alerts, and managed workflow for your organization". (pg. 5)
- Portal: "they will have one place to manage all their activity and actions throughout the procurement lifecycle". "configurable homepage dashboards, users will be able to quickly see and take action on pending tasks. They will also have the ability to personalize this page to meet their needs". "collaboration tools such as internal blogs, discussion forums, and comments through the process". (pg. 5)
- Open Marketplace Environment: "find it no matter if it is from an internal catalog or an external supplier catalog". "accommodates hosted catalogs (catalogs managed by the organization), punchout catalogs (catalogs managed by retail sites)". "powerful search 360 functionality" which allows "search hosted and punchout catalogs side by side". (pg. 5)
- Integration: "robust integration toolbox capable of connecting with multiple ERP solutions, third-party data providers, suppliers' systems and so on.". "multiple format options (cXML, XML, SAP Idocs, XLS(x), DOC(x), CSV, AS2, etc.) and in multiple protocols (manual load, batch load, EDI, SFTP, HTTP, etc.)". "includes hundreds of data mapping formats and standard integration templates". (pg. 5/6)
- Workflow: "workflow allows for easy work queue / process management and rule-based assignments.". "Client administrators are given latitude within the tool to adjust approval thresholds and approval assignments without needing to configure". (pg. 7)
- "over 50 different controls per workflow step including even the specific notification methods and addressees and "callback" support that can be used to invoke scripted actions like integration web services calls or cross-workflow signaling ". (pg. 7)
- Document Management: "functionality based on a common data model and a unified code base across all source-to-pay solutions". "consistent access to every data element, workflow element, supplier record, document management, UI functionality, and automation component."
- Reporting: "have an analytics layer across all our solution areas (source-to-pay) with numerous out of the box reports and dashboards as well as easy capabilities for users to create their own

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

reports / dashboard". "users can save their personal reports within their own dashboard as well as share with others, as necessary." (pg. 7)

- Configurable: "Coding is not required to make changes to tailor the solution to meet the needs of each client." Create new fields, Change field names, Add tooltips/watermarks/regex, Conditional logic on fields, Mandatory fields, Tailored workflows, contract templates, standard documents. (pg. 6/7)
- Transparency: "public portal allows for suppliers or concerned parties without an account to view all aspects of the procurement process within the solution". "public portal allows for suppliers or concerned parties without an account to view all aspects of the procurement process within the solution."

User Experience, pg. 7/8 : - Response did not address "Wizard-driven capabilities", "Mobile access/use" or "Workload management" to re-assign work.

- "Homepages are unique per profile, but also can be configured by the individual user." "includes quick links and shortcuts to frequently used objects."
- "access their pending workflow tasks directly from their home screen"
- "Each user is given one or multiple roles in the system which is tied to a series of authorizations. These authorizations will dictate what the users can see and do within the solution."
- "Users can also mass reassign their workflow tasks to other users using the delegate function"
- "Users or administrators can also set-up out of office forwarding for users."

Bidder Best Practices and Roadmap, pg. 8-11 : Did not address "constantly assess and recommend opportunities to reduce costs".

- New Releases: "Major Software Product releases are delivered by the Ivalua R&D division twice a year." "Multi-instance SaaS, "client to decide which major version to choose" and "when to upgrade". "Activable Features which enables customers to take advantage of new innovations in their versions without needing to upgrade"
- Latest Technologies: "specific standards that our platform should adhere to for a specific industry, for example, we achieved the security status of being FedRAMP Ready due to our work in the US Public Sector". "leverage advanced technologies such as machine learning, natural language processing (NLP) and more."
- Timely Updates: "Once a customer decides to schedule an upgrade, together with a dedicated upgrade support team, the customer success manager, and our R&D team, we work to ensure that upgrades happen in the timeframe laid out."
- Alternate Approaches: "we have built up significant in-house knowledge on best practices within the public sector". "During the implementation phase, Ivalua together with our partner community will always be there to guide customers towards better, more effective solutions, processes, and approaches, based on our experience." "customers themselves have a high degree of ownership over the solution, to be able to make changes and evolve as needed, without having to rely on us or our partners".
- Roadmap: "We have a dedicated Public Sector team that interfaces with R&D to ensure necessary and innovative Public Sector requirements and functionality are prominently featured on the roadmap.". "Key areas of investment are focused on":
 - o Enhance Mobile experience: Already have "Progressive Web Apps" for "workflow actions, notifications/alerts and more capabilities". "year to improve and enhance this around contracts, invoicing, supplier mobile capabilities. "
 - o Invoice/Payments: "Enabling the ability to execute payments within Ivalua"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o AI powered Contract Lifecycle Mgmt: “leveraging AI” for a “more guided, collaborative, and intelligent experience”.
- o Supplier Risk/Performance: add new features to existing capabilities.
- o Security: Already FedRAMP. “evaluate additional threats and standards (like StateRAMP) to ensure...pursuing the appropriate certifications”

Innovations and Value-Added Features/Services, pg. 11-13:

- Help Desk, pg11/12: Level 1 help desk for suppliers/internal users. CONCERN, response refers to Help Desk as “not contemplated in the RFP” however there are specific req’ts for this in Implementation Services and Managed Services.
- Advanced Services Procurement, pg 12: Contingent labor purchasing. “external labor with an efficient engagement and follow-up channel”. “Talent channels... selection process”. “compliance with policies/legislation... secure re-engagement process”. “full visibility of service quality... full visibility of service quality”. Monitor through “alerts, timesheet, and milestone approvals.”
 - o Service profile RFx types
 - o Configurable profile seniority
 - o Configurable working duration
 - o Work assignment
 - o Time/Material purchase request
 - o Timesheet receiving (hours, days, percentage)
- Expenses, pg. 12/13: “Expense Stream handles the flow of claims and their images into the Payables team”
- Vendor Master Management (VMM), pg. 13) “capture, cleanse and maintain clean and accurate supplier master data” “solution can integrate with various ERPs to consume, aggregate and cleanse data using smart deduplication and merge capabilities before redeploying the pristine and accurate data back to those systems.” **NOTE:** unclear how this VMM is different from the ‘in-scope’ Vendor Enablement and vendor integration work req’d in the RFP.

Customizations/Extensions, pg. 13/14:

- “Ivalua SaaS platform relies on configuration, not custom code”
- “Ivalua does not make coding customizations specific to individual clients; all coding changes on the Ivalua platform are part of their release cycle and are by definition part of the baseline product”
- “Ivalua maintains a copy of the organization’s Ivalua instance.” “upgrades are first applied to that solution, then will be tested, and released, and are subject to the entire cycle of testing, approvals, and quality assurance that is part of our Software Development Life Cycle (SDLC).”

Alternative Funding Models, pg. 14:

- “not proposing an alternative funding model at this time”. “open to discussion”

Contract Transition and Flexibility, pg. 14:

- “willing to enter into good faith discussions with Participating Entities that wish to explore transitioning their current contract “

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Functional Requirements

General Functionality, pg. 15/16:

- "Source-to-Pay suite in the market which includes Public Portal, Supplier Risk & Performance Management, Sourcing, Contract Management and P2P processes, standard integrations and extensive system administration and reporting capabilities"
- **NOTE:** see detailed notes for Service Level Agreement req'ts. The Ivalua Service Level Agreement sets a limit on the total storage for attached documents ("user-uploaded files") which includes all attachments to Requisitions, Orders, Receipts, Invoices, Vendor Accounts, Vendor Improvement Plans, Solicitations, Solicitation Responses, Contracts... all records in the system. This limit is either 500GB or 1 TB depending on the "Service Level" in the contract. **NEGOTIATIONS:** suggest getting both the Services Level set in the Master Agreement for all potential Participating Entities AND getting the storage level increased.

RTM

- "POTENTIAL WEAKNESS, GEN-15: Transaction print formats are based on "the layout of the screen" and to have "additional templates" for printing format requires "additional effort".

Supplier Portal, pg. 16-18:

- "free supplier portal where suppliers may perform self-registration and other activities with their customers"
- "have unlimited suppliers with unlimited users registered to do business"
- "register with basic information such as their tax identification number, email address, and company name to establish an account" then they "will have access to their supplier portal" to "manage all their activity with the organization from an integrated location"
 - o Manage their account information, user roles & users
 - o Submit contract usage reports
 - o Respond to sourcing events
 - o Manage/redline contracts
 - o Upload catalogs
 - o View orders
 - o Create advanced shipping notices
 - o Create invoices
 - o View their performance
 - o Collaborate on improvement plans

RTM

- Meets req'ts
- One req't needs clarification.

Supplier Enablement/Management, pg. 18-25:

- **NOTE,** registration is a two step process. Create basic account for one user, then that Admin user needs to log into the system to set up user roles, other users and complete the rest of their registration information that will be needed to create a supplier record in the finance system and award Contracts/POs to the supplier. Primary capabilities of a Basic registration allows them to managed their account and bid.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: lvalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "conditional logic can be utilized to tailor the registration page to specific information required by type – such as US vs. non-US"
- "Fields captured through the registration process will be tailored to your needs"
- "submits their registration it is processed through an automated workflow". "workflow process and acceptance/rejection criteria will be established by each client"
- STRENGTH: "onboarding progress tracker" provides "quick view into the remaining items required to complete their activation" (pg. 20)
- Integrations "to external systems in batch processes or in real-time to verify profile information or bring in data from external sources"
- Can "maintain and store documents within their profile"(account). "organization can specify specific documents that are required by the supplier to complete their enrollment" (pg. 21)
- "system can track expiration dates of the documents and trigger reminders to both internal and supplier users when those documents are nearing their expiration" (pg. 22)
- "internal users will also be able to manage the supplier's information, activity, risk, as well as their performance" (pg. 24)
- Suppliers update their accounts by submitting a 'Change Request' (pg. 24)
 - o Change requests are auditable/trackable down to the field level
 - o Can be routed to the workflow for internal approval

RTM

- WEAKNESS, VDR-15: Duplicate registrations are not prevented at the time of registration. They are identified as part of workflow, if auto rejected, vendor is notified after the fact, not while completing the registration. Otherwise the State must resolve the duplicate.
- POTENTIAL WEAKNESS, VDR-19, 20 & 24-27: State will have to license the 3rd party system for validating IRS TIN/Name.
- POTENTIAL WEAKNESS, VDR-39: Response seems to indicate a "score carding" feature which may not provide the automated performance reporting on the metrics identified in this requirement.
- Two req'ts need clarification.

Buyer Portal, pg. 25/26:

- "Once the user login they will be directed to their homepage" which has dashboard that is unique to the user based on their role.
- "users can also add new aspects to their homepage or rearrange the webparts on the screen"
- Users are "given one or multiple roles" which has "authorizations" that "dictate what the user can see and do".
- Users also assigned a "perimeter, which corresponds to the agencies/departments/division they support and/or the commodities they support" which will "further limit the user's view into on seeing or editing objects".

RTM

- STRENGTH, BPRT-4: The capability to for users to be able to "change the layout and reports" on their dashboard is a significant benefit to users.
- One req't needs clarification.

Need Identification, pg. 26/27:

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: lvalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "provides users the ability to initiate any procurement action from a single spot through the platform."
- "provides a powerful and flexible workflow engine that not only invokes approval flows, but also provides the ability to invoke processes" that "invoke business processes allows procurement policies and regulations to become part of workflow"
- "will guide the end user to begin any type of procurement activity by clearly identifying and outlining the process and steps that need to be taken"

RTM

- Meets req'ts
- Two req'ts need clarification.

Request through Pay, pg. 27-33: NOTE, response did not address the req't for "access to external retail marketplace products".

- "All purchases within the lvalua solution will begin from a purchase request within the tool"
- "Requests can accommodate multiple types of requests ranging from goods and services, as well as deliverable-based purchases and subscriptions"
- STRENGTH: purchase requests include an "Internal blog to communicate with stakeholders" (pg. 28)
- Workflow (pg. 29)
 - o "uses a combination of algorithms and user approval to navigate through the approvals". "define conditional logic to determine when and who should be approving each requisition"
 - o "can also trigger different workflows to accommodate for varying business processes, as well as trigger different workflows on goods vs. services purchases"
 - o "can also trigger real-time integrations to external systems, such as an ERP at a workflow step, such as checking if budget is available for the purchase"
- "order is transmitted to the supplier through their email, including a PDF version of the order. It can also be extracted and printed". NOTE: Tech Proposal did not address electronic order transmission (EDI/cXML) however this capability was acknowledged in RTM PO-17.
- "Receipts can be created in multiple ways, from a purchase order, from scratch, or from a supplier entered Advanced Shipping Notice". Receipts can be workflowed for review/approval. (pg. 30/31)
- Invoices
 - o "Invoices can be created by PO flip, from scratch, EDI/cXML transmission, OCR capability". (pg. 31)
 - o Invoices are workflowed for review/approval. (pg. 32)
 - o "system will automatically calculate the three-way match based on ordered, received, and invoiced amount, and will display alerts" (pg. 32)
 - o "flexible to accommodate 2-way match if specific commodities do not require a receipt in order to be paid." CONCERN, it may be that 2-way match is decided based on a commodity code which could be too general to fit the situations a State/Entity needs to have supported.
- "Once the invoice is fully reviewed and approved, it will trigger an integration to the ERP for payment". "will push an ok-to-pay file to the ERP"

RTM

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, PRD-7: Purchase requests with a future release date for the Purchase Order required a manual step to release the PO once the date has passed, it is not automated.
- STRENGTH, PRD-8: The capability to communicate/collaborate with other users "under the request document".
- POTENTIAL WEAKNESS, PRD-13: There is no automated functionality that will include text or attachments based on a commodity or other field value.
- STRENGTH, PRD-19: The State will have access to "Ivalua's Design Mode, Workflow Engine and Alerts & Notification toolbox" which will provide the State with self-service capabilities for configuration.
- STRENGTH, WRK-1: The workflow functionality provides both routing rules and approval rules in the single rules engines. Also allows you to build SQL statements to address complex scenarios.
- STRENGTH, WRK-2: The "whiteboard-like" user interface to design workflows.
- STRENGTH, WRK-6: The capability to "include SQL to route requisitions" is significant capability to address exceptions such as the need to have "by-pass conditions".
- STRENGTH, WRK-15: The capability to set up "specific messages" for each step.
- STRENGTH, WRK-22: "State can add fields to be auditable" provides additional flexibility to meet any changes in State audit needs.
- WEAKNESS, PO-15: System does not have the capability to have two versions of a printed purchase order.
- POTENTIAL WEAKNESS, PO-17: eFax of orders "is not currently supported".
- NOTE: Ivalua did not understand that the functionality desired is not the same as bank administration of user Pcards.
- "POTENTIAL WEAKNESS, PC-8: Pcard reconciliation currently can only be provided ""as a customized solution"" with Ivalua's expense module which is not included.
- STRENGTH, RC-17: Fixed asset receiving fields can be available for only "certain types of goods" instead of having to be on the users' receiving screen when they are entering any type of receipt.
- STRENGTH, RC-18: Creation of an "exception" to document an receipt issue and include give "corrective actions".
- Ten req'ts need clarification.

Catalog Capability, pg. 33-35: NOTE, Technical Proposal response did not address the req'ts to "provide access" to "external internet retail or commercial markets of goods/services" or access to "non-contract Suppliers offering goods and services".

- System supports both "internal and external (punchout) catalogs".
- "view catalogs are limited to the user's organization scope" (pg. 33) NOTE: scope = combination of Role/Authorizations/Perimeter/Commodity restrictions assigned to a user.
- Suppliers can "self-service" manage their catalogs by uploading them to the system. Done via excel templates. After upload "system does an automated format check". (pg. 34)
- "routed through an approval process for an internal user to validate" with "side-by-side comparison of old vs. new pricing" (pg. 34)
- "internal users can also upload catalogs on a supplier's behalf"
- "Search 360" (pg. 35)
 - o "predictive and fuzzy search capabilities"
 - o "can also search any field"

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- “item tags” to “provide visual indicators” on search results to “identify preferred, discounted, or emergency items”. Tags can be ‘prioritized’.
- “has the ability to search both punchout and hosted catalog in the same search. Through an API, external catalog results will be brought into the internal Ivalua catalog”

RTM

- STRENGTH, CAT-24: The capability to route catalogs for approval based more than a user having a role as catalog approver or buyer responsible for a contract. Specifically, can route based on "region, cost center, commodity types, etc."
- STRENGTH, CAT-34: The Search 360 functionality will automatically search punchouts sites as well as hosted catalogs to present both results. Otherwise the user has to search Hosted Catalogs in the system and then go to each punchout individually to do their search.
- No req'ts need clarification.

Sourcing/Bid Management, pg. 36-44:

- “solicitation (BPM) type which drives which tabs and parts of the solicitation process are required.” (pg. 36)
- “can accommodate a range of solicitation methods, from very simple quick quote events to multi-phase RFPs with multiple envelopes”. (pg. 36)
- “Suppliers can be automatically added to the invited suppliers list based on the commodity or commodities” and “can be added by searching the supplier database”. (pg. 36/37)
- Documents Tab: can have unlimited number of attachments, “standard organization documents” and “solicitation owner can upload” docs.
- STRENGTH: “Documents can have workflows associated with them and accommodate versioning.” (pg. 37)
- “Bids are protected through Ivalua’s sealed bid functionality” (PG. 38)
- Questionnaires: (pg. 38/39)
 - “questionnaire capability, non-price components can be captured from the supplier”.
 - “Templates can be used”
 - “ability to make a question required, the option to add a comment or attachment to clarify the answer, or to allows more than one response to a question. Conditional logic can also be added to questions to create if-then statements that will determine the visibility of questions based on previous responses.”
- Pricing grids (“item grid”) can have templates to be “automatically applied to the event”. Columns on the grid can be “internal” (only State/Entity user can see) or “external” (Supplier can see). (pg. 39)
- Solicitations have “workflow to approve and release”. Once approved “user can manually send out the solicitation or have it released automatically at the opening date and time”. (pg. 40)
- Public Portal: (pg. 40)
 - “public portal allows users without an account to view open and close solicitation, active contracts and facilitate the submission of public facing forms if needed.”
 - “Ivalua can also integrate to the organization’s website for posting of events.”
 - “public view of the solicitation includes all attributes of the solicitation including general information, documents, questionnaires, and price lists. In addition, the public solicitation page can also post bid tabulations and award posting once the bid due date and time has been reached and an award has been made.”

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: lvalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Responding:
 - o Suppliers can “craft their response within the system or can download the entire solicitation to a zip file to view and response offline if needed.” (pg. 41)
 - o Supplier options: “create proposal from scratch, copy forward a previously submitted proposal, cancel a proposal in progress, withdraw a proposal” (pg. 42)
- Analyze and award: (pg. 43)
 - o “view side by side comparisons of items and qualitative information for two or more suppliers.”
 - o “can also select ‘award strategies’ which will apply a selected algorithm to create the award”
 - o “review their savings tracking that is based on the target and reference price”
 - o Awards have workflow/approvals capability. (pg. 44)

RTM

- STRENGTH, SRC-28: The Discussion Forum feature allowing messaging to "private or public" with "chat in real-time" for auctions.
- POTENTIAL WEAKNESS, SRC-25: No check-in/check-out capabilities for "documents, Terms/conditions and templates".
- STRENGTH, SRC-48: "drag-and-drop capabilities" as the user interface for creating workflows is more effective than other, more common options.
- WEAKNESS, SRC-66: System does not provide a means for a user to add "un-registered Vendors" to the "generated Vendor list" of a solicitation.
- POTENTIAL WEAKNESS, SRC-68: System does not support eFax.
- POTENTIAL WEAKNESS, SRC-76: The system does not OOTB provide capabilities to post to the "State's public procurement website".
- "POTENTIAL WEAKNESS, SRC-80: System does not have functionality to require vendors to provide ""basic"" information when downloading a solicitation document from the public website. Also, eFax is not supported."
- POTENTIAL WEAKNESS, SRC-83: System does not have a means to 'conduct pre-response/pre-proposal conferences'. Users would have to provide a link to a external webinar system that is not part of the eProcurement system.
- WEAKNESS, SRC-105: System does not provide notifications to vendors when submitting a response to a "set-aside solicitation and they are not a certified MBE".
- Seven req'ts need clarification.

Contract Management, pg. 44-48:

- “contract record within lvalua captures all aspects of contract information, documentation, activity, and performance within the single record.” (pg. 45)
- “system will automatically trigger reminders when the contract is nearing expiration” (pg. 45)
- “Different contract types can determine what field requirements, workflow, and alerts are relevant to the contract being created.” (pg. 45)
- Contract documents: (pg. 46/47)
 - o “documents tab captures all documentation associated with the contract through attachments”.
 - o “document has a ‘type’ associated with it that can categorize the documents”
 - o “alerts can be triggered to the user if documentation is missing from the contract record or is nearing expiration”

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- STRENGTH: "has a built-in authoring tool that will allow users to write and redline contracts directly in the Ivalua solution". "Redlines are tracked from user to user with the ability to compare previous versions of the contract side by side". "offers a native integration to Microsoft Word, so users redline in the Word can sync their version back to Ivalua". With "workflow capability, the "authored document can be passed back and forth between users to facilitate redlines, versioning, and approvals".
- "any subcontractors and distributors that are being used by the prime supplier on the event".
- "system can also trigger a subcontractor report to prime suppliers " (pg. 47/48)
- "accommodates a standard integration with multiple eSignature tools, including DocuSign, Adobe Sign, and Universign." (pg. 48)

RTM

- POTENTIAL WEAKNESS, CNT-7: System only has check-in/check-out capabilities for "documents authored within Microsoft word". Does not provide this for other documents or templates.
- STRENGTH, CNT-25: Authoring contract documents with MS Word is a significant capability.
- STRENGTH, CNT-50: The history feature capturing "at the clause level" is a significant additional feature.
- WEAKNESS, CNT-51 through CNT-63: The Ivalua "Public Contract Browse" feature cannot be modified to meet State needs/req'ts without "Ivalue security review or custom code".
- Three req'ts need clarification.

Vendor Performance, pg. 49/50:

- "users can create performance assessments against their suppliers or contracts."
- "can trigger alerts to users if a supplier is consistently performing poorly."
- "Templates for performance criteria are stored within Ivalua for users to respond to questions related to the supplier's performance". Weights for each question determine a total score.
- "Completed performance evaluations can be routed through a workflow if additional review or approval is needed"
- "ability to track exceptions and collaborate with suppliers to address these exceptions"
- "exception documents the issue or non-conformance and the severity, tied to the triggering event"
- "supplier is notified of the exception, allowing them to respond and actively manage any corrective action associated with the exception"
- "workflow to manage each step of the process" of exception management. "workflow can guide end users to collect documents and collaborate with the supplier to mitigate the identified issue."
- Improvement Plans: (pg. 50)
 - "creating tasks that will lead to overall supplier improvement"
 - "typically tied to an exception"
 - "consist of a list of tasks that can be created from a template or individually"
 - "Each task is assigned to a user with assigned due dates for both internal tasks and supplier actions"
 - "Suppliers can access their improvement plans and update the status of their tasks"

RTM

- WEAKNESS, VPE-2 thru 12: System relies on "questionnaire" and users to respond to capture performance metrics. There is not automated capture of performance based on transactions processed or data.
- Three req'ts need clarification.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: lvalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Purchasing/Data Analytics, pg. 51-54:

- "three different types of reporting with the lvalua solution, ranging from simple excel extracts to data visualization dashboards" (pg. 51)
- "Importing data from an external system can be accommodated."
- "over 100 out of the box reports" "that can be filtered and drilled down"
- Super users can configure additional reports
- Ad Hoc Reporting: (pg. 51)
 - o "Any browse page within lvalua can become a report"
 - o "search and filter on any criteria" and "export their results into excel for a quick report"
- Queries: (pg. 51/52)
 - o "Excel based reports that are run via SQL statements in lvalua's reporting module"
 - o "can combine data from multiple modules within a single report as well as conduct calculations"
 - o "parameters can be set up so users can filter the view of the data before extraction"
- Analysis Reports: (pg. 52/53)
 - o "provide data visualization to users in the form of charts, graphs, and pivot tables that can then be combined to create a dashboard view for any users"
 - o "drill down on source data and apply filters to get a comprehensive view of data"
 - o "users can easily create their own dashboards or rearrange existing ones."
 - o Standard reports "can also be embedded" within dashboards.
 - o "New analysis can be built by using a template or by using an analysis builder"

RTM

- STRENGTH, PDA-1: The spend analysis and PBI modules described is more robust than expected and provides some capabilities beyond what was required.
- WEAKNESS, PDA-32: The system reporting tool does not have a means to publish reports on an "internal or public website". Can only make reports available within the system itself.
- Four req'ts need clarification.

Technical Requirements

Availability, pg. 55: Meets req'ts.

- "accessible 24 hours a day, 7 days a week"
- "guarantee by Hosting SLA an uptime of 99.8% outside of scheduled maintenance, which will never occur during Peak hours"
- "co-locates its production and DR system in state-of-the-art data centers" "with fully redundant subsystems and compartmentalized security zones"
- "data centers have: Uninterruptible Power Supply (UPS, Diesel Generator); Redundant heating ventilation air conditioning and all components are fully fault-tolerant including uplinks, storage, chillers, HVAC systems, etc. Everything is dual powered."

Accessibility Requirements, pg. 55: Does not meet. NOTE: response indicates that work is underway to become compliant but no information was provided to indicate when.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance"
- "is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance"
- "accessibility audit and compliance are broken into 3 manageable areas, corresponding to very distinct user typologies (internal, external, and anonymous),"
- "Ivalua has completed VPATs which can be provided upon request."

Audit Trail and History, pg. 56 & TECH-1 thru 5: Meets req'ts.

- "provides robust audit and logging capabilities"
- User logged on... "all actions and activities are registered, logged and time stamped."
- Every transaction "is part of this logging effort"
- Fields have an "auditable checkbox" to mark that the field to have an audit trail.
- "audit train can be produced in reports"
- "approval history shows who validated/ actioned the previous steps and who will validate the current step"
- "mail history frame shows the history of notifications/ emails"

RTM

- Meets req'ts
- One req't needs clarification.

Browsers Supported, pg. 56/57:

- "Ivalua works with Internet Explorer, Edge, Firefox, Chrome, and Safari."
- IE: all still supported by MS. MS Edge, Chrome, Firefox: last 3 major releases
- Response did not address req't to support "any browser that is ranked as more than 10% of web traffic"

User Accounts and Administration, pg. 57 & TECH-6 thru 20: Partially meets. Response did not address the req't to be able to delegate "administration responsibilities" of "specific functions and organizations" and did not properly respond to TECH-20.

- Access to "application pages and functions are controlled by profiles, authorization, and perimeters."
- "a user has access to data and can transact across a certain region or other logical portion of the enterprise" or "a user has access to certain features and functionality" "or a combination of both."
- "User roles and user access to Ivalua Solution are defined in the application through the administration components" by "application administrator(s)".
- Option to "limit data access of business objects on a per user basis" which would allow restrictions for situations like "only access PO of the organization" that the user belongs to.
- response did not address the req't to be able to delegate "administration responsibilities" of "specific functions and organizations".

RTM

- Meets all req'ts except TECH-20 where the response did not address the actual req't to provide searchable access to all of the roles, permissions and privileges setup/available in the system. Instead response described the capability to search among all User Profiles.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Three req's need clarification.

User Authentication, pg. 57/58 & TECH-21 thru 25: Partially meets. Response did not address req'ts for Federation and Identify Proofing.

- "supports multiple authentication schemes including:
 - o Login / password authentication
 - o Single Sign On (SSO) SAML 2 Web based authentication standard
 - o Two-factor authentication
 - o Reverse Proxy / IIS Agent based authentication (CA Single Sign On, formerly CA Site Minder)"
- "password rules are fully customizable"

RTM

- Meets req'ts.

Federated Identity Management, pg. 58: Meets req'ts.

- "Ivalua Solution supports SAML 2.0 protocols for Single Sign On. The Ivalua Solution has been integrated with the most popular Identity providers."
- "only require one ID and password to access the full solution, with support for auto-provisioning of roles and permissions"

Data Conversion, pg. 58/59 TECH-26 thru 34: Partially meets req'ts, see comments for TECH-28 &30. However CONCERN, the Technical proposal does not include "historical transactional data conversions" in the standard scope/costs for a project. Proposal is to determine scope/costs "as part of the implementation".

- "will conduct a data assessment to determine the data requirements
- will be established identifying the data conversion scope for the project
- "For historical transactional data conversions, a further assessment will be performed to determine the requirements, project scope, effort, and cost required to perform these conversions
- "will perform the data conversions which will include a methodology to perform several iterations of conversion in small batches to test and validate the data, along with monitoring of performance and quality before the actual production conversion takes place

RTM

- POTENTIAL WEAKNESS, TECH-28: System does not provide an automated means to load/convert active solicitations from an existing system.
- POTENTIAL WEAKNESS, TECH-30: System does not provide an automated means to load/convert Vendor performance data from an existing system.

Interface and Integration, pg. 59/60 & TECH-35 thru 60:

- Integration strategies include unidirectional or bidirectional data flows using batch, asynchronous or synchronous interfaces.
- integration module includes comprehensive format definitions, rules-based transformations, and validated loading of data.

RTM

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: lvalua

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Meets req'ts except TECH-60 where response did not address the req't to have "automated failure recovery".
- Two req'ts need clarification.

Office Automation Integration, pg. 60/61 & TECH-61: Meets req'ts

- supports all file types as attachments
- Excel support across the sourcing process
- reporting tools natively export to MS Word, MS Excel, and PDF.
- contract tool we can import MS Word documents and break them into clauses
- contract data can be exported into Word or PDF formats

Mobile Device Support, pg. 61 & TECH-62: Meets req'ts.

- "is a fully responsive HTML application"

RTM

- Meets req't.

Mobile Applications, pg. 61 : Does not meet.

- POTENTIAL WEAKNESS, system does not have a Mobile App. Relies on the system being a "fully responsive" application for use on mobile devices to give access to the entire system.

Data Ownership and Access, pg. 61: Meets req'ts

- Customer is "data owner and data controller"
- Customers can "directly export data using features available" in the system

Date Retention, Archive and Purge Considerations, pg. 61/62 & TECH-63:

- "lvalua does not delete or modify customer data, unless requested by the customer to do so
- "deployment allows the implementation project teams to configure when and what frequency to run the offline archiving functionality

RTM

- Meets req't.

Disaster Recovery Plan, pg. 62/63 :

- "has established a Business Continuity (BC) and Disaster Recovery (DR) Program
- "plan is reviewed and approved by the management annually
- "Program is based on ISO/IEC 22301 standard framework
- "Disaster Recovery Plan is based on a fully duplicated and hot-standby infrastructure".
"Replicated web servers & application servers, replicated database backups and redundant support service"
- "contingency plan includes": " Geographically separate sites, different hosting/internet service providers, recovery site service level equal to primary site.
- "Maximum recovery time can be as low as 4 hours **with the Platinum package**". CONCERN, need to lock in the "package" so there is a specific commitment to recovery time included in proposal and potential contract.
- "DRP plan is tested at least once a year
- Incident Response program "reviewed and approved by the management annually".

Individual Evaluator Comments:

Ivalua - Unified Business platform.

General Principal and Requirements

- Key Solution Functionality Elements – fully integrated system. Start from single landing page; homogenous look and feel between modules. Single data ecosystem.
 - P5 Ivalua has extensive experience in delivering procurement solutions for State & Local organizations. As we work with our customers, we have continued to build in public sector best practices throughout the solution. Some of these features include:
 - Native public transparency portal
 - Renaming throughout the solution to align to public procurement terminology
 - M/WBE Management
 - Sealed Bidding
 - Subcontractor Reporting
 - Cooperative Reporting
 - Portal entry – single login, configurable dashboards. Collaboration tools – blogs, forums, comments.
 - Open marketplace - hosted catalogs; punchout catalogs (side-by-side hosted and punchout searches; off catalog searches.
 - P5 Integration toolbox capable of connecting with multiple ERP solutions, third-party data providers, suppliers' systems and so on. Likewise, Ivalua supports multiple format options (cXML, XML, SAP Idocs, XLS(x), DOC(x), CSV, AS2, etc.) and in multiple protocols (manual load, batch load, EDI, SFTP, HTTP, etc.). Our integrations toolkit and library connects to over 60+ ERPs and includes hundreds of data mapping formats and standard integration templates.
 - Workflow, Document Management, Configurable (p6 example list), Public portal – transparency.
- User Experience – login routes to homepage unique to user, role and tasks.
 - One or more roles guide the user experience.
 - No cost for suppliers to access portal to submit bids.
 - P7 search capability is accessed directly from the home screen for users to be able to start searching the catalog, or to create new requests.
 - P7 access pending workflow tasks directly from home screen
 - P9 Users or administrators can also set-up out of office forwarding for users. This will delegate all workflow tasks assigned to that user within a defined time period to another user or group of users.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Bidder Best Practices and Roadmap
 - Major releases delivered 2 times per year.
 - Recommends major updates 18 months for best product maintenance
 - Fedramp ready
 - Public sector longtime focused; best practices developer for public sector tailored solution.
 - Roadmap is 60% customer-sourced.
 - Roadmap – web apps; invoicing and payment execution inside Ivalua; contract lifecycle management using AI; supplier risk and performance; StateRamp; enhanced clause libraries; collaborative authoring.
- Innovations and Value-Added Features/Services
 - P11 Ivalua Help Desk as alternative to state-operated. Level 1 with 0-% tickets solved within 1 hour. Level 2 redirect. (Cost item)
 - P12 Advanced Services procurement. (Cost item)
 - Vendor Master Management – supplier data (Cost item)
 - Adoption of ERP specific source schema tables to support bidirectional master data integration
 - Use of a supplier cleansing workbench for merging and deduplicating records from multiple source systems
- Customizations/Extensions – Configuration not custom code.
 - Coding changes part of release cycle.
 - Users have flexibility to deploy releases. Reduces risk of automated upgrades-prompted problems.
- Alternative Funding Models – Not proposed.
- Contract transition. Existing customers may discuss contract transition with Ivalua. GFE not guarantee.

Functional Requirements

- General Functionality
- Six modules integrated: Supplier Risk & Performance; Solicitations & Bid Management; Contract Management;
 - *P16 Master data throughout the solution for selection of organizations, commodity codes, units of measure,*
 - *Single platform manages the end-to-end solicitation and purchasing process for the organization, suppliers, and political subdivisions*
 - *EPROC-GEN-3 - Posting to Ivalua's native site does not require any integration. Ivalua can also integrate to state's websites or other sites, as needed. Our recommended approach is using Ivalua's public portal and putting a link within the State's website, to leverage the simplicity of standard functionality while easily allowing access for users from the State's website.*
 - *EPROC-GEN-39 - Throughout each implementation, Ivalua works with organizations to identify any additional information outside of standard that should be available on the public portal. Document posting can be controlled at the individual document level or by document type (Ex. confidential documents not made public). Authorized users will be able to modify the document types made public.*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Supplier Portal – P17 *free supplier portal where suppliers may perform self-registration and other activities with their customers. Ivalua supplier registration & information management capabilities allows to quickly and easily onboard suppliers for RFPs, orders and invoices, and push data to ERP or other relevant system*
 - *Supplier features:*
 - *Managing their supplier information and users*
 - *Submitting reports for cooperative contract usage*
 - *Responding to sourcing events*
 - *Managing/redlining contracts*
 - *Uploading catalogs*
 - *Viewing orders*
 - *Creating advanced shipping notices*
 - *Creating invoices*
 - *Viewing their performance*
 - *Collaborating on improvement plans*
 - **EPROC-SPR-14 Needs clarification** *ERP financial data is integrated into the system as standard throughout the Procure to pay process. Additional fields can be captured through integration. Is this integration included in the price or required to be developed on customer ERP side?*
 - *EPROC-SPR-19 Administrative fee payments will be submitted through a third party payment provider. Ivalua can offer a close integration to the third party provider to track payment within the system*
- Supplier Enablement/Management- p18 *Supplier activation within Ivalua takes place in two parts. The first is a public facing registration page that allows any new supplier to create an account within the system. The second is the 'full enrollment' process, where the supplier can login and collect additional information required to be fully onboarded with the organization and to do business. The registration page can be found by accessing the public facing homepage of Ivalua. Potential suppliers can access the portal 24 hours a day, 7 days a week, 365 days a year. The Ivalua supplier portal is 100% free for the suppliers, no setup and/ or transaction fees.*
 - **EPROC-CDR-18 to -27 – Third party integration to validate supplier data. Needs clarification – Ivalua supplies or customer supplies?**
 - *EPROC-VDR-32 Ivalua segregates organizations – workflow can't pass between organizations.*
 - **EPROC-VDR-40 – Needs clarification** *(vendor email signup) – is this a Customization as marked or a Configuration as stated in comments?*
 - **P 20** *The supplier submits their registration it is processed through an automated workflow that will automatically accept or reject the registration based on system conditions, such as a duplicate check. The workflow process and acceptance/rejection criteria will be established by each client. If the supplier's registration is approved, they will receive an email notification informing them that their account has been created, and they can login using their username and password that were established on the registration page. Needs clarification – is approval following automated step or is there manual intervention by Ivalua or State?*
 - *P21 – documents can be stored in profile for use in response and contract management.*
 - *P24 – supplier self-service for account maintenance then routes to internal user for approval; can sent updates to ERP.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Buyer Portal – Internal users log in via username/paw or SSO.
 - P25 Alternatively, **suppliers** can login via SSO with their organization. **Needs clarification** – is this a typo as this is buyer portal response? Is there an SSO supported for suppliers?
 - P26 User role or roles tied to authorizations. Perimeter can limit visibility into certain departments' data or permissions.
 - EPROC-BPRT-8 – Daily summary of notifications not available.
- Need Identification – P27 *Options from home page: Create a Needs Request form; Create a Purchase Request - contract, non-contract, punch-out, non-catalog products, or for the procurement of services; Complete an Exemption Request; Create a sourcing event; Gather quotes; Create a Contract.*
 - **EPROC-Need-3 – Needs clarification** – Why is guided buying listed as a C? Is there not standard or configurable workflow?
- Request through Pay – starts with requisition; routes for budget; moves to sourcing event. Fully integrated process through requestion, purchase order, receipt and approval.
 - P32 – multiple methods of receipt input: PO; from scratch; EDI/cXML; OCR.
 - Integrates to ERP to trigger and record payment.
 - **EPROC-PC-1 thru -9 – Needs clarification** – status of pcard development.
 - EPROC-RC-21 – UOM conversion to set inventory as different from PO is configurable.
- Catalog Capability – items from multiple suppliers can be on the same PO.
 - CXML punchout; unlimited items; unlimited catalogs
 - Spot bid functionality EPROC-CAT-11
 - Supplier uploaded catalogs routes for approval to internal user.
 - P35 Ivalua also has the ability to search both punchout and hosted catalog in the same search. Through an API, external catalog results will be brought into the internal Ivalua catalog. This will provide the user with a single place to conduct a search, instead of having to punch out to the external catalog first.
- Sourcing/Bid Management – All RTM listed sourcing methods supported as standard or configurable.
 - P36 – Suppliers added to tab for solicitation notification in supplier tab manually; suppliers can be searched by any field in supplier database. (This will include supplier record details – contacts, performance, documents.)
 - P37 Documents tab can host unlimited attachments, e.g. T&Cs; workflows for documents and versioning; standardize for agency.
 - Sealed bid management blocks access by internal users until bid due date; time stamp on screen for auditability.
 - Pricing collected in system, p39; Templates permitted; modifications, new fields can be created; system calculates price savings against reference prices if included
 - Public portal for posting – recommendation to host solicitation on Ivalua, link with basic information from state or other sites to minimize integration effort.
 - **P39 – Needs clarification.** Public sourcing events allow any user without an account to view and respond to event within the Ivalua sourcing solution. How is user data captured and ongoing communication facilitated without a confirmed account? See EPROC-SRC-66 If these suppliers choose to respond they will be required to make an account in the system.
 - P43 During active solicitation, internal users can see activity of suppliers including participation, as well as email notifications received; Sealed bids content protected until closing date.

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P44 Contract creation starts with award notifications and carries over solicitation/response fields to avoid duplicate re-entry of data.
 - **EPROC-SRC-35 – Needs clarification.** *This can be accomplished via configuration. For editing via Ivalua's Microsoft word authoring - **check-in/check-out is supported out of the box, but not for attachments only.** What does "not for attachments only" mean?*
 - EPROC-SRC-48 *Workflows can be designed by administrators using drag-and-drop capabilities. It is easy to develop tasks for human approval, or routing decisions based on business rules or factors such as threshold amounts*
Configuration will be required to ensure the workflow meets the needs of each organization
 - **EPROC-SRC-68 – Needs clarification** – Is eFax a roadmap item or does Ivalua plan to not support?
 - EPROC-SRC-76 – Posting all solicitation documents to state's public website is customization with high complexity. See earlier not for simpler recommended process.
 - EPROC-SRC-83 – No integrated video conference. Third party link can be inserted. Attachment can be uploaded.
 - EPROC-SRC-102 – Ivalua native plugins for third-party electronic signatures.
- Contract Management
 - P45 *The contract record within Ivalua captures all aspects of contract information, documentation, activity, and performance within the single record.*
The header tab of the contract captures the basic information about the contract brought over from the solicitation as well as manages any dates associated with the contract. Based on the dates that are set-up in the header of the contract, the system will automatically trigger reminders when the contract is nearing expiration.
 - Document management. P46 Within the document management capability, Ivalua has a built-in authoring tool that will allow users to write and redline contracts directly in the Ivalua solution. *All organization contract templates and clauses will be stored within the system that can then be easily pulled into the contract document. Legal users will have the ability to import or edit templates and clauses, when needed. Redlines are tracked from user to user with the ability to compare previous versions of the contract side by side. Ivalua also offers a native integration to Microsoft Word, so users redline in the Word can sync their version back to Ivalua.*
 - P47 Through the third parties tab, Ivalua can capture any subcontractors and distributors that are being used by the prime supplier on the event. They can define who the subcontractor is, their M/WBE status, as well as the amount of percentage of the total contract value the supplier is responsible for.
 - P48 system can also trigger a subcontractor report to prime suppliers. This allows them to report how much has been paid to their defined subcontractors in that period. The report is then routed through a workflow for approval.
 - EPROC-CNT-72 – Fee comparison. Marked as C, but comments say configuration. Is this code?
- Vendor Performance P49 *performance information is maintained within the supplier's profile for reporting, as well as can trigger alerts to users if a supplier is consistently performing poorly.*
 - Templates for performance assessments. Vendor score. *As evaluators respond to the supplier assessments, they will be able to add comments and attachments, where needed.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Improvement plans can be set up as collaboration tool to create tasks aimed at supplier improvement. Supplier and Internal user can both access.
- Purchasing/Data Analytics – 100 out of the box reports; ad hoc reports; SQL queries.
 - Analysis reports with data visualizations.
 - Three RTM requirements depending on completion of the Pcard functionality.

Technical Requirements

- Availability – 99.8% uptime. Monthly scheduled maintenance.
 - Service credit 5% for <99/8% increasing through levels to max of 25% for <85%. Credits applied against future prof. serv. Fees. No refunds unless <90 on contract.
- Accessibility Requirements – P55 *Ivalua is implementing accessibility of the system in accordance with the Web Content Accessibility Guidelines (WCAG 2.1) standard with the objective of level AA (mid-range) compliance. Ivalua is committed to being Section 508-compliant (against WCAG 2.0 Level AA requirements) as soon as possible across all application pages.*
- Audit Trail and History – P56 *While a user is logged on, all actions and activities are registered, logged and time stamped. Every transaction created, every status change, every movement through to the next step in a workflow, every addition or deletion of a data item of any kind is part of this logging effort.*
- Browsers Supported – Common browsers – last 3 major releases; Explorer – only MS-supported.
- User Accounts and Administration – Role-based administration to access permitted sections of Ivalua environment.
 - User Authentication – Supported: Login / password authentication; Single Sign On (SSO) SAML 2 Web based authentication standard; Two-factor authentication; Reverse Proxy / IIS Agent based authentication (CA Single Sign On, formerly CA Site Minder)
- Federated Identity Management: SAML 2.0 protocols for Single Sign On. Single login for entire platform.
- Data Conversion - P59 *As part of the implementation, we will conduct a data assessment to determine the data requirements for the project and the Participating Entity. Based on this, a data strategy will be established identifying the data conversion scope for the project. Once the data strategy is completed, Ivalua and Participating Entity resources will leverage Ivalua's which are an open part of our User Interface to perform data transfers.*
 - *Once the Participating Entity has reviewed the approach and impact to the project scope, effort, timeline, and cost and signed off on the scope, a combination of Ivalua and Participating Entity resources will perform the data conversions.*
 - *EPROC-TECH – Date conversion legacy data supported except for Solicitation data in State's system and Vendor performance data.*
- Interface and Integration – P59 Synchronous and Asynchronous data transfers supported. Multiple communication protocols and data formats, including flat files, JSON, XML, cXML, OCI, IDOC (SAP)
 -
- Office Automation Integration – All file types supported as attachment.
 - Excel support across sourcing process.
 - Reporting tools natively export to Word, Excel and PDF
 - Contract tool imports Word documents.
 - Contract data can export Word and Pdf.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Mobile Device Support – P61 *Ivalua is a fully responsive HTML application; screens adjust to devices, e.g., on when using Ivalua on a mobile device the screen menus change for PC layout to Mobile-friendly layout.*
- Mobile Applications – Mobile solution runs on Webkit-enabled browser; no separate app.
- Data Ownership and Access – P61 *Customers remain the data owner and data controller of all data they place into their Ivalua instance and should apply access controls to restrict access to data within their instances based on their own requirements and needs, in accordance with their access control, data retention and data classification policies.*
Internally, Ivalua has its own data classification policy. All customer data is classified as Confidential and access to the environment where customer data is stored is limited to a small number of individuals on a need-to-know basis.
- Date Retention, Archive and Purge Considerations – P62 *Ivalua does not delete or modify customer data, unless requested by the customer to do so, and only processes data in accordance with its contractual obligations and the customer's configuration of their instance(s).*
- Disaster Recovery Plan – P62 *Ivalua BC and DR Program is based on ISO/IEC 22301 standard framework*
 - Documented backup and recovery procedures
 - Crisis/incident management procedures
 - Stakeholder communication processes
 - Replicated Web server and Application server; replicated database backups; redundant support services; contingency plan for hosting and ISP.
 - P63 *Ivalua notifies impacted customers of data breaches which Ivalua becomes aware of without undue delay, but within seventy-two (72) hours - unless a shorter time is specified in the contract*
- Solution Environments – Minimum 3 environments – Dev, Acc (test), Prod.
 - Training environment available. – add fee.
- Solution Technical Architecture – All customers environments isolated in enterprise grade cloud architecture. End users access Ivalua from web browser – no client software installation required. – 64-bit MS stack. Plus open standards REST, JavaScript, HTML, XML and JSON.
 - Database layer on servers in non-internet routable network segment – requests not made directly to database tier; only issue from customer's instance.
 - No commingling of customer data.
- Solution Network Architecture – All RTMs standard functionality.
 - P66 *Intrusion Detection System and Intrusion Prevention system (IDS/IPS), monitors and blocks malicious traffic or attack on network traffic traversing the device.*
 - *systems log unexpected network activity (volume of traffic, protocol anomaly, signature-based attack) and notify Ivalua IT staff in real time via emails and text messages.*
 - P67 *Equinix DC3 Data Center - Ashburn, VA (Primary, DR); CH3 Data Center - Elk Grove, IL (Primary, DR)*
 - *Ivalua also guarantees a Hosting SLA (hit response time, uptime) and can share a monthly report with the client upon request.*
- System Development Methodology - P67 *secure-SDLC policy and procedures that ensure security-related functions are covered during the development life cycle from design to implementation to testing. New features are evaluated for their security impact during the design phase, regular code reviews (peers and SAST tools) are conducted internally during the implementation phase and tested for effectiveness during the QA process.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *Ivalua's development process is based on the Agile methodology with its iterative approach to software development and assessment. This embeds Quality Assurance directly into the ongoing development process.*
 - *P68 Configuration Management Program for its Cloud services in accordance with NIST Security-Focused Configuration Management of Information Systems guidelines. Ivalua applies Security-focused Configuration Management for establishing baselines and for tracking, controlling, and managing many aspects of the secure lifecycle of all information system resources, configurations, and processes.*
 - *All application changes/updates are at the customer request and control, and they will be performed either behind the scenes (for minor updates) or through scheduled downtime (for major updates). Customers typically enforce their own change management process.*
- **Service Level Agreement** – Sample attached. 99.8% uptime. Monthly scheduled maintenance.
 - *Service credit 5% for <99/8% increasing through levels to max of 25% for <85%.Credits applied against future prof. serv. Fees. No refunds unless <90 on contract.*

Security Requirements

- **Cloud Security Alliance (CSA) Compliance** – CAIQ 3.0.1 provided (No unusual.)
 - *IAM-02.7 Ivalua doesn't share internal security metrics with customers. The termination control is tested as part of the SOC control and SOC report is provided to the customers upon request.*
- **Security and Privacy Controls-** **P69 Needs clarification** Ivalua is currently in the process of validating controls and safeguards against NIST SP 800-53 Revision 4 "Moderate" risk controls for FISMA compliance with our Commercial Cloud. **Is this complete?**
- **Security Certifications** - *Ivalua has implemented an Information Security Management System (ISMS) in accordance with ISO/IEC 27001. Ivalua is annually audited SSAE-18 SOC1 and SOC2 (US) and ISAE-3402 (Europe). Ivalua is also annually audited HIPAA and complies with business associates' requirements of the Privacy, Security, and Breach Notification Rules.*
 - *P70 Ivalua is not currently audited for PCI-DSS compliance. However, Ivalua has safeguards and security controls in place to protect cardholder data in accordance with the PCI-DSS standards and is leveraging its Hardware Security Module (HSM) infrastructure to manage cryptographic keys used to secure cardholder data.*
 - *Ivalua is FedRAMP Ready with our GovCloud and listed on the FedRAMP Marketplace.*
- **Annual Security Plan** – *P71 Ivalua has built its security program and implemented an Information Security Management System (ISMS) in accordance with ISO-27001. The security controls deployed are in alignment with ISO/IEC 27001 and NIST SP 800-53 "Moderate" baseline requirements to address the information security risks. We are certified SSAE-18 (US) and ISAE-3402 (Europe).*
 - *Ivalua enforces the principle of least privilege across the entire organization. Role-based access control at directory and application levels and firewall rules are used to manage access.*
 - *Only users with the appropriate profile can load a page or execute a function. It is also possible to limit the data access of business objects on a per user basis.*
 - *Ivalua Solution architecture leverages a multi-instance tenancy model on shared servers. Our model creates a very distinct boundary between the data of each client.*
 - *Ivalua invests a large number of resources to get itself audited by a 3rd party auditor against the SOC and HIPAA security frameworks. Every year it produces a report that is shared with its customers, upon request.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *5-stage incident response: Preparation; Detection and analysis; containment, eradication and recovery; post-incident activity; communication.*
 - *Ivalua applies a single data classification to all customer data it hosts. Ivalua does not inspect or monitor its customers' data and has no ability to understand how any data may have been classified by individual customers.*
 - *Ivalua has implemented numerous privacy and security practices to ensure Ivalua compliance with the GDPR.*
- Secure Application and Network Environment – Equipment hardened; proactive network security. See architecture above.
 - P77 Data at-rest and in-transit is encrypted using the industry-standard AES 256-bit encryption. Ivalua Cloud infrastructure where client data are stored, processed, and transmitted:
 - The web traffic between the end-users and the servers is encrypted using TLS (HTTPS). Ivalua SSL X.509 CA certificates are generated with RSA 2048 key size and SHA-256.
 - P78 *In Ivalua's infrastructure, managed devices (switches, routers, firewalls) and services communicate their activity logs to two different servers, located in two geographically distant data centers.*
 - *While a user is logged on, all actions and activities are registered, logged and time stamped. Every transaction created, every status change, every movement through to the next step in a workflow, every addition or deletion of a data item of any kind is part of this logging effort. As a result, the system can produce a detailed audit trail of exactly who did what, where and when. This audit trail can be produced in reports on a real-time basis.*
 - DLP strategy includes an administrative policy around removable media and data loss prevention.
- Secure Application and Network Access
 - P81 *Each client application instance runs under a dedicated application pool process with a client dedicated identity. This model also facilitates the ability to perform upgrades and maintenance on an individual basis without impacting other clients' instances. This model enables higher instance availability.*
- Data Security – See above. All narrative in this section has been stated in other areas.
- Personally Identifiable Information Protection – P85 *Ivalua has implemented numerous privacy and security practices to ensure Ivalua compliance with the GDPR.*
 - *Customers may configure access to PII such that customer-defined roles have access to PII within the Ivalua platform. When providing customer support, Ivalua may have access to PII data.*
 - *Ivalua is also annually audited for HIPAA and complies with business associates' requirements of the Privacy, Security, and Breach Notification Rules.*
- Security/Privacy Issue Occurrence - *reporting obligations are set forth in Ivalua's customer contract. In the absence of a contractual requirement, in the event of any breach of PII, the customer will be notified without undue delay but no later than 72 hours.*
- PII Data Actual/Attempted Access or Disclosure – See previous
- Security Breach Reporting – See previous

Implementation Services Requirements

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Project Management – Semi-Agile approach: MOBILIZE; EXPLORE/DESIGN; BUILD/CONFIGURATION; TEST; DEPLOY/GO-LIVE; RUN
 - P88 *Ivalua will support project management activities for Project Planning, Tracking and Reporting.*
 - P89 Detailed expectations of customer personnel resources and time commitment.
 - P90 – Sample project plan provided.
- Project Implementation Methodology – P91 *based on the principles of rapid deployment and prototyping*
 - *End-users are involved in both mockup and configuration of their system. This accelerates their understanding of what is possible and allows them to refine their requirements to what is most needed*
 - *During the Build phase of a project, each configuration change (driven by the requirements collected during the design phase) is unit tested by the configurator. Once the Build phase is over, and before User Acceptance Testing starts, our Quality Assurance team reviews and tests the entire application build to make sure that all the pieces come together without defects, and as per the approved design.*
 - *Code changes are extremely limited (and restricted to Ivalua certified engineers only), submitted to validation internally, and if approved, will have to go through a peer code-review process before being delivered on a client' environment*
- Catalog Support Services – Two phases. Suppliers or buyer load catalogs; Data approved by buyers.
 - **Needs clarification –** Does Ivalua provide implementation support?
 - P 92 *In the event that our customer requires additional catalog support services, Ivalua can leverage our partner ecosystem to provide these services including:*
 - *Providing assessments to identify and prioritize contracts as potential for hosted catalog or punchout;*
 - *Creation of hosted catalogs;*
 - *Setup/configuration of punchout sites;*
 - *Identification and setup of commercial retail online marketplaces;*
 - *On/off-boarding of Suppliers to prepare them to manage catalog content; and*
 - *Training customer staff to assume catalog/punchout management roles.*
- Data Conversion Services – **Needs clarification – p92** *does Ivalua provide data conversion assistance during implementation?*
- Interface/Integration Development Services
 - P93 *The approach is to map Participating Entity's data to Ivalua data. Specific interfaces are configured (no coding), the configuration of interfaces is part of the integration toolbox resulting in micro integration workflows supporting open protocols and data formats. The approach is to select one of the predefined integration templates appropriate for the business object, map the data items, configure the protocols and data format.*
 - *Ivalua will assign an Integration Lead to work with Participating Entity's team to perform a technical assessment to identify all required interfaces and integrations.*
 - *Ivalua project methodology, design, configuration, testing, and implementation of the interfaces and integrations will be performed.*
- Organizational Change Management (OCM Services) - P94 *change management and custom training services, including Change Management and Custom Training development (Instructor led training, Train-the-trainer, Web-based recording, and Quick Reference Guides (QRGs)).*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Ivalua

CATEGORY #(s) 3:

DATE: 1/15/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Leadership/Stakeholder Engagement; Change Impact Assessment; Change Readiness; Training (Web-based, Instructor-led; Instructor guides for trainers; training exercises; quick ref guides; simulations) Streamlined communications strategy.
- Training Services
 - Robust e-learning program for customers, partners and staff to learn at own pace – Ivalua Academy with Ivalua Certification.
 - Key User training; Administrator Training; Technical training – multiday on the Standard Ivalua platform (not configured instances.)
 - Custom-training: Web-based, Instructor-led; Instructor guides for trainers; training exercises; quick ref guides; simulations
- Help Desk Services – SaaS subscription includes Technical support level 3 for standard product and configured customer applications. Responsibility – maintenance releases, defect requests, product questions.
 - Optional: Help-desks for End users (level 1), suppliers (level1) , Administrators configuration support. – Phone, Email
 - Level 2 redirect if needs. 90% resolution within 1 hour.
 - EPROC_IMPL-3 and -4 – No live chat available.
 - EPROC_IMPL-5 – Ivalua Extranet ticket system can be viewed by customer, but does not integrate to customer's ticket help system.
 - Needs clarification: Do registered suppliers/registering suppliers have access to Ivalua helpdesks without state paying for additional helpdesk, or is state accepting all supplier support role? F4 indicates additional catalog support services not anticipated beyond go-live.
- On-site stabilization. Hypercare – 3 months. Monitor rollout; triage and support high-priority tickets; adjust configuration, defects. Focus on end-user adoption; transition to state support team and Ivalua Run team.

Managed Services Requirements

- Solution Support – Repeat of description of infrastructure, SLA and environments.
 - SDLC policy and development and testing plans for rollout explained.
 - Testing has 4 levels: Manual tests and code reviews; load and performance testing; functional testing; regression and automated testing.
 - Repeat of contracted level 3 support and optional level 1 supports.
- Organizational Change Management (OCM Services) – P 103 See implementation. Additional OCM not anticipated.
- Training Services P 103 See implementation. Additional OCM not anticipated.
- Catalog support services. P 103 See implementation. Additional OCM not anticipated.
- Help Desk Services – Needs clarification: Is this helpdesk in F5 the added cost Level 1 help Desk?
- Transition Out Assistance Services
 - P105_ Upon termination of the contract, Ivalua retains processed data and files for a limited period of time in accordance with the contract. We then delete the client online files (skipping the file trash). When the physical servers are terminated, media is destroyed, except for encrypted data in archived storage (which is destroyed in accordance with Ivalua's data retention schedule). Ivalua follows NIST 800-88 Media Sanitization guidelines.
 - Ivalua to work with customer on transition needs – no specific commitment. Customers can self-extract or request Ivalua help to extract data.

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: LSI
CATEGORY #(s): 3
DATE: 8/27/21
SME NAME: Robert Sievert
SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- LSI Consulting has provided product design, training design and delivery, organizational change management, and implementation consulting services for SAP customers since the establishment of SAP Public Services Inc.
- LSI has over 1,200 full-time employees,
- Supplier Relationship Management and Procurement (Ariba)
- LSI has developed a national practice across our Public Sector clients including State of Nevada, State of Arkansas, Commonwealth of Pennsylvania, San Diego County, San Bernardino County, Price George County, Clark County, Collier County, Houston Independent School District, City of San Diego, City of Palo Alto, Colorado Department of Transportation, Sedgewick County, Hawaii Department of Transportation, Port of San Diego, and many more which can be best reflected in the
- most recent Ariba implementations at County of San Diego and Sempra amongst others.
- LSI has significant experience implementing SAP ERP solutions but may not have done as much with the proposed full SAP Ariba suite of tools.

