State of Maine Procurement Justification Form

PART III: SUPPLEMENTAL INFORMATION

Maine school districts at times, require one-to-one support related to the administration of Maine's assessment. The assessment team and subsequent assessment coordinators are responsible for the implementation of the assessment. As a result, these individual assessment coordinators do not have the capacity to support the multiple and nuanced needs identified by Maine Schools and Districts. The availability of a Maine educator/technology coordinator to support and reach out to Maine school and districts is of great benefit and expedites the Departments response in assisting schools.

2. Provide a brief justification for the selected vendor to supplement the response in Part II.

This educator, Andrew Wallace, is familiar with:

- has established relationships with Maine educators, and school/district administrators;
- all facets of the Maine assessment system;
- the required technology demands that will contribute to the successful administration of the assessment;
- platform specifications
- challenges, hurdles and pitfalls that schools may have to overcome in order to administer the assessments;
- Interfacing with school student information systems
- Maine's data file & demographic file formatting.

All of the above elements expedite the supports the Department, through Andrew Wallace, is able to provide to schools and districts in Maine, at their point of need and geographically where they are. Without this support, District Assessment Coordinators (DACs), technology directors, and assessment directors will be lacking the on the ground experienced support.

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

Federal assessment funds are utilized to fund the technical assistance and support as outlined in the contract. The cost of \$90 per an hour remains unchanged from the 2020 contract and has been deemed fair and reasonable in relation to the level of expertise being provided by the vendor. Subject matter experts from large scale organizations have a much higher cost associated with the support to be provided and do not have the knowledge related to the intricate nuances of school SIS systems in relation to utilized assessment platforms.

4. Describe the plan for future competition for the goods or services.

Procurement and future competition will be reviewed when applicable.
