PART III: SUPPLEMENTAL INFORMATION

The Forensic Link Adapter (FLA) is a universal devise for downloading digital data from heavy vehicles. The Smart Sensor Simulator 2 (SSS2) is a device that emulates the electronic systems of a truck and allows investigators to retrieve data out of electronic control units in Commercial motor vehicles providing information to assist in determining what caused the accident and provide data to help eliminate similar accidents in the future. In short, this equipment hooks into the ECM (electronic control module) and allows us to pull all data from the commercial vehicles. This data includes, speed, braking applications, engine braking and driver control inputs. This information along with a proper scene reconstruction gives the investigator a full snapshot of the crashes and allows us to target in on areas of crash prevention. McSap Grant funded.

2. Provide a brief justification for the selected vendor to supplement the response in Part II.

This is the only company that offers this software and puts together such a kit. There is no similar software on the market, and this is the only kit that other truck professionals use.

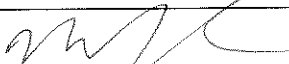

3. Explain how the negotiated costs or rates are fair and reasonable; or how the funding was allocated to grantee.

This is a sole vendor for this product, so no comparison pricing is available.

4. Describe the plan for future competition for the goods or services.

This is a one-time purchase.