2. Previous Projects

- LSI has extensive list of Public Sector and Higher Education clients, though the list (pg. 8) does not specify what SAP solutions were implemented for each.
- **San Diego County** (pg. 9): LSI implemented Ariba Supplier Lifecycle and Contracting modules with integration to Oracle Financials. Also created Single Sign-On software. *Not a Full Suite eProcurement implementation.*
- **University of Kentucky** (pg. 10): LSI implemented SAP HCM, Finance, SAP Student Lifecycle Management, BW, SRM/PPS 7.0, Analytics and Ariba Contracts. *Not a Full Suite eProcurement implementation.*
- **Sempra Energy** (pg. 11): LSI implemented Ariba Contract Management with integration to their existing ERP with Microsoft Dynamics and Active Directory. *Not a Full Suite eProcurement implementation.*
- **City of San Diego** (pg. 12):
 - i. City implemented the "SAP Ariba procurement platform. City manages "buying, contracting, digital purchasing, increased spend visibility and more with SAP Ariba". LSI was not listed as being part of the project.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3

DATE: 8/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Washington D.C.** (pg. 13):
 - i. The District has been an Ariba On-Premise user and is now looking to transition to Ariba in the cloud. LSI is not listed as being part of the project.
 - **California Dept of Healthcare Services** (pg. 13):
 - i. "DHCS has deployed the complete SAP Ariba procurement platform, including strategic sourcing and buying & invoicing solutions". LSI was not listed as being part of the project.
3. Subcontractors
- No subcontractors
4. Organizational Chart
- Org chart does reflect an implementation project with high LSI positions identified. State positions are not identified, just listed as "State Team Project SMEs & Project Stakeholders" however the Role/Responsibility table does identify State positions/roles needed. (pg. 14)
 - Role/Responsibility table does identify the appropriate responsibilities for core/key staff (pg. 15-21)
5. Litigation
- No litigation.
6. Financial Viability
- All areas except Financial Stress rated at Low or Low-Moderate risk. (pg. 24)
 - Financial Stress (pg. 26): Moderate Risk, due to "low proportion of satisfactory payment experiences to total payment experiences".
 - One Tax Lien from South Carolina Dept of Employment and Workforce and five open UCC Filings. However, details are not clear as to the situation, circumstances or whether these are related to the proposed solution.

Individual SME Comments:

Exceptions, pg. 142-145:

- LSI takes exception to 7 of the NASPO T&Cs.

General Principal and Requirements – pg. 48-21

Key Solution Functionality Elements, pg. 8-10:

- SAP Ariba is the solution
- Single Point of Entry: "AP Ariba Guided Buying serving as the single point of entry for all procurement-related requests."
- Smart routing: "Ariba includes a highly configurable workflow engine"
- Compliance: "SAP S/4HANA for product compliance, you can manage regulations, track registrations and substance volumes, classify products, and create compliance documents, as well as package, transport, and store hazardous materials properly with accurate labeling."
- Portal: "SAP Portal product portfolio". Available
 - o as "SAP Enterprise Portal (on-premise)
 - o on SAP BTP as SAP cloud Portal service
 - o (portal-like) sap Launchpad serviceCLARIFICATION, need to identify which is being offered.
- Open Marketplace environment: "SAP Ariba Business Network (SBN)". Customers choose to have access to all suppliers on the network or "only to their preferred suppliers". Also have "Spot Buy catalog solution" for "end users to find and buy non-sourced goods".
- Integration: "SAP's holistic integration approach"
- Workflow: "SAP Business Workflow enables the design and execution of business processes"
- Document Management: "SAP Ariba Contract Management module can track, manage, and store documents".
- Reporting, dashboards and data visualization: "SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports."
- Configurable: "configurable workflows to document templates" with "the flexibility to reflect state-wide or agency-specific rule-sets and processes"
- Transparency: "Vendor Portal" and "The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data." (pg. 10)

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

User Experience, pg. 10-12:

- "design to deliver a fast and ergonomic user experience minimizing end user training"
- "has configurable dashboards to meet each of the different type of user's needs."
- "SAP Ariba also provides mobile procurement tools to review and approve requisitions"

Bidder Best Practices and Roadmap, pg. 12/13:

- Quarterly Release: Feb, May, Aug & Nov
- Monthly Feature Deliveries: optional, no-impact release. Changes "virtually invisible to the end users".
- Production quality metrics tracked for improvement needs.

Innovations and Value-Added Features/Services, pg. 13-16:

- SAP FieldGlass:
 - o SAP Fieldglass External Talent Management automates the entire process of procuring and managing flexible labor, from requisition through invoice and payment.
 - o "SAP Fieldglass Services Procurement can handle the management of a variety of Statement of Work (SOW) engagements including projects, offshore/offsite, independent contractors, managed programs, business services and Business Process Outsourcing (BPO) models".
 - o "SAP Fieldglass Worker Profile Management enables companies to track and manage all non-traditional workers who are not tied to a job posting or Statement of Work (SOW)."
- SAP Ariba Supplier Risk Management: "lets the State tailor risk views and alerts to state's business, to each supplier relationship, and to the State's role. The State can also segment suppliers based on risk exposure."

Customizations/Extensions, pg. 17 : System does not allow customizations but can have "extensions" added outside of the scope of the contract by other "partner" contractors.

- "SAP Ariba application extension partners can create and deliver applications that augment SAP Ariba solutions" (NOTE: these are companies that can create additional functionality from what is being proposed).

Alternative Funding Models, pg. 20 : Response did not offer any alternative funding models. Instead promoted the SAP Fieldglass application.

Contract Transition and Flexibility, pg. 20 :

- "LSI possesses an extremely high level of flexibility to transition from a state's current contract to a new contract or amendment"

Functional Requirements – pg. 22-46 [Note, narrative same as IBM proposal](#)

General Functionality, pg. 22-24: Meets req'ts.

- "Ariba is a role-based solution"
- SAP Ariba Buying& Invoicing (including Guided Buying)
- SAP Ariba Sourcing
- SAP Ariba Contracts

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- SAP Ariba Supplier Lifecycle & Performance Management
- SAP Ariba Network
- SAP Fieldglass
- "A super user will be granted broader access to the solution by assigning multiple roles" to access functionality across the solution and "provide administration capabilities across the solution or for specific functional areas".
- "Guided Buying is the exception, which is designed for casual users to procure with a consumer like user experience".
- CONCERN, be default the system has built in use of the UNSPSC code set. Since Ariba is a SaaS (shared instance) State/Entities with a different commodity code standard will have to adapt to UNSPSC codes in some areas of the system where a crosswalk to their commodity codes will cannot be incorporated.
- SAP Ariba Business Network is a B2B network ("dynamic, digital marketplace") transacting "business commerce between more than 3.6 million" companies.

RTM

- WEAKNESS, GEN-4: User must manually post copy of a solicitation to a State's public website.
- WEAKNESS, GEN-5: To post Contracts on the public website, integration would be put in place to put a "link" on the website that would go to the Contract BUT only "licensed users" would be able to use the link to see the Contract.

Supplier Portal, pg. 24-30: Generally meets req'ts, however no details provided for public RTM req'ts (see RTM notes).

- Ariba Business Network (aka Ariba Network, Ariba Supplier Network)
 - o Single supplier account to transact with all Ariba customers, "supplier unified seller experience"
 - o State/Entity can choose to only access "their preferred suppliers" or all suppliers that are members of the Network.
- Ariba "Supplier Enablement Services" for the Network are included
 - o "will be responsible for most of the enablement process", onboarding
 - o The services will 'scale' up to meet "the State's volume" of suppliers
 - o Sends request for suppliers to confirm/accept relationship on the Network
 - o Provide phone support for registration "and conduct change management"
 - o Provide training on invoice submission
 - o Provide an Account Manager to State/Entity to "support suppliers and increase project engagement"
 - o Send "go-live letters" to inform suppliers when the State/Entity is going to start doing "electronic transactions"
- Supplier Portal functionality across all customers, not specific to a State/Entity using Ariba
 - o Consolidated order dashboard
 - o Order task reminders and rules-based order routing
 - o Access to Ariba Discovery public solicitation posting (postings by all Ariba customers)
 - o Contract collaboration/redlining
 - o Self-service hosted catalog creation as CIF, cXML and Excel files
 - o Self-service Punchout setup, separate setup for each Ariba customer
 - o Dashboard to manage catalog activity

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- Option to have “public catalogs on the SAP Ariba Spot Buy Catalog solution” (similar to putting catalog in Amazon but only accessible by Ariba customers).
- Invoice create/submission to Ariba customers via PO-Flip or electronically from Suppliers internal system (cXML, EDI, CSV). With option to create non-PO invoices.
- Self-service Administration to define Supplier user roles and users
- Link multiple registration accounts to a Parent account
- Mobile app for access to orders, invoices, notifications, order/invoice graphs and can “confirm customer orders”.

RTM

- CONCERN, SPR-9 & 10: Response does not provide details and there is conflicting responses in the Technical Proposal referring to a Transparency Portal (pg. 10), Ariba Discovery (pg. 38) and using Ariba APIs to “exposed data” (pg. 40).
- CONCERN, SPR-18: Response only stated “Partner”. No detailed response provided for req’ts to allow suppliers to respond to a performance complaint/issue.
- CONCERN, SPR-19: Response stated “Not supported - Partner”. No detailed response provided for req’ts to allow suppliers to submit Admin fee payments.
- SPR-12 needs clarification, response did not address the full req’t.

Supplier Enablement/Management, pg. 30 : Generally meets req’ts.

- SAP Supplier Enablement Team will “design and develop the most effective enablement strategy” based on their “profile, PO and invoice volume, and spend”. Segment the “State’s vendor master data to effectively target/onboard suppliers in tiered waves”.
- Provides IRS TIN/Name “verification capabilities”
- For the Ariba Network, offers suppliers “user guides, FAQs, technical documentation, and free online seminars”.
- Can have “account specific information” via a “supplier information portal embedded in the Ariba Network”.

RTM

- NOTE, VDR-1: Registration is for the Ariba Network and uses a “supplier profile questionnaire” to capture State/Entity specific registration data.
- WEAKNESS, VDR-11: The Ariba Network captures UNSPSC codes with registration. State/Entity would have to add to the ‘questionnaire’ a selector for other Commodity Code taxonomies (e.g. NIGP codes) with registration.
- NOTE, VDR-19: Response does not address the req’t to validate IRT TIN/Name but in the Technical Proposal (pg. 25) it does indicate that this verification is available.
- WEAKNESS, VDR-20: Address validation is for “format” only. System does not use anything to confirm that the address is good.
- WEAKNESS, VDR-23: Debarment/watch list verification is an “add-on”, not included in the offering.
- Four req’ts need clarification, response did not address the full req’t.

Buyer Portal, pg. 31-34: Meets req’ts.

- Casual/Power Users, pg. 26/27: CONCERN,
 - Running “pre-packaged reports” is listed for Power Users, not Casual Users.

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- o "Post solicitations" is listed for Power Users, so it may be that Casual Users won't be able to do 3 Bids/Buy (aka Quick Quote) functionality (see PRD-36 & SRC-11 references).

RTM

- Meets req'ts except 3 req'ts that need clarification, response did not address the full req't..

Need Identification, pg. 34/35 :

- Guided Buying, pg. 29: NOTE, Ariba concept for Guided Buying appears to be a Landing Page once the user logs in that provides a variety of options with titles that tries to 'Guide' the user based on what they are trying to do. So it's really up to the user to figure out which 'path' to take from the Landing Page.

RTM

- Meets req'ts.

Request through Pay, pg. 36: Generally meets req'ts.

- pg. 31/32: Ariba Buying/Invoicing module provides
 - o Requisition, PO generation with Order delivery to Suppliers and Supplier Invoice submission via Ariba Business Network.
 - o Approval workflow is on the Requisition, Change Order, Receipts and Invoices with in-tool/email/mobile approvals.
 - o Suppliers can send order confirmation, advanced ship notice and invoices via their acct on the Ariba Business Network.

RTM

- WEAKNESS, PRD-6: System does not provide an automated means to control whether combining purchase for multiple Fiscal Years are allowed on a Requisition/Order.
- STRENGTH, PRD-11: System has the capability for Suppliers to invoice against a Contract instead of a PO.
- "POTENTIAL WEAKNESS, PRD-13:
 - System does not provide a "library concept" for standard specifications.
 - Attachments size is limited to 100MB each."
- WEAKNESS, PRD-15: Attachments throughout the system have individual size limits of 100MB per attachment.
- POTENTIAL WEAKNESS, PRD-23: System does not have a requisition feature for the user to enter a discount percentage that is automatically applied to the requisition pricing. However, can automatically apply a discount that is recorded on an associated contract record.
- STRENGTH, PRD-24: Input forms can have a workflow defined for the individual form.
- STRENGTH, PRD-33: Suppliers can set up their Ariba Network account to route Change Orders differently than original Orders.
- POTENTIAL WEAKNESS, PRD-37: System does not identify matching state source items to non-contract items or save matching items for later analysis.
- POTENTIAL WEAKNESS, PRD-39: System does not identify matching state source items to retail/commercial market items or save matching items for later analysis.
- POTENTIAL WEAKNESS, PRD-53: System does not provide a means for users to enter 'speed codes' that "automatically map/populate" other accounting fields.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI

CATEGORY #(s): 3

DATE: 12/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- WEAKNESS, PRD-56: The system does not provide a means to enter 'back dated' requisitions/orders. So system will not be able to allow recording of purchases done outside the system.
- POTENTIAL WEAKNESS, PRD-62: System does not provide a means to specify a payment method "other than invoicing" on the purchase request.
- POTENTIAL WEAKNESS, WRK-10: For an authorized Approver to be able to over-ride/bypass to make a purchase request bypass any steps they have to manually remove each step from the workflow. There is no automation available for this.
- POTENTIAL WEAKNESS, WRK-12: Attachments size is limited to 100MB each.
- POTENTIAL WEAKNESS, WRK-13: Approvers cannot approve/deny by line item. To only approve part of the line items the Approver must delete the line items they want to deny.
- WEAKNESS, WRK-14: When an Approver edits a purchase request the workflow cannot be re-triggered to start again at the beginning.
- POTENTIAL WEAKNESS, PO-2: System does not have the capability to split a Requisition into separate POs for different Fiscal Years, holding the future Fiscal Year POs.
- WEAKNESS, PO-5: System does not provide the capability to have Agency/Organization specific PO templates.
- WEAKNESS, PO-15: The system cannot provide an internal and supplier printed version of an order. Though it can be customized, there is only one print format for an order.
- POTENTIAL WEAKNESS, PO-16: There is not eSignature functionality available for Orders.
- POTENTIAL WEAKNESS, PO-17: Attachments size is limited to 100MB each.
- POTENTIAL WEAKNESS, PO-24: The system does not notify "reviewers, approvers" when a PO has been cancelled.
- POTENTIAL WEAKNESS, PO-27: Orders cannot be created without create a Requisition.
- POTENTIAL WEAKNESS, PO-28: Orders cannot be created from a Contract directly, must create a Requisition from the Contract.
- POTENTIAL WEAKNESS, PO-29: System does not provide a means to specify payment method, other than invoicing, on the PO.
- POTENTIAL WEAKNESS, PC-3: System does not provide a means to prevent Pcard use based on the type of a Purchase Request.
- WEAKNESS, PC-6: System does not provide a means for a user to enter/maintain their own Pcard information. Must have a Pcard Administrator manage this for users.
- STRENGTH, PC-8: Pcard reconciliation capabilities are comprehensive.
- WEAKNESS, PC-9: System does not have a means for users to record "non-purchase order Pcard transactions" as part of reconciliation.
- POTENTIAL WEAKNESS, PC-16: System does not provide a Pcard transaction integration to the Finance system for budget/funds verification and to encumber funds.
- POTENTIAL WEAKNESS, RC-3: System does not provide a means to record receipts without a corresponding PO in the system.
- POTENTIAL WEAKNESS, RC-4: Receipts cannot be recorded in the system and later associate it to a PO.
- WEAKNESS, RC-16: System does not have Receiving tolerances capability. Tolerances are defined on Invoicing.
- POTENTIAL WEAKNESS, INV-2: System does not provide a means to control which Agencies/Entities that a Vendor may submit electronic invoices for. The only control available is to control which Vendors are able to submit electronic invoices.

Individual Evaluator Comments:

SAP Ariba - Unified Business platform. End-to-end procurement process.

Labyrinth Consulting (LSI); 30 Ariba deployments.

P6 LSI's Proprietary GovOne Accelerator - LSI Consulting has created the GovOne solution for State and Local Government organizations, utilizing SAP's Public Sector business application software. GovOne is our flexible, pre-templated accelerator that provides preconfigured system options and controls, and basic accounting, budgeting and procurement structures.

General Principal and Requirements

- Key Solution Functionality Elements – Guided Buying (state's approved suppliers.)
 - Single-point of Entry; Smart Routing, compliance with SAP S/4HANA, SAP portal for on-prem or cloud deployments, Contract Management module, reporting, configurable.
 - Vendor portal – SAP Business Technology platform.
 - P10 *The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data.*
- User Experience – focus on Guided Buying module and mobile procurement tools.
 - SAP Ariba Best Practices Center – flexible, as-needed support tailored to customer; single, named point of contact; best practices; claimed faster ROI.
- Bidder Best Practices and Roadmap – Standard Ariba quarterly release and monthly feature deliveries.
 - Product roadmap identified
 - Ariba network. Ariba Spot Buy
- Innovations and Value-Added Features/Services
 - SAP Fieldglass
 - AP Ariba Supplier Risk Management
- Customizations/Extensions –
 - Spotline (chatbot)
 - Seal Software (analytics for risk control)
 - Cloud Trade(PDF invoicing)
 - Keelvar Sourcing – optimizer to run, analyze and award events, bidirectional data.
 - Cordis – procure-to-pay integration with Oracle ERP;
 - P-18-20 – long list of extensions.
- Alternative Funding Models – P20. Listed SAP Fieldglass for external workforce strategy. Non-responsive to e-procurement requirements.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract transition: LSI Partner Managed Cloud offering allows contract relationship to be software and incremental services. Responsiveness to RFP question not immediately clear.

Functional Requirements

- General Functionality – Ariba integrated applications. Facilitates occasional and frequent buyers.
 - SAP Ariba Buying& Invoicing
 - SAP Ariba Sourcing
 - SAP Ariba Contracts
 - SAP Ariba Supplier Lifecycle & Performance Management
 - SAP Ariba Network
 - SAP Fieldglass
 - *P23 customers can achieve zero-touch processing and invoicing, eliminating once more non-value added work for AP, Finance, Invoice managers, etc.*
 - *P23 Data is categorized consistently within the solution leveraging a common data model inclusive of suppliers, commodity codes (UNSPSC), Agencies/Organizations, users, etc. Data created as a result of system utilization is available for analysis within the user interface via SAP Ariba's native reporting and analysis engine.*
 - *SAP Ariba supports importing data from external systems.*
 - Most EPROC-GEN requirements listed as Standard functionality. Integrations usually not described.
 - **EPROC_GEN-3, -5 Award posting integration needed. Needs clarification – Is integration added cost? What integration is proposed?**
- Supplier Portal – Supplier Business Network.
 - **P26 Supplier enablement services are included in our offering. This reduces the level of effort/resources required from the State to enable suppliers on the SBN. Our team of 700+ enablement experts will be responsible for most of the enablement process. We also offer flexible partner onboarding: it is simple for ALL types of suppliers, big and small, integrated and portal. Needs clarification – is this SAP or LSI?**
 - **EPROC-SPR-7 – Needs clarification what integration is proposed?**
 - **EPROC-SPR-18, -19 Needs clarification** Comments say “Partner, not supported, but availability listed as A. What is the solution?”
 - **P27 Publicly posted solicitations via Ariba Discovery and the State's Public site Needs clarification. Is this included integration to post direct to state site**
 - Catalog support – hosted and punchout
 - Spot Buy catalog solution
 - Mobile app – rapid request fulfillment; at a glance update to orders, 12 month invoice and order searches.
- Supplier Enablement/Management
 - *P31 Customized enablement strategy: Use our team's expertise to help you design and develop the most effective enablement strategy for your suppliers based on their profile, purchase order (PO) and invoice volume, and spend. Our approach includes duplicate detection (deduping) and segmentation of your vendor master data to effectively target and onboard suppliers in tiered waves that align with your priorities and objectives.*
 - *P31 Supplier education: user guides, FAQs, technical documentation, and free online seminars that explain the basics of using Ariba Network. We can also*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

deliver your account specific information to suppliers through a supplier information portal embedded in Ariba Network.

- **EPROC-VDR-40** – Stated as out of box and configurable; other Ariba bidders were non-responsive on this requirement or partial function claimed. **Needs clarification.**
- Buyer Portal - Offers 2 primary entry points designed for casual user or power user. Casual user gets guided buying experience, can submit requests. Power user enters via dashboard, gets more self-service approach including buying, solicitation development, vendor management, report generation.
- Need Identification – Ariba Guided Buying function
 - Functions stated as supported.
- Request through Pay – Native SAP Ariba Buying and Invoicing module for state ide; invoices to suppliers through Ariba Business Network portal.
 - *P36 Purchase orders will be sent to suppliers via the SAP Ariba Business Network. Subsequent change orders will be routed to suppliers via the Ariba Network as well. Change orders will be subject to a configurable workflow. Leveraging the Ariba Network suppliers can create an order confirmation, advance ship notice and invoice. All of which is accomplished electronically to streamline the source to settle process.*
 - 100MB limit on attachments throughout the portal.
 - **EPROC-PRD-28** – Custom form can be created for special considerations such as trade-in. Is this considered a customization or native functionality? If negative numbers not accepted, how would this be handled? **Needs clarification.**
 - **EPROC-PRD-48 – Needs clarification.** Does LSI proposal encourage native functionality for loading values cited or is this assumed to be an integration. Entry is marked A.
 - **EPROC-PRD-62 and PRO-29 – Needs clarification.** Requirement is for header level; response is that supplier level is common. Non-responsive as presented.
 - **EPROC-PO-16 – clarification needed** – Signatures on POs – LSI says not available in comments, but marked A.
 - EPROC-RC-21 – UOM defined by PO – not convertible to inventory unit UOM for receipt entry.
 - **Note: There are multiple responses in this Requirement set where configurable is stated but the Availability is marked A not CF.**
- Catalog Capability – p36 *With SAP Ariba Catalog, suppliers can upload all their content using a single, simple user interface. And with recently launched, innovative capabilities, they have enterprise-grade content management tools to define, validate, and enrich catalog content. By creating catalog rules to cleanse and enrich the data, you'll be assured of compliant, error-free catalogs while you monitor content quality with your new dashboard reports.* No notes on hands-on customer-side hosted catalog management.
 - **EPROC-CAT-6 & -7 Needs clarification.** Listed as A, but limitations cited. 500,000 items per catalog; 5,000 catalogs per system. This would likely be in excess of catalogs needed by states, but the item threshold would not reach the limit for MRO vendor catalogs, for example. Does 5,000 catalogs include expired or inactive catalogs; can one vendor have multiple catalogs archived and not count against the total?
 - **EPROC-CAT-11- needs clarification. Comments are circular – say to see CAT-11. (possibly means CAT-8 custom forms).**
 - EPROC-CAT-19 – negative values supported requirement not met.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Sourcing/Bid Management - claimed out of box functionality on common procurement types, 50% reduction in solicitation cycle time, savings.
 - Solicitation development using templates inside Ariba Sourcing.
 - P38 *The solution also supports other critical components of the solicitation process including addendums, amendments, Q&A, supplier notifications, supplier communications, internal communications, document management, etc. SAP Ariba Sourcing is natively integrated to SAP Ariba Contract Management and this will allow the State to create state-wide Contracts, Agency-specific contracts, Project-specific/one-time contracts, or Purchase Orders. P39 Proposals are received electronically and are automatically available for comparison side by side within the user interface (unless configured otherwise including envelope and sealed bids). Users may score/grade responses leveraging delivered functionality. Upon completion, side by side comparison by score, price, etc. can be done quickly and easily.*
 - EPROC-SRC-67 – suppliers have to register to postings. Not public facing – non responsive. Needs clarification.
 - EPROC-SRC-73 – is posting to state's website included in standard functionality? Needs clarification. See SRC-77 and -78.
 - EPROC-SRC-107 – needs clarification. Does surrogate bid meet requirement for posting?
- Contract Management
 - P40 *With SAP Ariba Contract Management, the State can connect directly with suppliers when creating, negotiating, executing, and managing the ongoing administration of contracts. SAP Ariba Contract Management is natively integrated with Sourcing which allows the creation of a contract directly from the solicitation award. The resulting contract will be stored in a central repository and can be published to SAP Ariba Buying and Invoicing.*
- Vendor Performance- Cloud-based vendor data model; supplier 360- review; supplier scorecards based on KPIs.
 - P43 - *The State may leverage a set of APIs delivered as part of the SAP Ariba platform to expose data to the public via a public website. Data captured as part of the supplier management process supported by SAP Ariba Supplier Lifecycle and Performance is available via API. Data can be formatted and combined with other data sources and displayed on a public website to meet FOIA requirements.*
 - P44. Supplier surveys can capture stakeholder responses and compile performance score.
- Purchasing/Data Analytics - 3-step report creation wizard; data filtering within Ariba tool rather than having to export data out to Excel to pivot/manipulate.
 - Pre-packaged or ad-hoc reports.
 - EPROC-PDA-35 - *SAP Ariba can support two reporting taxonomies. Supported taxonomies such as UNSPSC, the Ariba Classification taxonomy, and a customer-specific, custom taxonomy.*

Technical Requirements

- Availability— 99.5% uptime. Linked service agreement document provides definitions of credit, maintenance windows, availability calculation etc.
- Accessibility Requirements

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P47 *Accessibility at SAP refers to the possibility for everyone, including and especially people who are differently-abled, to access and use technology and information products. SAP ensures the implementation of user-interface (UI) accessibility features for Products via our SAP Accessibility standard.*
 - P47 *When developing software, SAP's product teams target Web Content Accessibility Guidelines Level A and AA and EN 301 549. **While SAP continues to implement and develop accessibility features across its product portfolio, solutions are not fully optimized for accessibility.***
- *Audit Trail and History – p48 Specific logging takes place that is viewable by the customer administrator or their designee. Audit logs produced through use of the solution are considered customer data and are maintained within the customer's instance of the database. These logs are retained so long as the customer has an active contract. Also see EPROC-TECH-1.*
- *Browsers Supported - Common browsers supported*
- *User Accounts and Administration*
 - *P48 Access to data and functionality within the modules is based on roles and permissions that determine which features of the solution a user can see and work with, and what data the user can access. The set of permissions for a user is derived from the roles mapped to that user and the groups the user may be a member of. Permissions are mapped to roles and then roles can be mapped to other roles, to users and/or to groups.*
 - *The solution also provides a single point of integration and administration for users and user profiles, organizations, groups and group memberships, roles and permission mappings.*
 - *This common data is shared and synchronized across modules automatically. The User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files.*
 - *EPROC-TECH-10 Least privilege: For customer users, this is a customer complementary control consideration due to the fact that the customer administrator manages user access and role assignment.*
 - **EPROC-TECH-12 Needs clarification.** Listed as A, but comments say Dual SignOn via one account is not support.
 - **EPROC-TECH-16 – Needs clarification.** Doesn't meet requirement for automatic deactivation of accounts after 6 months.
- *User Authentication*
 - *P49 Username and password from login page or Single Sign-on from corporate network permitted.*
 - *2FA available for SAML-Based authentication.*
 - **EPROC-TECH-24 – needs clarification** about new password auto generation. Not responsive.
- *Federated Identity Management – See previous answer.*
- *Data Conversion - SAP Activate Methodology for accelerated migration through Delivery team with responsibility for project management, functional and technical expertise, OCM and training to coordinated with customer org.*
 - *EPROC-Tech-27 – detailed description of master data integration and Transaction Data integration.*
- *Interface and Integration – P51 SAP Ariba applications integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI*

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.

- P51 - *These standard integration options across our solution portfolio are:*
 - a) Master data integration is done primarily in batch mode, HTTPS using CSV files (Batch integration, and depending on the data volume this can be scheduled to run frequently to achieve near real-time integration)*
 - b) SOAP Web services that use an XML payload (Real-time integration suitable for transactional data)*
 - c) REST APIs (supports both synchronous & asynchronous calls)**All of these integration methods are based on SSL 256 bit encryption and support various authentication methods such as WS-Security, basic and digital certificate authentication as standard. Our customers can opt for two or more or all the options to help achieve the desired level of integration.*
 - *Uses Ariba Open APIs.*
 - *Sample interface plan document supplied – generic – no specific interfaces included.*
- **Office Automation Integration – EPROC-TECH-61**
 - *Support of Excel format for data uploads and downloads. For example, SAP Ariba Sourcing is designed to allow Excel uploads for market designs.*
 - *Support of Excel templates for analysis and reporting:*
 - *Microsoft Outlook – SAP Ariba Sourcing and Contracts can export tasks within projects to Microsoft Outlook.*
 - *Word – SAP Ariba Contracts provides sophisticated contract authoring capabilities using Microsoft Word documents. SAP Ariba Contracts offers bi-directional integration with Microsoft Word to assemble contracts and templates from a clause library, and then to detect changes to contract documents, including automated flagging of alterations to clauses, and support for clause substitution from pre-approved clause libraries.*
- **Mobile Device Support** – *site is built for mobile responsiveness. Components with mobile functionality including shopping cart, approvals, viewing reqs. Supplier 360 reports available to view on Airba ios app.*
- **Mobile Applications** – *ios and Android supported. Touch ID, App pin, fingerprint recognition options for access.*
- **Data Ownership and Access** – *p54 The customer owns the data; they can extract the data at point of time during the throughout subscription. Tools to download the data. For example: User Interface (Import CSV), API's.*
- **Date Retention, Archive and Purge Considerations** – *p54 Data retention is governed by the active contract. We retain your data on the service for the duration of the subscription term and any subsequent renewal term.*
 - *EPROC-TECH-63 - Customer is in complete control of data deletion and purging which can be manual or automated via integration.*
- **Disaster Recovery Plan - Data centers in regional pairs.**
 - *URLs will continue to work if failover. Cloud Engineering Services move area within RTO; after switch, secondary becomes the new primary.*
 - *Customer will receive email from SAP notifying of unplanned down time. Expectation for communication not stated in narrative.*

- Solution Environments – p55 *Customers receive two environments by default: production and test. The test environment is used for initial configuration and setup. The production environment is used for production. Additional environment is available for an additional charge.*
- Solution Technical Architecture – p56 *SAP Ariba applications uses cXML language for the document exchange between SAP Ariba Network and Ariba Modules.*
 - *See Data Conversion for integration to external systems.*
 - *P57 The software's data model keeps customers' data separated. Customer data is isolated via realms. Each individual customer is assigned a distinct realm to identify and store their data.*
- Solution Network Architecture – p57 *The system is powered by high-performance servers and utilizes a network infrastructure designed for scalability, reliability, and security. The SAP Ariba Operations team is constantly monitoring and maintaining the systems.*
- **P58 Needs clarification** *SAP Ariba solution is available only as a SaaS multi-tenant model hosted by us. Who is us — SAP or LSI?*
 - *Our solutions are offered and delivered in a true subscription-based model and shared service (multi-tenant) offering. There is no software to install, no hardware to buy, no maintenance or support costs and no need to hire consultants or tech specialists to run the system.*
 - *Subscription includes system maintenance, automatic upgrades, enhancements and application of service packs, Level 1- 3 help desk support, professional services and best practices built directly into the application.*
 - *Data will be hosted in North American data center.*
- System Development Methodology - Agile scrum implementation of Product Lifecycle Methodology.
- **P58 Ariba leverages a Secure Software Development cycle (Secure SDC) that is aligned with ISO 27034 principles. This includes:**
 - Secure code (OWASP Top Ten) training to engineers*
 - Code review by peers before build cycles*
 - Static and dynamic code analysis, with load testing for resiliency*
 - Reviews and approvals at multiple phases for meeting security criteria prior to release to production.*
- Service Level Agreement – one page SLA attached. Referenced above.

Security Requirements (This section is common with IBM submission)

- Cloud Security Alliance (CSA) Compliance = CAIQ 3.0.1 supplied.
 - **MOS-15 – Clarification needed** – How are changes to mobile operating systems, patches performed if not SAP change management processes? No comments provided.
- **Security and Privacy Controls - Needs clarification.** P60 SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines. **Does will SAP intend to become compliant with NIST requirement?**
- *SAP Ariba is audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 every six months. A SOC 3 report is issued annually. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II, SOC 2 Type II.*
- Security Certifications . See previous entry.
 - PCI Service Level 1 compliant;

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program
 - Not HIPPA certified – limited relevance for procurement
- Annual Security Plan – p62 – states plan is internal document. Gives links to request SAP SOC reports. Not included with response.
- Secure Application and Network Environment - 24/7 system monitoring. Firewall separation of SAP corporate with customer cloud.
 - Only SAP authorized staff using SAP authorized computers in data centers.
 - 2FA authentication for SAP staff entering cloud environment.
 - Exception-based authorization for Cloud Engineering to access specific customer cloud instances.
 - P64 *Data disposal practices are aligned with the NIST 800-88 standards for clearing, sanitizing, and data destruction to prevent data remanence prior to retiring or allowing storage media outside of our security envelope.*
- Secure Application and Network Access
 - EPROC-SEC-2 - *Concurrent login is available. SAP Ariba allows for 2 concurrent session for the same user so that mobile and desktop (e.g. report generation) can be used. However, security measures are in place to detect concurrent logins from multiple IP addresses.*
 - Data at rest and in transit encrypted.
 - Detailed descriptions of security provisions provided for hardware and physical premises.
- Data Security – Stated in narrative. P69-70. SAP has DPA setting out terms. **No NIST standards referenced as proposed in RFP.**
- **Personally Identifiable Information Protection – Needs clarification for responsiveness.** P.71 *SAP Ariba are not designed to handle HIPAA data. Our solutions are designed Business to business transaction, and SAP Ariba does not support storing HIPAA/PII/Personal data. For example: SSN, Personal Banking information etc.*
- Security/Privacy Issue Occurrence – Scenario described. Full process documentation stated to be confidential.
- PII Data Actual/Attempted Access or Disclosure – As previous entry.
- Security Breach Reporting – As previous entry.

Implementation Services Requirements

- Project Management Leadership are Engagement Lead and Project Manager – Operational responsibilities, and Program Sponsor – strategic. (p73)
 - PMO defines scope, finalizes resources; implements toolset for risk and issue management; establishes communication protocols; RTM framework and prepares kickoff presentation to communicate standards and expectations.
 - Kickoff - *Joint PMO and led by the program executives from LSI and the State to reinforce the “one voice” concept of leadership*
 - *LSI and the State maintain primary responsibility for their own project team members. The team leads are responsible for coaching/mentoring under-performing resources and providing training as appropriate.*
 - State responsible for establishing issue management repository: *expectation at each project that the State establishes a project repository (i.e. MS Teams, Slack, SharePoint,*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Shared Drive, Google Drive, DropBox) as a platform to manage project issues and documentation of resolution. This repository will provide detailed logging of issues, defects and a robust reporting system based on configurable project scope, categorization, and nomenclature. Guidelines will be established for what constitutes an issue, for severity level classification, and escalation procedures. All team members will have access to the issues database; project managers are expected to review issues regularly and review aging open issues for possible escalation. Additionally, the project repository is a customer-provided and customer-maintained site that utilized by both LSI and customer project team members during a project.

- *Project repository site is front loaded with LSI's pre-configured implementation accelerator templates, strategies, organizational structure, and additional project documentation*
 - *Project requirements traceability matrix provides the framework for managing solution scope and quality throughout the project.*
- *Project Implementation Methodology - SAP Activate Cloud methodology follows Agile principles.*
 - *4-stage delivery model: Prepare; Explore; Realize; Deploy.*
 - *P76 Quality Gates are performed to confirm that all stakeholders of the implementation project agree that specific deliverables meet the requirements and consequently that the project can continue. Project. Verification; Solution Acceptance; Readiness Acceptance; Go-live.*
 - *Sample Phase plan demonstrating task descriptions and responsibilities. P79-81.*
 - *P85 - Realize Phase Sprint 1*
 - LSI consultants will perform unit testing of standard transactions and updating the unit test log. LSI Project Manager shall prepare the Unit Test Summary Report; **State** Project Manager is responsible for review and feedback prior to presentation to executive leadership.*
 - State** is responsible for definition and development of test cases, test scenarios and test scripts representing the comprehensive success criteria for this test phase. LSI shall assist with test case and scenario definition and script preparation.*
 - *LSI Training Lead is responsible for the overall training plan; **State** Training Lead is responsible for providing appropriate schedules for end user training delivery, train-the-trainer candidates, and attendee lists.*
 - *Note: This suggests lean LSI project team with heavier participation from state team than some implementers that will design and lead testing phases.*
- *Catalog Support Services – Needs clarification as to involvement, if any, of LSI personnel in catalog implementation phase. Are SAP staff engaged?*
 - *P94 - SAP Ariba brings to the table specialized Catalog Management services as part of the software subscription to help the State manage their catalog content throughout the State's time using the software.*
 - *SAP catalog management services manage enabled (hosted) catalogs and punchout catalogs. We perform cleansing; the supplier is responsible for uploading catalogs on the Ariba Network. SAP Ariba catalog management services manage the enabled catalogs including validation, cleansing, catalog activation and any subsequent refreshes.*
 - *Enablement of Punch Out catalogs are available as an optional item for additional charges.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- **Data Conversion Services – Six phase plan. Strategy; Analyze; Design; Build; Test/Implement; Deploy.**
 - Minimize data from legacy system.
 - *P96 SAP systems, due to their tight integration, require a very high degree of referential integrity in data being converted. Typical data not converted include inactive vendors and customers, paid invoices, journal entries, requisitions and purchase orders.*
 - *P97 A preliminary analysis is made to determine whether a standard SAP solution exists for the data conversion or whether a custom solution must be built. In addition to this analysis, the best tool is identified for the data conversion, for example, using SAP's Migration Cockpit,*
 - *LSI will be responsible for the design, building, and testing of the programs that read these flat files, as-is, and upload the data to SAP. LSI will rely on State experts to participate in this process by validating the loaded data*
- **Interface/Integration Development Services - LSI will recommend, design and deploy interfaces based on the best practices and the latest tools available with the SAP environment. P98**
 - Interface Strategy Document – LSI designs – includes general architecture of current and future landscapes, file transfer, process of interface design and implementation – evolving document. Sample provided.
- **Organizational Change Management (OCM Services) – Note: one of the most detailed parts of the proposal.**
 - Change readiness assessment. (4 weeks) Understand leadership alignment; evaluate communications processes; understand stakeholders and influencers.
 - Framework - Leadership Alignment model: collective actions; make decisions; identify solutions; validate common understanding; reality check (internal and external); identify gaps.
 - Factors outlined that determine change impacts (p104)
 - Identify business readiness – workforce preparation. Roles: Business readiness Lead; Change Agent; Superuser; Coordinator.
- **Training Services**
- **P 109 Training is divided into two different but critical areas: 1. Project Team Training 2. End User Training**
 - *Functional project team receives the training it needs to conduct the Explore phase using the same system that is being implemented.*
 - *In addition to the LSI provided project team training, SAP Ariba services can provide project team training. Training seats can only be used towards attendance in our Virtual Live Classroom (VLC) public sessions. In many cases, it's recommended the project team participate in the SAP Ariba services training first and then attend the LSI project team training.*
 - *P111 Training for end-users is developed and delivered as a part of the implementation project and modeled after the train-the-trainer methods.*
 - *Training development methodology, LSI Perform. 5 phases – planning through delivery.*
 - *Instructor Led Training – with students working on the system*
 - *Small group sessions for audience sizes up to 8 – coaching/training/ classroom or on the job.*
 - *Generic Ariba guides also proposed. (LSI not proposing to customize for customer.)*
- **Help Desk Services – Note: Like OCM, also one of most detailed parts of proposal.**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) 3:

DATE: 1/14/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- After go-live and hypercare, LSI will perform post-implementation support, SAP Application management support.
 - P117 *These services include ensuring systems are up and performing as per SLA, backups are performed regularly, then also perform any additional services not handled directly by the State basis team, e.g., from the list: troubleshoot any system crashes, recover databases if necessary, applying operating system and database patches as needed, transports, SAP application monitoring, day to day Basis support, security, applying OSS notes.*
 - P117 For consideration will also be SAP HR legal patch applications, and SAP Support packs. Needs clarification “For consideration” means what?
 - EPROC-IMPL1 – separate online support sites for Buyers and Suppliers. Needs clarification – Is this SAP license helpdesk or LSI provided as seemed to be stated on p117?
 - EPROC-IMPL-2 Training and documentation available from LSI to State Help Deks.
 - EPROC-IMPL-3 and -4 – Needs clarification – where is Chatbot hosted? Unnamed solution separate from Ariba support listed in EPROC-1?
 - P119-120 – Three tier support levels proposed. Level 1 – All users; Level II – Limited to identified personnel; Level III – Enhancement Support. Separate cost? Retainer hours referenced – not seen pricing yet.
 - 4-level Priority response time table with small, medium, large state response SLAs.
 - AMS staffing – platinum level consultants with 10+years experience.
 - P125-125 Responsibility matrix for support. SAP/LSI/State
- On-Site System Stabilization Support – 3 month hypercare
 - P126 *purpose of this phase is to support the users as they adapt to the new business processes and to restore/maintain stability of business operations*
 - Defect correct; quality review of projects to determine enhancements, future support needs, verify contract compliance.

Managed Services Requirements

- Solution Support
 - EPROC-MNGD-1 Needs clarification – Is the response SAP’s response that they conduct the monitoring rather than an LSI response? Should this be an LSI response? Is the benchmark measurement reported back to state customer?
 - P127 – LSI Ariba customers run latest versions.
 - P127 As part of the Cloud subscription, our solution provides Customer Support services to help diagnose, troubleshoot, and resolve functional and technical problems for users. LSI’s customer service staff can be contacted via phone (toll free), email or Web from Monday-Friday, 24/5.
 - Different Support offerings based on Small/Medium/Large states.
 - P129 *Unscheduled Outage*
LSI will maintain email listings for each business and service owner of the eProcurement solution including third party Solution components. In the event of an outage, LSI will promptly notify the appropriate contacts of such outage and restoration of service in accordance with what was agreed upon in the contract.
P130 LSI Solution Support security responsibilities include:
 - *User Management Security*

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 8/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization (pg. 2/3)
 - "PaymentWorks is an 8 year old company headquartered in Boston Massachusetts serving customers in a variety of industries including Higher Education, Healthcare, Government and various corporations".
 - "Over 100 enterprise level customers".
 - System "lives in front of the ERP" for any vendor/payee that "needs to enroll to be paid by the State". "Can also collect and maintain documents".
 - Offer "indemnified and warranted ACH payments".
 - "PaymentWorks is able to indemnify against the risks of payments fraud and vendor impersonation due to our partnership with Chubb (the largest provider of cyber and crime insurance)".
2. Previous Projects (pgs. 3/4)
 - **NC State University:** Contract awarded in 2021. System used to onboard suppliers with workflows.
 - **University of Kentucky:** "Business identity management" in PaymentWorks which initiates "new vendor invites, approve new vendors and approve updates", "sends the payee invitation; screens TINs and sanction lists, confirms banking, sends new vendor registrations and notifications, and sends push updates to the university".
 - **University of Tennessee:** RFP in 2019, awarded to PaymentWorks for a "complete supplier information management solution."
3. Subcontractors
 - No subcontractors.
4. Organizational Chart (pg. 4/5)
 - Org chart not provided but the project "team" is identified appears to fit the needs for a project implementation of the proposed solution.
5. Litigation
 - No litigation.

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements, pg. 1/2:

- "cloud-based business identity platform that allows for payers and payees to exchange validated information in order to conduct business and send/receive payment securely."
- "PaymentWorks is accessed by State employees behind your existing SSO (single sign-on)."
- "accessing PaymentWorks for the first time there is a dynamic smart-routing function that will direct individuals to questions"
- "As payees enroll on the network their identity information is validated automatically via 3rd party integrations such as the US Postal Service, IRS TIN Matching service, the Early Warning Banking Consortium, OFAC, sam.gov, state/federal debarment lists and other compliance reviews."
- "Compliance monitoring is ongoing and can screen against over 400 potential debarment and sanction lists."
- "PaymentWorks portal/network is meant to complement existing ERP and eProcurement solutions to provide identity verification and certainty for every payee the State will issue a payment to."
- "PaymentWorks will be responding to the eSoftware sections of the State's RFP for **Supplier Portal and Supplier Enablement/Management.**"
- "PaymentWorks can also collect and maintain documents such as insurance, diversity (MWBE), and conflict of interest attestations. When a certificate is set to expire the system can automatically notify the vendor alerting them prior to the expiration date and prompting them to update their certificate on PaymentWorks"

User Experience, pg. 3:

- Personalization: "solution can be branded"
- Intuitive Navigation: "solution is simple, intuitive and user friendly for both payers and payees"
- Wizard-driven: "The two sided network is complete with FAQs, help buttons, training manuals and videos with the click of a button."
- Mobile access and use: "solution will render appropriately on a mobile device,"
- Workload Mgmt: "has a variety of prompts and notifications to assist both payers and payees in order to optimize their work management experience"
- Role-Based:
 - o "allows for customizable user rights and permissions so staff with certain job requirements are only able to action or view data relevant to their job".

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 12/28/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "Role-based functionality and approval models can be customized to meet the needs of the State."

Bidder Best Practices and Roadmap, pg. 3/4:

- "PaymentWorks is an evolving and nimble solution that caters to our customers requirements and goals."
- "We are cloud-based and hosted on AWS to provide our customers with a flexible, optimized and most importantly a secure solution to supplier information management."
- "current solution roadmap aims to focus on adding new validations, and partnerships with banks, P2P systems and ERP systems to further simplify the connections and ability to turn on PaymentWorks."

Innovations and Value-Added Features/Services, pg. 4/5: No additional value-add features or services identified. The following are included as part of the Solution.

- Tax ID Number validation through a 3rd-Party Service that checks the IRS database.
- Sanction List/Debarment status check "against hundreds of sanction and debarment lists, including OFAC, SAM.gov and state/local debarment lists".
- Remittance/Corporate Address verification against the US Postal Service database.
- Bank Account Details verification using "a proprietary algorithm"
- "PaymentWorks also monitors IP addresses, email domains and website domains to ensure identity certainty."
- Payment Fraud Protection and Transfer of Liability "provided through a Warranty in the PaymentWorks Services Agreement"

Customizations/Extensions, pg. 5: Response did not address the req't for customizations to become part of the base product.

- "Small or nuanced customization is always part of the enablement process. This is expected and part of the project plan, timeline, and change request process."

Alternative Funding Models, pg. 5/6: No response provided

Contract Transition and Flexibility, pg. 6:

- "PaymentWorks is flexible and open to contract amendment or transition to newly awarded master agreements."

Functional Requirements

General Functionality, pg. 6-9: Partially meets req'ts.

- "is a cloud based, SaaS, solution hosted on AWS."
- "is a full service supplier portal that also validates payee details at the time of enrollment, provides ongoing compliance and sanction monitoring services and indemnifies against the risks of payments fraud."
- "if a payee is already registered in the PaymentWorks network doing business with another one of your agencies, this payee will already be on the network and can easily log back in with their username and password to provide their information to the new requester."

STATE OF MAINE INDIVIDUAL SME NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 12/28/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- "able to grant access to employees through your existing Single Sign On (SSO) which PaymentWorks can live behind."
- "PaymentWorks vendor network allows all payees the ability to self-serve and view invoice status, remittance details and update their identity information ad hoc and as needed"
- Platform functionality:
 - o *Payments Fraud Indemnification* (Underwritten by CHUBB): "PaymentWorks will act as the "system of record" for payment credentials and will send a token to Maine's ERP system in place of the bank account details." CONCERN, Participating Entities may not be able to accept this 3rd part as being the 'system of record' for supplier.
 - o *Robust Payee Registrations and KYB (Know Your Business) Management*:
 - "payee Self-Service to create and manage their own accounts and profiles in an encrypted, credential environment."
 - "PaymentWorks auto generates electronic W9s based on validated information, collects W8/W8BEN and stores additional required documents, and meets IRS requirement 1099 information collection."
 - o *Easy ERP Interface & Complex Account Structures*: "bidirectional feed between PaymentWorks and Maine's system(s)"
 - o *Automated Payee Identity Validations and Sanction Monitoring*
 - o *Internal Workflows, Approvals, and Business Controls*: "provides a robust, multi-step approval workflow that can be applied for a) payee invitations, b) registrations, and/or c) profile updates."
 - o *The Network*: "built with a network of connected suppliers to various business entities"
 - o *Receive & Send Messages*: "message within the platform", "individual supplier communication and new updates for broadcast notification"
 - o *Report/Export (Data Extraction) of Payee Records*: "can be extracted manually (ad hoc) or programmatically"
 - o *Reimbursements*: for "payments not requiring the submission of tax information"

RTM (GEN 1-40)

- N/A, GEN-2 through GEN-10 (eProc)
- WEAKNESS, GEN-11: Uploaded documents do not have textual descriptions.
- N/A, GEN-13 through GEN-15 (eProc)
- WEAKNESS, GEN-17: System does not allow a State to enable or disable any new functionality. New functionality must be taken with an upgrade.
- N/A, GEN-18 through 21 (eProc)
- N/A, GEN-24 (eProc)
- WEAKNESS, GEN-25: The From on a system generated email will have the "paymentworks.com" domain.
- N/A, GEN-26 through 28 (eProc)
- N/A, GEN-31 (eProc)
- POTENTIAL WEAKNESS, GEN-35: System does not have a Comments library for standard comments.
- N/A, GEN-36 (eProc)
- POTENTIAL WEAKNESS, GEN-39: System does not provide a public posting website as part of the Solution.
- Two req'ts need clarification.

**STATE OF MAINE
INDIVIDUAL SME NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 12/28/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Supplier Portal, pg. 10: Partially meets req'ts

- "PaymentWorks acts as the secure front door for all of the state's non-payroll Accounts Payable payees."
- "supports ongoing compliance and debarment monitoring and notifies customers of sanction alerts as they occur"

RTM (SPR 1-23)

- N/A, SPR-4 through 13 (eProc)
- N/A, SPR-16 (eProc)
- WEAKNESS, SPR-18: System does not have specific vendor complaint functionality for reporting problems or Supplier responding. Must use the messaging feature of the system instead.
- N/A, SPR-19 through 23 (eProc)
- Two req'ts need clarification.

Supplier Enablement/Management, pg. 10: Partially meets req'ts.

- CONCERN, Supplier accounts and management functionality is focused on the needs of the Finance system and has issues/gaps for meeting eProcurement needs (e.g. no Commodity Codes on registration, VDR-11 & 12).
- CONCERN, PaymentWorks is intended to capture Suppliers that the State needs/intends to pay. It is not designed to establish Suppliers who only need accounts to Bid and would not want to provide the other information. Also a CONCERN that all Suppliers would be sent to the ERP including those that the State does not need to pay because they have not received a Contract or PO.
- "Suppliers, vendors, and payees create a PaymentWorks profile upon receiving their initial PaymentWorks Invitation"
- "can communicate with the ERP system (CGI) continuously receiving invoice status files to ensure up to date payment and invoice information is at the fingertips of payees"

RTM (VDR 1-43)

- WEAKNESS, VDR-11 & 12: PaymentWorks is being put forward as a Supplier Management tool that could work with eProcurement systems but it does not capture commodity codes for a Supplier.
- STRENGTH, VDR-18 through 26: System has very robust Supplier data validations OOTB without having to implement new integrations.
- WEAKNESS, VDR-30: State cannot create or maintain Supplier accounts.
- WEAKNESS, VDR-36: System does not provide a yearly reminder to Suppliers to update their account.
- N/A, VDR-39 & 40 (eProc)
- POTENTIAL WEAKNESS, VDR-41: System does not provide a means to do broadcast email messaging to Suppliers.
- N/A, VDR-43 (eProc)
- No req'ts need clarification.

Buyer Portal – N/A

Need Identification – N/A

Request through Pay – N/A

Catalog Capability – N/A

Sourcing/Bid Management – N/A

Contract Management – N/A

Vendor Performance – N/A

Purchasing/Data Analytics – N/A

Technical Requirements – pg. 11-32

Availability, pg. 11: Meets req'ts.

- “available to customers and payees 24 hours a day and 7 days a week. This includes peak use hours of 7am-6pm local time, Monday-Friday.”

Accessibility Requirements, pg. 11: Partially meets req'ts.

- Provided VPAT report link which tested the system for Web Content Accessibility Guidelines 2.0, Level A, AA, AAA. Pass most of the Level A but failed most of AA and AAA.

Audit Trail and History, pg. 11 & TECH-1 thru 5: Does not meet req't to have history/log access without Administrator support.

- “Audit logs are stored in AWS CloudTrail.”
- “logs are available through the PaymentWorks internal administration console, and can be available upon request.”

RTM

- N/A, TECH-4
- Meets req'ts.

Browsers Supported, pg. 11/12: Partially meets req'ts. Response did not address monitoring browsers traffic, supporting browsers ranked as more than 10% of web traffic and testing the solution with multiple browsers.

- “All major web browsers are supported including:
 - o Google Chrome: Version 36 and newer
 - o Microsoft Edge: Version 20 and newer
 - o Firefox: Version 37 and newer
 - o Internet Explorer Version 9 and newer
 - o Safari: Version 5.x and newer”

- N/A, TECH-8
- N/A, TECH-9
- NOTE, TECH-10: Response to TECH-7 & 9 provide details on user account creation and roles.
- N/A, TECH-12
- N/A, TECH-13
- N/A, TECH-14
- POTENTIAL WEAKNESS, TECH-15: System does not have capability to disable user access, must be done through the State system since employee access to PaymentWorks is enabled through the State IdP.
- WEAKNESS, TECH-16: System does not have functionality to automatically deactivate user accounts after a period of inactivity.
- POTENTIAL WEAKNESS, TECH-17: System does not make the req'd user information (fname, lname, date/time of last login, date/time of last password change) visible on the user landing pages.
- One req't needs clarification.

User Authentication, pg. 12 & TECH-21 thru 25: Partially meets req'ts.

- For State employees
 - o "requires customers to authenticate through Single Sign On (SSO). "
 - o "As a result Two-Factor Authentication is enabled through your IdP. "
- "Two-Factor Authentication for vendors is available to the payee community" (Supplier side)
- "PaymentWorks is a SAML2-compliant Service Provider that supports integrations with a variety of Identity Provider types, including Shibboleth and ADFS."

RTM

- POTENTIAL WEAKNESS, TECH-21: System depends on State's IdP to provide 2-Factor authentication for State employees. System can provide it for Suppliers.
- POTENTIAL WEAKNESS, TECH-24: State's IdP must enforce auto-generation of State passwords since the system does not have user authentication for the customer side.
- WEAKNESS, TECH, 25: "Additional cost" may be charged to implement end user acceptable use agreements.
- One req'ts needs clarification.

Federated Identity Management, pg. 12/13: Meets req'ts.

- "Solution provides user login capabilities that can be integrated with the Participating Entities existing Federated Identity Management system"

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 1/22/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

Single module – not specifically a procurement product.

Supplier enablement – standalone module?

Reduce risk of payment fraud.

General Principal and Requirements

- Key Solution Functionality Elements – Payee (Supplier) verification/validation
 - Integrates to SSO.
 - Single point of entry on supplier side to update identity and payment info, see communications from payers and access status on invoices.
 - P2 identity information is validated automatically via 3rd party integrations such as the US Postal Service, IRS TIN Matching service, the Early Warning Banking Consortium, OFAC, sam.gov, state/federal debarment lists and other compliance reviews.
 - lives in front of the ERP as the front door for all payees to ensure compliance and verified information is received and relayed to the ERP (vendor master file). API or SFTP integration option.
 - P3 Maintain documents including insurance MWBE, etc.
- User Experience – Branded to customer.
 - Role-based access – Payers can invite payees
 - Payees see records and can maintain current information.
- Bidder Best Practices and Roadmap
 - P4 roadmap aims to focus on adding new validations, and partnerships with banks, P2P systems and ERP systems to further simplify the connections
- Innovations and Value-Added Features/Services
 - P4 ensure compliance, fraud-prevention and security of the vendor file.
 - P5 utilizes a proprietary algorithm to check supplier submitted bank account numbers, routing numbers and the name on accounts. monitors IP addresses, email domains and website domains to ensure identity certainty.
 - P6 – can underwrite payments against fraud – default is \$2 million. (Chubb) These additional value adds are unique to PaymentWorks and meant to address the number #1 form of cybercrime today; business payments fraud
- Customizations/Extensions – most out-of-box.
 - P5 some custom fields or modifications that customers can make to their vendor facing intelligent enrollment form,
 - PaymentWorks can be utilized as a standalone UI. Minimal IT integration. (Phase 1)
- Alternative Funding Models – N/A
- Contract Transition – open.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 1/22/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Functional Requirements

- General Functionality – cloud-based SAAS solution.
 - P6 ERP agnostic, Payment Type agnostic, Bank agnostic and meant to complement your existing tech stack
 - Table on P7-9 discusses functionality. Business detail verification, including current certifications required, conflict of interest declarations
 - Network of payment suppliers – validations against network.
 - EPROC-GEN-2 – Integration is to ERP not sourcing tools.
 - EPROC-GEN-38 – Subscription cost is based on supplier volume; internal licenses are unlimited.
- Supplier Portal – P10 ongoing compliance and debarment monitoring and notifies customers of sanction alerts as they occur.
- Supplier Enablement/Management - two-sided business identity platform
 - P10 payee community is able to self-serve and attain critical payment status information once they become a member of the PaymentWorks network
 - Suppliers, vendors, and payees create a PaymentWorks profile upon receiving their initial PaymentWorks invitation. Invoice statuses, rich remittance details and direct messaging with payers is available to the payee community
 - Needs clarification – what support exists to assist suppliers onboard?
- ~~Buyer Portal~~
- ~~Need Identification~~
- ~~Request through Pay~~
- ~~Catalog Capability~~
- ~~Sourcing/Bid Management~~
- ~~Contract Management~~
- ~~Vendor Performance~~
- ~~Purchasing/Data Analytics~~

Technical Requirements

- Availability 24/7- AWS hosted.
- Accessibility Requirements - Web Content Accessibility Guidelines 2.0 levels A,
- Audit Trail and History – P11 Audit logs are stored in AWS
 - All other logs are available through the PaymentWorks internal administration console, and can be available upon request.
- Browsers Supported - Common browsers – plugins not required.
- User Accounts and Administration. – States required to use SSO.
 - Permission-based access roles related to access requirements for use.
- User Authentication — P12 SAML2-compliant Service Provider that supports integrations with a variety of Identity Provider types, including Shibboleth and ADFS
- Federated Identity Management – See previous.
- Data Conversion – No description of process for mapping or to validate data prior to import via API or CSV. (Needs clarification – is assumption customer only sends validated data?)
- Interface and Integration – ERP agnostic P13
 - customer-specific SFTP file exchange service or our REST-based API for the integration process. Integration involves a set of four scheduled routines:

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: PaymentWorks

CATEGORY #(s): 3

DATE: 1/22/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- 1. New vendor records retrieved from PaymentWorks (typical interval: 15 minutes)
 - 2. Vendor confirmation files uploaded to PaymentWorks after new vendors are created in ERP
 - 3. Approved Vendor profile modifications sent to the State's ERP (CGI).
 - 4. Nightly snapshots of new and modified invoice records for Vendor viewing.
- Office Automation Integration – documents can be uploaded. Not a document drafting solution.
- Mobile Device Support – Renders on mobile via browser.
- Mobile Applications – No app
- Data Ownership and Access – State customer owns data. Can extract on demand.
- Data Retention, Archive and Purge Considerations – Policy is to retain data during contract term.
 - PaymentWorks provides the ability to remove invoice and supplier data based on the rules that work for your organization
- Disaster Recovery Plan – DRP provided via link.
- Solution Environments – Sandbox and Prod. (testing and training)
- Solution Technical Architecture –
 - Data downloaded – new vendor reg; vendor updates.
 - Data uploaded – supplier records from ERP; invoice upload; payments upload for transaction review
 - Access for migration through UI, SFTP or API.
 - Descriptions of routing process provided; methods to connect different data types.
- Solution Network Architecture – AWS hosted.
- System Development Methodology
 - P30 library of
 - tests that are applied prior to any new release to ensure quality and long-term solution success.
 - Additionally, PaymentWorks Customer Service personnel perform manual testing on critical updates
 - before they are delivered to Production
- Service Level Agreement – Support- Online self-service; email from help icon within app; phone *EST-5PST. Response levels – 1-3 severity. 2-14 hours

Security Requirements

- Cloud Security Alliance (CSA) Compliance – No CAIG or CCM available.
- Security and Privacy Controls – P32 PaymentWorks policies were originally developed around applicable ISO 27001 controls. As needed we have additionally included relevant NIST 800-53 and best practices recommended by AWS. Soc1 Type II on request.
- Security Certifications - None
- Annual Security Plan – plan linked.
- Secure Application and Network Environment – P33 Supplier access via 2FA. State access via SSo. 256-AES encryption for data at rest.
 - Data in transit through our APIs or via the user's web browser occurs over HTTPS/TLS 1.2. All FTP communications are done via SFTP.
 - Recovery timeframe generally described as hours. No specifics.

- Secure Application and Network Access – SSL validation on Prod. Software updates in cloud – no customer action.
- Data Security – extensive plan described.
 - Payment works will assess compliance for auditing.
 - *P37 Sensitive or personal information and data held on any media must be physically destroyed when due for disposal or no longer required. Procedures for identifying media that requires secure disposal must be implemented and an audit trail of any media passed to external organizations must be maintained.*
- Personally Identifiable Information Protection – PII is held. GDPR compliance.
 - *P38 Data will not be kept for longer than is necessary. Unrequired data will be deleted as soon as practicable. Some records relating to former customers of the company may be kept for an extended period for legal reasons.*
- Security/Privacy Issue Occurrence – Specific timelines for reporting will comply with state. No standard stated.
- PII Data Actual/Attempted Access or Disclosure – Breach reporting process described.
 - Tickets entered.
- Security Breach Reporting – See previous.

Implementation Services Requirements

- Project Management – Paymentworks provided out of box configuration.
 - Services to configure environments; roles; approvals process; SSO; training; PM to coordinate resources and deliverables.
 - Table provided for PW and State responsibilities. Phase 1 standalone; Phase II automations – 4-6 months later.
 - ERP integration is state's responsibility.
 - Included up to 20 hours for PW requirements to set up communications, testing for ERP integration.
 - Optional extra consulting for ERP.
 - Technical resources identified for PW; roles identified for customer.
- Project Implementation Methodology – Phase 1 – 2-3 months; Phase 2 – 4-6 months.
- ~~Catalog Support Services~~
- Data Conversion Services – State has to meet supplier, invoice and payment file requirements to submit data.
- Interface/Integration Development Services – Phase 1 SSO, supplier field, payment file; Phase II - ERP
- Organizational Change Management (OCM Services) – Customer success manager indefinitely for customer support, reviews, coaching and strategic training.-. PM and state enablement teams with meeting.
- Training Services – Initial payment works supplied training. Can do train the trainer approach. – available video library. Customer success managers can assist with materials.
- Help Desk Services
 - Support team for users;
 - Support to payees is currently available via phone and email.
 - Customer success manager is primary resource for customer; will triage to IT and technical.

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: SirionLabs

CATEGORY #(s): 3

DATE: 8/27/21

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- “Founded in 2013, SirionLabs (Sirion) has nearly a decade of rich experience in delivering Contract Lifecycle Management projects”. (pg. 3)
- Has “more than 200+ customers worldwide” including Public Sector and Fortune 500 organisations”. (pg. 3)
 - i. “Greater Toronto Airport Authority (GTAA), Georgia Technology Authority (GTA), Department of Transport (UK), BP, Chemours, Vodafone, Unilever, SC Johnson, BNY Mellon, Credit Suisse, Morgan Stanley etc. Greater Toronto Airport Authority (GTAA), Georgia Technology Authority (GTA), Department of Transport (UK), BP, Chemours, Vodafone, Unilever, SC Johnson, BNY Mellon, Credit Suisse, Morgan Stanley etc..
- Has over 550 global resources” with presence in “USA, Canada, UK, Netherlands, Germany, Singapore and India”. (pg. 3.)
- “Platform automates all key governance disciplines – contract management, performance management, invoice auditing and buyer-supplier collaboration”. (pg. 5)
- “SirionLabs is ISO27001: 2013 certified by British Standard Institution (BSI). SirionLabs is also SOC2 Type1 as well as GDPR compliant”. (pg. 6)
- Recognitions: (pg. 6)
 - i. CLM Leader in The Forrester Wave™: Contract Lifecycle Management for All Contracts, Q1 2021.
 - ii. Visionary in Gartner's Magic Quadrant for Contract Life Cycle Management, 2020 and 2021
 - iii. Value Leader in Spend Matters' Contract Lifecycle Management Solution Map Fall 2020 Report, for the sixth time
 - iv. 2020 Deloitte Technology Fast 500 Winner
- Sirion uses Amazon Web Services (AWS) to host our solution. (pg. 10)

2. Previous Projects

- **Georgia Technology Authority (State of):** SirionLabs's Contract management and governance. Manages over 3,000 obligations US\$800M in contracts. 140+ suppliers onboarded, (pg. 11)
- **Greater Toronto Airports Authority (GTAA):** SirionLabs's contract management & supplier management solutions used for Document Repository, Performance, and

SME DEPARTMENT/STATE: NASPO

Collaboration modules. Over 1,500 contracts with 975+ suppliers, C\$570M+. Manage 3500+ obligations/SLs. (pg. 12)

- **BNY Mellon:** SirionLab's CLM, AE, Performance modules. Contract repository for 40k+ contracts, 100+ suppliers, \$4.3B in contract value, 29K+ obligations, 1.2K+ SLs/KPIs. (pg. 13)

3. Subcontractors (pg. 14)

- Sirion's partnership include the firms below" for implementation. Sirion is also capable of implementing our platform solutions with our own staff.
 - i. KPMG: KPMG is Sirion's preferred Alliance Partner in the public sector space
 - ii. Nitor Partners:

4. Organizational Chart (pg. 15 and 'SirionLabs Organization Chart.pdf' doc)

- The provided org charts are corporate charts, not for a project implementation. So cannot assess.

5. Litigation

- "There is not a pending matterh that c ould or would materially impact or affect our ability to deliver our services considered in this proposal". This statement implies that there may be some litigation. RFP requirement was to list "all", not just those that would impact their proposal.

6. Financial Viability

- No financial information provided.
- "As a private company, we are unable to share written financial information at this stage". However they are willing to "organize a teleconference with our CFO".

Individual SME Comments:

General Principal and Requirements *NOTE: the responses to this section are the same as Cat 2 KPMG-Sirion*

Key Solution Functionality Elements, pg. 5-10:

- **Single Point of Entry** (pg. 5):
 - o "integrates with SSO and can integrate with an entities procurement, ERP, CRM, services desk, etc. systems".
 - o Users are taken to a single, role-based screen w/dashboards.
- **Smart Routing** (pg. 5):
 - o "delivers an advanced workflow engine that supports high configurability"
- **Compliance:** No response provided
- **Portal** (pg. 6):
 - o "provides an integrated portal for suppliers/vendors to collaborate throughout the life of the contract"
 - o External Parties - STRENGTH
 - "Multiple users in parallel can edit parts of the contract... system automatically reconciles and consolidates" changes into single version.
 - "provides collaborative chat functionality within MS Word environment".
 - "use @ to tag another user" which sends an email to that user
 - "using # user can assign clauses within the contract to other user". "will navigate the user to the actual clause position the requires review".
 - Sirion MS Outlook plug-in will automatically capture email notifications to external users and their responses using "# code methodology". Appends "in the comments and attachments section of the" contract record.
- **Open Marketplace Environment** (pg. 6/7): N/A. Proposal isn't including Catalog functionality. The narrative response in this section describes the Contract Search functionality instead.
- **Integration** (pg. 7):
 - o "provides two-way integration" via REST API-based integration interfaces.
 - o STRENGTH, includes OOTB "integration adapters" 'such as ERP, P2P, IT Service Management (ITSM), Governance Risk & Compliance (GRC) and CRM systems'.
 - P2P: Ariba, Coupa, Ivalua
 - CRM: MS Dynamics, Salesforce, Oracle
 - ITSM: ServiceNow, Remedy
 - ERP: Oracle, SAP
 - Contingent Workforce Mgmt Systems: Beeline, SAP Fieldglass, Workday
 - GRC: D&B, RSA Archer, MetricStream

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Sirioin

CATEGORY #(s): 3

DATE: 12/27/2021

SME NAME: Robert Sievert

SME DEPARTMENT/STATE: NASPO

- **Workflow** (pg. 7/8), STRENGTH: “provides an advanced engine that supports highly configurable workflows”. “can be conditional, and made contingent on key attributes of the contract”
 - o “unlimited steps, views, permissions, conditional steps”
 - o “Multi-party workflows involving client and their supplier users”
 - o “access controlled” to limit user capabilities for their workflow step
 - o “Ability to configure probes in a workflow to measure lead times, aging, cycle time, etc.”
- **Document Management** (pg. 8):
 - o “tracks all contracts, related attachments, and amendments”.
 - o “no storage limit on contract and related document storage”
 - o “access rights can be configured”
- **Reporting, Dashboards & Data Visualization** (pg. 8/9):
 - o “over 250 reports and dashboards” OOTB.
 - o Allows users to “create and save customer reports and dashboards”
 - o “dashboards are interactive and exportable”
- **Configurable** (pg. 10):
 - o “user access management provides granular rule, role and instance-based access, with an unlimited variety of combinations”
 - o “allows simple configurations of multi-geography, multi-business unit teams”
 - o Role-Based (pg. 10):
 - “Role Based Access Control (RBAC) whereby users may be assigned access rights”
 - **User role groups:** Access templates containing a predefined set of operations a user assigned to **this templates may perform**”
 - **“Entity stakeholders”:** “platform contains multiple entity types such as counterparty, obligations, actions, etc.” and each “entity type contains a set of stakeholders with assigned permissions”
 - STRENGTH, **“Individual user access:** Each user has a profile and can be assigned custom permissions to perform system operations and access data”
- **Transparency** (pg. 10): “simple integration with third-party applications, enabling real-time data transfer and can further work to review” needs for contract visibility to existing or new portals”. CONCERN/POTENTIAL WEAKNESS, system does not have public access capabilities OOTB.

User Experience, pg. 10-:

- **Personalization** (pg. 10/11): “provides user-based views to be saved based on role, need, or use case”
- **Intuitive Navigation** (pg. 11): “navigate with a pop-out menu and functional areas can be access via dashboards”.
- **Wizard-driven** (pg. 12-14):
 - o “online help manual” that is “full-text searchable, enabling user to find succinct answers”.
 - o “also offers an FAQ section”
 - o “guided navigation with pop-up help and next step guidance for users”
 - o “provides users with the ability to respond to an intuitive questionnaire to answer the type of contract required”. Based on the “values provided”, system “prompts best match templates from the configured template library” to “start the contract creation process”.
- **Portal** (pg. 14): “users can see their actions from their dashboard, while managers can see workloads for reassignment”

SME DEPARTMENT/STATE: NASPO

- **Mobile access and use** (pg. 14/15): “utilizes a web design that can be accessed on any web-enabled device”. NOTE: “a dedicated mobile app is slated for release later in 2021” which will “allow users to customize dashboards, view/act on requests, conduct advanced search and can open documents via Sirion document viewer”. CLARIFICATION, did this mobile app get released and what are the details of it’s functionality?
- **Workload Mgmt** (pg. 15/16): “provides review & reports of workload, and resassignments are managed within the platform”

Bidder Best Practices and Roadmap, pg. 16-18 :

- “multi-tenant SaaS-based application, built for scale and security”
- “has a quarterly release cycle”
- “Sirion was founded by legal and contract practitioners” and with KPMG the “combined approach should help ensure consistent practices and processes”
- “conducts monthly governance meetings and quarterly business reviews with customers to obtain feedback” on support and product enhancements”

Innovations and Value-Added Features/Services, pg. 18: Did not offer anything additional, just promoted their tool.

- “Sirion offers automated obligation and services level management functionality”

Customizations/Extensions, pg. 18: NOTE, did not commit to incorporate changes required by the Contract into the solution however as they have defined their SaaS, any changes are part of the base system.

- “upgrades are backward compatible”
- Pg. 17: “As a SaaS solution, Sirion is always updated to the latest version automatically with every release”

Alternative Funding Models, No response provided.

Contract Transition and Flexibility, pg. 18:

- “Sirion is committed to discussing mutually agreed terms”

Functional Requirements – pg. 19- *NOTE: the responses to this section are the same as Cat 2 KPMG-Sirion*

General Functionality: There are req’ts that they should have responded to in this section that are relevant to their proposed modules (e.g. GEN-1, GEN-8, GEN-10, GEN-11)

Contract Management, pg. 19/20: Very mature and comprehensive tool.

- STRENGTH, Template Library (pg. 13 & 19)
 - o “configurable “ clause/definition libraries (pg. 13)
 - Can load “several variations of the same clause/definition”
 - “Capture standard and custom attributes for each clause/definition”
 - “Specify position for each clause/definition variation” (“preferred, fall back and walkaway”)
 - “Easy identification of required clauses/definitions”
 - Assemble templates by “dragging and dropping clauses”
 - “Templates maintenance process... informs template owners of any updates made to the clauses”
 - “Each clause identifies the related templates”
 - o “Comprehensive clause and template libraries with smart tags” (pg. 19)
 - o “Autosuggestion of templates and wizard” for “draft assembly”
 - o “Risk scores assigned at the clause level” to calculate “overall risk score”
 - o “Configurable workflows”
 - o STRENGTH, 3rd Party Paper: AI will extract meta data from an uploaded document and identify the clause sections of the 3rd party paper to standard clauses in the Template and compares automatically to standard clauses in the system to highlight differences. (pg. 20 & Video)
- Collaboration/External Parties – STRENGTH (pg. 6 & 19/20)
 - o “Multiple users in parallel can edit parts of the contract... system automatically reconciles and consolidates” changes into single version.
 - o “provides collaborative chat functionality within MS Word environment”.
 - “use @ to tag another user” which sends an email to that user
 - “using # user can assign clauses within the contract to other user”. “will navigate the user to the actual clause position the requires review”.
 - o Sirion MS Outlook plug-in will automatically capture email notifications to external users and their responses using “# code methodology”. Appends “in the comments and attachments section of the” contract record.
 - o Collaborative Mode (Video) – multiple editors of the Word doc where only one person can edit a clause section but other users can see the changes that are happening at the same time. Effectively user is checking-out a Clause Section.
- “Hierarchical contract repository” (pg. 19)
- “Alerts and advance notifications for upcoming contract renewals/expiration” (pg. 19)
- Reports/Dashboards (pg. 8 & 20)
 - o “Personalized dashboard configuration for different user roles” (pg. 20)
 - o Users can set up a Schedule for a report to be sent out in email to other users. (Video)
 - o from Pg. 8:
 - “over 250 reports and dashboards” OOTB.
 - Allows users to “create and save customer reports and dashboards”.
 - “dashboards are interactive and exportable”

- From Video

- For reviewing/approving Contracts, each document is routed based on rules.
 - **STRENGTH:** has Sirion action Bar within Word to make Sirions Contract records and actions available within Word.
 - Directly look at Clause options from Library that could be pulled in to insert or replace existing clauses.
 - "Save to Sirion" to version doc in Sirion. Save has Comment field to explain what's changed and will prompt you to update the Workflow step the doc is at.
 - Can Share drafted Word Doc via email to anyone, not just Sirion user. If that user makes changes, this will go back to Sirion automatically.
 - **STRENGTH:** Sirion is embedded in Outlook with direct access to Sirion feature of Contract Requests.... So you can initiate a Request from Outlook and access existing Sirion in-process Contract Requests... can drag/drop attached docs in email to the Contract Request record.
- Review of edited/changed doc will show specific Clause changes.
- **STRENGTH:** Routing document for review/editing: can route only specific clauses to specific users for review/editing instead of the entire document.
- Master Agreement Type contracts will let you do child contracts/agreements in a hierarchy and will inherit the detailed Meta data from the Parent MSA
- **STRENGTH.... SEARCH-** all documents are indexed for full content search and can filter searches to reduce results.
 - For document content matches has a link in the results that will open a Viewer to show directly where that search content exists.

RTM

- **STRENGTH, CNT-7:** Co-authoring functionality allows for check-out of specific clauses in a document that is being edited by other users at the same time.
- **WEAKNESS, CNT-10:** Maximum file size for "support document" attachments is 200MB.
- **STRENGTH, CNT-23:** Document authoring capabilities and integration with MS Office products is very mature, robust.
- **STRENGTH, CNT-25:** Document authoring capabilities and integration with MS Office products is very mature, robust.
- **WEAKNESS, CNG-32:** Maximum size for each attached document is 200 MB.
- **CONCERN, CNT-38:** The described means of capturing Sub-contractors/Re-sellers describes defining suppliers related to each other as long term relationships like a corporate structure, not as a Prime/Sub relationship for a single contract.
- **POTENTIAL WEAKNESS, CNG-45:** System does not have a public posting capability. Must integrate with another system or website.
- **POTENTIAL WEAKNESS, CNG-51 through 66:** System does not have a public posting capability. Must integrate with another system or website.
- No req'ts need clarification.

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: SirionLabs

CATEGORY #(s): 3

DATE: 9/27/21

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Contract lifecycle management module (CLM)
 - Global project footprint
 - Can integrate with ERPs
 - Detailed improvements in platform vs. older CLMs. Noted standardization improvements and integrations with other tools; contract analytics; mixed technology environment; contract repository.
2. Previous Projects
 - Georgia Technology Authority
 - Toronto (Canada Airport)
 -
3. Subcontractors
 - Optional: KPMG (preferred deployment sub) or Nitor Partners
 -
 -
4. Organizational Chart
 - Corporate individual/title list
 - Account management – title chart
5. Litigation
 - None
 -
 -
6. Financial Viability
 - D&B not provided. (private company) Request only.

Individual SME Comments:

Contract Lifecycle Management tool only

General Principal and Requirements – **No General Functionality RTM submitted**

- Key Solution Functionality Elements – Single sign on – integrates with ERP, CRM.
 - Draft contracts – multiple users can input in parallel. Folders show contract documents and note versions.
 - Integrated document viewer.
 - Price sheet can be uploaded or entered into the contract design/template.
 - OCR conversion of non-searchable documents.
 - Rule-based approval workflow with email notifications and reminders.
 - Dashboard with 250 standard reports.
 - Various role- or rule-based accesses.
 - Compare third party and internal documents in review process. AI can flag variations.
- User Experience – intuitive questionnaire to get to contract type; training program; online help/FAQs.
 - Templates — legal and non legal — for contract drafting. Two versions can be compared and tracked using Word plugin.
 - Audit trail
 - Mobile responsive design. (Mobile app planned for 2021)
- Bidder Best Practices and Roadmap – automatic latest version releases – matches – maximum one daily; minor enhancements max1 every two weeks; quarterly major releases.
- Innovations and Value-Added Features/Services – N/A
- Customizations/Extensions normal updates.
- Alternative Funding Models N/A
- Contract transition – may be doable.

Functional Requirements – **Functional RTMs submitted for Contract Management and Vendor Performance only. All are either A, INT or CF.**

- General Functionality
- Supplier Portal
- Supplier Enablement/Management
- Buyer Portal
- Need Identification
- Request through Pay
- Catalog Capability
- Sourcing/Bid Management

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Sirion Labs

CATEGORY #(s): 3

DATE: 1/20/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract Management – Contract repository – change management, renewals and expirations; notifications.
 - Analytics; invoice management; collaboration tools.
- Vendor Performance – supplier uploads. Kpis for vendors. Performance management. Visibility into contract drafts.
- Purchasing/Data Analytics

Technical Requirements

- Availability – target uptime is 99.8%. Actual is 99.5% Runs on AWS. Daily backups. Environments sync every 30 minutes.
 - 3 severity levels. Response 1 90% in 2 hours. Up to 3 90% in 1 day.
 - 24/7 support (ticketing and email); 24/7 phone support optional.
- Accessibility Requirements -WCAG 2.0
- Audit Trail and History – strong feature/ P27 – full annotation of version changes.
 - Audit trail and audit log – metadata-level change history. Log can't be edited by users.
- Browsers Supported – Standard browsers.
- User Accounts and Administration – exhaustive library of roles. Multiple role configs, and role-based access controls.
 - Documents can be tagged as financial, compliance, others – access controlled by tags.
- User Authentication – form-based user authentication. IDP can integrate, e.g. SAML 2.0 and 2MFA.
- Federated Identity Management – See previous.
- Data Conversion – legacy data can be uploaded. AI-powered auto extraction to OCR documents and load.
 - SirionAE tool may be required. (Cost)
 - Recommendation to move legacy contracts to a data warehouse for access via Rest API – reduces the migration timeline.
 - Digitizing legacy documents for searching.
- Interface and Integration – 3 user categories. – Task Owner, Manager, CXO.
- Integrations – connectors to ERPs, services now, SAP, Peoplesoft, Salesforce etc.; email; file systems; web services; document management hosts (Box, Sharepoint); GRC such as RSA Archer for risk and regulatory information.
- Office Automation Integration – out of the box office plugins; PDFs can be sent with lock function.
- Mobile Device Support – Accessible on mobile devices.
- Mobile Applications – App in 2021. – no additional cost. Functional limitations to approvals and status reviews.
- Data Ownership and Access – Sirion does not own customer data. P34 data exported to secure FTP at contract end. Sirion provides transition at no additional cost.
 - Data disposed 30 days after contract termination.
 - Only authorized individuals have access to customer data.
- Date Retention, Archive and Purge Considerations – See previous.
- Disaster Recovery Plan – RTO – 120 minutes; RPO – 30 minutes. Full daily backup of customer data. AWS mirrors productions instances in geographically diverse location – no single point of failure.
- Solution Environments – Sandbox environments with workflow for testing and training. Available post prod go-live.
 - No prod data in sandbox for security reasons.
- Solution Technical Architecture – Multi-tenant SAAS application -

DATE: 8/30/2021

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Est. 1950s. Large business.
- Services it can provide are end-to-end for eprocurement on the Strategy and consulting side (page 2)
- Govt experience.

2. Previous Projects

5 projects given. The projects and/or case studies meet Category 4.

- State of NC. Implemented and maintained statewide eProcurement solution using the SAP Ariba Buyer module along with migrating it to the cloud.
- State of CA. Designed, developed, and implemented the fiscal portion of ERP system for CA to replace aging legacy apps .
- Baker Hughes. Created a business case for a source to pay platform to streamline business process functions.
- Govt. of Alberta. Case study of how to use technology advances to achieve efficiencies across the enterprise.
- State of FL. Case Study and solution to provide outsourcing services for a web-based e-Procurement system, strategic sourcing, procurement performance optimization, and maintenance and operations.

3. Subcontractors

- Vendor states there are no subcontractors.

4. Organizational Chart

- Yes, a project organization chart is provided along with job descriptions.

5. Litigation

- Yes – Many. Very large company. Company does not disclose who, but does give federal link to look at Accenture's filings. However, the links information is difficult to ascertain without drilling into each line to find the company.

6. Financial Viability

- Provided an Accenture annual report with 3 fiscal years listed and a DnB report with a risk rating of moderate to low/moderate in most areas.

Individual Comments:

Overall/General

- Ariba

A. General Principal and Requirements: - N/A

B. Functional Requirements: - N/A

C. Technical Requirements: - N/A

D. Security Requirements: - N/A

E. Implementation Services Requirements:

1. Project Management

- Accenture Delivery Methods (ADM), for managing projects globally.
- ADM focuses on providing deliverables (e.g., process flows, job designs, business applications, and reporting systems) through the balanced management of scope, quality, effort, risk, and schedule while also supporting the project teams as they determine priorities, assign responsibilities, and establish timetables.
- Has incorporated into their methodologies:
 - International Standards for Organization (ISO®)
 - Capability Maturity Model (CMM®) standards
 - adopter of Capability Maturity Model Integrated (CMMI®)
 - adopter of eSourcing Capability Model for Service Providers (eSCM-SP).
- They offer a Project Lead name and background – Page 5.
- Page 17: Roles and Responsibilities listed for State, Accenture, and Ariba given.

2. Project Implementation Methodology - Page 26

- Hybrid Agile development methodology
- Page 27: Gave an example of a timeline for a large project. – 13 months total.
- Master Data clean up to align the UNSPSC and the Material Grouping.
- Plan
 - Plan and Analyze
 - Iterative Prototyping (Iterate)
 - Test
 - Deploy

3. Catalog Support Services - Page 43

- *Accenture recommends keeping the assessment of developing a catalog strategy outside of the implementation scope and timeline*

- *'As a pre-project, Accenture can work with the Participating Entity to identify suppliers able to provide client hosted catalogs and suppliers able to provide punch-out catalogs.*
- Catalogs can be one of the below three types:
 - Static hosted catalogs
 - Network Catalogs or Punchouts
 - Extended PunchOuts or Refined Catalogs
- *For catalogs loaded by the customer they will follow a standard flow within Ariba in order to be activated. This can be either auto-approved or manually approved depending on the needs of the customer. A sample process below is displayed below to represent this process*
- Page 47: Diagram provided – workflow and catalog activation
- *SAP Ariba provides the Participating Entity access to the Spot Buy solution in order to access multiple marketplaces. SAP has a three-tier supplier vetting process that helps to make sure that the suppliers meet compliance standards.*

4. Data Conversion Services

- Page 50: 2 flavors
 - Master data
 - Transactional data
- Do an assessment
- Step by step guide to perform extraction, transformation, load of data.
- Internal and external interfaces

5. Interface/Integration Development Services

- Do an assessment
- Step by step guide to perform extraction, transformation, load of data.
- Internal and external interfaces
- Internal and external interfaces

6. Organizational Change Management (OCM Services)

- Page 63:
- Yes a mature OCM process.

7. Training Services

- Stakeholder training
- Mature training – all different kinds of modules to fit everyone.
- Articulate 360 video was good.

8. Help Desk Services - Tab 6 IMPL 1 – 5: page 92

- Level 1 – State responsible
- Level 2 – Contractor will handle
- Level 3 – escalate to technical team
- Will use what is there
- Level 4 – SAP Arib

9. On-Site System Stabilization Support

- HyperCare – 1 month and extended care 2 to 3 months.

F. Managed Services Requirements:

1. Solution Support

- Page 99
- 1 hour response – level 1 phone or web
- 24/7 web support via portal
- Ariba does not guarantee resolution during response period but there will be a response.

2. Organizational Change Management (OCM Services)

- Same as OCM above but will consistently updated in this phase.

3. Training Services

- Same as Training above but will consistently updated in this phase.

4. Catalog Support Services

- Provide maintenance of item prices, vendor information to support catalog.
- Timely updates and deletions

5. Help Desk Services

- Same as above.

6. Transition Out Assistance Services

G. Other Available Services: p page 106: RTM: Tab 7 MNGD-1

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

• RTM: Tab 7, MNGD-1

• Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

- *Accenture will create a knowledge transfer plan that would be reviewed with the participating entity and/or designated service provider.*

H. Video Demonstrations:

- Page 131. Yes.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- All 3 Preliminary docs, Professional Liability insurance includes cyber liability, the limits are as follows: Each claim \$10,000,000 and Aggregate \$10,000,000
- #1 largest **SAP Ariba** eProcurement services provider
- Gartner, IDC, Forrester - ranked us a leader in application management and implementation of SAP, Oracle, Microsoft, Salesforce, software test automation, application outsourcing, cloud, IT consulting, information security consulting, systems integration

2. Previous Projects

- State of North Carolina, Department of Administration – eProcurement solution using the SAP Ariba Buyer module with customizations
- State of California - prime contractor for the FI\$Cal project responsible for designing, developing, and implementing a world-class ERP solution to meet the State's accounting, budgeting, and procurement needs
- Baker Hughes - source to pay platform due to divestiture and also for the simplification of the indirect procurement and accounts payable landscape.
- Government of Alberta - •SAP Ariba Sourcing•SAP Ariba Contract•SAP Ariba Buying & Invoicing•SAP Ariba Commerce Automation•OpenText Vendor Invoice Management•S/4HANA Material Management
- State of Florida - provide outsourcing services including the development and implementation of a web-based e-Procurement system, strategic sourcing (spend analysis, commodity segmentation, and sourcing select commodities), procurement performance optimization (FTE baseline and State & DMS Purchasing re-organization), and maintenance and operations of the e-Procurement and Sourcing applications, including a Help Desk that supports both buyers and vendors. This program is known as MyFloridaMarketPlace. Supported by a 1% fee paid by vendors doing business with the State

Implementation Services Requirements

Project Management Sample implementation plan includes project activities and deliverables to be completed throughout the project. **indicative** profile of Project Lead who lead an implementation(Large-state implementation), We do not hire simply for specific contracts;we develop resources for lifelong careers with Accenture. We staff client projects with people who have acquired enhanced skills and relevant experience from previous engagements, and **Provide** training credits for SAP Ariba Certifications, PMP, CISSP, and other certifications. Key roles and responsibilities outlined for the participating entity, SAP areba, Accenture onshore and Accenture offshore. RACI table provided. Project Implementation Methodology methodology, called the Accenture Delivery Methods (ADM), for managing projects. key project management activities: Quality management, project management, cost and performance management, scope management, status reporting and communication, organizational change management, risk and issue management, delivery management, resource management. incorporated International Standards for Organization (ISO®) and Capability Maturity Model (CMM®) standards into our methodologies. Early adopter of eSourcing Capability Model for Service Providers (eSCM-SP). ADM is defined to help enable compliance with key industry standards, including CMMI®, eSCM-SP, ISO® 9001:2008, Lean Six Sigma and Information Technology Infrastructure Library (ITIL®). Accenture uses the Key Design Decision process to help bring attention and review design decisions that have significant impact on the build of the system. project manager uses RAID (Risk, Actions, Issues, Decisions) for tracking and key design decisions to manage decisions. Key Design Decisions(KDDs) will be captured. Accenture uses the Key Design Decision process to help bring attention and review design decisions that have significant impact on the build of the system. The testing lead defines the process for tracking testing issues in agreement with the client as they build the testing approach (strategy). Reports on risk management, issue management, action management, decision management. Each major work product or deliverable created for a project will undergo a series of reviews from different sources and levels of the project. These include peer reviews, reviews from a solution architect, and final signoff reviews from the stakeholder, Such as business process designs, functional designs, technical designs, code modules, test scripts. governance framework will establish an overarching Program Office across the workstream towers that provides program integration, rigor, and standards; promotes consistency; and reduces risk. We will use Accenture's Delivery Methods (ADM) for Program and Project Management

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Accenture

CATEGORY #(s): 4

DATE: 1/8/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

(PPM). The Accenture governance model is 3 tiered starting with the executive sponsor and committee, steering committee, design committee, project committee, and workstream meetings. To varying degrees these areas are from the bottom operational, tactical, strategic. Hybrid Agile development methodology. Before go-live, we will create detailed instructions for a deployment plan in a Cutover document, which will include:

- A schedule of when deployment tasks will be executed and dependencies
- Key groups and contacts information

•Communication schedule with internal and external notification checkpoints
Knowledge Transfer(KT) involves the Department/ Participating Entity team members responsible for administering the system early in the implementation. Change control will be incorporated into our regular meetings with the Department/ Participating Entity. We will use the change control methodology to confirm any changes to requirements and scope follow the approved procedures.

Catalog Support Services Accenture recommends keeping the assessment of developing a catalog strategy outside of the implementation scope and timeline. consulting practice can offer a catalog assessment and work with the Participating Entity to construct a holistic approach starting with the Sourcing & Contracting process. Ideally this work would happen **six months to a year prior to the kick-off** of an implementation. Catalog Management, Catalog Workflows and Activation, Mapping to Commodity Codes, project team will take the output of the catalog assessment and work to contact suppliers in order to understand their capabilities and whether they have utilized the Ariba Network previously. Suppliers will be prioritized into waves based on several factors including, but not limited to, volume, spend amount, invoicing impact, and ease of enablement. The Entity's staff will be taken through the Catalog wave strategy, business design documents, the Ariba Network and how to load catalogs (punch-out and static) as part of KT.

Data Conversion Services data that is to be converted can be broadly divided into two categories:

- Master Data(supplier, account codes, etc.)
 - Transactional Data(purchase order, contract, receipt, invoice, etc.)
- the Conversion Procedures (assessment) are used to document how to convert application data from an existing environment to the target environment. It covers:
- The step by step guide to perform the extraction / transformation / load / validation of data.
 - The tools to use, the detailed procedure of using the tools and the verification checks.
 - Verifications: When verifications are performed, the Conversion Procedure documents how they are performed and where the outcomes are recorded

Our data conversion approach:

- Start early: We begin data conversion activities early in the schedule.
- Test the data migration often: We test the data conversion processes frequently to validate the extract, transform, and load procedures work.
- Test with migrated data: We test with migrated data during system testing.
- Flexible automation: We use automated methods where feasible and use manual processes for low volume data sets.
- Limit legacy data: We would typically migrate relevant master data, active contracts, contract terms, billing and collections, and vendor performance tracking data. We will work with the participating entities to identify the exact requirements.
- Protect data: We use standard security protocols to protect the client's data in transit to new systems. Methodology includes design migrations, build and test migrations, mock migrations, deploy migrations. Accenture has the capability to execute Data Cleansing projects, however for this response, we have not included Data Cleansing in scope. **Participating Entity would typically be responsible for data cleansing activities for source data.**

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Accenture

CATEGORY #(s): 4

DATE: 1/8/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Data Migration Tools: Data comparison manager SAP arriba, arriba import requisition web service, SAP areba integration toolkit.

Interface/Integration Development Services Gather inputs(as-is architecture) technical assessment, Design, Build & Unit Test. Integration Tools: Areba integration toolkit, direct connectivity integration, mediated connectivity integration, cloud integration gateway, legacy integration through API.

Organizational Change Management (OCM Services For a successful and sustainable transformation, **people must be the focus of change**. Based on our experience in complex transformation programs, we do this key workstreams of our approach that will be part of the end-to-end implementation and cultural changeover. Change management strategy development; focus on the people who will do the work, drive business value, combining the new with the tried and true, Co creation and joint ownership, interventions based on data. Impact Assessment, Readiness Assessments (Organizational and Staff), Resistance Assessment.

Training Services We base the proposed training curriculum on stakeholder needs according to how they use the system and how they are impacted by changes. Our resources are user-centric and meet stakeholders where they are, whether they need training that is instructor-led (in person or online), self-paced online, written documentation, or on-demand training. purpose of the Training Plan is to lay the foundation for the stakeholder training program. Training needs analysis change impact analysis, stakeholder analysis, training strategy document. The training plan includes scope, curricula, timeline, development procedures, assessment process, train the trainer procedures. Materials that may be developed to support learning; instructor guides, presentations, learner guides, practical exercises, video tutorials, job aids and manuals. Sample training plan and materials, and training included. Sample Training video powered by Articulate 360.

Help Desk Services Accenture proposed help desk approach supports a model where the Participating Entity be responsible for Level1 support while Accenture manages Level2 and Level3 escalations. It is generally the most cost-effective option to use the Participating Entity's existing infrastructure. Level 2 provides analysis and solutions to those incidents which do not require configuration or code changes. Level 3 provides deep level analysis of incidents escalated by the level two team and applies work around where needed. Level 4 is manned by SAP areba and is responsible for managing the product as well as implementing the solution that has been raised by Level 3 team which requires code changes. Level2 and Level3 support is generally managed out of the Accenture Manila service center working during the Participating Entity's normal business hours. Our Manila center has experienced SAP Ariba practitioners and has been supporting the platform for over 15years. Level2 and 3 support could also be managed out of our Nashville Advanced Technology Center (ATC). The pricing we have provided in our response assumes the Manila location. RTM responses all Biz Process with low LOE.

On-Site System Stabilization Support Hypercare(month 1)and Extended Care(months 2 and 3).

Managed Services Requirements

Solution Support From an application support perspective, SAP Ariba provides a one (1) hour response commitment for all severity level one issues submitted by phone or web portal during the applicable service hours, excluding holidays. Ariba does not guarantee resolution to issues within the response period, only response to initial calls. Software application management, functionality changes to the system, services testing and installation, participating entity testing, automated testing tool test strips, collaboration with other agencies and vendors, roles for application maintenance services, raci chart identifies responsibilities for participating entity Accenture and SAP arriba application maintenance services. Continuous improvement, managing security functions, management and monitoring, client data protection,.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Accenture

CATEGORY #(s): 4

DATE: 1/8/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Help Desk Services Same as above

Transition Out Assistance Services Accenture will strive to make any transition a straightforward and collaborative process. The ultimate objective is to efficiently transition knowledge to the Participating Entity or new service provider for high-quality, uninterrupted system operations and end-user support. If the agreement with Accenture is terminated or not renewed, Accenture would create a knowledge transfer plan that would be reviewed with the participating entity and/or designated service provider.

Other Available Resources end-to-end assessment, roadmap, design and transformation. Value levers; transparency of operations, centralized organization, predictive analytics and dynamic price benchmarking, streamline customer interactions, transactional to automated or digitized. Rapid procurement assessment , digital procurement operating model, procurement organizational model, closed loop spend management, supplier relationship management , procurement analytics. Pre-Project Assessments

Accenture will have an opportunity to work together in a spirit of cooperation to discuss, clarify and agree upon the specific scope of services, responsibilities between the parties, assumptions, and contract terms applicable to the proposed services. Specifically, if selected, Accenture looks forward to negotiating a mutually acceptable agreement with the Department based upon these terms, subject to obtaining greater clarity and mutual agreement on the terms of the standard terms and conditions as they will apply specifically to this scope of work. Accenture looks forward to the Department considering the **inclusion of discreet modified terms and conditions including, for example and without limitation, specific terms associated with limitation of liability.**

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - SAP Provider (Ariba)
 - End to End products, only bid for services
 - Can support applications of all types in any combination
 - Is bid limited to only category 4, appears for full solution
2. Previous Projects
 - Projects are examples of implementing SAP Ariba
 - Bid ids for consulting other products
 -
3. Subcontractors
 - None
 -
 -
4. Organizational Chart
 - Project management org chart, general in nature
 - Org Chart are SAP resources
 -
5. Litigation
 - Miniscule in relation, is avoidance to the request
 - Declaration of results confidential
 - Would not consider responsive to the requirements
6. Financial Viability
 - D&B provided
 - Secure finances

Individual SME Comments:

Services Only

Project Plan

1	In this time, we have developed a systematic and comprehensive methodology, called the Accenture Delivery Methods (ADM), for managing projects globally. We would apply our strong project management discipline to this eProcurement engagement to help enable end-to-end accountability for services delivered as well as to help align project focus towards meeting schedule, scope, cost, and quality requirements. Figure 1 shows the key project management activities which are supported. ADM focuses on providing deliverables (e.g., process flows, job designs, business applications, and reporting systems) through the balanced management of scope, quality, effort, risk, and schedule while also supporting the project teams as they determine priorities, assign responsibilities, and establish timetables. It also monitors the ongoing management of dependencies between projects, the assessment and control of overall program risks, the collection and dissemination of information, and the allocation of resources among teams.	
---	---	--

Implementation Services Requirements

Project Management and Project Implementation Methodology

26	Accenture recommends a Hybrid Agile development methodology which has been successfully used in our SAP Ariba projects. This methodology would provide the Participating Entities with the best of waterfall and agile development methodologies and would enable a smooth transition to agile

SME/EVALUATOR NAME: Stacey Winter

DEPARTMENT/STATE: Purchasing North Dakota State University

	development, wherever applicable. The hybrid agile approach provides standard documentation and processes for each phase of the project.	
--	--	--

Catalog Support Services

43	Accenture recommends keeping the assessment of developing a catalog strategy outside of the implementation scope and timeline. Implementations usually have a shorter duration than the time needed for assessing, contacting suppliers, updating contracts, and beginning the building process. Through our consulting practice we can offer a catalog assessment and work with the Participating Entity to construct a holistic approach starting with the Sourcing & Contracting process. Ideally this work would happen six months to a year prior to the kick-off of an implementation. The implementation of a catalog assessment outcome is typically dependent on the timeline	
----	--	--

Data Conversion Services

50	When considering data conversion, the data that is to be converted can be broadly divided into two categories: • Master Data (supplier, account codes, etc.) • Transactional Data (purchase order, contract, receipt, invoice, etc.)	
----	--	--

Interface/Integration Development Services

55	Accenture has completed numerous full-suite applications for clients ranging from simple single ERP integrations to over a 100+ ERPs (including newer modules like SLPs, Risks). In the table below, we have presented a snapshot of some of the implementations (worldwide). Our SAP Ariba projects have Results: Accenture performed a rapid migration of the company's upstream sourcing and procurement functions, powered by Ariba, in just nine months, followed by one month of post-go-live support. The solution went live with 40,000 users. User adoption has been excellent, in part due to the change management and training services provided by Accenture during the project. In the first five months of operations, the company moved more than \$1 billion in spend through SAP Ariba—almost twice the original baseline. The company also doubled the number of suppliers that could interact electronically. Naturally, the number of non-po invoices transactions dropped while the contract compliance metrics improved substantially. The company has successfully moved from a fragmented, distributed source-to-pay architecture to a fully integrated, source-to-pay ecosystem with greater efficiency and lower run costs. The solution drives improved compliance because of a more intuitive user interface through guided buying, and additional tools for managing

	contract spend. Transactional procurement functions are now seamlessly integrated with the client's current tax platform (Vertex). The company is now well positioned to scale the sourcing and procurement solution to other operating units across the global enterprise, and Accenture has been asked to assist with the planning and execution of the remaining deployments. State of Maine eProcurement Solutions and Services RFP 202102021 Accenture 58 Copyright© 2021 Accenture. All Rights Reserved. integrated to many different legacy systems. As an example, one of our recent public sector clients implemented SAP Ariba and integrated into over 100 ERP systems.	
--	--	--

Organizational Change Management (OCM Services)

63	Fundamental changes to buying behaviors require top-down sponsorship, and successful sponsorship begins on day one and requires good planning and communication upfront to obtain ongoing commitment	
----	--	--

Training Services

75	The Accenture Team brings a rich repository of resources and tools to guide and expedite the change management and learning journey for stakeholders. We are successful when these resources and tools are matched with the Participating Entity's resources and vision to create. We will work with you to plan, design, and deliver training and communications by evaluating and reimagining any existing resources and capitalizing on design thinking to create new content, where needed.	
----	---	--

Help Desk Services

98	<p>In the event that help desk support is transitioned fully to the Participating Entity, Accenture would create a knowledge transfer plan that would be reviewed with the participating entity</p> <p>Accenture proposed help desk approach supports a model where the Participating Entity be responsible for Level 1 support while Accenture manages Level 2 and Level 3 escalations. It is generally the most cost-effective option to use the Participating Entity's existing infrastructure. Accenture Level 2 & 3 resolvers will leverage the existing ticketing system to avoid duplication or costly integrations. The Accenture support team will also work with Level 4 support from SAP Ariba to prioritize, add context and help them replicate and resolve issues.</p>

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Accenture

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- HyperCare – month 1 and Extended Car months 2 and 3

Managed Services Requirements - PDF Page 103

Solution Support - PDF Page 104

- Listed Solution Support Services
- Provided information on application maintenance. Software Application Management
- Testing Tool scripts – Provided the benefits of testing on PDF Page 106 – 107
- Collaboration with Other Agencies and Vendors
- Figure 43. Typical project team structure for Managed Services/Application Maintenance Services. PDF Page 108
- Table 18: Roles and Responsibilities of the team in a Managed Services engagement. PDF Pages 108-110
- Table 19: RACI –illustrating the typical responsibilities between the Participating Entity, Accenture, and SAP Ariba for Application Maintenance Services. PDF Pages 110 – 115
- Managing Security functions. PDF Page 117
- Security protocols in place on PDF Page 118
-

Organizational Change Management (OCM Services) - PDF Page 119

- Our proposed organizational change management approach is detailed in section 1.6 Organizational Change Management,

Training Services - PDF Page 119

- detailed Training Approach is described in response to question 1.7 Training Services.

Help Desk Services - PDF Page 121

- The approach and methodology for training is same as described in response to section 1.7 Training Services. PDF Page 120
- The RTM requirements are all noted as “Business Process”

Transition Out Assistance Services - PDF Page 127

- Listed plan objectives on PDF Page 128

Other Available Services - PDF Page 129

- Listed other Services on PDF Pages 129 - 132

Video Demonstrations

The video supplied to this response was a little over 4 minutes and appeared to me as a “sales” approach to their solution. Integrate with any ERP and focusing on change management and training. Offer customer testimonials on why they would choose Accenture and their integration partner. North Carolina. Also asked about this supplier and their partnership and communication.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Implementation and procurement automation support
 - Fit-gap analysis is a valuable service
 - Public Procurement professionals on team
2. Previous Projects
 - State of Missouri ePro solution
 - Connecticut sourcing and contract engagement
 - Rhode Island ePro solution
 - Great examples of statewide projects at the scope level of this RFP
 - Results are not very definitive for ROI
3. Subcontractors
 - None currently but reserves right
 -
 -
4. Organizational Chart
 - Several CPPB and CPPO certified resources
 - Lacks description how efforts will be directed to NASPO requirements
 -
5. Litigation
 - None. Ever.
 -
 -
6. Financial Viability
 - Low credit recommendation, \$45,000
 - Unsure of income statement, balance sheet information.

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

This supplier stated in their video that they have relationships with ALL the major software providers. They will be offering the project management practices to effectively meet the goals of an eProcurement Solution Implementation project

Individual SME Comments: This supplier noted in the video that they will support all the major software applications and have done them in the past. This submitted response clearly shows the experience and ability for this vendor to support implementation services for solutions. They stated these services are mostly offered at the state government level and they do not plan on expanding to the federal level. Their staff are former government employees and that is very beneficial. I was impressed that their response showed "examples" on some of the processes used.

This supplier did not supply any information on the RTM submitted with their response. Some of the same content submitted in Implementation Services was supplied in the Managed Services section and that is noted below.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Over 50 years of experience in the public sector industry. Large business.
- Services it can provide are: Consulting, assessing, and implementing eProcurement solutions.
- Partner with SAP Ariba and SAP

2. Previous Projects

3 projects given. The projects meet Category 4.

- City of Ottawa, Canada. Implemented Source to Pay Solution encompassing Buying and Invoicing, and Invoice Conversion Services
- Hewlett Packard. Applied hybrid Agile methodology to facilitate and accommodate client's aggressive timeline and complex business requirements.
- The Health and Hospital Corporation of Marion County. Streamline the Strategic Sourcing and Contract Management processes through the implementation of SAP Ariba Sourcing and SAP Ariba Contract Management.

Found it interesting there were not State projects listed, from the introduction given it sounded as though there would be plenty to use as examples.

3. Subcontractors

- Vendor states there are no subcontractors.

4. Organizational Chart

- Yes, a project organization chart is provided along with job descriptions.

5. Litigation

- Yes. They list three.

6. Financial Viability

- Provided a DnB report with a risk rating of moderate to low/moderate in most areas.

Individual Comments:

Overall/General

- SAP Ariba Implementation and Managed Services
- Global Partner

A. General Principal and Requirements N/A – they completed but not applicable for this category

B. Functional Requirements N/A - they completed but not applicable for this category

C. Technical Requirements N/A - they completed but not applicable for this category

D. Security Requirements N/A - they completed but not applicable for this category

E. Implementation Services Requirements:

1. Project Management

- Uses EVD (Enterprise Value Delivery) methodology which is built upon SAP's Activate methodology.
- Both go-lives will be followed by Hypercare phase
- 12 month - Implementation timeline for sourcing contract and buying /invoicing
- Page 136: lists possible people assigned to the project.
- Page 136" List of typical PM deliverables.
- Page 136 – 137: typical roles are outlined

2. Project Implementation Methodology

- Page 140: Diagram provided on Project Implementation Methodology steps
- Seems to meet the requirements
- Have added a value add of Deloitte's methodology developed work products, used to accelerate the implementation.

3. Catalog Support Services

- Page 145: component of SAP Ariba Buying and Invoicing and combines consumer-like shopping
- Page 145 - 147: Deloitte will provide services of:
 - Strategy and planning
 - Launch Activities
 - Execution
 - Release
 - On-going Activities
 - Supplier Off Boarding

4. Data Conversion Services

- They state they want the participating entity to cleanse the data and the reason for it is because they know the PE knows the data best.
- Page 148 – Diagram with data conversion steps.

5. Interface/Integration Development Services

- The SAP Ariba Buying & Invoicing solution integrated with ERP system allows administrators to import master data and export transactional data from ERP system to the SAP Ariba Buying & Invoicing solution.
- The SAP Ariba integration toolkit is a Java-based tool

6. Organizational Change Management (OCM Services)

- OCM based on Deloitte's EVD method.
- OCM activities include five areas of focus / sub-disciplines:
 - Change Preparation
 - Organization Alignment
 - Communications
 - Capability Transfer
 - End-User Training
- Their OCM process is thorough and covers the OCM areas well.

7. Training Services

- Page 166 – Training diagram.
- The Deloitte Team's training checklist and training plan will address each of requirement identified in the RFP, including:
 - End Users
 - Train-the-Trainers
 - Suppliers
 - System Administrators
 - Participating Entity Help Desk staff
 - Functional training prior to Go-Live
 - Technical training, including developer training prior to Go-Live
 - Tool for trainers to create training guides
 - System administration
 - Security administration
 - Posting the contractor's training materials on publicly accessible websites.
 -

8. Help Desk Services - Tab 6 IMPL 1 – 5

- Page 168: Will work with SAP to provide Hypercare
- Seems to meet RTM IMPL 1 - 5:

9. On-Site System Stabilization Support

- Page 168: Post "Hypercare" period - project will be given to the Managed services/M&O contract team for further ongoing support

F. Managed Services Requirements: Page 170

1. Solution Support

- EVD Methodology
 - Plan and Define
 - Transition
 - Stabilize
 - Optimize/Innovate

2. Organizational Change Management (OCM Services)

- Page 181: Deloitte's EVD method is the foundation of our Organizational Change Management (OCM) approach.

- Refer to Section E.6

3. Training Services

- *Deloitte will follow similar training approach for managed services that includes objectives, guiding principles, critical success factors, assumptions, learning approach, training delivery and deployment strategies, roles and responsibilities, timeline, and key milestones based on Deloitte's EVD Methodology as stated in Section E.7 – Training Services.*

4. Catalog Support Services

- *Deloitte Team has read and acknowledges the Participating Entity requirements for Catalog services requirements, as part of managed services we will follow the similarly approach for creation/support of the new catalog as mentioned in Section E.3 – Catalog Support Services.*

5. Help Desk Services

- *Page 182: A global delivery model that utilizes a mixed-shore approach, demonstrated methodologies, processes, tools and a transition plan that will integrate our services into your organization.*
- *Help Desk Institute (HDI) customer service principles as well as ITIL-based IT Service Management (ITSM) processes.*
- *Geographically distributed delivery centers, the US-based Delivery Centers, located in Orlando, FL, Mechanicsburg, PA, and Gilbert, AZ are able to successfully achieve a virtual approach to the customer experience.*
- *24/7 model, support internal and external shared services with Tier 1, 2, and 3 skillsets, and support multichannel capabilities (phone, chat, email, fax and internet forms).*
- *Responsible Help Desk ("L1" end-user) services. (services laid out on page 184).*
- *Deloitte employs regular day shift on-site at the US Delivery facility with two off-site shifts, often offshore sites.*
- *Each shift will have a minimum one hour overlap for communication and shift handover with one or more other shifts, which provides round-the-clock coverage model. These shifts will also be staffed to provide dedicated 24/7 on-call availability of consultants for critical and high priority problem resolution. Our flexible support coverage model can be modified to cater to the needs of Participating Entity.*
- *Five9 is the cloud-based tool that we use to route calls to the appropriate team member.*

6. Transition Out Assistance Services

- *Page 193: Transition-out Manager will be responsible for coordinating Transition-out across support towers.*
- *Begin the Transition-out process one year prior to the contract end by continuously updating our SOPs, making sure that the Participating Entity officials are fully aware of our processes and schedule, and actively tracking and managing risks.*
- *We will execute a phased approach for Transition-Out which will continue for a period of up to six (6) months.*

Implementation Services Requirements

Project Management dedicated Project Manager ; Project deliverables; project plan , project governance plan , pre assessment findings, business requirements document, functional specification document, technical requirements document, integrated test plan, testing results documentation, cutover plan, hypercare support, post assessment findings. Bidder and Participating entity staff roles and skills provided

Project Implementation Methodology EVD (Enterprise Value Delivery) methodology which is built upon SAP's Activate methodology. Key project activities: master project plan project governance structure business process design data migration strategy configuration and unit testing data integration and user testing data readiness and validation monitor live environment communication campaign design workshop schedule project template standards and procedures design review sessions technical architecture integration test cycle user acceptance testing go nogo evaluation cutover execution production go-live final transition

Catalog Support Services details on creation of hosted catalogs, Setup/configuration of punchout sites, retail online marketplaces are provided in response to Functional Requirements →Catalog Capability(B.7). Supplier on-boarding?

Data Conversion Services approach aligns the data conversion activities to the Explore, Realize, Test and Deploy phases and execution timeline. Step one legacy systems step two data profiling step three data extraction step four data mapping Step 5 business rule analysis step six data remediation step seven data load step eight data conversion and validation

Interface/Integration Development Services The SAP Ariba Buying & Invoicing solution integrated with ERP system allows administrators to import master data and export transactional data from ERP system to the SAP Ariba Buying & Invoicing solution seamlessly. The SAP Ariba integration toolkit is a Java-based tool that SAP Ariba provides to upload master data or download transactional data. This tool reads the CSV files in ERP system, zips them, and sends them as MIME messages using the HTTP post to the SAP Ariba Buying & Invoicing solution. For more information, see the Ariba On Demand Solutions Integration Toolkit Guide.

Organizational Change Management (OCM Services Our organizational change management approach is based on the Organizational Change Management (OCM) discipline of Deloitte's EVD

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Deloitte

CATEGORY #(s): 4

DATE: 1/10/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

method. OCM activities include efforts in five areas of focus, or sub-disciplines as follows: Change preparation , organizational alignment, communications, capability transfer, and user training.

Training Services Deloitte Change Vision to Value (DCV) methodology includes activities designed to promote learning throughout the project lifecycle. Leveraging a combination of traditional training tools like job aids and user guides with new tools like short animated videos, personas, journey maps, Augmented Reality (AR) materials, simulations, and “You Tube” style training instructions, the Deloitte Team is committed to helping Participating Entity users build the knowledge and skills to be successful. Step one define purpose step two design for impact step three develop capability step four drive through performance

Help Desk Services Deloitte and Participating Entity will work jointly to address help desk tickets and provide additional support to Participating Entity users in areas where we see recurring issues. Hypercare Support involves a series of support activities performed as needed to address post go-live issues such as fixing the issue, working with SAP to resolve product issues, creating help documents and more.

Detailed Help Desk Services provided by Deloitte addressing the above requirements are covered in Section F.5 Managed services Requirements–Help Desk Services.

On-Site System Stabilization Support 3months immediately post go-live as “Hyper-care” support period.

Managed Services Requirements

Solution Support Deloitte’s Enterprise Value Delivery for Application Management Services provides a detailed approach to establishing an application management service delivery operation focused on driving sustained value. EVD for AMS includes leading practices in Information Technology Infrastructure Library (ITIL), IT Service Management (ITSM), and Capability Maturity Model Integration (CMMi) for services, in addition to other functions as illustrated methodology disciplines are implemented through three phases and then continuous, iterative value generation occurs in the fourth phase. delivery of Operate/Maintenanceservices in terms of a “stack” of activities:

Organizational Change Management (OCM Services Same as above

Training Services Same as above

Catalog Support Services Same as above

Help Desk Services Deloitte leverages an array of geographically distributed delivery centers connected through a globally standard set of tools, frameworks and methodologies. We pride ourselves in the fact that our US-based Delivery Centers, located in Orlando, FL, Mechanicsburg, PA, and Gilbert, AZ are able to successfully achieve a virtual approach to the customer experience. Our delivery centers are geographically distributed facilities connected through a standard set of tools, frameworks, and methodologies used to address the fluctuations in demand for specific skillsets and resource levels (language, security, or time zone sensitive). Our delivery center personnel include supporting roles, supervisors, and contact center management professionals. We operate on a 24/7 model, support internal and external shared services with Tier 1, 2, and 3 skillsets, and support multichannel capabilities (phone, chat, email, fax and internet **forms**).

Transition Out Assistance Services Transition-out Manager will be responsible for coordinating Transition-out across support towers. We will begin the Transition-out process one year prior to the contract end by continuously updating our SOPs, making sure that the Participating Entity officials are fully aware of our processes and schedule, and actively tracking and managing risks. We will execute a phased approach for Transition-Out which will continue for a period of up to six (6) months. This plan is focused on the last several months, where we will be conducting knowledge transfer with the Participating Entity or the new Participating Entity Provider.

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

Services Only SAP Ariba

General Principal and Requirements

Key Solution Functionality Elements

11	Deloitte has proposed services to implement SAP Ariba to meet the functional requirements put forth within this RFP. About SAP Ariba: SAP Ariba is a cloud-based innovative solution that allows suppliers and buyers to connect and do business on a single platform. It improves overall vendor management system of an organization by providing less costly ways of procurement and making business simple. Ariba acts as supply chain, procurement service to do business globally. SAP Ariba digitally transforms your supply chain, procurement and contract management process.	
----	---	--

User Experience

15	Each module has configurable dashboards, which can be personalized to meet each of the different type of user's needs. The Dashboard is a tabbed screen on which users can organize and access key tasks, actions and information from each application that is available to the company. Rather	
	SAP Ariba uses the approval queue concept for workload management. This feature prevents multiple users from acting on the same approval request. The group corresponding to an approval queue is called the member group. Only one user in the member group can act on an approval request in the queue at given time.	

Bidder Best Practices and Roadmap

21	Quarterly Releases – Releases are delivered every quarter in February, May, August, and November each year. Individual products may be released on any or all the quarterly dates. You should expect to receive advance communication of features and should allow time to prepare for impactful changes to your systems.	
	Monthly Feature Deliveries – Major SAP products may have an optional, no-impact release on harmonized monthly feature delivery weekends. As with the quarterly releases, each product has the option to release during these windows.

DEPARTMENT/STATE: Purchasing North Dakota State University

Innovations and Value-Added Features/Services

18	Use of Deloitte work products at no cost	
----	--	--

Customizations/Extensions

23	Advise the Participating Entity of out of the box or configured functionalities that could be used in lieu of customizations/extensions to meet requirements and identify necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.	
----	---	--

Alternative Funding Models

20	Identify opportunities for savings	
----	------------------------------------	--

Contract Transition and Flexibility

23	Deloitte agrees that we have the ability to transition existing contracts to the NASPO Master Agreement and Participating Addendum, so long as both the scope and labor categories of the existing contracts and NASPO Maser Agreement are consistent.	Cost?
----	--	-------

Functional Requirements

General Functionality

25	SAP Ariba is a cloud-based innovative solution that allows suppliers and buyers to connect and do business on a single platform. It improves overall vendor management system of an organization by providing less costly ways of procurement and making business simple. Ariba acts as supply chain, procurement service to do business globally. SAP Ariba digitally transforms supply chain, procurement and contract management process.	
GEN 3	Award notices can be sent to 3rd party to publish	weakness
GEN 5	Contract Management must integrate on state site – may require separate integration	
Gen 11	Attachments limited to 100MB	weakness
Gen 14	Features like spell check and grammar are available	Cost?
GEN 18	Different Header information available based on requirement	

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Deloitte

CATEGORY #(s): 4 Stage 2

DATE: 11/15/2021

SME/EVALUATOR NAME: Stacey Winter

DEPARTMENT/STATE: Purchasing North Dakota State University

Supplier Portal

28-29	The State desires to provide a single point of entry (front door) for supplier facing functions associated with the electronic procurement solution. We propose the State use the SAP Ariba Business Network (SBN). The SBN will allow suppliers to manage a complete choreography of business collaboration with their customers. The SBN delivers an intuitive user experience that supports self-service supplier registration and maintenance, onboarding, solicitation/bid management, contract lifecycle management, and e-procurement and payables (PO, OC, ASN, Inv. etc.).	
SPR 3	Supplier can register account but will not be able to obtain a full account until a customer approves the relationship	

Supplier Enablement/Management

34	SAP Ariba Supplier Lifecycle and Performance (SLP) is a solution that supports 4 key processes: 1. Creating Supplier Requests 2. Supplier Registration 3. Supplier Qualification 4. Identification of Preferred Suppliers	
	Suppliers need to register and fill out a questionnaire	

Buyer Portal

36	The State envisions a single point of entry to procurement processes via a "Front Door." SAP Ariba has for many years and continues to provide an integrated source to settle platform that will provide users a single place to interact and complete the source to settle functions. Historically, the SAP Ariba "Front Door" opened and users regardless of role/job (persona) would land in the application and view a dashboard.	
	Casual users can be directed elsewhere on login	

Need Identification

44	Each Power Users landing page will be a configurable and personalized dashboard that contains relevant reports, to-do lists, actions to support the users job function.	
----	---	--

Request through Pay

46	Automation of the source to settle process is critical to achieving contract compliance, realizing sourced savings and delivering value to the State. Built on robust and highly-scalable architecture, SAP Ariba Buying and Invoicing provides full source to settle functionality for users and commodities so you can quickly locate and collaborate with suppliers for goods and services and process every purchase from requisition to reconciliation. Through SAP Ariba Buying and Invoicing, the State can automate, improve, control and monitor procurement to realize immediate process efficiencies and cost savings.	
PRD 11	Does not support reoccurring PO's	weakness

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Providing SAP Ariba Implementations and Managed Services -only good for 180 days
 - Seems to be full suite and stated experience is the public sector
 -
2. Previous Projects
 - Counties, hospitals and IT business listed as clients
 - One implementation was sourcing and contract management
 -
3. Subcontractors
 - Stated not contractors will be used.
 -
 -
4. Organizational Chart
 - Stated both Deloitte and Ariba personnel will be used
 - Response shows Deloitte and Participating entity role names and job descriptions
 -
5. Litigation – **Marked Confidential**
 - No judgements in the last 5 years.
 - Have 3 legal actions filed with all of them dismissed. The latest in May 2021
 -
6. Financial Viability -**Marked Confidential**
 - Duns & Bradstreet submitted
 - Low to moderate risk
 -

This supplier has stated they will be supporting the SAP Ariba solution and states will provide SAP Ariba Implementation and Managed Services in this response. This response has 152 different figures contained in the response and 3 Pages of Glossary Terms.

Individual SME Comments: The vides supplied to this response again showed the solution supported rather than the services that Deloitte can offer. Also spent lots of time trying to figure out the State's long-term goals.

The response showed me that they have the knowledge and experienced needed to provide the implementation and managed services required in the RFP. The response was very detailed at times and offered enough information for me to be confident in their ability to provide what is stated in their response.

Some of their response referenced back to other sections and thought it would be beneficial to supply the information again. One reference is to the "State of Michigan"?

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- This implementation is done in phases – Prepare, Explore, Realize – Build and Test, Deploy and Run
- Prepare Phase deliverables in figure 109 on PDF Page 149
- Explore Phase deliverables in figure 110 on PDF Page 149
- Realize - Build Phase deliverables in figure 111 on PDF Page 149 – 150
- Realize – Test - Phase deliverables in figure 112 on PDF Page 150
- Deploy Phase deliverables in figure 113 on PDF Page 150
- Run Phase deliverables in figure 114 on PDF Page 151
- Testing happens at different levels with Unit testing first, followed by Integration and Interface testing, regression testing and finally user acceptance testing.
- Listed 5 steps on PDF Page 152 for change control.
- Supplier provides periodic independent project risk review.
- Uses accelerators to speed up the implementation. Figure 115 PDF Page 152 – 153

Catalog Support Services – PDF Page 153

- 1. Strategy and Planning – Define catalog requirements
- 2. Launch Activities – Establish help desk and gather supplier information.
- 3. Execution – Set up and manage catalogs
- 4. Release – Pilot testing and monitoring
- 5. On Going Activities – Resolve post release issues.
- Supplied supplier off boarding process on PDF Page 155

Data Conversion Services – PDF Page 155

- Figure 116 - Data Conversion Services PDF Page 156
- Step 1 –Data Profiling – Obtain a deeper understanding of legacy data sources
- Step 2 –Data Extraction – This process contains 6 steps that have been outlined on PDF Page 157
- Step 3 –Business Rule Analysis - This process step involves analyzing business rules for data migration and form processing rules.
- Step 4 –Data Mapping – Mapped to target data fields to be used by SAP
- Step 5 –Data Remediation – Could require a manual remediation effort
- Step 6 –Data Conversion Validation – Confirming record data is captured.
- Supplier suggests the implementation and use of mock conversions. PDF Page 159

Interface/Integration Development Services - PDF Page 159

- “The SAP Ariba Buying & Invoicing solution integrated with ERP system allows administrators to import master data and export transactional data from ERP system to the SAP Ariba Buying & Invoicing solution seamlessly.”
- Can enable the integration of data using the methods listed on PDF Page 160
- Two types – Master or Transactional data.
- Transactional data uses File channel or Web services Each explained on PDF Page 160 and 161
- “File-based integration enables you to import master data and transactional data using the Data Transfer Tool” Master data - Figure 117 PDF Page 161
- Transactional Data – Figure 118 on PDF Page 162
- Integration with ERP in Figure 119 on PDF Page 162
- “For the development of interfaces Deloitte highly recommends, SAP Ariba Cloud Integration Gateway simplifies and accelerates the integration.” Figure 120 PDF Page 165

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Est 2018 (small business); however, it seems they are including staff at effution LLC and using that name. joined with a two-decade old (est 2000) company (CostXpert AG).
Need clarification here.
- Service = Cost estimation business. They list several tools they use including their own "AI-driven tool, success 2.0".

2. Previous Projects

- Only one project given (startup business). Determine a should-cost for a new model embedded system. I do not believe this project meets Category 4. **More clarification may be needed to know for sure, as this section is confusing and limited.**

3. Subcontractors

- Vendor states there are no subcontractors. **See first bullet in number 1 as I am a bit confused.**

4. Organizational Chart

- **No, an org. chart and job descriptions were not provided.** They did provide a short list of individuals at the company.

5. Litigation

- Vendor states there are no litigation.

6. Financial Viability

- Provided DnB, **but unsure of financial status based on what they provided.**

Individual Comments:

Overall/General

- Product is GEP Software Source-to-Pay process.
- Note: NB Ventures Inc. dba Global eProcure (GEP)
- Product is cloud platform. SaaS.
- The technical proposal begin with small portions of information and I was unsure if they were meeting the mark, but once I was able to dig into the matrix it helped further see what they can do.
- Overall, it looks like much configuration can take place for any State entity. While this is great, I question how this would affect updates to the software (Clarification).
- Matrix - I like seeing that the level complexity is not all "L". It shows GEP put thought into each for each item.

A. General Principal and Requirements

1. Key Solution Functionality Elements (pages 8 – 14)

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

1. Product is GEP Software Source-to-Pay process. With modules of sourcing, savings tracking, category management, contract management, supplier management, and procure-to-pay.

- Single point of entry – yes – a centralized intake form. When I think Single point of entry- I do not think intake form.
- Smart routing – yes – GEP combined this bullet point with Compliance and Workflow. They state the platform can be configured to meet specific compliance policies/rules. GEP gives examples of Guided Buying, Robust Rule Engine, and Category Playbook.
- Compliance – refer to the second bullet.
- Portal – yes – buyers and suppliers have access to dedicated home page portal

- Open marketplace environment – yes – **Configure** hosted catalogs/punchouts.
- Integration – yes – has out of the box integration tool kit and use JSON protocols for document exchange.
- Workflow – yes – refer to the second bullet.
- Document management – yes – stored in centralized repository and accessed per user role.
- Reporting, dashboards and data visualization – yes – in-house cross-functional reporting framework.
- Configurable – yes – GEP Software cloud platform is a preconfigured application. GEP states they will use agile approach to preconfigure sandbox to align to State specific cases / requirements.
- Transparency – Yes – and mention track status on documents.

2. User Experience - pages 14 - 16

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.

2. GEP discusses their intuitive user interface built by using feedback from Fortune 500 costumers, user group requirements, industry standard practices, etc. **I have concerns with the Fortune 500 customers because we want a system that is more relatable to Govt/State business.**

- Initial Screen – yes, mention users can mark initial screen as landing page – **not sure this is what is meant in this section.**
- Intuitive Navigation – yes, GEP combines this bullet with “Wizard-driven capabilities” addresses few clicks, **but doesn't really address wizard capabilities.**
- Wizard-driven capabilities – Refer to second bullet.
- Informative Portal – Yes
- Mobile Optimization – yes, they call it Mobile App – IOS and Android.
- Workload Mgt Functionality – Yes they call it Work Management, addressed; however, **unsure if it contains the same intention of abilities as wanted in the RFP.**
- Role-Based Functionality – Yes, addressed.

3. Bidder Best Practices and Roadmap – pages 16 - 21

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.

3. GEP introduced 4 best practices and roadmap: (1) Unified Source-to-Pay Platform, (2) Agile Methodology for Software Development, (3) Software Release and Update Cycles, and (4) Customer Success: Providing a High Touch Support Experience Throughout Engagement.

- Latest Technology – No – don't address any. Address their process as in number 3 above.
- Timely updates – yes – Quarterly and biweekly; however, **it's a bit confusing as they use words such as “generally available” Would like to see a more definite timeframe and surety.**
- Alternative Best Practices – yes see below bullet.

- Cost Reduction – Yes – Claim price compression will save 4% – 7% average realized savings, spend compliance 10%-50% reduction of noncompliant spend, productivity 40%-60% reduction in non-value added work, and working capital 10-20% extension in pay terms and 5-30% Increase in early pay discounts.
- Product Roadmap and Cont. Improvement. – Yes – see number 3 above.

4. Innovations and Value-Added Features/Services – pages 21 - 22

In addition to the stated requirements, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

4. Yes - Completed section. They list Level (1) Organization Maturity Assessment, (2) Opportunity Assessment (3) Market Intelligence (4) Category Management. Explained further below.

- GEP illustrates their Assessment Approach in a 4 graphs and explains they would work with State to create a plan to outline desired outcomes by looking at various pieces of procurement operating models and identifying areas of improvement along with other types of analysis. **This reminds me of a BPM.**
- GEP illustrates in 3 graphs how they can analyze procurement spend to identify savings opportunities using GEP benchmarks, SME inputs, and industry best practices.
- GEP illustrates in 5 graphs how leveraging GEP's extensive network of SMEs and researchers could elevate the knowledge and awareness of State's procurement.
- GEP illustrates in 2 graphs a process for end-to-end category management across categories for sustainable outcomes

5. Customizations/Extensions – pages 22 - 23

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

They provide preconfigured application deployed as a standard configuration. They suggest using the standard out of the box software, but will configure as necessary per the requirements of the State.

6. Alternative Funding Models – Pages 23 - 27

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outlined above for each recommended funding model.

GEP does not have alternate funding models. They refer to Exhibit 3. Cost Proposal and other revisions of cost proposal.

7. Contract Transition and Flexibility – page 27

GEP complies with the contract review process and transition if negotiate terms. I feel they misunderstood the point of this question.

B. Functional Requirements: pages 28 – 48

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The **electronic procurement solution must be cloud-based with a Software as a Service (SaaS) delivery model**

1. General Functionality. Tab 2, GEN-1 through GEN-40. Matrix completed. 5 – High (21, 26, 27, 28, 39), 3 – Medium (9, 25, 36), rest are all “L” Low level of complexity, 3 – “CF Configuration Items (3, 5, 25), 1 – “C Customization/Extension” (39), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Core Platform, GEP Request through Pay Software, GEP Sourcing/Bid Management Software, Contract Management, Procure-to-Pay.
 - For most of the items in 1 – 7 GPE offers use of their system, but these questions are about being able to integrate with other eProcurement Workstreams. In areas where GEP does do this they suggest links or to CF.
 - I do like seeing that the level complexity is not all “L”. It shows GEP put thought into each for each item.
 - The C and CF items do not seem to pose a problem. Other items seem to be standard within the software.
 - #36 GEP has their own built in electronic signature solution instead of a partnership like docusign, or adobe sign
 - #38 For number of licenses – sounds like gave cost based on what was provided in proposal; however, they confirm licensing is unlimited for business and supplier users. This may be deceiving, might want to confirm again that it's unlimited also for “State users”
2. Supplier Portal. Tab 3, SPR-1 through SPR-23. Matrix was completed. 1 – High (19), 1 – Medium (6), rest are all “L” Low level of complexity, 1 – “INT - Integration/Interface”(19), 1- “CF-Configuration Item” (6), and the rest “A – Available”. Solutions/Tools/Modules covered – Supplier Enablement / Management Software, GEP Core Platform, Contract Management, Request through Pay.
 - #13 I find it interesting that GEP has their own OCR in-house system. Nice to know, if State did not want to use or integrate theirs.
 - The C and CF items do not seem to pose a problem. Other items seem to be standard within the software.
3. Supplier Enablement Management Workstream. Tab 3, VDR-1 through VDR-43 Matrix – was completed. 1 – Medium (36), rest all “L” Low level of complexity, 1- “CF-Configuration Item”, and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Supplier Enablement / Management, Core Platform.
 - The “A” fields seem to be satisfactorily answered and their solution meets the standards.
 - For the INT items 19-27. GEP has a partnership with Global Risk Management Solutions (GRMS), Rapid Ratings and with TinCheck that provides most of these services. GEP Software will enable a link to these partners to allow users to view. My concern here would be the risk of leaving their system (if any), what security measures are in place?
4. Buyer Portal. Tab 3, BPRT-1 through BPRT-15. Matrix completed. 1 – Medium (9), rest are all “L” Low level of complexity. 1- “CF-Configuration Item”(9), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Core Platform, GEP Request through Pay Software, GEP Supplier Enablement / Management.
 - The “A” fields seem to be satisfactorily answered.
 - The C and CF items do not seem to pose a problem. Other items seem to be standard within the software.
5. Need Identification. Tab 3, NEED-1 through NEED-7 Matrix completed. All “L” Low level of complexity. 1-“CF-Configuration Item”(5), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Sourcing Bid Management, Contract Management, and Request through Pay Software.

- The CF item does not seem to pose a problem. Other items seem to be standard within the software.
6. Request through Pay Workstream. Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11. Matrix completed. 1–High (PRD28), 5–Medium (PRD11, PRD56, WRK13, PO16, PC1-3, PC5-8, PC10-15, PC17-PC19, and PC21, RC4), rest are all “L” Low level of complexity, 17 – “IN - in development” (PC1-3, PC5-8, PC10-15, PC17-PC19, and PC21), 1- “CF-Configuration Item” (RC21), and the rest “A – Available”. Solutions/Tools/Modules covered–GEP Request through Pay Software, Contract Management.
 - For PRD (Purchase Request Development): No issues with this section. GEP’s responses meet the standards and our requests.
 - WRK (Workflow Management): All requirements in this section are sufficiently answered.
 - PO (Purchase Order Generation & Management): All requirements in this section are sufficiently answered.
 - PC (Payment Card Functionality): Much of the complexity is medium and the availability is “in development”. This is concerning if a State is counting on this service.
 - RC (Receiving): All requirements in this section are sufficiently answered.
 - INV (Invoicing): All requirements in this section are sufficiently answered.
 7. Catalog Capability - Tab 3, CAT-1 through CAT-40. Matrix completed. 1–High (19), 5–Medium (4,21,25,32,33) and the rest all “L” Low level of complexity, 4–“CF Configuration Item” (31-34), 1 – “ID - in development” (38), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Request through Pay Software, Contract Management.
 - Missing 38 – “The eProcurement Catalog functionality should provide the ability for catalogs to be accessible and searchable without requiring the user to login (e.g. public access for read/search only access). State must be able to specify any fields that will not be publicly visible (e.g. Tax ID).” GEP says “ID” and will work with State to have.
 - Other than 38 - All requirements in this section are sufficiently answered.
 8. Sourcing/Bid Management Workstream. Tab 3, SRC-1 through SRC-151. Matrix completed. 1–High (151), 5–Medium (31,77,78,83,138) and the rest all “L” Low level of complexity, 7–“CF Configuration Item” (17,18,73,76,102,138,147), 1–“ID - in development”(109), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Core Platform, GEP Sourcing/Bid Management Software, Contract Management.
 - Items 15 and 16 – GEP says they can handle a surplus sealed bid and IFQC, but then say they would further like to discuss the requirement in detail with State as we move ahead in this process. Clarify – can they handle this type of procurement?
 - In some areas they offer multiple ways to tackle a situation – for example SRC72. This is seen throughout the Matrix.
 - Rest of requirements in this section are sufficiently answered.
 9. Contract Management. Tab 3, CNT-1 through CNT-88. Matrix completed. 3–High(30,71,72), 4–Medium (38,41,45,70) and the rest all “L” Low level of complexity, 8–“CF Configuration Item”(20,34,45,51,65,66,71,72), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Supplier Enablement/Management, Request through Pay Software, Contract Management.
 - Items 71 and 72 – GEP says they can track suppliers admin fees , but then say they would further like to discuss the requirement in detail with State and understand the logic behind the calculation.
 - Rest of requirements in this section are sufficiently answered.
 10. Vendor Performance Tab 3, VPE-1 through VPE-25. Matrix completed. 1–High(14), and the rest all “L” Low level of complexity, 1–“CF Configuration Item”(15), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Supplier Enablement/Management, Request through Pay Software, Contract Management.
 - Requirements in this section are sufficiently answered.
 11. Purchasing/Data Analytics Tab 3, PDA-1 through PDA-37. Matrix completed. 2–High(32,33) and the rest all “L” Low level of complexity, 1–“CF Configuration Item”(37), and the rest “A – Available”. Solutions/Tools/Modules covered – GEP Platform.

- Question #37 – where GEP can offer comparison of punchout item to non contract item. They state yes as long as the supplier is ok exposing themselves to GEP web crawlers. Even if they are ok with this, is there enough security for State and any other web crawlers?
- Rest of requirements in this section are sufficiently answered.

C. **Technical Requirements: pages 49 - 74**

1. **Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*

Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.
 - Maintains a 99.8% uptime with a 24x7 availability.
 - Use Microsoft Azure (for backup)
2. **Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
 - Short 3 sentence slide that gives confirmations that GEP: Observes ADA compliance standards, follows WCAG2.1 level AA guidelines, and will provide ACR.
3. **Audit Trail and History RTM:** Tab 4, TECH-1 through TECH-5. Matrix completed. 1–Medium(5) and the rest all “L” Low level of complexity, All “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - Audit logs are retained until end of contract life.
 - Mentions backup policies and use of Microsoft Azure backup.
 - Much crossover between slide in technical proposal and matrix. No concerns.
4. **Browsers Supported**
 - The general web browsers are supported (Microsoft Internet Explorer, M Edge, Chrome, Firefox, and Safari). No concerns.
5. **User Accounts and Administration RTM:** Tab 4, TECH-6 through TECH-20. Matrix completed. 1–Medium(12) and the rest all “L” Low level of complexity. 1–“CF Configuration Item”(16), and the rest “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - No concerns. Meets requirements.
6. **User Authentication RTM:** Tab 4, TECH-21 through TECH-25. Matrix completed. 1–High(24) and the rest all “L” Low level of complexity, 1–“ID In Development”(25), and the rest “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - #21 – Like the fact that they use Microsoft Active Directory for Single Sign on.
7. **Federated Identity Management –** No concerns. Meets requirements.
8. **Data Conversion RTM:** Tab 4, TECH-26 through TECH-34. Matrix completed. 1–High(28), 1–Medium(30), and the rest all “L” Low level of complexity. With all “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform, Software Implementation services for Supplier Enablement Management, Services for Software Implementation, Services for Spend Analysis, Services for Sourcing/Bid Management, and Services for Request through Pay.*
 - Seem flexible in their approach to converting data and working with the State. A couple assumptions, but they are reasonable.
 - GEP provided many slides with graphs and pics laying out the conversion process. – I found this helpful.
9. **Interface and Integration RTM:** Tab 4, TECH-35 through TECH-60. Matrix completed. 1–Medium(60) and the rest all “L” Low level of complexity, 1–“ID In Development”(55), and the rest “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform, Request through pay software, contract management, supplier enablement management.*
 - Met all requirements besides the Pcard #55 which is ID.
 - They list many ERP systems they have or currently integrate with (SAP, Oracle, PeopleSoft, JD Edwards, MS Dynamics, CGI Advantage, etc.) and provide options of how to integrate.

10. Office Automation Integration
 - Yes, GEP integrates with Microsoft products listed and others.
11. Mobile Device Support RTM: Tab 4, TECH-62. Matrix completed. "L" Low level of complexity, "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - Yes it can be accessed Mobily
12. Mobile Applications - Nothing add here.
13. Data Ownership and Access
 - State will retain all ownership of data.
14. Date Retention, Archive and Purge Considerations RTM: Tab 4, TECH-63. Matrix completed. 1– "L" Low level of complexity, "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - Met all requirements. No concerns.
15. Disaster Recovery Plan
 - Coupa.
16. Solution Environments RTM: Tab 4, TECH-64 through TECH-67. Matrix completed "L" Low level of complexity, "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - State would receive four environments Development, Quality Control/User Acceptance Testing, Training, and Production.
 - Graphs of each environment are provided and at what point in the process they are used.
17. Solution Technical Architecture
 - Met all requirements. No concerns.
 - Graphs and tools that will be used are provided in the tech. proposal.
18. Solution Network Architecture
 - Again – great graphs listing the software used and when scans, patching, etc. are done.
19. System Development Methodology
 - Normal PM with much explanation and tables/graphs.
20. Service Level Agreement
 - GEP notes they want to discuss and finalize SLA requirements with State and refers us to the GEP SLA.

D. Security Requirements: pages 75 - 94

1. Cloud Security Alliance (CSA) Compliance
 - GEP supplied a CAIQ in file 3; I will rely on my more experienced SMEs to help evaluate the CAIQ.
2. Security and Privacy Controls
 - No Concerns based on data in the proposal.
3. Security Certifications
 - No Concerns based on data in the proposal.
4. Annual Security Plan
 - GEP details out their annual security plan.
 - GEP notes that they understand NASPO has asked for any additional documents and to see refer to GEP Appendix 2' which is their Information Security Policy. This will need to be reviewed when negotiating.
5. Secure Application and Network Environment
 - refer to GEP Appendix 3' which is their SMART Application Architecture & Security Overview.
6. Secure Application and Network Access – Tab 5, SEC-1 through SEC-6. Matrix completed. 2– Medium(1,2) and the rest all "L" Low level of complexity, 1–"CF Configuration Item"(2), 1–"ID In Development"(3), and the rest "A – Available". Solutions/Tools/Modules covered – GEP Core Platform.
 - Mentions backup policies and use of Microsoft Azure backup.
 - GEP meets some of the requirements in this section but need to customize or develop others.
7. Data Security – nothing to add.
8. Personally Identifiable Information Protection – nothing to add.
9. Security/Privacy Issue Occurrence – nothing to add.
10. PII Data Actual/Attempted Access or Disclosure – nothing to add.
11. Security Breach Reporting – nothing to add.

E. Implementation Services Requirements: pages 95 - 127

- Matrix completed. 1–High(5) and rest “L” Low level of complexity and all “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
 - Seems to have many options for finding help and solutions for customers.
1. Project Management
 - GEP recommends AGILE implementation methodology with sprints and multiple workstreams.
 - They provide graphs and timelines.
 2. Project Implementation Methodology –
 - Reference bullets in #1 above.
 - Roles of both side are explained well.
 - Typical challenges are outlined.
 - The rest is fairly basic project knowledge or definitions of such.
 3. Catalog Support Services
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 4. Data Conversion Services
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 5. Interface/Integration Development Services
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 6. Organizational Change Management (OCM Services)
 - Change Management is nice to have as an option. GEP would be performing this. The approach they offer is standard.
 7. Training Services
 - good, maybe a bit more.
 8. Help Desk Services – good.
 - #3 – GEP provides a dedicated team of resources (helpdesk) for users and providers to call 24x5 via phone or email. This is a nice plus.
 - Great.
 9. On-Site System Stabilization Support – nothing to add.

F. Managed Services Requirements: pages 128 - 136

- Matrix completed. All “L” Low level of complexity and “A – Available”. *Solutions/Tools/Modules covered – GEP Core Platform.*
1. Solution Support
 - Lay out roles in GEP and what each role will be responsible for after the implementation.
 - Lay out graphs of how the system is supported as well.
 2. Organizational Change Management (OCM Services) – see section E comments above, but also a nice graph on explaining ADKAR of Change Management.
 3. Training Services – see section E comments above.
 4. Help Desk Services – see section E comments above.
 5. Transition Out Assistance Services
 - GEP says they will be flexible when transitioning out and believes 4-6 months is optimized timeline for transitioning out.

G. Other Available Services: pages 137 - 139

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

- RTM: Tab 7, MNGD-1
- Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).
- Points to slides 18-37. Which is their Innovations and Value-Added Services Section.

H. Video Demonstrations: pages 140 - Page 140 of their technical proposal – a link

- Yes provided. Detailed and covered all of their 45 min.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 4

DATE: 09/22/2021

EVALUATOR NAME: Joe Zrioka

EVALUATOR DEPARTMENT/STATE: State of Maine - Division of Procurement Services

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - GEP Smart Unified Source to Pay software
 - GEP NEXXE Cognitive Supply Nexus
 -
2. Previous Projects
 - Viatris – implemented direct and indirect buying and accounts payable
 - UCAL – Spend Analysis, Sourcing, Contract Management, Supplier Management
 - Chevron – eProcurement not present in project
 - LDS Church – Contract and Supplier Management
 - UMASS – no evidence of eProcurement
 - Reference calls should be coordinated through GEP
3. Subcontractors
 - None
 -
 -
4. Organizational Chart
 - Combined state and GEP org chart specific to the project
 - Roles defined
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - D&B report 10/19/2020
 -
 -

RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): 4
DATE: 12/16/2021
SME/EVALUATOR NAME: Joe Zrioka
DEPARTMENT/STATE: Maine

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements **YES**

User Experience **YES**

Bidder Best Practices and Roadmap **AGILE, Maintenance Release/testing tight window for bug fixes, minor/low impact enhancements, manage commercials?**

Innovations and Value-Added Features/Services **Organizational Maturity Assessment – IT Procurement not identified, spend analysis, Market Intelligence. How is category management providing more value than the solution itself? I expect increased spend visibility, contract compliance, improved Supplier Performance – Is this innovation or additional cost?**

Customizations/Extensions **YES**

Alternative Funding Models **"GEP does not have any alternate funding models."**

Contract Transition and Flexibility **"GEP is able to comply with the contract review process and transition to a state's current contract terms"**

Functional Requirements

General Functionality **YES - 1 Customized, 3 configurations w/one medium effort, and 36 out of the box.**

Supplier Portal - **1 configuration w/medium effort, 1 integration w/high effort, and 21 out of the box**

Supplier Enablement/Management **9 integrations w/low effort and 34 out of the box.**

Buyer Portal **1 configurations w/medium effort, and 14 out of the box**

Need Identification **1 configurations w/low effort, and 6 out of the box**

Request through Pay **62 out of the box – Purch Req, 28 out of the box for Wrkflw mgt, 29 out of the box for PO gen and mgt, 17 in devp and all w/medium effort and 4 out of box for Pcard, 1 configuration w/low effort, and 20 out of the box for Receiving, 11 out of the box for invoicing.**

Catalog Capability **4 configurations w/medium (2) and low (2) LOE, 1 in devp w/low LOE, 34 OOBX**

Sourcing/Bid Management **7 configurations w/medium (1) and low (6) LOE, 1 in devp w/low LOE, 141 OOBX**

Contract Management **8 configurations w/medium (1) and low (5) and high (2) LOE, 80 OOBX**

Vendor Performance **1 configuration w/low LOE, 24 OOBX**

Purchasing/Data Analytics **1 configuration w/low LOE, 36 OOBX**

Technical Requirements

Availability **7 days/week twenty-four hours/day excluding scheduled maintenance and outages**

Accessibility Requirements **WCAG2.1 and Accessibility Conformance Report (based off a VPAT)**

Audit Trail and History **not sure minimum was met for user identifier, date/time stamp, field that was changed and the change that was made.**

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: GEP
CATEGORY #(s): 4
DATE: 12/16/2021
SME/EVALUATOR NAME: Joe Zrioka
DEPARTMENT/STATE: Maine

Browsers Supported YES Microsoft Edge (Version 70.0 and above), Google Chrome (Version 70.0 and above), Firefox and MacOS Safari
User Accounts and Administration RBAC
User Authentication SAML
Federated Identity Management– SSO MFA
Data Conversion ETL, Cleanse and Standardize addresses (Country, Region, City & Street), “Harmonize”
Interface and Integration CGI Advantage (example) 2 options for integration
Office Automation Integration hosted on Microsoft Azure and integrates with Microsoft Office products
Mobile Device Support GEP Software is a mobile-native procurement platform
Mobile Applications GEPSMART mobile app on Apple App Store and Google PlayStore
Data Ownership and Access Missing?
Data Retention, Archive and Purge Considerations Yes but what standard?
Disaster Recovery Plan Annual test does it include clients, is this Azure's DR test?
Solution Environments Development/Quality Control, UAT, Training, Production Environments, multi-tenant mode
Solution Technical Architecture YES
Solution Network Architecture YES
System Development Methodology Agile development life cycle using Azure Dev Ops development tools, Functional, SIT, UAT, Regression/Automation, performance testing. Change Request Governance Process.
Service Level Agreement GEP would like to discuss and finalize the SLA requirements

Security Requirements

Cloud Security Alliance (CSA) Compliance CAIQ
Security and Privacy Controls Did not answer NIST 800-53 question
Security Certifications SOC1 Type II and SOC2 Type II, ISO 27018, PCI DSS v1.1, FedRAMP High, CJIS, IRS Publication 1075, HIPAA
Annual Security Plan No
Secure Application and Network Environment YES
Secure Application and Network Access YES
Data Security YES
Personally Identifiable Information Protection GDPR compliance
Security/Privacy Issue Occurrence reports any high severity security breach within 4 hrs – define high
PII Data Actual/Attempted Access or Disclosure YES
Security Breach Reporting 2 hour and 24 hour notification cannot be met

Implementation Services Requirements

Project Management AGILE, roles/responsibilities defined
Project Implementation Methodology Sm Med Lrg, Risk/Mitigation strategies, Configuration/change control, Issue Tracking/Management,
Catalog Support Services hosted and punchout catalogs
Data Conversion Services Data centralization, Standardization, enrichment, and optimization
Interface/Integration Development Services YES
Organizational Change Management (OCM) Services Human Centric Change Management
Training Services Train the trainer approach no training plan example
Help Desk Services global, severity levels
On-Site System Stabilization Support On site is on call

BIDDER NAME: GEP

CATEGORY #(s): 4 – Services Only

DATE: 8/22/2021

EVALUATOR NAME: Michael Bacu

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Heavy marketing visuals in presentation
 - Overuse of market buzzwords
 - Underwhelmingly curious if they perform in all capacities the proposal identifies
2. Previous Projects
 - Results are buzz word driven. No savings identified worthy of expense beyond process efficiencies
 - Results achieved are just marketing focused, with vague points
 -
3. Subcontractors
 - GEP is full-service (why also submitting proposals with subcontractors?)
 -
4. Organizational Chart
 - Separate Org Chart from other GEP proposals.
 - Personnel role responsibilities are general in nature.
 - Different titles of employees from other proposals
5. Litigation
 - No litigation identified
 -
 -
6. Financial Viability
 - D&B results not showing concern
 - Unsure about their subcontract KPMG
 -

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Cat 4, Stage 2 Proposed Services

DATE: 11/02/2021

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments:

General Principal and Requirements

- (Page 5) Centralized platform. Is this all or none, integration with other platforms?
- (8) Do suppliers have access outside of the portal?
- (10) High levels of functionality
- (13) Non-Value-added work reduction 40-60% is valuable
- (14) Agile no customization to cloud, unclear any potential impact to existing processes
- (15) Bi-Weekly maintenance releases seem overly frequent
- (23) Good gap analysis linking to reporting capabilities
- (24) Would like to see F2F workshops offered as well as virtual
- (30) How does Supplier database incorporate local and OSD vendors?

Functional Requirements

- (48) Interesting how the document process moves from one action to the next
- (46) Show good functionality across different workflows, very robust
- (60) Unsure if catalog search includes both hosted and punchouts including level 2
- (65) Concerned about the "Preferred Supplier" and what makes them chosen over others.
- (70) alludes to level 2 punchouts (searchable in the platform) but only if suppliers allow. How many suppliers allow this?
- (73) Sourcing seems very intuitive
- (79) Vendor Performance is good in the way it creates scorecard type data
- (82) Purchasing data has lots of functionality, would like to better understand if it is perhaps too much
- (RTM Tab 3, line 11, EPROC-SPR-7). Allow supplier access to solicitations, both invited and all others. Response did not meet the requirement. Did not address access to suppliers that have not been invited.

Technical Requirements

- (86) Availability should consider maintenance both planned and unplanned. The method identified is only identifying unexpected events relative to the vendor. The customer is inclusive of all events of any form where the service is unavailable. Their method is providing questionable percentages.
- (97) Single Sign on is preferred
- (102) Good data normalization
- (107) ERP integration is important as most states have existing solutions they will not abandon

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Cat 4, Stage 2 Proposed Services

DATE: 11/02/2021

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

Security Requirements

- (CAIQ line 135) Does not support BYOD. Would Single Sign On at state level allow this?
- (CAIQ line 207) Unsure if test environments are available
- (CAIQ lines 216-219) Unsure of liability relationship with GEP and MSFT using Azure. GEP reference to MSFT portal only raise concerns with data breaches or problems and who is liable.
- (CAIQ line 245) No BYOD support, how will this impact states that do not provide state owned laptops/mobile devices to all employees?
- (160) Breach does not include any credit monitoring by vendor or liability acknowledgement

Implementation Services Requirements

- (163+) Project Implementation Methodology is robust
- (167) Projected time periods are not discussed, only unspecified milestones
- (192) How does future state design consider state needs

Managed Services Requirements

- (234) MSFT Intune is MSFT service, GEP does not manage.
- (215) Are training options varied (virtual/In-Person)

Video Demonstrations

- Dashboard formatting is hard on the eyes
- Can create solicitations within the platform
- Scoring within platform with weighted percentages or formulas
- Can invite suppliers, can suppliers invite themselves?
- Evaluators score within
- Interesting Parent-Child relationships
- Unknown if shopping search looks at punchout catalogs
- Results show non-contracted items. Where are they coming from?
- Where do accounting details come from?
- Can reject line items in requisitions or only entire request?
- Does this work with Peoplesoft?
- Supplier management is manual process for data entry?
- Does supplier profile integrate with Oracle or other platforms?
- Arbitrary supplier scorecard?
- Reporting seems intuitive

Individual SME Comments:

General Principal and Requirements

Key Solution Functionality Elements

7	Single point of entry for all procurement activity based on their needs or use of the solution	
7	Smart Routing – Wizard driven capabilities	Positive
7	Portal – informs users and supports user work management	

User Experience

8	Wizard driven capabilities	Positive
8	Mobile app has access to many areas. Catalogs, create requisitions, approvals and to view dashboard.	Strength
8	User sets up the look of the dashboard and it stays that way for next login	

Bidder Best Practices and Roadmap

14	Approach to implementation is based on progress made and not timeline	Positive
15	Quarterly general release sent to UAT for a week and then to production. It is sent to production in Default Off mode	Weakness
15	Maintenance release every 2 weeks to fix bugs. Handle like quarterly release – sent to UAT for 1 week first. “the participating entity is not obligated to accept and implement any recommendations.”	Weakness

Individual SME Comments:

One of my major concerns with this response is the vendor has requested many times that they would like further discussion on some of the requirements listed. This response also has many concerns where the entire requirement listed was not addressed in their response.

I believe the concerns would need to be addressed (i.e., PCard functionality) in order for their solution could be offered. I think some of the "clarifications" need be addressed for me to feel comfortable with their solution offering.

General Principal and Requirements

Key Solution Functionality Elements

- PDF Page 5 – Need form completed to be taken to proper module. Page 6 -Will configure catalogs and punchouts. Restrict access to documents. STRENGTH – Cross Functional reporting. Will configure to state specific cases.

User Experience

- STRENGTH Page 8 PDF – User personalization and access tasks from landing page
- Mobile Capability

Bidder Best Practices and Roadmap

- PDF Page 13 – STRENGTH – Best Practices. PAGE 15 – Default OFF Releases!

Innovations and Value-Added Features/Services

- PDF Page 19 – Organizational and Opportunity Assessment, Market Intelligence and Category Management. Lots of information and informational charts!

Customizations/Extensions

- PDF Page 39 – Highly configurable and lays out customer roadmap

Alternative Funding Models

- CONCERN – No alternative funding models available.

Contract Transition and Flexibility

- This vendor complies to this statement.

Functional Requirements

General Functionality

- STRENGTH EPROC-GEN-5 – Multiple options for posting data.
- WEAKNESS -EPROC-GEN-7 – Fill form to gain access?
- WEAKNESS -EPROC-GEN-8 – Can search by commodity code?
- STRENGTH - EPROC-GEN-11 – Can increase the file limit of 30MB.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Stage 2, Category 4

DATE: 11/08/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- STRENGTH - EPROC-GEN-17 – Nice to be able to have new release data in the OFF by default mode.
- WEAKNESS - EPROC-GEN-25 – Does not allow email domain change to state email domain on emails sent from the system.
- CONCERN - EPROC-GEN-26 – Need to integrate with ERP to track administrative fees.
- STRENGTH - EPROC-GEN-36 – System has its own “built in” signature process but can integrate as well.

Supplier Portal

- STRENGTH - EPROC-SPR-13- Multiple ways for supplier to submit invoices.
- CONCERN - EPROC-SPR-15 – Did not mention if the SUPPLIER could not get to the historical data in the supplier portal?
- CONCERN - EPROC-SPR-19- Must submit administrative fees via an integration.
- CONCERN - EPROC-SPR-20 – Response seems to be on the user side rather than the supplier portal side?
- CONCERN - EPROC-SPR-23 – Response seems to be on the user side rather than on the supplier side?

Supplier Enablement/Management

- STRENGTH - EPROC-VDR-6 – Each contact can have their own log in to the supplier portal.
- CONCERN - EPROC-VDR-13 – Response did not address the foreign suppliers designation?
- STRENGTH - EPROC-VDR-16 - Triggers expire notifications on certificates
- CONCERN - EPROC-VDR-20 thru EPROC-VDR-27 – These responses ALL refer to the response in EPROC-VDR-19 which provides “link” to a management service solution. We need to ask for clarification on these requirements.

Buyer Portal-

- CONCERN -EPROC-BPRT-6 – System admin might have to run reports on behalf of the user?
- STRENGTH - EPROC-BPRT-10 – Can perform a “system-wide” search from the buyer landing page.
- **CONCERN - EPROC-BPRT-14 -Need to discuss further specific integration requirements? Needs to be addressed at implementation.**
- CONCERN - EPROC-BPRT-15 – Did not state if communication would default to user email address?

Need Identification

- PDF PAGE 62 - The need starts with a request form user needs to fill out.
- Meets all other requirements

Request through Pay

- PDF PAGE 66 – Core Features list is pretty extensive
- STRENGTH - EPROC-PRD-8 – Collated purchase requests into one centralized dashboard.
- CONCERN - EPROC-PRD-24 – Can you limit the user access to the form?
- CONCERN - EPROC-PRD-46 – Did not address the political subdivision unique chart?
- CONCERN - EPROC-PRD-47 – Can you control fields availability based on the agency?
- CONCERN - EPROC-PRD-56 – Vendor response states wants further discussion. Not sure they can meet this requirement.
- CONCERN - EPROC-PRD-59 – Did not submit information of calendar functionality.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): Stage 2, Category 4

DATE: 11/08/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-WRK-9 and EPROC-WRK-10 – Did not state if the user could enter a reason for workflow by pass?
- WEAKNESS - EPROC-WRK-22 – Referenced a previous requirement as their response to this requirement.
- CONCERN - EPROC-PO-2 – Supplier wants further discussion.
- CONCERN - EPROC-PO-15 – Did not state if they could print in groups?
- CONCERN - EPROC-PC-1 thru EPROC-PC-3, EPROC-PC-5 thru PC – 8, PC-10 thru PC – 15, PC -17 thru PC -19 and PC - 20 – Pcard functionality in development.

Catalog Capability

- PDF Page 69 – Has 3 catalog options with the Internal Catalog being new to me.
- CONCERN - EPROC-CAT-11 – Supplier has requested further discussion on ability to obtain quotes.
- CONCERN - EPROC-CAT-20 - Concern - Response is quick quote process where I thought we were looking for the ability to enter a quote in the punch out catalog?
- CONCERN - EPROC-CAT-38 – Search catalogs without logging in is in development.

Sourcing/Bid Management –

- PDF Page 74 – Comprehensive Automatic Scoring.
- CONCERN - EPROC-SRC-15 and SRC – 16- Supplier would like further discussions of IFQC and IFQP
- CONCERN - EPROC-SRC-19 thru EPROC-SRC-21 – Supplier response did not address if these event types could be done in the system?
- CONCERN - EPROC-SRC-28 – Response was directed at the supplier side and not for participants on the buyer side (solicitation participants).
- CONCERN - EPROC-SRC-37 – Need ability to update templates automatically but this supplier does not recommend.
- CONCERN - EPROC-SRC-83 – Did not address if recording of pre-proposal conference could be stored as part of the event?
- CONCERN - EPROC-SRC-102 – Response is NOT an electronic signature process.
- CONCERN - EPROC-SRC-109 – The ability to enter paper responses in under development and will aligned with entity's go live date.
- CONCERN - EPROC-SRC-130- Supplier wants further discussion on online collaboration.

Contract Management

- PDF – Page 76 – Key Highlights to their Contract Management Solution.
- The contract request form goes directly to creation of a contract avoiding the need for a bid.
- STRENGTH - EPROC-CNT-8 – Mass update to contracts that have the same contract clause that has been updated.
- STRENGTH - EPROC-CNT-12- Built in electronic signature process but can also integrate.
- CONCERN - EPROC-CNT-18 – Supplier response does not address the sharing of responsibility of the contract record.
- CONCERN - EPROC-CNT-20 - This response does not address the contract number being the same as the solicitation number.
- CONCERN - EPROC-CNT-38- Supplier wants further discussion on the ability to capture subcontractor information.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Est. 1911.
 - IBM delivers: Deployment of SAP Ariba
2. Previous Projects
 - 4 projects provided. All four are private firms and seem to fit category 4.
 - Lilly. Transformed procurement processes. Moved from SAP ECC SRM to Ariba solution.
 - Pfizer. Transitioned from SAP Ariba online to a cloud based Ariba suite.
 - Lumen. Transitioned from SAP ECC SRM solution to an Ariba solution.
 - IBM.
3. Subcontractors
 - Vendor states no subcontractors.
4. Organizational Chart
 - Provides an organizational chart. **However, it seems very small for the work that could be coming their way. No job descriptions are provided.**
5. Litigation
 - Page 12, yes say they have several; **however, they do not provide any other information other than saying they disclose on a quarterly basis to the SEC which reports any significant litigation in its annual report. Including the annual report would have been helpful.**
6. Financial Viability
 - DnB provided. Low to Low/Moderate risk.

Individual Comments:

Overall/General

- Product is SAP Ariba Cloud Services and is SaaS and is hosted by SAP and provided as a subscription based offering.
- Because of the above they state no software to install or additional maintenance or support costs and **no need to hire consultants** or tech specialist to run the baselined system.
- The full matrix was not completed – did not complete tabs 5 (security requirements) and 6 (Implementation requirements)
- The Redline of the NASPO ValuePOINT Master Agreement T and C's #14.3 (page 22) Assignment/Subcontracts, they add 14.3.3 and essentially state will be transferring portion of business operations responsible for some of the services provided the Contract to Kyndri, Inc. **This is concerning, since Kyndri inc. was vetted and did not make it through the initial evaluation phase.**
- Overall – this system seems more user friendly for a Supplier.
- Demonstration: Many items in the matrix were stated as “supported” “configurable” “standard functionality”; **without any details on how the tool/solution will meet the requirement it's hard to assess. Was hoping to find in demo, but when reached that portion, it was not accessible.**
- Side note: Many typos and formatting errors throughout the submitted proposal. Possible reflection on work to come.

A. General Principal and Requirements

1. Key Solution Functionality Elements (pages 8 – 14)

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

1. Product is SAP Ariba and is SaaS and is hosted by SAP and provided as a subscription based offering.

- Single point of entry – yes – Single Sign on

- Smart routing – Maybe? – They discuss the State maintain workflows using the dynamic configurable workflow engine. **Is that the State's engine, IBM's, or Ariba's? May know more as I read.**
- Compliance – yes – state industry standards and annual or semiannual audits.
- Portal – yes – single point of access.
- Open Marketplace Environment. - yes
- Integration – yes holistic integration approach.
- Workflow – yes
- Document management – yes.
- Reporting, dashboards and data visualization – yes – native reporting analytics.
- Configurable – yes – they state their system is.
- Transparency – Yes

2. User Experience - pages 14 - 16

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.

2. IBM discusses Ariba's innovative Guided Buying capabilities. **This is section does not follow the bullets laid out below well, have tried to capture if they meet them within their proposal paragraphs.**

- Capability – initial screen: – **Do not see addressed in this section.**
- Intuitive Navigation – yes, address this by using a tile based structure.
- Wizard-driven capabilities – possibly – the visual workflows, reminders, and notifications could fall into this.
- Informative Portal – Maybe – I believe this is what they are eluding to in their dashboard.
- Mobile Optimization – yes, they have a mobile App. **It would be nice to know if they can do both IOS and Android.**
- Workload Mgt Functionality – Yes, addressed.
- Role-Based Functionality – Yes, addressed.

3. Bidder Best Practices and Roadmap – pages 16 - 21

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.

3. IBM didn't introduce anything new, instead relied on the explaining the functional enhancements, etc. of Ariba.

- Quarterly Releases – They explain products may be released quarterly.
- Timely updates – yes – Quarterly Releases – They explain products may be released quarterly.
- Alternative Best Practices – yes have a best practice center that is part of the subscription.
- Road Map: **To see the Road Map we must register on SAP's site; therefore, not able to score as was not provided.**

4. Innovations and Value-Added Features/Services – pages 21 - 22

In addition to the stated requirements, the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

4. Yes - Completed section.

- Ariba developed APIs which is no cost to State to access nor is the developer portal.
- SAP FieldGlass is another solution that is of cost (not in the cost proposal) that helps find the right type of workers/staff.
- SAP Ariba Supplier Risk Management is another solution that helps buyers make smarter decisions with less risk.

5. Customizations/Extensions – pages 22 - 23

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder's base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder's product roadmap submitted with the proposal.
- Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- IBM feels at this time (looking at the Matrix) the requirements can be met with configurations and customizations are not necessary.
- Pages 12-14 list Apps and Partners that are not included in the SAP Ariba solution and price at this time. IBM feels these could help the State. In a quick review of some of the Apps they seem like they are some of the areas that are requirements of this RFP. So the question then is, Is this for the mobile app and we need to purchase all of these for that OR is this a different option than what Ariba has? I think we need **to CLARIFY** this.

6. Alternative Funding Models – Pages 23 - 27

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
- Explain how each model would work;
- Identify the benefits that Participating Entities and their suppliers would realize; and
- Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

IBM does not have alternate funding models. They suggest looking at each State's financial structure and helping address the funding then.

7. Contract Transition and Flexibility – page 27

IBM has many contingencies and given the high likelihood that IBM has an agreement with most States, it is very likely this area will pose a problem for States and maybe NASPO Contractually.

B. Functional Requirements: pages 28 – 48

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

1. **General Functionality.** Tab 2, GEN-1 through GEN-40. 2 – Medium (3,5), 1 – “N/A”(38), rest are “L” Low level of complexity. 2-“INT-Integration/interface”(5,14), 1-“partial”(3), 1 – “N/A”(38), and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba Buying and Sourcing, Sourcing, Buying and Contacts, Contracts, Cloud Analytics, Full Suite.
 - #3 is marked as “partial”, which is not a choice in the codes. Based on the notes it looks like they do not have the ability to integrate to post on the State’s procurement website.
 - #38 is marked N/A, which is not a choice in the codes. After reading the reply – it seems the answer is “N” as they do not comply with this.
 - For most of the items in 1 – 7 GPE offers use of their system, but these questions are about being able
 - Many of the Comments state “Standard Functionality” (there are 22 of these). As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.
 - Use Native Integration for integration of purchase requests.
 - Supports all types of files and mentions a “really robust search engine” in many of the comments.
2. **Supplier Portal.** Tab 3, SPR-1 through SPR-23. 1 – Medium (7), rest are all “L” Low level of complexity, 1 – “INT - Integration/Interface”(7), 1- “BP-BusinessProcess”(18), and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Supplier LifeCycle, Network, Sourcing, Full Suite, Buying, Invoicing, and Contracts.
 - 10 comments that state “Standard Functionality” without further description. As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.
 - Ariba seems to have a good handle on the Supplier portal side and a understanding of what the suppliers need.
 - #3 states suppliers can integrate their financial systems to Ariba Network. While the State will want supplier spend reports, I am not certain about connecting to the system – for security reasons the State would want to look into this.
 - #7, 8, where allow supplier to access solicitations and to submit proposals... IBM responds that State APIs are available to post but suppliers will need to be directed to an external State website. This is concerning – as this is a requirement of the eprocurement system.
3. **Supplier Enablement Management Workstream.** Tab 3, VDR-1 through VDR-43. 9–Medium (19-27), rest all “L” Low level of complexity, 9-“INT-Integration/Interface(19-27)”, and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Supplier LifeCycle.
 - 6 comments that state “Standard Functionality” without further description. As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.
 - Suppliers are able to self register and meet requirements 1 – 10
 - It’s not clear if the system accepts commodity codes, as the answers given to the questions are not straightforward.
 - #18 - #27 are marked as “INT” and the State asks that the verification of the supplier items be done. IBM’s answer is they can validate the format, I am unsure if this will meet the requirement.
4. **Buyer Portal.** Tab 3, BPRT-1 through BPRT-15. All “L” Low level of complexity. and “A – Available”. Solutions/Tools/Modules covered – SAP Buying, Invoicing.
 - 7 comments that state “Standard Functionality or Configurable or both of these” without further description. As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality / configurable” for that particular requirement. I believe that is why the

- instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.
- The answer to #11 is of concern. The State can download any account information (data) as long as subscribed, but only within the functionality of their application. It doesn’t answer the question if we can get the minimum items that are asked for in the requirement.
5. **Need Identification.** Tab 3, NEED-1 through NEED-7. All “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Guided Buying.
- The CF item does not seem to pose a problem. Other items seem to be standard within the software.
6. **Request through Pay Workstream.** Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11. All “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Ariba Buying, Invoicing, Network, Risk Management.
- All the requirements in this section were answered with the same generic answer “Standard Functionality. This is a generally available feature within the Solution and is currently leveraged by multiple customers across multiple industries”. I do not feel this section was completed as they did not describe or go into any type of detail of “how, etc.”
 - PRD 4 – Doesn’t seem to answer the Role question. They answer it with groups, but not by role.
 - PRD 15 and 16, WRK12, PO11 and 12 – Limit attachments to 100MB size limit, but can support any type of attachment.
 - PRD49 – Ariba uses UNSPSC (United Nations Standard Products and Services Code) – it seems much configuration will need to be done to work in State’s chart of accounts.
 - PRD59 – is essentially **not answered**. Gives “Standard Functionality supported and configurable”.
 - WRK28 – only one user in Que at a time.
 - PC 6 – Comment that it’s not supported; however, they list as “Available”.
7. **Catalog Capability** - Tab 3, CAT-1 through CAT-40. All “L” Low level of complexity. 1-“N-Not Available”(19) and rest “A – Available”. Solutions/Tools/Modules covered – SAP Buying.
- 9 comments that state “Standard Functionality” without further description. As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.
 - #3 - 3 channels that catalogs can be updated from: (1) Loaded directly by customer via CSV or CIF format, (2) Loaded by us acting as the catalog management service to the customer, (3) Self- loaded by the supplier via the Ariba Network.
 - #6 and 7. Catalogs are limited to 5,000 catalogs and there is a limit to 500,000 items in a catalog.
 - #19 – To enter Items of negative values is not an option.
8. **Sourcing/Bid Management Workstream.** Tab 3, SRC-1 through SRC-151. 1 – Medium (71), 2 – “N/A”, rest are “L” Low level of complexity. 1-“partial”(109), 2 – “N/A”(76, 138), and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba Sourcing, Supplier Life Cycle.
- 5 comments that state “Standard Functionality or Configurable or both of these” without further description. As a nonuser of ASP Ariba’s system, I do not know what is “standard functionality / configurable” for that particular requirement. I believe that is why the instructions outline to “describe how the identified tools/solution will meet the requirement. Include benefits or limitations.” Based on the vagueness and essentially a guess on my part, these lines won’t be evaluated.
 - #2 – System has several solicitation templates to use; however, most all State’s will want to use their AG approved templates and forms. Some such as the RFI are delivered out of the box, unsure if can configure.
 - #36, 52, 63, 70 – limited to 100MB

- #76 – Ariba’s system doesn’t provide ability to post solicitation documentation unless **manually done**.
 - #138 – Ariba’s system does not post award results to State’s procurement website. It must be **done manually**.
9. **Contract Management.** Tab 3, CNT-1 through CNT-88. 1 – Medium (64), 12 – “N/A”, rest are “L” Low level of complexity. 2-“partial”(65,66), 12 – “N/A”(45, 52-62), and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba Contract Management, Buying, Supplier Lifecycle and Performance Management.
- #45 – **Ariba’s system doesn’t support read only** format with redaction properties.
 - #52 through #62 – **Ariba’s system doesn’t support** posting of various items to State’s public Contracts website. The State must manually post.
10. **Vendor Performance** Tab 3, VPE-1 through VPE-25. All “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Supplier Lifecycle & Performance.
- VPE 1 – 11, 15 states “supported and configurable” and rate as an “A”, **but gives no comments on how or detail**.
 - VPE 21 – **CLARIFY** that the system provides this requirement as IBM says it does, because they comment that the best way is through scorecards, which in my mind is paper or a simple excel form. Maybe scorecards is a name of one of their forms. **If not, this does not meet the requirement**.
 - VPE 25 – **File size limit 100MB per attachment. – does not meet requirement**.
11. **Purchasing/Data Analytics** Tab 3, PDA-1 through PDA-37. All “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Ariba Analytics Solutions.
- PDA 1 – Ariba solutions comes with 250 pre-packaged reports.
 - **PDA 34 – “Standard Functionality” no Detail.**

C. Technical Requirements: pages 49 - 74

1. **Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*
- Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider’s (ISP’s) should also be in place.*
- SAP offers a 99.5% system availability percentage during each month for production versions, with exception of **regularly scheduled and emergency maintenance**. **CLARIFY –** How often is regular maintenance and during what hours and days. Additionally, how often in the past has SAP had emergency maintenance (example of how many times in one year?).
2. **Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
- Page 45. They state they will provide accessibility to customers upon request. **It seems the software does not come with accessibility requirements.**
3. **Audit Trail and History** RTM: Tab 4, TECH-1 through TECH-5. All “L” Low level of complexity. 3 - “INT-Integration/interface”(3,4,5) and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba.
- TECH 3 – 5 are “INT”; however, they repeat TECH 1 and do not explain/detail out how or why integration or interface is needed.
4. **Browsers Supported**
- The general web browsers are supported (Microsoft Internet Explorer, M Edge, M Edge Chromium, G Chrome, Firefox, and Safari). Microsoft Internet Explorer compatibility mode is not supported. No concerns.
5. **User Accounts and Administration** RTM: Tab 4, TECH-6 through TECH-20 – 2 – Medium (10,11), rest are “L” Low level of complexity. 3 -“INT-Integration/interface”(11,14,17), and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba.

- **TECH 12 – Does not meet requirement.**
 - 6. **User Authentication** RTM: Tab 4, TECH-21 through TECH-25. All “L” Low level of complexity. 1- “INT-Integration/interface”(22,25), the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba.
 - 7. **Federated Identity Management** – Pages 49 – 50. **Unsure that their response answers / meets the requirement.**
 - 8. **Data Conversion** RTM: Tab 4, TECH-26 through TECH-34. ALL – High and all “INT-Integration/interface”. Solutions/Tools/Modules covered – SAP Ariba.
 - SAP plans to use “SAP’s Activate Methodology”
 - Integration of legacy systems are extra cost.
 - 9. **Interface and Integration** RTM: Tab 4, TECH-35 through TECH-60. 20 – Medium (many), rest are “L” Low level of complexity. 20-“INT-Integration/interface”(many), 1-“not completed”(40), 1 – “CF” configuration item (60), and the rest “A – Available”. Solutions/Tools/Modules covered – SAP Ariba.
 - **TECH 57 – I believe they misunderstood this requirement.** This requirement is not solely about tracking the credits of this Contract. It’s about tracking credits within all Contracts held by/with the State.
 - 10. **Office Automation Integration**
 - Yes, they integrate with Microsoft products listed and others.
 - 11. **Mobile Device Support** RTM: Tab 4, TECH-62. “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Ariba.
 - Yes it can be accessed Mobily
 - 12. **Mobile Applications** - Nothing add here. – TECH 62.
 - 13. **Data Ownership and Access**
 - SAP Ariba retains data for duration of the subscription unless required by law, but State will retains ownership of data. – They send us to their URL. (page 54)
 - 14. **Date Retention, Archive and Purge Considerations** RTM: Tab 4, TECH-63. “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Ariba..
 - SAP Ariba retains data for duration of the subscription unless required by law, but State will retains ownership of data. – They send us to their URL. (page 54)
 - **Concern with a URL.**
 - 15. **Disaster Recovery Plan**
 - *Page 55. “Every SAP Cloud Line of Business (LoB) participates in disaster recovery planning (DRP) and business continuity planning (BCP). The scope of DRP and BCP obligations generally follow these lines: SAP Ariba maintains one or more disaster recovery plans (DR Plan) to protect production instances at data centers when the recovery solution is more than restoration from backups. SAP Ariba discloses to eligible customers, upon request annually, one or more DR Plans relating to the recovery of cloud products and services used by a customer.”*
 - 16. **Solution Environments** RTM: Tab 4, TECH-64 through TECH-67. “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Ariba..
 - State would receive two environments by default: Test and Production.
 - Additional environments (i.e. Development, Quality Control/User Acceptance, Training) are additional charges.
 - 17. **Solution Technical Architecture**
 - Diagram not provided.
 - They described some tools and gave some “various” options for exchanging data between SAP Ariba and external system.
 - 18. **Solution Network Architecture**
 - Diagram on page 59.
 - SAP Ariba solutions are offered and delivered in a true subscription-based model
 - 19. **System Development Methodology**
 - Based upon Agile Scrum Development methodology.
 - 20. **Service Level Agreement**
 - **IBM refers State to their SLA attachment. They do not mention anything about reviewing or indicating compliance with our SLA.**
- D. Security Requirements: pages 75 - 94**

1. **Cloud Security Alliance (CSA) Compliance**
 - SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines.
2. **Security and Privacy Controls**
3. **Security Certifications**
4. **Annual Security Plan**
5. **Secure Application and Network Environment**
6. **Secure Application and Network Access** – Tab 5, SEC-1 through SEC-6. . “L” Low level of complexity and “A – Available”. Solutions/Tools/Modules covered – SAP Ariba..
 - Mentions backup policies.
7. **Data Security** – nothing to add.
8. **Personally Identifiable Information Protection** – nothing to add.
9. **Security/Privacy Issue Occurrence** – nothing to add.
10. **PII Data Actual/Attempted Access or Disclosure** – nothing to add.
11. **Security Breach Reporting** – nothing to add.

E. Implementation Services Requirements: pages 95 - 127

- Three of the Matrix Columns (Bidder Approach/Comments, Availability, and Level of Complexity) were not completed. Only the “Bidder Proposed Tools and Solution” was completed.
1. **Project Management**
 - “IBM believes that successful collaboration and teaming is such a critical success factor for complex projects like this, we recommend a 3-tiered governance model that includes The State and its two partners in the program...”
 - They provide graphs and timelines page 80 - 85
 2. **Project Implementation Methodology –**
 - Reference the use of SAP IMPACT through the use of their BlueworksLive process design modeler.
 - IBM uses hybrid agile delivery methodology.
 3. **Catalog Support Services**
 - Table and graphs show how the process will work. Seems like it will meet requirements.
 4. **Data Conversion Services**
 5. **Interface/Integration Development Services**
 - They list out how their standard process works.
 6. **Organizational Change Management (OCM Services)**
 - Change Management is discussed in graphs and overall looks like it will meet requirements.
 7. **Training Services**
 - IBM/SAP IMPACT is discussed again here and the use of “WalkMe” software.
 8. **Help Desk Services – good.**
 - IBM describes it in section F below.
 9. **On-Site System Stabilization Support**

F. Managed Services Requirements: pages 128 - 136

- Matrix was not completed – left blank.
1. **Solution Support**
 - IBM proposes:
 - Transition support. \$\$\$
 - Tier 2 service Desk
 -
 2. **Organizational Change Management (OCM Services)** – see section E6 comments above, .
 3. **Training Services**
 - “As a part of Organization Change Management activities, training services (Train-the-Trainer for State functions and for Supplier Enablement) will be provided during the Implementation Phase for the modules and functions in scope for SAP Ariba implementation. IBM’s Tier-2 Help Desk services (described in Question #5 below) will be available to respond to How-to questions once implementation is complete. In addition to self-help documentation and Tier-2 Help-Desk services, if required, IBM can provide additional training (onsite or remote) for requested SAP

Ariba modules and functions using rates established in the rate card. This will be handled as a Project Change Request”

4. **Catalog Support Services**
 - SAP Ariba doesn't support catalog enablement in Ariba Buying & Invoicing.
5. **Help Desk Services** – Refer to section F1
6. **Transition Out Assistance Services**

G. Other Available Services: pages 137 - 139

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

• RTM: Tab 7, MNGD-1

• Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).

- A sentence that IBM provides consulting, implementation, and managed services and more info. can be provided upon specific request.

H. Video Demonstrations: pages 140 - Page 140 of their technical proposal – a link

- Unable to download. Did finally get to a screen – wanted email to register – therefore cannot score.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: (IBM)

CATEGORY #(s): 4

DATE: (10/3/2021)

EVALUATOR NAME: (Joe Zrioka)

EVALUATOR DEPARTMENT/STATE: (State of Maine Division of Procurement Services)

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 preliminary docs, cyber liability of 10 mil
 - E-procurement cloud solutions SAP Ariba
 - highest number of Ariba certified professionals (no data to confirm)
 - SOC 1, 2, and 3.FedRAMP, ISO, GDPR certifications
 - To assess, measure, manage and report on the project health - the Seven Keys Framework
2. Previous Projects
 - Lilly- Ariba Source to Pay Capabilities
 - Pfizer - Ariba Suite Capabilities: Guided Buying, Invoice Management, Supplier Management, Sourcing, Contracts Management
 - Lumen - Ariba Capabilities: Guided Buying, Invoice Management, Procurement Operations Desk, Sourcing, Contracts
 - IBM – From legacy to Ariba Source to Pay
 -
3. Subcontractors
 - SAP
 -
 -
4. Organizational Chart
 - Executive Org Chart
 - Roles not defined
 - SAP driven
 -
5. Litigation
 - variety of ongoing claims
 -
 -
6. Financial Viability
 - D&B Report dated 5/2021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s): 4

DATE: 1/11/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Disaster Recovery Plan

Solution Environments

Solution Technical Architecture

Solution Network Architecture

System Development Methodology

Service Level Agreement

Security Requirements IBM proposes to implement SAP ARIBA

Cloud Security Alliance (CSA) Compliance

Security and Privacy Controls

Security Certifications

Annual Security Plan

Secure Application and Network Environment

Secure Application and Network Access

Data Security

Personally Identifiable Information Protection

Security/Privacy Issue Occurrence

PII Data Actual/Attempted Access or Disclosure

Security Breach Reporting

Implementation Services Requirements

Project Management Three tiered governance model includes the state and the two partners in the project IBM and SAP arriba includes roles and responsibilities.

Project Implementation Methodology SAP impact solution. One size fits all.

Catalog Support Services Heavy focus on supplier enablement

Data Conversion Services Methodology includes source , assessment , extract transform which includes data cleansing, validate , target system

Interface/Integration Development Services Minimum detail provided

Organizational Change Management (OCM Services Methodology is IBM's digital change. OCM phases are prepare, explore, realize, deploy, sustain

Training Services Some of the training is covered by OCM and the training plan will be developed with the state. Appears short on methodology.

Help Desk Services described in Section F1?

On-Site System Stabilization Support Hypercare and managed services

Managed Services Requirements

Solution Support Same as above in various sections.

Organizational Change Management (OCM Services Same as above

Training Services Same as above

Catalog Support Services Same as above

Help Desk Services Same as above

Transition Out Assistance Services standard operating procedures

Other Available Resources provides consulting, implementation and managed services "is" almost all industries

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Deploying Ariba
 - Experience
 - Developed implementation process stated
2. Previous Projects
 - Lilly example was transition from one SAP to another in Ariba, no end results demonstrated except changeover
 - Pfizer transitioned from Ariba On-Prem to cloud, results only identified changeover within IBM solutions
 - Lumen from one SAP product to another, results do not show ROI
 - IBM project is their own transition from on-prem to cloud?
 - Would have expected more state procurement project examples if they are available and new enablement, not just transition from one IBM solution to another
 - Projects do not show capability of IBM to implement state procurement solutions
3. Subcontractors
 - No subcontractors
 -
 -
4. Organizational Chart
 - Only provided 4 team members.
 - Not shown how they would develop a team for a statewide implementation
 -
5. Litigation
 - Response does not identify litigation pending only that there is
 - Question on responsiveness to this section
 -
6. Financial Viability
 - Moderate Risk overall unexpected
 -
 -

Individual SME Comments:

General Principal and Requirements

- SAP Ariba Solution
- POSITIVE (p.3) SAP Ariba Solution, SaaS
- POSITIVE (p.3) SAP manages infrastructure
- QUESTIONING (p.5)- Spot buy catalog avenue to encourage off contract purchases.
- POSITIVE (p.5)- mobile platform focus
- POSITIVE (p.7)- end to end system, task management functions
- QUESTIONING (p.8)- Monthly feature deliveries, what is state resource demand for these?
- INTERESTING (p.8-9)- API open access developer portal
- NEGATIVE (p.8)-Many value-added services, why not included in base products
- INTERESTING (p.11)-Does IBM support customized or is the configurable system the proposed option. States may be in a situation where configuration limitations do not meet compliance requirements.
- QUESTIONING (p.12)-Extension partners for functionality what is relationship and liability
- QUESTIONING (p.15)- Does IBM have current NVP contract for eProcurement
- QUESTIONING RTM line 9, EPROC-GEN-5, access to contracts only to licensed users

Functional Requirements

- INTERESTING (p.16) Ariba provided less costly ways of procurement. Would like to see ROI data.
- POSITIVE (p.17) fully automated source to pay
 - SAP Ariba Buying& Invoicing (including Guided Buying)
 - SAP Ariba Sourcing
 - SAP Ariba Contracts
 - SAP Ariba Supplier Lifecycle & Performance Management
 - SAP Ariba Network
 - SAP Fieldglass
- QUESTIONING (p.17) How does SAP synch with other ERP software, cost and effort involved
- POSITIVE (p.17) increases touchless invoicing
- POSITIVE (p.19) Business network well established
- POSITIVE (p.26) Role based user dashboard
- QUESTIONING (p.29) Does guided buying allow for weighted criteria (OSD, local, USA, etc.)

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

DATE: 1/13/2022

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

- INTERESTING (p.31) Buying and Invoicing reconciles all purchases. How is integration from existing solutions considered.
- POSITIVE (p.33) Catalog searches across hosted and punchout (level 2)
- POSITIVE (p.34) Ariba sourcing most widely adopted in marketplace (vendor familiarity)
- POSITIVE (p.34) Solicitation template management, historical library, electronic solicitation
- POSITIVE (p.34) Proposal side by side evaluation
- QUESTIONING (p.37) Contract documents versioning related to negotiating activities
- QUESTIONING (p.40) Public access API website details
- QUESTIONING (p.42) Reporting limitations to customize or export not clarified very well

Technical Requirements

- QUESTIONING (p.45) accessibility limitations are very broad
- NEGATIVE (p.45) Audit logs retained only with active account (3-5 years typical requirement)
- NEGATIVE (p.47) Roles do not appear to have a buyer/shopper type category
- POSITIVE (p.48) Single Sign On consistent with Ariba
- POSITIVE (p.50) Deep level of experience with data conversion and SAP projects
- POSITIVE (p. 51) Integration with ERP Oracle and PeopleSoft
-

Security Requirements

- POSITIVE (p.63) credit card security standards met
- QUESTIONING (p.76) SAP does not handle HIPAA data, possible concern?
- NEGATIVE (p.88) IBM will specify charges for investigating changes?
- POSITIVE (p.100) Good change manage processes identified

Implementation Services Requirements

- NEGATIVE (p.88) IBM will specify charges for investigating changes?
- POSITIVE (p.100) Good change manage processes identified

Managed Services Requirements

- POSITIVE (p.108) various levels of support identified

Video Demonstrations

- NEGATIVE Inaccessible using link provided.

Individual SME Comments:

Overall

SAP Ariba is the solution

General Principal and Requirements

Key Solution Functionality Elements

3	Ariba is the solution they are proposing	
3	There is no software to install and no hardware to buy.	
3	Subscription includes system maintenance, automatic upgrades, base product enhancements and application of service packs	
4	Single point of entry	
4	Open marketplace environment	

User Experience

5	Guided buying.	
5	Each module has configurable dashboards. Users can create multiple dashboards	
6	Ariba also provides mobile app.	

Bidder Best Practices and Roadmap

7-8	Quarterly releases	
	Optional monthly features.	
	Best practice Center – access to solution experts.	

Innovations and Value-Added Features/Services

9-11	API's – currently no cost for this	
	SAP Fieldglass – vendor management system that helps organizations to find, engage and manage their external workforce and services procurement resources.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: IBM
CATEGORY #(s): Stage 2 Category 4 – Services Only
DATE: 12/30/2021
SME/EVALUATOR NAME: Tom Hastings
DEPARTMENT/STATE: State of Montana

Instructions: The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

The response for this Category 4 Services Only is the same response submitted for the Full Solution. I have copied over the notes from Full Solution to this Category 4 Services Only and have highlighted the sections that I have added to these notes. The note below is from the SME on the evaluation notes:

For Category 4 it should just be the Implementation Services, Managed Services and Other Services.

They were supposed to identify which software they would do the Services for with the idea that a State may pick a system in Category 3 and pick from the various Service offerors that identified that particular system.

So for those that included everything I would just note the name of that system.

Individual SME Comments: Video link has been removed or is no longer available. Not able to watch video demonstration.

Concern that some of the standard responses in the comment section of the RTM is "Standard Functionality"

Provided attachment (REDLINE) to NASPO ValuePoint Terms and Conditions but I cannot designate changes Did NOT supply a copy of their SLA originally, but NASPO found it and uploaded it for review. Some responses stated a "reference" to another section for their response but could of easily just copied and pasted the response.

SAP Ariba is the solution that IBM supports.

This response meets the bare minimum as far as information submitted. I do not argue that this supplier could provide the services only requirements, but I would have liked to see more detailed information in their response.

General Principal and Requirements

Key Solution Functionality Elements – Page 4

- PDF Page 4 – Proposing SAP Ariba as the solution.
- PDF Page 5 – Guided Buying used as SSO.

User Experience – PDF Page 6

- Add items to a personal dashboard to monitor and gain access.
- Can access most of tasks required using the mobile application.

Bidder Best Practices and Roadmap – PDF Page 8

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Quarterly releases (4 times a year)
- Offer Road Map support.
- State can offer strategic guidance to SAP solution experts
- Registered to view RoadMap at this link <https://roadmaps.sap.com/welcom>. Provided roadmaps on all their products

Innovations and Value-Added Features/Services – PDF Page 9

- State has access to APIs at no additional cost
- New Innovations “SAP FieldGlass” and “SAP Ariba Supplier Risk Management” are available with an ADDITIONALCOST.

Customizations/Extensions – PDF Page 12

- States system is configurable, and customizations are not necessary at this time.
- Recommends not deviating from standard configurations.
- Can use SAP Ariba Partner Apps but are not included in the solution or price at this time.
- Provides list of SAP Ariba App Extensions and Partners on PDF Page 13 – **Not included in solution or price!**

Alternative Funding Models – PDF Page 15

- State will incur a monthly usage-based subscription cost after initial implementation.
- Do NOT offer a custom payment plan and will require further discussions.

Contract Transition and Flexibility – PDF Page 16

- If State wants to move to this agreement from current one, contingent factors apply – Page 16

Functional Requirements

General Functionality – PDF Page 17

- PDF Page 18 – Suppliers are in the Ariba Network
- PDF Page 18 – Solution is Guiding Buying, Sourcing, Contracts, Supplier Lifecycle, Ariba Network and Fieldglass.
- PDF Page 19- Personal Dashboards
- PDF Page 19- Can import data from external systems.
-
- CONCERN - EPROC-GEN-5 – Line 9 – This will require an integration
- CONCERN - EPROC-GEN-11 – Line 15 – Do we assume there is no file size limit?
- CONCERN - EPROC-GEN-13 – Line 17 – Response does not address the ability to reassign work?

Supplier Portal – PDF Page 20

- SAP Ariba Business Network is the Supplier Portal SBN
- Ariba offers Open, Smart and Simple Networks for suppliers PDF Page 22.
- Offers Supplier Portal assistance.
- Suppliers have access to dashboard for transactional details
- CONCERN - EPROC-SPR-18 – Line 22 - Vendor Complaints are handled outside of system

Supplier Enablement/Management – PDF Page 26

- Unlimited number of suppliers – Page 26

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Supplier Enablement Team
- Supplier account allows for access to perform multiple processes.
- CONCERN - EPROC-VDR-19 – Line 48 – The question is for TIN, but response talks about “addresses”
- CONCERN - EPROC-VDR-26 – Line 55 and EPROC-VDR-27 – Line 56- These talk about OFAC and SOS certifications, but the response talks about “addresses”

Buyer Portal – PDF Page 26

- Users use same “Front Door” and land in the system and view a dashboard
- Or users can use “Guided Buying” as the landing page
- Contact Managers would use the SAP Ariba’s Homepage Dashboard
- Dashboards have drill down functionality – PDF Page 29
- CONCERN - EPROC-BPRT-3 – Line 77 – Why is not the user information, ID, first and last name, etc. available under the user profile? Response states API needed?
- CONCERN - EPROC-BPRT-9 and EPROC-BPRT-10 Lines 83 and 84 – The requirements are for online access to records and ability to search for suppliers, but the response references alerts and notifications?
- CONCERN - EPROC-BPRT-15 – Line 89 – Requirement talks about notifications but response talks about searching and reporting?

Need Identification – PDF Page 30

- Guided Buying is the solution name for this requirement
- It has redirect ability to other solutions.
- Need Guidance tile is also an option – PDF Page 31
- CONCERN – Most all responses of this section of the RTM are **Standard Functionality. This is a generally available feature within the Solution and is currently leveraged by multiple customers across multiple industries**

Request through Pay- PDF Page 32

- SAP Ariba Buying and Invoicing is the solution name integrated with the Ariba Network
- Process starts with purchase requisition and ends with invoice via SAP Ariba Business Network.
- CONCERN - EPROC-PRD-16 – Line 117 - The **file size limit is 100MB**
- CONCERN - EPROC-PRD-28 – Line 129 – Negative value for trade in not supported.
- CONCERN - EPROC-WRK-14 – Line 179 – States workflow will NOT be retrIGGERED!
- CONCERN - EPROC-PO-3 – Line 198 – Needs more discussion on encumbering funds function
- CONCERN - EPROC-PO-5 – Line 200 – Cannot handle different PO types. Handles this through workflow
- CONCERN - EPROC-PO-8 – Line 203 – Did not address the attachment requirement.
- CONCERN - EPROC-PO-16 – Line 211 – Cannot electronically sign Purchase Orders
- CONCERN - EPROC-PC-6 – Line 232 – Currently does not support maintaining PCard as part of the user profile.
- CONCERN - EPROC-RC-4 – Line 253 – Cannot record a receipt without a PO reference.

Catalog Capability – PDF Page 34

- SAP Ariba Catalog is the solution name with cross-catalog search functionality
- Level 2 Punchout catalogs
- Also has Spot Buy catalog solution to buy non-sourced goods

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-CAT-6 -Line 291 – Unlimited catalogs not supported, 5000 is limit
- CONCERN - EPROC-CAT-7 -Line 292 – Unlimited catalog items not supported, 500,000 is limit
- CONCERN - EPROC-CAT-19 – Line 304 – Negative Dollar Value not supported.
- CONCERN - EPROC-CAT-39 – Line 324 – Response does NOT address publish announcement within system about new or updated catalogs.

Sourcing/Bid Management – PDF Page 35

- SAP Ariba Sourcing is the name of the solution
- Integration to SAP Ariba Contacts
- Has supporting solutions like Solicitation Project Management and Supplier Proposal Review
- CONCERN - EPROC-SRC-63 – Line 390 – The event is limited to 100 supplier participants
- CONCERN - EPROC-SRC-76 – Line 403- To post solicitation to State public website is a “manual” process
- CONCERN - EPROC-SRC-102 – Line 429 – Supplier’s ability to sign event not supported in the Sourcing module offered.
- CONCERN - EPROC-SRC-109 – Line 436 – Cannot post “proxy” bids to online public site.
- CONCERN - EPROC-SRC-130 – Line 457 – The response does not address the evaluation panel members communication tool.
- CONCERN - EPROC-SRC-138 -Line 465 – Cannot support posting award to state website.
- CONCERN - EPROC-SRC-143 – Line 470 – Response does not address the ability to “Unaward” and event and award to a different supplier.
- CONCERN - EPROC-SRC-147 -Line 474 – Posting a cancelation of an event to a state’s public website is not supported.
-

Contract Management – PDF Page 37

- SAP Ariba Contract Management is the solution name.
- Contains Contract Management and Administration
- Contract can be published in the SAP Ariba Buying and Invoicing solution to track spend
- Guided buying to easily purchase from the contract.
- CONCERN - EPROC-CNT-23 – Line 503 – Response does not address the check out, check in process
- CONCERN - EPROC-CNT-45 – Line 525 – Electronic file viewed publicly not supported
- CONCERN - EPROC-CNT-52 thru EPROC-CNT-62 – Lines 532 thru 542 – The ability to post contract information to the State’s public site is not supported.
- CONCERN - EPROC-CNT-65 – Line 545 – Cannot support posting to State’s public website
- CONCERN - EPROC-CNT-66 – Line 546 – Cannot support posting to State’s public website
- CONCERN - EPROC-CNT-70 – Line 550 – Supplier cannot submit reports via their account (portal)
- CONCERN - EPROC-CNT-71 – Line 551 – Response did not address the administrative fee requirement but only pricing terms.
- CONCERN - EPROC-CNT-72 – Line – 552 - Response did not address the administrative fee requirement but only invoice reporting

Vendor Performance – PDF Page 40

- SAP Ariba Supplier Lifecycle and Performance is the solution name.
- Need to set up APIs to display data to public site.
- Ability to set up supplier dashboards and surveys

Browsers Supported – PDF Page 47

- Listed browsers that are supported which contains those most widely used.

User Accounts and Administration – PDF Page 48

- Provided list of roles and the access associated with them.
- Based on permissions and assignments to a group
- Users can log in and act as user that delegated the user.
- CONCERN - EPROC-TECH-12 – TAB 4 Line 16 – Does not support buyer and supplier accounts from one log in.
- CONCERN - EPROC-TECH-15 – TAB 4 Line 19- Response does not clarify if terminating user access will remove access to data?
- CONCERN - EPROC-TECH-16 – TAB 4 Line 20 – Deactivating user accounts is NOT automatic and is a manual process. Does not clarify if terminating users access removes the data?
- CONCERN - EPROC-TECH-17 – TAB 4 Line 21 – Does not address the displaying of user information. Solution does not provide a user profile?
- CONCERN - EPROC-TECH-18 – TAB 4 Line 22 - Response does not address changes to user account but changes to events or records!
- CONCERN - EPROC-TECH-20 – TAB 4 Line 24 - Response does not address the searchable reference, but only password functionality?
-

User Authentication -PDF Page 49

- 2 possible logins – Regular user and SSO
- Password policies listed in SSO is not used

Federated Identity Management – PDF Page 50

- 2 types of SSO – Identity Provider and Service Provider

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM - Kyndryl

CATEGORY #(s): 4

DATE: 10/29/2021

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- IBM - Est. 1911.
- IBM – infrastructure services for hybrid cloud, enterprise application management, business resiliency, network, digital workplace, and technology support.
- Kyndryl (page 6) is an IBM company. Says they are going to be launched later in 2021. This is somewhat concerning. But on the next page says they have been doing this for 30 years. Unsure here.
- I believe services to meet category 4 are certainly shown, but concerns about Kyndryl providing the service if they are just starting up.

2. Previous Projects

3 projects provided. Kyndryl is mentioned nowhere in the references. No State examples given. Two are not eprocurement end to end. Only one Ariba reference, but done by an IBM subcontractor.

- PayPal Giving Fund – project is still ongoing since 2011. IBM migrated PPGF's ERP platform to SAP Cloud.
- Shared Services Canada – project ongoing. It says the reference is mandated to consolidate and modernize the Government of Canada's IT infrastructure. It discusses Experis (subcontractor) and IBM provide technical support.
- Santander Group Ongoing project – ManpowerGroup's IT brand "Experis" delivering E-procurement solution – "SAP Ariba"

3. Subcontractors

- Yes. Experis, ManpowerGroup, Jefferson Wells, Amick Brown

4. Organizational Chart

- Provides a high-level organizational chart with subcontractors underneath it and a layout of job titles under that.

5. Litigation

- Page 18, yes, they list they have several; however, they do not list any.

6. Financial Viability

- DnB provided. Low – Moderate risk. For IBM only.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Cloud solutions
 - Infrastructure services
 - SAP Ariba eProcurement suite
2. Previous Projects
 - PayPal Giving Fund - Donations
 - Shared Services Canada - delivery of email, data center and telecommunication services
 - Santander Group - procurement operations modernization
 - details lacking on eProcurement experience
3. Subcontractors
 - Amick Brown
 - ManpowerGroup (Experis, Manpower, Jefferson Wells, ManpowerGroup Solutions)
4. Organizational Chart
 - Executive and project Org Chart
 - Roles not defined
 -
 -
5. Litigation
 - variety of ongoing claims
 -
 -
6. Financial Viability
 - D&B Report dated 5/2021
 -
 -

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Deploying Ariba
 - New company in 2021?
 - Developed implementation process stated
2. Previous Projects
 - Unconvincing previous projects
 - Projects do not show capability of IBM to implement state procurement solutions
3. Subcontractors
 - Amick Brown as consultants
 - Manpower Group – are they going to provide a staffing resource for the states? Not clear on what their role will be performing in this contract scope.
 - Experis – Resources for implementing?
 - Jefferson Wells – Consultants?
4. Organizational Chart
 - Seems very diluted with numerous subcontractors as project leads
 - Unclear what role Kyndryl or IBM has in the process
 -
5. Litigation
 - Response does not identify litigation pending only that there is
 - Question on responsiveness to this section
 -
6. Financial Viability
 - IBM D&B is good, unknown for Kyndryl of numerous Subcontractors identified.
 - Noteworthy that IBM is moderate risk
 -

Individual Evaluator Comments: Submitted response is the same as response for Category 1 and 3. They do mention lots of services they provide along with the reference to SAP Ariba.

Organization Qualifications and Experience

1. Overview of the Organization
 - Providing link to website
 - Kyndryl is an IBM company will be launched later in 2021
 - Spin off company- Recognized by Gartner, IDC, HFS Research, and Everest Group
 - Combined team with Manpower Group and Amick Brown
 - Cloud Management, Security, Migration, Managed SAP & Oracle Services, Data Management and Cloud Infrastructure
 - Proposing SAP Ariba to integrate with on prem Oracle Peoplesoft. Uses Cloud Exchange for virtual network
 - Supplied table on page 7
2. Previous Projects
 - Canada project- modernize the IT structure of the Government of Canada
 - Pay Pal project is to update their ERP system to handle more load.
 - Bank project – mentioned this contained “procurement transactions”
 - No government client examples with eProcurement experience.
3. Subcontractors
 - Amick Brown – ISO certified and an SAP partner. Consultant services for SAP. Provided Link
 - ManpowerGroup- staffing brands, Manpower and Experis. Hold State contracts. Seems to be a recruiter for businesses. Provided link
 - Experis – Professional Resourcing – Provided link
 - Jefferson Wells – offers help with Business Optimization Risk & Compliance, Finance & Accounting and Tax Services
4. Organizational Chart
 - Only provided company org chart with some names and titles. Did not provide job descriptions
 - Did not provide the org chart for the client, nor job titles or descriptions
 -
5. Litigation
 - State they have been involved in litigation as plaintiff or defendant but did not offer specific information.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Est. 1995. Formerly Audit Force. ManpowerGroup acquired Jefferson Wells.
- Services it can provide fall under Business issues: Risk and compliance (cyber risk), finance and accounting, business optimization, and tax services (page 2)
- Do not see much Govt experience.

2. Previous Projects

3 projects given. The projects and/or case studies may meet Category 4. *I would like to clarify where their services would be used in an eProcurement solution and if they ever have.*

- Movement Mortgage. Performed a comprehensive cyber risk assessment.
- New Jersey Transit. Performed a comprehensive ransomware review. Identified control gaps and reduced risks.
- 9/11 Memorial and Museum at the World Trade Center. Performed a risk assessment addressing management's risk which resulted in an audit plan. This audit plan was outsourced for internal audit dept. to Jefferson Wells for the last 12 years.

3. Subcontractors

- Vendor states there are no subcontractors.

4. Organizational Chart

- Although not requested, a business organization chart was provided with names; however, *a project organization chart was not provided nor were job descriptions.*

5. Litigation

- The vendor states they have no litigations *that will have a material effect on the finances or operations or affect the ability to provide services.*

6. Financial Viability

- *No. A link to DnB's website was provided for Maine to look up Jefferson Wells' parent company ManpowerGroup's financials. They did provide the DnB number.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, no cyber liability insurance
 - July 2001, ManpowerGroup acquired Jefferson Wells
 - April 2011, ManpowerGroup announced the rebranding of the organization that comprised Jefferson Wells, Manpower Professional, and COMSYS. The new brand, Experis Finance
 - 2020, Experis Finance rebranded to become Jefferson Wells again
2. Previous Projects
 - Movement Mortgage – Performed a comprehensive cyber risk assessment based on NIST cybersecurity framework
 - New Jersey Transit . - performed a review to assess their risk of a cyber attack
 - 9/11 memorial and museum at the World Trade Center performed risk assessment to address management's risks which resulted in an audit plan for the organization
 - eProcurement experience not present in projects
3. Subcontractors
 - All services will be provided by Jefferson wells and will not require the use of subcontractors
4. Organizational Chart
 - org chart for Jefferson Wells only
 - Roles not defined
 - Bios for key personnel provided
5. Litigation
 - Jefferson Wells is not a party to any litigation or other legal proceedings that will have a material effect on our finances or operations or affect our ability to provide services to the State of Maine.
6. Financial Viability
 - Unaudited condensed balance sheets provided from 2020 - 2018
 - Jefferson Wells' parent company ManpowerGroup cannot release a report as part of our agreement with Dun and Bradstreet. The State of Maine can obtain a report from <https://www.dnb.com/>. ManpowerGroup's Dun and Bradstreet number is 78-201-5911 and our score is consistently in the top tier. Financially, our performance rating as established by Dun and Bradstreet is 5A2, and our bond ratings are Baa3 by Moody's, and BBB by S&P.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - KPMG, LLC over 120 old.
 - Touts that they are the government and procurement transformation leader.
 - Much experience in source-to-pay.
2. Previous Projects
 - 5 projects listed, all State. The projects listed fit Category 4.
 - State of Ohio. Interfaced both inbound and outbound with the State's PeopleSoft ERP.
 - State of Arizona. Integrated and interfaced both between CGI Advantage ERP, Tririga, and Ivalua.
 - State of Alabama. Integrated and interfaced both between CGI Advantage ERP and Ivalua.
 - State of Texas (TRS). Interfaced both inbound and outbound with the State's PeopleSoft ERP.
 - California Dept. of Transportation. Migrated contracts from legacy system to Ivalua.
3. Subcontractors
 - None listed, but notes that they will subcontract with the right vendor that meets State's requirements.
4. Organizational Chart
 - Yes – both org. chart and job descriptions.
5. Litigation
 - Vendor states they have no pending litigation that **will materially affect** the firm's operations or ability to perform services for us.
6. Financial Viability
 - Yes. Provided unaudited balance sheets and further descriptive information.

Individual Comments:

Overall/General

- Providing Implementation Services for the following eProcurement platforms: (Pag1)
 - Ivalua
 - Coupa
 - GEP
 - Oracle
 - SirionLabs
- Have numerous concerns with the number of assumptions they take.
- Many of these assumptions (page 181 – 187) are contractual terms and conditions in nature versus an assumption.
- Some assumptions may be deal breakers for the Contract.
- Concerns with the numerous exceptions (pages 189-221) they take and that many States could not agree with.

A. General Principal and Requirements

- N/A

B. Functional Requirements:

- N/A

C. Technical Requirements:

- N/A

D. Security Requirements:

- N/A

E. Implementation Services Requirements: pages 2 - 72

- **Project Management**
 - KPMG will provide a dedicated senior PM.
 - They mention similar projects in Alabama, AZ, Ohio, and Vermont.
 - Key PM tasks KPMG commits to:
 - Establish PM Office and Project Governance
 - Scope Management
 - Schedule Management
 - Budget Management
 - Quality Management
 - Resource Management
 - Communication Management
 - Risk Management

- Issue Management
 - Set up program logistics
 - Align on project templates for status reporting
 - Establish and execute program meeting and communication plan
 - Execute program and governance management processes
 - Execute progress status reporting
 - Perform ongoing risk mitigations and issue tracking
 - Execute project change control and escalation process
 - Setup processes for and conduct Steering Committee updates per your organization's structure
 - Coordinate with eProcurement solution provider CSM
 - Manage all dependencies are accounted for across all parts of the implementation.
- **Project Implementation Methodology**
 - KPMG calls their implementation methodology “Powered Procurement” and label it as a proprietary and accelerated Enterprise Business Transformation approach for Ivalua and other cloud-base solutions. Additionally, they claim acceleration through proprietary tools and templates. *The tools mentioned are all very familiar PM tools, unsure how proprietary they are.*
 - KPMG describes the following approach/methods for implementation to accelerate their process:
 - Vision
 - Validate
 - Construct
 - Deploy
 - Evolve
 - Supplier Enablement
 - Change Management
 - Learning and Development
- **Catalog Support Services**
 - Ivalua has a robust catalog capability for items within the system.
 - They feel most states fall in either the punchout or hosted catalog category – *Concern – as State's may have others*
 - KPMG addresses how they handle these two categories - page 33
 - For items outside the system, KPMG offers to deliver and support a marketplace solution.
- **Data Conversion Services**
 - *Any precleansing of data must be completed by the State. KPMG doesn't help with this.*
 - KPMG will work with the State to define the data conversion strategy and convert in three steps:
 - Extract
 - Transform and load
 - Data reconciliation
- **Interface/Integration Development Services**
 - KPMG will help perform for the State with the assumption (page 128) that there will be *middleware solution or adapter to manage the integration of data between Ivalua, your ERP, and any optional applications.*
- **Organizational Change Management (OCM Services)**
 - KPMG describes their OCM methodology as proprietary and calls it “Make It” methodology; *however, it's typical OCM.*
- **Training Services**
 - Will provide all training as requested / required.
- **Help Desk Services - Tab 6 IMPL 1 – 5**
 - *IMPL 3 and 4 – noted as Not Available – Doesn't meet requirement. “ Help Desk contact information can be added into all screens of the eProcurement solution to ensure users have easy access to the help they need. However, all eProcurement solutions do not currently have a live chat feature from the eProcurement Solution to connect to the Help Desk via on screen chat. Help desk personnel can be reached via phone or email. As live chat features become available in the eProcurement solution platform, we will work with your organization to enable and*

implement the feature. Chat feature will be available to Help Desk staff interacting on the ticketing platform.”

- **IMPL 5 – requires configuration at a Medium level.** Help desk system integrating with ticketing component of the State’s system.
- KPMG will develop the appropriate support strategy. They will train all help desk staff to prepare for ongoing post implementation support. They offer to provide level/tier 2.
 - Tier 1 is to be provided by the “Client”
 - Tier 2 is to be provided by KPMG
 - Tier 3 is to be provided by Ivalua or Client, depending on whether the issue is with the Ivalua system or the Client-side integration/interface.
- **On-Site System Stabilization Support**
 - Meets some of the onsite system stabilization support. – Handles it through level /tier 2. negotiation suggested

F. Managed Services Requirements: 73 - 85

1. **Solution Support –**
 - KPMG provides what they call Powered Evolution services to help sustain the State’s investment.
2. **Organizational Change Management (OCM Services) – p. 159 - 160**
 - Yes, see above, meets requirements.
3. **Training Services**
 - Yes, see above, meets requirements.
4. **Catalog Support Services**
 - Yes, see above, meets requirements.
5. **Help Desk Services**
 - Partially meets req’ts. It is unclear whether KPMG would provide Tier 1 support or if the Participating Entity must provide that level. Note that in the Support Services section on pg. 155 the Table list “Base Services” refers to L2 and L3 support which implies that the Participating Entity is providing L1 (Tier 1) support
6. **Transition Out Assistance Services**
 - They provide a complete transition out assistance service plan.

G. Other Available Services: RTM: Tab 7 MNGD-1 pages 86- 95

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

• RTM: Tab 7, MNGD-1

• Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).

- **MNGD – 1 – “*The production instance(s) will be continuously monitored and common metrics like simultaneous users, hit rate, response times across various pages of the application, overall response time, errors etc. reported. With all the reported statistics, calculation of average response time is one of the key features of the application. These monthly response times are reported along with the monthly SLA report. This report reflects whether the application is meeting the agreed upon SLA thresholds.*”**
- **Strategic Sourcing:** Provide “strategic sourcing process entails spend analysis, market analysis, demand research, go-to market strategy development, bid document creation, bid evaluation and analysis, supplier negotiations, and contract awards.”
- **Should-Cost Modeling:** Provide cost modeling using “Data Engineering, External Market Data Library, Granular Economic Modeling, Advanced Root Cause Analysis”.
- **Contract Performance Management (CPM):** Provide contract management for the State/Entity, identifying contract leakage and taking corrective action.
- **Localization Support:** “help onboard the remaining agencies as a part of the post implementation activities”... “loading data, training end users, and deploying the solution”.

H. Video Demonstrations:

Implementation Services Requirements

Project Management KPMG project management methodology an approach includes APP M overview toolkit and governance model which includes scope, schedule, budget , quality, resource, communications, risk, and issue management. Robust offering.

Project Implementation Methodology __ KPMG's Powered Procurement is a proprietary and accelerated Enterprise Business Transformation approach

Catalog Support Services Punch out catalogs and hosted catalogs. Provided use cases for other catalogs such as contract backed web form, free text web form, blanket PO, invoice against contract, invoice only, P card and T&E card. To identify which suppliers to enable, we will execute a spend analysis to match spend categories to the platform buying channels; this will balance the cost of processing the transaction with control and visibility. A sub-optimized buying channel design can lead to inefficiencies in processing, lack of control over purchases, and ineffective contract compliance. To enable the correct catalogs within your new eProcurement solution, KPMG takes a methodical approach to identify a good fit for a supplier (i.e., punch-out catalogs versus internal/hosted catalogs).

Data Conversion Services Since eProcurement solutions such as Ivalua, Coupa, GEP and others include integrated modules in the platform, we don't need any third-party services for data conversion. The overall migration process from your legacy system to the eProcurement solution consists of the following steps: Extract data from the legacy source in provision to an agreed template, build the actual program extract transform load or leverage a standard bulk upload utility, reconcile converted data with data from the legacy source system. Data will be classified into three categories 1 direct mapping 2 conversion migration only fields and tables three do not migrate. Mock data extract. Data cleansing and harmonization transform and load process quality assurance and reconciliation data load templates artificial intelligence capabilities

Interface/Integration Development Services various ERP/ financial solutions including CGI Advantage, PeopleSoft, Oracle, SAP. experience integrating ERP with eProcurement applications such as Coupa, Ivalua, Oracle, SirionLabs, and GEP. Key activities initiate and analyze, validate or design , construct or build configure and test, deploy or cutover train moved to production, evolve post implementation hypercare. Key activities responsibility chart for KPMG and participating entity.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG

CATEGORY #(s): 4

DATE: 1/12/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Organizational Change Management (OCM Services) KPMG's approach to Organizational Change Management and Training (OCMT) is centered around engaging the right people, at the right time, with the right information. At your organization, we will leverage the experience and lessons gained from multiple State and Local Government (SLG) eProcurement transformations of varying sizes and complexities. KPMG approach empowers all levels of an organization by empowering leadership, strong and engaging managers, supportive and dynamic change networks, staff with change capacity and capability. Make it methodology focuses on outcomes not just deliverables. Stakeholder Analysis/Assessment. Transformation readiness insights platform trip assesses change readiness. Change impact assessment helps develop understanding of how the epicure mint solution will impact positively or negatively stakeholder groups across the organization. Communication plan provides the approach for critical program messaging and engagement activities Have built coaching plans. Plan methodology identifies resistant audiences.

Training Services Our approach to training your organization's end users, system administrators, help desk staff, and suppliers to use Ivalua is centered on several key components; for instance: —An integrated organizational change management and training approach and methodology that drives adoption and aligns to the phases of the transformation —A Target Learning Model which builds on our experience and a robust Training Needs Assessment to deliver a robust approach to training—A collaborative approach to work with your organization and its project members to provide a strong and sustainable training solution—A blended learning approach for both internal and external stakeholder groups that helps raise end user confidence and reinforces increased retention and adoption—A comprehensive Train-the-Trainer (TTT) program to train your identified trainers, change agents, and super users so they are ready and able to deliver end user training to their colleagues—An emphasis on internal staff preparation via Ivalua Academy and knowledge transfer sessions to help enable a Post-Implementation Transition Plan that builds lasting knowledge of the Ivalua platform. KPMG approach aligns with our implementation plan.

Help Desk Services The KPMG Service Desk will augment existing Help Desk capability by providing Case Management support for client Power Users via tickets raised through KPMG's ServiceNow ticketing system. Tickets will be assigned to Tier 1/Level 1 (L1) Support (Client i.e. your organization), Tier 2/Level 2 (L2) Support (KPMG), or Tier 3/Level 3 (L3) Support (eProcurement solution provider or Client IT Support) as applicable. KPMG/KPMG subcontractor can provide Tier 1/Level 1 support as well, which would be contracted by your organization. Defect resolution will include a root-cause analysis, solution explanation, testing, and deployment.

On-Site System Stabilization Support post go-live, post-implementation support/Hypercare will be provided to your organization by KPMG to address defects and transition to steady state run and operate mode for a period of three months. Post-implementation support will be a blend of on-site (implementation project team members) and off-site resources (KPMG Service Center for Help Desk Support).

Managed Services Requirements

Solution Support KPMG's Powered Evolution services help sustain your investment in the Target Operating Model (TOM) by keeping it refreshed and maintained after the post-implementation stabilization phase. This helps ensure that your processes continuously improve and extend capabilities and capacity as your business evolves. triaging functional issues, assisting with the usage and navigation of features and functions, troubleshooting technical issues, assisting with data quality efforts, coordinating with third-party support organizations to resolve incidents impeding business operations, update support and planning, regression testing, maintaining configuration documentation, maintaining standard operating procedures, report writing, data load support, configuration changes, up-taking new functionality, governance, management reporting and change management.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG

CATEGORY #(s): 4

DATE: 1/12/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

Organizational Change Management (OCM Services Post implementation, our Organizational Change Management & Training (OCMT) practitioners help create a sense of consistency as technical changes arise. We do this by working with the implementation team to help maintain stability as the solution reaches a larger audience and as testing is conducted. Our OCM team works with Manage Services throughout the duration of Hypercare, standard and/or enhanced support, Optional Service Packs or T&M. Stakeholder analysis and assessment communication plan change agent network resistance assessment and management plan.

Training Services KPMG will devise and implement a training program that will incorporate your organization's evolving policy and procedures changes and allow help desk staff, administrative users, and general users to remain current and compliant with these policy and procedures, as related to the solution.

Catalog Support Services For ongoing catalog enablement support services, we can continue to refine and maintain the existing catalogs enabled in production as well as continue to identify which new suppliers to enable via a hosted or punch-out catalog depending on the category and type of spend/purchases that arise. We will continue to match spend categories to the platform buying channels to balance the cost of processing the transaction with control and visibility.

Help Desk Services The KPMG Service Desk will augment client existing Help Desk capability by providing Case Management support for client Power Users via tickets raised through KPMG's ServiceNow ticketing system. Tickets will then be assigned to Tier 1 Support (Client or KPMG), Tier 2 Support (KPMG), or Tier 3 Support (eProcurement Solution Provider) as applicable. Defect resolution will include a root-cause analysis, solution explanation, testing, and deployment.

Transition Out Assistance Services The Powered Evolution Managed Service Termination Framework provides the structure for termination of an active client engagement. The framework addresses the governance and oversight of the people, processes, and technology workstreams during the mobilization and transition process. When a client terminates their contract and KPMG is no longer responsible for delivering managed services, the KPMG transition team will manage and oversee the execution of tasks required to remove any client users from our systems, as well as any client information. If in client environment, the KPMG team will execute protocols to help ensure all KPMG personnel is off boarded in accordance with contract guidelines. Manage service termination framework initiation and planning one to two weeks execute and validate two to four weeks transition one to four weeks stabilize roles and responsibilities identified for participating in it and KPMG robust

Other Available Resources Strategic sourcing contract development cost modeling contract performance management localization support

Video Demonstrations

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG

CATEGORY #(s): 4-Services Only

DATE: 9/8/2021

EVALUATOR NAME: Michael Bacu

EVALUATOR DEPARTMENT/STATE: Government Support Services / Delaware

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Large company; good representation of 4 states and 3 local government initiatives
- Called out implementing Ivalua 7 out of past 9 projects
- Unsure if KPMG is consulting only
- Preconfigured solutions; do not allow unique procurement laws to be included
- Jargon with solutions, not very specific

2. Previous Projects

- Ohio is complete solution; no ROI identified
- Alabama very limited implementation primarily financial activities; too early to validate (go live 6/28/2021)
- Teachers retirement system of Texas is very limited in scope compared to statewide scope required, hasn't gone live yet still in implementation

•

3. Subcontractors

- Ivalua is new to full solution implementation (2013) previously source to pay since 2000.

•

•

4. Organizational Chart

- KPMG acting as project manager; significant customer requirement
- Implementation of Ivalua solution
- General descriptions, not specific to NASPO

5. Litigation

- Non Answer.
- Appears they are declining to disclose as requested

•

6. Financial Viability

- Did not provide D&B financial data but references a good credit rating from them. What is in the B&B report that is unfavorable that KPMG does not provide is as requested.
- Financial reports are not audited, brings accuracy into question; overly condensed and only for short period; high debt to partners.

Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

This response is the same as the response submitted for the Full Solution with the only exception is the reference to Ivalua is REMOVED from the Category 4 submission. I have copied over the notes from CATEGORY 1 to this response which is CATEGORY 4. I have highlighted sections in these notes that apply to Category 4. The notes below are from the SME.

For Category 4 it should just be the Implementation Services, Managed Services and Other Services.

They were supposed to identify which software they would do the Services for with the idea that a State may pick a system in Category 3 and pick from the various Service offerors that identified that particular system.

So, for those that included everything I would just note the name of that system.

Individual SME Comments: **The video demonstration for KPMG is the SAME as offered in the Ivalua response. The video shows the Ivalua solution, so I have copied the video notes over from the Ivalua response.**

The narrative for this response is in a different FONT than the Ivalua response, but the CONTENT in some of the response sections is the same!

The Implementation Services Requirements section moving forward (Pages 85 thru 233) is different than the Ivalua response. These sections contain much more detailed information than the Ivalua response. The RTM for this response is the same response as Ivalua.

For Services only category, this supplier supports Ivalua, Coupa, GEP, Oracle, and Sirion Labs.

The Category 4 response is very detailed, and this supplier submitted lots of information. I feel confident that they can offer the requirements needed for a successful implementation of the services they provide.

General Principal and Requirements

Key Solution Functionality Elements – PDF Page 4 thru PDF Page 7

- Single point of entry with landing page displaying profile information. Can search from this page.
- Offers workflow routing known as Smart Routing – PDF Page 5 has sample workflow chart.
- Can tailor the system to match each organizations compliance requirements.
- Offers portal to all users external and internal that will display dashboards to manage the tasks needing to be addressed.
- Marketplace can house hosted and punch out catalogs with searching across all catalogs

- Powerful Integration toolbox
- Workflow is highly configurable containing over 50 different controls. PDF Page 6
- Document management with reporting capabilities across all modules
- Public portal is offered to view the source to pay activities without an account.

User Experience – PDF Page 8

- User has configurable homepage landing which helps the user in deciding what needs to be done. PDF Page 8 shows sample homepage
- User's access is role based and tied to "authorizations. Can delegate workflows. PDF Page 9 shows delegate functionality screenshot.

Bidder Best Practices and Roadmap – PDF Page 9 thru PDF Page 11 – Same as Ivalua response notes copied over.

- Releases are performed twice a year and allows the client to choose which version and when to apply upgrades. Customers are in control of the upgrades
- Constant communication with customers to stay up to speed with new technologies.
- Work closely with customers to learn their best practices
- 60% roadmap comes from clients with 20% reserved for innovation and 20% for market trends.
- Areas of significant investment are Mobile, Invoicing, Contract Management, Supplier Risk and Security. PDF Page 10
- Leveraging new AI technologies. PDF Page 11
- Automated obligation tracking and management is being enhanced.
-

Innovations and Value-Added Features/Services – PDF Page 11 thru PDF Page 13 – Same response as the Ivalua response. Notes copied over.

- Offers Help Desk support. PDF Page 12
- 90% of tickets solved in an hour. PDF Page 11
- Advanced Services Procurement - Improvements to contingent labor PDF Page 12
- Expenses – Capture PCard transactions. PDF Page 12
- Vendor Master Management – Better manage vendor data. PDF Page 13
-

Customizations/Extensions – PDF Page 13 - Same response as the Ivalua response. Notes copied over.

- Client is responsible for when they go through an upgrade cycle.
- The platform relies on configuration not custom code.

Alternative Funding Models – PDF Page 11 thru PDF Page 15 –

- Offering 2 options for this section and numbers presented are representational only.
- Option 1 - Hybrid fixed fee plus transaction-based model. Fixed fee payment and/or transaction fee of 1-3%. PDF Page 14
- Option 2 – Value Based Funding Model – Self-Funding model. Table of examples provided on PDF Page 14 and 15

Contract Transition and Flexibility – PDF Page 15

- State this process is complicated and will work with our entities based on the terms in the awarded Master Agreement.

- Offers native public site for posting – RTM line 7
- CONCERN - EPROC-GEN-6 – TAB 2 Line 10 – Can the system be integrated based on this response?
- CONCERN - EPROC-GEN-11 -TAB 2 Line 15 - Has a limit on a file type (executables) and states size limits do exist?
- CONCERN - EPROC-GEN-15 – TAB 2 Line 19 - PO is the only printing format that is printable?

Supplier Portal – PDF Page 17 - Same response as the Ivalua response. Notes copied over.

- Unlimited suppliers with free supplier portal.
- After establishing an account, the supplier portal has a one stop shop on their homepage. PDF Page 18
- Self-manage users with roles when they set them up in the system. Account has system admin to manage supplier's account.
- CONCERN - EPROC-SPR-5 – TAB 3 Line 9 – Does the system notification get sent via email, or does supplier just have to monitor notifications on their supplier dashboard?

Supplier Enablement/Management – PDF Page 19 thru PDF Page 25 - Same response as the Ivalua response. Notes copied over.

- Enablement is 2 parts, public facing page to create an account, and “full enrollment” used to be fully onboarded –
- Sample supplier registration PDF Page 20
- Supplier Full Enrollment happens after workflow approval. The information required here is banking information and W9 documents. PDF Page 21
- Integrations can be designed to verify real-time profile information. PDF Page 21
- Can create their own user contacts. PDF Page 22
- Supplier accounts have document storage and tracking. PDF Page 22 and PDF Page 23
- Solution has supplier workflow. PDF Page 23
- Internal users (Buyers) can have access to search for suppliers. PDF Page 24
- Access to view the supplier record. PDF Page 24
- Suppliers maintain their own profiles, but changes can be put into workflow for approval by internal users.
- STRENGTH - Ability to have “changes” done on a registration get put into workflow.
- CONCERN - EPROC-VDR-32 – Line 61 – Supplier's response leads me to believe they did not understand the requirement. We asked if other agencies be put into workflow, not have data passed into other state systems?
- CONCERN - EPROC-VDR-36 – Line 65 – Need to release an RFI to reminder suppliers to log in and update their registration?

Buyer Portal – PDF Page 25 - Same response as the Ivalua response. Notes copied over.

- This is the access point for procurement activities. Homepage Dashboard – PDF Page 26
- SSO can be a login and each user's dashboard are based on their user roles

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- User roles are tied to authorizations and the user is assigned a “perimeter”. PDF Page 26
- CONCERN - EPROC-BPRT-7 – Line 81 – The requirement is for the Buyer Portal, but the response received is for the “vendor” portal?
- CONCERN - EPROC-BPRT-8 – Line 82 – Does not support daily summaries of buyer notifications.
- CONCERN - EPROC-BPRT-9 - Line 83 – Cannot provide link to external users due to security
- CONCERN - EPROC-BPRT-15 – Line 89 - Supplier notification needs to be handled through the RFI module?

Need Identification – PDF Page 27 - Same response as the Ivalua response. Notes copied over

- The solution has a single point of entry and can manage a request in several ways via “requests”.
- Options include request form, purchase, or exemption request, create a sourcing event or contract, or gather quotes. PDF Page 27

Request through Pay – PDF Page 28 thru PDF Page 32 - Same response as the Ivalua response. Notes copied over

- Process starts with a “request” that will populate relevant requisition details. PDF Page 28
- Exceeding contracted amount could be triggered by the allocations grid. PDF Page 29
- Requisitions are submitted to workflow. PDF Page 29
- Once approved, the requisition is flipped to a purchase order. PDF Page 29
- CONCERN – Page 29 – “At the same time, the order is transmitted to the supplier through their email, including a PDF version of the order”. No other way to send order to supplier.
- Can flip purchase orders into receipts. Page 30
- Receipts are shown on the receipt page (PDF Page 31) and then the receipt is submitted to workflow. PDF Page 31
- Invoice will be created (PDF Page 32), and then payment can be applied to the invoice. PDF Page 32
- CONCERN - EPROC-PRD-1 – Line 102 - Response refers to Sourcing event from the requisition, but requirement is asking for need identification to Purchase Request?
- CONCERN - EPROC-PRD-15 – Line 116 – Does not support executables file type
- CONCERN - EPROC-PRD-37 – Line 138 – Capturing noncontract price for later analysis is not supported.
- CONCERN - EPROC-WRK-24 Line 189 – Can the PO, PR or change request be re-submitted after it was changed?
- CONCERN - EPROC-PO-17 – Line 212 – eFax submission of orders is not supported.
- CONCERN - EPROC-PO-26 – Line 221 - Additional configuration will be required for facilitate fiscal year end.
- CONCERN - EPROC-PC-1 thru EPROC-PC-4 – Lines 227 thru 230 – These PCard requirements are in the process of being developed.
- CONCERN - EPROC-PC-5 – Line 231 - Full administration of PCards is not available in the system
- CONCERN - EPROC-PC-6 – Line 232 – Pcard maintenance is not currently available but is anticipated for release in 2022.
- CONCERN - EPROC-PC-7 – Line 233 – Ghosted cards are not currently available but is expected to be released mid to late 2022
- CONCERN - EPROC-PC-8 thru EPROC-PC-21 – Lines 234 thru 247 – These requirements will require some kind of customization, configurable item, or integration.

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

-
Catalog Capability – PDF Page 33 - - Same response as the Ivalua response. Notes copied over

- Ability to view catalogs are limited to the user's organization scope
- Search results landing screen – PDF Page 33
- Can shop via hosted or punch out catalogs. PDF Page 33
- Hosted catalog process can be done by supplier. Internal user can compare catalog versions PDF Page 34
- Users can use the search functionality to search and filter results. PDF Page 34
- Item tags to find preferred items
- Search punchout and hosted in the same search. PDF Page 35
- CONCERN - EPROC-CAT-32 – Line 317 – The ability to compare catalog item search results in NOT supported.
- CONCERN - EPROC-CAT-34 – Line 319 – Additional functionality is required to compare items and will be based on number of punchouts required.

Sourcing/Bid Management – PDF Page 35 – KPMG uses “vendor” where Ivalua uses “supplier”. Same response as the Ivalua response. Notes copied over

- Wizard solicitation set up – PDF Page 36
- Supplier can be added several ways (commodity code selection, public site, etc.) – PDF Page 37
- Has Sealed Bid functionality
- Conditionality can be applied to questions.
- Item grid (pricing) has multiple set up options.
- Notifications to supplier about event and has access to public portal
- Suggest posting information to client's website and provide link to public portal to view full solicitation.
- Suppliers need to add open solicitations to their account to create a response. PDF Page 41
- Supplier can Management of Responses. PDF Page 42
- Users can monitor suppliers' activity and award events
- Can notify suppliers and create a contract from the solicitation. PDF Page 44
- CONCERN - EPROC-SRC-3 thru EPROC-SRC-9 and EPROC-SRC-11 – Lines 330 thru 336 and 338 – Responses to these requirements refers back to EPROC-SRC-2, Line 329 which did NOT require a response? **Attention to detail!**
- CONCERN - EPROC-SRC-14 thru EPROC-SRC-21 – Lines 341 thru 348 - Responses to these requirements refers back to EPROC-SRC-2, Line 329 which did NOT require a response? **Attention to detail!**
- CONCERN - EPROC-SRC-22 -Line 349 – The response talks about envelope bidding, but requirement talks about separate Cost and Technical sections?
- STRENGTH - Has no limit on number of suppliers being invited to an event.
- CONCERN - EPROC-SRC-68 – Line 395 – eFax is not supported
- CONCERN - EPROC-SRC-70 – Line 397 – This response does not address the requirement that states the eProcurement file of the event needs to be “complete” to meet public records laws. SRC 71 has this same response which meets that requirement.
- CONCERN - EPROC-SRC-83 – Line 410 – System does not support web conferences, but supplier offered the ability to upload the recorded conference. Do they support that file type?
- STRENGTH – Size limitations can be set up by system administrator
- CONCERN - EPROC-SRC-143 – Line 470 - Must start a new solicitation instead of cancelling award on bid and move to the next highest bidder?

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 12/30/2021

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

Contract Management – PDF Page 45 - Same response as the Ivalua response. Notes copied over

- Wizard driven entry. PDF Page 45
- Information brought over from the contract header
- Alerts on documents uploaded to the document section – PDF Page 46
- Native authoring (Word) – PDF Page 46
- Subcontractors can be added.
- Can integrate with multiple eSignature tools. PDF Page 48
- CONCERN - EPROC-CNT-16 – Line 496 – Loading of external price list for contracts will need to be worked out to identify data elements. Additional cost possible?
- CONCERN - EPROC-CNT-52 thru EPROC-CNT-63 – Line 532 thru line 543 – The supplier has used the same response for all of these requirements, but the response does not mention the requirement? Also see lines 555 and beyond as an example. These responses are duplicate but at least start with “this information”.
- CONCERN - EPROC-CNT-66 – Line 546 – Response states alert could be posted to public portal, but requirement asks if it can be posted to state’s procurement website.
- CONCERN - EPROC-CNT-67 – Line 547 – The response does not address the email notification listed in the requirement?

Vendor Performance – PDF Page 48 - Same response as the Ivalua response. Notes copied over

- System has supplier performance dashboard. PDF Page 48
- Allows ability to track a supplier’s performance.
- Improvement plans provide a collaboration tool to help improve the supplier performance. PDF Page 49
- CONCERN - EPROC-VPE-3 thru EPROC-VPE-11 – Line 573 thru line 581 – The response to each of these requirements refers back to the response on line 572 which states vendor performance needs to be handled by a questionnaire.
-

Purchasing/Data Analytics – PDF Page 50 - Same response as the Ivalua response. Notes copied over

- System has 3 different types of reporting, Ad Hoc, Queries and Analysis
- Reports are compiled by running a search and exporting data to Excel.
- Analysis reports can be put on dashboard for view of any user.
- Offers 100 standard reports
- CONCERN - EPROC-PDA-5 thru EPROC-PDA-16 – Line 602 thru line 613 – A duplicate response was used to answer all of these requirements, but the response does not reference the reporting requirement? Can this supplier supply reports based on the listed requirement?
- CONCERN - EPROC-PDA-20 and EPROC-PDA-21 - Line 617 and 618 – This supplier currently does not have PCard functionality.
- CONCERN - EPROC-PDA-36 – Line 633 – This supplier currently does not have PCard functionality.

Technical Requirements – PDF Page 54 - Same response as the Ivalua response. Notes copied over.

KPMG provided screenshots where Ivalua did not in this section.

Availability – PDF Page 55

- Meets requirements

Accessibility Requirements – PDF Page 55

- CONCERN – States they are committed to being Section 508-compliant as soon as possible.

Audit Trail and History - PDF Page 55

- Meets requirements

Browsers Supported – PDF Page 56

- Supports the most update browser versions

User Accounts and Administration – PDF Page 56 – 57 – Narrative response is different

- Supplied multiple authentication options. PDF Page 57
- Access is controlled by authentication. Pages in the system are controlled by user's roles and permissions.
- Supplied screen shot of authorization functionality. PDF Page 58
- Organization hierarchy supplied on PDF Page 59
- Workflow can be applied and is highly configurable.

User Authentication – PDF Page 59 – 60 - Narrative response is different

- Supports multiple authentications and password rules are fully customizable.

Federated Identity Management – PDF Page 60 - Same response as the Ivalua response. Notes copied over

- Meets requirements

Data Conversion – PDF Page 61 – Narrative is different, but matrix response is the same.

- Meets requirements.
- CONCERN - EPROC-TECH-28 -Line 32 – Solicitation data conversion is NOT supported.
- CONCERN - EPROC-TECH-30 -Line 34 – Vendor performance data conversion is NOT supported.

Interface and Integration – PDF Page 61 – 62 - Narrative is different but matrix response is the same.

- Provided communication protocols and data formats that are supported.
- CONCERN – Did NOT identify all finance system/ERP's where their solution has existing interface/integration capabilities in the narrative.

Office Automation Integration – PDF Page 63 - Same response as the Ivalua response. Notes copied

- STRENGTH – Can import Word documents in the contract tool and break them into clauses
- Supports Word, Excel, and PDF

Mobile Device Support – PDF Page 63 - Same response as the Ivalua response. Notes copied

- Meets requirements although response not very informative

Mobile Applications PDF Page 63 - Same response as the Ivalua response. Notes copied

- Based on a mobile web solution rather than a mobile application

Data Ownership and Access – PDF Page 64 - Same response as the Ivalua response. Notes copied

- Meets requirements

Date Retention, Archive and Purge Considerations – PDF Page 64

- Should be discussed at implementation.

Disaster Recovery Plan – PDF Page 64 – 65 - Same response as the Ivalua response. Notes copied

- Notification of data breach is 72 hours.
- CONCERN – Could have supplied more detailed information about this requirement

Solution Environments – PDF Page 65 - Same response as the Ivalua response. Notes copied

- CONCERN – Could have supplied more detailed information in the narrative but did list 3 environments that are offered with some offered at additional maintenance fees.

Solution Technical Architecture – PDF Page 65 - Same response as the Ivalua response. Notes copied

- Supplied application and environment architecture. PDF Page 66
- Application Architecture. PDF Page 66
- Supplied Database Architecture. PDF Page 67
-

Solution Network Architecture – PDF Page 67 - Same response as the Ivalua response. Notes copied

- Provided Ivalua Network Architecture. PDF Page 67
- Supplied data center locations. PDF Page 68
- Mentioned briefly monitoring and maintenance. PDF Page 68
- Can compare KPI's with SLA's

System Development Methodology – PDF Page 68 – 69 - Same response as the Ivalua response. Notes copied

- Defer to subject matter experts

Service Level Agreement – PDF Page 69

- Did not provide a copy of their SLA

Security Requirements – PDF Page 70

Cloud Security Alliance (CSA) Compliance – PDF Page 71

- Supplied the CAIQ as an attachment to their response.

Security and Privacy Controls – PDF Page 71

- CONCERN -Stated they are currently in the process of validating controls and safeguards

Security Certifications – PDF Page 71 - Same response as the Ivalua response. Notes copied

- CONCERN - Not currently audited for PCI-DSS compliance. Page 70
- Defer rest of response to Security SME.

Annual Security Plan – PDF Page 71 – Same response as the Ivalua response. Notes copied

- Uses Role Based Access Control, Secure Customer Data
- Mentioned Physical Security.
- Defer comments to Security SME

Secure Application and Network Environment – PDF Page 76 - Same response as the Ivalua response. Notes copied

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- “Implementation and Development Services” Gold Partner of SAP (Ariba)
- “Reseller” of SAP software.
- LSI is an Invenio Company
- LSI provides: Consulting, supplier relationship management, product design, training design and delivery, organizational change management, and implementation consulting services for SAP customers.

2. Previous Projects

5 listed. One university. One private. Three State or public entity. All fit within Category 4.

- San Diego County, CA. Implemented Ariba public sector supplier and Contract mgt. and integrated it with Oracle.
- University of Kentucky. Implemented SAP HCM, Finance, SAP Student Lifecycle Management, BW,SRM/PPS 7.0 and Analytics.
- Sempra Energy. Implemented Ariba Contract mgt. and integrated to MS Dynamics ERP.
- City of San Diego, CA. Implemented SAP Ariba procurement platform.
- CA Dept. of Healthcare Services. Deployed SAP Ariba procurement platform.

3. Subcontractors

- Vendor states it will not be utilizing subcontractors for this engagement.

4. Organizational Chart

- Yes, Org. chart provided along with job descriptions

5. Litigation

- Vendor states no litigation.

6. Financial Viability

- DnB provided. Low to Moderate risk.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): 4

DATE: 1/11/2022

EVALUATOR NAME: Angie Scherbenske

EVALUATOR DEPARTMENT/STATE: ND State Procurement Office

Instructions: The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

Individual Comments:

Overall/General

- Hybrid Cloud Solution.
- Product is SAP Ariba. Cloud Services with technical architecture of SaaS
- LSI Consulting is a Gold Partner and is submitting proposal as a part of the Partner Managed Cloud (PMC) who is offering the professional services portion of the proposal (implementation, long-term support, etc)
- Really touts the Spend Management portion of SAP Ariba.
- LSI takes seven exceptions (pages 142 – 145), These will want to be reviewed carefully and negotiated should this offeror be in negotiations.
- There are 34 items in the “Assumptions” (page 140 – 141) that require CLARIFICATION or negotiation where many or most States could or would not agree. Examples are: #4 State must follow the LSI provided methodology to implement software, #6 – can’t revisit deliverables once they have been closed, #18 – Postponements and delays of scheduled events due to lack of State staff availability will likely result in an extended project schedule and/or additional fees, #12 –in case of sickness or vacation, the key State decision-makers will have an alternate assigned.

A. General Principal and Requirements

1. Key Solution Functionality Elements (pages 8 – 21)

The electronic procurement solution must not only address the functionalities and processes described in subsequent sections but also bring specific capabilities that provide the following high-level functions to Participating Entities:

- Single point of entry – a single initiation point for all procurement activity.
- Smart routing – a rules engine that electronically guides users down the appropriate procurement pathway.
- Compliance – a technology solution that has business rules and controls “baked in” (See APSPM).
- Portal – a solution that integrates access, collaboration, community, personalization, resources and information for both buying and supplier users.
- Open marketplace environment – an electronic environment of goods and services that provides a “catalog of catalogs” like shopping experience with access to content in Participating Entity issued contracts, external Cooperative Contracts and external internet retail marketplaces.
- Integration – batch and real-time with existing financial management and other core systems.
- Workflow – a configurable, rule/role-based approval automation.
- Document management – automated solution to create, transact and store documents.
- Reporting, dashboards and data visualization – a solution to provide detailed reports and interactive visual analytics.
- Configurable – to address the specific and varying needs/uses of organizations within a Participating Entity both as an enterprise and individually.
- Transparency – provide public and internal visibility into purchasing activity and outcomes.

1. Product/Solution components: pages 8 - 10

a. SAP Ariba Cloud-based. For eProcurement solution (Sourcing, Contracts, Procure to Pay, etc.)

- Single point of entry. Yes – Single Sign on.
- Smart routing. Yes

- Compliance. Yes
- Portal. Yes . “SAP Portal product portfolio”. Can obtain as:
 - as “SAP Enterprise Portal (on-premise)
 - on SAP BTP as SAP cloud Portal service
 - (portal-like) sap Launchpad service
- Open Marketplace Environment. Yes – uses the SAP Ariba Business Network (SBN) for business-to-business network (B2B) and use Spot Buy as the catalog solution.
- Integration. Yes. With the use of integration with out-of-the-box SAP's intelligent suite along with end-to-end business process.
- Workflow. Yes. “SAP Business Workflow enables the design and execution of business processes”
- Document management. Yes. “SAP Ariba Contract Management module can track, manage, and store documents”.
- Reporting, dashboards and data visualization. Yes. “SAP Ariba is delivered with native reporting and analytics, including numerous pre-packaged reports.”
- Configurable. Yes. “Configurable workflows to document templates” with “the flexibility to reflect state-wide or agency-specific rule-sets and processes
- Transparency. Yes - “Vendor Portal” built on SAP's Portal Services. “The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data.” .

2. User Experience - pages 10 - 12

The Solution must provide a user experience that is simple, direct and effective. Characteristics of this experience at a minimum must include, but not be limited to:

- Capability that allows user personalization of their initial screen based on their needs or use of the Solution.
- Intuitive navigation that guides users to the appropriate Solution component with as few clicks as possible.
- Wizard-driven capabilities that can direct the user to the appropriate process or functionality of the Solution.
- Portal that informs users and supports user work management.
- Functionality optimized for mobile access and use.
- Workload management functionality that will allow the re-assignment of work to another user. This includes, at a minimum, purchase requests, solicitations and contracts.
- Role-based functionality for drafting, review and approval, evaluator and other processes.
- **Do not cover all the characteristics in the user experience explanation, but they do offer that “The interface has been designed with special attention to:**
 - Minimizing clicks and number of steps
 - Seamless transition from mobile app to desktop with "follow-me" process from one another
 - Community help
 - Visual workflows, reminders and notifications
 - Bulk actions over many items (i.e. bulk receive purchase orders)
 - Integrations to facilitate multiple catalog search (items in the material master, inventoried items, MRO Supplies and contracted supplier catalogs), cost accounting and more”

3. Bidder Best Practices and Roadmap – pages 12 - 13

Participating Entities are seeking a best value opportunity and Bidders should consider best practices and alternatives including the cost benefits of alternative solutions. Proposed solutions must demonstrate creativity, innovation, benefits and the outcomes brought to Participating Entity. For any project initiated by a Participating Entity the Contractor will:

- Incorporate new Solution version releases or new features/tools when they are available.
- Ensure that the Solution is utilizing the latest technologies.
- Ensure that updates happen in a timely manner.
- Present alternative processing approaches, services, methodologies, business processes or any other best practices to the Participating Entity for consideration of adoption that demonstrates a commitment to continuous improvement.
- In addition, the Contractor must constantly assess and recommend opportunities to reduce costs associated with any aspect of the contract, including project implementation and other services. The Participating Entity is not obligated to accept and implement any recommendations.
- Additionally, Bidders must include the current 3-year product roadmap and describe in detail how it demonstrates continuous improvement for the Participating Entity.

- [“Quarterly Releases](#) – Releases are delivered every quarter in February, May, August, and November each year. Individual products may be released on any or all of the quarterly dates. You should expect to receive advance communication of features and should allow time to prepare for impactful changes to your systems. “
- [“Monthly Feature Deliveries](#) – Major products may have an optional, no-impact release on harmonized monthly feature delivery weekends. As with the quarterly releases, each product has the option to release during any or all these windows. You should not need to prepare for or take action for the monthly feature deliveries. Changes delivered in a feature delivery should be virtually invisible to the end users. Many of our largest cloud products follow a harmonized release calendar.”
- [Road Map](#) is provided in an attachment.

4. Innovations and Value-Added Features/Services – pages 13 - 16

In addition to the stated requirement(s), the State seeks creative innovations, value-added features and value-added services not contemplated in the RFP.

Response requirement: OPTIONAL

• Inline Narrative: If responding to this section, Bidders must provide a detailed description of any additional proposed innovations and value-added features/services as well as the benefits and outcomes Participating Entities and Suppliers would realize. Bidders must be prepared to demonstrate these benefits and outcomes. Bidders must indicate if any of the innovations or value-added services are at an additional cost and identify those in the cost workbook (reference “Innov, Value-Adds, Addl Svc” Tab).

Yes . they give some past and present innovations.

- SAP Ariba has:
 - Launched the first online catalog for procurement.
 - Developed the first software to conduct reverse auctions.
 - Created the Ariba Network, the first business network that today is the largest, most global on the planet, with more than 2 million companies transacting nearly \$1 trillion in commerce on an annual basis.
 - Went live with Ariba Discovery, the first business matching service that like Match.com, connects buyers with needs to sellers who can fulfill them.
 - Ariba Spot Buy
- SAP FieldGlass.
- SAP Ariba Supplier Risk Management.

5. Customizations/Extensions – pages 17 - 20

Proposed electronic procurement solutions are expected to be out of the box, configurable solutions. However, it is understood that for any project initiated by a Participating Entity some of the expected innovations and functional requirements may necessitate customizations/extensions to an existing solution. Any such customizations/extensions provided must become part of the Bidder’s base electronic procurement product(s), upgraded in all future versions, available to all other Participating Entities and adhere to the following:

- Bidders must advise the Participating Entity of any out of the box or configured functionality that could be used in lieu of customizations/extensions to meet requirements and identify any necessary changes to requirements, processes, policies and, if applicable, revised Participating Entity legal code.
- Customizations/extensions must not introduce a performance issue, bottleneck or processing delay in the implemented electronic procurement solution.
- Customizations/extensions must not invalidate, negate or minimize any warranty or maintenance requirement as agreed to between a Participating Entity and their current third-party providers that support the current Participating Entity systems.
- Customizations/extensions must not be constructed in such a manner as to confound, add complexity to, or introduce technical burdens that would impact the maintenance, upgrade or new releases of the electronic procurement Solution.
- Bidders must advise the Participating Entity of any organizational change management (OCM) impacts that will result from proposed customizations/extensions.
- While the State expects customizations/extensions to be completed during the project implementation period, release of any customizations/extensions that extend beyond the implementation period must be identified on the Bidder’s product roadmap submitted with the proposal.

• Inline Narrative: Bidders must provide a brief description of how the proposed solution addresses the bullets above in regard to customizations/extensions that may be created in the execution of a project for a Participating Entity.

- SAP Ariba Application Extension Partners and Applications
- Help deliver new and innovative applications that augment SAP Ariba solutions. List of SAP Ariba App Extensions and our Partners:
 - **Spotline Inc.** Chatbot
 - **Seal Software.** Helps organizations gain visibility, control, mitigate risk and better manage their contracts o Seal Contract Discovery and Analytics helps organizations gain visibility, control, mitigate risk and better manage their contracts in conjunction with various SAP products including SAP Ariba. Seal’s AI powered engine extracts many types of data elements, and presents that data in an intuitive user experience. Seal integrates to SAP Ariba to load contracts and metadata directly into Ariba leveraging APIs. New and existing SAP

Ariba contract workspaces can be sent to Seal to clean up existing content and for many high-value use cases such as regulatory, risk, M&A, audit, etc.

- **CloudTrade** - Optimize your PDF Invoicing channel
- ISMS Applications. Provide compliance to suppliers for a healthy supply chain
- Keelvar Sourcing. The Keelvar Sourcing Optimizer Connector to send event data (suppliers & item master data) from SAP Ariba to Keelvar Sourcing Optimizer. Run, analyze and award complex or large events in Keelvar Sourcing Optimizer, then send awarded supplier data back to SAP Ariba Contracts.
- AppZen AI. Real-time accounts payable fraud and non-compliance detection
- Cordis.
 - Procure-to-Pay integration between SAP Ariba and Oracle
 - Add a layer of protection to personally identifiable information .
 - Digitize your supplier invoices into a single compliant e-invoice process o Intelligent Invoice Express (IIE) allows you to automatically capture and register purchase invoices in one application for verification, validation and efficient processing in Ariba Invoicing or ERP Accounts Payable, even for suppliers who are not yet on the Ariba Network (AN).
 - A prebuilt analytical dashboard for procurement using SAP Ariba and SAP ERP data o Category Manager Dashboard provides valuable insights and reporting, plus the ability to integrate aggregated data across Sourcing, Contracts, Spend, Performance and Risk. It provides a status for each project to manage the category of spend, including a display of all associated business documents.
 - Combine your catalog and non-catalog requests into the e-procurement process, Intelligent Content Capture.
- Fairmarkit.
 - Automatically get quotes for purchase requests from your existing suppliers.
 - Empower end users to competitively bid their purchases
- Vertex - Tax calculation during purchase requisition and invoice reconciliation o Vertex provides automated tax calculation during requisition & invoice reconciliation. During requisition, purchasing managers can view tax implications when approving or rejecting a purchase request and during invoice reconciliation.
- • Accenture - Intelligent chatbot for a simplified buying experience o Paula is an intelligent chatbot designed to modernize user's experience through a simple and intuitive process allowing organization to transform their tasks into value-added work..
- • EcoVadis - Sustainability ratings for procurement - Manage supplier risk and performance.
- • D&B- Proactively identify vendor financial stress to mitigate supply chain disruption.
- • APOS Systems - Live mode data connectivity for SAP Ariba o Live Data Gateway for SAP Ariba provides virtualized data connectivity to SAP Ariba data from SAP Analytics Cloud. Live Data Gateway can also serve data to SAP Data Warehouse Cloud, SAP HANA, and many others.
- • Nitor Relish Xbridge – Seamless SAP Ariba & Qualtrics XM for suppliers integration.
- Nitor Relish DATA ASSURE - Fully automatic supplier data validation in one step, without human interaction.
- • iCertis AI - AI from Icertis turns contracts into live documents connected to your business o Icertis is enabling SAP users to address previously intractable contract challenges. This includes digitizing legacy contracts and importing third-party contracts at scale, analyzing past negotiation history to gain insights for improvement, and deep data visualization.
- • Globality - Seamlessly Integrate Globality's Platform with SAP Fieldglass o Globality's AI Platform transforms sourcing of high-value, complex services by automating the demand creation, supplier identification, tendering, proposal evaluation, and SoW creation process through a self-serve, consumer-like solution. SoW data are automatically sent to SAP Fieldglass

6. Alternative Funding Models – Pages 20

Although proposals will be evaluated based on offered price discounts, Bidders are encouraged to recommend alternative funding models that could be available to Participating Entities when they execute an agreement from a Contract resulting from this RFP. Recommended funding models must be documented in detail and

be independent of all pricing proposed in the cost workbook. These funding models should reflect any ongoing funding and investment requirements necessary for all project implementation and other services costs. The recommended alternative funding models must:

- Be described in detail to fully;
 - Explain how each model would work;
 - Identify the benefits that Participating Entities and their suppliers would realize; and
 - Identify any successes experienced by other clients implementing the model. Bidders must be prepared to demonstrate these benefits and successes.
- Inline Narrative: If responding to this section, Bidders must provide a detailed description as outline above for each recommended funding model.

They do not offer any alternative funding models, but do recommend SAP Fieldglass app.

7. Contract Transition and Flexibility – page 20 - 21

LSI possesses an extremely high level of flexibility to transition from a state's current contract to a new contract or amendment".

B. Functional Requirements: pages 22 – 46

The following functional requirements must be addressed by Bidders and are organized by the electronic procurement workstreams identified below. Each workstream has corresponding detailed requirements identified in the Requirements Traceability Matrix (RTM) document.

Bidders may submit proposals that address one or more workstream however Bidders must respond as directed in each workstream section and provide detailed responses to each individual requirement in the corresponding section of the RTM.

Proposed solutions may rely on third party software components or other partnerships to provide a complete solution. Bidders are encouraged to look for partnerships that will bring an innovative, integrated, and comprehensive Solution to Participating Entities.

General F: The General Functionality section includes requirements that apply to either the entire electronic procurement solution or multiple components of the solution. The **electronic procurement solution must be cloud-based with a Software as a Service (SaaS) delivery model**

1. General Functionality. Tab 2, GEN-1 through GEN-40. **Currently the following applications are widely deployed and support the procurement functions of Ariba customers:**

- SAP Ariba Buying& Invoicing
- SAP Ariba Sourcing
- SAP Ariba Contracts
- SAP Ariba Supplier Lifecycle & Performance Management
- SAP Ariba Network
- SAP Fieldglass

- Uses Native Integration for integration of purchase requests.
- Supports all types of files and mentions a “really robust search engine” in many of the comments.
- “A super user will be granted broader access to the solution by assigning multiple roles” to access functionality across the solution and “provide administration capabilities across the solution or for specific functional areas”. Except for Guided Buying.
- #3 is marked as “partial”, which is not a choice in the codes. **Based on the notes it looks like they do not have the ability to integrate to post on the State's procurement website.**
- #38 is marked N/A, which is not a choice in the codes. **After reading the reply – it seems the answer is “N” as they do not comply with this.**
- For most of the items in 1 – 7 GPE offers use of their system, but these questions are about being able
- Many of the Comments state **“Standard Functionality”** (there are 22 of these). As a nonuser of ASP Ariba's system, I do not know what is “standard functionality” for that particular requirement. I believe that is why the instructions outline to *“describe how the identified tools/solution will meet the requirement. Include benefits or limitations.”* **Based on the vagueness and essentially a guess on my part, these lines won't be evaluated.**

2. Supplier Portal. Tab 3, SPR-1 through SPR-23.

- Ariba seems to have a good handle on the Supplier portal side and a understanding of what the suppliers need.
- SAP Ariba Business Network (SBN) for the supplier portal includes:
 - Ariba Business Network (aka Ariba Network, Ariba Supplier Network)
 - Ariba “Supplier Enablement Services” for the Network are included
 - Supplier Portal functionality across all customers, not specific to a State/Entity using Ariba
- #3 states suppliers can integrate their financial systems to Ariba Network. While the State will want supplier spend reports, **I am not certain about connecting to the system – for security reasons the State would want to look into this.**

- #7, 8, where allow supplier to access solicitations and to submit proposals... IBM responds that State APIs are available to post but suppliers will need to be directed to an external State website. **This is concerning – as this is a requirement of the eprocurement system.**
3. **Supplier Enablement Management Workstream.** Tab 3, VDR-1 through VDR-43.
 - SAP Supplier Enablement Team will “design and develop the most effective enablement strategy” based on their “profile, PO and invoice volume, and spend”. Segment the “State’s vendor master data to effectively target/onboard suppliers in tiered waves”.
 - Provides IRS TIN/Name “verification capabilities”
 - For the Ariba Network, offers suppliers “user guides, FAQs, technical documentation, and free online seminars”.
 - Can have “account specific information” via a “supplier information portal embedded in the Ariba Network”.
 - Suppliers are able to self register and meet requirements 1 – 10
 - **It's not clear if the system accepts commodity codes**, as the answers given to the questions are not straightforward.
 - #18 - #27 are marked as “INT” and the State asks that the verification of the supplier items be done. **IBM's answer is they can validate the format, I am unsure if this will meet the requirement.**
 4. **Buyer Portal.** Tab 3, BPRT-1 through BPRT-15.
 - The answer to #11 is of concern. The State can download any account information (data) as long as subscribed, but only within the functionality of their application. It doesn't answer the question if we can get the minimum items that are asked for in the requirement.
 5. **Need Identification.** Tab 3, NEED-1 through NEED-7.
 - The CF item does not seem to pose a problem. Other items seem to be standard within the software.
 6. **Request through Pay Workstream.** Tab 3, PRD-1 through PRD-62; WRK-1 through WRK-28; PO-1 through PO-29; PC-1 through PC-21; RC-1 through RC-21; INV-1 through INV-11.
 - **PRD 4 – Doesn't seem to answer the Role question. They answer it with groups, but not by role.**
 - **PRD 15 and 16, WRK12, PO11 and 12 – Limit attachments to 100MB size limit, but can support any type of attachment.**
 - **PRD49 – Ariba uses UNSPSC (United Nations Standard Products and Services Code) – it seems much configuration will need to be done to work in State's chart of accounts.**
 - **PRD59 – is essentially not answered.** Gives “Standard Functionality supported and configurable”.
 - **WRK28 – only one user in Que at a time.**
 - **PC 6 – Comment that it's not supported; however, they list as “Available”.**
 7. **Catalog Capability -** Tab 3, CAT-1 through CAT-40.
 - **#3 - 3 channels that catalogs can be updated from: (1) Loaded directly by customer via CSV or CIF format, (2) Loaded by us acting as the catalog management service to the customer, (3) Self-loaded by the supplier via the Ariba Network.**
 - **#6 and 7. Catalogs are limited to 5,000 catalogs and there is a limit to 500,000 items in a catalog.**
 - **#19 – To enter Items of negative values is not an option.**
 8. **Sourcing/Bid Management Workstream.** Tab 3, SRC-1 through SRC-151.
 - **#2 – System has several solicitation templates to use; however, most all State's will want to use their AG approved templates and forms. Some such as the RFI are delivered out of the box, unsure if can configure.**
 - **#36, 52, 63, 70 – limited to 100MB**
 - **#76 – Ariba's system doesn't provide ability to post solicitation documentation unless manually done.**
 - **#138 – Ariba's system does not post award results to State's procurement website. It must be done manually.**
 9. **Contract Management.** Tab 3, CNT-1 through CNT-88.
 - **#45 – Ariba's system doesn't support read only format with redaction properties.**

- #52 through #62 – Ariba's system doesn't support posting of various items to State's public Contracts website. The State must manually post
- 10. Vendor Performance** Tab 3, VPE-1 through VPE-25.
- VPE 21 – **CLARIFY** that the system provides this requirement as IBM says it does, because they comment that the best way is through scorecards, which in my mind is paper or a simple excel form. Maybe scorecards is a name of one of their forms. **If not, this does not meet the requirement.**
 - VPE 25 – **File size limit 100MB per attachment. – does not meet requirement.**
- 11. Purchasing/Data Analytics** Tab 3, PDA-1 through PDA-37.
- PDA 1 – Ariba solutions comes with 250 pre-packaged reports.

C. Technical Requirements: pages 47 - 59

- 1. Availability.** *The solution should be architected to ensure 100% availability between peak use hours of any of the associated Participating Entity that has an agreement resulting from this RFP (i.e., 7am – 6pm local time, Monday –Friday). Availability is defined as the ability to process transactions according to service level agreement (SLA) performance levels specified in the Participating Entity agreement.*
- Sufficient redundancy must be maintained so that the system appears to be available 24-hours-a-day 7-days-a week. Redundant servers, mirrored servers or fail-over devices should be architected so failure of a single component does not affect overall system availability. Multiple points of presence to multiple internet service provider's (ISP's) should also be in place.*
- SAP offers a 99.5% system availability percentage during each month for production versions, with exception of **regularly scheduled and emergency maintenance. CLARIFY – How often is regular maintenance and during what hours and days. Additionally, how often in the past has SAP had emergency maintenance (example of how many times in one year?).**
- 2. Accessibility Requirements.** *The Solution should provide capabilities to support users with disabilities that are in compliance with Section 508 of the Federal Rehabilitation Act and W3C Web Accessibility Initiative standards/guidelines. Proposals must describe existing accessibility capabilities, compliance with these standards/guidelines and identify any existing associated certifications. This discussion must address both publicly available and login-secured components of the Solution.*
- Page 45. They state they will provide accessibility to customers upon request. **It seems the software does not come with accessibility requirements.**
- 3. Audit Trail and History** RTM: Tab 4, TECH-1 through TECH-5.
- TECH 3 – 5 are “INT”; however, they repeat TECH 1 and do not explain/detail out how or why integration or interface is needed.
- 4. Browsers Supported**
- The general web browsers are supported (Microsoft Internet Explorer, M Edge, M Edge Chromium, G Chrome, Firefox, and Safari). Microsoft Internet Explorer compatibility mode is not supported. No concerns.
- 5. User Accounts and Administration** RTM: Tab 4, TECH-6 through TECH-20.
- TECH 12 – **Does not meet requirement.**
- 6. User Authentication** RTM: Tab 4, TECH-21 through TECH-25.
- 7. Federated Identity Management**
- Refers to a link. Page 50
- 8. Data Conversion** RTM: Tab 4, TECH-26 through TECH-34.
- SAP plans to use “SAP's Activate Methodology”
 - Integration of legacy systems are extra cost 10
- 9. Interface and Integration** RTM: Tab 4, TECH-35 through TECH-60.
- “integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.”
 - Real-time and/or batch integration
 - HTTPS using CSV interface
 - SAP Web services
 - REST APIs
- 10. Office Automation Integration**
- Yes, they integrate with Microsoft products listed and others.

11. **Mobile Device Support** RTM: Tab 4, TECH-61.
 - Yes it can be accessed Mobily
12. **Mobile Applications** - TECH 62.
 - Nothing to add here..
13. **Data Ownership and Access**
 - State owns the data.
14. **Date Retention, Archive and Purge Considerations** RTM: Tab 4, TECH-63.
 - Data retention is governed by the active contract.
15. **Disaster Recovery Plan**
 - Meets requirements.
16. **Solution Environments** RTM: Tab 4, TECH-64 through TECH-67.
 - State would receive two environments by default: Test and Production.
 - Additional environments (i.e. Development, Quality Control/User Acceptance, Training) are additional charges.
17. **Solution Technical Architecture**
 - They described some tools and gave some “various” options for exchanging data between SAP Ariba and external system.
18. **Solution Network Architecture**
 - Diagram on page 57.
 - SAP Ariba solutions are offered and delivered in a true subscription-based model
19. **System Development Methodology**
 - Based upon Agile Scrum Development methodology.
20. **Service Level Agreement**
 - UNABLE to open embedded document.
- D. **Security Requirements:** pages 60 - 72
 1. **Cloud Security Alliance (CSA) Compliance**
 - SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines.
 2. **Security and Privacy Controls**
 3. **Security Certifications**
 4. **Annual Security Plan**
 5. **Secure Application and Network Environment**
 6. **Secure Application and Network Access** – Tab 5, SEC-1 through SEC-6.
 - Mentions backup policies.
 7. **Data Security** – nothing to add.
 8. **Personally Identifiable Information Protection** – nothing to add.
 9. **Security/Privacy Issue Occurrence** – nothing to add.
 10. **PII Data Actual/Attempted Access or Disclosure** – nothing to add.
 11. **Security Breach Reporting** – nothing to add.
- E. **Implementation Services Requirements:** pages 73 - 126
 1. **Project Management**
 - LSI provides a basic PM layout diagram on page 73 explanation of PM.
 - Very prescriptive in nature, almost regulatory.
 - Do not see a timeline
 - Does not address most of PM section in RFP.
 2. **Project Implementation Methodology**
 - Very prescriptive in nature, almost regulatory.
 - LSI would like that most SAP cloud implementations use the SAP Activate Cloud methodology. The SAP Activate Cloud methodology follows Agile principles and is well suited to cloud software implementation.
 - Sample role assignment charts are provided for deliverables (pages 79 – 81 and 83 and 88 – 90 and 93). Will want to review these for negotiations if are awarded a contract.
 - **Note:** There are many PM areas that should be reviewed in the Assumptions section (pages 140 – 141) of this proposal.
 3. **Catalog Support Services**

- Uses SAP Ariba Catalog management services or Spot Buy.
- The supplier is responsible for uploading catalogs on Ariba Network.
- Suppliers hosting content on their sites provide a catalog feed with links to their content as authenticated by Ariba Network. Both Level 1 PunchOut (Site and Aisle/category level) as well as Level 2 PunchOut (Aisle, Shelf, and Item level for cross-PunchOut search experience) are supported. SAP Ariba catalog management services manage the enabled catalogs including validation, cleansing, catalog activation and any subsequent refreshes. The catalog set-up includes setting up a catalog hierarchy. Enablement of Punch Out catalogs are available as an optional item for additional charges – Clarify charges.
- Doesn't address training staff or suppliers on catalog management roles.

4. Data Conversion Services

- 6 activities make up the conversion project:
 - Strategy
 - Analyze
 - Design
 - Build
 - Test/Implement
 - Deploy

5. Interface/Integration Development Services

- Pages 98-99 - *“LSI will recommend, design and deploy interfaces based on the best practices and the latest tools available with the SAP environment. In addition to technical assessment, we develop an **Interface Strategy document** that includes the general architecture of the Current and Future Landscape, describes various Interface types, file transfer and process of interface design and implementation.”*

6. Organizational Change Management (OCM Services)

- Explains their OCM method well and with diagrams. They seem to have done OCM before.
- Meets requirements.

7. Training Services

- Training is divided into two different but critical areas:
 - Project Team Training
 - End User Training

8. Help Desk Services – good.

- Page 117 - *“LSI will provide post implementation support / SAP Application Management Services (“AMS”) Services.”*
- Confusion on what LSI is providing and what SAP might be providing or if LSI is providing all.

9. On-Site System Stabilization Support

- LSI explains post go-live stabilization support and some of the help desk again, but don't seem to commit to the 3-month post go-live coverage requirement.

F. Managed Services Requirements: pages 127 - 131

1. Solution Support

- Yes seems to meet requirements

2. Organizational Change Management (OCM Services)

- They offer an hourly rate in their cost proposal, but do not offer any description of services. Unable to evaluate.

3. Training Services

- Meets requirements – point to Section E for description of services.

4. Catalog Support Services

- Provided at an hourly rate but separate from services from proposal. No description of services offered. Unable to evaluate.

5. Help Desk Services

- Meets requirements. – point to Section E for description of services.

6. Transition Out Assistance Services

- Sample transition plan offered. Would like to see a description of how they help transition out. Does not meet requirement.

G. Other Available Services: pages 131 - 138

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

- RTM: Tab 7, MNGD-1

- Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

- SAP S/4 Financials Assessment.
- SAP Fieldglass

H. Video Demonstrations: page 139

- 44 minute demo.
- Some areas the author kept saying they would show more at the demo. Which is confusing since this is the demo.
- Looks very user friendly for Catalog purchasing of items.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: (LSI Consulting)

CATEGORY #(s): 4

DATE: (10/4/2021)

EVALUATOR NAME: (Joe Zrioka)

EVALUATOR DEPARTMENT/STATE: (State of Maine Division of Procurement Services)

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - All 3 Preliminary docs, cert of ins SAMPLE but appeared to be completed with 5 mil cyber
 - Gold Partner of SAP Software including SAP Ariba
 - Partner Managed Cloud Model – Choice of cloud?
2. Previous Projects
 - San Diego County - Ariba Supplier Lifecycle and Performance and Contracts Management - **integration and deployment services**
 - University of Kentucky - Ariba Contracts - **full implementation**
 - Sempra Energy - SAP Ariba Contracts Management **partnered with SAP Ariba and LSI to integrate**
 - City of San Diego - implemented the SAP Ariba procurement platform to modernize their legacy procurement processes – **purchase only?**
 - Washington DC government - SAP Ariba On-Premise Software strategic move to the cloud with Ariba - **purchase only?**
 - California Department of Healthcare Services - Ariba procurement platform, including strategic sourcing and buying & invoicing solutions - **purchase only?**
 - Reference contact information facilitated through LSI...but did provide info
3. Subcontractors
 - None listed
 -
4. Organizational Chart
 - Combined State and LSI project specific org chart
 - Roles defined
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - D&B report dated 7/2021
 -
 -

Implementation Services Requirements

Project Management **LSI CONSULTING** will have leadership provided by the Program Sponsor, Engagement Lead and Project Manager who share responsibility for the successful delivery of the State implementation. •Clearly define project scope, responsibilities, and authority via the project charter and responsibilities matrix. •Finalize the project team resources and organizational chart •Implement the toolset and procedures for scope, risk and issue management •Establish communication protocols including status reporting and issue reporting •Create the project requirements traceability matrix framework •Prepare a Kick Off presentation to communicate PMO standards and expectations to the project team.

Project Implementation Methodology **LSI CONSULTING** will use the SAP Activate Cloud methodology. Extensive detail on this methodology.

Catalog Support Services **LSI CONSULTING** takes will use SAP Ariba catalog management service is a complete, end-to-end combination of proven technology, extensive domain expertise and expert services. Elements include: Supplier Road Mapping, Project Management, Electronic Catalog Enablement, Catalog Maintenance, PunchOut Catalog Enablement, Punch-Out Catalog Maintenance, and State & Supplier Helpdesk Support.

Data Conversion Services **LSI CONSULTING** data conversion project plan is broken down into six activities, which mirror the project phases; Strategy, analyze, design, build, test implement, deploy. Data cleansing appears to be the sole responsibility of the state because no tools were mentioned.

Interface/Integration Development Services **LSI CONSULTING** will develop and implement interfaces and integrations with legacy systems. **LSI** will recommend, design and deploy interfaces based on the best practices and the latest tools available with the **SAP environment**. **LSI will develop an Interface Strategy document** that includes the general architecture mn of the Current and Future Landscape, describes various Interface types, file transfer and process of interface design and implementation.

Organizational Change Management (OCM Services **LSI consulting** has a robust organizational change management road map. It has five phases; prepare, explore, realise, deploy, run post go live. A comprehensive strategy and communication plan will be created to drive the creation and delivery of

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): 4

DATE: 1/14/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

effective messaging. This plan is a dynamic, living, and breathing document. It will be updated periodically to ensure the right communication is getting to the right stakeholders at the right time. The following principles lay the foundation for effective communication: •Message redundancy is related to message retention. •The use of several communication channels is more effective than the use of one single medium to convey a message. •Face-to-face communication is a preferred medium for providing a forum of dialogue with constituents. •The existing organization structure is oftentimes the best channel for disseminating information about the implementation. •Direct supervision is the expected and most effective source of organizationally sanctioned information. •Opinion leaders, who may not necessarily be organizational leaders, are effective change agents. •Information that is consistent and reinforces basic values and beliefs is effective in changing opinions and attitudes. •Personally relevant information is better retained than abstract, unfamiliar or general information

Training Services LSI CONSULTING Training is divided into two different but critical areas: 1. Project Team Training 2. End User Training approach aligns with our implementation plan. **LSI CONSULTING will leverage online** SAP Services courses. **LSI** will train State personnel with business expertise to conduct instructor led classroom training, virtual learning classrooms or deskside coaching for fellow employees. **LSI** will train State trainers in best practice training principles and familiarize them with the training content to be used by conducting tailored train-the-trainer workshops for each applicable area.

Help Desk Services The LSI CONSULTING These services were designed to complement our customers in house support team. Our service is easily adapted to integrate with State's support provider. **LSI's** Application Support Services offers application support across all modules. Support is made available at a predetermined rate, with guaranteed response time. End-users simply call a dedicated toll-free number, or enter their problem tickets over the web to receive direct access to consulting resources. Application Helpdesk support covers Level II Application Critical Support, and Level III Application Enhancement Support. Level III or Enhancement Support is designed for customers who want to expand the functionality of their current systems. Level III (Tier Three) support must be approved by Customer's Support Manager. The intention of Level III is to give Customer flexible and cost-effective access to consulting resources to continually improve Customer's SAP systems. Each level III request is **priced separately** and will be evaluated, quoted on a case by case basis, and must be approved by the customer. JIRA Work Management for Customer Care system

On-Site System Stabilization Support LSI CONSULTING will run Hypercare for 3-months post go-live. On site not clear.

Managed Services Requirements

Solution Support All of our Ariba customers run the latest release of our products. As part of our SaaS deployment model, we handle all maintenance packs, services packs, and product upgrades. Customers automatically receive patches and upgrades when they become generally available for no additional cost. We schedule releases during off-peak hours and weekends to minimize the impact of downtime. Many of our largest cloud products follow a harmonized release calendar. Maintenance windows for cloud solutions are documented in the SAP Support Portal. **LSI** operates its Cloud Management Services, which involves an Information Technology Infrastructure Library (ITIL)-based Information Technology Service Management (ITSM) support model.

Organizational Change Management (OCM Services LSI can support the Organizational Change Management (OCM) Services separate from services proposed in the Implementation section of this RFP for all of the eProcurement solutions. These OCM services can be provided at an hourly rate as detailed in our FILE 4 Cost Proposal.

Training Services LSI can support the Training Services, as described in Section E. 7 Training Services separate from services proposed in the Implementation section of this RFP for all of the

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is required that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Installing Ariba SAP
 - LSI is consulting role
 - Partner managed cloud; should consider liability and data security terms
 - Gateway to full SAP saturation
2. Previous Projects
 - Large list of clients; all but a few are municipalities/cities or smaller entities than full statewide scope
 - Provide examples, but no reference to ROI; provides limited value to spend the money for the services
 -
3. Subcontractors
 - No subcontractors; should be identifying SAP?
 -
 -
4. Organizational Chart
 - All work aside from highest level is done by Ariba and SAP resources
 - Job descriptions show limited responsibilities of LSI. Majority of work appears by States
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - Research needed if LSI absorbs risk to project or defers to SAP or others. States should be aware of liability limits for prime vendors when acting as project managers but do not own solution

Individual SME Comments:

General Principal and Requirements

- SAP Ariba Solution
- POSITIVE SAP Ariba Solution, SaaS
- POSITIVE SAP manages infrastructure
- QUESTIONING Spot buy catalog avenue to encourage off contract purchases.
- POSITIVE mobile platform focus
- POSITIVE End to end system, task management functions
- NEGATIVE Many value-added services, why not included in base products
- QUESTIONING Extension partners for functionality what is relationship and liability
- POSITIVE – Gold Partner for SAP
- QUESTIONING – GovOne Accelerator template benefits or restriction
- POSITIVE – SAP is widely used throughout the industry
- POSITIVE – Modules are beneficial to choose which are best
- QUESTIONING – Is vendor portal a barrier to entry for technology challenged small business
- QUESTIONING – SAP Fieldglass and Supplier Risk Management, using LSI as a third party to implement, and various application extension partners demonstrates a complex fragmented solution.

Functional Requirements

- POSITIVE – separate modules
- POSITIVE – Use of UNSPSC codes is preferred
- POSITIVE – Ariba is far reaching
- QUESTIONING – how simple is the network considering the size and effort needed to implement
- POSITIVE – Resources on page 30 seems interesting
- QUESTIONING – mention of approval workflows
- QUESTIONING – page 34 references guided buying, how does this influence the buyer
- INTERESTING – Need guidance seem very manipulative
- POSITIVE – Catalog features and attribute designations are good
- QUESTIONING – How do technologically challenged vendors submit a bid response?

Technical Requirements

- QUESTIONING – accessibility for differently-abled?

BIDDER NAME: LSI Consulting

CATEGORY #(s): Cat 4 Services, Stage 2 Proposed Services

DATE: 1/13/2022

SME/EVALUATOR NAME: Michael Bacu

DEPARTMENT/STATE: Government Support Services / Delaware

- QUESTIONING – Has lack of browser compatibility mode created problems for customers?
- POSITIVE – Single sign-on and 2 factor is good and appears standard
- QUESTIONING - Organizational change management details are deferred in response
- POSITIVE – Mobile App has basic functionality of solution
- QUESTIONING – Is response page 53, mobile applications dated? iPhone should work on phones above 6s.

Security Requirements

- QUESTIONING – Mobile app does not work if MDM platform?
- NEGATIVE – continuous referral to sap policies for compliance is difficult to determine clear response
- POSITIVE – limited access to data is appropriate
- QUESTIONING (p.76) SAP does not handle HIPAA data, possible concern?
- POSITIVE – Secure systems in place

Implementation Services Requirements

- POSITIVE Good overview of project plan processes
- QUESTIONING – How is responsibility clarified with LSI and State for implementing. LSI places many obligations on the State in the proposal.
- POSITIVE Level 2 punchout is a very good attribute

Managed Services Requirements

- QUESTIONING – quarterly hours for monitoring, what is more are needed?
- NEGATIVE – Training at hourly rate
- NEGATIVE – Catalog Support Services at hourly rate
- NEGATIVE – Help desk services at additional cost
- QUESTIONING – Additional costs may challenge end user ROI

Video Demonstrations

- POSITIVE – SAP is large solution end to end
- QUESTIONING – Is guided buying only view available to buyers, would not like to be overly restrictive
- QUESTIONING – Is there a training session available for new users, solution appears complex
- POSITIVE Dashboard seems beneficial
- QUESTIONING – Data appears a great advantage to power users, can be overwhelming to casual users.

Overall

Exception to #7 of NASPO T' & C's

General Principal and Requirements

Key Solution Functionality Elements

8-10	Ariba is the solution	
	Single point of entry	
	Smart routing – dynamic workflow engine	
	Compliance – SAP s/4 HANA – you can manage regulations, track registrations and substance volumes, classify products and create compliance documents	
	Portal – SAP portal product	
	Open Marketplace Environment – users choose to have access to all of the available catalogs or just their own. Also has spot buy catalog solution available	
	Integration – holistic integration application	
	Document Management – module can track, manage and store documents that can help digitize the contracting process.	
	Reporting, dashboard, and data virtualization. – native reporting and analytics including-packaged reports	
	Configurable – highly configurable solution	
	Transparency – Vendor Portal streamline operations and engagement with your vendor community.	

User Experience

10-12	Guided buying	
	Multiple platforms. Designed to deliver a fast and ergonomic user experience.	
	Interface designed to minimize clicks, seamless transition from mobile to desktop app, visual workflows, bulk actions, and integration s to facilitate multiple catalog searches

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021
RFP TITLE: eProcurement Solutions and Services
BIDDER NAME: LSI Consulting
CATEGORY #(s): Stage 2 Category 4 -Services Only
DATE: 12/30/21
SME/EVALUATOR NAME: Tom Hastings
DEPARTMENT/STATE: State of Montana

Instructions: The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

This response is the same response as for the Full Solution. The notes below show what sections that are to be evaluated for this category. I have copied over notes from Stage 2 Category 1 Full Solution to this Category 4. The sections highlighted below are those sections evaluated for Category 4

For Category 4 it should just be the Implementation Services, Managed Services and Other Services.

They were supposed to identify which software they would do the Services for with the idea that a State may pick a system in Category 3 and pick from the various Service offerors that identified that particular system.

So, for those that included everything I would just note the name of that system.

Individual SME Comments: The video provided did show the functionality of the system, but at a very high level. It concentrated more on tips and lessons learned rather than getting deep into the functionality of the system. I got the impression this company wanted to provide a deeper explanation of the system when they offer a "demo" but not sure what that meant? – SAP Ariba is their solution.

Some of the responses in the RTM are completed by stating "standard functionality" which does not show me they understand the requirement and can state that their solution can perform the requirement. Another issue is the vendor's response comments state an integration will be needed, but the "availability" on the RTM is labeled "A" which means out of the box. See example on Tab 3 Line 198 on suppliers RTM.

I am confident that the system can be offered to state clients but would feel that the concerns listed in these notes would need to be addressed/verified so clients and this supplier are clear on any discrepancies.

General Principal and Requirements – Page 8

Key Solution Functionality Elements – Page 8

- Offers the SAP Ariba Guided Buying with SSO
- Smart Routing is workflow that can be configured.
- Compliance helps track registrations.
- Portal provides access for employees
- Have open marketplace functionality with Spot Buy catalog solution to aid buyers in finding goods.
- Offers integration, workflow, document management and configurable dashboards.
- The vendor portal helps with the transparency requirements.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 4 -Services Only

DATE: 12/30/21

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

User Experience – Page 10

- Each module has configurable dashboards - Page 11
- Allows for mobile use to save time.

Bidder Best Practices and Roadmap – Page 12

- Presents both Quarterly and Monthly releases.
- Supplied 2 attachments embedded in the response document showing their expected road maps. These documents contain good information and could be very useful
- Best Practices Center service provides access to knowledge of best practices

Innovations and Value-Added Features/Services – Page 13

- “Moving away from customized systems to configurable systems is the key to enable innovation” Page 14
- Offers SAP Ariba APIs.
- Does offer some other tools that would be advantageous to the State. SAP Fieldglass and SAP Ariba Supplier Risk Management. Page 15
- Supplied Link to YouTube video explaining that SAP Fieldglass aids to develop external workforces. Can submit a SOW and then work with the vendor. Can integrate with existing systems.
- Supplied YouTube link to explain Supplier Risk Management. I tried to access the video but received a warning stating this is a “private video” – Page 16

Customizations/Extensions – Page 17 thru Page 20

- Supplied a well define list of extensions and partners. Page 17
- Chat bots, pdf invoices, integrations with Oracle, supplier data validation are some examples. I am just curious if these are included or offered at an additional cost.

Alternative Funding Models – Page 20

- SAP Fieldglass is offered with an option to pay as you go and only pay for what you use at the end of the month.

Contract Transition and Flexibility – Page 20 – 21

- Partner Managed Cloud (PMC) is a tool to offer expedition the legal review process.
- Referred to document titled LSI Partner Managed Cloud attachment which provided information on the benefits for using this tool.

Functional Requirements – Page 22

General Functionality – Page 22 thru Page 24

- Single platform for supplier and buyers
- Buying & Invoicing, Sourcing, Contracts, Supplier Lifecycle and Performance, Ariba Network and Fieldglass are the solutions listed.
- Profiles can be set up via an integration.
- User should configure their own dashboards to simplify the user experience.
- CONCERN - EPROC-GEN-11 – Line 15 - Did not address the ability to Import/Export attachments
- CONCERN - EPROC-GEN-13 – Line 17 - Did not address the ability to re-assign work to another user?

DATE: 12/30/21

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- CONCERN - EPROC-GEN-26 – Line 30 - The ability to track admin fees in not available with integration to state's ERP?

Supplier Portal – Page 24 thru Page 30

- Proposing the SAP Ariba Business Network (SBN) as the single point of entry.
- Landing page for all suppliers has access to all procurement related transactions.
- Offers Open, Smart, and Simple network services.
- Sourcing, contracts, catalogs, and invoice access for the suppliers.
- Supplier support with training tutorials and documentation.
- Has supplier mobile app functionality
- CONCERN - EPROC-SPR-9 and EPROC-SPR-10 – Lines 13 and 14 - The comment response of "Partner" is not familiar to me?
- CONCERN - EPROC-SPR-18 and EPROC-SPR-19 – Lines 22 and 23 – One line is not supported and the other line the comment response of "Partner" is not familiar to me?

Supplier Enablement/Management – Page 30

- Buyers can manage the entire purchasing process.
- Offers a supplier enablement team
- Offer supplier education and training materials
- Help manage data collection.
- CONCERN - EPROC-VDR-19 thru EPROC-VDR-27 – Line 48 thru line 56 – The responses here are labeled as needing an “integration”, but I am not clear what integration is required?
- CONCERN - EPROC-VDR-31 thru EPROC-VDR-39 – Lines 60 thru line 68 - Concern - This is a duplicate response from requirements in this section. Does the system offer this requirement?
- CONCERN - EPROC-VDR-43 - Concern - This is a duplicate response from requirements in this section. Does the system offer this requirement?

Buyer Portal – Page 31 thru Page 34

- Can have a configurable landing page with a dashboard, or have a user experience a guidance in buying.
- User will log in using the same portal and what they see can be set up within their roles.
- Casual users purchase, complete forms and be linked to other solutions like ServiceNow
- Power users can have dashboards, run reports, manage records, and post solicitations.
- Provided screen shots on pages 33 and 34

Need Identification – Page 34 thru Page 36

- Guided Buying provides access to catalogs and state contracts and the vendor thinks this is the perfect solution to Need Identification.
- Can trigger workflows that can be configured.
- Can configure a landing page dashboard containing widgets to guide the user in the buying process.

Request through Pay – Page 36

- The narrative response from this supplier is very limited on information.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s): Stage 2 Category 4 -Services Only

DATE: 12/30/21

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

- Interpretation of Purchase Request – Could be a form or “request” that is filled out or could be the result of submitted a “shopping cart” that goes to a PR (purchase request or requisition) and then to a purchase order. See response in RTM line 106
- CONCERN - EPROC-PRD-15 – Line 116 - Attachment size limit is 100 MB per attachment
- CONCERN - EPROC-WRK-12 – Line 177 – Can you add comments, and can you control if comments go to the vendor?
- CONCERN - EPROC-WRK-14 – Line 179 - States the workflow will not be re-triggered. Would if we want workflow started again?
- CONCERN - EPROC-PO-3 – Line 198 – Response states requirement needs an integration, but “Availability” is marked with A which means out of box?
- CONCERN - EPROC-PO-6 – Line 201 – PO number is not configurable by the State.
- CONCERN - EPROC-PO-16 – Line 211 – Cannot electronically sign Purchase Orders
- CONCERN - EPROC-PC-6 – Line 232 – Pcard as part of the user’s profile is not supported.
- CONCERN - EPROC-PC-10 – Line 236 - Availability states out of the box, but wouldn't this require an integration? Loading data from the bank.
- CONCERN - EPROC-RC-4 – Line 253 – Cannot record a receipt without a reference to a PO.

Catalog Capability – Page 36 – 37

- Cross- catalog search among the catalogs.
- Spot Buy catalogs for those items not found in other catalogs.
- CONCERN - EPROC-CAT-6 – Line 291 – Does not have an unlimited number of catalogs. 5000
- CONCERN - EPROC-CAT-7 – Line 291 – Does not have an unlimited number of items. 500,000
- CONCERN - EPROC-CAT-10 – Line 295 - Supplier availability states out of box but response is talking about custom forms - Should be labeled C for customization?
- CONCERN - EPROC-CAT-11 – Line 296 - Supplier availability states out of box but response is talking about custom forms - Should be labeled C for customization?
- EPROC-CAT-19 – Line 304 - Items with negative dollar value not supported
- CONCERN - EPROC-CAT-39 – Line 324 - This response is the same requirement in line 323. Does not address the publish announcement about new catalog requirement.

Sourcing/Bid Management – Page 37 thru Page 40

- SAP Ariba Sourcing is the solution name.
- Ariba Discovery is the supporting public posting.
- Integrates with SAP Ariba Contracts solution
- Configurable templates allow for agency process variations
- Has project management process – Page 39
- Side by side comparison
- Offered links for more information on Public Posting which is also contained in Section 10 Vendor Performance of their response. Page 40
- CONCERN - EPROC-SRC-15 – Line 342 - This response shows the functionality of qualified vendor lists and not if the Sourcing module can handle this solicitation type.
- CONCERN - EPROC-SRC-39 - The system assigned number is not configurable by the State
- CONCERN - EPROC-SRC-41 - Does it support Adobe Acrobat?
- CONCERN - EPROC-SRC-63 – Line 390 - The system has a 100-supplier limit for events
- CONCERN - EPROC-SRC-76 – Line 403 - Response does not state what means this information is to be posted? Integration? Line 404 states integration with that requirement?

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Nitor

CATEGORY #(s): 4

DATE: 8/30/2021

EVALUATOR NAME: Angie S

EVALUATOR DEPARTMENT/STATE: OMB State Procurement Office – North Dakota

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Est. 2003. Small Business.
- Services it can provide seem to be Project Management for the entire project end-to-end. (page 2). Page 3 focuses on providing a full-service procurement consultancy across the entire Source-2-Pay spectrum.
- Govt experience.

2. Previous Projects

6 projects given. The projects and/or case studies meet Category 4.

- State of Maryland. Implementation and Go-Live of Ivalua Sourcing modules.
- US Foods. Implementation and Go-Live of Ivalua Sourcing modules.
- Buckeye Partners. Implementation and Go-Live of Coupa modules.
- Carnival Corporation PLC. Implementation and Go-Live of Coupa modules.
- McAfee. Implementation and Go-Live of Ariba modules.
- NewBalance. Implementation and Go-Live of Ariba modules.

3. Subcontractors

- Vendor states there are no subcontractors, but will be glad to use subcontractors to address any specific skillset the vendor team does not possess.

4. Organizational Chart

- Yes, a project organization chart is provided along with job descriptions.

5. Litigation

- Vendor states there is no current litigation.

6. Financial Viability

- Provided a DnB report with a risk rating of moderate to low/moderate in most areas.

Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Comments:

Overall/General

- Ariba / Coupa / Ivalua
- Nitor will provide the following Innovations and Value-Added Services to the:
 1. Working Capital Advisory (\$0.00 for first 2 years)
 2. Event Management Support (\$0.00)
 3. Invoice Channel Analysis (\$0.00 for first 2 years)
 4. Invoice Management within S2P platform (Ariba, Coupa & Ivalua)
 5. Contract Management Advisory
 6. State Self funding portal
 7. Transparency Portal
 8. Relish Data Assure
 9. Relish InvoiceAI

A. General Principal and Requirements: - N/A

B. Functional Requirements: - N/A

C. Technical Requirements: - N/A

D. Security Requirements: - N/A

E. Implementation Services Requirements:

1. Project Management – page 14

- Agile Methodology
- Lean six sigma
- Hybrid waterfall and agile methodology
- Discussed RACI but didn't provide RACI
- Staffing plan of percentages of Nitor and Entity

2. Project Implementation Methodology Page 32

- Nitor-S2P = Build and testing solution
- "Nitor team will collect all the requirements that are satisfied Out of the box and what requires configuration. Nitor will track all those requirements and document it in Functional design document. After the approval of the FDD, Nitor will identify the technical feasible solution and document it in technical design document. This includes and not limited to UI changes, Data changes, Tooltips, Workflow, Dependencies, custom & out of the box reports, drop down menus, additional integration required, etc."

3. Catalog Support Services – page 36

- Punch out and hosted catalogs
- Use 80/20 rule to analyze spend
-

4. Data Conversion Services

- The following is our approach for data migration:
 - With the participating entities, we will identify various business objects required to be migrated over i.e. Contracts, Vendors
 - The participating entities will identify the business rules for extraction of the data from the source systems.
 - Nitor will provide the migration templates & data transformation logic to the participating entity's IT team.
 - Participating entity's IT team will extract the data from the source systems & perform the data transformation (data migrations) according to template provided & place it into a secure or mutually agreed storage area.
 - Nitor will grab the files & load a smaller subset into Test environment to validate the file formats.
 - Nitor & participating entity will participate in data validation & rectifications together.
 - If any changes are required, respective parties will work together to resolve the issues.
 - The final version of the complete data files will be staged & loaded into Prod environment as determined by the timeline.
- No data cleansing provided.

5. Interface/Integration Development Services

- 3 data categories
 - 1) Master Data – Core application data like Suppliers, chart of accounts, ship to and bill addresses, users, etc. that are key building elements of the S2P transaction.
 - 2) Transactional Data – Data generated between application & needed for smooth operations like push Ok 2 Pay details, asset details, payment status, etc.
 - 3) One-time setup – Integrations with 3rd party applications like eSignature tools (i.e. DocuSign, VeriSign), D&B services, etc..

6. Organizational Change Management (OCM Services)

- Page 42: Yes. The Nitor OCM methodology is built on four (4) key workstreams:
 - Assessment to understand the culture and beliefs in place at the participating entity, as well as the factors that will support or hinder adoption of new technology and processes;
 - Communications to drive messaging and two-way dialogue with associates at all levels of the organization and encourage engagement;
 - Development to create a sustainable training and support framework for learning and growth; and,
 - Sustainment to ensure the organization is prepared to move forward effectively.

7. Training Services

- Many type of training listed
- Blended plan
- components of:
 - live classroom training,
 - self-paced training (aka, online), and
 - reference documentation (e.g., Quick Reference Guides).

8. Help Desk Services - Tab 6 IMPL 1 – 5

- Not addressed in technical proposal
- Don't cover – see RTM

9. On-Site System Stabilization Support

- Not addressed

F. Managed Services Requirements: Page 50

1. Solution Support

- Requires discussion with client to determine needs.

2. Organizational Change Management (OCM Services)

- Yes.

3. Training Services

- Yes, see above.

4. Catalog Support Services

- See above.

5. Help Desk Services

- Level 1 and 2 – Nitor supports.
- Will use the State's ticketing system
-

6. Transition Out Assistance Services

- produce a project transition plan document that layouts the task and activities to be performed to efficiently transition the project from the implementation phase to the long term maintenance phase.

G. Other Available Services: p page 106: RTM: Tab 7 MNGD-1

Bidders are to identify and provide details on any additional services that will be available to Participating Entities.

• RTM: Tab 7, MNGD-1

• Inline Narrative: If responding to this section, Bidders must provide a detailed narrative response that describes any other available Services. Bidders must indicate if any of the additional services are at an additional cost and identify those in the cost workbook (reference "Innov, Value-Adds, Addl Svc" Tab).

- none

H. Video Demonstrations:

- Yes

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- All 3 Preliminary docs, cyber liability insurance – 5 mil
- Nitor is a technology agnostic firm with years of relationship and experience in
 - a) Implementing SAP Ariba since 2003.
 - b) Implementing Ivalua since 2013.
 - c) Implementing Coupa since 2012.
- Nitor has product development relationship with SAP Ariba, Coupa and Ivalua to develop applications to enhance certain business operational needs

2. Previous Projects

- State of Maryland (Ivalua) – Sourcing, contracts management and DocuSign, supplier management, procure to pay, change management and training, migration of historic bids and contracts, manage vendor diversity, 88 compliance, integration with mainframe systems
- US Foods (Ivalua) - Sourcing, contracts management with DocuSign, supplier management, procure to pay, change management and training, migration of historic bids and contracts, integration with PeopleSoft
- Buckeye Partners L.P. (Coupa) - Supplier information management, analytics, AIC, sourcing optimization, contract life cycle management, integration with JD Edwards ERP
- Carnival Corporation PLC (Coupa) - Supplier information management, risk aware, analytics, hey I see, sourcing, integration with Oracle financials
- McAfee Corp (SAP Ariba) - Sourcing contracts optimization, supplier management, invoicing, sustainment support
- New Balance (SAP Ariba) - Sourcing, contracts, supplier management, buying and invoicing, change management and training, sustainment support

3. Subcontractors

- At this point, we are not considering using any subcontractor for this RFP response.
-
-

4. Organizational Chart

- Nitor project org chart
- Nitor Roles defined
-

5. Litigation

The **organization tier** is to put the proper Program Oversight in place to ensure;

- a. Timely and consistent communication
- b. Communication sent to the right people at the right level with the right content
- c. Provide an environment to make decisions
- d. Keep key stakeholders engaged

QM Tier

This tier is the tactics and deliverables that will be created and pushed out to the Organization Tier. This includes 4 key components;

- a. Project Management
- b. Relationships
- b. Delivery Control
- c. Team Development

Steering committee and decision council meets for an hour every four to six weeks, project leadership meeting 30 minutes every week, core team status update one hour weekly state of SC internal superusers SME's as needed. High level sample project plan provided.

Project Implementation Methodology

1. Create Test Plan
2. Identify Test Cases
3. User Acceptance Testing
4. Supplier based Testing
5. Go/No Go Decision
6. Write and Receive Approval for Test Cases
7. Enter Test Cases into Web-Based Auditing Tool (if any)
8. Finalize Testing Phase Pass Criteria
9. Execute Testing
 - a. Unit Testing (Testing specific functionality based on requirements)
 - b. Integration Testing (Testing the integration events)
 - c. Full Unit Testing (Combining Unit and Integration Testing into full system tests)
 - d. Go/No Go from Testing (Based on pre-determined criteria)

Managing Risk of any program is based on

- Governance Structure
- Metric Based Outcomes/Measures
- Schedule
- Resource Plan
- Well defined Scope

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Nitor Partners

CATEGORY #(s): 4

DATE: 1/17/2022

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

RAID Program

following meta-data required to effectively manage risks:

- a) Identification, a unique ID for each risk
 - b) Category – for example functional or technical
 - c) Severity/Probability – resulting in a priority score
 - d) Mitigation – what can we do to manage or eliminate the risk
 - e) Accountability – identify who is leading resolution
 - f) Tracking – ensure progress is being made in managing each risk.
- Change control methodology not discussed in this section.

Catalog Support Services

I. Punchout – Nitor will collect punchout URLs, user name, password, data exchange protocols from the supplier and configure them in lvalua instance with the right supplier contact. These credentials have to be configured for Non Prod instance, testing and then, migration to Production instance.

II. Hosted – Nitor will send lvalua catalog templates with appropriate information to collect supplier catalog data. Typically, these catalog data has to be restructured (data formatting, file formats, etc) once received. All the feedback is provided back to the supplier to regenerate and send the up to date catalog data file.

- 1) Analyzing participating entity's spend by 80-20 rule – 80% of the transaction volume which is the 20% of the spend.
- 2) Sending Nitor's proprietary supplier enablement questionnaire to top 300 supplier and analyzing the supplier responses. We identify which top suppliers have the capability to be enabled quickly based upon their previous experiences with procurement solutions.

System Side

- § Load the supplier record to appropriate supplier
- § Set supplier with the correct parameters for PO, Invoice communication.
- § Associate the right communication protocol – cXML or OCI
- § Open firewalls (if needed)
- § Configure Punchout URLs with appropriate credentials
- § Test the connectivity & data transmission
- § Migrate the supplier setup to Production

Supplier Side

- § Supplier will create account for connectivity for the Punchout, create user credentials or provide credentials to manage hosted catalogs.
- § Share IP details to whitelist on the S2P platform side
- § Create Punchout site for the state approved items (if necessary)
- § Test the connectivity and PO electronic receipt
- § Generate electronic invoice and push it back to S2P platform
- § Train Suppliers by Quick reference guides & How to videos

Data Conversion Services

. The following is our approach for data migration:

- I. With the participating entities, we will identify various business objects required to be migrated over i.e. Contracts, Vendors,
- II. The participating entities will identify the business rules for extraction of the data from the source systems.
- III. Nitor will provide the migration templates & data transformation logic to the participating entity's IT team.

SME/EVALUATOR NAME: Joe Zrioka

DEPARTMENT/STATE: Maine

IV. Participating entity's IT team will extract the data from the source systems & perform the data transformation (data migrations) according to template provided & place it into a secure or mutually agreed storage area.

V. Nitor will grab the files & load a smaller subset into Test environment to validate the file formats.

VI. Nitor & participating entity will participate in data validation & rectifications together.

VII. If any changes are required, respective parties will work together to resolve the issues.

VIII. The final version of the complete data files will be staged & loaded into Prod environment as determined by the timeline. Was there an assessment? Data cleansing?

Interface/Integration Development Services **Ivalua application** configuration & integration workstream of the S2P platform deployment. Integrations are identified, designed, config (build) & tested in an iterative/agile manner.

1) Master Data – Core application data like Suppliers, chart of accounts, ship to and bill addresses, users, etc. that are key building elements of the S2P transaction.

2) Transactional Data – Data generated between application & needed for smooth operations like push Ok 2 Pay details, asset details, payment status, etc.

3) One-time setup – Integrations with 3rd party applications like eSignature tools (i.e. DocuSign, VeriSign), D&B services, etc.

Requirements phase identify all integrations needed identify all application owners establish integration build and deployment time design phase identify field mapping details integration approach any damn data transformation needed find methods frequencies and integration methods build config phase an iterative build followed by conference room pilots and unit testing phase four test integration testing full unit testing into end testing phase five deploy and training integration deployment to production phase six hypercare monitor integrations during the hyper care. Provide L1L2 and L3 support. RACI chart

Organizational Change Management (OCM Services The Nitor OCM methodology is built on four (4) key workstreams:

- Assessment to understand the culture and beliefs in place at the participating entity, as well as the factors that will support or hinder adoption of new technology and processes; Deliverables are stakeholder assessment report, persona matrix , change impact log, change readiness assessment.
- Communications to drive messaging and two-way dialogue with associates at all levels of the organization and encourage engagement; Deliverables are Omni channel communication strategy , communications plan , branding, design of change agent network, design and execution of user portal.
- Development to create a sustainable training and support framework for learning and growth; Deliverables are development strategy, design delivery of train the trainer, design delivery of technical training, design delivery of helpdesk and in ministration training, design delivery of vendor and user training, blended learning approach, leverage S2P provider help and online Academy.
- Sustainment to ensure the organization is prepared to move forward effectively. Deliverables are key performance indicators, long term training strategy, operating model assessment, transition plan.

measure the effectiveness of each element of the Change Management Strategy, Nitor will capture two different data sets:

- Operational, which is analytical information that can be pulled from the S2P system to document adoption, such as number of users logging in, number of Purchase Orders created, percentage of suppliers invoicing electronically, etc...

- Experiential: measuring effectiveness through two-way feedback loops such as focus groups and surveys, to determine the impacted population's level of program awareness and thoughts on training delivery, what has been done well, what can be improved, etc...

Training Services Training appears to be blended with OCM but does not address training on the solution.

Individual SME Comments:

Services Only

Nitor will provide the following Innovations and Value-Added Services to the:

1. Working Capital Advisory (\$0.00 for first 2 years)
2. Event Management Support (\$0.00)
3. Invoice Channel Analysis (\$0.00 for first 2 years)
4. Invoice Management within S2P platform (Ariba, Coupa & Ivalua)
5. Contract Management Advisory
6. State Self-funding portal
7. Transparency Portal
8. Relish Data Assure
9. Relish Invoice A

Services only for annual cost.

As a value-added service, Nitor will provide a Working Capital Assessment, to determine the business case, to implement a formal and wide-ranging program for the participating entity to improve key metrics around Working Capital. The primary activities are the following:

- Conduct a deep dive working capital assessment by tower / spend area
- Build and agree with the participating entity on a segmentation model based on category / market, impact and supplier sensitivity
- Map potential payment method options to segmentation model
- Assess the implementation effort for solution to help support execution
- Develop implementation and communications plan

The participating entity has a unique opportunity given the significant invoice volume, a significant value proposition on how to pay suppliers and the methods in which to do this, based on Supplier segmentation;

- i. Extend Payment Terms, resulting in increased working capital for the participating entity.
- ii. Extend P-Card program to select suppliers – to earn share of interchange revenue annually.
- iii. Discounting, providing terms to suppliers such net 2% 10 days.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Nitor

CATEGORY #(s): 4 Stage 2

DATE: 11/15/2021

SME/EVALUATOR NAME: Stacey Winter

DEPARTMENT/STATE: Purchasing North Dakota State University

iv. Supply Chain Finance, the ability to work directly with a bank to buy your payables shorter terms and pay the invoice in 60 days.

General Principal and Requirements

Key Solution Functionality Elements

4	Working Capital Advisory	
	Event Management Support	
	Invoice Channel Analysis	
	Invoice Management within S2P platform <ul style="list-style-type: none"> How do invoices get handled Analyzing invoices How are their entered – buyer or supplier portal 	
	Contract Management Advisory	
	<p>We understood from the Q&A that existing self-funded model is managed by the State's business operations personnel. It is not an automated system and State rely's on the contractors to report their sales on their contracts.</p> <p>Nitor is glad to work with the State to leverage an existing ongoing Nitor Apps platform that can take the feed from Financial systems for knowing the payments made against the State Term Contract and generate invoices to send to the Suppliers who owe State's fees because of an existing contract. Nitor App also has dashboard to provide visibility into 60 to 180 days</p>	
	Relish Data Assure	

Alternative Funding Models

12	we need your help in understanding the laws & code of conduct relevant to procurement and agency dynamics to propose a model that can work for the state.

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Nitor

CATEGORY #(s): 4 Stage 2

DATE: 11/15/2021

SME/EVALUATOR NAME: Stacey Winter

DEPARTMENT/STATE: Purchasing North Dakota State University

Functional Requirements

General Functionality

12	Assumptions and ideas	
	Suppliers pay a fee	
	Suppliers pay to register with the state	
	Use of p-card rebate	
	User fee paid to participate in auctions	
	Charge fee for people to use contracts	

Project Management

	Nitor's project management methodology is a blend of Six-Sigma governance and tools with the speed and risk mitigation that comes from the Agile Methodology. Six-Sigma provides a framework that ensures all appropriate tasks are completed and reviewed in a Phase prior to moving too far into the next Phase.	
--	--	--

Planning phase

15-	Nitor will lead the Planning Phase of the project, which highlights the following activities leveraging Nitor's 8-Element Framework:	
-----	--	--

Governance Model

	This governance model is focused on the application configuration, promotion, environment moves and ultimately move to Production. Beyond the layers provided here, there is also consistent executive level conversations related to the above happening. Here is a sample of working with Ivalua software provider. There are similar models with Coupa & SAP Ariba

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Nitor

CATEGORY #(s): 4 Stage 2

DATE: 11/15/2021

SME/EVALUATOR NAME: Stacey Winter

DEPARTMENT/STATE: Purchasing North Dakota State University

Catalog support

36	There are 2 types of Catalogs and to enable catalogs I. Punchout – Nitor will collect punchout URLs, user name, password, data exchange protocols from the supplier and configure them in Ivalua instance with the right supplier contact. These credentials have to be configured for Non Prod instance, testing and then, migration to Production instance. II. Hosted – Nitor will send Ivalua catalog templates with appropriate information to collect supplier catalog data. Typically, these catalog data has to be restructured (data formatting, file formats, etc) once received. All the feedback is provided back to the supplier to regenerate and send the up to date catalog data file.	
----	--	--

Organizational Change Management (OCM Services)

42	Nitor’s approach to change management is a structured process to guide people from the “current state” to the “future state.” The OCM methodology ensures the S2P technology (and any related new processes) will be understood, adopted and highly valued throughout the participating entity. The Nitor OCM methodology is built on four (4) key workstreams: Assessment to understand the culture and beliefs in place at the participating entity, as well as the factors that will support or hinder adoption of new technology and processes; Communications to drive messaging and two-way dialogue with associates at all levels of the organization and encourage engagement Development to create a sustainable training and support framework for learning and growth; and, Sustainment to ensure the organization is prepared to move forward effectively.

EVALUATOR NAME: Tom Hastings

EVALUATOR DEPARTMENT/STATE: State of Montana

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Helps with implementations of SAP Ariba, Coupa and Ivalua- Consultants
 - Started in 2003
 -
2. Previous Projects
 - Currently working with a state implementation
 - Listed a food distributor, cruise company, and IT as other clients
 -
3. Subcontractors
 - Not currently considering using subcontractors but will be glad to use them to address skillsets that Nitor does not possess.
 -
 -
4. Organizational Chart
 - Listed company chart and the IT solution software's roles
 - Supplied role names and responsibilities
 -
5. Litigation
 - State none to report
 -
 -
6. Financial Viability
 - Supplied DUNS report in separate file.
 - Low-moderate risk
 -

CATEGORY #(s): **Stage 2 Category 4 – Services Only**
DATE: 01/03/2022
SME/EVALUATOR NAME: **Tom Hastings**
DEPARTMENT/STATE: **State of Montana**

Instructions: *The purpose of this form is to record proposal review notes written by **individual** evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual SME Comments: *This supplier is offering services only for solutions Ariba, Coupa and Ivalua as stated on the very last page of their response. They missed some areas of the narrative, but it appears those sections did not apply to this category. I would have liked to see more descriptive information on some of the services provided like Help Desk Services section as I think this section lacked information.*

General Principal and Requirements – Page 4

Key Solution Functionality Elements – **Did not submit any narrative**

User Experience - **Did not submit any narrative**

Bidder Best Practices and Roadmap - **Did not submit any narrative**

Innovations and Value-Added Features/Services – Page 4

- Listed solutions they will provide:
- 1. Working Capital Advisory – This is to provide a deep dive working capital assessment. This also helps with paying suppliers.
- 2. Event Management Support - Nitor will assist the participating entity or organization in managing up to 5 sourcing events or max of 3 months whichever is lesser, post Sourcing module go live.
- 3. Invoice Channel Analysis - Nitor will provide a value-added service assessment and plan, for invoice processing.
- 4. Invoice Management within S2P platform – Will evaluate processes listed on Page 7 for improvements
- 5. Contract Management Advisory - Nitor will implement S2P platform's Contracts Management module, which will involve technical solution to handle various types of contracts. Will migrate up to 1,000 contracts and 50 hosted catalogs
- 6. Self-Funding Portal–For Innovation only - Nitor Apps platform that can take the feed from financial systems for knowing the payments made against the State Term Contract and generate invoices to send to the Suppliers who owe State's fees because of an existing contract
- 7. Relish Transparency Portal – “Access” – Transparency too sees into state government. Suppliers base for registration and can publish bids here.
- 8. Relish Data Assure – Works with Coupa to validate what the supplier enters
- 9. Relish InvoiceAI - InvoiceAI provides a platform where any supplier, can send an invoice to an email address of the participating entity's choosing

Customizations/Extensions - **Did not submit any narrative**

Alternative Funding Models – Page 12

- Provided some examples of models
- 1. Supplier Registration fees

Implementation Services Requirements – Page 14

Project Management – Page 14

- Agile Methodology – Table provided on Page 14
- Provided explanation of steps taken in process on Page 15
- Provided sample implementation project and explained step by step Pages 16 thru 21
- Listed Nitor resources – role name, responsibilities, and allocation on Page 21 – 22
- Listed participating entity resources – role name, responsibilities, and allocation on Page 23 – 26
- Governance Model & Escalation Path – Mentions Ivalua in this process.
- Quality Management for Nitor is an iterative process to ensure project success. This is aligned with our software partner, Ivalua Delivery Assurance program, where Ivalua provides oversight on overall project and participate in key activities leading it to high quality deliverables. Page 28
- Provided example on collaborating with Ivalua on Engagements on Page 29
- Governance models need the global alignment process. Page 30
- Nitor shows the model for governance they are proposing on Page 31
- While kick off; S2P platform provider, Nitor, & the participating entity will work on the overall governance model for issue escalation and resolution. And during the project, the model can be enhanced to include constructive feedback

Project Implementation Methodology – Page 32

- During the requirements phase, Nitor team will collect all the requirements that are satisfied Out of the box and what requires configuration. Nitor will track all those requirements and document it in Functional design document.
- Nitor will follow the strict guidelines established by Coupa for configuration build.
- Coupa professional services resources also do configuration validations with Nitor team before, during & after module configuration and deployment to PROD
- Provided list of tools and technologies used for engagement on Pages 32 – 34
- Test plan processes will be used and provided on Page 35
- Risk Management Practices& Issue Tracking – Uses a RAID program and this is explained on Page 36

Catalog Support Services – Page 36

- Support 2 types of catalogs – Punchout and Hosted. Each are explained on Page 36.
- Mentioned using Ivalua catalog templates.
- Provided tasks required to enable catalogs on Page 37
- Tasks are separated by system side and supplier side

Data Conversion Services – Page 37 – 38

- Supply migration templates and logic to entity
- Nitor will grab files and load into TEST
- List of data they will convert on Page 38

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Nitor Partners

CATEGORY #(s): Stage 2 Category 4 – Services Only

DATE: 01/03/2022

SME/EVALUATOR NAME: Tom Hastings

DEPARTMENT/STATE: State of Montana

Interface/Integration Development Services – Page 38

- We take a very holistic approach for identifying, designing, building & deploying integrations as we do realize integration enables the following operations of the Ivalua S2P platform:
- Master Data, Transactional Data, and One-time setup integrations.
- Listed the tasks required for an integration on Page 39 - 40
- Provided key design principles for a success integration with Ivalua on Page 40
- Expect the entity IT to participate in the integration and proved a RACI for the integration on Page 41
-

Organizational Change Management (OCM Services) – Page 42

- Nitor's approach to change management is a structured process to guide people from the "current state" to the "future state."
- The Nitor OCM methodology is built on four (4) key workstreams: Assessment, Communications, Development, and Sustainment. Page 42
- Each workstream is explained on Pages 42 thru 48
- To measure the effectiveness of each element of the Change Management Strategy, Nitor will capture two different data sets: Operational and Experiential

Training Services – Page 49

- Nitor will apply our training methodology to increase user adoption; however, a complete and holistic training plan requires a more thorough understanding of the participating entities current skill level. This analysis and ongoing understanding is driven by three key components of the Training Strategy, specifically:
- Baseline Learning Styles, Content Development, and Measurable and Certifiable
- Training includes live classroom training, self-pace training, and reference documentation

Help Desk Services - Did not submit any narrative

On-Site System Stabilization Support - Did not submit any narrative

Managed Services Requirements – Page 50

Solution Support – Page 50

- Nitor offers sustainment services to our customers ongoing basis. The scope of Solution support requires discussion and alignment with the participating entity.

Organizational Change Management (OCM Services) – Page 51

- Please see our response in above Section 6. Organizational Change Management (OCM) Services.

Training Services – Page 51

- Please see our response in above Section 7. Training Services

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Est. 1988.
- Services they provide are training for system users and change management.
- Govt experience.
- 1/1/21 PK merged with Center for System Integrity and the Center for Support of Families – known as SLI Government Solutions (SLI)

2. Previous Projects

- 4 projects given. The projects and/or case studies **may** meet Category 4.
- Yolo County Dept of Child Support Services - PK completed an assessment of Colusa, Sutter, and Yolo counties' child support programs.
- San Joaquin County Dept. of Child Support Services – PK provided a review of the San Joaquin County, California, Department of Child Support Services' call center
- American Bar Association. PK provides technical assistance and training so states and tribes can better meet federal standards and requirements.
- Indiana Bureau of Child Support. PK developed two eLearning training products.

They also submitted another proposal with this one that showed experience on 5 projects with change management on IT projects along with some project management.

3. Subcontractors

- Vendor states there are no subcontractors.

4. Organizational Chart

- Yes, a project organization chart is provided along with job descriptions.

5. Litigation

- Vendor states there are no current litigations.

6. Financial Viability

- Provided a DnB credit snapshot. **It does not give much financial information.**

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Services it can provide are end-to-end for eprocurement on the Strategy and consulting side (page 2)
- Govt experience.

2. Previous Projects

5 projects given. The projects meet Category 4.

- Dept of HealthCare Services, CA. Acted as project manager to plan and manage multiple inter-related projects and efforts with the objective to bring DHCS into compliance with the ACA mandate for ORP.
- Dept of HealthCare Services, CA. Provided technical and business analyst services to support the development and implementation of the PAVE product at DHCS.
- Dept of HealthCare Services, CA. provide integration management of the MITA effort across multiple vendors and state staff. The MITA is a Center for Medicare and Medicaid Services (CMS) requirement that must be developed and applied in order to obtain enhanced Federal funding for Medicaid projects by the State of California.
- Montana State Fund. provides IV&V services for MSF's \$20MM policy and billing system replacement project.
- Washington State Health Care Authority. Sabot provided project management services in support of the Washington Health Care Authority Enterprise Data Warehouse project.

3. Subcontractors

- Vendor states there are currently no subcontractors, but if needed for the eProcurement solution effort will obtain one.

4. Organizational Chart

- Yes, a project organization chart was provided. **No job descriptions were provided.**

5. Litigation

- Vendor states they currently are not engaged in litigation.

6. Financial Viability

- Provided a DnB report with a risk rating of moderate to low/moderate in most areas.

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- All 3 Preliminary docs, no cyber liability insurance
- Provides a suite of services focused on empowering management to plan and implement sound strategic decisions
- Strategic services, business value, people practices, customer centric practices
- only offer advisory, planning, oversight, project management, and enterprise architecture services without conflicts of interest or bias.

2. Previous Projects

- Montana State Fund's (MSF) - PBRI project focused on replacing the legacy policy and billing systems with modified/configured commercial-off-the-shelf software. Sabot provided business analysis, software architecture, project management and coordination, and organizational change management.
- Washington State Health Care Authority - provided project management services in support of the Washington Health Care Authority Enterprise Data Warehouse project.
- Department of Health Care Services, State of California - Sabot was engaged to provide integration management of the MITA effort across multiple vendors and state staff
- Department of Health Care Services, State of California - provided technical and business analyst services to support the development and implementation of the PAVE product at DHCS
- Department of Health Care Services, State of California - as the project manager to plan and manage multiple inter-related projects and efforts with the objective to bring DHCS into compliance with the ACA mandate
- eProcurement experience is not reflected in these projects

3. Subcontractors

- We do not have any exclusive subcontractor relationships to report here.

4. Organizational Chart

- simple org chart with project reference
- Roles not defined

5. Litigation

- Sabot is not currently engaged in litigation nor has Sabot been party to litigation closed in the past five (5) years.
-

6. Financial Viability

- D&B snapshot report dated 6/2021

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- Services to be provided: Review the Participating Entities' procurement rules, regulations, and contracting documents [such as the Model - Service Level Agreement (SLA), NASPO ValuePoint Master Terms and Conditions]. The results from the review will be to identify variances from best practices, recommend implementation of best public procurement practices, and provide the rationale for the recommendations.
- Govt experience.
- Much history on Curry's book(s)

2. Previous Projects

6 projects given, although not all may qualify as an actual project. The projects and/or case studies **do not meet** Category 4. The projects range from creating a Consulting, training, subcontractor to develop best practices in procurement, presentation at CAPPO, preparing PowerPoint presentations for procurement training, and research.

3. Subcontractors

- Vendor states there are no subcontractors.

4. Organizational Chart

- Yes, one block with Mr. William Sims Curry to perform the work.

5. Litigation

- Vendor states there is no current litigation.

6. Financial Viability

- Provided a financial writeup with information from DnB report. **Unable to assess a risk rating.**

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- 2 of 3 Preliminary docs, no cert of insurance
- proposes the performance of "Services Only" to review the Participating Entities' procurement rules, regulations, and contracting documents [such as the Model -Service Level Agreement (SLA), NASPO ValuePoint Master Terms and Conditions].
- results from the review will be to identify variances from best practices, recommend implementation of best public procurement practices, and provide the rationale for the recommendations
- Inclusion in the National Contract Management Association's (NCMA) Contract Management Body of Knowledge (CMBOK) 2017 5th Edition and 2019 6th Edition
- American Society for Public Administration • Defense Acquisition University • International City/County Management Association • National Contract Management Association • Naval Postgraduate School • Society of Corporate Compliance and Ethics • The Institute for Public Procurement • International City/County Management Association

2. Previous Projects

- City of San Jose CA completed best public procurement practices in a contract management standard operating procedure and a script for training contract managers
- California community colleges technology center - trained proposal Evaluation team members on ethics and strategies for scoring proposals in response to large RFP's also tested accuracy of formulas used to weigh proposal evaluation scores
- subcontractor to Scarlet Systems to develop best practices scope of work for California State University campuses yeah I'm almost done
- Routledge - researched first and second editions of books on public procurement
- While there is procurement experience these projects do not represent eProcurement experience

3. Subcontractors

- none

4. Organizational Chart

- No org chart because this is only one consultant
- Role not defined in detail for eProcurement

5. Litigation

- WSC Consulting is not involved in any current litigation and has never been involved in any litigation.

6. Financial Viability

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization

- All work done by one person, founder and president
- In depth description of the company president authoring history of textbook
- Textbook author and author of NCMA Body of Knowledge
- NCMA federal procurement is different than State procurement, which is based on independent laws, where federal is based on a central regulation the FAR.
- Appears a valid consideration for personal training events.

2. Previous Projects

- Appears a valid consideration for personal training events.
- Examples are for very specific problems and solutions resolved through training
-
-

3. Subcontractors

- None
-
-

4. Organizational Chart

- Appears to be a sole person company
-
-

5. Litigation

- None
-
-

6. Financial Viability

- Sole proprietorship
- No debt, \$600K assets.
- \$190K revenue

INDIVIDUAL EVALUATION NOTES (Subject Matter Experts)

**STATE OF MAINE
INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Accenture

CATEGORY #(s): 4

DATE: 9/28/21

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Significant history e-procurement implementation – SAP Ariba
 - Multiple ERP interfaces. Relationships with various cloud platforms.
 - Module-based implementation.
 -
2. Previous Projects
 - Multiple state projects- North Carolina, Florida, California, Alberta.
 -
 -
3. Subcontractors
 - None
 -
 -
4. Organizational Chart
 - Role-based project team structure
 - Detailed role responsibility: customer, Accenture, Ariba
5. Litigation
 - Not stated.
 -
 -
6. Financial Viability
 -
 -
 -

Individual SME Comments:

Proposal to implement SAP Ariba. (P30 1.2)

Implementation Services Requirements

- Project Management – Accenture Delivery Methods
 - PM methods. Quality; Project; Cost and Performance; Scope; Resource; Deliverable; Risk; Org change. Statue Reports and Comms.
 - Repeated methodology for program delivery.
 - Accenture and State develop deliverables plan. Sample implementation plan provided. 1 year project. (Cutover at 9 months.)
 - Identified project lead.
 - Daily status reports; Key design decisions captured in Config design doc.
 - Risk Management – 3 tier governance model.
 - P14 Project manager uses RAID (Risk, Actions, Issues, Decisions) for tracking and key design decisions to manage decisions
 - Quality Framework – core functions to enhance deliverables.
 - P20 – Figure 7 – org chart with Accenture and state roles.
- Project Implementation Methodology – Hybrid Agile – iterative prototyping
 - Data cleansing prework; State completes product taxonomy alignment.
 - Typical timeline provided for large state implementation: Ariba buying and sourcing; Sourcing and contract; SLP and Supplier Risk.
 - Outline State and project teams
 - Agreed testing strategy; testing after tool design. Accenture testing resources focus on fixes, cutover and training doc review. Integration testing after product complete. UAT by client team.
 - Knowledge transfer.
 - Common project risks identified.
- Catalog Support Services – Recommended outside implementation scope due to longer expected timeline for catalog prep.
 - Catalog assessment 6-12 months ahead of kickoff of implementation.
 - Catalogs can be auto or manually approved.
 - Commodity code mapping – UNSPSC recommended, but others available.'
 - Suppliers will be prioritized prior to adding to Ariba.
 - Supplier onboarding handbook developed; training plan to be developed and executed by buyers.
 - Suppliers participate in loading test catalogs in UAT.
 - Buyers review catalog in Ariba prod and trigger workflow to activate.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Accenture

CATEGORY #(s): 4

DATE: 1/24/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Change lead to create trainings for state purchasing and vendors – load catalogs; design docs; invoicing and catalog enablement – hosted or punchout.
- Data Conversion Services – Master data required; transactional data after master data; middleware may be leveraged – volume and end user/supplier impact must be taken into account.
 - Conversion needs assessment – involves stakeholders and defines approach to conversion process. Cleans; Extract; Map; Load; Reconcile. Tools: Data Conversion Manager; Ariba Improt requestions web serve; Ariba integration toolkit.
- Interface/Integration Development Services – Internal integration and external-facing interfaces.
 - Plan and analyze iterative prototyping; formal testing;
- Organizational Change Management (OCM Services) – Change management strategy; focus on superusers for change planning and executive; identify the business value.
 - Accenture- keep suppliers involved; understand helpdesk perspective and engage in UAT; end user change journey – communicate changes through videos, email, training. Verify that Accenture is leading this implementation process rather than “state stakeholders.”
 - Readiness survey and scorecard
 - Measure adoptions and outcomes.
- Training Services – Training process – stakeholder training program: Develop training plan with PE using Design Thinking. Training base don Ariba on demand assets, includes quick ref guides; templates, workshop materials, training materials.
 - *P84 approach of instructor-led, web-based, and just-in-time techniques that provide guidance for stakeholders when and where they need it.*
 - Our courses are offered on a regular basis in a variety of ways
 - *We will support the Participating Entity's trainers when delivering training, and we will, upon request, provide designated staff with training regarding the functionality of the eProcurement solution.*
 - ILT, WBT, quick videos, quick ref guides.
 - *P87 Accenture will provide qualified resources to guide and inform the training and communication efforts of the program from implementation through post-go live*
 - Knowledge transfer to move training to state agency.
- Help Desk Services – *P95 Accenture proposed help desk approach supports a model where the Participating Entity be responsible for Level 1 support while Accenture manages Level 2 and Level 3 escalations.*
 - *if a Participating Entity wishes to explore Accenture managing the Level 1 support, we do have capabilities including setting up ticketing and IVR systems.*
 - 5-level support tiers.
 - Level 2 and 3 support from Accenture's Manila (Philippines) service center (proposed cost0 – could be managed from BAsheville.
 - Level 1 would be supported from NA.
- On-Site System Stabilization Support - *Hypercare (month 1) and Extended Care (months 2 and 3).*
 - *In Hypercare, a process will be defined to review any defects and/or configuration changes requested for the system with the appropriate stakeholders. System changes will align to existing IT governance processes including the client's ticket management systems and approvals as required.*

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *After the reverse shadow at the end of Hypercare, there will be a full hand off for support of the system where standard tickets and activities are now picked up by the steady state support team and then the Extended Care phase begins.*
- *During the Extended Care, based on the needs of the client, consideration can be given to having resources on-site or remote **State of Maine** eProcurement Solutions and resources working client hours.*

Managed Services Requirements

- Solution Support – 1 hour response for severity level 1 phone or web.
- 24/7 web support via customer portal.
 - Portal – submit/status request; download updates; search customer support;
 - Ariba offers upgrade from AMS to Preferred Care services – dedicated support.
 - Application management – Accentures review vendor registrations; inactivate monthly or annual
 - Detailed docs of applications; work with participating entity to provide estimates for updates to solution.
 - Accenture maintain interface and integration customizations
 - SAP Ariba would be responsible to ensure the solution is available and meets the SLA standards.
 - SAP Ariba would be responsible to perform all necessary testing to verify that the item has been properly installed, is operating substantially in conformance to its specifications,
 - Accenture support team will use standardized quality assurance testing processes for all code and configuration changes that validate updates against predetermined requirements confirming the eProcurement solution meets the Participating Entity's requirements.
 - Accenture will work with vendors on punchout catalogs; do validation checks; resolve PO failures.
 - RACI table provided with Participating entity, Accenture and Ariba responsibilities.
 - Security controls - SAP Ariba Information Security Team
- Organizational Change Management (OCM Services) - *Change Management and Training deliverables developed by Accenture during the System Implementation phase will be constantly updated based on the enhancements and changes developed during the Managed Services phase.*
 - *Change Management and Training deliverables developed by Accenture during the System Implementation phase will be constantly updated based on the enhancements and changes developed during the Managed Services phase.*
- Training Services - *In the Managed Services phase, the Training deliverables developed by Accenture during the System Implementation phase will be constantly updated based on the enhancements and changes developed during the Managed Services phase*
- Catalog support services. – P120 Accenture will provide maintenance of items, prices, and vendor contract information for catalogs to allow eligible users to purchase from statewide agreements
- Help Desk Services – P121 *Accenture proposed help desk approach supports a model where the Participating Entity be responsible for Level 1 support while Accenture manages Level 2 and Level 3 escalations.*

Individual SME Comments:

Implementation Services Requirements

- Project Management – Civic Initiatives Plan *directs and governs our project activities and guides our development of the Project Schedule (refer to Tools, below) that details the tasks related to the principal activities, personnel, milestones, and deliverables associated with all project activities.*
 - - apply the PMBOK to conduct project management throughout our professional engagements: Conception and initiation; definition and planning; launch or execution; performance and control; project close.
 - PM work with client to establish key stakeholder representation; kickoff to establish engagement framework.
 - Civic Initiatives will establish a Project Management Office (PMO), comprising a dedicated Civic Initiatives Project Manager and project management team, responsible for project delivery. On the contractors' side, key project staff, representing the Solution Provider, Civic Initiatives Implementation Services Team Leads, and additional Implementation Services Team resources, as applicable. Client side, the core project team will also coordinate with the Civic Initiatives Project Management team for their areas of responsibility.
 - P36 *Project Charter will describe how change will be managed. A change control approach is the overriding methodology to ensure that all change requests are defined, reviewed, and agreed upon so they can be properly implemented and communicated to all stakeholders.*
 - *Purpose of this phase is to define the project scope and plan an eProcurement implementation strategy by workstream and develop and formalize a project work plan and schedule that will guide the eProcurement implementation activities throughout the life of the project.*
 - *The Project Manager will develop a Project Schedule aligned with the WBS and Project Work Plan. The Project Manager will coordinate with the Solution Provider, Implementation Services teams, and Client core project team to ensure that each service area is staffed with the necessary resources and skillsets to support the scope of work and schedule.*
 - *Project Manager will proactively manage implementation to ensure project milestones are completed according to established schedules and that resources are sufficiently and appropriately allocated to the work effort to ensure the timely submission of quality deliverables. The project management team will use the PMO's suite of project management tools and methods to gauge performance based on the project's established KPIs, and product quality, based on the project's established standards.*

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *project management team, in coordination with the Client Project Sponsor, core project team, and Implementation Services Teams will systematically manage close-out tasks*
 - *Project closeout.*
 - *Civic Initiatives uses four (4) technologies to engage Client interaction whether onsite or remote: Smartsheet, Zoom, GroupMap, and LucidCharts.*
 - *Provided names of PM team with experience. Sample implementation plan provided.*
- **Project Implementation Methodology – Provided Project implementation services team scope.**
 - *P47 Within an integrated project management framework, project team resources we deliver include overall project management, project implementation services management, including quality assurance, testing, and IV&V, organizational change management, including training delivery, and on-site system stabilization support*
 - *Provides testing scripts and oversees testing.*
 - *Testing types used are Development Testing, Unit Testing, Performance Testing, Integration Testing, and User Acceptance Testing (Go-live) where applicable and subject to the testing phase maturity.*
 - *project implementation services approach integrates Project Management (refer to E. Implementation Requirements, 1. Project Management), Change Management (refer to E. Implementation Requirements, 6. Organizational Change Management (OCM) Services) and Quality Assurance practices to prove and deliver the design and functionality of the system, and the application or integration layer.*
 - *Assisting the Client and the Solution Provider to gather requirements, applicable and as defined in the SOW, that support development of the business and technical design documents.*
 - *project management team will provide analysis results and a recommended implementation strategy for the Client to consider options to address and prioritize gaps, including through configurable functionality of the eProcurement Solution,*
 - *Assisting the Solution Provider to create and document the Configuration Management Plan when the team is tasked with configuration assistance and enabling Client access to the plan and configuration change log.*
 - *QA Practice Lead will deliver subsequent phase test scripts to be updated with new release improvement testing scenarios for each new release cycle within two weeks of the release testing cycle close and this is contingent upon receiving timely release notes from the Solution Provider.*
- **Catalog Support Services - Civic Initiatives will deliver comprehensive catalog support services to support the creation, loading, management, and maintenance of hosted catalogs and punch-out sites.**
 - *5 stages in score: project orientation identifying contracts for marketplace; contract portfolio review and contract selection; marketplace implementation; supplier onboarding – CI work with select suppliers; marketplace training. – develop guide to teach buyers to identify good catalogs, understand key contract attributes, incorporate catalog requirements in the procurement process.*
- **Data Conversion Services – p61 CI will provide data conversion -work with state and solution provider to develop strategy for legac data conversion.**
 - *Data interface program, data reconciliation; testing data – client to extract and CI to support testing.*
 - *Through data planning, analysis, and profiling, Civic Initiatives will expose data quality issues and business rule issues early in the project. Civic Initiatives will establish an issue tracking and scorecard system to deliver quality assurance*

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- across conversion activities, to ensure that cleansed operational data is successfully transitioned into the new eProcurement Solution*
 - *Civic Initiatives will perform a thorough data scrubbing exercise on the Master Supplier Record (MSR), excluding employees, which will entail data cleansing, standardization, and enrichment*
 - *will work with the Solution Provider to manage processes, including testing, that support the Solution Provider's tools for converting and loading state legacy data*
- Interface/Integration Development Services – No response.
- Organizational Change Management (OCM Services) - *OCM Services Team assesses, designs, develops, and delivers solutions that are tailored to the unique operations and cultures of each Client.*
 - *phase will focus on two assessments to assess details on the Change itself and the Organization*
 - Assess organizational change readiness; develop OCM plan; deploy;
- Training Services – CI will work with state's training director to implement eprocurement training.
 - Plan will be deploy effective training approach consistent with organization; identifying competency gaps.
 - Needs assessment; develop training plan and implementation.
 - End user, training the trainer, supplier, system admin and client org.
 - CI work with client org to effectively identify training and design curriculum, build internal training (LMS, website)
 - Training delivery method – who is providing the training? Needs clarification – Does Civic Initiatives provide direct training?
- Help Desk Services – Not part of CI response.
- On-Site System Stabilization Support – P80 *Civic Initiatives will work with the Client's project team and Solution Provider to deliver post-implementation support throughout the 3-month stabilization period of the full solution implementation*
 - *Extending our integrated project management approach, Civic Initiatives will continue to manage on-site system stabilization across the applicable Implementation Services Teams. Civic Initiatives will assist the Client and other Post-Implementation Support Services Teams in resolving problems and providing support to the customer departments and vendor community*
 - *Civic Initiatives will monitor system and user-reported issues and will employ the same QA methods used throughout the project to provide post implementation support, including our multi-angle testing approach, which uses a series of tests to capture all angles of the quality, performance, and functionality dimensions of the application.*

Managed Services Requirements

- Solution Support – not provided
- Organizational Change Management (OCM Services) – Same as Implementation services.
- Training Services - Same as implementation services.
- Catalog support services – same as implementation services.

Individual SME Comments:

Implementation Services Requirements

- Project Management - SAP Ariba implementations utilizing our EVD (Enterprise Value Delivery) methodology which is built on SAP Activate methodology.
 - *Deloitte proposed the following project approach to allow the Participating Entity to stagger the implementation of its upstream processes consisting of SAP Ariba Sourcing and Contracts, with its downstream activities inclusive of SAP Ariba SLP, Buying and Invoicing.*
 - *staggered implementation approach; followed by hypercare.*
 - *integrated program leadership team that promotes connectivity between the state team, our Deloitte team, and program tasks while providing clear lines of authority and accountability to the Participating Entity*
 - *Deloitte is committed to maintaining the defined and named project staff including project executive, project manager, and functional leads.*
- Project Implementation Methodology – p148 EVD *methodology has tools, templates, accelerators, and incorporates the lessons learned over numerous SAP Ariba implementations and contains leading practices from the public sector.*
 - *Prepare; Explore; Realize-Build; Realize-test; Deploy; Run; Testing.*
 - *Unit testing; integration and interface testing; regression; UAT.*
 - *successful User Acceptance Testing requires active participation from representatives of the user community, enabled by structured planning, coordination, and execution. Involvement by the Participating entity's business users through the implementation life cycles will facilitate more User Acceptance Testing.*
 - *Throughout the User Acceptance Test phase of a release, Deloitte Senior Functional/Business Analysts and testing resources are available to assist Participating entity's Acceptance Test staff in completing testing activities, reviewing scenario results, and/or addressing concerns regarding all the Ariba solution functionalities*
 - *EVD methodology imbeds Configuration and Change management into the methodology's modules, tools and deliverables.*
 - *quality and risk management (QRM) program provides a periodic independent project risk review. PMO and technical team evaluate the issues regularly and defined next steps to close issues out.*
 - *As part of Deloitte's standard services for SAP Ariba implementation, our methodology includes the use of Deloitte-developed work products, used to*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Deloitte

CATEGORY #(s): 4

DATE: 1/24/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

accelerate the implementation. The accelerators and use of said accelerators are included in the standard price offered.

- Catalog Support Services – Deloitte conduct spend analysis and build catalog enablement strategy; client help desk established and training and FAQs developed; supplier education provided and catalogs tested and validated; SAP training customized for clients, training delivered prior to go-live; supplier feedback gathered and strategy for future waves; supplier offboarding by Deloitte.
- Data Conversion Services - *approach aligns the data conversion activities to the Explore, Realize, Test and Deploy phases and execution timeline. It will also provide the foundation for testing of conversion objects when they are built using the standard SAP conversion tools which assist in the standardization of file layouts. The proposed approach also enables all legacy sources to follow a consistent approach for staging and converting data into the testing and production landscapes.*
 - *Deloitte Team will work together with the Participating Entity to develop and implement the strategy and approach to data conversion process. We propose Participating Entity to own the data cleansing of legacy data.*
 - *Data remediation: Deloitte Team recommends performing additional analysis to determine additional cleanup requirements. Deloitte suggests preparing data remediation plans by data object that describe the actions to be taken to cleanse the data, as well as the responsible party(ies) for the remediation of each data quality exception.*
- Interface/Integration Development Services - *The SAP Ariba Buying & Invoicing solution integrated with ERP system allows administrators to import master data and export transactional data from ERP system to the SAP Ariba Buying & Invoicing solution seamlessly.*
 - *For using the Web services to export transactional data, the SAP Process Integration middleware is used to export transactional data between the SAP Ariba Buying & Invoicing solution and ERP system.*
 - *Web services provide for real-time integration of the SAP Ariba Buying & Invoicing solution with ERP system using SAP Process Integration.*
 - *For the development of interfaces Deloitte highly recommends, SAP Ariba Cloud Integration Gateway simplifies and accelerates the integration. CIG gives you a fast, simple way to connect your SAP Ariba solutions, backend systems and provides Do-it-Yourself (DIY) integration with automated testing. Participating Entity can replicate existing data from ERP System to SAP Ariba through CIG (Cloud Integration Gateway) direct connection which is placed into the integration landscape for SAP Ariba integration.*
 - *Deloitte collaborates with the Participating Entity to perform the unit and integration testing of the interfaces. Unit testing involves testing the interface programs to validate structural and functional correctness.*
- Organizational Change Management (OCM Services) - organizational change management approach is based on the Organizational Change Management (OCM) discipline of Deloitte's EVD method.
 - *Deloitte work with the Participating Entity to align business leaders on changes that affect the organization and on their role in this effort, which is paramount to drive cultural change in the business.*
 - *Formalizing Capability Transfer across project teams confirms that the right team members are developing the right capabilities.*
 - *Where appropriate and practical, we leverage the Participating Entity's existing communication channels to distribute project information and work with the Participating Entity's corporate communications organization so that the Participating Entity standards, tools, and approval processes are followed.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: Deloitte

CATEGORY #(s): 4

DATE: 1/24/22

SME/EVALUATOR NAME: Gerard MacCrossan

DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *Coaching during change management provides a venue for one-on-one and group meetings between employees and the people they trust the most, their immediate supervisors.*
- Training Services - Deloitte Team will generate a training checklist and create a training plan to empower the State to support the Ariba System and train Participating Entity members and end users on how to use and navigate the solution. The Deloitte Team will develop a training plan and timeline.
 - *leverage exiting SAP training materials*
 - *core group of Participating Entity staff members who will serve as project team members for the implementation.*
 - *Participating Entity staff members will participate in design sessions, execute scripts in testing, and deliver the training as part of our recommended "Train the Trainer" approach.*
- Help Desk Services - *Deloitte and Participating Entity will work jointly to address help desk tickets and provide additional support to Participating Entity users in areas where we see recurring issues.*
- On-Site System Stabilization Support – *Post Hypercare period, the project will be officially handed to the Managed services/M&O contract team for further ongoing support.*

Managed Services Requirements

- Solution Support - Enterprise Value Delivery for Application Management Services provides a detailed approach to establishing an application management service delivery operation focused on driving sustained value.
 - Repeat Project implementation methodology.
- Organizational Change Management (OCM Services) – Refers to same OCM in Implementation.
- Training Services – Refers to same Training Services in Implementation.
- Catalog support services. - Refers to same services in Implementation.
- Help Desk Services - *service delivery model will enable Participating Entity to migrate from the incumbent vendor to a more structured, predictive and cost optimized maintenance services model,*
 - Deloitte methodology leverages Help Desk Institute (HDI) customer service principles as well as ITIL-based IT Service Management (ITSM) processes — which focuses on maturation into a customer-centric support organization.
 - bi-modal, two-tiered IT operations model that will allow for the creation of stable and predictable, yet agile and fast IT systems and processes. Implementation of this model will improve the success of the help centers by redefining, standardizing, and realigning processes, policies, and procedures.
 - Call center technology; issue analysis
 - Service Desk transition and set up methodology is based on our collective experience and understanding from prior transition executions.
 - 24/7 help desk offering which leverages our shared service delivery model of ITIL trained and certified Service Desk specialists.
- Transition Out Assistance Services
 - Deloitte understands the importance of a clearly defined and well-planned approach to Transition-out.
 - Deloitte Team will implement its Transition-Out plan NLT six months prior to expiration; three phases.

- **Individual Evaluator Comments:** Unclear how the software fits in the public procurement sphere – prior experience appears to be industrial clients. Company appears to be extremely small, with limited U.S. footprint, no public sector experience, and no proposal for implementation.

Organization Qualifications and Experience

2. Overview of the Organization

- Bidding SucCXess 2.0 – software cost estimation tool.
- Unclear what the connection is between prior company and current company.
-

3. Previous Projects

- Provided example of Honda software cost estimate savings.
- No details provided of other projects.
-

4. Subcontractors

- None.
-
-

5. Organizational Chart

- Note. One U.S.-based employee. Development at German subsidiary.
- No project implementation outline.
-

6. Litigation

- None.
-
-

7. Financial Viability

- Company profile is 2 years old.
- No D&B provided as noted.
-

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 4

DATE: 1/22/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Instructions: The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.

Individual Evaluator Comments:

GEP – Global eProcure platform - modules in integrated platform.

General Principal and Requirements

- Key Solution Functionality Elements – Required elements provided in integrated tools. Narrative lacked detail. Video demonstrated functionality and user experience. Elements explained on narrative p46.
- User Experience - Integrated functionality.
- Bidder Best Practices and Roadmap
- Innovations and Value-Added Features/Services – Mostly focused on consulting and reports. (Swamped the narrative description of the primary sourced product.)
- Customizations/Extensions – vague description that future customer needs could be developed. Focused on existing SAAS. **EPROC-PRD-56**
- Alternative Funding Models N/A

Functional Requirements

- General Functionality – Only configuration items relate to publishing to state's website.
 - **EPROC-GEN-25** – Notifications will have @gep.com email domain / doesn't integrate to state's domain. Non-compliant. **Needs clarification.**
 - EPROC-GEN-39 – High level of configuration required to set external posted content. No additional cost proposed or problem identified.
- Supplier Portal - EPROC-SMR-19 – high level of integration for admin fee payments with state's portal. Doable.
- Supplier Enablement/Management – All requirements noted as Native to application.
- Buyer Portal – Out of box
- Need Identification – Out of box except for E-PROC-NEED-5 which would configure priority of state contracts/purchase channels.
- Request through Pay — Out of box **EPROC-PRD-11** (recurring purchase function) noted as Medium complexity to set up. **Clarification needed** if this is a configuration or actually out of box.
 - – backdated function. **Needs clarification.** Response notes as out-of-box, but statement does not address role-based authority or the functional requirement of backdated orders
 - **EPROC-PC** – Listed as in development- **Needs clarification** if functionality available.
- Catalog Capability – **EPROC-CAT-38** – Public-facing search without login not available. Can be developed. **Needs clarification** as is listed as Low complexity.
- Sourcing/Bid Management – All requirements listed as out of box or low complexity configurable except **EPROC-SRC-109** bid submissions entered by purchasing staff – currently requires GEP staff

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 4

DATE: 1/22/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

to load into back-end. Listed as in development by contract award date. Needs clarification if functionality now exists.

- Contract Management - All listed as out of box except:
 - **EPROC-CNT-20 – Needs clarification.** Response appears to refer to each individual document internal ID not an overall contract number that may be a single document/file or a collection of files depending on structure.
 - **EPROC-CNT-71 and EPRPOC-CNT-72** – Functionality listed as high complexity config. **Needs clarification** if requirement understood. Is there admin fee functionality/invoicing/tracking separate from payment processing?
- Vendor Performance – all listed as out of box.
- Purchasing/Data Analytics – listed as out of box with some config for level 2 punchout search.

Technical Requirements

- Availability – 24x7 SLA 99.8%
- Accessibility Requirements – WCAG 2.1
- Audit Trail and History – Out of box
- Browsers Supported – Edge/Chrome recommended. Native mobile functionality for ipad and android.
- User Accounts and Administration – MS AD. 2MFA. SAML 2.0 for SSO.
 - **EPROC-TECH-12** – requires SSO for buyer/supplier dual accounts single login config. **Conditional compliance.**
 - **EPROC-TECH-24** – 2MFA doesn't autogenerate new password. 6 digit code required for access to password reset. **(acceptable standard but doesn't meet requirement.)**
- User Authentication – Non SSO – upper/lower/number/special char. 5 attempt lockout. 90 day.
- Data Conversion – Multiple dataset approach. Import of migrated data (flat file). Import of ERP live data. Process to harmonize extensive list of fields where data variation is common. (master file cleanup)
 - **EPROC-TECH-30** – Ongoing vendor performance integration is additional cost.
- Interface and Integration – 50 in-house integration experts for ERP connection. (SAP, Oracle, PS etc.) Real-time and scheduled data migration as appropriate for master or transactional (JSON) data. Customer is responsible for SLI integration. GEP will use state-preferred middleware for integration between ERP and GPE.
 - **EPROC-TECH-55** – P-card hosting is planned for 1Q22 – **needs clarification if available.**
- Office Automation Integration – MS Azure-hosted. Word integrates with GEP through plugin allowing redlining of contract document. "Contract Examiner" extracts clauses from scanned PDFs. Price sheets can be edited offline in Excel and loaded back into GEP. Integrates with Outlook for alerts/notifications.
- Mobile Device Support – Dashboards, viewing catalogs, Approvals. Unclear if ordering can be performed in mobile environment. (Secure biometric access.) Unclear if VPN is required to log into mobile environment.
- Mobile Applications
- Data Ownership and Access – After contract termination, customer data returned in mutually acceptable file format; then purged and destroyed. Time period not stated other than with customer agreement.
- Data Retention, Archive and Purge Considerations
- Disaster Recovery Plan – 1 hour RPO. RTO 4 hrs.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 4

DATE: 1/22/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Solution Environments – UAT and Production. UAT environment developed through investigation and requirements gathering. GEP to develop testing scenarios to validate function prior to go-live.
 - Scalable through MS Azure data centers.
 - Automated processes to maintain continuity between UAT and production environments.
 - Mobile – native adaptive UI
- Solution Technical Architecture - .Net built on Azure.
- Solution Network Architecture
- System Development Methodology
- Service Level Agreement – 99.8% system availability. 4-level Severity priority for cases with response times 1 hour, 4 hour, 1 business day 4 business days initial response provided followed by 3-step support timeline for each level to conclusion. (Appendix 1.) 24x5 (M-F) support services assistance via email, online and phone.

Security Requirements

Notes: GEP SMART Application Architecture & Security Overview, SOC 2 and Information Security policy provided in appendices.

- Cloud Security Alliance (CSA) Compliance – Yes. Completed. No answers of concern.
- Security and Privacy Controls
- Security Certifications - datacenters are SSAE16 certified. The datacenters are SOC1 and SOC2 as well as ISO / IEC 27001:2005 certified and hosts data for Fortune 500 as well as Global 2000 companies.
- Annual Security Plan
- Secure Application and Network Environment -
- Secure Application and Network Access – EPROC-SEC-2 – configuration required for concurrent login limitations in conjunction with customer.
- **EPROC-SEC-3** – forced login **not currently available** – would be developed with customer – no extra cost proposed.
- EPROC-SEC-5 – almost real-time snapshots. Daily, weekly and monthly off-site backups. Primary data center VA, Secondary CA.
- Data Security – Azure PAAS.
- Personally Identifiable Information Protection – Lists compliance in narrative.
- Security/Privacy Issue Occurrence – Acceptable response listed in CAIQ.
- PII Data Actual/Attempted Access or Disclosure
- Security Breach Reporting – Notification with 4 hours of occurrence - Narrative.

Implementation Services Requirements - GEP

- Project Management – Detailed org, role description. GEP and state responsibility.
- Project Implementation Methodology – Agile sprints / JIRA tracking
 - 5 stages: Requirements; Development/config; UAT; go-live; hypercare
 - Implementation schedules for small, med, large [provided].
 - Challenge/risk mitigation strategies identified (p180)
- Catalog Support Services – Separate implementations with suppliers for hosted/punchout catalogs by supplier enablement team. Ongoing hosted owned by customer; ongoing punchout.
 - GEP will test punchout catalogs – signoff required from customer and supplier before go-live.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: GEP

CATEGORY #(s): 4

DATE: 1/22/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Needs clarification: UNSPSC is referenced in graphics – does GEP support NIGP?
 - Needs clarification: GEP Catalog management services – works with suppliers pre- and post-go-live. Is this a supplied cost option?
- Data Conversion Services – emphasis on understanding data, process standards, data mapping prior to migration.
 - Data standardization – centralized data platform for all systems.
 - Clarification needed: who authorizes decision process for “GEP supplier database” to be the data of record when conflicting data exists or is entered in customer system?
- Interface/Integration Development Services – Defined rules established; standard APIs developed; transaction failure notification monitored by GEP integration team; will be retriggered to correct.
- Organizational Change Management (OCM Services) – Steps designing change process; identified stakeholders and impacted by People, Process, and Technology.
 - Communication and training plans based on stakeholders’ impact.
 - Identify readiness through process; communicate change reasons and processes to drive adoption. Change agent roles: Sponsors, Champions, Agents. (Profile of agents)
- Training Services – Train the trainer; self-study modules powerpoint; quick ref guides; desktop procedures; faqs. Delivered in-person and remotely. Staged training based on role/audience.
 - GEP train superusers; end users trained by customer agency superusers.
 - GEP provide technology documentation; customer agency develop process docs.
 - Needs clarification: No online self-paced training mentioned – is this because of configured toolset that requires training of this type to be developed by the customer?
- Help Desk Services – GEP Success portal – 24x7 – case reporting, knowledge bases.
 - 24x5 helpdesk for customer users. Phone, email and chat. Suppliers by email and phone only.
 - EPROC-IMPL-1 - Needs clarification – new release, product update training through webinars – are these webinars for all GEP or customer-specific?
 - Needs clarification: p222 Best practices support model. Is GEP/State helpdesk staffed by GEP or a combination of GEP and customer staff?
 - EPROC-IMPL-2 – ongoing training provided as needed: who defines as-needed? Are their additional cost thresholds for training? For smaller agency, if train the trainer needs to be performed at future stage in the contract due to staff turnover, is GEP committed to providing this post-implementation or is this a cost option? Needs clarification.
- On-Site System Stabilization Support – agreed hypercare period to handhold initial document creation, complete key issues detected post launch; configuration support; issue cleanup; on-demand supplier support.

Managed Services Requirements

- Solution Support – governance plan for ongoing system support;
 - Specific Director; technical account manager, customer support lead roles in addition to customer support team.
 - Repeated 24x7 system uptime/99.8% SLA. Off-business hour updates; vulnerability and patch policy and practice.
 - EPROC-MNGD-1 – findings reported on “regular basis” – is this quarterly meetings? Needs clarification.
- Organizational Change Management (OCM Services) – Repetitive of implementation slides.

Individual Evaluator Comments:

SAP Ariba – subscription-based SaaS offering. Not software, hardware or software costs.
Included system maintenance, automatic upgrades, base product enhancements (needs clarification as to scope - How configurable by state customer?)
Master Agreement T&Cs heavily redlined

General Principal and Requirements

- Key Solution Functionality Elements (Modules not clearly named in narrative compared to functional spreadsheet.)
 - Entry point is Ariba Guided Buying
 - SAP portal for applications, analytics (cloud/on-prem)
 - SAP Ariba Business Network – B2B network digital marketplace, invoicing, supply chain planning; Spot Buy catalog solution.
- User Experience – focus on integration of applications; configurable dashboards for specific user needs or user groups/roles that can be configured by admin. Mobile app available
For searching ordering, approvals, task monitoring.
- Bidder Best Practices and Roadmap
 - Quarterly enhancement/fix releases centrally deployed.
 - Monthly “feature” delivery – states customers don’t need preparation for these. “virtually invisible” delivery to end users.
 - SAP tracks production quality metrics supporting future releases.
 - Road map linked showed ideas for new features – not specific to this response.
Government sector e-procurement is not called out in the road map.
 - SAP Best Practices Center – access to solutions expert and can offer guidance — **Needs clarification is this is included in standard license** and extent of services.
- Innovations and Value-Added Features/Services – No cost access to APIs or developer portal,
 - SAP Fieldglass – Temporary workforce recruitment and management – additional cost
 - SAP Ariba Supplier Risk – risk management to see supplier metrics and assessment. – additional cost
- Customizations/Extensions – IBM states SAP Ariba is configuration for state and not customized. System enhancements are released systemwide to customers on baseline configuration.
 - SAP Ariba Partner Apps NOT included in this proposal. Multiple examples listed on p14.
- Alternative Funding Models – IBM Global Financial strategy with specific payment solutions are option – not included in proposal cost.

Functional Requirements

- General Functionality

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s) 4:

DATE: 1/11/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- **EPROC-GEN-48 – Needs clarification.** If the SaaS license is configured correctly, are there limitations to access? It is listed as NA.
 - Guided buying – allows purchases from contracts and spot purchases.
 - Role-based access for all individual users; superuser functionality for administration and cross-functional work.
- **Supplier Portal.** Ariba Business Network is entry point. (Uses multiple modules to meet requirements.)
 - Option for state access to own suppliers or broader SAP supplier database.
 - Supplier enablement services are part of the offering for supplier onboarding.
 - Ariba access for one customer converts to Ariba access for other customers; 100k+ suppliers active on Ariba.
 - *Support for CIF, cXML, and Excel e-catalogs, plus integration of online commerce storefronts via the Punch-Out feature*
 - **EPROC-SPR-18 – Needs clarification.** Describes supplier complaint communication as “Business Process outside the tool” – is vendor-agency communication a feature within the portal?
- **Supplier Enablement/Management** – Supplier data validation requires interface – medium complexity.
 - EPROC-VDR-18-28 – validates format-only natively.
 - Narrative repeated much of the Supplier portal features.
- **Buyer Portal** – Offers 2 primary entry points designed for casual user or power user. Casual user gets guided buying experience, can submit requests. Power user enters via dashboard, gets more self-service approach including buying, solicitation development, vendor management, report generation.
- **Need Identification** – Stated as standard functionality using the Guided Buying tool.
- **Request through Pay** – Most requirements defined as standard functionality.
 - EPROC-PRD-48 – notes preferred limits to integrations. Using flat files to maintain currency.
 - **EPROC-PC-6 – Needs clarification.** Listed as not supported in comments, but marked A.
 - EPROC-RC-1 – services parameters can be defined to mark as received; goods can be entered received in variety of ways listed.
- **Catalog Capability** – Hosted and punchout available.
 - **EPROC-CAT-6 & -7 Needs clarification.** Listed as A, but limitations cited. 500,000 items per catalog; 5,000 catalogs per system. This would likely be in excess of catalogs needed by states, but the item threshold would not reach the limit for MRO vendor catalogs, for example. Does 5,000 catalogs include expired or inactive catalogs; can one vendor have multiple catalogs archived and not count against the total?
 - **EPROC-CAT-11- needs clarification.** Comments are circular – say to see CAT-11. (possibly means CAT-8 custom forms).
 - EPROC-CAT-19 – negative values supported requirement not met.
 - Spot Buy purchasing for non-contract items supported. Question for states if this curated buying environment meets state law requirements for open procurement — Needs clarification – what is the cost for suppliers/benefit to SAP if non-contract purchases conducted through this route?
 -
- **Sourcing/Bid Management** – claimed out of box functionality on common procurement types, 50% reduction in solicitation cycle time, savings.
 - Solicitation development using templates inside Ariba Sourcing.
 - Customer has ability to create/modify templates to state’s needs.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s) 4:

DATE: 1/11/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- EPROC-SRC-39 and EPROC-CNT-20 – state-assigned solicitation ID is additional configured field – native assigned not configurable.
 - EPROC-SRC-41 – needs clarification – are Acrobat files supported?
 - EPROC-SRC-52 & -70 – file size capped at 100 MB. Not compliant with “any size”
 - EPROC-SRC-76 and -138 and -147 – SAP can’t post to state’s site – no integration proposed. Needs clarification as not compliant.
 - EPROC-SRC-109 – bids can’t be publicly displayed – not fully compliant. Needs clarification if bids not displayed are only those uploaded by proxy or all bids.
- Contract Management - integrated CM and Contract Administration functionality. Contract award can flow directly into contract authoring. Compliance and auditing through platform. Ongoing supplier communication through platform capturing performance measures through contract closeout.
 - Visibility through contract life through dashboards.
 - P38: *The proposed solution can house contracts from local government, authorities, and higher education entities. Their contracts may be integrated/loaded into the solution in mass and/or as completed. Loading externally negotiated contracts into the solution and coupling them with other procurement documentation will allow the State to store procurement files in a single place.*
 - EPROC-CNT-7 – history tab tracks changes in contract made in the portal.
 - EPROC-CNT-12 – needs clarification – do DocuSign, Adobe Sign integrations come included or require state’s own license?
 - EPROC-CNT-32 – 100MB file size limitation for files uploaded to contract file in Ariba cloud.
 - EPROC-CNT-45 – Needs clarification. No public-facing publishing of contract file with redactions. Not compliant.
 - EPROC-CNT-51-62 – No public posting via automation. Not compliant.
 - EPROC-CNT- 65-66 – not compliant due to posting requirement.
- Vendor Performance – Cloud-based vendor data model; supplier 360- review; supplier scorecards based on KPIs.
 - Action-based corrective action plans can be managed through the platform.
 - EPROC-VPE-25 – 100MB file size limitation.
- Purchasing/Data Analytics – 3-step report creation wizard; data filtering within Ariba tool rather than having to export data out to Excel to pivot/manipulate.
 - Pre-packaged or ad-hoc reports.
 - EPROC-PDA-35 – data can be classified in customer taxonomy, e.g. NIGP, or in Ariba’s own UNSPSC-derived taxonomy.

Technical Requirements

- Availability – 99.5% uptime. Linked service agreement document details backup retention periods for Prod and non-prod environments based on frequency of full-backup iteration – databases are monthly/quarterly/annual ranging 6 months to 5 years; file services are monthly and daily backups with alternate location backup.
 - 4 stage incident reaction time. Highest severity response within 20 minutes/4 hour completion, through to one day for lowest severity reaction. Definitions of severity levels provided. Failure to meet SLA can result in customer credit request and authorization.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s) 4:

DATE: 1/11/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Accessibility Requirements – WCAG 2.0 and WCAG 2.1 cited on the SAP accessibility page for design standards; narrative states Ariba is not fully accessible, no reference to Section 508 compliance initiative.
- Audit Trail and History– System logs maintained inside customer environment for the contract life. Viewable by customer's admin. History tab logs system changes performed by customers.
 - **EPROC-TECH-3-5 – Needs clarification.** Unclear why these responses marked as INT.
- Browsers Supported – All common browsers.
- User Accounts and Administration – 5 standard roles. Administrator, Catalog Manager, Full Access (non-admin), Purchasing Manager, Vendor Manager. Single point of integration. User setup through user interface or flat file. Delegation privileges are native.
 - **EPROC-TECH-16 – Needs clarification.** Doesn't meet requirement for automatic deactivation of accounts after 6 months.
 - **EPROC-TECH-17 – Needs clarification** – Non-SSO password change required at 180 days. This doesn't comply with the 90-day change password standard for Texas based on NITS standards – is this a configurable setting to shorten the reset requirement or will SAP update the standard?
 - **EPROC-TECH-20 – Needs clarification.** The response lists password standards for SAP customers and is **not responsive** to searchable reference source and definition of user roles etc.
- User Authentication – ADFS and SAML 2.0 supported for SSO.
 - See note on EPROC-TECH-17.
 - **EPROC-TECH-24 – needs clarification** about new password auto generation. Not responsive.
- Federated Identity Management. IDP or SP federation.
- Data Conversion – SAP Activate Methodology for rapid migration through Delivery team with responsibility for data validity, functional and technical expertise to coordinated with customer org.
 - EPROC-TECH-27. Detailed explanation of import and export to state backend systems/ERP through flat files or Ariba Open Protocol/
- Interface and Integration – Medium-complexity requirements.
 - real-time or batch integration options available.
 - *HTTPS using a CSV interface (Batch integration, and depending on the data volume this can be scheduled to run frequently to achieve near real-time integration)*
 - *SOAP Web services that use an XML payload (Real-time integration suitable for transactional data)*
 - *REST APIs (supports both synchronous & asynchronous calls)*
 - EPROC-TECH-38 – master data recommended batch export options. Transactional data optional for real time or batch.
- Office Automation Integration – available; CSV imports/exports.
- Mobile Device Support – site is built for mobile responsiveness. P. 53 lists components with mobile functionality including shopping cart, approvals, viewing reqs. Supplier 360 reports available to view on Ariba ios app.
- Mobile Applications – ios and Android supported. Touch ID, App pin, fingerprint recognition options for access.
- Data Ownership and Access – Ownership always customer, but SAP Ariba retains copies of data for life of contract only.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s) 4:

DATE: 1/11/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- EPROCH-TECH-63 – data purge can be set for automated action or manual.
- Date Retention, Archive and Purge Considerations
- Disaster Recovery Plan – Data centers in regional pairs.
 - URLs will continue to work if failover. Cloud Engineering Services move area within RTO; after switch, secondary becomes the new primary..
 - Customer will receive email from SAP notifying of unplanned down time. Expectation for communication not state in narrative..
- Solution Environments – Sandbox environment allows customer to review changes prior to deployment. (No separate UAT. Customer controls schedule for deployment. Third environment available for additional cost. Needs clarification: Is Sandbox and Test considered by SAP/IBM as same environment?
- Solution Technical Architecture – Ariba hosted. Regular service updates. Three options for data transfer: batch file; web services including additional cost middleware; cloud integration.
- Solution Network Architecture – SAP Ariba has it's own data center and servers. Web, application and data tiers are segregated. Data will be hosted in North American data center.
- System Development Methodology – Agile scrum implementation of Product Lifecycle Methodology.
- Service Level Agreement – SLA attachment referenced on p62 not provided in Eval packet.

Security Requirements

- Cloud Security Alliance (CSA) Compliance – CAIQ 3.0.1 supplied.
 - MOS-15 – Clarification needed – How are changes to mobile operating systems, patches performed if not SAP change management processes? No comments provided.
- Security and Privacy Controls – P63: *SAP Ariba is audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 every six months. A SOC 3 report is issued annually. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II, SOC 2 Type II.*
- Security Certifications . See previous entry.
 - PCI Service Level 1 compliant;
 - compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program
 - Not HIPPA certified – limited relevance for procurement
 - Fedramp certified; various ISO best practice certifications listed – p65..
- Annual Security Plan – No SOC plan provided
 - Needs clarification. P63 SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines. Does will SAP intend to become compliant with NIST requirement?
- Secure Application and Network Environment – 24/7 system monitoring. Firewall separation of SAP corporate with customer cloud.
 - Only SAP authorized staff using SAP authorized computers in data centers.
 - 2FA authentication for SAP staff entering cloud environment.
 - Exception-based authorization for Cloud Engineering to access specific customer cloud instances.
 - P68 *Data disposal practices are aligned with the NIST 800-88 standards for clearing, sanitizing, and data destruction to prevent data remanence prior to retiring or allowing storage media outside of our security envelope.*
- Secure Application and Network Access

- EPROC-SEC-2 - *Concurrent login is available. SAP Ariba allows for 2 concurrent session for the same user so that mobile and desktop (e.g. report generation) can be used. However, security measures are in place to detect concurrent logins from multiple IP addresses.*
 - Data at rest and in transit encrypted.
 - Detailed descriptions of security provisions provided for hardware and physical premises.
- Data Security – Stated in narrative. P75-76. SAP has DPA setting out terms. **No NIST standards referenced as proposed in RFP.**
- **Personally Identifiable Information Protection – Needs clarification for responsiveness.** P.77 *SAP Ariba are not designed to handle HIPAA data. Our solutions are designed Business to business transaction, and SAP Ariba does not support storing HIPAA/PII/Personal data. For example: SSN, Personal Banking information etc.*
- Security/Privacy Issue Occurrence – Scenario described. Full process documentation stated to be confidential.
- PII Data Actual/Attempted Access or Disclosure – As previous entry.
- Security Breach Reporting – As previous entry.

Implementation Services Requirements

- Project Management – 3 tiered governance model: State-IBM-SAP
 - 5 levels. Exec Steering; Advisory Council (IBM); PMO; Core project teams and SMEs; Cross Project Teams
 - 4-stage delivery model: Prepare; Explore; Realize; Deploy.
 - High level org chart positioning SAP, State and IBM project personnel. IBM roles defined, and required state roles.
- Project Implementation Methodology - Ascend for Ariba” implementation – hybrid-Agile.
 - Start with pre-defined Ariba environment.
 - P88 *core of our methodology is the Quad A concept, where business requirements and processes are segregated into four main categories (Adopt, Adjust, Add, or Abstain) to indicate the relative degree of fit and enablement work required to satisfy The State’s requirements*
 - IBM promotes adoption of Ariba native design – configure not customize. 3-step process for approval of deviations from standard.
 - IBM responsible for system testing – development, facilitating, repair.
 - Deliverable acceptance gives 5-day period for state to accept or report defects. 10-day window deems accepted.
- Catalog Support Services – IBM supplies supplier assessment SME to work with state; determine existing vendors already in Ariba, plan to onboard other required suppliers. Goal to minimize post launch supplier support need. IBM active in development of ongoing resources for suppliers – FAQs, training materials.
 - **P93 – Needs clarification.** Is state/supplier reliable for working to perfect catalogs or does IBM have catalog development staff who will perform validation and loads?
 - **P93 – Needs clarification** Narrative describes UNSPSC code validation; for NIGP states, is NIGP validation by IBM available?
- Data Conversion Services – standardize and simplify.
 - IBM EnterpriseHUB for data standardization. State staff to sign off on data validity prior to migration in Agile process.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: IBM

CATEGORY #(s) 4:

DATE: 1/11/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- **Note:** The narrative proposal seemed to specifically address an existing data setup (perhaps Maine's current platform) reference SAP 4.6c. It also referenced an ERP system (not eprocurement) and did not seem entirely responsive.
- Interface/Integration Development Services – high level process provided only – IBM did not include this in cost proposal.
- Organizational Change Management (OCM Services) – IBM Digital Change
 - Identifies change agents.
 - 5-phase plan: Prepare; Explore; Realize; Deploy; Sustain.
 - P102 *IBM recommends focusing the OCM effort on 5 major areas: Change Impacts, Communications, Change Network/Readiness, Training, and User Experience.*
 - IBM U-Perform tool to assess readiness for change.
- Training Services – training docs based on previously developed materials in SAP EnableNow (appears to be a cost option). If EnableNow not employed for state training, IBM will export materials to other media, FAQs, training guides etc.
 - IBM identifies as consulting partner to help the state establish training. Can offer “train the trainer” of superusers.
 - Training content offered in PowerPoint.
 - **Note:** As with Data Conversion Services above, this training entry appears to not be wholly responsive and is perhaps adapted from another response. It reference “WalkMe” which is not referenced in the RFP.
- Help Desk Services
 - **EPROC-IMPL-1-5 – No response provided.**
 - **Narrative p106 lists Help Desk as described in Section F1 – no additional information.**
- On-Site System Stabilization Support
 - 3-months of hypercare to assist with defect/issue classification and resolution.
 - Knowledge transfer to state staff to support the Ariba modules.

Managed Services Requirements

- Solution Support
 - **EPROC-MNGD-1 – No response provided.**
 - P 109-110 – IBM identified list of post-support tasks that could be supported by IBM Managed Services solution.
 - Managed Services team would engage during the implementation phase of the project for knowledge transfer to understand state's system specifics, needs. IBM team located off-site at IBM.
 - Governance model would be agreed;
 - KPIs and appropriate sprint management using t-shirt size ticketing approach for ongoing system support by managed services team. IBM Incident Ticketing Support System cost not included; **needs clarification – would IBM Managed Services team use state-licensed JIRA system or other option?**
 - Three-tier Managed Services help desk would be: Tier 1 – State; Tier 2 – IBM; Tier 3 – SAP.
- Organizational Change Management (OCM Services) – Referenced OCM from Implementation – not included in proposal cost.
- Training Services - Additional training beyond what is described in implementation – on-site/virtual would be additional cost.

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Identical proposal document to full service category 1.

Organization Qualifications and Experience

1. Overview of the Organization

- IBM new spinoff company Kyndryl to deploy SAP Ariba
- Proposal states "new company" has 30 years in infrastructure business.
- Source to pay. Supplier management.
- Impact for Ariba solution.
- Unclear what Kyndryl's role is or why it is being spun out of IBM to deploy Ariba.
- SAP Ariba is full service ERP includes e-procurement options.

2. Previous Projects

- Private sector – Paypal Giving Fund – deployed SAP ERP cloud
- Public sector - Canadian government – shared services. – Experis deployment data centers. Not clear procurement toolset.
- Private sector (banking) – Santander. Experis (Manpower Group) SAP Ariba implementation.
-
-

3. Subcontractors

- The following subcontractors are listed but not relevant to the e-software solution only.
- Amick Brown – SAP implementation service, post go-live support.
- Manpower group – staffing services for IT projects extensive state and local government. (Includes Manpower, Experis and Jefferson Wells).
-

4. Organizational Chart

- Role map org chart. Identifies subcontractor contact (incomplete). No detail.

5. Litigation

- IBM faces claims but not material in 3 prior years.
-
-

6. Financial Viability

- IBM – low risk

Individual Evaluator Comments:

Implementation options:

- Ivalua
- Coupa,
- GEP
- Oracle
- SirionLabs
- Others may also be implemented.

Implementation Services Requirements

- Project Management – KPMG governance and project management plan detailed from in Section III response. KPMG project manager. Integrates key customer stakeholders in the implementation team. Detailed risk management and issue management processes.
- Project Implementation Methodology – 5 phases. Vision, validate, construct, deploy, evolve.
 - Use of pre-configured delivery models, training materials and benchmarks to accelerate project. Avoids reinventing the wheel.
 - Test scripts to be developed in collaboration with customer organizations. Note that in assumptions: KPMG not responsible for developing UAT test plan or UAT scripts.
 - Cutover to production occurs as part of go/no-go prior to full go-live.
 - Post go-live support/hypercare (4 stage severity levels for defect resolution.) Evolve phase.
 - Supplier enablement- start with current/future state identification.
 - Identified org role-based map according to project responsibility: leadership, functional and supplier support; data migration, testing, change mgmt/training, managed services
 - Identifies roles in customer org. including time commitment expected.
- Catalog Support Services – KPMG and customer identify hosted/punchout best fit for each supplier.
 - KPMG does catalog set up with internal users; Vision – 2 years spend data to assess; Validate contracts; Publish punchout and hosted catalogs prior to go-live; construct – configure punchout – setup online marketplace. KPMG engage state users to test catalogs and validate. trains customers on future hosted and punchout catalog set up.
- Data Conversion Services –KPMG works with state on data migration strategy, defining data conversion, mock and production data extracts, data cleansing, transform/load processes, quality assurance.
 - Uses Ivalua ETL/ETA module. Phases: Extract; Transform and Load; Data Reconciliation.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 4:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- 9 preliminary datasets identified as likely for conversion with sources data (ERP or external (existing) systems).
 - Optional Cognitive Contract Management (CCM) KPG platform to read and ingest documents including contracts, price lists and catalogs.
- Interface/Integration Development Services
- Restated 5-step deployment Vision, Validate, Construct, Deploy, Evolve for development. Parallel workstreams for KPMG and customer teams.
 - 10 integrations identified and process outlined including source and destination systems.
 - *KPMG will design the format, develop, and test interfaces feeding in/out of Ivalua.*
 - *Your organization will be responsible for mapping the data elements to your systems, developing and testing the interfaces coming into your organization systems and out of your organization systems into the proposed solution's services per the project schedule. Interfaces identified and finalized during Design Phase will be built in collaboration with your IT resources. It is assumed that for any interfaces/integrations to other third-party systems, your organization will provide for the necessary licenses, if applicable*
 - *Middleware solution or adapter will management integration between Ivalua, ERP, other apps.*
- Organizational Change Management (OCM Services) – Detailed KPMG OCMT process outlined (can be scaled back for less complex projects)
 - Proposal lists included projects and additional KPMG services. **Clarification may be needed** to state if proposal complies with RFP requirements without the “additional recommended KPMG services” (Difference between OCMT Strategy and OCMT Plan, for example). Are these additional services included in cost workbook? Should they have been referenced in the Value Added section?
- Training Services – KPMG Targeted learning model. Training the Trainer. – combination of instructor-led classroom/online and webinar. Self-service on-demand web-based training. Quick-ref guides.
 - Role-based training needs assessment; table breakdown of topics.
 - Troubleshooting guides. Developed training becomes property of customer.
 - Separate training plans for Trainers, System admins, help desk, suppliers.
- Help Desk Services – **KPMG** provides Help Desk/Service Desk as part of managed services framework during the implementation. Trains state help desk staff on specific deployment.
 - Augments existing Help Desk by providing case management support for state's power users via tickets submitted to KPMG's ServiceNow system. Tickets to:
 - Tier 1 (client org)
 - Tier 2 – KPMG
 - Tier 3 – Ivalua or client IT as applicable.
 - **KPMG subcontractor can provide Tier 1. (Needs clarification of optional cost.)**
 - Help desk support is included for six months after go-live. Transition to state's help desk, includes training and knowledge transfer.
 - EPROC_IMPL-3 and -4 – No live chat available.
 - EPROC_IMPL-5 – Ivalua Extranet ticket system can be viewed by customer, but does not integrate to customer's ticket help system.
- On-site stabilization. Hypercare – 3 months. Monitor rollout; triage and support high-priority tickets; adjust configuration, defects. Focus on end-user adoption; transition to state support team and Ivalua Run team.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: KPMG (Ivalua implementation)

CATEGORY #(s) 4:

DATE: 1/16/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- KPMG knowledge transfer plan
- Quality gates with exit criteria to help stabilize system during hypercare for longer term managed services transition to steady state operations. 1. Pre-contracting and contacting; 2. Initiation and planning exit; 3. Execute and test exit; 4. Implement and stabilize exit.
- P185 Assumptions – Assume Tier 1 support during hypercare is performed by customer; KPMG acts as Tier 2 support. Ivalua acts as Tier 3 support.

Managed Services Requirements

- Solution Support – P156 “Powered Evolution Services”: governance; base services; enrichment.
 - Identify support and escalation standards, performance category, issue severity level with descriptions.
- Repeat of description of infrastructure, SLA and environments.
 - SDLC policy and development and testing plans for rollout explained.
 - Testing has 4 levels: Manual tests and code reviews; load and performance testing; functional testing; regression and automated testing.
 - Repeat of contracted level 3 support and optional level 1 supports.
- Organizational Change Management (OCM Services) – P161 – OCMT (referenced in implementation – for areas that are needing to be additionally supported).
 - Focus on 1. Service delivery; 2. Service quality.
 - Stakeholder analysis/assessment.
 - Surveys to identify metrics.
 - Communication plan - engage change agent network to review software updates
- Training Services Service Center change monitoring Process – maintain current content.
 - Examples of training modalities: Email; team huddles; quick ref guides; micro-learning videos; eLearning; Instructor-led or Virtual live learning; office hours.
- Catalog support services. P164 Proposal to refine and maintain existing catalogs, determine new catalogs as hosted or punchout; setup and configure punchout catalogs; publish hosted and punchout catalogs. Needs clarification – is this in proposal cost or optional cost service?
- Help Desk Services – case management support for state’s power users via tickets submitted to KPBG’s Servicenow system. Tickets to:
 - Tier 1 (client org)
 - Tier 2 – KPMG
 - Tier 3 – Ivalua or client IT as applicable.
 - P186 – 25 ServiceNow licenses provided for power users.
- Transition out - P105KPMG team manages and oversees tasks to remove client users from system and information. In client environment, KPMG execute protocols to ensure KPMG personnel offboard.
 - Phased approach – formal toll gates act as check points to align clients and all parties. Three toll gates with processes totaling up to 10 weeks.
- Other Available Services: KPMG strategic sourcing, Contract Performance Management, Localization.

Video Demonstrations

- Major elements of KPMG implementation processes demonstrated.
- Methodology transferable to various solutions.

Individual Evaluator Comments:

SAP Ariba - Unified Business platform. End-to-end procurement process.
Labyrinth Consulting (LSI); 30 Ariba deployments.

P6 LSI's Proprietary GovOne Accelerator - LSI Consulting has created the GovOne solution for State and Local Government organizations, utilizing SAP's Public Sector business application software. GovOne is our flexible, pre-templated accelerator that provides preconfigured system options and controls, and basic accounting, budgeting and procurement structures.

General Principal and Requirements

- Key Solution Functionality Elements – Guided Buying (state's approved suppliers.)
 - Single-point of Entry; Smart Routing, compliance with SAP S/4HANA, SAP portal for on-prem or cloud deployments, Contract Management module, reporting, configurable.
 - Vendor portal – SAP Business Technology platform.
 - P10 *The offering includes a customer specific deployment of a Transparency Portal. This portal is scoped to meet each entities specifications by giving the organization the ability to surface procurement activity and information to public stakeholders including solicitations, contracts, supplier information and purchasing reporting data.*
- User Experience – focus on Guided Buying module and mobile procurement tools.
 - SAP Ariba Best Practices Center – flexible, as-needed support tailored to customer; single, named point of contact; best practices; claimed faster ROI.
- Bidder Best Practices and Roadmap – Standard Ariba quarterly release and monthly feature deliveries.
 - Product roadmap identified
 - Ariba network. Ariba Spot Buy
- Innovations and Value-Added Features/Services
 - SAP Fieldglass
 - AP Ariba Supplier Risk Management
- Customizations/Extensions –
 - Spotline (chatbot)
 - Seal Software (analytics for risk control)
 - Cloud Trade(PDF invoicing)
 - Keelvar Sourcing – optimizer to run, analyze and award events, bidirectional data.
 - Cordis – procure-to-pay integration with Oracle ERP;
 - P-18-20 – long list of extensions.
- Alternative Funding Models – P20. Listed SAP Fieldglass for external workforce strategy. Non-responsive to e-procurement requirements.

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) : 4

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Contract transition: LSI Partner Managed Cloud offering allows contract relationship to be software and incremental services. Responsiveness to RFP question not immediately clear.

Functional Requirements

- General Functionality – Ariba integrated applications. Facilitates occasional and frequent buyers.
 - SAP Ariba Buying& Invoicing
 - SAP Ariba Sourcing
 - SAP Ariba Contracts
 - SAP Ariba Supplier Lifecycle & Performance Management
 - SAP Ariba Network
 - SAP Fieldglass
 - P23 customers can achieve zero-touch processing and invoicing, eliminating once more non-value added work for AP, Finance, Invoice managers, etc.
 - P23 Data is categorized consistently within the solution leveraging a common data model inclusive of suppliers, commodity codes (UNSPSC), Agencies/Organizations, users, etc. Data created as a result of system utilization is available for analysis within the user interface via SAP Ariba's native reporting and analysis engine.
 - SAP Ariba supports importing data from external systems.
 - Most EPROC-GEN requirements listed as Standard functionality. Integrations usually not described.
 - EPROC_GEN-3, -5 Award posting integration needed. Needs clarification – Is integration added cost? What integration is proposed?
- Supplier Portal – Supplier Business Network.
 - P26 Supplier enablement services are included in our offering. This reduces the level of effort/resources required from the State to enable suppliers on the SBN. Our team of 700+ enablement experts will be responsible for most of the enablement process. We also offer flexible partner onboarding: it is simple for ALL types of suppliers, big and small, integrated and portal. Needs clarification – is this SAP or LSI?
 - EPROC-SPR-7 – Needs clarification what integration is proposed?
 - EPROC-SPR-18, -19 Needs clarification Comments say “Partner, not supported, but availability listed as A. What is the solution?
 - P27 Publicly posted solicitations via Ariba Discovery and the State's Public site Needs clarification. Is this included integration to post direct to state site
 - Catalog support – hosted and punchout
 - Spot Buy catalog solution
 - Mobile app – rapid request fulfillment; at a glance update to orders, 12 month invoice and order searches.
- Supplier Enablement/Management
 - P31 Customized enablement strategy: Use our team's expertise to help you design and develop the most effective enablement strategy for your suppliers based on their profile, purchase order (PO) and invoice volume, and spend. Our approach includes duplicate detection (deduping) and segmentation of your vendor master data to effectively target and onboard suppliers in tiered waves that align with your priorities and objectives.
 - P31 Supplier education: user guides, FAQs, technical documentation, and free online seminars that explain the basics of using Ariba Network. We can also

INDIVIDUAL EVALUATION NOTES**

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) : 4

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

deliver your account specific information to suppliers through a supplier information portal embedded in Ariba Network.

- **EPROC-VDR-40** – Stated as out of box and configurable; other Ariba bidders were non-responsive on this requirement or partial function claimed. **Needs clarification.**
- Buyer Portal - Offers 2 primary entry points designed for casual user or power user. Casual user gets guided buying experience, can submit requests. Power user enters via dashboard, gets more self-service approach including buying, solicitation development, vendor management, report generation.
- Need Identification – Ariba Guided Buying function
 - Functions stated as supported.
- Request through Pay – Native SAP Ariba Buying and Invoicing module for state ide; invoices to suppliers through Ariba Business Network portal.
 - *P36 Purchase orders will be sent to suppliers via the SAP Ariba Business Network. Subsequent change orders will be routed to suppliers via the Ariba Network as well. Change orders will be subject to a configurable workflow. Leveraging the Ariba Network suppliers can create an order confirmation, advance ship notice and invoice. All of which is accomplished electronically to streamline the source to settle process.*
 - 100MB limit on attachments throughout the portal.
 - **EPROC-PRD-28** – Custom form can be created for special considerations such as trade-in. Is this considered a customization or native functionality? If negative numbers not accepted, how would this be handled? **Needs clarification.**
 - **EPROC-PRD-48 – Needs clarification.** Does LSI proposal encourage native functionality for loading values cited or is this assumed to be an integration. Entry is marked A.
 - **EPROC-PRD-62 and PRO-29 – Needs clarification.** Requirement is for header level; response is that supplier level is common. Non-responsive as presented.
 - **EPROC-PO-16 – clarification needed** – Signatures on POs – LSI says not available in comments, but marked A.
 - EPROC-RC-21 – UOM defined by PO – not convertible to inventory unit UOM for receipt entry.
 - **Note: There are multiple responses in this Requirement set where configurable is stated but the Availability is marked A not CF.**
- Catalog Capability – p36 *With SAP Ariba Catalog, suppliers can upload all their content using a single, simple user interface. And with recently launched, innovative capabilities, they have enterprise-grade content management tools to define, validate, and enrich catalog content. By creating catalog rules to cleanse and enrich the data, you'll be assured of compliant, error-free catalogs while you monitor content quality with your new dashboard reports. No notes on hands-on customer-side hosted catalog management.*
 - **EPROC-CAT-6 & -7 Needs clarification.** Listed as A, but limitations cited. 500,000 items per catalog; 5,000 catalogs per system. This would likely be in excess of catalogs needed by states, but the item threshold would not reach the limit for MRO vendor catalogs, for example. Does 5,000 catalogs include expired or inactive catalogs; can one vendor have multiple catalogs archived and not count against the total?
 - **EPROC-CAT-11- needs clarification. Comments are circular – say to see CAT-11: (possibly means CAT-8 custom forms).**
 - EPROC-CAT-19 – negative values supported requirement not met.

- Sourcing/Bid Management - claimed out of box functionality on common procurement types, 50% reduction in solicitation cycle time, savings.
 - Solicitation development using templates inside Ariba Sourcing.
 - P38 *The solution also supports other critical components of the solicitation process including addendums, amendments, Q&A, supplier notifications, supplier communications, internal communications, document management, etc. SAP Ariba Sourcing is natively integrated to SAP Ariba Contract Management and this will allow the State to create state-wide Contracts, Agency-specific contracts, Project-specific/one-time contracts, or Purchase Orders. P39 Proposals are received electronically and are automatically available for comparison side by side within the user interface (unless configured otherwise including envelope and sealed bids). Users may score/grade responses leveraging delivered functionality. Upon completion, side by side comparison by score, price, etc. can be done quickly and easily.*
 - EPROC-SRC-67 – suppliers have to register to postings. Not public facing – **non responsive. Needs clarification.**
 - EPROC-SRC-73 – is posting to state's website included in standard functionality? **Needs clarification. See SRC-77 and -78.**
 - EPROC-SRC-107 – needs clarification. **Does surrogate bid meet requirement for posting?**
- Contract Management
 - P40 *With SAP Ariba Contract Management, the State can connect directly with suppliers when creating, negotiating, executing, and managing the ongoing administration of contracts. SAP Ariba Contract Management is natively integrated with Sourcing which allows the creation of a contract directly from the solicitation award. The resulting contract will be stored in a central repository and can be published to SAP Ariba Buying and Invoicing.*
- Vendor Performance- Cloud-based vendor data model; supplier 360- review; supplier scorecards based on KPIs.
 - P43 - *The State may leverage a set of APIs delivered as part of the SAP Ariba platform to expose data to the public via a public website. Data captured as part of the supplier management process supported by SAP Ariba Supplier Lifecycle and Performance is available via API. Data can be formatted and combined with other data sources and displayed on a public website to meet FOIA requirements.*
 - P44. Supplier surveys can capture stakeholder responses and compile performance score.
- Purchasing/Data Analytics - 3-step report creation wizard; data filtering within Ariba tool rather than having to export data out to Excel to pivot/manipulate.
 - Pre-packaged or ad-hoc reports.
 - EPROC-PDA-35 - *SAP Ariba can support two reporting taxonomies. Supported taxonomies such as UNSPSC, the Ariba Classification taxonomy, and a customer-specific, custom taxonomy.*

Technical Requirements

- Availability— 99.5% uptime. Linked service agreement document provides definitions of credit, maintenance windows, availability calculation etc.
- Accessibility Requirements

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) : 4

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- P47 Accessibility at SAP refers to the possibility for everyone, including and especially people who are differently-abled, to access and use technology and information products. SAP ensures the implementation of user-interface (UI) accessibility features for Products via our SAP Accessibility standard.
 - P47 When developing software, SAP's product teams target Web Content Accessibility Guidelines Level A and AA and EN 301 549. **While SAP continues to implement and develop accessibility features across its product portfolio, solutions are not fully optimized for accessibility.**
- Audit Trail and History – p48 Specific logging takes place that is viewable by the customer administrator or their designee. Audit logs produced through use of the solution are considered customer data and are maintained within the customer's instance of the database. These logs are retained so long as the customer has an active contract. Also see EPROC-TECH-1.
- Browsers Supported - Common browsers supported
- User Accounts and Administration
 - P48 Access to data and functionality within the modules is based on roles and permissions that determine which features of the solution a user can see and work with, and what data the user can access. The set of permissions for a user is derived from the roles mapped to that user and the groups the user may be a member of. Permissions are mapped to roles and then roles can be mapped to other roles, to users and/or to groups.
 - The solution also provides a single point of integration and administration for users and user profiles, organizations, groups and group memberships, roles and permission mappings.
 - This common data is shared and synchronized across modules automatically. The User, Group, Role and Permission objects can be managed from the provided UI or populated from a variety of sources, such as corporate systems and/or flat files.
 - EPROC-TECH-10 Least privilege: For customer users, this is a customer complementary control consideration due to the fact that the customer administrator manages user access and role assignment.
 - **EPROC-TECH-12 Needs clarification.** Listed as A, but comments say Dual SignOn via one account is not support.
 - **EPROC-TECH-16 – Needs clarification.** Doesn't meet requirement for automatic deactivation of accounts after 6 months.
- User Authentication
 - P49 Username and password from login page or Single Sign-on from corporate network permitted.
 - 2FA available for SAML-Based authentication.
 - **EPROC-TECH-24 – needs clarification** about new password auto generation. Not responsive.
- Federated Identity Management – See previous answer.
- Data Conversion - SAP Activate Methodology for accelerated migration through Delivery team with responsibility for project management, functional and technical expertise, OCM and training to coordinated with customer org.
 - EPROC-Tech-27 – detailed description of master data integration and Transaction Data integration.
- Interface and Integration – P51 SAP Ariba applications integrate with all the major ERP systems. We provide flexible integration support for Oracle, PeopleSoft, AS400 and SAP. Given our flexible EAI

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

infrastructure, we have also mapped out applications to Salesforce, Lawson, GEAC and a multitude of custom developed legacy systems.

- *P51 - These standard integration options across our solution portfolio are:
 - a) *Master data integration is done primarily in batch mode, HTTPS using CSV files (Batch integration, and depending on the data volume this can be scheduled to run frequently to achieve near real-time integration)*
 - b) *SOAP Web services that use an XML payload (Real-time integration suitable for transactional data)*
 - c) *REST APIs (supports both synchronous & asynchronous calls)*All of these integration methods are based on SSL 256 bit encryption and support various authentication methods such as WS-Security, basic and digital certificate authentication as standard. Our customers can opt for two or more or all the options to help achieve the desired level of integration.*
 - *Uses Ariba Open APIs.*
 - *Sample interface plan document supplied – generic – no specific interfaces included.*
- **Office Automation Integration – EPROC-TECH-61**
 - *Support of Excel format for data uploads and downloads. For example, SAP Ariba Sourcing is designed to allow Excel uploads for market designs.*
 - *Support of Excel templates for analysis and reporting:*
 - *Microsoft Outlook – SAP Ariba Sourcing and Contracts can export tasks within projects to Microsoft Outlook.*
 - *Word – SAP Ariba Contracts provides sophisticated contract authoring capabilities using Microsoft Word documents. SAP Ariba Contracts offers bi-directional integration with Microsoft Word to assemble contracts and templates from a clause library, and then to detect changes to contract documents, including automated flagging of alterations to clauses, and support for clause substitution from pre-approved clause libraries.*
- **Mobile Device Support** – site is built for mobile responsiveness. Components with mobile functionality including shopping cart, approvals, viewing reqs. Supplier 360 reports available to view on Airba ios app.
- **Mobile Applications** – ios and Android supported. Touch ID, App pin, fingerprint recognition options for access.
- **Data Ownership and Access** – p54 *The customer owns the data; they can extract the data at point of time during the throughout subscription. Tools to download the data. For example: User Interface (Import CSV), API's.*
- **Date Retention, Archive and Purge Considerations** – p54 *Data retention is governed by the active contract. We retain your data on the service for the duration of the subscription term and any subsequent renewal term.*
 - *EPROC-TECH-63 - Customer is in complete control of data deletion and purging which can be manual or automated via integration.*
- **Disaster Recovery Plan - Data centers in regional pairs.**
 - *URLs will continue to work if failover. Cloud Engineering Services move area within RTO; after switch, secondary becomes the new primary.*
 - *Customer will receive email from SAP notifying of unplanned down time. Expectation for communication not stated in narrative.*

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) : 4

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- *Solution Environments – p55 Customers receive two environments by default: production and test. The test environment is used for initial configuration and setup. The production environment is used for production. Additional environment is available for an additional charge.*
- *Solution Technical Architecture – p56 SAP Ariba applications uses cXML language for the document exchange between SAP Ariba Network and Ariba Modules.*
 - *See Data Conversion for integration to external systems.*
 - *P57 The software's data model keeps customers' data separated. Customer data is isolated via realms. Each individual customer is assigned a distinct realm to identify and store their data.*
- *Solution Network Architecture – p57 The system is powered by high-performance servers and utilizes a network infrastructure designed for scalability, reliability, and security. The SAP Ariba Operations team is constantly monitoring and maintaining the systems.*
- *P58 Needs clarification SAP Ariba solution is available only as a SaaS multi-tenant model hosted by us. Who is us — SAP or LSI?*
 - *Our solutions are offered and delivered in a true subscription-based model and shared service (multi-tenant) offering. There is no software to install, no hardware to buy, no maintenance or support costs and no need to hire consultants or tech specialists to run the system.*
 - *Subscription includes system maintenance, automatic upgrades, enhancements and application of service packs, Level 1- 3 help desk support, professional services and best practices built directly into the application.*
 - *Data will be hosted in North American data center.*
- *System Development Methodology - Agile scrum implementation of Product Lifecycle Methodology.*
- *P58 Ariba leverages a Secure Software Development cycle (Secure SDC) that is aligned with ISO 27034 principles. This includes:*
 - Secure code (OWASP Top Ten) training to engineers*
 - Code review by peers before build cycles*
 - Static and dynamic code analysis, with load testing for resiliency*
 - Reviews and approvals at multiple phases for meeting security criteria prior to release to production.*
- *Service Level Agreement – one page SLA attached. Referenced above.*

Security Requirements (This section is common with IBM submission)

- *Cloud Security Alliance (CSA) Compliance = CAIQ 3.0.1 supplied.*
 - *MOS-15 – Clarification needed – How are changes to mobile operating systems, patches performed if not SAP change management processes? No comments provided.*
- *Security and Privacy Controls - Needs clarification. P60 SAP Ariba is officially not certified for NIST 800-53, SAP Ariba use SOC guidelines. Does will SAP intend to become compliant with NIST requirement?*
- *SAP Ariba is audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 every six months. A SOC 3 report is issued annually. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II, SOC 2 Type II.*
- *Security Certifications . See previous entry.*
 - *PCI Service Level 1 compliant;*

- compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program
 - Not HIPPA certified – limited relevance for procurement
- Annual Security Plan – p62 – states plan is internal document. Gives links to request SAP SOC reports. Not included with response.
- Secure Application and Network Environment - 24/7 system monitoring. Firewall separation of SAP corporate with customer cloud.
 - Only SAP authorized staff using SAP authorized computers in data centers.
 - 2FA authentication for SAP staff entering cloud environment.
 - Exception-based authorization for Cloud Engineering to access specific customer cloud instances.
 - P64 *Data disposal practices are aligned with the NIST 800-88 standards for clearing, sanitizing, and data destruction to prevent data remanence prior to retiring or allowing storage media outside of our security envelope.*
- Secure Application and Network Access
 - EPROC-SEC-2 - *Concurrent login is available. SAP Ariba allows for 2 concurrent session for the same user so that mobile and desktop (e.g. report generation) can be used. However, security measures are in place to detect concurrent logins from multiple IP addresses.*
 - Data at rest and in transit encrypted.
 - Detailed descriptions of security provisions provided for hardware and physical premises.
- Data Security – Stated in narrative. P69-70. SAP has DPA setting out terms. **No NIST standards referenced as proposed in RFP.**
- **Personally Identifiable Information Protection – Needs clarification for responsiveness.** P.71 *SAP Ariba are not designed to handle HIPAA data. Our solutions are designed Business to business transaction, and SAP Ariba does not support storing HIPAA/PII/Personal data. For example: SSN, Personal Banking information etc.*
- Security/Privacy Issue Occurrence – Scenario described. Full process documentation stated to be confidential.
- PII Data Actual/Attempted Access or Disclosure – As previous entry.
- Security Breach Reporting – As previous entry.

Implementation Services Requirements

- Project Management Leadership are Engagement Lead and Project Manager – Operational responsibilities, and Program Sponsor – strategic. (p73)
 - PMO defines scope, finalizes resources; implements toolset for risk and issue management; establishes communication protocols; RTM framework and prepares kickoff presentation to communicate standards and expectations.
 - Kickoff - *Joint PMO and led by the program executives from LSI and the State to reinforce the “one voice” concept of leadership*
 - *LSI and the State maintain primary responsibility for their own project team members. The team leads are responsible for coaching/mentoring under-performing resources and providing training as appropriate.*
 - State responsible for establishing issue management repository: *expectation at each project that the State establishes a project repository (i.e. MS Teams, Slack, SharePoint,*

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

Shared Drive, Google Drive, DropBox) as a platform to manage project issues and documentation of resolution. This repository will provide detailed logging of issues, defects and a robust reporting system based on configurable project scope, categorization, and nomenclature. Guidelines will be established for what constitutes an issue, for severity level classification, and escalation procedures. All team members will have access to the issues database; project managers are expected to review issues regularly and review aging open issues for possible escalation. Additionally, the project repository is a customer-provided and customer-maintained site that utilized by both LSI and customer project team members during a project.

- *Project repository site is front loaded with LSI's pre-configured implementation accelerator templates, strategies, organizational structure, and additional project documentation*
 - *Project requirements traceability matrix provides the framework for managing solution scope and quality throughout the project.*
- **Project Implementation Methodology - SAP Activate Cloud methodology follows Agile principles.**
 - *4-stage delivery model: Prepare; Explore; Realize; Deploy.*
 - *P76 Quality Gates are performed to confirm that all stakeholders of the implementation project agree that specific deliverables meet the requirements and consequently that the project can continue. Project. Verification; Solution Acceptance; Readiness Acceptance; Go-live.*
 - *Sample Phase plan demonstrating task descriptions and responsibilities. P79-81.*
 - **P85 - Realize Phase Sprint 1**
 - LSI consultants will perform unit testing of standard transactions and updating the unit test log. LSI Project Manager shall prepare the Unit Test Summary Report; **State** Project Manager is responsible for review and feedback prior to presentation to executive leadership.*
 - State is responsible for definition and development of test cases, test scenarios and test scripts representing the comprehensive success criteria for this test phase.** LSI shall assist with test case and scenario definition and script preparation.*
 - *LSI Training Lead is responsible for the overall training plan; **State** Training Lead is responsible for providing appropriate schedules for end user training delivery, train-the-trainer candidates, and attendee lists.*
 - *Note: This suggests lean LSI project team with heavier participation from state team than some implementers that will design and lead testing phases.*
- **Catalog Support Services – Needs clarification as to involvement**, if any, of LSI personnel in catalog implementation phase. Are SAP staff engaged?
 - **P94 - SAP Ariba brings to the table specialized Catalog Management services as part of the software subscription to help the State manage their catalog content throughout the State's time using the software.**
 - *SAP catalog management services manage enabled (hosted) catalogs and punchout catalogs. We perform cleansing; the supplier is responsible for uploading catalogs on the Ariba Network. SAP Ariba catalog management services manage the enabled catalogs including validation, cleansing, catalog activation and any subsequent refreshes.*
 - *Enablement of Punch Out catalogs are available as an optional item for additional charges.*

STATE OF MAINE INDIVIDUAL EVALUATION NOTES

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) : 4

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- Data Conversion Services – Six phase plan. Strategy; Analyze; Design; Build; Test/Implement; Deploy.
 - Minimize data from legacy system.
 - P96 *SAP systems, due to their tight integration, require a very high degree of referential integrity in data being converted. Typical data not converted include inactive vendors and customers, paid invoices, journal entries, requisitions and purchase orders.*
 - P97 *A preliminary analysis is made to determine whether a standard SAP solution exists for the data conversion or whether a custom solution must be built. In addition to this analysis, the best tool is identified for the data conversion, for example, using SAP's Migration Cockpit,*
 - *LSI will be responsible for the design, building, and testing of the programs that read these flat files, as-is, and upload the data to SAP. LSI will rely on State experts to participate in this process by validating the loaded data*
- Interface/Integration Development Services - *LSI will recommend, design and deploy interfaces based on the best practices and the latest tools available with the SAP environment.* P98
 - Interface Strategy Document – LSI designs – includes general architecture of current and future landscapes, file transfer, process of interface design and implementation – evolving document. Sample provided.
- Organizational Change Management (OCM Services) – Note: one of the most detailed parts of the proposal.
 - Change readiness assessment. (4 weeks) Understand leadership alignment; evaluate communications processes; understand stakeholders and influencers.
 - Framework - Leadership Alignment model: collective actions; make decisions; identify solutions; validate common understanding; reality check (internal and external); identify gaps.
 - Factors outlined that determine change impacts (p104)
 - Identify business readiness – workforce preparation. Roles: Business readiness Lead; Change Agent; Superuser; Coordinator.
- Training Services
- P 109 *Training is divided into two different but critical areas: 1. Project Team Training 2. End User Training*
 - *Functional project team receives the training it needs to conduct the Explore phase using the same system that is being implemented.*
 - *In addition to the LSI provided project team training, SAP Ariba services can provide project team training. Training seats can only be used towards attendance in our Virtual Live Classroom (VLC) public sessions. In many cases, it's recommended the project team participate in the SAP Ariba services training first and then attend the LSI project team training.*
 - P111 *Training for end-users is developed and delivered as a part of the implementation project and modeled after the train-the-trainer methods.*
 - *Training development methodology, LSI Perform. 5 phases – planning through delivery.*
 - *Instructor Led Training – with students working on the system*
 - *Small group sessions for audience sizes up to 8 – coaching/training/ classroom or on the job.*
 - *Generic Ariba guides also proposed. (LSI not proposing to customize for customer.)*
- Help Desk Services – Note: Like OCM, also one of most detailed parts of proposal.

RFP #: 202102021

RFP TITLE: eProcurement Solutions and Services

BIDDER NAME: LSI Consulting

CATEGORY #(s) : 4

DATE: 1/13/22

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts – Statewide Procurement Division

- After go-live and hypercare, LSI will perform post-implementation support, SAP Application management support.
 - P117 *These services include ensuring systems are up and performing as per SLA, backups are performed regularly, then also perform any additional services not handled directly by the State basis team, e.g., from the list: troubleshoot any system crashes, recover databases if necessary, applying operating system and database patches as needed, transports, SAP application monitoring, day to day Basis support, security, applying OSS notes.*
 - P117 For consideration will also be SAP HR legal patch applications, and SAP Support packs. Needs clarification “For consideration” means what?
 - EPROC-IMPL1 – separate online support sites for Buyers and Suppliers. Needs clarification – Is this SAP license helpdesk or LSI provided as seemed to be stated on p117?
 - EPROC-IMPL-2 Training and documentation available from LSI to State Help Deks.
 - EPROC-IMPL-3 and -4 – Needs clarification – where is Chatbot hosted? Unnamed solution separate from Ariba support listed in EPROC-1?
 - P119-120 – Three tier support levels proposed. Level 1 – All users; Level II – Limited to identified personnel; Level III – Enhancement Support. Separate cost? Retainer hours referenced – not seen pricing yet.
 - 4-level Priority response time table with small, medium, large state response SLAs.
 - AMS staffing – platinum level consultants with 10+years experience.
 - P125-125 Responsibility matrix for support. SAP/LSI/State
- On-Site System Stabilization Support – 3 month hypercare
 - P126 *purpose of this phase is to support the users as they adapt to the new business processes and to restore/maintain stability of business operations*
 - Defect correct; quality review of projects to determine enhancements, future support needs, verify contract compliance.

Managed Services Requirements

- Solution Support
 - EPROC-MNGD-1 Needs clarification – Is the response SAP’s response that they conduct the monitoring rather than an LSI response? Should this be an LSI response? Is the benchmark measurement reported back to state customer?
 - P127 – LSI Ariba customers run latest versions.
 - P127 As part of the Cloud subscription, our solution provides Customer Support services to help diagnose, troubleshoot, and resolve functional and technical problems for users. LSI’s customer service staff can be contacted via phone (toll free), email or Web from Monday-Friday, 24/5.
 - Different Support offerings based on Small/Medium/Large states.
 - P129 *Unscheduled Outage*
LSI will maintain email listings for each business and service owner of the eProcurement solution including third party Solution components. In the event of an outage, LSI will promptly notify the appropriate contacts of such outage and restoration of service in accordance with what was agreed upon in the contract.
P130 LSI Solution Support security responsibilities include:
 - User Management Security

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Access to SAP Ariba, Coupa and Ivalua implementation modules.
 - Discounts agnostic to selected software solution.
 - Analysis and guidance to establish best practice and implement process improvements.
 - 18 years experience – source to pay focus.
 - Primary team is U.S.-based. Uses off-shore customer support (need to verify extent of offshore data.)
2. Previous Projects
 - State of Maryland - emarketplace implementation - ongoing
 - Other examples all private sector.
 -
3. Subcontractors
 - None, pending project need.
 -
 -
4. Organizational Chart
 - Corporate level with detailed role descriptions and vendor/software partner responsibilities.
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 - Not attached.

Individual SME Comments:

Serves as PMO. Could be service for entity that has no internal PMO.

P21 – Ariba, Coupa, Ivalua listed as S2P options.

4. Provided Innovation and Value-added features/services – are these part of implementation offering?

P4-12

6. Provided Alternative Funding Models – are these part of implementation offering? P12-13.

Implementation Services Requirements

- Project Management – six-sigma blended with Agile.
 - Major work activities presented: Define; Conceptual design; iterative design/build; supplier enablement; test; deploy. (Six)
 - Client participate in validation during initial build and data migration; Nitor and client perform detailed testing after iterative build.
 - Then discussed 8-element framework, which included RACI. No sample RACI.
 - Iterative build - 7. Assist in Build of the system based on requirements and design
 - P18 Data staging and deployment activities are occurring in parallel to Training. Followed months of Post Go Live support. The entire project Plan will be managed by Nitor team along with support from S2P platform provider.
 - P19 Upstream/Downstream test prep – lists test scripts as deliverable. TBC with RACI if Nitor or client write these.
 - P20 Post go-live: *stabilization period where Nitor will be the level 1 & 2 support for any system relevant issues, questions & training issues arises. During the hypercare, S2P Platform will provide Level 3 support.*
 - *This is also the period where we train state's staff to diagnose and answer any queries coming from the internal users or suppliers.*
 - Will use state's ticketing system.
 - Post-production Support – Level 1 – state; level 2 – Nitor – Level 3; S2P (p21 says Coupa.)
 - P21 – Nitor staff resources and time% outlined for project; Extensive list of state stakeholders and roles provided.
 - 3-tier governance model. Steering Committee; PMO group; key stakeholders.
 - 4-part Quality Management Approach: Project Management (Comms); Deliverables; Relationship Management (active and post); Team Development. P29 - Description of Nitor and Ivalua high level responsibilities on delivery.
 - P31 – Graphic of Nitor; Coupa leadership for South Carolina delivery.
- Project Implementation Methodology – Nitor collect design build requirements and track; will identify the technical feasible solution and document in design document. **May need clarification – does this**

approach assume the client has already selected the platform? This section indicates Coupa describing configuration built.

- Listed tools use for business process modeling.
 - Testing plan: “success working with the client”
 - Unit testing; integration testing; full unit testing; go/no go from testing.
 - RAID document – weekly review.
- Catalog Support Services – Punchout and hosted.
 - Punchout – Nitor will configure in lvalua instance
 - Hosted- Nitor send lvalua catalog templates. Feedback to supplier to send appropriate catalog file.
 - Catalog data approved in non-prod for approval; Nitor load into prod.
 - **Needs clarification – does Nitor rely on S2P and client to validate hosted catalog quality or is any QA performed by Nitor?**
 - **Needs clarification – punchout – does Nitor validate punchout quality or just connections?**
- Data Conversion Services – Nitor provides migration templates; client extracts data migrations; Nitor and entity valid and work to resolve. Testing in non-prod uses subset of data.
- Interface/Integration Development Services – 2 data types: master; transactional for interfaces; one-time set up for 3rd party apps.
 - Leverage APIs from ERP or middleware.
- Organizational Change Management (OCM Services) – 4 key workstreams: Assessment; Communications; Development; Sustainment
 - Assessment- differentiate customers not one-size-fits-all; comms and change agents; user portal for messaging and information.
 - Development – Training (Training the Trainer; help desk and admin training; vendor training. QRGs, Videos; ILT (blended approach) – table of sample QRGs for modules/functions.
- Training Services – training strategy – blended learning plan using local champions and SMEs. Design for sustainable model of knowledge transfer.
- Help Desk Services – **Not provided in narrative separately from Project Management narrative above.**
- On-Site System Stabilization Support - **Not provided in narrative separately from Project Management narrative above.**

Managed Services Requirements

- Solution Support – Requires discussion with client to determine needs.
- Organizational Change Management (OCM Services) – See implementation response.
- Training Services - See implementation response.
- Catalog support services. - See implementation response.
- Help Desk Services – Same as response in Implementation Project Management response.
- Transition Out Assistance Services – Steps outlined for Nitor and client responsibilities including change control and knowledge transfer.

Video Demonstrations

- 10-minute video. Outlined overall PM approach and project methodology.
- Listed differences from other integrators: white-glove service
- Prior industry experience across industries.

CATEGORY #(s): 4

DATE: 9/28/21

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments:

Organization Qualifications and Experience

1. Overview of the Organization
 - Options for deployment. SAP Ariba. Ivalua. Coupa.
2. Previous Projects
 - Public sector
 - Private sector
3. Subcontractors
 - None
 -
4. Organizational Chart
 - Referenced another part of the submission. Not included in SME review documents for stage 1.
 -
5. Litigation
 - None
 -
 -
6. Financial Viability
 -
 -
 -

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments: I don't see how this company's experience aligns to implementation of an e-procurement system.

Organization Qualifications and Experience

1. Overview of the Organization
 - E-learners. Training and Change management.
 -
2. Previous Projects
 - Training and call center – no state government
 -
 -
3. Subcontractors
 - Not stated
 -
 -
4. Organizational Chart
 - Generic project management descriptions.
 -
5. Litigation
 - None
 -
 -
6. Financial Viability

EVALUATOR NAME: Gerard MacCrossan

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments: I don't see how this company's experience aligns to implementation of an e-procurement system. It is training and deployment focused.

Organization Qualifications and Experience

1. Overview of the Organization
 - Training and Change management.
 - Implementation support only.
2. Previous Projects
 - State government – HHS focused.
 - Montana and Nevada– change management for Medicaid and TANF eligibility. – planning for roll out.
 -
 -
3. Subcontractors
 - Not stated
 -
 -
4. Organizational Chart
 - Generic project management descriptions.
 -
5. Litigation
 - None

EVALUATOR DEPARTMENT/STATE: Texas Comptroller of Public Accounts - Statewide Procurement Division, Texas

Instructions: *The purpose of this form is to record proposal review notes written by individual evaluators for this Request for Proposals (RFP) process. It is **required** that each individual evaluator make notes for each proposal that he or she reviews. No numerical scoring should take place on these notes, as that is performed only during team consensus evaluation meetings. A separate form is available for team consensus evaluation notes and scoring. Once complete, please submit a copy of this document to your Department's RFP Coordinator or Lead Evaluator for this RFP.*

Individual Evaluator Comments: Question if this vendor offers services required under category 4 for implementation. Vendor appears to not include implementation of software solution, only planning and project management.

Organization Qualifications and Experience

1. Overview of the Organization
 - Planning and project management (not implementation.)
 - Independent of software developer.
2. Previous Projects
 - Multiple health agencies at states. None were procurement system implementations.
 -
 -
3. Subcontractors
 - None stated.
 -
 -
4. Organizational Chart
 - High level position chart. No detail
 -
5. Litigation
 - None
 -
 -
6. Financial Viability

AGREEMENT AND DISCLOSURE STATEMENT
RFP# 202102021
RFP TITLE: eProcurement Solutions and Services

I, Angie Scherbenske accept the offer to become a member of the Request for Proposals (RFP) Evaluation Team for the State of Maine Department of Administrative and Financial Services. I do hereby accept the terms set forth in this agreement AND hereby disclose any affiliation or relationship I may have in connection with a bidder who has submitted a proposal to this RFP.

Neither I nor any member of my immediate family have a personal or financial interest, direct or indirect, in the bidders whose proposals I will be reviewing. "Interest" may include, but is not limited to: current or former ownership in the bidder's company; current or former Board membership; current or former employment with the bidder; current or former personal contractual relationship with the bidder (example: paid consultant); and/or current or former relationship to a bidder's official which could reasonably be construed to constitute a conflict of interest (personal relationships may be perceived by the public as a potential conflict of interest).

I have not advised, consulted with or assisted any bidder in the preparation of any proposal submitted in response to this RFP nor have I submitted a letter of support or similar endorsement.

I understand that the evaluation process is to be conducted in an impartial manner. In this regard, I hereby certify that, to the best of my knowledge, there are no circumstances that would reasonably support a good faith charge of bias. I further understand that in the event a good faith charge of bias is made, it will rest with me to decide whether I should be disqualified from participation in the evaluation process.

I agree to hold confidential all information related to the contents of Requests for Proposals presented during the review process until such time as the Department formally releases the funding decision notices for public distribution.

SUBJECT MATTER EXPERT TERMS
RFP# 202102021
RFP TITLE: eProcurement Solutions and Services

As a Subject Matter Expert (SME), I, Robert Sievert agree to the following:

- My role as a SME is to provide factual support, as needed, to evaluators of the proposals. Such support includes the explanation of complicated subject matter and responsiveness of a Bidder's proposal to the requirements of the RFP, as well as answering questions from evaluators.
- My role as a SME is not to provide opinions or otherwise influence the evaluators in their decision making.
- Any notes taken on proposals shall be provided, in written format, to the RFP Coordinator only, who will then pass them to the evaluators following the RFP Coordinator's review of such notes to ensure compliance with these terms and conditions.
- Oral presentations to the evaluation team of my findings and notes will not be permitted. Notwithstanding the foregoing, I will attend the team evaluation meetings and will be available to answer any questions, orally, regarding subject matter as requested by the evaluators.
